

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

April 1 – 15, 2015

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **April 1 – 15, 2015**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

2015042005	Use Permit Application No. PLN2015-0018 - Verizon Wireless - W. F Street Stanislaus County Oakdale--Stanislaus Request to construct a new 88' monopine with 9 wireless antennas, pre-fabricated equipment shelter, standby generator with fuel tank and supporting equipment within a 1,225 sf lease area with a 15' access and utility easement on a 2.3 acre parcel. Antennas will be mounted at 75'.	CON	04/20/2015
2015042007	Vesting Tentative Parcel Map Application No. PLN2015-0001 - James and Betty Lemos Stanislaus County Waterford--Stanislaus Request to create two parcels of 40 and 64 acres and a 40 acre remainder parcel from a 144 acre site.	CON	04/20/2015
2013021042	Groundwater Reliability Improvement Program (GRIP) Recycled Water Project Water Replenishment of Southern California Whittier--Los Angeles The proposed project would allow WRD to offset the current use of imported water with a combined total of 21,000 AFY for groundwater replenishment in the Central Basin via the Montebello Forebay. WRD would construct an AWT plant for advanced treatment of the tertiary treated recycled water from the San Jose Creek Water Reclamation Plant (SJCWRP) prior to recharge via spreading. Influent/effluent diversion structures would be constructed to connect the AWT plant to the existing outfall pipeline to allow the advanced treated water to be blended with the tertiary treated recycled water prior to spreading at the Montebello Forebay Spreading Grounds. Additionally, a proposed brine line would be constructed to extend underground from the AWT plant within the San Gabriel River Parkway and connect with an existing sewer pipeline in Beverly Road.	EIR	05/15/2015
2013061012	Uptown Jefferson Specific Plan Temecula, City of Temecula--Riverside Adoption of the Uptown Jefferson Specific Plan to allow for greater flexibility and a wider array of land use and development options within the 560 acre Project area. In addition, the Project would focus on increasing mobility opportunities and facilitating alternative transportation options, including walking, biking, and transit, through the implementation of new "complete streets" roadway configurations, traffic calming strategies, pedestrian-oriented facilities, and bike lanes. The Project would include a form-based code to better define development regulations and design standards in order to encourage higher density urban development. Anticipated buildout of the Specific Plan assumes up to 3,726 residential units, approximately 1.7 million square feet of commercial uses, and 316 hotel rooms.	EIR	05/18/2015
2013121077	Wolter Properties LP (Carmel Canine Sports Center) Monterey County Carmel-by-the-Sea--Monterey Use Permit and Design Approval for the development of a canine training/sports facility and event center for daily member usage and up to 24 "event days" (daily maximum of 250 people/300 dogs) per year, and related improvements. Modular (temporary) structures to include a 700 sq. ft. office trailer, 600 sq. ft. members trailer, 600 sq. ft. restroom trailer and 400 sq. ft. electrical/storage room. Site to	EIR	05/15/2015

	also accommodate up to 70 recreational vehicles on a short-term basis during "events" (Maximum of 24 nights per year).		
2012031045	General Plan Amendment 00743, Specific Plan 00364, Change of Zone No. 07143, EIR No. 00530, TTM No. 36450 or 32022, and Parcel Map No. 36453 Riverside County Riverside--Riverside Note: 1 HC	FIN	
	The Golden Valley Land Company, LLC (Project proponent) is proposing to implement a residential, mixed use (commercial/residential) and open space development at Colinas del Oro, an approximate 126.4 acre site located within the community of Meadowbrook, an unincorporated area in western Riverside County.		
	The project proponent will submit applications seeking approval from the County for a General Plan Amendment, the SP 364 Specific Plan, a Change of Zone, a Tentative Parcel Map, a Tentative Tract Map and a Community Facilities District to fund the required utility infrastructure systems for the Project area.		
2013042066	Oakland Coliseum Area Specific Plan Oakland, City of Oakland--Alameda Note: 1 HC	FIN	
	The Specific Plan calls for development of the Coliseum District with up to three new professional sports venues; an inter-modal transit hub adjacent to the current Coliseum BART station; an elevated pedestrian concourse with retail, restaurants, and hotels; and mixed-use, transit-oriented residential neighborhoods. Plan Build-out is also envisioned to include a new waterfront residential mixed-use development; a science and technology district that includes office and research and development uses; logistics and airport-related business uses; a potential transit link from the Coliseum BART station; and habitat restoration.		
2013081022	Palladium Residences Los Angeles, City of Los Angeles, City of--Los Angeles FYI Final	FIN	
	The Project would maintain and enhance historic Hollywood Palladium, and the Palladium would continue to be used as an event venue. The Project would also include two additional buildings up to 28 stories and approximately 350 feet in height developed under one of two options: Under Option 1, Residential Option, the two buildings would contain up to 731 residential units. Under Option 2, Residential/Hotel Option, the two buildings would contain up to 598 residential units and up to 250 hotel rooms and ancillary hotel uses including related restaurant and meeting space. Both Options would include 24,000 sf of ground-floor retail and restaurant space, recreational and open space facilities, and approximately 1,900 parking spaces.

2013101063	Hollywood Cherokee Project Los Angeles, City of Los Angeles, City of--Los Angeles FYI Final	FIN	
	<p>The Project Applicant, proposes to construct a four- to six-story, 224-unit residential apartment/condominium building (the Project) on a 1.14 acre site in the Hollywood Community of the City of Los Angeles. The Project consists of approximately 169,531 sf of new floor area and would replace an existing surface parking lot. A four-level parking garage comprised of one street level and three subterranean levels would be located below the residential levels and would provide a total of 305 parking spaces. The Project would also include a residential lobby and leasing area, a community room, approximately 985 sf of ground-floor commercial space, a gym, a swimming pool and open space decks on the rooftop level, and landscaped courtyards. The Project would have a total FAR of approximately 3.66:1, average across the Project Site.</p>		
2015041003	Bee Ordinance San Diego County --San Diego	MND	04/30/2015
	<p>The project consists of amendments to the County Code of Regulatory Ordinances Title 6, Division 2, Chapter 9 (Bee Ordinance). The proposal is to amend the Bee Ordinance to implement a three tiered approach to setback distances for placement of beehives on public and property in proximity to dwellings, property lines, roadways (which includes roads, trails, pathways, or easements used by the public), and sensitive sites.</p>		
2015041007	ENV-2014-4498-MND / 901 N. Vine Street Los Angeles, City of --Los Angeles	MND	04/30/2015
	<p>The proposed project is on a site that is approximately 25,337 sf, spanning four lots, and includes the construction of a five-story, 69-foot tall, mixed-use building that includes 3,000 sf of commercial space, 76 dwelling units, seven units for Very Low Income households, 88 vehicle parking spaces, 90 bicycle parking spaces, four electric vehicle charging stations, a subterranean parking garage, recreation room, gym, pool, spa, 5th floor deck, and barbecue area. The total project size is approximately 75,411 sf of floor area in the Hollywood Community Plan Area. The site is zoned C2-1D with a General Plan Designation of Highway Oriented Commercial. The project includes the demolition of an existing carwash, which consists of one 49-year old structure and approximately 8,314 sf in building sf.</p>		
2015041008	The Weddington Los Angeles, City of Los Angeles, City of--Los Angeles	MND	04/30/2015
	<p>The Applicant requests Site Plan Review pursuant to LAMC Section 16.05.C.1(b) to permit the construction and operation of a 5-story mixed-use development project located on 2 properties separated by Blakeslee Avenue, with a maximum height of 65 feet, within a Commercial Artcraft District, providing a total of 355,161 sf of floor area, 329 apartment units, ground floor commercial/artcraft uses, and 591 parking spaces.</p>

<u>Documents Received on Wednesday, April 01, 2015</u>			
2015042002	San Lorenzo River Lagoon Interim Management Program Santa Cruz, City of Santa Cruz--Santa Cruz The IMP focus on prevention of unauthorized river lagoon breaching affected aquatic species and control of water elevation of the lagoon to prevent localize flooding and improve habitat and public access. Installation of a temporary outlet channel or culvert would be installed between May 1 and November 15 for three years from 2015 through 2017 until a permanent program is developed. Implementation of Best Management Practices and monitoring actions are included.	MND	04/30/2015
2015042006	Mariposa Manor Subdivision (S 14-05) Chico, City of Chico--Butte A proposal to subdivide a 4.76 acre site into 34 parcels for future development with single-family homes. The average lot size would be 4,400 sf, and typical lots would be 44 feet wide and 100 feet deep. Gross density for the project would be 6.8 units per acre. As part of the improvements the developer would construct adjacent portions of Mariposa Avenue as well as internal streets. The new streets would connect Mariposa Avenue to Lucy Way, which stubs into the eastern side of the site, and Swallowtail Way, which stubs into the southern side of the site.	MND	04/30/2015
1994071005	Tustin Legacy Specific Plan Amendment Tustin, City of Tustin--Orange Note: Supplemental The overall purpose of amending the Tustin Legacy Specific Plan (formerly known as the MCAS Tustin Specific Plan) is to provide comprehensive direction - in terms of revisions to development regulations, design guidance, and implementation of open space, circulation, and other infrastructure - for the remaining project area owned by the City of Tustin, while implementing the goals and policies of the City of Tustin General Plan. The Specific Plan Amendment calls for a range of residential product types and education, commercial, commercial/business, entertainment/recreation, and park land uses.	NOP	04/30/2015
2015031044	Watermark Specific Plan Del Mar, City of Del Mar--San Diego Note: Revised The proposed project would be multifamily residential development consisting of 12 structures that would feature 48 residential units, with a proposed density of 20.24 units per acre. The residential units proposed would consist of a mix of studio, one-bedroom, two-bedroom, and three-bedroom units. The unit mix provides for a variety of options for residents with varying income levels. The proposed project would also include a recreation room, a pool and a spa area for the use of residents and associated maintenance and administrative amenities. The proposed project would provide a secured 105 stall parking structure on the 2.37 acre site. The proposed project includes a vehicular access point from San Dieguito Road to the secured parking structure.	NOP	04/30/2015

<u>Documents Received on Wednesday, April 01, 2015</u>			
2015041001	NoHo West Los Angeles, City of --Los Angeles The project includes demolition of the existing 90,000 sf office building at the corner of Laurel Canyon and Erwin Street and ~30,000 sf of the existing Macy's annex building. The main Macy's building would be expanded and re-used for ~500,000 sf of office uses. The project also involves development of the remainder of the Project site with ~300,000 sf of commercial uses, as follows: 142,513 sf of retail land uses, 48,687 sf of restaurant land uses, 40,000 sf of health club/gym, and 68,800 sf of cinema uses (with 1,750 seats).	NOP	04/30/2015
2015041002	Arcadia Logistics Center Arcadia, City of Arcadia--Los Angeles Arcadia Logistics Center Specific Plan (14-01) and Tentative Parcel Map (14-06) and associated General Plan Amendment to construct and operate a warehouse/distribution/logistics center having multiple buildings with a combined total of up to 1,688,000 sf of building space. Other features include loading docks, truck and passenger car parking areas, driveways, screen walls, water quality/detention basins, and landscaping. The site is a former sand and gravel quarry that is currently being filled through an Inert Debris Engineered Fill Operation in order for the site to be reclaimed with an end use.	NOP	04/30/2015
2015042003	West County Detention Facility Re-Entry and Treatment Expansion Contra Costa County Richmond--Contra Costa Contra Costa County Public Works Department (County) is working with the Contra Costa County Sheriff's Department to expand the West County Detention Facility (WCDF) as envisioned during the original planning for the facility. The proposed project entails the development of ~2.3 acres at the WCDF for a high-security detention facility with supporting reentry program facilities, and a mental health treatment facility. The new facility would provide high security housing, and educational and vocational facilities and programs to help prepare inmates for reentry into society.	NOP	04/30/2015
2015042004	General Plan 2030 and Zoning Ordinance Amendments Butte County Chico, Oroville, Paradise, Gridley, Biggs--Butte General Plan Amendment to Agricultural Element Policy AG-P5.3 regarding Agricultural Buffers, and Amendment to the Zoning Ordinance to be consistent with the amended policy (Article 6. Residential Zones Provisions for a setback in residential zones from interim agricultural uses (orchards and vineyards); Article 6., 7., and 8. Provisions for animal grazing and crop cultivation in residential, commercial, and industrial zones in parcels 1 acre or more in size; and Article 12. Residential Setback from Orchards and Vineyards. Provisions for a setback in residential zones from interim agricultural uses (orchards and vineyards).	NOP	04/30/2015

