STATE CLEARINGHOUSE

---

# SUMMARY OF POSTINGS

April 16 – 30, 2017

## STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **April 16 – 30, 2017**.

### STATE CLEARINGHOUSE CONTACTS

Please contact the State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

**Telephone:** (916) 445-0613  
**E-mail:** [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
**Website:** [www.opr.ca.gov](http://www.opr.ca.gov)

Questions regarding federal grant notices should be directed to **Sheila Brown via email**.

### STATE CLEARINGHOUSE MAILING ADDRESS

**USPS:** State Clearinghouse  
P.O. Box 3044  
Sacramento, CA 95812-3044

**OR**

**USPS/Courier Service / Hand Deliveries:** State Clearinghouse  
1400 Tenth Street, Room 113  
Sacramento, CA 95814

### INFORMATION AVAILABLE ON-LINE

## Key for abbreviations of Document Type:

ADM	Addendum
CON	Early Consultation Notice
EIR	Draft Environmental Impact Report
SIR	Supplemental EIR
SBE	Subsequent EIR
EIS	Draft Environmental Impact Statement
EA	Draft Environmental Assessment
JD	Joint Document (CEQA/NEPA)
FONSI	Finding of No Significant Impact
NOI	Notice of Intent
FIS	Final Environmental Statement
Neg Dec/ND	Negative Declaration
MND	Mitigated Negative Declaration
NOE	Notice of Exemption
NOD	Notice of Determination
NODe	Notice of Decision
NOP	Notice of Preparation (of an EIR)
FIN	Final Document
TRI	Tribal Compact Environmental Evaluation
BIA-LA	Bureau of Indian Affairs Notice of Land Acquisition
BIA-ND	Bureau of Indian Affairs Notice of Decision
OTH	Other type (none of the above)

<b><u>Documents Received on Monday, April 17, 2017</u></b>			
2017042048	<p>Rezone Application No. PLN2017-0030 - Valley Storage Stanislaus County Oakdale--Stanislaus</p> <p>Request to rezone an expired planned development, originally approved for the operation of a mini warehouse facility, to allow for the establishment of 252 parking stalls for the storage of boats and recreational vehicles, on a 3.97 acre parcel. The facility will be self-storage, with hours of operation for customer access between 9 am to 6 pm. The facility will be maintained by one employee, who will be available onsite 2-3 days a week between 9 am to 6 pm. The project proposes to locate a 400 sf modular office building and up to eight storage containers, to be available for additional customer storage. New fencing and site lighting are proposed to be installed along the perimeter of the site to provide security for the vehicles. Landscaping and fencing slats are proposed to be installed along the Valley Home Road frontage. A sewer transfer station is proposed for R.V. customer use only and will be maintained and pumped regularly by a waste disposal company. Covered parking is proposed to be located along the western edge of the project site. Phase 1 is proposed to include 125+/- stalls, to be completed by fall of 2017. Phase 2 is proposed to include the remainder of the stalls, to be completed by summer 2020.</p>	CON	05/05/2017
2016031092	<p>Modified Pixley Groundwater Banking Project South Valley Water Bank Authority --Tulare</p> <p>The Authority proposes to construct and operate the Pixley Groundwater Banking Project within the Pixley Irrigation District as a water management facility that will also conserve water, conserve energy, and reduce greenhouse gas emissions. The Action/Project would be in compliance with the San Joaquin River Restoration Program Settlement Agreement and Program Management Plan for the Friant Division of the Central Valley Project. The Action/Project will include the construction and operation of a recharge basin and various pipelines, pumps, wells, a regulating basin, and control structures to facilitate the transport of surface water delivered from new turnouts at the Friant Kern Canal and Deer Creek to the recharge basin to replenish groundwater or to directly serve land owners within a defined "in-lieu service area" of approximately 3,539 acres. The facilities to be built will also allow groundwater to be pumped and delivered back to the Friant Kern Canal, as needed, and in accordance with water supplies and demand. The Action/Project is subject to the National Environmental Policy Act (NEPA) as well as CEQA as it is partially funded by a grant from the US Bureau of Reclamation and as such is subject to NEPA as well as CEQA.</p>	MND	05/16/2017
2017021029	<p>South Lake Road Rehabilitation project (recirculated as Mitigated Negative Declaration) Inyo County Bishop--Inyo</p> <p>The general scope of this project is to rehabilitate the existing roadway; to pulverize and reclaim the existing pavement and portion of the existing subgrade for use as a new base course and overlay with a new asphalt concrete pavement section on 6.9 miles of South Lake Road, as well as minor widening along the first 2.1 miles to accommodate a widened, shared-use shoulder.</p>	MND	05/16/2017

## CEQA Daily Log

Documents Received during the Period: 04/16/2017 - 04/30/2017

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, April 17, 2017</u></b>			
2017041049	IS Application No. 7265 (Petro-Lud Inc.) Fresno County San Joaquin--Fresno Allow three exploratory petroleum oil and natural gas wells with the possibility of a production facility on a 1.37-acre (60,000 sf) portion of a 160-acre parcel in the AE-20 Zone district. The subject property is located on the southwest corner of W. Harland and S. Lake Avenues approx 1.9 miles northwest of the unincorporated community of Five Points.	<b>MND</b>	05/16/2017
2017042049	Withdrawn per lead - 135 Belvedere Ave - Lot Merge, Demo Permit, New Single-Family Home, Second Unit, Private Pier Belvedere, City of Belvedere--Marin Note: Project Rescinded per lead: 04/18/17.  The project proposes demolition of existing single family home, detached garage, water tank to make way for construction of 10,340 sf, single family residence, 750 sf accessory dwelling unit, and other improvements including a pool, a 128 sf boat storage structure, and a fixed pier (875 sf) that would extend approx 108 ft from Mean High Water seaward into Richardson Bay on a tide lot owned by County of Marin.	<b>MND</b>	
2017042050	Shady Creek Bridge at Purton Road Replacement Project Nevada County Nevada City--Nevada The proposed bridge would replace the existing structure with a single span, approx 65-ft long by 32 ft wide, cast in place pre-stressed concrete slab bridge. The bridge would accommodate two lanes, two shoulders and two bridge railings. The bridge would be supported by spread footing abutments.	<b>MND</b>	05/16/2017
2017042051	PG&E Palermo Reinforcement Project Public Utilities Commission Yuba City, Marysville--Yuba, Sutter, Butte Notes: Refer to Revised MND  The existing power transmission system is located in the western Sierras and the communities of Palermo, Honcut, Tierra Buena, Yuba City, East Marysville, Linda, Olivehurst, Plumas Lake, Rio Oso, and East Nicolaus, traversing Butte, Yuba, and Sutter Counties. The proposed project would improve reliability, ensure the system has adequate capacity to meet local needs, and be designed to accommodate future operation. The majority of the existing towers are proposed to be replaced with combination of hybrid poles (bottom concrete/top steel) and tubular steel poles.	<b>MND</b>	
2017042052	Almond Knolls Project Antioch, City of Antioch--Contra Costa The Almond Knolls Project includes the construction of a 58-unit multi-family, clustered residential development on an approx 2.9-acre vacant lot. Requested project entitlements include a GPA, rezone, tentative parcel map, variance, and use permit and design review.	<b>MND</b>	05/16/2017

## CEQA Daily Log

Documents Received during the Period: 04/16/2017 - 04/30/2017

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, April 17, 2017</u></b>			
2017042047	PA-1700039 San Joaquin County Stockton--San Joaquin A site approval application for agricultural truck parking for a max of two trucks and four trailers to include the construction of a 2500 sf accessory building for maintenance and repair.	<b>Neg</b>	05/16/2017
2005032139	Deuel Vocational Institution Reverse Osmosis Water Treatment Facility Corrections and Rehabilitation, Department of Tracy--San Joaquin The CDCR proposes modifications to the previously approved Deuel Vocational Institution Reverse Osmosis Water Treatment Facility project. These modifications include clean closure and rehabilitation of existing impoundment ponds and construction of new impoundment ponds and two groundwater monitoring wells. Please refer to Ch. 2 of the Addendum to the IS/MND for a detailed description of the proposed modifications.	<b>NOD</b>	
2009102028	El Corte de Madera Creek Parking/Staging Area and Trails Project Midpeninsula Regional Open Space District Woodside--San Mateo CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0323-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Midpeninsula Regional Open Space District. Project is part of a larger project consisting of a new parking lot, new trails, realignment of trails and installation of signs and appurtenant trail structures. The Agreement covers activities related to the installation of two 28-foot long wooden pedestrian trail bridges with concrete footings over the tributary to Lawrence Creek, as well as five smaller puncheon crossings and a retaining wall.	<b>NOD</b>	
2011062057	Statewide Plant Pest Prevention and Management Program Food and Agriculture, Department of -- Addendum No. 2 to the PEIR certified on Dec. 24, 2014. CDFW proposes changing the PEIR to include Acelepryn residential/urban foliar and ground applications for the Japanese Beetle Program. These are minor modifications to the PEIR with CDFW's jurisdiction, will be subject to management practices and mitigation measures described in the PEIR, & will result in no additional significant environmental impacts beyond those already identified in PEIR. (CEQA Guidelines, 15164, 15162, 15163) The Addendum includes an evaluation & explanation of the decision not to prepare a subsequent EIR supported by substantial evidence. (Guidelines 15164(b)(d)(e).)	<b>NOD</b>	
2012061063	Portola Center Project Lake Forest, City of Lake Forest--Orange Site Development Permit 06-16-4929 is a request to develop Planning Area R-6 within the South Planning Area of the Portola Center Area Plan (Area Plan 2008-01) with 65 single family dwellings and associated improvements, including fencing and paving. The project is designed in a four-pack, cluster arrangement and includes four floor plans, four different architecture styles. Each unit will include a two car garage and some (15 units), a two-car driveway. 78 on-street parking spaces, including 50 for units not having a two-car driveway, are available. In total, 193 parking spaces are required and the applicant is providing 238 parking spaces.	<b>NOD</b>

2013012072	<p>County Jail Project Napa County Napa--Napa The CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0166-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Napa County.</p> <p>The project is limited to the installation of one 20-foot long, 24-inch diameter reinforced concrete pipe outfall and approx. 440 sq. ft. area of energy dissipation.</p>	<b>NOD</b>	
2013012072	<p>County Jail Project Napa County Napa--Napa The CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0131-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Napa County.</p> <p>The project will install 5 new utility lines under an unnamed tributary to the Napa River, using a jack and bore method.</p>	<b>NOD</b>	

