

To whom it may concern in the OPR,

It has come to my attention that a development in my neighborhood, the Millenium Hollywood Center, is seeking CEQA exemption through Environmental Leadership Development Project designation. These designations were created to encourage building innovations in conservation and energy use. To propel excellence in development not to evade regulations.

This development lies ON the active Hollywood fault line. The Alquist-Priolo Act prohibits buildings for human occupancy on active fault lines. Please do not endanger Angelenos lives by disregarding the law.

Sincerely,
Yasmine Ross