2015042008	SUD - B Northeast Quadrant Specific Plan Lincoln, City of Lincoln--Placer A proposed specific plan development, 186 acres, immediately west of Lincoln. Proposed land uses include commercial, low density residential, and open space.	NOP	04/30/2015
2015022002	Tentative Parcel Map Application No. PLN2015-0005 - Basrai Stanislaus County --Stanislaus Request to divide a 117.63 acre parcel into two parcels of 57 and 59 acres. This parcel is currently improved with an existing single-family dwelling, planted in orchards, and will remain in agricultural production. The project site is currently enrolled in Williamson Act Contract No. 71-412. Proposed Parcels will have access to County maintained Welty Road.	Neg	04/30/2015
2015041004	Transportation Fiber-Optic Cables Project Hermosa Beach, City of Hermosa Beach--Los Angeles RAM Telecom International, Inc. (applicant), proposes to install and operate up to four transpacific submarine cable systems with United States landings in Hermosa Beach, California. The proposed Project would be implemented in four phases consisting of one phase for each of the four cable systems. Each cable system would entail installing a marine fiber-optic cable system on the sea floor across the Pacific Ocean, landing at one of two sites in Hermosa Beach, and then connecting underground to a terminal on land at one of four potential power feed equipment (PFE) facility locations.	Neg	04/30/2015
2015041005	E&B Natural Resources - Natural Gas Pipeline Project Santa Barbara County --Santa Barbara E&B Natural Resources proposes to construct and operate a 3-inch buried natural gas pipeline located approximately 0.7 miles east of the intersection of Aliso Canyon Road and State Highway 166 in the Cuyama Valley. The proposed pipeline would be approximately 1,125-feet in length and buried within an existing roadway surrounding the Plains All American Pipeline Pump Station (PAAPL PS) in the Russell Ranch Field. The pipeline would connect two existing pipelines (3- and 8-inches) and transport natural gas from E&B's existing Russell Ranch Field facility to its existing South Cuyama Gas Plant for sale. The proposed project would replace E&B's current practice of disposing of excess natural gas by reinjection at its Russell Ranch Field facility.	Neg	04/30/2015
2015041006	Union Oil Remediation Santa Barbara County Santa Maria--Santa Barbara The request is for a Land Use Permit to allow for the excavation of petroleum hydrocarbon-impacted material associated with former oilfield operations. Excavation would occur on two Union Bradley I wells (W1-3 and -5), and four Union Bradley wells (W2-1, -3, -21, and -22). These excavations would total 613 cubic yards, including clean overburden soil. Clean soil would be stockpiled on site and used to backfill excavations. Approximately 128 cubic yards of contaminated soil would be transported by truck to the Santa Maria Landfill. Excavation areas would be restored to preconstruction conditions using	Neg	04/30/2015

	approximately 128 cubic yards of clean backfill from an off-site borrow source. Excavation depths would range from approximately 7 to 15 feet below ground surface. The property includes 2 parcels (617 acre and 148 acres) zoned AG-II-40 and shown as APN 129-010-001 and 128-091-001, located south of Prell Road adjacent to U.S. Highway 101 in the Santa Maria Area, 4th and 5th Supervisorial Districts.		
2015041009	Sewer and Water Plant Solar Project Bishop, City of Bishop--Inyo The proposed project will install four separate photovoltaic systems, one at each of the Well 2 and Well 4 sites, and two at the Wastewater Treatment Plant. One of the systems at the plant will power the plant and the other will power electrical equipment at the sewer ponds. The total capacity of the four systems would be about 285 kilowatts. All of the systems would use ground-mounted solar panels installed in rows and tilted south. The high side of each row of panels would be about 5 feet above the ground. Foundations would probably be pounded posts of poured footings.	Neg	04/30/2015
2003021141	General Plan Amendment/Zone Change (PA 01-114) (aka: The Ranch Plan) Orange County --Orange Santa Margarita Water District filed an application for a temporary permit to appropriate water on March 9, 2015 pursuant to Water Code section 1425. The district proposes to divert return flows from purchased water flowing in Gobernadora Creek. An upper basin will use a wetlands process to treat non-storm flows for irrigation use within the Coto de Caza community. A lower basin will be used to attenuate storm flows. A portion of the water diverted will be stored in the District's Portola reservoir. The temporary permit is necessary to reduce the District's reliance on imported water and prevent the imminent loss of grant funding for the project.	NOD	
2006061140	South Subregion Natural Community Conservation Plan / Master Streambed Alteration Agreement / Habitat Conservation Plan Orange County --Orange Santa Margarita Water District filed an application for a temporary permit to appropriate water on March 9, 2015 pursuant to Water Code section 1425. The district proposes to divert return flows from purchased water flowing in Gobernadora Creek. An upper basin will use a wetlands process to treat non-storm flows for irrigation use within the Coto de Caza community. A lower basin will be used to attenuate storm flows. A portion of the water diverted will be stored in the District's Portola reservoir. The temporary permit is necessary to reduce the District's reliance on imported water and prevent the imminent loss of grant funding for the project.	NOD

2014052082	<p>Recycling Industries Transfer Station Yuba City Yuba City--Sutter</p> <p>Recycling Industries Transfer Station (RITS), now operating as a recycling facility, is proposing to expand existing operations to a transfer/processing facility. The expansion will enable the facility to provide expanded recycling and self-haul solid waste transfer services generated by residents and businesses in Yuba City and Sutter County by providing a waste transfer and recycling facility closer to their residences and businesses. Currently, the Yuba Sutter region has only one transfer station open to the public. However, over 60% of the regions self-haul waste is generated within Yuba City and the surrounding Sutter County area. The project would expand to construct a new 25,000+ Square foot receiving area with sorting and baling capabilities.</p> <p>Material is received and shipped to end use markets on a regular basis. Daily inventory is approximately five days of processed material. Material is shipped out of the facility after being on site from two to thirty days.</p>	NOD	
2015021081	<p>63 Jefferson Project Murrieta, City of Murrieta--Riverside</p> <p>The project proposes the grading an 8-acre site to create development pads, which will allow for future financing and conveyance of the site. The project includes clearing the site, grading, and the provision of erosion control measures per the City's regulations.</p>	NOD	
2015022050	<p>West Point and Wilseyville Wastewater Treatment Plant Consolidation Project Calaveras County Water District --Calaveras</p> <p>The existing West Point sewer plant, constructed in 1993, serves 165 connections with a 0.058-mgd capacity. The project consolidates a small sewer plant serving 28 residential connections in the nearby community of Wilseyville with the West Point plant while operating within existing capacity. The project includes construction of a small lift station and 3-inch x 3,800 ft sewer pipeline, community septic tank to remove solids and equalize flows, septage/sludge facilities, installing synthetic liners in existing storage ponds, electrical/instrumentation upgrades, and a new 3-inch x 3500-ft pipeline to transfer effluent to the existing Wilseyville pond and sprayfield for auxiliary storage and disposal.</p>	NOD	
2015022081	<p>2015 Water Transfer Program Sutter Extension Water District Yuba City--Sutter</p> <p>The SEWD proposes to sell up to 16,843 acre-feet (af) of water to the participating member districts of the State Water Project Contractors Incorporated or other South of Delta purchasers, including one or more Central Valley Project contractors (Buyers) during the 2015 irrigation season. Buyers are seeking up to approximately 194,000 af of transfer water from various willing sellers in the Sacramento Valley during the 2015 irrigation season. Purchasing this water would lessen potential water supply shortages to these Buyers that may occur as a result of dry hydrologic conditions and regulatory restrictions on pumping in the Delta.</p>	NOD

2015038403	Pardoe's Point Boat Ramp Improvement Project U.S. Forest Service --Amador The Amador Ranger District proposes to extend the length of the Pardoe's Point boat ramp to improve safety and provide easier access for launching boats for the public. Improvements will include adding 220 feet by 20 feet to the existing boat ramp with the construction of a re-bar enforced concrete pad over rock shoreline.	NOE	
2015038404	Silwa Accessory Structure with Bathroom Conditional Use Permit No. 2215 El Cajon, City of El Cajon--San Diego Establish a detached accessory structure with bathroom at an existing single-family residence.	NOE	
2015048001	San Andreas District Office - Hungry Valley State Vehicular Recreation Area Parks and Recreation, Department of Gorman--Los Angeles The San Andreas District is new to the organizational structure of the Department of Parks and Recreation and no base of operations for District personnel has been established. The project is on the west side of Orwin Way between 45121 Orwin Way and 54325 Orwin Way. Approximately 16000 square feet will be disturbed for the driveway, parking lot, and modular pad. Approximately 5000 square feet will be used for the septic system, consisting of a 1500 gallon tank and 300 feet of infiltration in a manifold type leach field. Water and electrical are approximately 70 feet away from the proposed location of the modular, the trenching would be about 36 inches deep by 18 inches wide within the footprint of the parking lot and driveway.	NOE	
2015048002	Repair a Hydrant System Leak - 3J830 Caltrans #4 San Carlos--San Mateo Repair a hydrant system leak and repair waterline leaks. The project is to preserve and maintain the safety and integrity of the Highway.	NOE

2015048006	Bodie Bowl Mountain Bike Special Event Parks and Recreation, Department of --Mono Issue a special use permit for the Bodie Bowl Mountain Bike Event on Saturday August 22nd 2015 at Bodie State Historic State Park to partially benefit the Reel Recovery Fund. On August 21st after park operating hours, the designated course route will be marked and outlined with orange cones and A-frame barricades. The route will follow Main, Union, Fuller Green and Wood Streets in Bodie State Historic Park and continue onto Bureau of Land Management (BLM) land and private property in the Bodie Hills. The event, within Bodie State Historic Park, will occur between the hours of 6:15 and 9:00 AM, finishing prior to opening the park for regular park visitors. Course markers will be removed after the last bike riders exit the park's boundaries.	NOE	
2015048007	Former Union Oil Petroleum Release Site Corrective Action Plan (SL 185714256) Regional Water Quality Control Board, Region 5 (Central Valley) Unincorporated--Merced Remedial action to reduce the possibility of further impacts to site groundwater. Actions include excavation of approximately 2,355 cubic yards of impacted soil as well as installing two subsurface slurry walls to prevent migration of impacts towards the California Aqueduct.	NOE	
2015048008	EA City of Selma Shafer Park Portable Restroom Project Selma, City of Selma--Fresno This grant will be used to provide temporary portable restroom in an existing Park to add addition restroom facilities for the public.	NOE

2014081056	Countywide Water Conservation Program San Luis Obispo County --San Luis Obispo San Luis Obispo County is in the midst of an 'exceptional drought" that has lowered water levels in groundwater basins and surface lakes and reservoirs throughout the County. The Board of Supervisors has declared three groundwater basins, Nipomo Mesa Management Area (NMMA, being part of Santa Maria Groundwater Basin), the Los Osos Groundwater Basin, and the Paso Robles Groundwater Basin, at Level Severity (LOS) III, which indicates that groundwater demand has met or exceeded the dependable supply.	EIR	05/18/2015				
2009091001	San Diego Freeway I-405 Improvement Project Caltrans #12 Costa Mesa, Seal Beach--Orange NOTE: Final The I-405 Improvement Project proposes to widen the corridor by adding one general purpose lane and a tolled Express Lane in each direction to be managed with the existing carpool (HOV) lane as a tolled Express facility (Alt 3) between SR 73 and I-605. The proposed action would improve the freeway mainline and interchanges on I-405 in Orange and Los Angeles counties for approximately 16 miles between 0.2-mile south of Bristol Street and 1.4 miles north of I-605, as well as portions of SR 22, SR 73, and I-605 to reduce congestion and improve lane continuity through the corridor.	FIN					
2015041010	951-1055 South Beach Boulevard La Habra, City of La Habra--Orange The proposed project would involve the development of nine separate two, three, and four-story residential structures consisting of 335 apartment units on the 10.48 acre project site from an approximate density of 32 dwelling units per acre (du/ac). The proposed project would require a zone change from General Commercial (C-3) to "Fairfield Specific Plan" (SP-7). To accommodate the proposed development, an abandoned hotel, existing concrete building foundations, parking lot lights, asphalt, and landscaping would require removal.	MND	05/01/2015

2015041011	<p>Amendment to the Opportunistic Beach Fill Program Oceanside, City of Oceanside--San Diego</p> <p>The City is proposing to renew and amend its Opportunistic Beach Fill Program (OBFP) for a five-year term. The purpose of the City's amended OBFP is to continue to facilitate the timely approval for placement of beach-quality sand on City beaches as suitable material becomes available. Two placement areas have been identified for the amended OBFP covering a total of approximately 3,600 feet of the public beach shoreline: between Seagaze Drive and Pine Street; and between Oceanside Boulevard to the river mouth of Loma Alta Creek at the north end of Buccaneer Beach. The two placement areas associated with the amended program would allow the City flexibility for where materials could be placed along the shoreline to respond to needs resulting from acute and chronic erosion.</p>	MND	05/01/2015
2015041013	<p>Twin Creek Orange Show Road Storm Drain Project San Bernardino, City of San Bernardino--San Bernardino</p> <p>The Twin Creek Orange Show Road Storm Drain project is located in the City of San Bernardino, County of San Bernardino, CA. The City operates the drainage system infrastructure within its boundaries. The Twin Creek Orange Show Road storm drain system was originally constructed in 2002. The existing system is 36" reinforced concrete pipe (RCP) which discharges 92 cubic feet per second (cfs) into Twin Creek, although it is unclear what storm event this flow rate represents. The upstream end of the existing 36-inch drain line is just east of the railroad crossing near Amos Avenue, approximately 1,100 feet east of the Twin Creek channel.</p>	MND	05/01/2015
2015042009	<p>Site 18A Culvert Replacement and Fish Passage Enhancement Project Sacramento Area Flood Control Agency Sacramento--Sacramento</p> <p>SAFCA proposes to reduce the potential for fish stranding, further reduce predation by fish-eating (piscivorous) birds, and increase rearing and feeding habitat for juvenile salmonids at Site 18A, a seasonal wetland complex in the American River Parkway adjacent to the Natomas East Main Drainage Canal (NEMDC)/Steelhead Creek. The proposed project would involve replacing the existing culvert with a larger, wider culvert to improve the exchange of flows into and out of Site 18A, and modifying the gradient of the interior swales and increasing the extent of seasonally submerged vegetation and overhead cover within the Site 18A floodplain.</p>	MND	05/01/2015
2015041012	<p>Regional Park & Equestrian Center Imperial, City of --Imperial</p> <p>The City of Imperial proposes to develop the Project site with a variety of recreation uses including a Regional Park and Equestrian Center on a 143-acre parcel immediately adjacent to the northern boundary of the City of Imperial and 0.5 mile west of SR 86. The Project site is bounded by Larsen Road on the north, La Brucherie Road on the east, Ralph Road on the south, and the Newside Canal on the west. The Project site consists of one parcel (APN 063-010-049) and is currently within the City's Sphere of Influence (SOI) in unincorporated Imperial County and surrounded by several proposed subdivisions. The proposed Project includes a 22.98 acre Sportplex Regional park with tournament-level sports fields; 56.5 acres for an equestrian facility which includes a 160,000 sf covered arena (Figure 11), outdoor arena, stables, and a Recreational Vehicle Park with 200</p>	Neg	05/01/2015