## CEQA Daily Log

Documents Received during the Period: 04/16/2017 - 04/30/2017

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, April 17, 2017</u></b>			
2013082090	<p>Flynnville Wine Company, Use Permit #P12-00222 &amp; Variance #P12-00223 Napa County Calistoga--Napa Use Permit to construct a 60,000 gallon per year winery to allow two winery buildings, totaling 24,210 sq. ft. in area, hosted daily tours and tastings by appointment only for a maximum of 25 persons per day, and a Marketing Program to permit six events per year, with a maximum of 25 guests, six events per year with a maximum of 50 guests, and three events per year with a maximum of 100 guests. Proposed hours of operation: 8:00 AM to 8:00 PM (production hours, except during harvest) and 10:00 AM to 6:30 PM (visitation hours), 7-days a week. The project would also include demolition of five existing buildings.</p>	<b>NOD</b>	
2015111032	<p>City of Paso Robles - Tertiary Treatment Facilities Project Paso Robles, City of Paso Robles--San Luis Obispo This project is designed to help the City meet the growing demand for recycled water. The primary components of the Project consist of a flow diversion box, flow equalization tank, cloth media filtration, ultraviolet disinfection, a recycled water pump station, and a recycled water storage pond. The City primarily relies upon groundwater as its source of treated water, and while the City has substantially decreased its per capita demand for water through water conservation programs, further efforts are needed. Through the implementation of the Project, the City would increase its recycled water, which in turn would reduce the amount of groundwater needed and help restore balance to the Paso Robles Groundwater Basin. Additionally, the use of recycled water will reduce the amount of water the City imports from Lake Nacimiento, which will provide more water to sustain flows in the Salinas River.</p>	<b>NOD</b>	
2016082014	<p>Chevron Long Wharf Maintenance and Efficiency Project California State Lands Commission Richmond--Contra Costa This proposed project involves multiple components to improve efficiency at the Long Wharf and to comply with current Marine Oil Terminal Engineering and Maintenance Standards (MOTEMS). Actions will take place at Berths 1-4 to comply with Motems, improve safety, and improve operational efficiency. Actions will include fender replacements, seismic retrofits, new gangways, and improvements to berthing structures. Project will result in impacts to habitat of Longfin Smelt (<i>Spirinchus thaleichthys</i>) and Chinook Salmon (<i>Oncorhynchus tshawytscha</i>). The project is expected to result in incidental take of Longfin Smelt and Spring Run Chinook, designated as threatened, and Winter Run Chinook Salmon which is designated as an endangered species under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.</p>	<b>NOD</b>	
2016101024	<p>Osler Parking Structure Project University of California, San Diego La Jolla--San Diego The proposed project would involve the construction of an approximately 419,000 gsf, 6-level parking structure and a single story, 800 sf visitor center, where a surface parking lot (P604) currently exists. The project is located at the intersection of Gilman Dr and Osler Lane. As a result of siting the building for the most effective land use and circulation, the proposed project would involve the demolition of the majority of the existing parking lot, clearing of existing vegetation,</p>	<b>NOD</b>

	and grading and fill of slopes to the west and south. The proposed parking structure would include approximately 1,300 parking spaces and retain 38 surface parking spaces from the existing parking lot. Additionally, 66 new bicycle parking spaces would also be added in close proximity to the pedestrian entrance along Osler Lane.		
2017012055	Hales Minor Land Division (PLN15-00177) Placer County Colfax--Placer Minor Land Division in order to subdivide an approx. 13.32 acre property into four parcels consisting of 2.54 acres, 4.51 acres, 2.5 acres and 2.5 acres.	<b>NOD</b>	
2017021017	Death Valley Junction Thin Blanket Caltrans #9 --Inyo Caltrans proposes to overlay existing pavement with a 0.1' lift of asphalt and place shoulder backing up to three feet from the edge of pavement at the intersection of SR 127 and 190 at PM 42.0-42.4/126.1-140.7 in Inyo County, CA. All work will be conducted within existing ROW.	<b>NOD</b>	
2017032031	Clearwater at Sonoma Hills Rohnert Park, City of Rohnert Park--Sonoma The project proposes to construct a two story, 85,815 sf assisted living and memory care facility with 90 units and 114 beds on approx 3.5-acres located east of the intersection of Rohnert Park Expressway and Snyder Lane. The proposed project is a phase II of the Oak View Senior Residential Project approved by the city in 2002. Phase I of the Oak View Senior Residential Project was completed in 2006 and involved construction of the Oak View of Sonoma Hills independent senior living facility on the property located immediately east of the proposed project site. The primary access to the project site would be from Medical Center Drive.	<b>NOD</b>	
2017049010	ZPE15-0757 Sonoma County Healdsburg--Sonoma CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2015-0436-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Molly B. Demuth Inc. as represented by James Demuth. This project involves agricultural development within the 100-year floodplain of the Russian River. The 33.2 acre site has undergone past resource extraction and agricultural operations but has generally been left along since the 1990s. This project will include approx. 18 acres of row crop production, 2.4 acres as an agricultural support pad, and 12 acres as open space to preserve wetlands, drainage channels, and the quarry pond with its surrounding riparian vegetation. To construct the agricultural support pad, approx. 21,000 cubic yards of the crushed concrete will be used as engineered fill to raise the area of pad to 82-feet above sea level, which is 4 feet above the FEMA mapped 100-year water surface elevation (78 feet above sea level). The pad will be developed with a 4,000 sq. ft. building and a 4.3 acre-foot capacity reservoir.	<b>NOD</b>

2016098169	<p>El Portal Mobile Estates Consolidation Project State Water Resources Control Board Santa Rosa--Sonoma</p> <p>The State Water Resources Control Board (SWRCB) is the Lead Agency. The SWRCB's Safe Drinking Water State Revolving Fund (SDWSRF) Program is providing funds for the project. The Western Mobile Home Park proposes to conduct a planning project in order to prepare the necessary technical and environmental documents in anticipation of a future consolidation project with the City of Santa Rosa.</p>	<b>NOE</b>	
2017028014	<p>East Porterville Emergency Water Supply Project Water Resources, Department of Porterville--Tulare</p> <p>Water Board is a responsible agency for this project. The SWRCB's safe drinking water state revolving fund program is providing funds for the project to DWR. Small portions of the community are currently receiving domestic water from Porterville; the majority of residents depend on predominantly shallow, private wells for their water supply. Due to the effects of the ongoing drought, a large number of these wells have gone dry, are going dry, or the water contains contaminants making it unsafe to drink. As a result, the residents of the disadvantaged community do not have a reliable supply of drinking water. DWR has identified approx 800 res properties that are in need of a reliable and sustainable solution for drinking water. In cooperation with the water board, office of emergency services, the city, and Tulare county, DWR proposes to drill up to three wells, install one water storage tank, one booster pump station, over 4 miles of a combination of mainline and distribution pipelines, and 300 fire hydrants for fire protection. Each project component would require geotechnical investigations prior to construction.</p>	<b>NOE</b>

2017048350	Pacheco Peak Vegetation Management Project Forestry and Fire Protection, Department of --Santa Clara This project pertains to 1) performance of periodic vegetation management around the State's telecommunications infrastructure on Pacheco Peak to reduce risk of damage by wildfire and 2) for periodic maintenance of the appurtenant road surface from hwy 152 to the summit of Pacheco Peak. Most of the appurtenant road is on private property following an easement. The total project area is approx 4 acres. Vegetation management within CALFIRE property on the summit will include removal of all brush and trees less than 6 in in diameter in the understory and all dead or dying trees within 100 ft of all vulnerable infrastructure. Along the appurtenant road outside CAL FIRE's parcel, all vegetation encroaching within the traveled roadway shall be removed. On an easement for a telephone line to the peak: 1) all brush and seedings within 10 ft of the line and 2) all hazard trees within 50 ft of the line shall be cut. All cut vegetation shall be chipped or lop and scattered to under 12 in and left onsite. All work will be done by hand tools. Chipping equipment will stay on existing roads. No mastication, burning or other ground disturbance will occur on this project. Road surface maintenance shall be done with motor grader to produce a smooth, well drained driving surface that allows service vehicle access to the summit.	<b>NOE</b>	
2017048351	Adamson House Leak Repairs Parks and Recreation, Department of --Los Angeles Water leaks occur in the living room and in the dining room of the Adamson House, located within Malibu Lagoon State Beach. 2015021003	Santa Ana River Mainstem: Reach 9 BNSF Railroad Bridge Protection U.S. Army Corps of Engineers Corona--Orange, Riverside Note: Review per lead  The U.S. Army Corps of Engineers proposes minor changes to the BNSF bridge protection features that were approved for construction in 2015. Approx 2.29 acres of permanent impacts and 7.13 acres of temporary impacts are expected to be added to the BNSF bridge protection project footprint. An update to the EA and EIR is required to address this expanded permanent project footprint (minor expansion of the bridge piers and abutment wall), modifications to the temporary construction/staging work areas on both the east and west side of the Santa Ana River, re-alignment of a permanent maintenance access road closer to the Green River Mobile Home Park, and design refinements to accommodate additional project features, such as the addition of permanent survey monuments.	<b>ADM</b>	05/12/2017				
2016091002	Fairfield Inn and Suites Oceanside Boulevard (GPA15-00004, ZA15-00009, D15-00022, CUP 15-000022) Oceanside, City of Oceanside--San Diego The applicant is proposing to construct a 99-unit Fairfield Inn and Suites on the vacant 2.32-acre site (APN 152-320-37-00). This would require obtaining a General Plan Amendment to change the land use designation from Single-Family Residential to General Commercial. A Zoning amendment would also be needed to change the existing residential single family zoning to commercial recreation. The project application includes a development plan and conditional use permit for the hotel, a Conditional Use Permit for a reduction in the number of required parking spaces, and a variance for wall heights in excess of six feet.	<b>EIR</b>	06/01/2017				
2016111029	East Lake Specific Plan Amendment (ELSPA) No. 11 Project Lake Elsinore, City of Lake Elsinore--Riverside The proposed ELSPA No. 11 consists of an amendment of the existing East Lake Specific Plan to: overhaul land uses, development regulations, circulation, drainage, and architectural guidelines for the specific plan area; streamline development by making the specific plan area guidance documents more user-friendly; protect the natural resources in the Back Basin; and ensure that the city's existing and future action-sports activities/venues have a permanent location	<b>EIR</b>	06/01/2017

