

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

April 16 – 30, 2015

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **April 16 – 30, 2015**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

<u>Documents Received on Thursday, April 16, 2015</u>			
2014061078	<p>Outpatient Pavilion University of California, San Diego La Jolla--San Diego</p> <p>The proposed project is located in the UCSD East Campus Health Sciences Neighborhood. The 4.1 acre site is currently a surface parking lot. The proposed project would include a new 156,000, 3-story building with a basement. The project would include operating rooms, outpatient care bays, clinical facilities, patient intake facilities, staff support spaces, and mechanical/electrical facilities. The proposed OPP would provide pain management, urology, orthopedics, spine, sports medicine and breast clinics. In addition, the proposed project would provide outpatient, orthopedic and breast imaging, as well as rehabilitation facilities. The project would also include landscape and hardscape improvements and a plaza.</p>	EIR	06/01/2015
2015041052	<p>Garvey Gardon Plaza Rosemead, City of Rosemead--Los Angeles</p> <p>The project site is developed with seven buildings, including three commercial buildings and four residential homes. The development will be demolished to allow the construction of the proposed four-story, mixed use development consisting of 11,860 sf of retail/office use on the first floor and 46 residential units on the second through fourth floors. The project also includes a density bonus application under Senate Bill 1818, which amended the state bonus law to allow density bonuses up to 35% for low income housing. As a result, 10 of the apartments will be available for low-income households and allow the development of a total of 46 apartments.</p>	MND	05/15/2015
2015041053	<p>ENV-2015-0705-MND Los Angeles, City of Los Angeles, City of--Los Angeles</p> <p>The project involves the construction, use, and maintenance of a new four-unit small lot subdivision. The proposed new small lot units will be three stories with a maximum height of 39 feet six inches and will include a minimum of two parking spaces per unit (eight parking spaces total) within attached private garages. The project site includes one non-protected tree, which will be removed as part of the project. The applicant is requesting a Vesting Tentative Tract Map for the subdivision of four small lots in the creation of four small lot development in the R3-1 Zone. The existing house on the project site will be demolished as part of the project. The existing home was built in 1921 but is not considered an historic feature, as determined by the Office of Historic Resources of the City of Los Angeles.</p>	MND	05/15/2015
2015041055	<p>Palm Avenue Mixed Use and Commercial Corridor Master Plan Imperial Beach, City of Imperial Beach--San Diego</p> <p>The project includes a number of elements intended to enhance Palm Avenue / SR 75 within City. The overall goal of the project is to provide a multi-modal corridor conducive to pedestrians, bicyclists, transit, and vehicle as well as to business and new infill development. The project area is primarily located along Palm Avenue / SR-75 as well as some side streets, from the City's border with Coronado to the City's border with San Diego. Street improvements would include</p>	MND	05/15/2015

	widened medians with additional landscaping, wider sidewalks with shade trees, clearly marked crosswalks, medians with enhanced pedestrian safety "refuges," curb ramps, and bicycle lanes.		
2015041056	<p>LeBard Park and Residential Project Huntington Beach, City of Huntington Beach--Orange</p> <p>The Huntington Beach City School District proposes to amend the existing Public zoning and General Plan land use designations on an approximately 9.7-acre surplus school site (LeBard Elementary School) for public recreation and single-family residential uses. The City would acquire 6.5 acres of the LeBard Elementary School site that are currently developed with sports fields as an addition to the adjoining approximately 3-acre developed portion of LeBard Park. Improvements within the sports fields and existing park area would include a new concession/restroom/storage building, relocation of bleachers and bullpens, accessibility upgrades and an expanded parking lot. Other improvements include grading and drainage within the park and sports fields area and a new passive recreational area. The existing amenities in LeBard Park and all six sports fields would remain.</p>	MND	05/15/2015
2015041057	<p>Blessed Junipero Serra Parish Expansion (CUP 14-13) Lancaster, City of Lancaster--Los Angeles</p> <p>The proposed project involves the expansion of an existing church and associated facilities. The expansion of the church would total approximately 62,612 sf over 5 phases and include the following: 5,344 sf preschool; 4,480 sf chapel; 10,400 sf building for faith and formation/classrooms; 13,308 sf multipurpose building; 2,600 sf rectory; 7,000 sf adult education center; and a 19,480 sf building for senior housing.</p>	MND	05/15/2015
2015041054	<p>Civic Center Project Long Beach, City of Long Beach--Los Angeles</p> <p>The project includes a new City Hall, a new Port Building for Harbor Department administration, a new and relocated Main Library, a redeveloped Lincoln Park, a residential development, and a commercial mixed use development. The project also includes the demolition of the former Long Beach Courthouse building. In total, the proposal includes six new buildings, three new parking garages, related infrastructure and landscaping, and two new public street extensions of Chestnut Avenue and Cedar Avenue through the project site. The Lincoln Park garage and Broadway garage would be preserve and would be used by city staff and public parking as it is today. Both the City Hall and Port buildings would be up to 11 stories in height.</p>	NOP	05/15/2015
2015042049	<p>Recology Modernization and Expansion Project Brisbane, City of Brisbane--San Mateo</p> <p>The Proposed Project is a comprehensive modernization program designed to facilitate management of San Francisco's solid waste stream and is aimed at achieving the 2020 "Zero Waste" goals established by the San Francisco Commission on the Environment in 2002. The term "Zero Waste" means that no associated material is sent to a landfill or incinerated (San Francisco Department of the Environment, 2003). The Proposed Project includes construction and operation of new, modern resource recovery facilities within an expanded footprint</p>	NOP	05/15/2015

2015022070	Tentative Parcel Map & Variance Application No. PLN2015-0009 - Robert Rawe Stanislaus County Riverbank--Stanislaus Request to subdivide an existing 3.95 acre parcel into a 1 acre parcel and a 2.95 acre remainder parcel. The current parcel consists of two single-family dwellings and an irrigated pasture. A variance is requested to create two parcels that will not meet minimum lot size requirements of the A-2-10 zoning district.	Neg	05/15/2015
2015042048	2015-2023 Housing Element 5th Cycle Dixon, City of Vacaville--Solano The draft Housing Element is designed to address the projected housing needs of current and future residents in compliance with state law through 2023. The Housing Element serves as the City's policy document for guiding the provision of future housing needs for all economic segments of Dixon. The draft Housing Element meets the City regional housing needs (197 new units) allocation (RHNA) assigned to the City of the Association of Bay Area Governments. The City will fulfill its RHNA requirements using approved or already constructed new units or underutilized residentially zoned land.	Neg	05/15/2015
1999102083	Branciforte Creek Federal Flood Control Channel Maintenance Santa Cruz, City of Santa Cruz--Santa Cruz The project is limited to the following activities in the concrete-lined channel: 1- a once per year vegetation removal encompassing areas up to 15 feet in width and to 1,500 linear feet in total cumulatively per annum including trees under 4-inches in diameter at breast height (DBH); 2- a once per year removal of up to 350 cubic yards of accumulated sediment from the concrete floor of the channel within the same footprint as the vegetation removal (1,500 linear feet cumulatively per annum) by small, rubber-tracked equipment and hauled off-site; 3- temporarily covering the low-flow channel with steel plates to prevent mechanized equipment from entering wetted areas; 4- temporary dewatering of stream reaches. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2014-0403-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Mark Dettle/City of Santa Cruz Department of Public Works.	NOD	
2001071035	Kern River 2003 Expansion Project California State Lands Commission Barstow--San Bernardino, Kern The California Department of Fish and Wildlife (CDFW) has executed Streambed Alteration Agreement number 1600-2015-0030-R6, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Kern River Gas Transmission Company. The Project involves operations and maintenance activities along Kern River's existing California pipeline system, which consists of 104 miles of two 36-inch diameter pipelines, constructed in 1991 and 2003, in San Bernardino County from the Nevada border at Primm, Nevada, to Daggett, California (mainline); 32 miles of	NOD

	24-inch diameter natural gas pipeline constructed in 2001, in San Bernardino County from Kramer Junction, California, to Victorville, California (High Desert Lateral). Operations and maintenance activities will also occur on 8.6 miles of 8-inch diameter (ITP No. 2081-2011-047-06) in San Bernardino County from the existing mainline pipeline in Ivanpah Valley, California, to Molycorp Minerals LLC property at Mountain Pass, California (Mountain Pass Lateral).		
2011122056	Alhambra Valley Road Safety Improvements Project Contra Costa County Martinez--Contra Costa The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0101-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Contra Costa Resource Conservation District.	NOD	
	The Project is limited to the improvement of a 2,425 linear foot segment of Alhambra Valley Road in the unincorporated area of Contra Costa County, in the State of California. The Project is limited to the conversation and modification of three existing storm drain culverts that convey water under Alhambra Valley Road. One riparian tree shall be removed as a result of this Project.		
2013121074	F.E. Weymouth Water Treatment Plant Improvement Program Metropolitan Water District of Southern California La Verne--Los Angeles Metropolitan has prepared an Environmental Impact Report (EIR) for improvements to the F. E. Weymouth Water Treatment Plant (Weymouth Plant) in compliance with the California Environmental Quality Act (CEQA) Guidelines and the State CEQA Guidelines. The project, as described in the EIR, consists of the following elements: (1) Solar Generation Facility; (2) Filter Rehabilitation; (3) Chlorine System Upgrades; and (4) Weymouth Plant improvements. Weymouth Plant improvements consist of refurbishment to the basins; improvements to the domestic and fire water system, and stormwater management system; upgrades to the dry polymer system; rehabilitation to the oxidation demonstration plant; and, seismic upgrades to the water quality lab, engineering building, and central stores.	NOD	
2014072029	PA-1400105 (SA) San Joaquin County Lodi--San Joaquin A Site Approval application for Pruchel Vineyards (c/o Lap Farming, LLC) for a farm services operation to provide disking, mowing, and spray application services and farm machinery repair operation. The farm services operation will utilize a 200 square foot portion of an existing 400 square foot office and the farm machinery repair will utilize a 600 square foot portion of an existing 5,000 square foot agricultural storage building. The Property is zoned AG-40 (General Agriculture, 40-acre minimum) and the General Plan designation is A/G (General Agriculture). The project site is located on the east side of N. De Vines Road, 2,700 feet south of Peltier Road, Lodi. (APN/Address: 013-070-26/21570 N. De Vries Road, Lodi) (Supervisorial District 4).	NOD