	parking spaces; two open space parks (Park #1 = 9.5 acres, Park #2 = 5.27 acres) totaling 14.77 acres; 4.4 acres of Commercial Center with 15,000 sf for restaurants and equestrian-related retail stores; and 6.25 acres for an olive orchard and mill. As a regional park, this facility would serve residents from the City of Imperial, City of Brawley, City of El Centro and the incorporated area of the County. The park would provide "recreation tourism" in attracting visitors to the park from outside the Imperial Valley into the incorporated City boundaries.		
2009041129	South Shores Church Master Plan Dana Point, City of Dana Point--Orange The project is for a Coastal Development Permit CDP04-11; Conditional Use Permit CUP04-21 and Site Development Permit SDP04-31 and includes the demolition of 23,467 sf of building space, including the existing Chapel, Administration and Fellowship Hall, and Preschool, and construction of 52,651 sf of building space, including a new Preschool and Administration Building, two Christian Education Buildings, and a Community Life Center. The project also includes construction of a two-level partially subterranean parking structure. The project is proposed in five phases over a 10-year period; however, construction activities would not occur continuously over the 10-year period.	NOD	
2015048013	Alvarado Channel Restoration Project Regional Water Quality Control Board, Region 9 (San Diego), San Diego La Mesa--San Diego The project entails repair of an existing utility access road that has been eroded. Currently, work trucks cannot drive through the section of road in question. Therefore, the proposed access road repair is crucial to allow access for emergency response and regular maintenance activities. The proposed work area is small (occurring within a 20 foot by 6-foot area), and all proposed work will occur within the footprint of an existing access road.	NOE	
2015048015	Elevator Maintenance and Repair Los Angeles County Los Angeles, City of--Los Angeles Maintenance and repair of existing elevator mechanical components to meet current Fire/Life /Safety code requirements.	NOE	
2015048017	The Cove School Solar Power Installation Larkspur-Corte Madera School District Corte Madera--Marin Project would consists of installation of solar panels on the top of several of the buildings within the academic/administrative core to generate electricity for the operation of the school. 2015048019	Neil Cummins Elementary School solar Power Installation Larkspur-Corte Madera School District Corte Madera--Marin Project would consist of installation of solar panels on top of the gymnasium building to generate electricity for operation of the school. The project would lower District energy costs and potentially reduce air contaminants that might otherwise result from the use of fossil fuels.	NOE	
2015048020	South Propsect Island/Decker Island Property Acquisition Water Resources, Department of --Solano DWR will obtain from the Port of West Sacramento approx. 293.94 acres of property on the southern third of Prospect Island, 99.66 acres along the western edge of the northern portion of Prospect Island (19.41 acres in fee and 80.25 acres of spoil easements), and 139.83 acres of property on Decker Island. The purpose of said acquisition is possible habitat restoration. DWR will obtain the land and maintain it under existing conditions until it develops a habitat restoration plan and CEQA analysis for that plan that would focus on providing additional habitat and food web productivity to support native fish species of concern.	NOE	
2015048021	Letter of Non-Objection to Enter onto Sovereign State Land in the Pacific Ocean at Fisherman's Cove to Install a Temporary Salt Water Fire Supression System California State Lands Commission --Los Angeles - PRC 3692.9 Authorization to install a temporary salt water fire suppression system effective until Dec. 31, 2015.	NOE	
2015048022	B Street Pier Frontage Pavement Repair San Diego Unified Port District San Diego--San Diego The proposed project involves pavement maintenance, including grinding of asphalt-concrete pavement, providing asphalt material overlay, and restoring existing pavement striping and markings. Construction of the proposed project is anticipated to commence in March 2015 and take approx. five days to complete. No excavation or other ground disturbing activities are required to complete the proposed project. Approx. 150 cubic yards of asphalt-concrete grindings will be hauled offsite as a result of the proposed project. Conservatively, it is anticipated that the proposed project will generate an estimate of approx. 70 daily trips (ADT). Vehicle trips will be associated with deliveries, transport of construction workers, and hauling of debris.	NOE	
2015048023	San Diego Yacht Club Boat Lot Resurfacing San Diego Unified Port District San Diego--San Diego The proposed project involves the repair and resurfacing of the existing boat lot located in the northwest corner of the San Diego Yacht Club (SDYC) leasehold in San Diego, CA. The asphalt surface within the existing approx. 20,925 sq. ft. boat lot has deteriorated over time, and the proposed project will resurface the lot to improve its usability and appearance. The proposed project will not expand the existing boat lot or change the number or layout of parking spaces within the existing boat lot. Boats temporarily displaced by the proposed project will be relocated other unoccupied areas of the boat lot.	NOE

2015048024	<p>Minor Repair to Wyatt Pier Floating Dock San Diego Unified Port District San Diego--San Diego</p> <p>The proposed project involves replacement of portions of an existing floating dock at Wyatt Pier located at 939 Scott Street in the City of San Diego. Two 4-foot by 8-foot existing portions of a 537 sq. ft. wooden floating dock will be removed and replaced with a 4-foot by 8-foot wooden deck portions. The project will consist of replacing joists, connection hardwares, and decking of the existing floating dock. All repairs and construction will be performed within the existing permit area, as described in the Tideland Use and Occupancy Permit with the District and Laurie Wyatt Driscoll for this property (Clerk Doc. No. 56660). Overall, the replacement portion of the floating dock will be identical in length, widthm, and locations as the existing portions of the floating dock.</p>	NOE	
2015048025	<p>Repainting the Outer Walls of Sutter's Fort Parks and Recreation, Department of --Sacramento</p> <p>Abate the existing lead paint and repaint the exterior of Sutter's Fort State Historic Park to walls to protect this historic resource.</p>	NOE	
2015048026	<p>BDU ECC Generator Project Forestry and Fire Protection, Department of San Bernardino--San Bernardino</p> <p>Project consists of the installation of a new standby emergency generator for the Unit's emergency command center (ECC) to replace the existing generator, which does not currently meet the South Coast Air Quality Management District (SCAQMD) standards. The generator will be a liquid propane gas (LPG) fired type generator and will require the following improvements: a 13 foot by 20 foot by six inches deep concrete pad for two 1,000 gallon LPG tanks, 10 bollards to protect the tanks from potential vehicle contact, 375 feet of trenching (18 inches wide by 28 inches deep) to install a new one inch gas line from the LPG tanks to the generator building, two bollards to protect the new gas line at the point of entry to the existing generator building, and a new shutoff valve and pressure and flow regulator at the generator building. A two-foot by 15-feet long section of asphalt will be saw-cut and removed to allow for trenching to the generator building entry point. it will be replaced with eight-inch concrete, and two existing driveways will also be saw-cut and removed to allow for trenching. They will be replaced with eight-inch thick concrete. Additional improvements include the installation of an expanded metal cage as a preventative safety measure over the existing two-inch backflow prevention valves near the easement in front of the ECC building. Trenching will be completed using mostly hand tools. This project will allow the ECC to remain functional during the event of a power outage and will meet or exceed current SCAQMD standards.</p>	NOE	
2015048027	<p>CAL FIRE Siskiyou Unit Headquarters Water Pipe Replacement Forestry and Fire Protection, Department of --Siskiyou</p> <p>Over the past several years the water pipe system at the SKU headquarters facility has experienced multiple water leaks from the four-inch main line as well as the small lateral supply lines. The Unit has expended a significant amount of time and money repairing the ageing system, so it was determined it would be more feasible to replace the entire system rather than continue constant repairs. The project will entail the use of a backhoe and hand crews to dig up and remove the entire water pipe system, and then replace the entire system with new pipe. The</p>	NOE

	<p>new system will be installed in the exact location of the existing system and no new or additional pipes will be installed. The water line system is located between two and four feet in depth and is positioned below a paved driveway, parking area, lawn or sidewalk. The project will entail the use of a backhoe and hand crews to excavate 400 to 500 feet of trench, which will be four to two feet in depth and two feet in width. Hand crews will be utilized to excavate the smaller trenches associated with lateral supply lines. Soil will be temporarily removed and placed on flat, paved ground or lawn directly adjacent to the excavated trench. Once pipes have been replaced, the excavated soil will be placed back into the trench, manually compacted with pavement, cement or lawn. it is anticipated the entire project will require 2 to 3 weeks to complete. No native vegetation or trees will be removed, and there are not watercourses in the project area.</p>		
2015048028	<p>Hermit Springs Water Tank Project Forestry and Fire Protection, Department of --Calaveras</p> <p>The capacity of the existing water tanks is insufficient, and the Hermit Springs Fire Station has run out of water the past few seasons. Two additional 5,000 gallon cement tanks will be constructed immediately adjacent to the existing tanks. The tanks will be approximately 10 feet in diameter by 12 feet tall. The project will consist of preparing a pad for the tanks using a backhoe for approx. one half day. The tank form will then be placed with a backhoe and cement trucks used to pour the tanks. Some minor trenching will be necessary to connect the tanks to the existing system. The project is expected to take approx. two weeks.</p>	NOE	
2015048029	<p>Woodlands FFS - Water Storage Tank Project Forestry and Fire Protection, Department of --Mendocino</p> <p>The proposed project involves placing the existing idle well into service by installing a well pump, placing three new poly 5,000 water tanks adjacent to the existing concrete water tanks, installing approx. 300 feet of 3/4-1 inch supply line in an excavated trench from the idle well to the new poly storage tanks, installing approx. 150 feet of 2-3 inch supply line in an excavated trench to two new standpipes and trimming of several trees to allow for clearance of the new poly water tanks. Excavated soils will be backfilled to original grade.</p>	NOE	
2015048030	<p>Lighting Retrofit Project Corrections and Rehabilitation, Department of --Solano</p> <p>Pursuant to Energy Executive Order B-18-12 calling for a reduction in energy usage of 20 percent by the year 2018 for all state facilities, the CA Dept. of Correction and Rehabilitation (CDCR) is undertaking numerous energy savings projects. At SOL, CDCR is planning to retrofit existing lighting. The project includes the following components: 1) convert T12 fixtures to T8 fixtures 2) convert incandescent fixtures to light emitting diode (LED) fixtures; 3) convert compacted florescent fixtures to LED fixtures; 4) convert high pressure sodium fixtures to LED fixtures; 5) convert metal halide fixtures to LED fixtures; and 6) convert quartz halide fixtures to LED fixtures.</p> <p>The purpose of this project is to reduce electrical usage and maintenance costs, not to change the lighting conditions. The intensity, timing, and duration of lighting will therefore remain the same.</p>	NOE

2015044002	13th Street Bridge Replacement at the Santa Ynez River Crossing, Vandenberg Air Force Base, CA U.S. Air Force Lompoc--Santa Barbara Note: Review Per Lead The U.S. Air Force proposes to construct a replacement bridge for the 13th Street crossing of the Santa Ynez River and to install fiber optic cable under the Santa Ynez on Vandenberg Air Force Base, CA.	JD	04/28/2015
2015041017	Permittee-Responsible Off-Site Mitigation Preserve University of California, Merced Chowchilla--Madera, Merced UC Merced proposes the construction and establishment of a permittee-responsible off-site mitigation preserve by UC Merced on a 65.5-acre site on the Lazy K Ranch in Madera & Merced Counties. A draft vernal pool restoration plan has been developed for the Mitigation Preserve site. Development of the Mitigation Preserve would include restoration of vernal pools and associated upland habitat.	MND	05/04/2015
2015041040	Meta Housing Corporation; Compton Senior Housing Development Phase II Compton, City of Compton--Los Angeles The Project includes the redevelopment of a vacant 35,323 sf lot with an affordable rental housing project consisting of 36 units for senior citizens and associated surface parking. Twenty units are proposed as 1-bedroom units with the remaining 16 as 2-bedroom units; the maximum site population of 78 persons. The proposed project is 3 stories tall with a maximum height of 35 ft. A total of thirty six parking stalls or one stall per unit are proposed. The Project includes a General Plan Amendment request to change the land use designation from General Commercial to High Density Residential and a Zoning Change from M-L (Limited Manufacturing) and C-L (Limited Commercial) to R-H (Residential - High Density). The Project includes consideration of a density bonus pursuant to SB 1818 to allow an increase of units.	MND	05/11/2015
2015042010	Recycled Water Project Brentwood, City of Brentwood--Contra Costa The City of Brentwood is proposing to construct a new recycled water pipeline, two recycled water storage tanks, and additional pumps and valves for these facilities. The pipeline route is approximately 17,500 feet long and the storage tanks would have a total capacity of about 4 million gallons. The proposed facilities will support the increase use of about 1750 acre feet per year of Title 22 tertiary recycled water for landscape irrigation to existing potable and non-potable water users.	MND	05/04/2015
2015041014	Heritage Ridge Residential Project Goleta, City of Goleta--Santa Barbara -Development of 360 rental units - 132 for seniors (62 years and older) and 228 workforce apartments; -Development of a two-acre neighborhood park; -Modification to allow reduction in parking from 183 parking spaces to 152 parking spaces for the Senior Apartments; -Vesting Tentative Map to consolidate 13 existing parcels into three parcels;	NOP	05/04/2015

	-General Plan Amendment to remove a mapping designation of Environmental Sensitive Habitat area on site as denoted in the City's Open Space and Conservation Elements.		
2010061045	Road Extension 10-01 and Coastal Development Permit 10-03 Laguna Beach, City of Laguna Beach--Orange Extension of the northerly end of Atlantic Way approximately five feet from its current terminus. This environmental review is limited to assessment of the potential environmental impacts of extending the paved road approximately five-feet within the Atlantic Way right-of-way. Meaningful environmental review of the anticipated single family residence is not capable of being performed at this stage, in the absence of site- and design-specific plans. The subsequent design of the house, exact structure placement, size, site coverage, setback, building height and associated improvements (including the driveway and retaining walls) will require future discretionary approval by the Design Review Board including compliance with the CEQA.	Neg	05/04/2015
2015031043	Petersen Ranch Mitigation Bank Los Angeles County --Los Angeles The Mitigation Bank would focus on the restoration, establishment, enhancement, and preservation of wetland and riparian habitats as well as habitat for state listed wildlife species. Aside from undisturbed land conservation, the type of work proposed includes removing berms, restoring degraded man-made stock ponds to wetland habitats, and restoring hydrologic connectivity consistent with the properties' historical hydrology. The primary activity to take place within the bank is planting.	Neg	05/04/2015
2015041016	Signal Hill Oil Code Ordinance Amendment Signal Hill, City of Signal Hill--Los Angeles The proposed Project is an ordinance amendment of the City of Signal Hill Oil Code to revise development standards for properties containing abandoned wells by adding a City Equivalency Standards that would allow improvements to be located over or in closed proximity to abandoned wells and to require methane testing on any property proposed for development. In addition, portions of Zoning Code Title would be amended to maintain consistency with the amended Oil Code.	Neg	05/04/2015
2015041018	Cameron Commercial Center Santee, City of Santee--San Diego The project would allow construction of a commercial center including approximately 7,330 sf of restaurant space and approximately 9,612 sf of retail and office space on a 2.2-acre site. The General Plan Amendment and Rezone are needed to change the small area of residential zoning on the north side of the property to General Commercial. Proposed structure would accommodate approximately three restaurants, including one drive-thru restaurant at the northern end of the site. The site would also be developed with parking, landscaping, and bio-retention areas. The site is accessed by two existing driveways from North Magnolia Avenue. A signalized intersect would be installed at the main project entrance on Magnolia Avenue, aligning with Rockville Street.	Neg	05/04/2015