	in the city. The proposed project would allow for a change from a mix of residential, commercial and open-space uses currently allowed in the specific plan to sports- and recreation-oriented uses while maintaining open-space and existing residential entitlements.		
2016122026	1215 O Street Office Building Project General Services, Department of Sacramento--Sacramento The project would demolish the existing vacant building and constructs a new office building with approx. 300,000-350,000 gsf of office space, max. height of 150 feet, occupancy of approx. 1,000-1,200 staff, plus limited parking. Offsite parking also being considered. Project purpose is to consolidate/upgrade regional State office space, specifically to vacate the existing Bateson building would allow the eventual renovation/re-occupation of that building. However, there are no details available regarding the timing of renovation and future re-occupation of Bateson. The project may also include ground-level commercial space and would be connected to the State's Central Plant for heating/cooling. Existing surface parking across O Street is being considered as a site for photovoltaic solar panels over the parking spaces.	<b>EIR</b>	06/01/2017
2017042054	Railcar Bridge Expansion San Mateo County --San Mateo Width expansion of an existing 12-ft wide 88-ft long railcar bridge crossing Pomponio Creek to include the installation of an additional railcar bridge of the same size adjacent to the existing bridge (total expanded bridge dimensions 24-ft wide by 88-ft long). Two new abutments and a retaining wall (12 ft in length) to support the expansion are proposed for construction within Pomponio Creek; 45 cu/yds of earthwork proposed. The bridge expansion will provide improved access for the existing onsite agricultural activities as well as meet fire access requirements.	<b>MND</b>	05/17/2017
2017042055	Las Positas College 2012 Facilities Master Plan Chabot-Las Positas Community College District Livermore--Alameda The 2012 Facilities Master Plan would construct five new buildings, with four of the new buildings constructed on the sites of existing buildings which would be demolished; campus entries, roads and parking lots would be improved; a new sports recreational area would be constructed; and improvements made to existing athletic facilities. Estimated FMP buildout would occur over the next ten years with construction starting in 2017 and ending in 2027.	<b>MND</b>	05/17/2017
2017042053	UP-98-0001 (RA) San Joaquin County Ripon--San Joaquin A revisions of approved actions application to revise condition 1.d. to extend the phasing period by an additional 12 years for a previously approved use permit application to construct a winery facility consisting of several structures, wine storage tanks, and other accessory buildings. No marketing events are approved for this winery. Phasing to be completed by 2029.	<b>Neg</b>	05/17/2017

1994072021	ADOPTION OF CARSON CREEK SPECIFIC PLAN El Dorado County EL DORADO HILLS--EL DORADO/SACRAMENTO The Carson Creek Unit 2 Project will implement the final phase of the approved Carson Creek Specific Plan (CCSP) with balanced development, inclusive of residences, services and recreational opportunities for CCSP residents. The total project area is approx. 423 acres. The Project will develop 774 residential lots, approx. 90 acres of industrial commercial land use, a 30-acre regional park, and associated infrastructure improvements (roads, utilities, and drainage. Approx. 109 acres of wetlands and 39 acres of open space will be preserved.	<b>NOD</b>	
2016041067	Bundy Canyon Resort Apartment Project (PA 16-006) Wildomar, City of Wildomar--Riverside The project would result in up to 140 residential units on an approximately 28-acre site. Of the total acreage, approximately 10.5 acres will be developed with residential and supporting uses; the remaining approx. 17.8 acres would comprise open space, roadway dedications and exactions. Project includes a zone change from R-R (Rural Residential) to R-3 (General Residential).	<b>NOD</b>	
2017011017	Ramirez Street Area - Former Aliso Manufactured Gas Plant (MGP) Remedial Action Plan Toxic Substances Control, Department of --Los Angeles The DTSC pursuant to Ch. 6.5, Division 20, Section 25355(a)(1) of the Health and Safety Code approved the Remedial Action Plan, Ramirez Street Area, Former Aliso MGP, LA, CA, Tetra Tech, March 2016 (RAP or "the project"), which is incorporated by reference. The project or RAP is for the remediation of a portion of Ramirez Street (a public street) located in Downtown LA between Center and Keller streets (referred to as the "Ramirez Street Area" or the "Site"). The Southern CA Gas Company (SoCalGas) sponsored the environmental cleanup of the Ramirez Street Area based on a Voluntary Cleanup Agreement (VCA) [Docket No. HSA-A-00/01-173] executed between the DTSC and SoCalGas dated January 19, 2001. The RAP for the Site serves to remove the contaminated soil by excavation and transport it to a treatment/recycling facility and restore the Site as a street, its current use. The RAP for the Site will be limited to an area approx. 500 feet long 70 feet wide, with a maximum depth of 30 feet. The soil contamination, in part, due to past manufactured gas plant (MGP) and butadiene (the raw material for manufacturing of rubber) operations. contaminants include benzene, naphthalene, polycyclic aromatic hydrocarbons (PAHs), total petroleum hydrocarbons (TPHs), and dicyclopentadiene (DCPD). The project includes removal of contaminated soil in accordance with the methods and procedures presented in the RAP and in the Remedial Design document to be prepared prior to implementing remedial activities.	<b>NOD</b>	
2017021053	Clean Closure Project Old Los Banos Landfill Los Banos, City of Los Banos--Merced The proposed project involves the removal of waste and adjacent impacted soils from the inactive City of Los Banos Landfill, owned and operated by the City of Los Banos. The non-concrete waste will be transferred to the Billy Wright Landfill, operated by Merced County Public Works or Kettleman Hills Landfill in Kettleman City, CA. The purpose of the project is to obtain "clean closure" status. The	<b>NOD</b>

**Documents Received on Wednesday, April 19, 2017**

2014101050	Berths 226-236 [Everport] Container Terminal Improvements Project Los Angeles, Port of --Los Angeles The proposed Project involves the construction and operation of terminal improvements within and adjacent to the Everport Container Terminal, such as the following: performing dredging at Berths 226-236 (i.e., deepening at Berths 226-229 and Berths 230-232 and maintenance dredging at bulkhead area of Berth 229); installation of three new wharf cranes; backlands improvements on adjacent 23.5 acres (includes demolition); disposal of dredge material; wharf efficiency improvements to accommodate larger ships; and, amending and extending the current lease by 10 years through 2038.	<b>EIR</b>	06/02/2017
2017011072	Alamitos Avenue "Complete Streets" Improvements Project Long Beach, City of Long Beach--Los Angeles The proposed project involves a modification to Alamitos Ave. between 7th Street and Ocean Blvd. to a two-lane divided roadway with on-street bike lanes that would match the roadway section north of 7th Street. North of 7th Street, Alamitos Ave. has been restriped to provide a two-lane, divided roadway, separated by a two-way left-turn, with on-street parking and on-street bike lanes, as well as a buffer to separate bicycle traffic from vehicular traffic. Currently, most of the project site provides two-lanes in each direction separated by a two-way left-turn lane; south of 3rd St., only one Southbound through lane is provided too just past Broadway. Before restriping activities, the project would remove and recycle existing asphalt within the project site and resurface the roadway. The project site is approx. 3,400 ft. of road length and 4.7 ac.	<b>EIR</b>	06/02/2017

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Wednesday, April 19, 2017</u></b>			
2017041050	San Antonio Creek Bridge Project Caltrans #7 Ojai--Ventura Caltrans is proposing to implement a bridge scour mitigation and railing replacement project over San Antonio Creek, located on SR 33, south of City of Ojai, in unincorporated Ventura County.	<b>MND</b>	05/18/2017
2017041051	Third Street Storm Drain Project Lake Elsinore, City of Lake Elsinore--Riverside The project proposes the phased installation of an underground reinforced concrete pipe and a reinforced concrete box structure in order to adequately collect and convey the drainage flows of approx 704 tributary acres under a 100-year flood event. More specifically, the project involves the construction of a master drainage facility which would provide food protection to the existing Third St channel watershed and adjacent properties. Existing flood control improvements on the southern side of Collier Ave include an existing earthen trapezoidal channel aligned along portions of Third St beginning on the north side of Collier Ave. This initial study will analyze the potential environmental impacts associated with two phases of drainage improvements located primarily along Third St (phase 1 and 2 of proposed project) which will connect to the existing flood control improvements.	<b>MND</b>	05/18/2017
2017042056	Tehama County General Plan Implementation Phase 3; GPA #17-01 Tehama County Red Bluff--Tehama The intent of the proposed GPA #17-01 is to address the policies and implementation measures of the Tehama County 2009-2029 GP. The project consists of parcels that are scattered throughout the Unincorporated Areas of Tehama County. These parcels are part of Tehama County's general plan implementation phase 3 process, which has not yet been brought into conformance within the intent of the 2009-2029 GPU. Conformance will be achieved by acknowledging that the 24 parcels totaling approx 181.92 acres are currently zoned with districts that are appropriate and accurate, thus requiring the reversal of certain GP LUD. This is necessary pursuant to the provisions of state law, the zoning and GP must be vertically and horizontally consistent. Therefore, in the case where a GP update has taken place, the zoning must be amended as necessary within a reasonable time after adoption of the GPU or specific amendments to the GP must be affected in order to maintain consistency between the zoning code and the GP broad level guidance. If this GPA is approved it will revert the parcels back to their previous GP LUD. The project is deemed necessary to implement the intent of Tehama county's GP due to various parcel specific factors that have been reconsidered through the countywide rezoning process. Therefore, the project impacts are being analyzed on the basis that the permitted uses on the properties and their current zoning are not changing. Furthermore, it should be stated that there will not be any demolition or new construction proposed as part of this project. These project factors, along with the completion of a consultation period with other agencies did not lead to the identification of any potentially significant impacts, which is why a ND has been prepared.	<b>Neg</b>	05/18/2017