2015011044	OC-44 Pipeline Rehabilitation Project Mesa Consolidated Water District Newport Beach--Orange The proposed project would involve pipeline rehabilitation of Mesa Water District's existing OC-44 Pipeline. The project proposes to slip-line the existing 42-inch pipeline with a new 30-inch Ductile Iron Pipe (DIP). In order to accommodate these improvements, a pipe jacking operation would be conducted, which would require three access pits.	NOD	
2015022068	PCWA Communications Upgrade Project Placer County Water Agency --Placer Placer County Water Agency (PCWA) is proposing to initiate the Middle Fork Project Communications Upgrade Project. PCWA owns and operates the Middle Fork American River Project (MFP), a multi-purpose water supply and hydro-generation project designed to manage streamflows in the Middle Fork American River, the Rubicon River, and several associated tributary streams. The MFP includes existing communications facilities that allow transfer of information between powerhouse and PCWA's Church Street communication tower facility and its Foresthill and Auburn offices. Some of these facilities have deteriorated and need to be replaced, and others need redundant facilities installed, as required by the North American Electric Reliability Corporation (NERC).	NOD	
2015031029	Avenue 116 Canal Expansion Project Pixley Irrigation District --Tulare The proposed project objectives are to construct three underground pipelines to connect over 800 acres of farmland currently not being served with surface water from the Avenue 116 Canal within the Pixley Irrigation District. The project will include a 20 acre recharge basin to ensure excess water will be returned to groundwater.	NOD	
2015031030	Deer Creek Channel Clearing and Maintenance Project Pixley Irrigation District --Tulare The proposed project objectives are to maintain the Deer Creek Channel as an effective conveyance of irrigation water. This will require periodic maintenance of existing structures as well as the beds and banks of the channel. Specific maintenance projects have not yet been identified at this time, however the proposed maintenance activities expected include repair and maintenance of approximately 70 features (bridges, dams, pipes, weirs, and/or turnouts) at approximately 22 locations within the bed and bank of the Deer Creek Channel or turnout channels immediately adjacent to Deer Creek.	NOD	
2015032015	Robinson Viewshed (P14-00086) and Special Fence Permit (P14-00301) Napa County Calistoga--Napa Review and approval under the Viewshed Protection Program for the construction of a residence, three-car garage, barn, pool, fence, a new driveway, improvements to the existing driveway, installation of new landscaping and demolition of the existing residence and pool. Review of a special fence permit for a fence greater than four feet in the front yard setback and an exception to the Napa County Roads and Streets Standards to modify the design of the new driveway connection to Silverado Trail. 	The project site is not currently subject to listing under Section 65962.5 of the Government Code (the Cortese list). The existing tanks at the site were installed prior to 1965 and do not meet current seismic design standards.		
2015042058	NOI to Rely Upon an EA for the Second-Growth Forest Restoration in Redwood Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Humboldt Note: NOI	NOI	05/26/2015
	The primary focus of the Project is to reduce the time required for the restoration of conditions more typical of old growth redwood forests by thinning second growth forests to reduce overall stem density and increase redwood dominance. The work will include 1,125 acres of dense underdeveloped second growth forest in the Middle Fork Lost Man Creek watershed, located north of Orick, CA. The objectives of forest restoration in the Middle Fork Lost man Creek include: enhanced forest structure and improved forest canopy development; enhanced wildlife habitat; enhanced aquatic systems and fish habitat; minimizing soil erosion and impacts to aquatic systems; and minimizing attraction of avian nest predators such as jays and ravens near old growth forests.		
2015042051	Jack London Square 4th & Madison Project Oakland, City of Oakland--Alameda The project would demolish the existing building and surface parking lot and construct approximately 330 apartments and approximately 3,000 sf of ground floor commercial in two buildings of Type IIIa construction, including 5 levels of wood frame construction (potentially with an additional mezzanine) over two levels of Type I concrete.	NOP	05/18/2015
2001102113	Housing Element Update St. Helena, City of --Napa The project is a proposed update of the 2009 City of St. Helena General Plan Housing Element. The Housing Element establishes housing objectives, policies and programs in response to community housing conditions and needs. The Housing Element Update is a comprehensive statement by the City of St. Helena of its current and future housing needs and proposed actions to facilitate the provision of housing to meet those needs. The proposed Housing Element is a policy level document. It provides policy direction for the implementation of various programs to accommodate the housing needs of projected population growth, and to encourage the production of housing units in a range of prices affordable to all income groups. <u>Documents Received on Friday, April 17, 2015</u>			
2015041058	Annexation No. 85 and Pre-Zone to M-1, C-3 and Open Space Tehachapi, City of Tehachapi--Kern A request to annex 153.8-acres into the City limits and a pre-zone request of 34.9-acres M-1, 79.2-acres C-3 and 39.7-acres Open Space.	Neg	05/18/2015
2007042070	Delta Shores Project Sacramento, City of Sacramento--Sacramento Entitlements to construct commercial development on approximately 130 acres included in the Delta Shores Planned Unite Development zoned General Commercial (C-2-PUD). The proposed development was included in the project and EIR analysis for the Delta Shores project (P06-197) approved by the City Council on January 13, 2009 and, as explained in the addendum to the EIR prepared for the commercial project, no substantial changes have occurred that would alter the determinations made in the original EIR.	NOD	
2011092057	Marin General Hospital Replacement Building Project Marin Healthcare District --Marin The original project approved June 11, 2013 consisted of redevelopment of Marin General Hospital to provide parking structures, a Hospital Replacement Building, an Ambulatory Services Building, and related roadway and other improvements. Project amendments were approved on March 11, 2014. The current approval makes new amendments to relocate the main entry, emergency department, garden, bus stops, and generators, add a new lobby, lower the hospital height, change related roadway and other improvements and revise construction details.	NOD	
2014102083	Phasing in of Nonlead Ammunition Requirement No Later Than July 1, 2019 Fish & Wildlife Commission --Sacramento The project consists of implementing a statutory requirement to use nonlead projectiles and ammunition for the take of wildlife statewide no later than July 1, 2019 and, in whole or in part, earlier if practicable. Specifically, the project includes addition of 250.1 to Title 14, amendment of existing 311, 353, 464, 465, 475, and 485, as well as repeal of 355 of Title 14 of the California Code of Regulations. Pursuant to Pub. Resources Code 21080.5, 14 C.C.R. 1525 (b), and 14 C.C.R. 781.5, CDFW prepared an Environmental Document as the functional equivalent of an EIR.	NOD	
2014121083	Case No. 2014-84 - Maple Avenue Live/Work Project Westminster, City of Westminster--Orange The proposed project involves a Tentative Tract Map to allow for the subdivision of the existing 1.83 acre lot into two parcels and 37 condominium units. The existing on-site structures would be removed and the proposed development would consist of 37 new live/work condominium units with interior drive aisles, surface parking, pedestrian walkways, and landscaping. The development would require a General Plan Amendment from Industrial to Residential-High and a Zone Change from M-1 to R-5-PD (19 to 24 units/acre) of a 64,790 sf portion of the site to support the proposed density of 22.3 units per acre. A Comprehensive Plan is required to approve the proposed site layout and project design. The proposed live/work units are comprised of 17 two bedroom units (1,555 sf of floor area per unit) and 20 three bedroom units (1,826 sf of floor area per unit). The proposed workspaces	NOD

	(to be located at ground-level) would support professional office, studio (art, music, dance, photography, wood working), clothing boutique, surf shop, hair salon, graphic design, and other similar uses as further defined in the conditions, covenants, and restrictions (CC&Rs) for the project, as well as those uses allowed with the issuance of a Home Based Business Zoning Clearance Permit. The second and third floors (which are connected to the first level work space floor) would consist of living area. The project would construct a total of 11 on-site buildings with an approximate height of 36.5 feet, and would vary in color and materials. The project site is not listed on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5.		
2014121092	Interstate 40 (I-40) Re-Grade Median Cross Slopes Proposed Project Caltrans #8 Barstow--San Bernardino The California Department of Transportation (Department) proposes to Re-grade Median Cross Slopes inside the clear recovery zone from existing 6:1 or steeper gradients in the direction of 10:1 or flatter, and drainage improvements & modifications in the median. Preserve and improving the existing California Highway Patrol (CHP) crossovers on Interstate 40 (I-40) from Junction 15/40 post mile 0.0 (PM 0.0) to 1.4 mile east of Fort Cady Road Overcrossing post mile 25.0 (PM R25.0) in San Bernardino County. The total length of the project is twenty-five miles.	NOD	
2015012028	SMUD Headquarters Building and Site Rehabilitation Sacramento Municipal Utility District Sacramento--Sacramento The Proposed Project would consist of rehabilitating the Headquarters Building and site and establishing two separate trailer locations on SMUD's campus for the temporary housing employees. Key proposed project elements include expansion of the central area of the Headquarters building, rehabilitation of the main parking area, landscaping, and the development of increased physical security concepts surrounding employee parking areas. Hazardous materials abatement, ADA compliance and improved vehicle and pedestrian circulation.	NOD	
2015032020	San Mateo County Emergency Management and Motor Pool Relocation San Mateo County Redwood City--San Mateo The project includes the redevelopment of the Project Site 1, located at 551 Winslow Street in Redwood City, to accommodate a new Emergency Management Center. As part of this project component, the existing Motor Pool facility would be demolished onsite and relocated to the Corp Yard (Project Site 2). The EMC will be designed to maximize building operation after extreme environmental events such as earthquakes, flooding, wind, and storms. The existing Motor Pool would be relocated to Project Site 2, located at 752 Chestnut Street in Redwood City. The majority of the existing buildings and structures on the Corp Yard would remain.	NOD	
2015049006	Lake or Streambed Alteration Agreement No. 1600-2015-0114-R1 2-12NTMP-001-SIS "Mills Meadow NTMP" Forestry and Fire Protection, Department of --Siskiyou The project is limited to one venter ford encroachment. This structure will consist of a 24" culvert embedded in a rock dip. Approaches shall be rocked at a minimum of 25 feet. Fill shall consist of average 4"+ rock with smaller material as needed to	NOD