1989020264	<p>Metropolitan Bakersfield Habitat Conservation Plan Bakersfield, City of BAKERSFIELD--KERN</p> <p>The Project includes the urban development of up to 14,200 acres of Natural Lands or 33,400 acres of Open Lands within the 261,120-acre Metropolitan Bakersfield Habitat Conservation Plan (MBHCP) area, as defined in Figure 2 of the MBHCP, dated April 1994. The Project as defined in the ITP is specifically conditioned by the MBHCP, associated Implementation/Management Agreement dated August 15, 1994, and a federal incidental take permit pursuant to section 10(a)(1)(B) of the federal Endangered Species Act issued by the United States Fish and Wildlife Service on August 24, 1994. The 14,200 acres of Natural Lands or 33,400 acres of Open Lands that can be developed includes all MBHCP authorized development since 1994; as a result, only a portion of the development acreage contemplated in the 1994 MBHCP remains; as of December 31, 2012, there were 3,116.67 acres converted from Natural Lands to Urban Development, and 18,405.5 acres converted from Open Land to Urban Development. The ITP specifically authorizes development as contemplated in the MBHCP from the time of issuance of the ITP to ITP expiration in 2019.</p> <p>The Project will cause permanent impacts to up to 14,200 acres of habitat for Tipton kangaroo rat (<i>Dipodomys nitratooides nitratooides</i>), San Joaquin kit fox (<i>Vulpes macrotis mutica</i>), San Joaquin antelope squirrel (<i>Ammospermophilus nelsoni</i>), and Bakersfield cactus (<i>Opuntia basilaris</i> var <i>treleasei</i>) (Covered Species). The Project is expected to result in incidental take of San Joaquin kit fox and San Joaquin antelope squirrel, which are designated threatened species, and Tipton kangaroo rat and referenced above as issued by CDFW authorizes incidental take of Covered Species subject to various terms and conditions, including the requirement that all authorized impacts are fully mitigated.</p>	NOD	
2002022058	<p>Crystal Springs/El Cerrito Phase II Trunk Sewer Improvement Project Hillsborough, City of Hillsborough--San Mateo</p> <p>The purpose of the Project is to enlarge the remaining undersized segments of the Town's Crystal Springs/El Cerrito Sewer Trunk. The Project will expand flow capacity of the sewer trunk by removing and replacing 12,530 linear feet of pipeline, reconnect laterals, connect other existing mains to the new pipeline, and abandon some older lines in place. Construction will be done by open trenching, with trench widths ranging from 18 to 40 inches. Some portions of the collection system, upper and lower laterals, are in poor condition and allow a substantial amount of inflow and infiltration during storm events, overloading the system's hydraulic capacity.</p> <p>The Project will also entail trench stabilization at four locations along the east side of El Cerrito Avenue, to increase the structural stability of the road shoulder, prevent the loss of stream bank vegetation, and reduce sediment loads to the San Mateo Creek.</p>	NOD

2015041019	ENV-2014-4618-MND, VTT-72813 Los Angeles, City of Los Angeles, City of--Los Angeles The project involves the demolition of an existing 169 unit apartment building and the construction, use, and maintenance of a new 270 unit condominium development. Most of the units within the existing apartment complex are currently occupied. The proposed new condominium development will be four stories in height and will include a minimum of 478 residential parking spaces and a minimum of 135 visitor parking spaces within two subterranean parking levels. The project will require the export of approximately 90,000 cubic yards of dirt. The project site includes 141 non-protected trees, of which 126 trees will be removed as part of the project.	MND	05/05/2015
2015041020	Opal Avenue Residential Development San Bernardino County Redlands--San Bernardino A) A General Plan Amendment to change the official land use zoning district from community industrial to single residential on 35.53 acres. B) A tentative tract map (18952) to create 131 lots on 35.33 acres.	MND	05/05/2015
2015041021	The Avalon Project Carson, City of Carson--Orange The project proposes a mixed-use development with 357 market rate apartment units and 32,000 sf of commercial space on a 5.5-acre site located at the northwest corner of the Carson Street/Avalon Blvd intersection. The project would include two separate structures: the "Podium" (a five-story building to be located on the eastern portion of the Avalon Boulevard and Carson Street intersection), and the "Wrap" (a four-story building fronting Carson Street in the western portion of the site). The "Podium" would consist of a one level of subterranean parking garage, two above ground garage levels, ground floor retail and restaurant uses, and 221 residential units. The "Wrap" would exclusively consist of 136 residential units within four stories wrapped around a residential parking garage. The project site is listed on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5.	MND	05/05/2015
2015042011	Grape Creek Streamflow Enhancement and Off-Channel Irrigation Pond Sonoma County Healdsburg--Sonoma The need for this project is supported both by evidence that the project reach contains some of important spawning habitat, and by evidence that, despite good spawning conditions, summer low-flow conditions limit juvenile coho oversummer survival.	MND	05/05/2015
2015042013	Lewis Subdivision Humboldt County --Humboldt A Minor Subdivision of an approximately 21,977 sf parcel into two parcels of approximately 10,110 sf (net) and 7,420 sf in size. The parcel is currently developed with a single family residence which will remain on proposed Parcel 1. Pursuant to County Code Section 325-9, the applicant has submitted an exception request for a reduced right of way width for Hazel Avenue. The parcel is currently served with water and sewer by the McKinleyville Community Services District.	MND	05/05/2015

2009091001	San Diego Freeway I-405 Improvement Project Caltrans #12 Costa Mesa, Seal Beach--Orange NOTE: Final 1 CD	FIN
------------	---	-----

Caltrans as the Lead CEQA and NEPA agency, has prepared a Supplemental Draft EIR/EIS for the San Diego Freeway (I-405) Improvement Project in Orange and Los Angeles Counties, CA. This recirculation focuses on new traffic information, within the City of Long Beach and Los Angeles County, north of the limits of the proposed freeway capacity enhancement in Orange County. The new traffic information addresses the traffic changes in the Long Beach area along SR-22/7th Street, I-405, and I-605, and at their local interchanges.

2014071023	Wilderness Stewardship Plan for Sequoia and Kings Canyon National Parks National Park Service --Tulare, Fresno FYI Final	FIN
------------	---	-----

The National Park Service has prepared a Wilderness Stewardship Plan / Final EIS to provide direction for the National Park Service to make decisions regarding the future use and protection of the parks' wilderness. The WSP/FEIS analyzes the consequences of creating a plan that would provide management direction for the many outstanding resource values present in the parks' wilderness, including natural and cultural resources, as well as diverse recreational and educational opportunities for visitors.

2015011012	Redlands and Hemlock Booster Pumping Station Eastern Municipal Water District Moreno Valley--Riverside NOTE: Final 1 CD	FIN
------------	--	-----

Eastern Municipal Water District proposes to construct and operate a new Booster Pumping Station (BPS) located on the southwest corner of Redlands Boulevard and Hemlock Avenue in the City of Moreno Valley. The new facility will replace the existing Redlands and Ironwood BPS located on the northwest corner of Redlands Boulevard and Ironwood Avenue, approximately 1,500 linear feet north of the new proposed BPS. The purpose of the Redlands and Hemlock Booster Pumping Station Project is to address safety concerns, deficient capacity, and inadequate access associated with the existing BPS. The Proposed Project includes the demolition of the existing facility; construction of a new facility and related appurtenances; and installation of approximately 1,500 linear feet of 24-inch diameter discharge pipeline.

2015011012	<p>Redlands and Hemlock Booster Pumping Station Eastern Municipal Water District Moreno Valley--Riverside Eastern Municipal Water District (District) proposes to construct and operate a new Booster Pumping Station (BPS) located on the southwest corner of Redlands Boulevard and Hemlock Avenue in the City of Moreno Valley. The new facility will replace the existing Redlands and Ironwood BPS located on the northwest corner of Redlands Boulevard and Ironwood Avenue, approximately 1,500 linear feet north of the new proposed BPS. The purpose of the Redlands and Hemlock Booster Pumping Station Project is to address safety concerns, deficient capacity, and inadequate access associated with the existing BPS.</p> <p>The Proposed Project will address deficiencies with the existing BPS pumping from the 1900 Pressure Zone (PZ) to the 2080 PZ by replacing the existing BPS and providing adequate discharge pipeline capacity in the 2080 PZ to convey water to the existing 2080 PZ transmission and distribution pipeline system. The Proposed Project includes the demolition of the existing facility and associated appurtenances; construction of a new facility and related appurtenances; and installation of approximately 1,500 linear feet of 24-inch diameter discharge pipeline within public right-of-ways.</p>	NOD	
2015011024	<p>Temecula Valley Recycled Water Pipeline and Appurtenances Eastern Municipal Water District Menifee, Murrieta, Temecula--Riverside Eastern Municipal Water District (District) currently owns and operates the Temecula Valley Recycled Water Pipeline (TVRWP). The TVRWP conveys recycled water from the District's Temecula Valley Regional Water Reclamation Facility (TVRWRF) and Rancho California Water District's (RCWD) Santa Rosa Water Reclamation Facility to EMWD's Reach 4 Recycled Water Pipeline. The Reach 4 Recycled Water Pipeline conveys recycled water to EMWD's storage facility at the Sun City (SCRWRF) or to Lake Elsinore as make up water, and to Temescal Wash for discharge.</p> <p>The District is in the final planning stages of expanding the TVRWRF from 18-million gallons per day (MGD) to 23 MGD capacity. The project is proposing to construct an additional recycled water pipeline which would parallel the existing 36-inch diameter segment of the TVRWP. The proposed project would provide adequate capacity to convey increased flows from the TVRWRF, at the same hydraulic conditions as at present. Five alternative alignments were considered for the new pipeline. The preferred alignment (Alternative 1B) is approximately 3.1 miles (16,500 linear feet) in length from teh TVRWRF to the connection point within the existing 48-inch recycled water pipeline, approximately 1,350 feet southeast of the intersection of Adams Avenue and Fig Street in the City of Temecula.</p> <p>The proposed project also intends to make some improvements to the recycled water booster station at the SCRWRF to accommodate the increased flows in the Reach 4 Recycled Water Pipeline. The improvements would include installation of at least three additional pumping units; installation and relocation of associated electrical hardware; upsizing the existing 36-inch suction and discharge header</p>	NOD

2015048066	Vegetation Removal from La Paz Channel Moulton Niguel Water District Mission Viejo--Orange The La Paz Channel, where it passes by the South Orange County Wastewater Authority 3A Treatment Plant, is heavily vegetated with both native and non-native vegetation. This vegetation is limiting the carrying capacity of the channel and causing the channel to overflow during peak flows. When the channel overflows, it floods the Camino Capistrano Road and driveway to 3A Treatment Plant preventing access to and from the facility. The purpose of the project is to remove non-native and a limited amount of native vegetation with hand-labor from approximately 4 acres of the La Paz Channel to prevent the channel overflowing during peak flows and maintain access to the 3A Treatment Plant.	NOE	
2015048067	Tideland Use and Occupancy Permit to Anthony's Fish Grotto for Parking San Diego Unified Port District San Diego--San Diego The proposed project is a Tideland Use and Occupancy Permit (TUOP) to Anthony's Fish Grotto of La Mesa (Tenant) for the use of approximately four parking spaces at the foot of Ash Street in the Embarcadero parking lot east of 1360 North Harbor Drive in San Diego, California. The area proposed for use under this TUOP will be used only and exclusively for the purpose of employee parking and for no other purpose whatsoever without the prior written consent of the Executive Director of the District.	NOE	
2015048068	Tideland Use and Occupancy Permit to Park N' Fly for Attended Airport Parking Lot San Diego Unified Port District San Diego--San Diego The proposed project is a tideland use and occupancy permit (TUOP) to Park 'N Fly (Tenant) for their use of approximately 54,311 square feet of exclusive area and 4,310 square feet of joint-use area located west of Pacific Highway, wouth of Palm Street in the ity of San Diego, California. The exclusive area will be used only and exclusively for the purpose of an attended parking lot for the San Diego International Airport (SDIA) and Cruise Ship passengers, including transportation service to and from the airport and Embarcadero and for no other purpose whatsoever.	NOE	
2015048069	Oceano Dunes State Vehicular Recreation Area - Manhole Access, Vegetation Parks and Recreation, Department of --San Luis Obispo This project will remove sand and vegetation (approximately 300 square feet) above two of eight sewer manhole covers needed to be opened for maintenance services. The two manhole covers are in dune vegetation and completely covered by sand and ice plant vegetation. After maintenance the area will be backfilled with red rock material and compacted for future maintenance operations. Project best management practices (BMPs) will be implemented to protect native vegetation and wildlife habitat.	NOE	
2015048070	US 101 Relinquishment in Willits, California Caltrans #3 Willits--Mendocino The scope of work includes repaving the entire length and width of the route, replacing curbs, gutters and ramps, and upgrading existing sidewalks to meet American with Disabilities Act (ADA) standards.	NOE

	evaluated.		
2014071078	Homen Dairy Expansion Merced County --Merced The project sponsor has applied for a new Conditional Use Permit (CUP12-004) from Merced County to expand the existing herd at the dairy to a total of 7,720 animals, including 3,360 milk cows. Construction of new facilities would occur with the proposed expansion, mostly within the footprint of the existing facility. The proposed facilities would include: shade addition; heifer shade; special needs barn; three freestall barns; exercise pen; and addition to the silage slab.	EIR	05/22/2015
2014081028	North San Diego Water Reuse Coalition Regional Recycled Water Project Olivenhain Municipal Water District --San Diego The Proposed Project is located in northern San Diego County within the collective service areas of ten water and wastewater agencies (North San Diego Water Reuse Coalition). The Proposed Project would involve development of regional recycled water infrastructure to increase the capacity and connectivity of the recycled water storage and distribution systems of the Coalition members and maximize reuse of available wastewater supplies. The Proposed Project includes replacing potable water uses with recycled water components, converting facilities to recycled water service, connecting discrete recycled water system to one another, increasing recycled water storage capacity, distributing recycled water to effectively meet recycled water demands, and implementing advanced water treatment to produce and use potable reuse water within the Study Area.	EIR	05/22/2015
2013061051	Santa Margarita Quarry Expansion Project / Conditional Use Permit and Reclamation Plan Amendment San Luis Obispo County --San Luis Obispo FYI Final The Applicant proposes to expand the existing boundaries of the quarry by an estimated 33 acres, thereby enlarging the "footprint" of the quarry from 160.1 acres to 193.1 acres. The proposed expansion would yield approximately 21.5 million tons of aggregate reserves. These reserves, in combination with existing entitled reserves, would result in the quarry producing 33.2 million tons of aggregate products over a 59-year period. Proposed reclamation activities would be initiated in those areas of the quarry that have been depleted of resources in a manner concurrent to ongoing mining operations. All proposed reclamation activities would be fully completed within 5 year of resource depletion (e.g., five years after mining activities have stopped). Lands within the quarry would be reclaimed to open space uses, including seasonal water storage, riparian habitat, oak woodland habitat, and chaparral vegetation. Based upon the above, the proposed project is defined as all mining operations associated with the proposed 33-acre expansion area and reclamation of the entire quarry site, as expanded. The full 193.1-acre site is referred to as either the Proposed Project area, or Proposed RPA area. No changes to the quarry's existing annual production volumes or intensity are proposed beyond what is currently permitted.	FIN