2003041001	1122 4th Avenue Project San Diego, City of --San Diego Amendments to the General Plan/Downtown Community Plan and Centre City Planned District Ordinance for the removal of the Employment Overlay from the Project site and Centre City Development Permit/Site Development Permit/Centre City Planned Development Permit/Neighborhood Use Permit No. 2014-76 for the demolition of the existing historic CA Theatre building and construction of a mixed-use development comprised of a 40-story tower (approx. 422 feet tall) and podium located on a 25,000 sq. ft. site on the north side of C Street between Third and Fourth Avenues in the Civic/Core neighborhood of the Downtown Community Plan area. The Project is comprised of 282 dwelling units, approx. 11,000 sq. ft. of retail space, and 325 automobile parking spaces.	<b>NOD</b>	
2009031084	Diamond Specific Plan Lake Elsinore, City of Lake Elsinore--Riverside Project is limited to the development of an 11.93 acre indoor commercial sports facility, including landscape, hardscape, and a parking lot, on the approximate 23.12-acre project site. Approximately 85,000 cubic yards of fill will be imported to raise the project out of the lakebed/floodplain.	<b>NOD</b>	
2011042026	Interstate 5 Bus/Carpool Lane Project Caltrans #3 --Lake The RWQCB is issuing a Section 401 Water Quality Certification for the subject Project. The Project includes constructing high Occupancy Vehicle (HOV) lanes in the median in both southbound and northbound directions on I-5 from approx. 0.3 miles south of Beach Lake Bridge and the US 50/I-5 junction. At Florin Road, the existing median will be reduced and outside shoulders will be widened to accommodate the new HOV lane. Several overcrossings and bridges will require structural modifications to accommodate additional traffic lanes, between PM 9.7 to 22.5.	<b>NOD</b>	
2014102065	Recycled Water Project Hayward, City of Hayward--Alameda Project will install a new Recycled Water Facility (RWF) located at the City's WPCF. The new RWF would deliver an estimated 290 acre feet per year of recycled water to 22 customers within the city. The Project also includes construction of a 1 million gallon storage tank, pump station, and ten miles of pipelines including installation of customer connections to distribute tertiary treated recycled water to irrigation and industrial customers. The majority of the customers will utilize the recycled water for irrigation, with some industrial uses for cooling water towers and boilers.	<b>NOD</b>	
2015031006	Adoption of Proposed Rule 214.2 - Paving Unpaved Public Roads Emission Reduction Credits (PERCs) Imperial County Air Pollution Control District --Imperial The Programmatic EIR for the proposed Rule 214.2 applies to approx. 1,242 miles of existing unpaved public roads located throughout Imperial County. The rule's purpose is to establish a recognized procedure for quantifying and certifying emission reductions for the voluntary paving of unpaved public roads, and issuing	<b>NOD</b>

	the resulting Paving Emission Reduction Credits (PERC) certified. Rule 214.2 provides a standardized and recognized banking system for the banking of emissions resulting from the paving of unpaved public roads.		
2016022012	Antioch Water Treatment Plant Disinfection Improvements (P.W. 246-29) Antioch, City of Antioch--Contra Costa The Project generally consists of improvements to outdoor chemical storage facilities, and indoor chemical feed facilities; and shall include the replacement of two existing gaseous chemical systems (chlorine and anhydrous ammonia) with two new liquid chemical systems (sodium hypochlorite and liquid ammonium sulfate).	<b>NOD</b>	
2016022055	Silicon Valley Clean Water Wastewater Conveyance System and Treatment Plant Reliability Improvement Project Silicon Valley Clean Water --San Mateo The project would implement portions of SVCW's Capital Improvement Program (CIP) to ensure reliability of the conveyance system and the WWTP. The proposed Project comprises the majority of project budgets in the CIP. The proposed Project is made up of several components, each consisting of specific improvements and upgrades to the conveyance system and the WWTP, as listed here: Tunnel and Gravity Pipeline, Receiving Lift Station, WWTP Headworks Facility, Influent Connector Pipe, Flow Diversion Structure, Belmont Force Main and Belmont Pump Station Rehabilitation, San Carlos Odor Control Facility, Redwood City Pump Station Replacement, Menlo Park Pump Station Rehabilitation, Nutrient Removal Facilities and Clarifiers.	<b>NOD</b>	
2017032020	Sonoma Valley High School Student Drop-off and Parking Project Sonoma Valley Unified School District Sonoma--Sonoma The District proposes to improve student drop-off access at Sonoma Valley HS, located at 20000 Broadway, Sonoma, with an off-street drop-off loop and parking lot. The drop-off will be parallel to Broadway on the existing school campus, just north of Newcomb Street. The project improves existing student drop-off by providing a formalized location along Broadway that includes a loading area and 14 parking spaces. Nine redwood landscape trees would be removed and the site would be relandscaped with drought tolerant trees and landscaping.	<b>NOD</b>	
2017049011	GPA00803/CZ07321/TR33410 Riverside County --Riverside Amend the current land use designation of the project site from Community Development: Public Facilities (CD:PF) to Community Development: Medium Density Residential (CD:MDR). Change the zoning classification of the project site from Light Agriculture-2 1/2 Acre Minimum (A-1-2 1/2) and Light Agriculture- 10 Acre Minimum (A-1-10) to One-Family Dwelling (R-1). In addition, a Schedule "A" subdivision of 45.57 acres into 138 single family residential lots with a average lot size of 6,713 sq. ft., 12 open space lots for a 4.11 acre detention basin, 2.12 acre park area, and 5.19 acres dedicated for trails, flood control, fire access roads, a water quality basin, and drainage collection.	<b>NOD</b>

2017048379	Use of Indoor Rearing for Head-Starting Desert Tortoises Energy Commission --San Bernardino This project will rear juvenile desert tortoises in protected enclosures or indoors to determine the minimum size they can be released into the wild with high survivorship rates. Implementation of more effective mitigation practices may increase probability of de-lisiting the desert tortoise in the future.	<b>NOE</b>	
2017048380	Assessing Cooling Tower PM2.5 and PM10 Emissions using Advanced Instrumentation, Plume Transects, and Plume Modeling Energy Commission Davis--Yolo This project will measure PM2.5 and PM10 across the spray drift plume from two separate power plant cooling towers; one that utilizes fresh water and one that utilizes brackish water. These measurements will be used to develop and validate a model that power plant operators can use to minimize the PM2.5 and PM10 effects of brackish water use in cooling towers. There will also be testing of the equipment at an existing cooling tower at UC Davis campus. This project will measure the droplet size distribution, dried aerosol size distribution, PM2.5 mass, PM10 mass, and PM2.5 and PM10 aerosol composition in horizontal and vertical transects across the spray drift plume from two power plant cooling towers that use fresh water and brackish water. These measurements will be used to develop and validate a model of power plant PM2.5 and PM10 emissions as a function of atmospheric conditions, brackish water solids concentration, and operating characteristics of the cooling tower. The end result will be a model that power plant operators can use to minimize the PM2.5	<b>NOE</b>

	and PM10 effects of brackish water use in cooling towers.		
2017048381	Low-Cost High-Reliability Thermoelectrics for Waste Heat Conversion Energy Commission Berkeley, Hayward--Alameda This project consists of paper study and laboratory research to develop techniques for creating cost-effective thermoelectric generators using silicone nanowire arrays. Small-scale fabrication processes, including precision doping and etching techniques commonly used for manufacturing integrated circuits, will be employed in a laboratory setting to make individual nanowires and free-standing nanowire arrays which will be tested to measure their mechanical and thermoelectric performance. Fabrication will take place in Alphabet Energy's 8000 sq. ft. laboratory/manufacturing facility in Hayward, CA. Bench-scale testing of physical and thermoelectric properties of test specimens will occur at the Lawrence Berkeley National Laboratory. Minor bench-scale equipment will be procured and integrated into the LBL laboratory to facilitate testing. Paper study research and report writing will occur at both sites. By increasing the temperature range and lowering the cost of thermoelectric heat recovery system, CA ratepayers will benefit by the reduced electricity usage in the industrial and retail sectors, increasing electrical reliability and lowering electricity costs.	<b>NOE</b>	
2017048382	Hyper Efficient Pump Motor Unit with Fully Integrated Permanent Magnet Motor and Motor Controls with Combined Liquid Cooling Energy Commission --El Dorado Demonstration of an advanced technology for hydraulic power systems that includes integration of highly efficient liquid cooled permanent magnet motor, efficient motor controller, and liquid cooling loop. This technology could improve hydraulic power unit's efficiency by 80% in industrial and agricultural operations.	<b>NOE</b>	
2017048383	Pilot Testing of Isothermal Compression Energy Commission Ontario--San Bernardino Project proposes the development and field testing of a novel, near isothermal air compressor; enabling improved efficiency, maintenance and reliability. The unit will be tested at an industrial facility in southern CA. This near isothermal compressor, or Carnot Compressor, solves the heat of compression problem by using a working liquid to compress a gas, while actively removing the heat of compression throughout the compression process. These energy savings are expected to significantly improve the efficiency of industrial air applications, the technology can also be applied to other compressor applications in the future, such as compression of natural gas in transmission and distribution systems, leading to additional energy savings.	<b>NOE</b>	
2017048384	Scaling Reliable, Next-Generation Perovskite Solar Cell Modules Energy Commission La Jolla--San Diego Thsi project is aimed at revolutionizing the 50 GW annual production of solar cells by producing a step-change drop in absorber and cell manufacturing costs relative to commercialized Si and thin-film technologies. Recent advances have pushed the solar conversion efficiency of the emergent class of perovskite solar absorbers from a few percent to 22.1% within several years, making perovskites already one of the most efficient solar technologies in existence. However, they degrade rapidly under operating conditions. Because of the limited reliability perovskites	<b>NOE</b>