	breaks and defensible space from which fire suppression operations can be conducted. The Patton Mill Fuel Break Project will complement an existing 45 mile system of public and private fuel breaks located to the north of the proposed project area. As proposed, the Resource Conservation District of Tehama County (RCBTC) in cooperation with the Mendocino National Forest will establish a 5 mile long (120 acre) roadside fuel break. Eighty six acres of these vegetation treatments will occur on Mendocino National Forest managed lands and 35 acres on private property. In addition, road brushing will be completed along a 1 mile (approx. 5 acres) segment of Forest Service Road 24N36. After implementation, the fuel break and road brushing areas will be maintained as needed utilizing the same treatment techniques as described below. Alternative treatments may be used in the future and will be analyzed prior to implementation.		
2015048211	Heavy-Duty Electric Vehicle Manufacturing Initiative (HDEVMI) Energy Commission Poway--San Diego Proposed resolution approving Agreement ARV-14-045 with Transportation Power, Inc., dba TransPower for a \$2,999,880 grant to manufacture electric vehicle components for Class 8 trucks. Manufactured components will include an inverter-charger unit, battery management system, automated manual transmission, and power control and accessory subsystem. (ARFVTP funding)	NOE	
2015048212	EDI Advanced Vehicle Manufacturing Facility Energy Commission Milpitas--Santa Clara Project involves the use of a +/- 29,968 sq. ft. space in an existing building located in an industrial zone. Project will install equipment on-site, modify the interior of the building at the project site, assemble and manufacture automotive drivetrain components, and install same components into vehicles.	NOE	
2015048213	Energy Efficiency Upgrades - Santa Ana State Office Building General Services, Department of Santa Ana--Orange The proposed project would improve the energy efficiency of the existing State owned office building which was originally constructed in 1976. The project will include: optimizing the air distribution, upgrading hydronic control valves, retro-commissioning, installation of demand controlled ventilation, upgrading the building automation system, upgrading the heat exchangers, insulating steam and condensate piping, replacing failed steam traps, replacing distribution transformers and upgrading interior lighting to LED.	NOE	
2015048214	Access Barrier Removal Project, San Jose State Building General Services, Department of San Jose--Santa Clara The San Jose State Building Access Barrier Removal Project is part of the Dept. of General Services Access Barrier Removal Program (DGS ABRP). The DGS ABP is part of the DGS transition plan to improve access to persons with disabilities in DGS owned office buildings. The DGS ABRP will provide for the removal of architectural barriers in the common areas of each building in the program. The San Jose State Building Access Barrier Removal Project is limited to and includes only removal of architectural barriers to common areas within the building and site.	NOE

2015041067	Garvey Avenue Corridor Specific Plan Rosemead, City of Rosemead--Los Angeles The Garvey Avenue Corridor Specific Plan identifies the long-term vision and objectives for land use development and public improvement along a 1.2 mile portion of Garvey Ave. in the western portion of the City of Rosemead. The Specific Plan will establish site planning, building, parking, architectural, and open space standards and guidelines for development within the planning area. The planning area encompasses 88 acres and includes land use designations/zoning districts supporting mixed-use, commercial, residential, public, and open space uses. It is estimated the Specific Plan will support development of over 1.18 million sq. ft. of commercial development, 892 dwelling units (DU), and 0.77 acres of open space.	NOP	05/19/2015

2015048223	Tamarack Authorized Parking Area Improvements (14/15-SD-28) Parks and Recreation, Department of Carlsbad--San Diego This project will create a drop-off zone in the Tamarack Avenue parking lot of Carlsbad State Beach to improve visitor services.	NOE	
2015048224	Attach Knox Boxes to Boiler and Erecting Shop Parks and Recreation, Department of --Sacramento Install knox boxes on both the Boiler Shop and Erecting Shop at the Sacramento Railyards to allow for fire department access in case of emergency. The knox boxes will be provided by the Sacramento City Fire Department and district maintenance staff will install them on the outer northern doors of both the Boiler Shop and the Erecting Shop. Holes will be drilled into the steel sheet walls beside each door and the boxes will be bolted in place. After installation is complete, the work will be inspected by the Sacramento City Fire Department.	NOE	
2015048225	Reposition Outdoor Message Kiosk Parks and Recreation, Department of --Sacramento Reposition an outdoor message kiosk at the exterior of Sutter's Fort State Historic Park so that it is easier for visitors to read and is not blocking a path of travel. The sign is currently perpendicular to a fence and will be moved to be parallel. Work will excavate two new post holes approximately 18"deep by 10" in diameter and the existing sign will be moved from its current position to the new position. Old sign holes will be backfilled with excavated materials from the new holes.	NOE	
2015048226	Donner Modifications Corrections and Rehabilitation, Department of --Marin Due to an increase in the numbers of condemned inmates housed at SQSP, CDCR is going to provide additional housing in an adjacent cell block. The original steel door (circa 1900s) between the two cell blocks is far too heavy and unwieldy to use on a regular basis. This door will be fastened in an open position against the wall and a new door, that meets current design standards, will be constructed in the opening. An existing security fence will be replaced by a solid wall in the exercise yard to provide increased safety and security for inmates and staff. Other minor modifications will be made to cells and showers.	NOE	
2015048227	San Mateo High School Trailer Replacement Project San Mateo Union High School District San Mateo--San Mateo The project will consist of replacement of an existing 60x25-30-foot trailer (portable), currently used for office space, with a new version. The upgraded facility will be the same size and located within the same footprint. The trailer, still considered a temporary structure, will be used for the same functions as the present facility.	NOE	
2015048228	Upper Truckee Marsh Soil Sampling Tahoe Conservancy South Lake Tahoe--El Dorado The project is to collect soil samples at 5 locations in the Upper Truckee Marsh to analyze for Arbuscular Mycorrhizal Fungi.	NOE

2015048241	SAASB Bicycle Traffic Circle University of California, Santa Barbara Goleta--Santa Barbara A bicycle traffic circle will be constructed as a replacement for an existing "y-shaped" intersection of the bike path system. The project will benefit bicyclists by addressing left-turn conflicts at the intersection of eastern/western-bound and northern-bound traffic. Project would include tree removal and new landscaping.	NOE	
2015048242	South Boat House Marine Railway Repair (Lake or Streambed Alteration Agreement No. 1600-2014-0302-R2) Fish & Wildlife #2 South Lake Tahoe--El Dorado CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2014-0302-R2, pursuant to Section 1602 of the Fish and Game Code to CA State Parks / Sierra State Parks Foundation.	NOE	
2015048243	Lake Front Dock Development (LAA# 1600-2015-0028-R2) Fish & Wildlife #2 --Calaveras CDFW has executed Lake Alteration Agreement No. 1600-2016-028-R2, pursuant to Section 1602 of the Fish and Game Code to Howard Guilbault. Project includes the installation of a sloped block erosion protection wall along the 511' contour not to exceed 4 feet in height, including footing for a distance not to exceed 65 linear feet. The wall shall be sloped back to match the existing natural contour of the reservoir along the shoreline in this area. Approx. 10 cubic yards of soil will be excavated in the area of the wall footing zone with all material transported and placed above the 515' contour (Exhibit B). Beyond the installation of the erosion wall, all other areas of the shoreline at the 515' contour and below shall be left in their natural state, with no fill sand or other material to be placed between the 510' and 515' contours.	NOE	
2015048244	Culvert on Nau Property (Lake or Streambed Alteration Agreement No. 1600-2015-0033-R2) Fish & Wildlife #2 --Yuba CDFW has executed Lake and Streambed Alteration Agreement No. 11600-2015-0033-R2, pursuant to Section 1602 of the Fish and Game Code to Corey Nau. Project is limited to the construction of a driveway across the unnamed tributary to Dry Creek. The driveway will be constructed within the already disturbed dirt road area and will require the installation of two 30-inch diameter corrugated metal pipe culverts. The driveway will be approx. 24-feet wide and the culverts will be approx. 40-feet in length. The culverts will be backfilled with native soil not to exceed 20 cubic yards and then mechanically compacted. The culverts will be armored with 4-6 inches of rock at the inlet and outlet which will be contoured to match the existing streambed elevation. All disturbed soils will be stabilized using best management practices.	NOE

	landing, gangway and floating dock. Project specifics include: 1) 617 sq. ft. deck replacement with supports on concrete masonry wall; 2) 220 inch-foot concrete masonry unit retaining walls; 3) concrete stairs,, concrete patio, landscape and lawn; 4) floating dock gangway and landing attached to retaining wall below the 510'. Approx. 300 cubic yards of soil will be removed below the 515' flowage easement down to 501' to place the retaining wall, and 6 inch rip-rap will be placed at either ends of the retaining wall. After the retaining wall has been set the area behind will be backfilled and the slope regraded.		
2015048246	Homewood Marina Maintenance Dredging Project (Lake or Streambed Alteration Agreement No. 1600-2015-0044-R2) Fish & Wildlife #2 --Placer CDFW has executed Lake and Streambed Alteration Agreement No.1600-2015-0044-R2, pursuant to Section 1602 of the Fish and Game Code to Homewood High and Dry Marina, LLC. Project is limited to maintenance of dredging of accumulated sediment at the Homewood High and Dry Marina in order to maintain access to the marina harbor from the lake and launch/takeout. The amount of accumulated sediments to be removed is approx. 535 cubic yards to the approved maintenance level of 6217.0 feet Lake Tahoe Datum. Project is to be completed during April-May of 2015.	NOE	
2015048247	Replace and Modify Irrigation Systems Caltrans #4 --San Mateo Installing "smart" controllers and upgrades to irrigations systems at 8 locations.	NOE	
2015048248	Southwestern Yacht Club Maintenance Dredging Project San Diego Unified Port District San Diego--San Diego The proposed project includes maintenance dredging within the waterside portion of the Southwestern Yacht Club (SWYC) leasehold and the beneficial reuse of the sand along the near shore area at La Playa Beach located in Shelter Island in San Diego. Over the past several years, silting of sand in the southwest corner of the SWYC leasehold has caused the breakup of docks used for junior sailing, causing SWYC to remove a section of the junior's dock. Furthermore, the silting of sand has also decreased the water depth in front of the small boat hoist area limiting access for boaters. The proposed work includes maintenance dredging of approx. .15 acres of navigable waters. The dredged material will then be used for beneficial reuse at La Playa Beach.	NOE	
2015048249	Tideland Use and Occupancy Permit to Seaport Village Operating Company for Existing Entrance San Diego Unified Port District -- Proposed project is a tideland use and occupancy permit (TUOP) to Seaport Village Operating Company, LLC (Tenant) for their continued use of approx. 32 sq. ft. of tideland area located at the intersection of Kettner Blvd. and Harbor Drive in the City of San Diego. The area proposed for use will be used only and exclusively for the purpose of displaying an entrance sign at Kettner Blvd. and for no other purpose whatsoever without prior written consent of the Executive Director of District. The Tenant will be responsible for compliance with all laws and regulations associated with the activities on or in connection with the above-described premises, and in all uses thereof including those regulating	NOE