Installation of three 9-foot high by 15-foot wide by 32-feet long box culverts set side-by-side within Copeland Creek on the east side of an existing box culvert.	NOD	
2010082063	Altamont Pass Wind Resource Area Repowering; Golden Hills Project; Patterson Pass Project Alameda County Livermore, Tracy, Unincorporated--Alameda The project is limited to culvert installation and replacement, road construction, and utility crossing installation using horizontal directional drilling and open trenching for purposes of decommissioning and repowering the wind farm facility. The California Department of Fish and Wildlife (CDFW) is executing a Lake and Streambed Alteration Agreement Number 1600-2014-0222-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Golden Hills Wind, LLC, as represented by John DiDonato.	NOD	
2012061073	San Luis Rey Wastewater Treatment Plant Solar Project Oceanside, City of Oceanside--San Diego To permit the operation and construction of a helipad for emergency air transportation services with an associated 1,872-square foot modular crew trailer. The proposed helipad would consist of a 34-foot painted square on the concrete to designate the touch down and lift off (TLOF) area for the Reach Air helicopter. The TLOF area would be identified by a 12-inch solid white painted perimeter strip, glass beads, and 16 green flush mounted ground lights. An 11.5-foot wide ring would be painted around the helipad to clearly designate the safety area while the helicopter is in operation. The certified (Airbus EC 135) turbine engine helicopter would be parked and stored on site on the proposed helipad, and would be available for emergency calls throughout the San Diego region. The helipad would be located at the northwest corner of the Fire Training Facility and at least 111-feet from any buildings on site. The proposed helipad would be operational 24 hours a day, seven days a week, and helicopter flights would be intermittent. Based on current activity of the existing and temporary helipad located at the Oceanside Airport, it is anticipated that helicopter trips would average 1.48 arrivals and departures per week.	NOD

	<p>The State Water Resources Control Board (SWRCB) as the lead agency will be issuing a water supply permit. The San Jose Water Company proposes to retrofit the existing water treatment plant (WTP) facility to include improved pre-treatment and membrane filtration. This includes the construction of two thickeners and two screw presses and supporting equipment in the area of the sludge drying beds, the construction of pumps to transfer solids from the thickeners to mechanical dewatering equipment, the improvement of plant access by providing a new plant exit onto Alma Bridge Road from the WTP site, and the renovation of the existing operations building located at the Main WTP Site, as well as other equipment replacement and upgrades. The purpose of this project is to allow the Montevina WTP to meet or exceed current and known future promulgated drinking water standards on a year-round basis.</p>

2015022035	PA-1400255 (MS) San Joaquin County Stockton--San Joaquin A Minor Subdivision application of Angelique M. Ghio Living Trust (c/o Wong Engineers, Inc.) to subdivide an existing 22,470 square foot parcel into two parcels. Parcel 1 to contain 12,761 square feet and Parcel 2 to contain 9,709 square feet. This parcel is not under a Williamson Act contract. The Property is zoned R-L (Low Density Residential) and the General Plan designation is R/L (Low Density Residential). The project site is located on the west side of Cardinal Avenue, 250 feet north of Hobart Avenue, east of Stockton. (APN/Address: 159-230-67/227 S. Cardinal Avenue, Stockton) (Supervisory District 2).	NOD	
2015049004	Cota Street Bridge Replacement Project Santa Barbara, City of Santa Barbara--Santa Barbara CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (# 1600-2014-0255-R5) to the Project applicant, Tim Gaasch, City of Santa Barbara Public Works. The Project proposes to replace a structurally deficient existing 60-foot long by 26-foot wide vehicle bridge with a 56-foot long by 37-foot wide span bridge. The existing bridge is too narrow to accommodate increased channel width that will occur with the Lower Mission Creek Flood Control Project (LMCFCP) which is currently in construction. The LMCFCP is widening the entire lower portion of the channel to accommodate a 25-year event. The new bridge will consist of cast-in-steel shells which support reinforced concrete pile caps, which in turn support the bridge abutments, supporting the bridge deck. The piles require piling driving, the abutment and the wing-walls will be cast-in-place, the deck will be pre-cast, and the utility lines will be relocated. There will be wing-walls to connect the natural banks. The channel bottom is natural at this location, with natural banks upstream and the downstream east bank. The bottom of the channel shall remain a natural substrate or replaced with engineered streambed material, which is suitable for fish migration. Water diversion consists of two upstream coffer dams, with two 24-inch PVC pipes allowing water to flow past the Project site and back into the channel. No surface flows shall be diverted using a pump. This bridge is located within an urban residential area.	NOD	
2015048077	Hidden Valley Fish Screen Reclamation District 2092 Modesto--Stanislaus The project will outfit an existing irrigation pump with a fish screen approved by the National Marine Fisheries Service to prevent entrainment of juvenile salmonids on the San Joaquin River.	NOE

	development of a 40.03-acre site to house Legacy Academy, a 6-12 magnet Science, Technology, Engineering and Math (STEM) school; an alternative education facility (15,000 sf for 384 students); and possibly future District office facilities [50,000 sf for 175 District employees). The proposed Legacy Academy would operate as a magnet STEM school, design for approximately 1,200 to 1,400 students in grades 6 through 12, with an estimated 105,158 sf of building area at buildout. Legacy Academy site will be delivered to the District in construction ready condition.		
2015041036	Westside Gateway Project Costa Mesa, City of Costa Mesa--Orange The proposed project consists of redeveloping the nine-acre project site with a mix of residential lofts and live/work units. In order to redevelop the project site, all existing buildings, structures, parking areas, drive aisles, and hardscape improvements would be demolished, and a number of mature ornamental trees and other landscape improvements throughout the site would be removed. Site redevelopment may also require soil remediation due to past and present light industrial and manufacturing uses, as well as utility infrastructure improvements along the northern and western site boundaries. Once the project site is cleared and graded and all soil remediation is completed, the project applicant would redevelop the project site with the Westside Gateway Project. The project site would be developed with up to 177 dwelling units, which would include a mix of three product types to create a sense of variation and a series of different neighborhood types. Other project components include landscaping, open space, and recreation improvements; access, circulation, and parking improvements; infrastructure improvements; and sustainability measures. All of the internal private streets and drive aisles, common open space and recreation areas and facilities, courtyards, and streetscapes within the project site would be owned and maintained by a future homeowners association. 2015042031	Tobin Fire Flow Project Feather River Canyon Community Services District --Plumas The Community of Tobin, California originally obtained its domestic water and fire protection water via a creek diversion from Jackass Creek, a perennial stream tributary to the North Fork of the Feather River. The water was diverted via a 6 inch, tar dipped and wrapped steel pipe. The devastating fires that occurred in Northern California in 2008 destroyed the Jackass Creek watershed along with the pipeline. The community of Tobin is faced with inadequate water for fire protection resources. The proposed Project entails the replacement of the existing pipeline that was destroyed during the fires with a new 4 inch, 6 inch, and 8 inch pipeline to a new, up to 150,000 gallon capacity storage tank. The surface water will then be distributed to a series of hydrants throughout the community of Tobin.	MND	05/08/2015
2015042032	277 Fairchild Drive Residential Project Mountain View, City of Mountain View--Santa Clara The project applicant, Warmington Residential California Inc., proposes to demolish the existing motel buildings, single-family residences, convenience store, and parking lot facilities, subdivide the site into individual lots and common lots for single-family residences, private roads and bioretention areas. The proposed project would develop the site with 26 two- and three-story dwelling units comprised of four single-family detached units and 22 rowhouse units in four buildings. Seven rowhouse units in Building F would front on Fairchild Drive while four single-family detached homes on individual lots would front on Evandale Avenue. The remaining 15 rowhouse units would be located in three buildings (Buildings C, D, and E) in the center of the project site.	MND	05/08/2015
2015042034	Clear Creek Road at Clear Creek Bridge (25C0080) Replacement Project El Dorado County --El Dorado The County is proposing to replace Bridge No. 25C0080 over Clear Creek on Clear Creek Road. The existing Clear Creek bridge, built in 1940, would be replaced by a new concrete culvert/bridge approximately 45 feet long and 26 feet wide. In addition, approximately 800 feet of Clear Creek Road would be reconstructed, and a segment of Sierra Springs Drive may be re-paved and re-stripped. A temporary diversion dam would be placed in Clear Creek upstream of the bridge to divert flows around the work area during bridge construction. One	MND	05/11/2015

	traffic lane across the bridge would be maintained throughout construction.		
2015042035	Clear Creek Road at Clear Creek Bridge (25C0079) Replacement Project El Dorado County --El Dorado The County is proposing to replace Bridge Number 25C0079 over Clear Creek on Clear Creek Road. The existing Clear Creek bridge, built in 1957, would be replaced by a new concrete bridge approximately 45 feet long and 26 feet wide. In addition, approximately 600 feet of Clear Creek Road would be reconstructed. A temporary diversion dam would be placed in Clear Creek upstream of the bridge to divert flows around the work area during bridge construction. One traffic lane across the bridge would be maintained throughout construction.	MND	05/11/2015
2015042033	Crystal Creek Curves Remedial Plan Caltrans #2 --Shasta Caltrans has prepared a Draft Initial Study with proposed Neg Dec for a proposal habitat restoration project on SR 299 in Shasta County near Crystal Creek Road in the Whiskeytown National Recreation Area, National Park Service. The purpose of the project is to fulfill mitigation commitments originating from a transportation project that was constructed in 1991. The project would restore and enhance Howell's alkali grass (<i>Puccinellia howelli</i>) habitat within a complex of alkaline springs adjacent to SR 299, including modification of the existing highway storm water drainage system to prevent the discharge of fresh water directly into the alkaline spring habitat, removal of accumulated sediment from one alkaline spring, and continued monitoring of plantings along Willow Creek.	Neg	05/08/2015
1986122912	Recycled Water Transmission Line El Dorado County The California Department of Fish and Wildlife is executing Streambed Alteration Agreement number 1600-2014-0233-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Serrano Associates, LLC. The project is limited to placement of two 30-foot long 24-inch diameter HDPE culverts, an 8-foot long riprapped drainage ditch and four 8-inch diameter drainage pipes under a pedestrian walking trail through an oak woodland associated with a residential development.	NOD	
2003041053	Wildland Fire Management Plan Santa Barbara, City of Santa Barbara--Santa Barbara CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (# 1600-2014-0160-R5), to the Project applicant, Ann Marx, City of Santa Barbara Fire Department. Project proposes to minimize the spread of wildland fires, and to protect both the natural environment and surrounding community by reducing the vegetation load. The area consists of 151 acres of public and private land requiring vegetation management, with 85 acres in CDFW's jurisdiction. The area is divided into five assessment districts, 1) the Arroyo Burro Watershed, 2) Mission Creek Watershed, 3) Sycamore Canyon Watershed, 4) Laguna Channel Watershed, and 5) Andree Clark Watershed. When feasible, the Project will avoid impacts to stream beds, banks and associated riparian habitat. Some limited work within the jurisdictional area will require removal non-native, invasive and dead vegetation that can contribute to excessive fire load. Limited limbing, chipping and/or trimming of native vegetation may be required in oak woodland habitats. Cut	NOD