<b><u>Documents Received on Wednesday, April 19, 2017</u></b>			
	<p>have demonstrated to date, industry players have not shown interest in commercialization despite in-lab demonstrations of high efficiencies. With the support of EPIC funding, we will integrate independent materials innovations the UCSD team leaders have developed to date in the perovskite absorber layer, the solar cell's transport and contact layers, and the encapsulation of the module to make breakthrough advances in perovskite solar cell reliability and scaling. The project team will use a scalable large-area manufacturing approach to deposit a defect-engineered absorber, conformally coat it with a modified robust hole transport layer, and use state-of-the-art graphene barrier layers to encapsulate the cell to achieve reliable, high-efficiency perovskite solar cell performance. A successful project outcome will de-risk perovskite solar cell commercialization and lead to a transformation in the industry's cost structure.</p>		
2017048385	<p>Increased Energy Efficiency via Programmable Irrigation and Fertigation Energy Commission Huron, Delano--Kern, Fresno PowWow Energy, in collaboration with WiseConn Engineering, West Hills College Coalinga (WHCC) and UCSB, proposes to develop an automated, programmable irrigation management system that will integrate cutting-edge technologies to increase the energy efficiency of irrigation (defined as using less energy to achieve the same level of crop production). Pilot-scale tests of the integrated technology platform will be conducted at two sites on commercial farms located in disadvantaged communities: an almond orchard near Delano (AgWise Enterprises, SCE territory) and a field with a rotation of row crops (tomato, garlic, etc.) near Huron (Woolf Farming and Processing, PG&amp;E territory). The pilot test data and the results from surveys of local farmers will be used to assess the potential impact of the proposed technology on two disadvantaged farming areas in CA.</p>	<b>NOE</b>	
2017048386	<p>Force Multiplier Piezoelectric Energy Harvester for Roadway Energy Recovery Energy Commission San Jose--Santa Clara This project will demonstrate a smart pavement device that harvests energy from roadways vibrations for generating clean electricity. The total pavement footprint used for demonstration is less than 500 sq. ft., anticipated for an off-street location. The purpose is to validate the cost, efficiency and benefit to the CA electricity ratepayers compared to that of thermoelectric power plants.</p>	<b>NOE</b>	
2017048387	<p>Development, Demonstration and Testing of Advanced Ultra-Low Emission Natural Gas Engines in Port Yard Trucks Energy Commission --Los Angeles The purpose of this project is to develop a new heavy-duty off-road powered port-yard truck powered by an on-road natural gas low NOx engine. The hostler will be fueled with renewable natural gas providing greenhouse gas emission benefits and will test the natural gas port-yard truck alongside convention fueled trucks. A fuel gas sensor will also be installed in the engines to measure fuel variability and optimize emission performance.</p>	<b>NOE</b>

Olson-Ecologic will integrate advanced on-road CNG engines technologies into off-road construction vehicles with the objective of reducing emissions and improving fuel economy.</p>	<b>NOE</b>	
2017048389	<p>Low Cost Micro DG/CHP for Use in Laundry Facilities Energy Commission Irvine--Orange</p> <p>The purpose of the agreement is to develop and demonstrate a low-cost, natural gas fueled, rotary engine based, distributed generation system tailored to provide combined heat and power for commercial laundry facilities. The project will incorporate an automobile sourced rotary engine, inherently low cost due to economies of scale, small size, low noise and vibration, and high reliability for direct placement indoors and adjacent to laundry operation. Both water jacket heat and exhaust heat will be used to support hot water for washing machine and hot air for dryer applications respectively. The natural gas fueled engine will be configured for lean burn to suppress NOx formation at low engine speeds, and employ exhaust gas recirculation and a standard automotive three-way catalyst for high speed emission control. Expected performance criteria include electric output of 30 kW and the total system efficiency of 66.5%. The estimated cost of electricity is \$0.052/kW-hr.</p>	<b>NOE</b>

2017041054	Sultana Community Services District Water System Improvement Project Sultana Community Services District --Tulare The proposed project would allow for the expansion of the SCSD water system involving two components. The first component would occur within the SCSD's current boundaries. The second component would require expansion of the District's sphere of influence and annexation of the community of Monson into the SCSD to provide water service to the community of Monson.	<b>MND</b>	05/19/2017
2017041055	Shaver to Huntington CAPM and Culvert Rehabilitation Caltrans #6 --Fresno Caltrans proposes to cold plane the existing pavement and replace it with Hot Mix Asphalt Type A, after sealing cracks and repairing failed localized areas on SR 168 from PM 45.8 to PM 65.9. The project also includes upgrading Metal Beam Guard Rail to current standards and reconstructing asphalt concrete dikes at some locations where needed. Drainage system restoration work includes replacing, repairing, and relining culverts and upgrading drainage inlets at 59 locations between PM 36.0 and PM 65.45. Temporary construction easements will be needed for ten locations. No additional ROW will be required.	<b>MND</b>	05/19/2017
2017042057	590 W. El Camino Real Sunnyvale, City of Sunnyvale--Santa Clara The project includes demolition of a one-story commercial building and construction of a new 5-story hotel. The hotel is proposed at 53,538 sf with a height of 59'-10" from the top of the street curb to the top of the building parapet. Sixty-eight parking spaces are provided, with 25 surface spaces including 5 electric vehicles parking spaces and 43 underground parking spaces. There is one existing tree on-site to be retained and five Palm trees located in an easement along Raines Terrace. Vehicular access to the hotel would remain from El Camino Real.	<b>MND</b>	05/19/2017
2017042058	Lowe Minor Land Division (PLN16-00180) Placer County --Placer The project proposes a minor land division in order to subdivide an approx 5.86 acre property into two parcels consisting of an approx 3.44-acre parcel (2.79 acres net) and a 2.42-acre parcel (2.30 acres net). Parking would be located onsite. The resulting parcels would be served by a septic tank and leach fields for sewage disposal and a well for potable water. Both parcels would be accessed by an existing road easement that connects with Powerhouse Road.	<b>MND</b>	05/19/2017
2017041052	Rubidoux Commercial Development Project (MA 15146) Jurupa Valley, City of --Riverside The project proposes to develop a 26.4 acre undeveloped property with 9 industrial buildings totaling 306,894 sf that would consist of 25,200 sf of office space, 98,500 sf of manufacturing space, and 183,194 sf of warehouse space. Related site improvements would include parking areas (493 parking stalls), hardscape, and landscaping. Vehicular access to the site would be provided via two driveways along 20th St and three driveways along Caterpillar Court. The project does not propose any off site improvements except for the proposed connections to existing sewer and water utility lines within the adjacent streets. At	<b>NOP</b>	05/19/2017

2016041051	<p>roadway and a 600 foot long bridge over the Burlington Northern Santa Fe (BNSF) Railroad, where no crossing currently existing.</p> <p>The Project will result in permanent impacts to 14.23 acres of Mohave ground squirrel (<i>xerospermophilus mohavensis</i>) habitat. The project is expected to result in incidental take of Mohave ground squirrel which is designated as a threatened species under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.</p> <p>Addendum No. 1 to the Fontana Water Company Recycled Water Improvement Project Inland Empire Utilities Agency Fontana--San Bernardino</p> <p>San Gabriel Valley Water Company is a privately owned water company that provides water service to customers located within its Fontana Water Company division service area, which includes the City of Fontana and some unincorporated areas in the immediate vicinity. The FWC provides this water service pursuant to the regulatory jurisdiction of the Public Utilities Commission of the State of CA (CPUC). As a public utility water company, FWC is mandated to provide its customers a reliable supply of water that complies with state and federal safe drinking water standards. As a non-governmental entity SFVWC is not subject to CEQA unless its actions involve governmental participation, financing, discretionary permitting or approval. IEUA has agreed to serve as the CEQA lead agency for this project as it will deliver IEUA recycled water to FWC that will be used to offset existing potable water demand within FWC's service area.</p> <p>The proposed project includes the expanded delivery of recycled water produced by IEUA Water Reclamation Facilities to FWC at its Regional Plant No. 3 recharge basin location. FWC proposes to install a reservoir, pump station, and recycled water delivery pipelines; most of the proposed pipelines have already been installed, though some yard piping is needed. The purpose of the proposed RP-3 improvements is to increase the Agency's program to max the beneficial reuse of recycled water to reduce dependence on imported water to replace use of potable water for landscape irrigation by using recycled water.</p> <p>Prior to adopting the MND for the FWC Recycled Water Improvement Project, FWC notified IEUA that it was making minor modifications to the project. Specifically, a second reservoir (0.53 million gallons of storage), possible 4,000 gallon hydropneumatic tank and additional piping have been added to the project. Based on this project modification, a decision was made to recirculate the Initial Study to address this site modification at IEUA's RP-3 location.</p> <p>This addendum is being prepared in response to FWC's need to revise the location of the facilities planned within RP-3. Additionally, FWC seeks to reduce the number of reservoirs from two reservoirs to one 0.53 MG reservoir, and will enclose the booster pump station to attenuate noise. The proposed project modifications are in response to IEUA's plans to utilize the land upon which the project facilities were originally planned to be constructed. The reduction in reservoirs from two reservoirs to one is a response to the lack of need for an additional reservoir at this time, and the addition of the booster pump system enclosure is due to the need to attenuate noise because of the closer proximity to the habitat conservation basin and adjacent residences.</p> <p>The proposed project includes the expanded delivery of recycled water produced</p>	<b>NOD</b>

2017041057	Mission Trail Apartments Project Lake Elsinore, City of Lake Elsinore--Riverside The project consists of a housing community in the city of Lake Elsinore with a max of 81 apartment units and associated features and facilities including resident/visitor parking, a leasing/management office, a community center, onsite laundry facility, active and passive open spaces, and a maintenance garage. The 5.37 acre project site would have an overall density of 15.1 dwelling units to the acre and would consist of four residential buildings with a max of 9 two-bedroom units and 72 three-bedroom units.	<b>MND</b>	05/22/2017
2017041061	City of Fresno Northeast Surface Water Treatment Facility Storage Tank Project Fresno, City of Fresno--Fresno In order to meet the water quality requirements, customer demands, and reduce the use of groundwater, the city proposes to install a new 6MG water storage tank to provide a total of 7.5 MG of storage capacity at the Northeast Surface Water Treatment Facility. The new 6 MG tank will be located on the south side of the NESWTF, where the overflow spill pond is currently located. The circular tank will be approx 230 ft in diameter and be approx 24-ft in height. The existing over flow/spill pond will be reconfigured to allow space for the new tank. The tank will be a pre-stressed concrete structure that is buried approx 20 ft below ground with only the top four feet exposed above ground level. Construction of the tank will require excavation to a depth of approx 23 ft to install the foundation. Piping inlet and outlets will be installed on the bottom of the tank, requiring some limited excavations as deep as 30 ft to place these pipes.	<b>MND</b>	05/22/2017
2017041066	ENV-2016-4076-MND Los Angeles, City of Los Angeles, City of--Los Angeles The merger and resubdivision of the subject site in conjunction with the construction, use, and maintenance of a new 89,434 sf mixed use building containing 118 dwelling units and 8,800 sf of ground floor commercial space. Two levels of subterranean parking are proposed for the project. The proposed building would be seven stories and approx 78 ft, 6 in in height above finished grade.	<b>MND</b>	05/23/2017
2017041067	ENV-2015-540-MND Los Angeles, City of --Los Angeles The project includes the construction of a 7-story, mixed use building containing approx. 98,000 sf of floor area, including 29,000 sf of museum space & 103 residential units, on a 26,257 sf site. The applicant proposes to set aside 11%, or 12 units, of 103 units for habitation by very low income households, per government code section 65915. The building will have a max height of 100 ft, measured from grade to the highest point of the roof parking spaces to replace existing public parking spaces on the project site, in a 3-level subterranean parking garage. The project will provide a min of 182 bicycle parking spaces. The new building will provide a min of 10,300 sf of open space, including terraces, private balconies, and interior common open space. The development of the project requires an export of approx 36,100 cy of earth material. The applicant requests a site plan review for a development project, which creates an increase of 50 or more dwelling units. The applicant proposes to set aside a percentage of dwelling units for affordable housing for a density bonus; however, the applicant does not request any on- or off-menu incentives.	<b>MND</b>	05/23/2017