2015041074	Hesperia Farms Site Solar Facility Project Lake Arrowhead Community Services District Hesperia--San Bernardino The proposed solar facility will be located in the City of Hesperia in San Bernardino County. Lake Arrowhead Community Services District facilities and operations. The purpose of the proposed project is to provide power to generate credits for District-wide facilities in order to minimize overall energy demand and minimize greenhouse gas emissions from this passive solar facility. Development of the proposed Hesperia Farm Site solar facility will consist of clearing any vegetation from this existing agricultural field; grading the approximate five acres to support the future solar panels and support equipment; and proposed solar project. The District will provide security lighting for the solar field. The District seeks to install up to .96 megawatt of solar electric panels. A perimeter road will be installed as will a perimeter fence. The electricity produced by this facility will be connected to the local electric grid adjacent to the project site at the southeast corner of the District's Hesperia Farms site. The electricity produced is expected to be metered into the regional grid and credits will be obtained to offset energy consumption by individual District facilities.	MND	05/21/2015
2015041075	Calimesa Country Club Village Project Calimesa, City of Calimesa--Riverside The project includes development of approximately 30 acres into mixed-uses that include senior housing units, a living/wellness center, a hotel, medical offices, retail, and restaurants, as outlined below, as well as three planted water quality control basins; passive/natural open space; and planted open space (slopes and buffers).	MND	05/21/2015
2015042060	Rhythm Project Division of Oil, Gas, and Geothermal Resources Wasco--Kern California Resources Corp. LLC proposes to construct the one well site (1.3 ac.) and drill three exploratory oil and gas wells from the well site. The proposed project site is located approximately 1.2 miles east of Wasco in western Kern County.	MND	05/21/2015
2015042061	Sunset Whitney Residential Rocklin, City of Rocklin--Placer The Sunset Whitney Residential project is a proposed residential development consisting of two phases on 7 acres on the Rocklin Golf Club. Phase 1 consists of 16 lots on 3.5 acres that would be accessed off of Sunset Blvd. This area currently consists of a green and tee box portion of the golf course which would have to be reconfigured to accommodate the residential lots. Phase 2 consists of 16 lots on 3.5 acres that would be accessed off of Midas Avenue. This area currently consists of law area, tennis courts, parking area and a maintenance facility; the tennis court facilities are being removed, the parking area is being reconfigured, and the maintenance facility is being reconfigured, and the maintenance facility is being relocated as part of the project. 	of 32 recycled water meters will also be installed and will be connected to adjacent water mains by 2-inch laterals. The recycled water system extension is proposed in MNWD's service area. Four segments are in the City of Aliso Viejo, two segments are in the City of Laguna Hills and two segments are in the City of Laguna Niguel.		
2015021086	Emergency Pipeline Tie-in Project Heritage Ranch Community Services District Paso Robles--San Luis Obispo Provides emergency access to current Nacimiento water entitlement during no-or-low-flow conditions. Project connects existing water pump station 1 to the Nacimiento Water Project (NWP) with a 4-inch pipeline, requires installation of approx. 1,250 ft of 4-inch diameter pipeline adjacent to and under the Nacimiento River, & connection to the NWP at existing air & vacuum valve through installation of a sub-surface vault. Pipeline installation would be completed through a combination of conventional trenching methods along the banks & horizontal directional drilling under the Nacimiento River. Project construction would require disturbance of approx. 0.25 acre over 1-2 months.	NOD	
2015022027	American River Pipeline Conveyance Project Carmichael Water District Rancho Cordova--Sacramento The Proposed Project consists of: 1) pipeline construction from the Bajamont WTP under the American River to the existing water distribution system in Rancho Cordova; 2) abandoned pipeline removal across the American River to improve safety; 3) culvert replacement and bank stabilization at the unnamed drainage on the north bank; and 4) stream restoration along the north bank of the American River. The Project will provide treated water to GSWC to replace groundwater affected by contamination.	NOD	
2015032003	PA-1400259 San Joaquin County Stockton--San Joaquin A Minor Subdivision application of Hidden Vineyards, LLC (c/o Dillon & Murphy) to subdivide an existing 240-acre parcel into three parcels. Each parcel to contain 80 acres. The applicant submitted a Parcel Map Waiver application. This parcel is under a Farmland Security Zone contract. The Property is zoned AG-40 (General Agriculture, 40-acre minimum) and the General Plan designation is A/G (General Agriculture). The project site is located on a private easement on the north side of Milton Road, 1,775 feet west of Fine Road, Linden. (APN/Address: 105-200-03/20589 E. Milton Road, Linden) (Supervisory District 4).	NOD	
2015032060	Twitchell Island Habitat Enhancement Project Reclamation District 1601 Isleton--Sacramento The Twitchell Island Habitat Enhancement Project (project) will expand and diversify the habitats on Twitchell Island. The specific objectives of this project are to design, plant, monitor, and maintain two new habitat enhancement sites (28 total acres), and replant three existing habitat mitigation sites (16.5 total acres) on Twitchell Island. The sites will first undergo invasive weed management to control/remove existing invasive weeds. Once accomplished, each site will be planted with native trees, shrubs, and herbaceous species during the late fall/early winter period. Once period, the sites will be monitored and managed to ensure successful establishment for five years after planting.	NOD

2015048254	Villa Park Dam Subdrain System Modification Project (Lake or Streambed Alteration Agreement No. 1600-2014-0063-R5) Fish & Wildlife #5 Unincorporated--Orange The purpose of the project as proposed is to install a valve on the upstream side of the subdrain beneath Villa Park Dam, which will allow maintenance to be performed on the subdrain by shutting off the flow upstream of the dam. A concrete pad and entrance ramp will be constructed to allow access to the valve vault and to provide access to the main outlet gates and outlet apron for maintenance activities. Approximately 1,360 cubic yards of soil will be excavated to allow for the access road and vault; 260 cubic yards of concrete and fill will be installed.	NOE	
2015048255	Dyerville Vault Toilet Parks and Recreation, Department of --Humboldt Install one pre-fabricated double vault toilet of modern, vandal resistant design and ADA compliant on the existing asphalt parking lot at Dyerville Overlook at Humboldt Redwoods State Park to improve visitor services. Remove approximately 30 ft. x 30 ft. of existing asphalt with heavy equipment. Excavated a 12 ft. x 14ft. x 5 ft. deep pit for the vault. Pour concrete around the facility to provide accessible parking and path from the parking space to the restroom.	NOE	
2015048256	Combination Restroom #2 Leaching System Replacement Parks and Recreation, Department of --Del Norte Replace the failed leaching system at Combination #2 at Jed SMith S.P. to maintain the waste system in the park.	NOE	
2015048259	Special Event Permit to Roots and Branches Parks and Recreation, Department of --Marin Issue a Special Event Permit to Roots & Branches Conservance to use the Mountain Theater and limited parking lots in Mount Tamalpais State Park to produce an annual one-day music and arts festival to raise funds to bring public awareness to the needs of Mount Tamalpais State Park. The event will be limited to 3,750 attendees and is scheduled for September 19, 2015, and September dates for up to the next five years. No natural or cultural resources will be adversely impacted by this project.	NOE	
2015048260	Tahoe National Forest Boca Shoreline Restoration Project Parks and Recreation, Department of --Placer The project consists of blocking and obliterating approximately 10 miles of user-created illegal routes and roads no longer needed for the travel management system around the Boca Reservoir shoreline. The work involves placing boulders or a barrier system to block entrances to routes, decompacting the routes using a dozer/backhoe, improving drainages as specified in BMPs, implementing erosion control BMPs, and seeding with native, weed-free seed in select locations.	NOE

2015048261	Oceano Dunes State Vehicular Recreation Area - Dawn to Dusk 12-Hour Parks and Recreation, Department of --San Luis Obispo On May 9th, 2015 an organized Dawn to Dusk Adventure Race coordinated by All Out Events will be bused from San Luis Obispo to Oso Flaco Lake parking lot the morning of the event. The participants will start ~7 mile running course at 0600 which goes through the park from Oso Flaco to Grand Avenue. Approximately 15 spotters, 2 ranger staff, and race course officials will be ensuring the runner's safety as they traverse through the park. The course also utilizes portions of the park that are not open to OHV riding in order to eliminate the risk of OHV and runner interactions. Runners are expected to take between 1.5 to 3 hours to complete the running course and will therefore be transitioning to kayaks between 0730-0900 for their paddle to Avila Beach.	NOE	
2015048262	Hollister Hills State Vehicular Recreation Area - Long Canyon Connector Parks and Recreation, Department of Hollister--San Benito This project will close and restore a short portion of trail that connects Long Canyon Road to Olive Orchard Road. The trail is incised and roughly 12 feet wide. The soil at the site is derived from heavily weathered granite and erodes readily without adequate trail drainage features. Due to the amount of incision, the trail cannot shed water and will continue to down cut as a result. Additionally, the trail is not necessary or unique to the trail system as a whole, thus little of the recreational aspects is impacted.	NOE	
2015048263	Hollister Hills State Vehicular Recreation Area - Hare Scramble Connector Parks and Recreation, Department of Hollister--San Benito This project will cut a new four foot wide trail used for dirt bike races held in the Upper Ranch. The trail will be cut with a trail dozer. Beginning at the top of Chaparral climb, the trail will head southeast toward Hidden Valley Road where it will eventually connect. Although the Upper Ranch is reserved for 4X4 users, occasionally, it is operated under a partial closure for special events. This requires closing the eastern portion of Upper Ranch including Sycamore Camp and the 4X4 trails around the water tanks. Closing this camp is often contentious with the user group, as campers are either displaced or impacted by race traffic.	NOE	
2015048264	Martial Cottle Park Community Garden San Jose, City of San Jose--Santa Clara The project is minor alterations to land at Martial Cottle Park to include a 1.5 gross acre community garden considered under the Martial Cottle Park State General Plan and County of Santa Clara Park Master Plan. The general public is the beneficiary of the project.	NOE