2011011010	Long-Term North to South Water Transfer Program San Luis and Delta Mendota Water Authority --Lake, Modoc, Shasta, Sierra, Lassen, Tehama, Plumas, Butte, ... SLDMWA Participating Members experience severe reductions in Central Valley Project (CVP) water supplies during dry hydrologic years. A number of entities upstream from the Sacramento-San Joaquin Delta have expressed interest in transferring water to reduce the effects of CVP shortages to these agencies. The alternatives evaluated include transfers to CVP contractors that are made available through groundwater substitution, cropland idling, reservoir release, and conservation from 2015 to 2024.	NOD	
2013032017	County Road 86A Bridge (22C0101) Over Cottonwood Slough Replacement Project Yolo County --Yolo The County Road 86A Bridge Over Cottonwood Slough Replacement Project consists of replacing the existing 50-foot long by 21-foot wide two-span bridge with a new 65-foot long by 28-foot wide clear span bridge.	NOD	
2013042035	DeSabra-Centerville Hydroelectric Project State Water Resources Control Board --Butte The Pacific Gas and Electric Company (PG&E) is undergoing relicensing of its DeSabra-Centerville Hydroelectric Project (Project), Federal Energy Regulatory Commission (FERC) Project No. 803. The 25.8 megawatt Project consists of three developments (Toadtown, DeSabra, and Centerville), which collectively include three reservoirs, three powerhouses, 14 diversion and feeder dams, five canals, and associated equipment and transmission facilities. The Project involves the issuance of a water quality certification (WQC) as part of the FERC relicensing of PG&E's existing Project located on Butte Creek and the West Branch Feather River in Butte County. Before FERC can issue a new license, PG&E must receive a WQC from the State Water Resources Control Board (State Water Board). This WQC will become part of the FERC 30-to-50-year license for the Project. The primary purpose of the WQC is to protect water quality standards of the West Branch Feather River and Butte Creek and their tributaries. The beneficial uses and water quality objectives that are contained in the water quality control plans (basin plans) together with state and federal anti-degradation requirements constitute California's water quality standards. The basin plans designate the beneficial uses of water within each watershed basin, and water quality objectives designed to protect those uses pursuant to Section 303 of the Clean Water Act.	NOD	
2014102002	Wildwood Road Bridge Replacement Project San Joaquin County Manteca--San Joaquin The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0269-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, San Joaquin County Department of Public Works. <u>Documents Received on Thursday, April 09, 2015</u>			
	<p>The project is limited to the replacement of the Wildwood Road Bridge crossing Temple Creek and improvement of roadway approaches. The replacement bridge will have two 11-foot-wide traffic lanes; two paved shoulders, each with a width of 2 feet and 1 inch; and two concrete barriers, each with a width of 1 foot and 5 inches. The total bridge width will be approximately 29 feet. In order to satisfy freeboard requirements above the 100-year floodplain, the vertical elevation of the approach roadways on both sides of the bridge will be raised by approximately 3.5 feet to accommodate the higher bridge. Approximately 445 feet of the western approach and 555 feet of the eastern approach will require fill to raise the road elevation to a sufficient height. The existing bridge consists of two short spans having low clearance over the waterway and a flat vertical roadway profile. The replacement bridge will be a precast voided slab bridge with a cast-in-place deck. Roadway work will be performed at the approaches of the bridge and the new bridge will include standard railings. It is anticipated that additional right-of-way will be needed. Project activities will include: roadway alignment, vegetation clearing, temporary stream flow diversion, bridge demolition, bridge construction, channel contouring and erosion control activities (filter fabric and rock slope protection), and site rehabilitation. The project is anticipated to result in the removal of three Valley Oaks (<i>Quercus lobata</i>) of approximately 12 to 23-inch diameter trunk will be removed for the project.</p>

	and supportive of the electrical grid, and thus allow accommodation of more renewable generation in the CA electricity sector. Additionally, the non-technology approaches of smart inverter deployment and integration will enhance the adoption of clean energy technologies to benefit CA electricity ratepayers.		
2015048093	Borrego Springs - A Future Photovoltaic Based Microgrid Energy Commission --San Diego A 12 in x 30 in elevated modular weatherproof enclosure will be built inside the limits of an existing substation housing the gated microgrid generators in Borrego Springs. This installation is completely contained within an existing, developed substation site on land that is not environmentally sensitive. There is no expansion of the existing substation site. No historic resources or buildings will be affected. Noise and odors will not be generated by this installation in excess of existing permitted amounts. The installation will not increase traffic to the site. The installations will not require permits for air, water, conditional use, building expansion, hazardous waste, or rezoning.	NOE	
2015048094	Utility Demonstration of Znyth (Trademark) Battery Technology at \$100/kWh or less to Characterize Performance and Model Grid Benefits Energy Commission San Ramon--Contra Costa Eos Energy Storage will manufacture and deploy a 50 kW/150kWh AC-integrated system incorporating its advanced zinc hybrid cathode (Znyth™) battery technology for multi-application testing by Pacific Gas and Electric. The project will integrate multi-phased battery testing with grid modeling to enable characterization and economic evaluation in response to simulated grid conditions.	NOE	
2015048095	Homewood Maintenance Dredging Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe --Placer The Marina will conduct maintenance dredging within the walls of the marina to remove approximately 535 cubic yards of dredged material. An excavator stationed on a floating barge surrounded by a turbidity curtain will remove the sediment to lined dump trucks for transport to an approved landfill outside the Tahoe Basin.	NOE	
2015048096	Tatum Property Vegetation Thinning and Oil Seep Cleanup Project (Lake or Streambed Alteration Agreement No. 1600-2014-0185-R5) Fish & Wildlife #5 Ojai--Ventura The project is limited to the thinning of understory vegetation within an 800 linear foot section of a stream channel. Brush clearing and thinning of vegetation is intended to aid in flood control along an adjacent access road. Proposed work within the channel would be done exclusively with hand tools, including hand-saws, lopper, and if needed for initial thinning activities, a chainsaw. Clearing of dead vegetation and trimming of brush is intended to create a 2-3 foot wide low flow channel so that flows do not erode the banks that stabilize the road.	NOE	
2015048097	I-880 Sign and Delineation Upgrades Caltrans #4 Oakland--Alameda Overhead and roadway sign panels would be removed and replaced and 3 new roadway signs would be installed on new barrier mounting structures. Existing pavement striping would be removed and replaced.	NOE

2015048098	Geotechnical Testing for Miscellaneous Access Improvements Parks and Recreation, Department of --Santa Cruz Perform geotechnical soil testing at Seacliff State Beach to determine subsurface soil conditions under and around an existing beach access ramp in preparation for accessibility upgrades. Work will use hollow stem augers to bore three (3) 20 foot borings and one (1) 40-foot boring. The 20-foot borings will be back-filled with excavated materials and the 40-foot boring will be backfilled with neat cement grout. Excavated soils from the 40-foot boring will be contained in 55-gallon drums to be disposed of offsite.	NOE	
2015048099	Marsh Creek Archaeological Project Parks and Recreation, Department of --Contra Costa Conduct a subsurface investigation in Marsh Creek SHP, to (1) determine the presence, absence and relative density of archaeological remains, (2) reconstruct the history of landscape changes, (3) evaluate the potential for buried archaeological deposits, and (4) offer recommendations for the avoidance and long term management of archaeological resources located.	NOE	
2015048100	Ramp Improvement at El Monte (EA 4H880) Caltrans #4 Los Altos--Santa Clara Ramp proposed project would realign the northbound I-280 El Monte Avenue off-ramp in the City of Los Altos to intersect El Monte Avenue at a right angle. The purpose of the project is to reduce collisions and improve overall motorist safety. A 24" pipe culvert will be placed across and existing drainage ditch for drainage improvement.	NOE	
2015048101	MP 113.71 R Pipeline Repair and Pump-In Pressure Test Water Resources, Department of --Fresno Westlands Water District (WWD) will repair and pressure test a pipeline at MP 113.71R to keep their canal integration system operational. About 20 cubic yards of soil will be done using hand tools and a backhoe.	NOE	
2015048102	Quemetco, Inc. Request for Approval of the Class II Permit Modification for the installed Centrifugal Dryer and the replacement of two Plastic Sink/Float Tanks Toxic Substances Control, Department of Industry--Los Angeles The Modification authorizes the continued operation of the existing Gala Centrifugal Pellet Dryer Model 5048 (Dryer) at the Battery Wrecker Unit within the Quemetco Facility (Facility). The Dryer is deemed necessary to allow the Facility to remove moisture from crushed plastic battery casings prior to transfer of the plastic to trailer trucks for off-site shipment. This permit modification would also allow installation of two larger plastic sink/float tanks (1,360-gallon capacity) to replace existing smaller plastic sink/float tanks (450-gallon capacity). The increased tank size will allow for better separation of plastic from the crushed battery.	NOE

2014021059	<p>General Plan Amendment No. 14-002 to Update the Pixley Community Plan Tulare County --Tulare</p> <p>On December 10, 2013 the Tulare County Board of Supervisors (BOS) approved, the Planning Branch proposal to update the Pixley Community Plan. The Pixley Community Plan update will become consistent with the recent approval of the General Plan 2030 update, and will include the following primary goals and objectives.</p> <p>Promote development within planning areas next to the Regional Highway 99 Corridor in order to implement the General Plan goals.</p> <p>Improvements for a "disadvantaged community" - It is expected that the community planning areas will be improved.</p> <p>Strengthening Relationship with TCAG.</p>	EIR	05/26/2015
2015012006	<p>127 West Harris Avenue Fairfield Suites Hotel South San Francisco, City of South San Francisco--San Mateo</p> <p>The Project would construct a 128 room hotel on a vacant site in the eastern area of the City of South San Francisco, known as the "East of 101 Planning Area," south of East Grand Avenue and north of Mitchell Avenue at 127 West Harris Avenue. San Francisco International Airport is approximately 0.8 miles south of the site. The Colma Creek channel is approximately 250 south and US 101 is approximately 850 feet west of the site. Mitchell Avenue provides access to West Harris Avenue. Gateway Boulevard to the west and Harbor Way to the east provide access to Mitchell Avenue.</p>	EIR	05/26/2015
2013091022	<p>EIR PFS 02-13; Addison Energy Wind Project by Addison Energy Resources, LLC Kern County Mojave--Kern FYI Final</p> <p>The Project involves the development of a wind energy production facility on an approximately 1,325-acre site. Project activities would occur on a smaller area within the 1,325-acre site and would include clearing, grubbing, and grading for roads, a laydown area, wind turbine pads, a substation, meteorological towers, and underground and overhead transmission and collection lines.</p> <p>The Project is expected to result in incidental take of desert tortoise (<i>Gopherus agassizii</i>) and Mohave ground squirrel (<i>Spermophilus mohavensis</i>), which are designated as threatened species under the California Endangered Species Act (CESA). The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation. Minor Amendment No. 1 modifies the Project description to include construction of a new operation and maintenance (O&M) facility, increases CESA listed species impacts by five (5) additional acres, increases the compensatory mitigation by five (5) acres, which increases the funding obligations, and replaces Figure 2d with a site map showing the additional O&M impact area. CDFW issued the ITP and Minor Amendment No. 1 as a responsible agency under the California Environmental Quality Act (CEQA), relying on Environmental Impact Reports (EIRs) certified for the Project by the lead agency, Kern County.</p>	FIN

2015041045	Sepulveda and Panama Mixed-Use Project Carson, City of Carson--Los Angeles The project proposes a mixed-use development with 65 senior residential apartment units and 3,000 sf of commercial space on a 1.22-acre site located to the southwest of East Sepulveda Boulevard and Panama Avenue and 200 feet east of the East Sepulveda Boulevard and Marbella Avenue intersection. The proposed senior housing units would consists of 58 one-bedroom units, and 7 two-bedroom units. The commercial retail uses would encompass approximately 3,000 sf and the parking garage would include 67 parking spaces. The project would also feature approximately 15,150 sf of common areas that would include a community space (a community room, community gardens, outdoor seating, and theater area), podium gardens, and park area, and approximately 5,590 sf of private open space. The project site is not listed on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5.	MND	05/12/2015				
2015042042	Vaca Valley Self Storage Vacaville, City of Vacaville--Solano The project proposal is to construct an approximately 85,700 sf, one-story self-storage facility on a 4.92 acre site located at 2400 East Monte Vista Avenue, in the Vacaville-Golden Hills Business Park. The site is bordered by East Monte Vista Avenue to the west, an I-505 on-ramp to the east, and vacant land to the north and south. The proposed storage facility will include an approximately 2,650 sf office with 4 parking stalls, decorative wrought iron perimeter fencing and landscaping. Access to the site will be provided by a new primary driveway along East Monte Vista Avenue, with a 20 ft. secondary driveway for emergency vehicle access. Exterior building materials include stucco walls with cultured stone and concrete "S" style roofing. The maximum building height is 24 ft. and the	MND	05/13/2015

	maximum Floor Area Ratio is .40.		
2015041044	At Home in Encinitas Encinitas, City of Encinitas--San Diego The project includes an update to the 1992 Housing Element, including revised goals and policies, along with new and continuing implementation programs to ensure consistency with current State housing law. The update also integrates updated socioeconomic data, as well as other population and household characteristics to support the development of the Housing Element.	NOP	05/12/2015
1999091057	Mariposa County/Mariposa County Landfill Permit Revision Mariposa County Mariposa--Mariposa The proposed permit will allow for the continued operation of a landfill with the approval of a new conditioning document and a change in days open to the public. The facility currently operates under a full Solid Waste Facilities Permit issued in 2000.	NOD	
2003071157	Harper Canyon / Encina Hills Subdivision RDEIR Monterey County Salinas, Monterey--Monterey 1) A Vesting Tentative Map for the subdivision of 344 acres into 17 residential lots ranging in size from 5.13 acres to 23.42 acres on 164 acres with one 180-acre remainder parcel; 2) Use Permit for the removal of approximately 79 coast live oak trees over six inches in diameter for road and driveway constructions; 3) Use Permit for development on slopes in excess of 30 percent; 4) a Use Permit for the creation of a public water system with a stand-alone treatment facility (Option B); and 5) grading for net cut and fill approximately 2,000 cubic yards.	NOD	
2006042009	Dutch Slough Tidal Marsh Restoration Project Water Resources, Department of Oakley--Contra Costa The Dutch Slough Tidal Marsh Restoration Project will restore tidal marsh and other habitats on 1,178 acres in the western Sacramento-San Joaquin Delta. The project is expected to benefit sensitive Delta species, including spring-and winter-run Chinook salmon, Sacramento splittail, and California Black Rail. The project will also improve scientific knowledge about tidal marsh restoration, and provide public access and recreation opportunities through a cooperative project with the City of Oakley.	NOD	
2006072024	Aviano Adult Community Project Antioch, City of Antioch--Contra Costa The Central Valley Water Board is issuing a 401 Water Quality Certification for this project. The project consists of constructing an adult residential development. Construction is only planned north of Sand Creek. A new bridge on the proposed Sand Creek Road extension will cross Sand Creek at the south side of the Project site. The Sand Creek Road extension will parallel Sand Creek to the west. Runoff from the proposed development site will enter two new storm water basins to the north of Sand Creek, treated, and hydro-modified before being discharged into Sand Creek through a single outfall structure. Fill, excavation, and dredging activities will impact waters of the United States.	NOD