	of the community project identification signs. Site Development Permit 3-17-5015 and Minor Planned Sign Program 3-17-5014 were evaluated in and contemplated by the MND that was prepared for the Parkside at Baker Ranch Residential Project and approved by the City of Lake Forest City Council on May 5, 2015 and was not challenged. The proposed Site Development Permit is consistent with the scope of the approved Tentative Tract Map 17707. Therefore, the approved MND serves as the environmental documentation for the project and the project is in compliance with the requirements of CEQA.		
2015122055	2016 Fisheries Restoration Grant Program, the Steelhead Report Fish & Wildlife #2 --Mendocino CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0093-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Gold Ridge Resource Conservation District. Project design involves removal of the existing culvert and concrete debris, along with the abandoned upstream checkdam, installation of a 15-foot wide by 7.75 foot high multi-plate arch culvert with an open bottom, construction of a 157 foot long step-pool roughened channel through the crossing, and construction of two series of boulder weirs on the upstream and downstream ends of the roughened channel.	<b>NOD</b>	
2016012064	Alviso Pump Station Project San Jose, City of San Jose--Santa Clara Construction of the new Alviso Storm Pump Station and a new force main near the intersection of Gold and Catherine Streets, to improve stormwater capacity and help protect the Alviso area from 100-year storm events. The force main would be within existing roadways and existing utility corridors in open trenches approx. 8 feet wide and varying from six to 23 feet in depth. The outfall structure would be located in Alviso Slough and consist of a nine foot sq. reinforced concrete box with an open top. The State Lands Commission action is an approval of a 20-year General Lease - Public Agency Use through April 20, 2037.	<b>NOD</b>	
2016121040	LARC Ranch Water Pipeline Project Santa Clarita Water a Division of the Castaic Lake Water Agency Santa Clarita--Los Angeles The proposed project would include the construction of a new 12-in ductile iron water transmission line by connecting to the nearest SCWD water line at Shadow Valley Lane and extending approximately 9,500 lf to a new service meter at the frontage of the LARC Ranch property. The width of the alignment would range from 30 in for the water pipeline trench to 20 ft for the temporary closure of the Bouquet Canyon Rd southbound. An on site booster pump station and 700 ft pipeline located on LARC grounds would connect to and fill the existing 0.36 MG storage tank from the new service meter. Discharge pipeline from the pump would extend approximately 30 ft to connect to an existing 8-in LARC pipeline that extends to the 0.36 MG tank. The pump station would be apx 10 ft high and less than 200 sf.	<b>NOD</b>	
2017021001	Manor Street Bridge Rehabilitation and Seismic Retrofit Project Bakersfield, City of Bakersfield--Kern The city is proposing to rehabilitate and upgrade the Manor St Bridge at the Kern River to increase bridge safety, provide for a seismic retrofit, and improve roadway geometrics. The primary purposes of the project is to enhance the bridge	<b>NOD</b>

2017048416	Intersection Improvements of Parrotts Ferry Road, and SR 49 Tuolumne County --Tuolumne The project includes eliminating the free right turn lane from SR 49 to Parrotts Ferry Road, and widening SR 49 to accommodate a right turn lane for north bound traffic on SR 49. SR 49 will conform to the existing width at a point 520± feet south of the intersection of SR 49 and Parrotts Ferry Road. Parrotts Ferry Road will be widened to accommodate two 12 foot through lanes and 8 foot shoulders on each side. A left turn lane will also be added to accommodate northbound traffic on Parrotts Ferry Road turning left onto Union Hill Road. The left turn lane will continue as a median lane tapering back to two lanes approximately 1050 feet north of the SR 49/Parrotts Ferry Road Intersection. The driveway access from Parrotts Ferry Road to the Parcel with Assessor Parcel number 35-010-70 will be widened and realigned. Work on Shaw's Flat road will include placing a new 24 inch by 36 inch by 30 inch pull box to accommodate an existing buried fiber optic line.	<b>NOE</b>	
2017048417	Economic Development Incentive Agreement with the Ridge EG East, LP Elk Grove, City of Elk Grove--Sacramento The proposed agreement would consist of economic development incentive payments to be provided from the City to the Ridge EG East, LP, the owner/landlord of property at which a proposed Costco Wholesale and retail general merchandise store will be located. The Costco Store is to be located at the northwest intersection of Civic Center Drive and Babylon Drive in the City of Elk Grove. The agreement would provide for sales tax sharing between the city sharing between the city and the landlord/property owner in a present value amount of not more than 8,000,000, as escalated and adjusted over time, all as provided in the agreement. Payment would be made up for to 25 years, or until the entire economic development incentive amount of 8,000,000, as provided in the agreement, is paid, whichever occurs first.	<b>NOE</b>	
2017048418	Nonexclusive Limited License Agreement with Elk Grove American Legion Post 233 Inc. for Storage Purposes Elk Grove, City of Elk Grove--Sacramento The action is a lease with Elk Grove American Legion Post 233 to allow storage of storage containers on city-owned property.	<b>NOE</b>	
2017048419	Bilby Road Acquisition and Easements Elk Grove, City of -- The City proposes to execute an Agreement for acquisition of Public Right-of-Way and Pedestrian and Utility Easement for a property on Bilby Road located on APN 132-0300-047.	<b>NOE</b>

	current use. The RAP for the Site will be limited to an area approx. 500 feet long 70 feet wide, with a maximum depth of 30 feet. The soil contamination, in part, due to past manufactured gas plant (MGP) and butadiene (the raw material for manufacturing of rubber) operations. contaminants include benzene, naphthalene, polycyclic aromatic hydrocarbons (PAHs), total petroleum hydrocarbons (TPHs), and dicyclopentadiene (DCPD). The project includes removal of contaminated soil in accordance with the methods and procedures presented in the RAP and in the Remedial Design document to be prepared prior to implementing remedial activities.		
2003022086	Jack London Square Redevelopment Project Oakland, City of Oakland--Alameda On April 19, 2017, the Oakland City Council approved Final Development Permits consistent with the PDP for the Jack London Sq. Redevelopment Project PUD for sites D and F2. The approvals include Final Development Permits for residential and commercial uses, a Minor Variance for parking and Design Review. The approvals allows development of primarily residential buildings on each site, with accessory open space, parking, and ground floor commercial uses.	<b>NOD</b>	
2006061099	Black Hills Villas Morro Bay, City of Morro Bay--San Luis Obispo CDFW has executed Amendment No. 1 to Streambed Alteration Agreement No. 1600-2012-0220-R4, issued to Black Hill Villas L.P. Project includes activities related to bank stabilization and riparian enhancement in a tributary to Chorro Creek for a residential subdivision development. The Amendment includes additional grading to accommodate related adjacent road improvements for bus turnouts and a for a public pedestrian trail.	<b>NOD</b>	
2008102100	Walerga Road Bridge Replacement Project Placer County Roseville--Placer CDFW has executed Lake and Streambed Alteration Agreement No. 160-2017-0033-R2, pursuant to section 1602 of the Fish and Game Code to the Placer County Department of Public Works (Permittee), as represented by Kellenn Prindiville. Project is limited to the relocation of utility poles and overhead lines. Overhead utility facilities currently run north/south on the east side of Walerga Road. The overhead facilities within the project limits consist of electric lines (SMUD), and telecommunication/fiber optic/cable lines (Spring, XO Communications, CCI, and Comcast). The overhead relocation work will consist of SMUD installing new utility poles further east from the existing poles. Within riparian zone, the new poles will be placed approx. 170 feet east of the existing Walerga Road Bridge. After SMUD installs the new utility poles, they will relocate their overhead lines onto the new poles. The other utility owners will then relocate their overhead facilities onto the new SMUD poles. The final step will involve the removal of the existing poles.	<b>NOD</b>	
2012032012	Lake Merritt Station Area Plan Oakland, City of Oakland--Alameda Proposal to construct a new 40 story mixed use building containing 634 dwelling units including approx. 16,500 sq. ft. of ground floor retail, which would replace the existing parking garage.	<b>NOD</b>

<b><u>Documents Received on Monday, April 24, 2017</u></b>			
2012122023	Yreka Creek Trail Development Project Yreka, City of Yreka--Siskiyou Includes the development of public access trails along Yreka Creek and within the Yreka Creek Greenway, as well as the installation of recreation facilities to include both fixed and breakaway bridges, picnic tables, a trailhead parking facility, removal of floodplain constrictions, removal of noxious weeds, and planting of native riparian and upland vegetation.	<b>NOD</b>	
2014111025	College of the Desert West Valley Campus Master Plan & Phase 1 Project Desert Community College District Palm Springs--Riverside The previously approved West Valley Campus (WVC) project will be developed on 29+ acres currently occupied by the 332,000 + sq. ft. Palm Springs Mall. also located on the subject project are the Camelot Festival Theater and a free-standing fast food restaurant, both of which are to remain. The largely vacant mall building will be demolished to make way for the new campus. The Desert Community College District ("District") WVC Master Plan will provide approx. 330,000 sq. ft. of community college facilities, including a conference center and college or college/city joint-use library (the "Project"). On May 20, 2016, the District approved the Project and filed a Notice of Determination. The District has now made a minor change to the Project include a land lease agreement to allow for temporary classrooms structures to be located on the southeast corner of the Project site prior to Phase I development of the Master Plan. The proposed location of the temporary classrooms is currently used as a parking lot for the shopping center, and owned by the owner of the Camelot Theater. An addendum to the Final EIR is appropriate and in accordance with Public Resources Code section 21166 and CEQA section 15162 because the modifications to the project are minor and do not involve new significant environmental effects or a substantial increase in the severity of previously identified significant effects.	<b>NOD</b>	
2015081003	Downtown Main Street Transit-Oriented Development Specific Plan El Monte, City of El Monte--Los Angeles The project is the adoption of the City of El Monte Downtown Main Street Transit-Oriented Development Specific Plan. The 115-acre Specific Plan area is generally bounded by the Rio Hondo River and Santa Anita Avenue, Ramona Blvd and the Metrolink and Union Pacific train tracks. Potential buildout of the Specific Plan may result in the net increase of 2,200 new residential units and 500,000 sq. ft. of new commercial building area by the year 2035. For purposes of the EIR analysis, all new housing units are assumed to be multi-family units. The net increase of 500,00 sq. ft. (20%) of restaurant building area, and 75,000 sq. ft. (15%) of office building area. The net increase of new housing units and commercial building area includes projects within the Specific Plan area that have already been approved by the City but not constructed.	<b>NOD</b>