2015044003	<p>Humboldt Bay National Wildlife Refuge Sea-Level Rise Adaptation Demonstration Project U.S. Fish and Wildlife Service Arcata--Humboldt Remove European beachgrass and iceplant from 4 acres of foredune at the Bair parcel, Humboldt Bay National Wildlife Refuge, followed by revegetation with native species. Beachgrass would be removed with shovels to detach rhizomes while the top of the plant is pulled and burned in piles or taken to an off-site composting area. Iceplant would be removed by hand-pulling, bagged and transported to a composting facility. Resprouts would be pulled weekly/every other week for one or more growing seasons. Following initial beachgrass and iceplant removal but prior to the next rainy season, native dune mat plants (cuttings, root divisions and seeds) would be planted in six of eight experimental areas to compare changes in dune morphology and sediment dynamics (deposition, deflation) with that of the two experimental areas where no removal would occur.</p>	EA	05/22/2015
2012052027	<p>Carnegie SVRA General Plan Parks and Recreation, Department of Livermore--Alameda, San Joaquin Preparation of a General Plan and associated EIR to determine land use and resource management provisions. Carnegie SVRA comprises 1,575 acres currently open to the public and an adjacent 3,100-acre expansion area. The General Plan is a guidance document intended for use over many years. It includes a series of visitor experience areas and a detailed set of goals and guidelines developed to guide operations and management of the SVRA into the future. In addition to the long-range goals and guidelines provided, the General Plan envisions multiple new facilities and improvements to existing facilities related to access, education, recreation opportunities, and operations.</p>	EIR	06/08/2015
2014021064	<p>Widening and Railing Replacements at Three Bridges Caltrans #6 Woodlake--Tulare FYI Final</p> <p>Caltrans proposes to widen three existing bridges in rural Tulare County and replace their railings. Sand Creek Bridge (No. 46-0137) is on SR 201 (Avenue 400) at PM 12.48 at County Road 116, 1.8 miles southwest of the town of Cutler. The Friant-Kern Canal Bridge (No. 46-0065) is also located on SR 201 (Avenue 384) at PM 21.21, about 4 miles east of Seville. The Kaweah River Bridge (No. 46-0091) is located on SR 216 (Lomitas Drive) at PM 18.68, about half a mile northwest of Lemon Cove. The purpose of the project is to upgrade two bridges on SR 201 and one bridge on SR 216 to current Caltrans design standards for railings and lane and shoulder widths.</p>	FIN	
2015041076	<p>ENV-2014-4080-MND / 226 S. Main Street Los Angeles, City of --Los Angeles The project is the proposed change of use of an existing 1,257 sf retail space into a 1,257 sf cafe/restaurant with 250 sf of service floor area and 29 indoor seats. The project also proposes the sale and dispensing of beer and wine only for on-site consumption. The proposed hours of operation will be from 6:00 am to 12:00am Sunday through Wednesday and from 6:00 am to 1:00 am Thursday through Saturday.</p>	MND	05/22/2015

2015041077	ENV-2014-4806-MND / 846 N. Wilcox Avenue Los Angeles, City of --Los Angeles The proposed Project is on a site that is approximately 13,600 sf, spanning two lots, and includes the construction of a four-story, 45-foot tall, 23-unit multi-family dwelling that includes two units for very low income households, and 38 vehicle parking spaces in a one-level subterranean parking garage. The total project size is approximately 28,986 sf of floor area. The property is zoned R3-1 with a General Plan Designation of Medium Residential and is located in the Hollywood Community Plan Area. The project includes the demolition of the five existing single family dwellings on the site (total of approximately 2,819 sf of floor area).	MND	05/22/2015
2015041078	Site Plan Review No. 14-03 (California Department of Motor Vehicles) Lancaster, City of Lancaster--Los Angeles The proposed project consists of the construction and operation of a 1-story, 28,878 sf DMV facility. Access to the facility would be provided from driveways on both 8th Street West and Avenue L-6. A total of 264 parking spaces would be provided including spaces for fuel efficient vehicles, test end parking, and handicap accessible parking. Areas within the project site would be designated for motorcycle testing and vehicle testing.	MND	05/22/2015
2015041079	Hilton Garden Inn Lompoc, City of Lompoc--Santa Barbara A request by Lompoc Land Holding LLC, for Planning Commission consideration of a proposal to construct a four-story hotel with parking and landscaping. The hotel is approximately 108,000 sf and includes 156 guestrooms, meeting rooms, a dining area, and a swimming pool. The proposed project site is approximately 2.8 acres and is located at 1201 North H Street in the Planned Commercial Development (PCD) Zoning District.	MND	05/22/2015
2015041080	Terrabonne Project Division of Oil, Gas, and Geothermal Resources --Kern CRC LLC proposes to construct the one well site (1.3 acres) and drill three exploratory oil and gas wells from the well site. The proposed project site is located approximately 5.9 miles north of Buttonwillow in northwestern Kern County.	MND	05/26/2015
2015042062	Dixon Mine Road Bridge (No. 31C-0002) Replacement Project Alpine County --Alpine Alpine County is proposing to replace the existing Dixon Mine Road Bridge (No. 31C-0002) over Wolf Creek with a new cast-in-place concrete slab bridge. The new bridge would be 25 feet wide by 45 feet long with two travel lanes and a roadway width of 18 feet. The existing bridge is functionally obsolete and structurally damaged and poses a safety hazard to vehicle travel. The project also includes modification of the approaches on Dixon Mine Road and installation of a temporary path with a diversion structure. The creek would be dewatered in the work area, and the path would be used for access by construction equipment and vehicles, property owners, and recreationists (limited) until the new bridge is open. Construction would take 6 months and be completed in one season. Staging would be on private and/or National Forest System land or in County rights-of-way.	MND	05/22/2015

2015048274	Rogers Pier Catwalk Repair Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe --Placer The project proponent plans to repair the catwalk of an existing pier.	NOE	
2015048275	2015-2016 Multi-Year Water Pool Demonstration Program Water Resources, Department of -- A two-year (2015-2016) water purchase program among participating SWP contractors. DWR will administer the program and convey the water to the buying contractors' service areas.	NOE	
2015048276	Pump Station No. 2 Power Reliability and Surge Protection San Diego, City of San Diego--San Diego Pump Station No. 2 is fed from three electric SDG&E feeds; two of which are from the same substation. If two feeds fail, there is only one feed to power the pump station, which does not meet the U.S. Environmental Protection standards for backup power. The purpose of the project is to improve the overall power outages and ultimately preventing sewage spills. The project proposes the removal of two office trailers, removal of two natural gas engines, removal of an existing lube oil vault, installation of two electric motors on pumps 4 and 5, and the modification of four heat exchanger units and associated ancillary systems to cool the generators	NOE	
2015048277	City of Fremont Fire STations Microgrid Project Energy Commission Fremont--Alameda Design and build a low carbon-based microgrid at each of the three fire stations in Fremont. Each microgrid consists of a microgrid energy management system, 180 kW rooftop and carport canopy photovoltaic system, and battery energy storage. The microgrid will provide at least three hours a day of renewable power to critical loads during a utility power outage.	NOE	
2015048278	The SoCalGas Waste-to-Bioenergy Applied R&D Project Energy Commission Brawley--Imperial This project will demonstrate a combined concentrating solar power and hydrothermal processing technology which converts dairy manure into low-carbon, pipeline-quality renewable natural gas (RNG) suitable for injection into geological storage facilities where it could be stored and withdrawn as needed for electricity production.	NOE	
2015048279	Cleaner Air, Cleaner Energy; Converting Forest Fire Management Waste to On Demand Renewable Energy Energy Commission --Placer The purpose of this project is to design, deploy, and test a demonstration mobile biomass gasifier technology that can convert forest slash biomass into on demand renewable energy. The results of the demonstration will be analyzed to determine (1) optimal siting to enhance grid stability, (2) impact of monetizing current forest waste as fuel on ability to increase forest thinning and lower wildfire risk, and (3) impact of increased thinning on availability of hydrological resources. The proposed project is a pilot demonstration of a containerize biomass gasification power plant.	NOE

2015048284	<p>Mount St. Helena Fuel Break Forestry and Fire Protection, Department of --Napa</p> <p>The California Department of Forestry and Fire Protection (CAL FIRE) is planning a shaded fuel break project along Highway 29 over Mount St. Helena in Napa County. This route is the main connection between Lake and Napa Counties and is traveled by more than 7,000 cars daily. Creating a shaded fuel break will alter the volume, type, and continuity of vegetation which will change the behavior of a potential wildfire entering the zone. Brush, shrubs, and small trees will be removed in order to eliminate fire ladder fuels and increase spacing between tree crowns. The reduced fuel zone will lessen the chance of a fire starting and increase the likelihood that crews would be able to extinguish a fire before it could spread to the upper tree canopy and become a large, damaging fire.</p>	NOE	
2015048285	<p>WEst Side Fuel Break Forestry and Fire Protection, Department of --Mendocino</p> <p>This project consists of the maintenance and widening of an existing fuel break for the purpose of wildfire control in State Responsibility Area SRA). The proeject is located along a series of interconnected ridge tops located west of the city of Ukiah. The vegetation type is primarily chaparral with interspersed hardwoods and conifers. The current fuel break ranges from 20-40 feet in width and is partially overgrown.</p>	NOE