	addition to an existing mausoleum building. The Property is zoned P-F (Public Facilities) and the General Plan designation is OS/O (Other Open Space). The project site is located on the northwest corner of N. Beckman Road and Harney Lane, Lodi. (APN/Address: 061-030-32, 47, & 67/14165 N. Beckman Road, Lodi) (Supervisorial District 4).		
2015022040	White Slough Restoration California State Coastal Conservancy --Humboldt The White Slough Restoration Project will restore tidal marsh habitat on subsided, diked former tidelands to enhance native wildlife habitat, protect existing transportation infrastructure and beneficially reuse sediment. Sea level rise and dike failure currently threaten to convert subsided marsh in this area to mudflat. Tidal marsh will be restored on ~40 ac by first raising surface elevations to levels that will support marsh vegetation, and then breaching the dike around the Unit. Surface elevations will be raised by placing up to 200,000 cubic yards of clean sediment. Four existing tide gates in the northern portion of the Project Area will be modified to establish a muted tide cycle.	NOD	
2015022046	San Antonio Valley Ecological Reserve Land Management Plan Fish & Wildlife #3 --Santa Clara This proposed project is the development of a Land Management Plan for the California Department of Fish and Wildlife owned San Antonio Valley Ecological Reserve. The document analyzes the range of activities which will be undertaken to manage and maintain the physical, biological, cultural and public recreational activities on the Ecological Reserve.	NOD	
2015049005	PDEV04-25 Ontario, City of Chino--San Bernardino The State Water Resources Control Board (SWRCB), as the responsible agency, will be issuing a water supply permit. The City of Chino proposed project included the construction and operation of two groundwater production wells, two reservoirs, a booster station, a backup generator building, a pipeline to convey water from the well site to the City's existing water distribution system, and potentially a nitrate treatment plant.	NOD	
2015048121	Coastal Culvert Replacement, Reattachment and Slip-out Repairs PProject Fish & Wildlife #3 --San Mateo Project is limited to the repair of two roadside slip-outs on Higgins Canyon Road, two slip-outs on Seaside School road, replacement of a deteriorated culvert on Bear Gulch Road and reattachment of two disconnected culverts at two locations on Stage Road. Slip-out repairs will include excavation and reconstruction of the roadway shoulder using imported soil and boulders. The culvert will be replaced with a corrugated metal culvert of equal length and diameter. A concrete headwall will be constructed at the inlet and boulders will be added to the outlet for energy dissipation. Issuance of a Streambed Alteration Agreement No. 1600-2014-0214-R3 is pursuant to Fish and Game Code Section 1602.	NOE

2015048127	Calistoga Recycled Water Storage Pond Expansion Project Fish & Wildlife #3 Calistoga--Napa Project is limited to: 1) Demolition and removal of a 20-foot long by 6-foot wide existing wooden pedestrian bridge including two existing concrete bridge abutments, and 2) Constructing a new 20-foot long by 10-foot wide railcar bridge. Issuance of a Streambed Alteration Agreement No. 1600-2014-0406-R3 is pursuant to Fish and Game Code Section 1602.	NOE	
2015048128	Minor Amendment of PUD No. 331 and TSM No. 643 El Cajon, City of El Cajon--San Diego Site plan and architectural changes to an approved, residential, 4-unit, planned unit development and tentative subdivision map.	NOE	
2015048129	Holmes Larabee Bridge Repair Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Humboldt The existing low-water summer bridge that crosses the Eel River, located at Holmes Flat Road PM 1.68 has been posted as "Closed" to all traffic due to instability and unsafe conditions of the bridge. The primary purpose of this project is to repair the weakened portions of timber piles and bent caps along with repairing the most severely deteriorated sections of the concrete deck. This repair work is needed to bring the bridge up to load standards and provide safe access to the community and emergency services until a new bridge can be built.	NOE	
2015048130	Park Pond Bank Restoration (Lake Alteration Agreement No. 1600-2014-0032-R6) Fish & Wildlife #6 Bishop--Inyo CDFW is executing Lake Alteration Agreement No. 1600-2015-0032-R6, pursuant to Section 1602 of the Fish and Game Code to the City of Bishop, as represented by James (Jim) Tatum (Permittee). The project is limited to emplacement of clean sand and un-grouted riprap along the existing pond bank to reduce on-going wind erosion. Project activities include: lowering the pond by approx. 3 feet to expose the work area; placement of 15-20 cubic yards of clean fill along the bank; placement of approx. 10 yards of riprap along 40 feet of pond bank by hand; and re-filling the pond to pre-existing levels. The project will be completed using a dump truck, a backhoe or similar equipment, and hand tools. No work will occur in wet weather conditions, and no equipment will be operated in CDFW-jurisdictional areas. Ingress and egress will utilize paved pathways and lawn-scape, and will not impact CDFW-jurisdiction. Project activities will result in permanent impacts to 400 sq. ft. (10 ft. x 40 ft.) of CDFW-jurisdictional, unvegetated lakebed from riprap placement.	NOE	
2015048131	Northwest Zone Site Development University of California, Los Angeles Los Angeles, City of--Los Angeles The project would demolish Ornamental Horticultural Building J greenhouse ("Building J") and Ornamental Horticultural Building M warehouse ("Building M") structures, clear the site, and provide landscape improvements. Demolition of Building J (4,800 gsf) and Building M (7,201 gsf), represent a total of 12,001 gsf of existing office, shops, and storage space currently used by Facilities Management and On-Campus Housing Maintenance. The scope of work would include finish grading; removal of hazardous waste and soils; connections to existing site	NOE

2015048143	Esperanza Tree Removal Forestry and Fire Protection, Department of --Calaveras Project area is located in Calaveras County approx. 2 miles northeast of the community of Mountain Ranch. The project area is approx. 2,500 feet in elevation above sea level. Vegetation consists of a mixture of native oaks, pines and various planted species. The project area has been developed and the current CALFIRE Esperanza Forest Fire Station occupies the site. The project area is approx. 2 acres in size. The proposed project will consist of the removal of any trees or other vegetation which are dead, dying or damaged at the fire station. The trees to be removed are a hazard to the fire station personnel and the public. Other vegetation removed or replaced will be done under general landscape maintenance of the station.	NOE	
2015048144	Sardella Training Burn Forestry and Fire Protection, Department of --Tuolumne The Sardella Training burn will be conducted on private property near the community of Tuolumne. The objective of the project is to provide training ground for the annual Intermediate Firing Methods class, and to control the spread of medusahead grass, a noxious weed. The project area consists of annual grasses and scattered oaks. Annual grasses, including medusahead grass, are planned for consumption. burn units will range from 1/10th to one acre in size. The actual area proposed for burning is approx. 60 acres in size; however, some additional control lines may be constructed in the 80 acre total project area. Control lines will consist of existing roads and trails, hand line, and dozer line. Burning will be conducted over one or two days in May or early June. The project area was designed to avoid Rough and Ready Creek, a Class I watercourse. Class III watercourses will be crossed by hand line at right angles. The area was surveyed by CALFIRE foresters and a CALFIRE archaeologist, and no cultural sites were observed. A thorough biological scoping was conducted, and the project is not likely to have any adverse impacts to wildlife. A query of the CNDDDB did not reveal the presence of any sensitive species within the project area. No burning will be conducted within 25 feet of elderberry bushes.	NOE	
2015048145	Greening Project - Greening the Last Mile of the Richmond Greenway Natural Resources Agency Richmond--Contra Costa Project includes sustainable landscaping and stormwater improvements that will contribute positively to the environmental goals of Richmond. Improvements include replacing invasive species and conventional landscaping with native vegetation, rain gardens and bioswales.	NOE

2014071077	Lancaster Energy Center (CUP 14-10, GPA 14-02, ZC 14-02) Lancaster, City of Lancaster--Los Angeles Construction and operation of a 150 MW solar generating facility in the southwestern portion of the City of Lancaster.	EIR	05/28/2015
2010031008	Panoche Valley Solar Farm Project San Benito County --San Benito FYI Final The applicant, Panoche Valley Solar LLC, proposes modifications to the Panoche Valley Solar Project Use Permit 1023-09 approved in 2010. In general, the project has been reduced in size from a 399 MW project to a 247 MW project and will be constructed over a shorter 18-month timeframe as opposed to the previously approved 5-year construction period. The applicant is also proposing revisions to various project components based on the reduced project size and revisions to previously approved Applicant Proposed Measures and Mitigation Measures based on more refined engineering and construction techniques. In addition, PG&E has identified specific telecommunication upgrades that are required to serve the project and are under the jurisdiction of California Public Utilities Commission that will be located partially in San Benito County and partially in Fresno County.	FIN	
2013042008	Western Aggregates LLC Yuba County Operations Amended Reclamation Plan State Mining and Geology Board Marysville--Yuba The Western Aggregates LLC Yuba County Operations Amended Reclamation Plan would involve the reclamation of 1,960 acres of aggregate mining operations in three phases over 45 years, ending in 2059. Reclamation activities would be initiated following the termination of mining activities subsequent to each mining phase. Implementation of the reclamation plan would maintain five lakes with shorelines created by mining and would provide an end land use consisting of open space areas supporting a variety of wildlife habitat types including aquatic lake, emergent marsh, and riparian woodland and upland. Reclamation activities would include grading and contouring the site and revegetation. All mining equipment and structures would be removed prior to final reclamation.	FIN	
2014122026	General Plan Amendment - Update to Housing and Circulation Element Pleasant Hill, City of Pleasant Hill--Contra Costa The City is proposing a General Plan Amendment to update its Housing Element (for the period extending from January 31, 2015 through January 31, 2023). Article 10.6 of the California Government Code requires each city and county to analyze housing needs and establish goals, policies, programs, and quantified objectives to meet the identified needs through preparation of a Housing Element. The analysis must address all economic segments of the community, the City's share of the regional housing need, and the housing needs of special groups such as the elderly, disabled, homeless, large families, and single parents. The	FIN

	Housing Element must identify adequate sites throughout the community to accommodate housing needs and/or include programs to identify additional sites and rezone them appropriately for housing development.		
2015041046	ENV-2014-3973-MND 1011-1031 S. Serrano Avenue Los Angeles, City of --Los Angeles The proposed project is on a site that is approximately 31,050 sf (five lots) and includes the construction of a five-story, 54'5" tall building with 91 residential units, including eight units for very low income households, and a minimum of 110 parking spaces on two subterranean levels. The proposed project includes a minimum of 10,675 sf of open space. The total project size is approximately 83,415 sf of floor area. The site is located in the Wilshire Community Plan Area, and is zoned C2-1 and R4-1 with General Plan Designations of Community Commercial and High Medium Residential. The project requires the export of 30,000 cubic yards of dirt. The project proposes the removal of three non-protected trees onsite.	MND	05/13/2015
2015042045	Lake Road Shoulder Widening Project Merced County Merced--Merced Merced County proposes to widen and pave the shoulders of a segment of Lake Road between E. Bellevue Road and Yosemite Avenue, located approximately 2.5 miles north of SR 140 in Merced County, CA. The project would include widening and paving the shoulders along the existing roadway. Both shoulders would be widened by four feet, paved, and restriped; the resulting roadway would include a 12-foot paved vehicle lane and a 4-foot paved shoulder in each direction.	MND	05/14/2015
2015041047	Larson Monterey County --Monterey Combined Development Permit consisting of: (1) a Coastal Administrative Permit to allow the construction of a 2,803 sf single family dwelling with a 708 sf garage; (2) a Coastal Administrative Permit to allow an attached 506 sf accessory dwelling units; (3) a Coastal Development Permit to allow the removal of 21 Pine trees and 2 Oak trees, ranging in diameter from 6"-22"; and 93) a Design Approval. The property is located 4051 Costado Road, Pebble Beach (APN No. 008-091-004-000), Del Monte Forest Land Use Plan, Coastal Zone.	Neg	05/13/2015
2015041048	TMV Lands (RCT Land Company LLP) Monterey County --Monterey Minor Subdivision Tentative Map to allow the division of a 516 acre parcel into three parcels (Parcel 1, 106 acres; parcel 2, 210 acres; and Parcel 3, 200 acres).	Neg	05/13/2015
1999111048	ND for Pacific Coast Retreaders Facility California Integrated Waste Management Board Dominguez--Los Angeles The permit allows for the continued storage of up to 4,999 waste tires on-site, at any one time.	NOD

2001121105	<p>SP 327 and Change of Zone No. 6651 - Toscana Riverside County Corona, Lake Elsinore--Riverside Tentative Tract Map No. 36593 proposes a schedule "A" subdivision of 201.94 acres into 432 Medium Density Residential (MDR) lots that range from 4,500 to 5,850 square feet and 170 Medium High Density Residential (MHDR) lots that will have a minimum lot size of 3,619 square feet. In addition, the proposed project will have 21 lettered lots on approximately 56.8 acres which will be dedicated for neighborhood parks, pocket parks, open space, water quality/detention basins, and for infrastructure improvements. The proposed project will be phased and will encompass Planning Areas 1, 2, 3, 4, 5, 18, 19, 25A, 26B, 26C, 27A, 27B, 27C, 27D and 27I of the proposed Toscana Specific Plan Amended No. 1 (SP327A1).</p>	NOD	
2003081086	<p>East Garrison Specific Plan Monterey County Marina--Monterey The Project consists of the development of a mixed-use residential community with commercial, public, and recreational uses. The Project will result in up to 1,470 residences to be built on 244 acres. The Project will be developed in three neighborhoods, including the Arts District and a Town Center; a Bluff Greenway; multi-use paths and open space areas; and a main entrance. The Project will accommodate 1,400 residential units plus up to 70 accessory (carriage house) units, 75,000 sq ft of commercial use, 11,000 sq ft of public use, 100,000 sq ft of artistic/cultural/educational space in renovated historic structures, and approximately 50 acres of open space (including approximately 12 acres of improved parks and trails). Other Project components include a library, fire station, and a sheriff's field office. The Project will be constructed in four phases, the first three ranging from 72 to 82 acres in size, consisting of primarily infrastructure and residential development; with the final 16.6-acre phase consisting of infrastructure and the Town Center, in areas previously graded for Phases 1 through 3 and/or as redevelopment of the former military installation.</p> <p>The Project will result in impacts to a total of 136 acres of California tiger salamander (<i>Ambystoma californiense</i>) (CTS) habitat, much of which has already occurred, prior to listing of CTS by the state. The Project is expected to result in incidental take of CTS which is designated as a threatened species under the California Endangered Species Act. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.</p>	NOD	
2011102051	<p>Revised SMP-30 Use Permit, Sunol Valley Aggregate Quarry Alameda County --Alameda This proposed project includes the continuation of current Alameda County Surface Mining Permit (SMP) quarry operations as well as the 58-acre quarry expansion. The Sunol Valley Aggregates Quarry operating under SMP 30, which was approved by Alameda County in 1992, authorizes the mining of sand and gravel within a 323-acre area. Under the Revised SMP 30 permit, the Permittee proposes to expand the overall production potential of the quarry by increasing the area under the permit by approximately 58 acres. The expanded quarry pit will occupy approximately 32.5 acres and a haul road and berm will occupy 2.44 acres within the 58-acre expansion area. The project will result in impacts to 34.94 acres of California tiger salamander (<i>Ambystoma californiense</i>) habitat and is expected</p>	NOD