	has historically been used for heavy industrial activities, including a lumber mill site. The asphalt plant and ancillary equipment includes storage bins, storage piles, and will involve support vehicles such as a loader, water truck, and material transport haul trucks. A one year permit is requested from March 2017 to March 2018 to facilitate completion of the Caltrans paving project within the construction schedule.		
2017021006	Calvary Chapel Expansion Santee, City of Santee--San Diego The proposed project is a request for a Major Revision to Major Use Permit to expand the Calvary Chapel Santee facilities on the 3.38-acre site off Summit Avenue. The proposed project would construct a new 9,263 sq. ft., two-story building, play yard, a prayer garden, parking lot, two concrete bridges and landscaped areas. Assembly seating capacity would increase from approx. 160 to 350 persons. Parking would be reconfigured and expanded from 50 to 117 parking spaces. The existing building and covered patio would be retained and converted into classrooms for use during Sunday church services and as ancillary meeting space. The exterior of the existing building would be improved to provide a consistent architecture and facade with the new building. modular classrooms/trailers would be removed from the project site. Grading would balance onsite. Summit Ave., From the Church property to Princess Joann Drive, would be resurfaced. Development would require mitigation for impacts to biological, cultural and geotechnical resources, hydrology and noise, water quality.	<b>NOD</b>	
2017021025	Modifications to Johnson Canyon Landfill Composting Operations Salinas Valley Solid Waste Authority Gonzales--Monterey The authority commenced organics processing in the form of a chipping and grinding operation in May of 2005. In May 2015, the Authority provided an EA Notification for a modified organics operations for green waste (yard trimmings, untreated wood, plant materials) composting operations, for up to 26,000 tons per year (SWIS 27-AA-0122). The project adds food waste composting to the existing permitted green waste composting operation. Green waste trimmings and food scraps will be processed daily using an Extended Aerated Static Pile (EASP) system. The ultimate capacity of the compost system is up to 26,000 tons per year of compost. The addition of food waste to the exiting composting operation supports State-mandated diversion for compliance with AB 1826 (mandatory commercial organics recycling). The project operation update will be incorporated into a revision of SWFP 27-AA-0005.	<b>NOD</b>	
2016098173	Oak Run Well Replacement Project Oak Run Elementary School District --Shasta Water produced from the existing well has historically had positive lab results for total coliform organisms. Shasta county Environmental Health and the SWRCB has placed the school on a boil/bottled water advisory until a new well is constructed and in operation.	<b>NOE</b>

	The new ground-mounted mast, to be located in the same area, will provide a higher level of stability for the extra weight/windload from the addition of the new microwave dishes and elevate the antennas to obtain better line-of-sight between the source and destination signal receptors.		
2017048448	Electric Power Research Institute (EPRI) Energy Commission --Alameda, Napa This project provides a simple and scalable method to detect, in real-time, when a vine block needs to be irrigated, or not, to maintain or increase grapes quality or yield. Plant Aware Irrigation technology relies on a sap flow sensor affixed to a few selected vines in the block. In order to extrapolate the results to the whole area, aerial data will be used to extrapolate vine water status over a larger area. The usage of PAI system has two major proven impacts confirmed by several monitored high-end Napa valley vineyards and customer testimonies: 1) 40% of water savings on average and up to 70% in several cases, and 2) a significant improvement of grapes quality and up to 10% increase in yield. The resulting decrease in watering also leads to less electricity use due to decreased pumping frequency and duration.	<b>NOE</b>	
2017048449	NEV 174 Culvert Repair Caltrans #3 --Nevada Caltrans proposes to replace 9 culverts and rehabilitate 1 culvert between PM 0.0 and 1.1 on Route 174 in Nevada County. These culverts are corroded and deteriorated. Their diameters do not meet the 18-in standard. The project also includes regrade ditches, install BMPs, and traffic control. R/W acquisition not anticipated.	<b>NOE</b>	
2017048450	GLE-162 Bridge Painting Project Caltrans #3 --Glenn Caltrans proposes to repaint two steel bridges at PM 81.63 and PM 82.01 in Glenn County. 	materials are available at: <a href="http://waterboards.ca.gov/waterrights/water_issues/programs/ceqa/index.shtml">http://waterboards.ca.gov/waterrights/water_issues/programs/ceqa/index.shtml</a>		
2016081044	Orange County Civic Center Facilities Strategic Plan Orange County Santa Ana--Orange Project implementation would allow for the renovation of 289,360 sf., demolition of 429,277 sf, and construction of 818,676 sf of building space; a net increase of 389,399 sf of new government office uses.	<b>NOD</b>	
2016091062	Parcel Merger No. 2012-041 and Major Subdivision No. 2012-042, Vallecito Mariposa County --Mariposa Parcel Merger Application No. 2012-041 will merge six existing parcels totaling 98.94 +/- acres created by the parcel map recorded in Parcel Maps Book 28, Page 20, MCR. Major Subdivision Application No. 2012-042 will subdivide the merged 98.94 acre parcel into 26 lots ranging in size from 2.52 acres (net) to 12.79 acres (gross). Four of the proposed lots (Lots 1-3 and 23), totaling approx. 12 acres are located within the Community Commercial land use classification of the Catheys Valley Community Plan and thus will be available for commercial uses. The remainder of the lots are located within a residential land use classification and will be available for residential uses. Primary access to the project is proposed from Hornitos Road, a 72' wide public access and utility easement intersecting with State Hwy 140, which also fronts the subject site. Access to interior roadways is via a proposed extension of Catheys Valley Drive, an approx. 2,200' foot interior "dead end" road terminating at a proposed cul-de-sac and emergency exit located at the South property boundary near proposed lot 18. In addition to Catheys Valley Drive, three interior 60' wide easements are proposed all of which are cul-de-sacs. One of these cul-de-sac easements provides direct access from Hwy 140 to three lots. Access to one lot located at the south west corner of the site is via right of way easements (not shown) providing access to this lot from School House Road. An emergency exit (only) is proposed by way of an extension Catheys Valley Drive across APN 016-110-031, a 246-60 acre parcel owned by the applicant, connecting to School House Road. The emergency access easement is a proposed 60-foot wide non-exclusive easement for road and emergency exit purposes. Water supply to serve proposed lots will be provided through a combination of individual wells and shared wells at a ratio of 1 well per 4 lots. Individual wells would be allowed to be developed for each parcel, and septic systems are proposed for each individual lot.	<b>NOD</b>	
2016121073	Pala Force Main Eastern Municipal Water District Temecula--Riverside EMWD is presently in the final design phase of its Pala Force Main project in the city of Temecular, Riverside county, CA. The Pala Force Main project would connect an existing wastewater force main near the Pujol Lift Station adjacent to 1st St near its intersection with Pujol Street to an existing wastewater force main near the Diaz Rd Lift Station adjacent to Diaz Rd approximately 1,000 ft south of Rancho Way, as shown on Figure ES-1. A portion of the proposed alignment would traverse approx. 230 feet across the parking lot of an apartment complex. To lessen the impacts to the residents of the apartment complex, the project proposes to utilize a trenchless method of construction across the parking lot.	<b>NOD</b>

2017048520	Consider Approval of Proposed Amendments and Additions to the California Code of Regulations, Title 2, Division 3, Chapter 1, Article 4.8 California State Lands Commission -- Find that no alternatives would be more effective in carrying out the purposes for which the regulations are proposed, or would be as effective as and less burdensome, or would lessen any adverse economic impact on small businesses or affected private persons, than the proposed regulations; Adopt the repeal of section 2297.1 of the California division 3, chapter 1, Article 4.8; adopt the addition of sections 2298.1, 2298.2, 2298.3, 2298.4, 2298.5, 2298.6, 2298.7, 2298.8, 2298.9, and 2298.9.1 of the California Code of Regulations, title 2, division 3, chapter 1, Article 4.8; authorize staff to make minor, non-substantive modifications to the proposed regulations and supporting materials in response to recommendations by the Office of Administrative Law or Department of Finance.	<b>NOE</b>	
2017048521	Triangle Rock Products, Los Banos Creek Crossings (Extension of Streambed Alteration Agreement No. 1600-2001-0098-R4) Fish & Wildlife #4 Los Banos--Merced The Project includes activities related to maintaining two existing degraded dry rock crossings across Los Banos Creek, to facilitate truck transport of gravel from the excavation site to the processing plant. The extension extends the expiration date of the Agreement to February 28, 2022, and the Agreement was modified to provide clarification regarding the removal of vegetation and reporting requirements.	<b>NOE</b>	
2017048522	Delru/Rigidflex Corrective Measure Implementation Workplan (CMI) Toxic Substances Control, Department of Anaheim--Orange The CMI focused on backfilling an area previously excavated during Site characterization activities resulting from a 2001 Spill with approximately 250 cubic yards of clean soil material to restore the site to the original condition. A two inch ventilation pipe system will also be installed to passively ventilate by natural attenuation Tetrachloroethylene (PCE) in soil vapor that is slightly greater than the California Human Health Screening Level (CHHSL). The corrective measures will reduce the human health-based risk assessments to an acceptable standard for commercial/industrial use.	<b>NOE</b>	
2017048523	Introduction and Conveyance of Antelope Valley-East Kern Water Agency Local Groundwater into the California Aquaduct (SWPAO #16026) Water Resources, Department of --Los Angeles Antelope Valley-East Kern Water Agency (AVEK) will pump-in up to 26,000 acre-feet of local groundwater originating from wells in the AVEK service area in Reaches 18A through 22B. DWR will accept and convey the local groundwater into the California Aqueduct from January 1, 2017 - December 31, 2020. To increase AVEK's supply reliability and water quality, additional water sources are required.	<b>NOE</b>