	<p>The proposed Project would include demolition of several existing structures and clearing of some existing vegetation, including removal of heritage trees.</p> <p>The Project proposes construction of approximately 36,000 sf of new facilities, including retaining approximately 2,000 sf of existing storage space in the Public Works yard and the approximately 1,696 sf Council Chambers building. Proposed facilities would replace the existing City Administration building, Police Building, and Library.</p>		
2015021046	General Plan Amendment No. 15-007 to Update the Tipton Community Plan Tulare County --Tulare	EIR	06/08/2015
	<p>On Sept. 30, 2014 the Tulare County board of Supervisors (BOS) approved the Planning Branch proposal to update the Tipton community Plan. The Tipton Community Plan Update will become consistent with the recent approval of the General Plan 2030 Update, and will include the following primary goals and objectives.</p> <ol style="list-style-type: none"> 1. Land Use and Environmental Planning - Promote development within planning areas next to Regional Highway 99 Corridor in order to implement General Plan goals. 2. Improvements for a "disadvantaged community" - It is expected that the community planning areas will be improved. 3. Strengthening Relationships with TCAG - an important benefit of this expedited community plan process will be the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG) in that this and other community plans will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. 		
2015021047	General Plan Amendment No. 15-006 to Update the Strathmore Community Plan Tulare County --Tulare	EIR	06/08/2015
	<p>The Proposed Community Planning Study Area consists of approx. 1,000 acres and the area is generally south of Avenue 200, west of the Firant-Kern Canal of Avenue 190 and immediately east and west of SR 65.</p> <p>The purpose of the Proposed Plan is to provide direction for the Tulare County Resource Management Agency, Board and Planning Commission in the implementation of methods and procedures to satisfy the needs of the residents and business community in the development of a viable and active commercial and industrial base Strathmore.</p>

	square foot building.		
2014092021	<p>General Plan Amendment & Rezone Application No. PLN2014-0080 - Salida Market Stanislaus County --Stanislaus</p> <p>Request to amend the General Plan designation of Medium Density Residential to Planned Development and rezone from C-2 (General Commercial) to P-D (Planned Development) on a .33+/- acre parcel in order to replace a 4,406 sf building with an 8,761 sf building to be used as a retail market. The proposed rezone will facilitate the project's ability to meet parking requirements and allow additional lot coverage.</p>	NOD	
2014111073	<p>Buena Vista Nose Area Appraisal Project Division of Oil, Gas, and Geothermal Resources Taft--Kern</p> <p>Vintage Production California LLC is proposing the Buena Vista Nose Area Appraisal Project to construct four well sites (11.2 acres) and expand one existing well sites (8.7 acres) and drill a total of nine oil wells on these pads. The surface owner for all of the proposed sites is J.G. Boswell Farms and they are located approximately eight miles from the unincorporated community of Taft.</p>	NOD	
2014112046	<p>Green Diamond - R1501, MS1504, GPA1501 - Rezone, Minor Subdivision, General Plan Amendment Del Norte County --Del Norte</p> <p>The project area is a 12-acre portion of an approximately 40-acre parcel which the applicant has proposed to subdivide into four parcels. A portion of the parcel located on the west side of Lake Earl Drive is not part of this subdivision, is formally designated as the Remainder Parcel, and is thereby excluded from this project. There is a small watercourse, which is a tributary of Russell Creek that runs across the southernmost parcel (Lot 4) in the proposed subdivision. The applicant has proposed a 100-foot buffer to minimize impacts to the creek and associated area, resulting in this parcel (Lot 4) being 6.64-acres while the other proposed parcels (lots 1-3) are each 2-acres in size. Lot 1 has an existing 50-foot easement across it that provides secondary access to an interior parcel east of this project. Lots 2, 3, and 4 are accessed from a shared easement off of Lake Earl Drive while Lot 1 is accessed from a separate easement approximately 800-feet to the north of the access to Lots 2-4. Each of the parcels that are proposed would be developed with private onsite wells and onsite sewage disposal systems as public water and sewer are not available in the project area. In order to approve the subdivision the land must also be re-designated under the County General Plan and County Zoning. Currently, the land involved in the project is designated TBR (Timberland) under the General Plan and TPZ (Timber Preserve Zone) under the Zoning. The applicant has proposed to change these designations to RR-1/2 (Rural Residential, One dwelling unit per 2 acres) and RR-2 (Rural Residential - 2-acre minimum parcel size) under the General Plan and Zoning, respectively. No development is proposed.</p>	NOD

2015-04	Karuk Tribe of California - APNs: 062-051-670 (formerly 062-051-380) Bureau of Indian Affairs --Siskiyou The proposed land acquisition is for a parcel that is 49.50 acres, more or less. The subject parcel is located in Yreka, California and is contiguous to trust land held for the Karuk Tribe of California. The original application was submitted October 2007 with the land use for parking (dirt parking lot). Since that time the tribe was approved for gaming on the adjacent trust land and now the tribe is proposing to pave the parking lot as additional parking for the casino.	BIA	05/26/2015

	<p>an additional 59 code protected trees. In addition to approval of the vesting tentative map, the applicant is also requesting approval of a general plan amendment to designate 2.35-acres of the site single-family residential (SH) from the existing open space (OS) designation, a rezoning of the property to Planned-Unit District (P-1) from Single-Family Residential (R-6) zoning, and a final development plan for development of the subject property. The subject property is a vacant parcel located at 0 Pomona Street at the intersection of Rolph Park Drive in the Crockett area. (Parcel Number: 354-202-005) (Zoning: R-6) (General Plan: Open-Space). County Files: #SD12-9312, DP12-3002, RZ12-3220 and GP09-0002.</p>		
2014062081	<p>Pacific Rod and Gun Club Upland Soil Remedial Action Project San Francisco, City and County of San Francisco--San Francisco</p> <p>The project is limited to remediation contaminated soil at the Pacific Rod and Gun Club (PRGC) as required by the Regional Water Quality Control Board Site Cleanup Requirements Order No. R2-2013-0023. The soil is contaminated from shotgun shells and clay targets used at the PRGC, both of which contain toxic substances including lead and polycycle aromatic hydrocarbons. Remediation will consist of excavation and off-site disposal of contaminated soils in upland areas and along the shoreline of Lake Merced. The project covered under the Lake and Streambed Alteration Agreement Number 1600-2014-0353-R3 CDFW is executing pursuant to Section 1602 Fish and Game Code, is limited to the activities associated with remediation only along the shoreline and in or near freshwater and marsh wetlands.</p>	NOD	
2014062084	<p>Recycled Water Project Pleasanton, City of Pleasanton--Alameda</p> <p>The purpose of the Proposed Project/Action is to construct and operate a new recycled water system to replace/augment existing irrigation supplies in the City's service area. The development of recycled water service within the City will lessen the demand for Zone 7 Water Agency (Zone 7) potable water supplies and help the City meet the State of California's Water Conservation Act of 2009, which requires a 20 percent reduction in urban per capita water use by the year 2020. Furthermore, the addition of recycled water to the City's water supply portfolio will increase its water system reliability since recycled water is a local supply within the City's control and is drought-resistant. The Addendum assesses the effects of minor changes to the alignment of recycled water facilities in order to achieve design efficiencies. The net effect of the changes is approximately 2.0 miles of new or repurposed pipeline.</p>	NOD	
2014111034	<p>Landels Hill-Big Creek Reserve Facility Improvement University of California --Monterey</p> <p>Project would remodel an existing staff residence to create living space for visiting researchers. A new 1,500 sf classroom building would be constructed adjacent to the existing residence. At a separate location, the Project would construct a 1,332-sf staff residence, a 493-sf residence for part-time staff and visitors, and a 1,048 sf garage/workshop.</p>	NOD

2014121061	Fairmont School Water Supply Pipeline Project Sanger Unified School District Sanger--Fresno The Proposed Project consists of improving the safety and reliability of CSA-10 Wells 1 and 2, installation of approximately 15,500 linear feet (LF) of water distribution pipeline within existing County of Fresno road right-of-ways to connect Fairmont School to CSA-10, and localized improvements to the Fairmont School water system including installation of a booster pump station and water storage tanks.	NOD	
2014121084	PHG13-0034 and SUB13-0007 (Amanda Estates) Escondido, City of Escondido--San Diego The proposed project includes a Tentative Subdivision Map, along with a Master and Precise Development Plan for 21 single-family residential clustered lots on approximately 11.2-acres of land. Grading Exemptions for cut slopes in excess of 20 feet in height and fill slopes in excess of 10 feet in height, and retaining walls also are requested. Residential lot sizes range from approximately 10,025 sf to 20,404 sf. The existing home on the site would be removed. The project includes annexation/reorganization of the subject site to the City of Escondido, along with three adjacent developed parcels and a portion of a private road easement connecting Amanda Lane to Gamble Lane. Reorganization includes detachment from CSA No. 135 (Regional Communication/Fire Protection and EMS) and exclusion from Improvement District "E" of the Rincon Del Diablo Fire Protection District. The project includes pre-zoning of the subject site to City Planned Development-Residential (PD-R 1.9) and the three adjacent developed residential parcels to RE-20 (Residential Estate, 20,000 sf min. lot size). Off-site roadway and drainage improvements are proposed along Amanda Lane and Gamble Lane from Eucalyptus Avenue on the east to the gated terminus on the west, which also includes a "Traffic Calming Plan" for Gamble Lane. In compliance with SB 244, "Disadvantaged Unincorporated Community" eight additional properties would be included in the pre-zoning process to define a future City zoning designation for these parcels but would not be included in this annexation. A separate annexation application would be submitted to LAFCO for these parcels.	NOD	
2015022091	General Plan, Housing Element Update - IS/ND February 2015 South San Francisco, City of South San Francisco--San Mateo Consideration of a negative declaration (ND14-0001) and an amendment to the general plan (GPA14-0001) to adopt the 2015-2023 Housing Element, and acceptance of the 2014 Housing Element Annual Progress Report, in accordance with South San Francisco Municipal Code Chapters 20.460 and 20.540. 	The project is limited to improving a low water crossing, water diversion to storage, and riparian planting for bank stabilization. Work will include road best management practices such as hydrologically-disconnecting the road and crossing installation. Water will be diverted from the Mattole River for dust abatement. Water will be stored for agricultural and other uses. Approximately 200 feet of riparian vegetation will be replanted with Douglas-fir.		
2015032045	Alex Moore Special Permit for Greenhouse and Bridge Construction and Water Diversion Humboldt County --Humboldt The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0112-R1, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Mr. Alex Moore.	NOD	
	The project is limited to installing a new bridge across Honeydew Creek at an existing crossing. Work will include road best management practices such as hydrologically-disconnecting the road and crossing installation. Water will be diverted from the Mattole River for dust abatement.		
2015032049	PA-1500029 San Joaquin County Stockton--San Joaquin A Minor Subdivision application of Peter G. & Emily K Katakian (c/o Kjeldsen, Sinnock, & Neudeck, Inc.) to subdivide an existing 49.36-acre parcel into two parcels. Parcel One to contain a 2.47-acre homesite parcel and Parcel Two to contain a 46.89-acre designated remainder parcel. This parcel is under a Williamson Act contract. The Property is zoned AG-40 (General Agriculture, 40-acre minimum) and the General Plan designation is A/G (General Agriculture). The project site is located at the northeast corner of Baker Road and Beecher Road, Stockton. (APN/Address: 089-160-39 & 40/11955 E. Baker Road, Stockton) (Supervisorial District 4).	NOD	
2015049015	Lake or Streambed Alteration Agreement No. 1600-2014-0133-R1 for THP 1-14-036MEN "Olsen Gulch" Forestry and Fire Protection, Department of --Mendocino The Department of Fish and Wildlife (CDFW) is issuing an agreement for the installation of two temporary and one permanent culvert crossings in Class II watercourses.	NOD	
2015048387	Conditional Use Permit No. 2218 Broadway Adult Day Care El Cajon, City of El Cajon--San Diego Establish Adult Day Care in an existing restaurant and banquet hall with minor interior tenant improvements. The Adult Day Care would provide supportive services for developmentally disabled individuals and seniors.	NOE	
2015048388	Kiewit Vallejo Project Fish & Wildlife #3 Vallejo--Solano The project is limited to clamshell bucket dredging to remove accumulated sediment. A clamshell bucket barge-mounted dredge will approach the site via the Mare Island Strait. Dredging will remove approximately 26,000 cubic yards of material, over two dredging events, from in front of the existing bulkhead on the	NOE