	to result in incidental take of California tiger salamander, which is designated as a threatened species under CESA. Minor Amendment No. 1 makes a simple administrative extension to the deadline in which the completion of the Habitat Management land compensatory mitigation must occur for an additional six (6) months to twenty-four (24) months from the date of issuance of the ITP. The ITP, as amended by CDFW, authorized incidental take of species listed under CESA that may occur as a result of Project implementation.		
2013042008	Western Aggregates LLC Yuba County Operations Amended Reclamation Plan State Mining and Geology Board --Yuba Reclamation of 1,960 acres of vested right aggregate mining operations in three phases over 45 years. Reclamation would be initiated following cessation of mining activities subsequent to each mining phase. Project would maintain five lakes with shorelines created by mining and provide end land use consisting of open space areas supporting wildlife habitat, including aquatic lake and riparian woodland and upland. Reclamation activities would include grading and contouring the site and revegetation. All mining equipment and structures would be removed prior to final reclamation.	NOD	
2014041044	CalTrans Building Demolition and Immediate Public Use Plan Parks and Recreation, Department of San Diego--San Diego CDPR proposes to redevelop Block 409, now a part of Old Town San Diego State Historic Park including demolition of the former Caltrans District 11 Office Complex. The park space will serve as a gateway to Old Town San Diego State Historic Park and will help re-connect Old Town's historic association with the San Diego River and enhance the Old Town San Diego National Register District. The Proposed Project will include contouring, landscaping and temporary improvements to provide visitor use, a sense of the historical setting, pedestrian circulation, spaces for interpretation and limited new parking facilities.	NOD	
2014051020	Meredith International Centre Specific Plan Amendment Ontario, City of Ontario--San Bernardino The project represents an amendment to the Meredith International Centre Specific Plan, originally adopted in 1981, and would realize approximately 3 million square feet of industrial uses, 1.1 million square feet of commercial uses, and up to 800 residential units on approximately 257 acres.	NOD	
2014122026	General Plan Amendment - Update to Housing and Circulation Element Pleasant Hill, City of Pleasant Hill--Contra Costa The City of Pleasant Hill has prepared an update to the Housing Element and Circulation Element in the City of Pleasant Hill General Plan. The Housing Element update addresses the eight-year planning period from 2015 to 2023. The current Housing Element was adopted by the City Council on July 21, 2011. The Housing Element is a mandatory component of the General Plan subject to review by the State Department of Housing and Community Development (HCD). The update to the Circulation Element of the General Plan is focused on incorporating "complete streets" policies and programs to be consistent with California Law, Assembly Bill 1358 (the California Complete Streets Act). The proposed amendment includes new goals, policies and programs to encourage incorporation	NOD

	of alternative modes of transportation into plans for new and/or rehabilitated City streets to reduce vehicle congestion, vehicle miles traveled, and greenhouse gas emissions.		
2015012046	Housing Element Update 2014-19 Clearlake, City of Clearlake, Lakeport--Lake As part of the overall master or General Plan, the Housing Element identifies the existing housing needs in the community, and sets forth goals, policies and programs to address these needs. State law requires Housing Elements to be updated at least every five years to reflect a community's changing housing needs. This update covers the 2014-2019 period pursuant to the update cycle for jurisdictions within the Lake County. The Clearlake Housing Element was last updated in 2010 and is currently being updated to address existing and projected housing needs. The Clearlake Housing Element is comprised of the following major components: a. An analysis of the City's population, household and employment base, and the characteristics of the housing stock, including a summary of the present and projected housing needs of the City's households. b. A review of resources that will facilitate the development of new housing and potential constraints to meeting the City's identified housing needs. c. A housing strategy, which addresses housing goals, policies and programs to address Clearlake's identified housing needs. The Housing Element itself does not define the residential growth potential of the City; rather, it works within the framework of the General Plan and Zoning Ordinance, which establishes the type and amount of future residential development permitted in Clearlake.	NOD	
2015032007	2015 Tehama-Colusa Canal Authority Water Transfers Tehama Colusa Canal Authority --Colusa, Glenn, Sacramento, Shasta, Sutter, Tehama, Yolo The Tehama-Colusa Canal Authority (TCCA) and its Member Units will experience severe water shortages in 2015 and are soliciting willing sellers to transfer water. A number of entities have expressed interest in transferring water to the Member Units of the TCCA. The water would be made available for transfer through cropland idling, crop shifting, and groundwater substitution.	NOD

The first phase would consist of an approximately 26,000 sf building to be used for the Humboldt County Community Corrections Reentry Resource Center, with Senate Bill 863 funding. The second phase would be a building addition of approximately 54,000 sf of program area to house County government offices or new courtroom space. Funding or financing for the second phase has not been secured. In order to retain flexibility regarding final design and provide adequate environmental review, this Initial Study includes analysis of the two phases and multiple options for parking, building heights, and footprint within each phase. The Site is currently used as a temporary parking lot for the existing courthouse and jail complex.</p>	MND	05/14/2015
2015041049	<p>The Grove Specific Plan Ventura, City of Ventura--Ventura</p> <p>Project consists of a Specific Plan and a Vesting Tentative Tract Map that would enable the future development of a residential neighborhood ranging between 200 and 250 dwellings on approx. 26.51 acres (a density of 9.43 per units per acre) bounded by the Thille Community Neighborhood, on the south by Telephone Road and Copland Drive, and on the west by the La Posada mobile home park, and farther to the west by the 101/126 highway interchange. The property is currently within unincorporated area, but is within the City of Ventura's Sphere of Interest, and is designated on the General Plan as Medium Density Residential; 9-20 du/ac.</p>	NOP	05/14/2015
2015041050	<p>Termo North Aliso Field Project Los Angeles County Los Angeles, City of--Los Angeles</p> <p>The Termo Company is proposing the North Aliso Field Project. The Project consists of drilling up to twelve oil and natural gas wells from three pad locations in or adjacent to the existing Aliso Canyon Oil Field of Los Angeles County. The proposed project also includes access routes, temporary staging areas, and supporting infrastructure such as pipelines and connections to existing power lines. The Project would be developed on land leased to the Applicant under existing Oil, Gas, and mineral Leases. The oil and gas production would be processed at existing Applicant facilities at the Aliso Canyon Tank Farm and transported via truck with existing oil production activities.</p>	NOP	05/14/2015
2015041051	<p>California American Water Pump House Historic Demolition Permit project Pacific Grove, City of Pacific Grove--Monterey</p> <p>The project would entail the demolition of a retired Cal Am pump house, a property listed on the City of Pacific Grove Historic Resources Inventory. The pump house is a one-story building, approximately 860 sf, located at the center of a roundabout at the intersection of Sinex Avenue, Eardley Avenue, and 9th Street. The pump house, built in 1920s, is an unreinforced masonry bearing wall building. The building's interior has a combination of concrete slab and raised wood floors with large planks. The building's exterior is finished with a grouted Spanish tile roof and painted walls, surrounded by landscaping, trees and the roadway. Because multiple vehicles have collided with the building over time, the pump house has substantial structural damage on the northeast side and visible wall cracks.</p>	NOP	05/14/2015

2015042047	Ashland Cherryland Business District Specific Plan Update Alameda County --Alameda The Specific Plan Update is composed of two major components: (1) a long term vision and policy component and (2) a regulatory component. The vision and policy component provides goals and policies related to land use, circulation, infrastructure, and design, and recommends implementing programs and financing options to achieve these goals. The regulatory component would enact zoning for the Plan Area; establishing zones, uses, and development standards. Together, these two components would serve as a comprehensive document for development within the Plan Area. Buildout of the Specific Plan Update would accommodate development of up to 167 single-family units, 771 multi-family units, and 570,000 sf of non-residential development.	NOP	05/14/2015
2007052065	Newark Area 3 and 4 Specific Plan Project Newark, City of Newark--Alameda A residential community of up to 1260 residential units as well as open space, recreational amenities, and a school. The units would be primarily single family detached homes with the potential of 15% higher density units. A Specific Plan, General Plan Amendment were approved March 26, 2015. Ordinances approving Zoning and a Development Agreement were introduced March 26, 2015.	NOD	
2009101004	Pine Mountain Forest Fire Station Facility Relocation Project Forestry and Fire Protection, Department of --Tulare The project consists of the relocation of existing fire station facilities. The original project included a 3,134 square-foot barracks-messhall and a 1,664 square-foot apparatus buildings. The project now proposes a single 6,054 square-foot building, including barracks-messhall, apparatus, generator-storage and water treatment portions. All other elements of the project remain the same, and no substantial changes have occurred that would change the determinations in the original 2009 initial study-mitigated negative declaration.	NOD	
2014071075	Jalama Road Bridge 51C-017 Replacement Project Santa Barbara County Lompoc--Santa Barbara CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (# 1600-2014-0059-R5) to the Project applicant, Morgan Jones, County of Santa Barbara Public Works. The Project proposes to replace the existing bridge with a 160-foot wide single-span pre-cast and pre-stressed concrete Bulb-Tee Girder Bridge. The new structure will accommodate one 12-foot traffic lane and a 5-foot wide shoulder in each direction. New abutments will be cast-in-place concrete piles and set back from the top of the existing deeply incised creek banks to provide protection from future erosion. Construction will be done from the top of bank to avoid the creek channel and the riparian zone below. Grading includes 90 cubic yards for the structural excavation, backfield with 60 cubic yards, and 30 cubic yards will be exported from site. The two existing concrete pile supported pier walls will remain as well as the existing concrete substructure to avoid disturbing the creek and to avoid additional placement of rock slope protection to armor the banks. However, the existing bridge abutments above the piling and the wingwalls will be removed. A retaining wall will be constructed along Jalama Road on the east side of the bridge and the	NOD

	market-based parking rates, up to the existing maximum parking rate previously-approved by the Board, for District parking lots and garages. The project also includes a budget transfer to purchase parking equipment. The project is proposed to be in place by mid-May in order to address potential parking shortages and increase public access in the peak summer months.		
2015048176	<p>Amendment No. 3 to Lease with Anthony's Fish Grotto San Diego Unified Port District San Diego--San Diego</p> <p>The proposed project is Amendment No. 3 to the lease with Anthony's Fish Grotto of La Mesa (Anthony's) for property located at 1360 North Harbor Drive in San Diego, CA. Anthony's currently has a lease with the District that consists of a 1,080 sq. ft. water easement for a subsurface waterline and a 31,608 sq. ft. building divided into the following three existing operations: (1) a 75-seat quick-serve restaurant; (2) a 336-seat full service restaurant; and (3) a 106 seat banquet and conference room. Anthony's has operated under this lease since 1965, which includes outdated lease language dating back to the commencement of the lease. The lease is set to expire on Jan 31, 2016, triggering end of term requirements which are not consistent with current District practices. In addition to its lease with the District, Anthony's has three separate Tideland Use and Occupancy Permits (TUOPs) with the District associated with the operation of its leasehold which includes 72 sq. ft. of area used for advertising signage, 162 sq. ft. of area used for a canopy and additional signage, and 500 sq. ft. of area used for a quick-serve restaurant. The proposed lease amendment incorporates the current existing lease areas, the three areas covered under Anthony's existing TUOPs, clarifies end of term requirements, and updates the lease language to the District's current standard lease language, including hold harmless and sustainable leasing language. The proposed lease amendment will allow the District to streamline management of the leasehold for the remaining two years of the lease and align end of term requirements to current District practices.</p>	NOE	
2015048177	<p>Pepper Oil Company - Monitoring Well Installation and Soil Sampling San Diego Unified Port District San Diego--San Diego</p> <p>The proposed project will install up to 10 monitoring wells to collect soil and groundwater samples and conduct approx. 60 soil borings to collect soil samples for analysis within the Pepper Oil Company leasehold and around its perimeter in National City, CA. The purpose of this project is to investigate and evaluate the presence, concentration, and distribution of contaminants in soils, soil vapor, and groundwater at the site as well as the hydrogeological conditions that may affect the distribution and transport of potential contaminants on and off of the site. The project will be completed pursuant to the County of San Diego Dept. of Health permit requirements.</p>	NOE

2015048179	<p>suitable only over an obstacle free line of sight transmission link, as the presence of obstacles results in attenuation of the radio signal. The trees will be felled and either removed for wood utilization by the Unit or left on site. Slash will be piled and burned or chipped on site. All tree stumps will remain intact in the soil.</p> <p>Long Point/Lake Arthur Mastication Forestry and Fire Protection, Department of --Placer</p> <p>Project area consist of 30 acres of brush covered timberland between 1600' and 1900' elevation. The timber stand is primarily small oak trees and brush with a few large scattered overstory ponderosa Pine. Forest management has not occurred on site for over 50 years. The aspect faces southeast and slopes range from 5-45% which lead into tributaries of Dry Creek and Lake Arthur. the project is limited to mastication of brush and small tree with follow-up hand work using chainsaws and hand tools. Brush chipping of isolated sites that are above 40% slope will occur to tie mastication units together. Understory vegetation is extremely dense includes live and dead Manzanita, Live oak scrub and trees, poison oak, black oak and Himalaya blackberry. The intent is to install a perimeter of masticated shaded fuel break around the entire parcel from 50' to 100' wide. An additional line will be masticated on the north side of the canal as an intermediate shaded fuel break. Trees greater than 6" diameter will be left uncut unless infested with insects and a likely threat to the remaining trees. An RPF shall identify any trees over 6" that shall be removed. The final phase of treatment will be roadside chipping by hand along Lake Arthur Road.</p>	NOE