2015041087	Downtown Center Project University of California, Merced Merced--Merced UC Merced proposes the construction of an office building in downtown Merced. The proposed project would house the administrative offices of existing academic and administrative programs that presently occupy leased office space at number of off-campus locations and office space within the Kolligan Library on the UC Merced campus.	MND	05/27/2015
2015041082	Arroyo Seco Ecosystem Restoration Feasibility Study EIR Los Angeles County Flood Control District La Canada-Flintridge, Pasadena, South Pasadena, ...--Los Angeles LACFCD and the Corps are proposing to study alternatives for ecosystem restoration within 11 miles of the Arroyo Seco within the cities of La Canada-Flintridge, Pasadena, South Pasadena, Los Angeles, and an unincorporated area within Altadena in Los Angeles County, California. The FS/EIS/EIR will recommend a plan that will provide for a long-term restoration for riparian and aquatic habitat while maintaining flood risk management. The study proposes to identify a plan for opportunities for aquatic and riparian restoration along the Arroyo Seco. A range of alternatives will be analyzed in the EIR. In general, restoration these sites would encompass the range of conditions and features that existed at the Arroyo Seco historically, such as the following considerations. - Riparian habitat. - Tributary habitat providing access to higher points in the watershed. - Water quality that can support native species. - A large alluvial floodplain that offers wildlife habitat and flood attenuation and recreation and sediment control and groundwater recharge. Proposed management actions under the plan would not be designed to restore the Arroyo Seco River to pre-settlement conditions. Rather, they would be designed to restore the natural functions that were once widespread within the watershed, and to address the overall reduction in habitat quality and water quality that is apparent throughout the lower watershed. Some of the proposed management actions would be relatively small in the context of the overall	NOP	05/27/2015

These scenarios will use bidirectional power flow infrastructures, deployed at various sites within the Southern California Edison territory, to measure a range of variables including the behaviors of PEV users captured via smartphone applications, system integration with smart grids using a test bed of OpenADR signals, power levels, and power quality.	NOE	
2015048414	HighTemperature Hybrid Compressed Air Energy Storage Energy Commission Pomona--Los Angeles The proposed project is to build a fully-functional, low cost pilot High-Temperature Hybrid Compressed Air Energy Storage (HTH-CAES) system that can efficiently store grid-level energy and later release that energy for ancillary services and load following.	NOE	
2015048416	Validated and Transparent Energy Storage Valuation and Optimization Tool Energy Commission Palo Alto--Santa Clara This project will develop a new cloud-hosted software model that leverages the code and approach from EPRI's Energy Storage Valuation Tool (ESVT) software to meet the specific needs to California: energy storage procurement, increasing renewables penetration, and considering the full scope of CPUC use cases, costs, and benefits. Planned advancements include enhanced representation of services and dispatch in the sub-hourly time domain and enhanced representation of decision-making under uncertainty.	NOE

2015041090	<p>Proposed Amended Rule 1148.1 - Oil and Gas Production Wells South Coast Air Quality Management District --Los Angeles</p> <p>SCAQMD staff is proposing to amend Rule 1148.1 - Oil and Gas Production Wells, to prevent public nuisance and possible detriment to public health caused by exposure to volatile organic compound (VOC), toxic air contaminant and total organic compound emissions from the operation and maintenance of oil and gas production facilities. Proposed amended Rule 1148.1 would: 1) increase the minimum proximity distance to sensitive receptors (e.g., from 100 meters to 1,500 feet) that would trigger additional emission and odor preventative measures; 2) require the use of odor mitigation best practices for operation and maintenance of oil and gas production facilities; 3) require specific cause analysis and reporting for confirmed odor events; 4) require Odor Mitigation Plans for facilities with continuing odor issues; and, 5) make administration changes by removing obsolete rule language and making minor revisions to promote clarity, consistency, and enforceability throughout the rule. Analysis of the proposed project in the EA did not result in the identification of any environmental topic areas that would be significantly adversely affected by the proposed project.</p>	EA	05/28/2015
2013072073	<p>Mather Field General Plan Amendment, Specific Plan Amendment, Zoning Ordinance Amendment Sacramento County Rancho Cordova--Sacramento</p> <p>A General Plan Amendment to amend the Land Use Diagram from Intensive Industrial (247.5 acres), Low Density Residential (391.8 acres), Public Quasi-Public (2,266 acres), Commercial and Office (3.9 acres) and Recreation (2,468.5 acres) to Extensive Industrial-Aggregate Resources (67.9 acres), Intensive Industrial (693.4 acres), Low Density Residential (392.5 acres), Natural Preserve - Resource Conservation-Protected (1,272 acres), Public Quasi-Public (1,780.2 acres), Recreation (656.1 acres), Commercial and Office (3.0 acres) and Urban Development Area (511.6 acres) for approximately 5,377.6 acres.</p>	EIR	06/12/2015
2012022038	<p>Twitchell Island Levee Improvement Project - San Joaquin River Reach Reclamation District 1601 --Sacramento FYI Final 1 HC</p> <p>RD 1601 proposes to construct levee improvements along the south side of Twitchell Island to increase the levee's resistance to erosion, provide additional freeboard for an estimated wave-run up of 4.7 feet, and provide better overall levee stability. Improvements would include ~5 mile of new foundation berm and setback levee behind and attached to the existing levee along the San Joaquin River except in front of the existing pump station, a sheet-pile wall would be installed so that the pump station, sump, and appurtenant discharge pipes would not have to be moved. Borrow materials to construct the improvements, including engineered fill, drain rock, and aggregate base would be obtained from commercially available sources likely within 50-60 miles. Some material would likely be transported to the site by truck and some by barge.</p>	FIN

2005092044	Rancho Cordova Parkway Interchange Project Rancho Cordova, City of Rancho Cordova--Sacramento Note: Notice of Availability The proposed project would construct a new interchange over U.S. 50 between Sunrise Boulevard and Hazel Avenue in the City of Rancho Cordova, Sacramento County, California. The interchange would be a "south-only" connection and would also include construction of a new four-lane arterial street, called Rancho Cordova Parkway. Rancho Cordova Parkway would extend from the new interchange south to a new signalized intersection with White Rock Road. The project is located partially within the city and partially in unincorporated Sacramento County. The project would construct auxiliary lanes along U.S. 50 in the area between Sunrise Boulevard and Hazel Avenue.	FON	
2015041088	One Charter Oak Residential Development Project Covina, City of Covina--Los Angeles The project site was originally developed as an elementary school. The school has been closed for approximately 15 years. The Proposed Project would demolish the existing structures located on the 8.57-acre project site and construct 108 single-family detached homes at a density of approximately 12.6 units per acre. The Proposed Project would require a General Plan Amendment from School to Medium Density Residential and a zone change from R-1-7500 Residential Zone (Single-Family) to RD (Multiple-Family) with a Planned Community Development (PCD) Overlay.	MND	05/28/2015
2015041089	Grace Church of the Valley Kingsburg, City of Kingsburg--Fresno Conversion of a former 108,000 s.f. warehouse structure into a functioning church facility. The main functions that will be housed in the existing building will be a sanctuary, fellowship hall, adult and children's Sunday school classrooms a cafe and a gymnasium. A kitchen facility is also planned. Outside there will be 3.72 ac of playfield, including a on-site storm water retention basin. Total congregants at build out will be 1584. Hours will be throughout the week with Wednesday evening service for approx. 350, and the balance on Sunday AM. Approximately 34,728 sf of space will remain vacant and unused. Total construction will be 58,118 sf, with the balance for structural support. Approximately 30 full time employees will be working. Planned parking space is 541 stalls. Project requires a GPA/Rezone/CUP to go forward with proposed use.	MND	05/28/2015
2015041092	Plano Trabuco Townhomes Specific Plan Rancho Santa Margarita, City of Rancho Santa Margarita--Orange William Lyon Homes, Inc. (applicant) proposes a Specific Plan involving the development of a neighborhood park and up to 36 three-story townhomes situated in 12 triplex buildings on an approximately 1.84-acre site located at 21522 Plano Trabuco Road (APN 833-731-01) in the City of Rancho Santa Margarita. Implementation of the proposed project would require the following discretionary approvals: (1) General Plan Amendment, (2) Zone Change with Specific Plan, and (3) Tentative Tract Map. 2013102015	<p>Contra Costa-Moraga 230 Kilovolt (kV) Reconducting Project (project) State Water Resources Control Board Antioch, Clayton, Concord, Walnut Creek--Contra Costa The Project includes installation of reconductoring equipment, modification of approximately 30 towers using helicopters and ground-based equipment; use of crossing structures to protect roads, utility lines, and other crossings; and establishment of pull sites, helicopter landing zones, and work areas to help facilitate project activities. Project activities are anticipated to take approximately 18 months to complete.</p> <p>Total project impacts include grading; excavating and the placement to fill material; installation of a temporary bridge; heavy equipment use within pull sites, landing zones, and work areas; digging holes for the placement of temporary crossing structures; temporary overland access routes, vehicle operation, and other activities. Six temporary overland access routes will be required to access two crossing structures and three work areas. Work areas will be established at nine of the towers to be modified, and at four additional areas. Site preparation activities at these locations may include vegetation clearing, grading, and placing geotechnical fabric and gravel.</p> <p>Six helicopter landing zones will be established to allow for the staging and refueling of helicopters used during project construction. Site preparation activities at these locations may include vegetation clearing, grading, and placing geotechnical fabric and gravel. Pull sites will include the equipment and materials necessary to replace the conductor.</p> <p>The Project will result in temporary impacts to 10.86 acres of California tiger salamander (<i>Ambystoma californiense</i>) and Alameda whipsnake (<i>Masticophis lateralis euryxanthus</i>) habitat. The project is expected to result in incidental take of California tiger salamander and Alameda whipsnake, which are designated as a threatened species under the CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.</p>	NOD	
2015032042	<p>Del Puerto Creek Sediment Removal Project Water Resources, Department of Patterson--Stanislaus The proposed project includes actions to restore channel flow capacity within Del Puerto Creek, and to forestall potential damages to the California Aqueduct levee. These actions include the removal of silt/cobble within 200 feet upstream of where Del Puerto Creek crosses under the Aqueduct, returning the drainage to its intended condition; placement of rip-rap along both sides of the creek embankments to stabilize the banks and prevent erosion of the Aqueduct levee; repairing a rocked drainage ditch that channels water runoff from the Aqueduct levee directly to the creek bed, improving the flow of water away from the levee toe; and access road improvements.</p>	NOD

	install/demonstrate a small geothermal distributed energy unit to generate electricity at Surprise Valley Hot Springs; and conduct a geothermal economic feasibility and market analysis to provide information that can be used for future planning for expanded geothermal development in the area. As a Responsible Agency, the Energy Commission has reviewed the Mitigated Negative Declaration prepared for the project activities by Modoc County and determined that the project will not have a significant environmental impact.		
2015048415	Modular Biomass Power Systems to Facilitate Forest Fuel Reduction Treatment Energy Commission Woodland--Yolo This project will develop a modular system that can be rapidly deployed to communities across California to promote and support fire safe management activities. The project will develop a pilot-scale modular biomass gasification system integrated with a high-efficiency lean-burn engine in order to convert forest residues into newable grid power to reduce the cost and increase the benefits of forest fuel reduction projects in California's high fire risk regions.	NOE	
2015048423	Nimbus Fish Ladder Maintenance Project (Lake or Streambed Alteration Agreement No. (1600-2015-0066-R2) Fish & Wildlife #2 Folsom--Sacramento The proposed project will remove boulders that have been deposited in the holding pool below the 12" notch in the training wall will be increased by approximately 3 feet to facilitate water flowing to the holding pool. The boulders will be pulled outside the ordinary high water mark using a Gradall forklift situated above the fish ladder. Straps and a chocker cable will be used to strap the boulders and rip rap.	NOE	
2015048424	Perez Farming Services Project (Lake or Streambed Alteration Agreement No. 1600-2015-0012-R2) Fish & Wildlife #2 --Sacramento The project is limited to the restoration of an unnamed tributary to Dry Creek. Restoration will include sloping back the banks of the stream to a maximum of 3:1 slope, revegetation with a native grass seed mix, and planting six (6) local narrow leaf willows (<i>Salix exigua</i>). The willow plantings will be monitored regularly in order to schedule supplemental watering and weed control to ensure the establishment of 80% of plantings. The portions of the stream containing Tully or Catails will be re-contoured to match surrounding landscape.	NOE	
2015048425	Tennessee Creek Water Diversion (Lake or Streambed Alteration Agreement No. 1600-2015-0010-R2) Fish & Wildlife #2 --Yuba The project is limited to the removal of clay soil and plastic placed around the face of the existing rock dam, as well as maintenance of the rock dam and diversion of water from the creek into a recreation pond. Where possible the clay soil and plastic will first be removed with hand tools and the remainder of the clay soil will be dredged out of the creek bed and placed into a sediment holding area, which will be removed off site once the water has drained. The rock dam extends across the creek approximately 20-feet with a width of 4-feet and height of 30-inches. Maintenance will include replacing fallen rock (moved by natural creek flow), back to the existing configuration.	NOE

2015042079	Truckee High School Track and Field Improvements Tahoe Truckee Unified School District Truckee--Nevada The proposed project would involve paving and applying an all-weather surface to the existing cinder track at Truckee High School. Related improvements would include constructing an ADA accessible path of travel between THS, the existing track, Sierra High School, and the public right of way (approximately 2,100 linear feet); installing one restroom facility (two urinals and two water closets on the men's side, five water closets on the women's side); installing new bleachers to accommodate 200 seats; installing permanent speakers and infrastructure for a portable public address (PA) system; and completing parking lot improvements to include repaving, restriping, and installing new parking lot lighting. The restriping would provide approximately 109 parking spaces.	MND	05/29/2015
2014091048	Proposed Single-Family Residential Hauled Water Initiative for New Development Los Angeles County --Los Angeles Ordinance to allow hauled water as the primary source of potable water for new single-family residential construction in unincorporated areas of the County of Los Angeles, where there is no available service from a public or private water purveyor and where it has been demonstrated that an on-site groundwater well is not feasible.	NOP	05/29/2015
2015042078	SB 5 200-Year Flood Protection, Amendment of Lathrop General Plan - Safety Element Lathrop, City of Lathrop--San Joaquin The project is adoption of General Plan Amendment (GPA) #15-35, SB 5 200-Year Flood Protection by the City of Lathrop. The GPA incorporates available flood risk information, State 200-year flood protection standards and other requirements for the content of Safety Elements. The GPA describes new City of Lathrop goals, policies and implementation measures related to flood protection.	Neg	05/29/2015
2015021045	Mirada Oil & Gas Project (CUP Modification; Case No. PL13-0158) Ventura County Ventura--Ventura The applicant requests that a modification of Conditional Use Permit (CUP) 3543 be granted to authorize the continued operation and maintenance of an existing oil and gas exploration and production operation (Agnew lease area) for an additional 25 year period. The requested permit would also authorize the re-drilling of one existing oil well and the installation of three new oil wells. The prohibition on the use of Koenigstein Road by large trucks to access the existing drillsite would also be eliminated as part of the current proposal.	SIR	06/15/2015
1997081036	California State University Monterey Bay 2007 Master Plan California State University Trustees Seaside, Marina--Monterey The proposed project, the 2015 Building Demolition Project, would involve the demolition of sixty-five (65) buildings and associated parking lots and above-ground infrastructure on the California State University, Monterey Bay (CSUMB) campus. 2012122038	<p>Level II Infill Correctional Facilities Project at MCSP - Secondary Effluent Spray Field Enhancement Measures</p> <p>Corrections and Rehabilitation, Department of Chino, Folsom, Vacaville, Lone, San Diego--</p> <p>The California Department of Corrections and Rehabilitation (CDCR) has prepared, considered, and accepted an addendum to the certified 2013 Environmental Impact Report (EIR) for the Level II Infill Correctional Facilities Project. The April 2015 Addendum addresses minor modifications to the scope of the project at the Mule Creek State Prison site. The modifications include, but are not limited to, temporary areas needed for construction support activities (offices, parking, pre-fabrication areas, equipment storage, etc.), relocation of the stormwater detention basin to protect a wetland, safety modifications to the temporary construction access road, installation of temporary and permanent underground utilities, closure/protection of a cultural resource site, realignment of an internal access road to avoid sensitive resources, the addition of a small stormwater detention facility, and modifications to a proposed parking lot. CDCR has made no other changes to the scope of the project at the Mule Creek State Prison site as described in the approved 2013 EIR.</p>	NOD	
2013122065	<p>State Route 85 Express Lanes Project</p> <p>Caltrans #4</p> <p>--Santa Clara</p> <p>The California Department of Transportation (Caltrans), in cooperation with the Santa Clara Valley Transportation Authority (VTA), proposes to convert the existing High-Occupancy Vehicle (HOV) lanes on State Route (SR) 85 to express lanes and add a second express lane in both directions between SR 87 and Interstate 280 (I-280). The express lanes would extend along the entire 24.1 mile length of SR 85 and 1.5 miles of US Hwy 101 from the southern end of SR 85 to Metcalf Road in San Jose. The total project length is 33.7 miles.</p>	NOD	
2014122068	<p>Oxbow Marina Mutual Water Co.-Water Supply Project</p> <p>State Water Resources Control Board</p> <p>Isleton--Sacramento</p> <p>The State Water Resources Control Board (SWRCB) Safe Drinking Water Proposition 84 Program is providing state funds for the project. The Oxbow Marina Mutual Water Company proposes to The Ox-Bow Marina Mutual Water Company is proposing to install a new 12-inch water pipeline to supply potable water from the City of Isleton to Ox-Bow Marina. The pipeline will connect to California American Water's existing 12-inch pipeline located along 6th street and travel through the City's Corporation Yard across active farmland and into the Ox-Box Marina and development. The pipeline will then be reduced to an 8-inch diameter pipeline once onsite. New services to each point of use will be installed along with a meter to measure water usage from the 8-inch diameter pipeline. Fire hydrants will also be installed. The goal and purpose of the project is to provide improved potable water that complies with State and Federal drinking water regulations. The existing water supply from two onsite wells exceeds the arsenic standard and is out of compliance.</p>	NOD