<b><u>Documents Received on Wednesday, April 26, 2017</u></b>			
2013122024	Seawall Lot 337 and Pier 48 Mixed Use Project San Francisco, City and County of San Francisco--San Francisco The project sponsor proposes a mixed use, multi-phase development at Seawall Lot 337; rehabilitation and reuse of Pier 48; and construction of approx 5.4 acres of net new open space, for a total of 8.0 acres of open space on the project site. In addition, approx 1.1 million gsf of parking would be provided in two public parking garages, one above grade and one underground. The proposed project would also include public access areas, assembly areas, and an internal grid of public streets, shared streets, and utilities infrastructure. Overall, the proposed project would involve construction of up to 2.7 to 2.8 million gsf of residential, commercial, production, active/retail, and parking uses on 11 proposed development blocks on Seawall Lot 337 plus rehabilitation of approx 261,000 gsf of Pier 48.	EIR	06/09/2017
2015032036	State Route 1 Lagunitas Creek Bridge Project Caltrans #4 --Marin The purpose of the project is to provide a safe, seismically stable crossing of Lagunitas Creek on SR 1, since the existing bridge does not meet current safety and seismic design standards. The project proposes to remove the existing Lagunitas Bridge and replace it with a new bridge. The environmental document discusses five build alternatives and one no-build alternative. The project has the potential to impact water quality, special status species, noise aesthetics, riparian habitat, trees, wetlands, streambed, and traffic.	EIR	06/09/2017
2016032068	Sierra Gateway Apartments Rocklin, City of Rocklin--Placer The Sierra Gateway Apartments project consists of the development of a 195-unit apartment complex, associated infrastructure, private recreational facilities, parking and landscaping on 10.2 +/- acres. There is a "panhandle" portion of it will be graded to accommodate curb, gutter and sidewalk and drainage improvements and an extension of the northbound right turn pocket along Sierra College Blvd. This project will require Design Review and Oak Tree Preservation Plan entitlements.	EIR	06/12/2017
2008011082	Valley-Ivyglen Subtransmission Line Project Public Utilities Commission Lake Elsinore--Riverside Note: Extended Review  Construction of a new, single circuit 115 kV subtransmission line and fiber optic line. The route would be approximately 27-miles long and constructed within approximately 23 miles of new ROW. The line would traverse unincorporated Riverside County and the cities of Menifee, Perris, and Lake Elsinore. Installation of overhead fiber optic lines on the proposed structures and underground in new (approximately 10,000 ft) and existing (approximately 13,200 ft) conduit. Transfer of existing distribution circuits along portions of the proposed subtransmission line to new 115-kV structures or to underground positions. Installation of new 115 kV switching and protective equipment at both Valley and Ivyglen Substations.	FIN

2010041031	Alberhill System Project Public Utilities Commission Lake Elsinore--Riverside Note: Extended Review  The proposed project would serve the cities of Lake Elsinore, Canyon Lake, Perris, Menifee, Murrieta, Hot Springs, Temecula, and Wildomar as well as surrounding unincorporated areas of Riverside County. The primary components of the proposed project would include: Construction of a new 1,120 MVA 500/115 kV substation (Alberhill Substation), which would be expandable to a max of 1,680 MVA depending on future need; Construction of two new 500 kV transmission lines (approximately 3.3 miles, combined) within a new ROW to connect the proposed Alberhill Substation to the existing Serrano-Valley 500 kV transmission line; Construction of approximately 11.75 kV transmission lines within primarily in the existing ROW; Construction of about 3 miles of single-circuit 115 kV subtransmission lines with distribution lines within the existing ROW; Installation of a second 115 kV circuit on approximately 6.5 miles of single circuit 115 kV subtransmission lines (the single circuit lines are to be constructed as part of the proposed Valley-Ivyglen Project); Installation of fiber optic lines overhead (9 mi) on sections of the new or modified subtransmission lines and underground (1 mi) in proximity to the proposed Alberhill Substation and several of the existing 115/12 kV substations; Construction of an approximately 120 ft microwave antenna tower at the proposed Alberhill Substation site; installation of microwave telecommunications dish antennas at the proposed Alberhill Substation, the existing Santiago Peak Communications Site, and Serrano Substation; and other telecommunications equipment installations at existing and proposed substations; and Transfer of 5 of 14 Valley South 115 kV system substations to the proposed Alberhill 115 kV system: the Ivyglen, Fogarty, Elsinore, Skylark, and Newcomb 115/12-kV substations.	FIN	
2013021046	City Market Los Angeles Los Angeles, City of Los Angeles, City of--Los Angeles The proposed project is the construction of a multi-parcel site located on portions of four city blocks, consisting of ~945 multiple residential dwelling units, a maximum of 210 hotel rooms, ~294,641 sf of commercial (including medical and general office) and manufacturing uses, ~224,862 sf of retail floor area (including restaurants, bars, even space, wholesale uses and a cinema with ~744 seats), and ~312,112 sf of corporate/education campus floor area.	FIN	
2016082013	Decker Island Restoration Project Water Resources, Department of Rio Vista--Solano The Decker Island Restoration project is a tidal restoration project proposed by DWR and located in Solano County along the Sacramento River. The project site is currently an established emergent wetland with muted tidal connectivity to Horseshoe Bend to the south that transitions to upland habitat in the north. The project would enhance up to 140 acres of tidal wetland, associated high marsh, and riparian habitats, benefiting special status species like Delta Smelt, Chinook	FIN

	Salmon, and Swainson's Hawk.		
2016102069	Dupen Timberland Conversion Forestry and Fire Protection, Board of --Yuba Conversion of 7 acres of non-TPZ land zoned Agriculture/Rural Residential and Agriculture/Rural Residential - Commercial into an organic blueberry orchard in Yuba County adjacent to State Highway 49.	<b>MND</b>	05/25/2017
2017041073	Pete Mellinger Alamo River Trail Phase II Holtville, City of Holtville--Imperial The 1.1 mile long trail project will extend northerly from Earl Walker Park and be constructed along the west and east sides of the Alamo River. An under crossing of roadway will occur at Zenos Road. Installation of two prefabricated pedestrian bridges over the Alamo River are proposed. The trail will be created through moderate grading and grubbing. The trail will be surfaced with native soil, decomposed granite, or crushed rock. The trail width will be kept at 10 ft in accordance with State development standards to accommodate pedestrians and bikers. A buffer zone between the trail and the Alamo River will be constructed using native plant material and landscaping. Additionally, the proposed project would construct a look-out point along the northern bluff accessed from Alamo Rd.	<b>MND</b>	05/25/2017
2017041072	Palm Desert Groundwater Replenishment Project Coachella Valley Water District Coachella--Riverside CVWD proposes to construct and operate the project once completed. This involves repurposing existing secondary effluent ponds located in CVWD's Water Reclamation Plant No. 10 and constructing detention basins within the Whitewater River Stormwater Channel south of WRP10 for the purpose of replenishing the groundwater basin using Colorado River water. The project's purpose is to directly improve groundwater conditions within the West Whitewater River Subbasin Area of Benefit of the Coachella Valley Groundwater Basin.	<b>NOP</b>	05/25/2017
2017042071	Bilby Ridge Sphere of Influence Amendment Sacramento County Local Agency Formation Commission Elk Grove--Sacramento Note: Review Per Lead  There are no changes to land uses proposed as part of the project. The project does not include a land use plan or related pre-zoning entitlements requests. Annexation of the project site to the city of Elk Grove is no an action under consideration for this project. Similarly, the project does not include a timeline for an annexation request, development, or phasing for future development. However, LAFCo must make certain findings with respect to land use, proposed land use, and service needs within the SOIA area and within the current city limits. These findings include the need for urban services and orderly growth along with preservation of agricultural lands. LAFCo will assume certain time frames for development consistent with Sacramento Policies, Standards and Procedures and applicable state law.	<b>NOP</b>	06/09/2017

2014111021	C-14-110, Replacement City Water Well, Pump Station 303A Fresno, City of Fresno--Fresno Lito Buco has filed this application on behalf of City of Fresno Water Division, which pertains to approx. 0.26 acre of property located northeast and contiguous to the terminus of North Lafayette Ave. cul-de-sac abutting Herndon Avenue, west of North Van Ness Blvd in northwest Fresno. The applicant proposes the construction of Water Well Pump Station No. 303A located at 6780 North Lafayette Avenue, to replace Pump Station 303. The applicant requests authorization to drill and operate a replacement water supply well (City Pump Station No. 303A), construct an equipment building and 6 foot high masonry wall, install emergency generator set, landscape the perimeter of the site to screen equipment and treatment facilities, future water remediation facilities and treatment systems for groundwater contaminants. The proposed pump station facility will pump groundwater into the City's municipal water distribution system. The site has been sized and configured to accept pumping equipment, power supply, and water remediation facilities, primarily an Iron and Manganese Filtration system and a Granular Activated Carbon treatment system to be installed if synthetic organic compounds are detected in the groundwater at significant concentrations. The proposed pump station facility will be constructed in three phases. The subject property is zoned R-1-B (Fresno County) and is designated for Medium-Low Density Residential planned land uses by the Fresno General Plan and the Bullard Community Plan.	<b>NOD</b>

2016061037	GPA 14-01/ZC 14-02/TT 17433/SP 12-07/MA 15-09 (SunPointe Residential Project) Laguna Niguel, City of Laguna Niguel--Orange The proposed project would involve the development of up to 71 small-lot, single family residences on a 19.5 acre hillside in the northeastern portion of the City of Laguna Niguel. Implementation of the proposed project would require approval of: 1) a general plan amendment, 2) a zone change, 3) a vesting tentative tract map, 4) a site development permit, and 5) a minor adjustment. Additional development would include associated infrastructure improvements, two neighborhood parks, perimeter fencing, slope landscaping, and completion of the existing rough-graded 1/4 mile segment of the Colinas Bluff Trail traversing the northern portion of the site.	<b>EIR</b>	06/12/2017
2016092045	Morrow Lane Bridge Replacement Project Water Resources, Department of Benicia--Solano Goodyear Land and Development Company, the private landowners on Morrow Island, and DWR propose to construct a new Morrow Lane Bridge over Goodyear Slough. The new bridge would replace the existing structurally deficient Morrow Lane Bridge, improve public safety, and ensure that the bridge meets current regulatory requirements and safety standards. The design of the new bridge and construction will be led by GLDC, the owner of the bridge.	<b>FIN</b>	
2017041075	Estrella River Bridge on River Grove Drive Rehabilitation Project San Luis Obispo County --San Luis Obispo The county proposes to rehabilitate the existing structurally deficient bridge on River Grove Dr over the Estrella River in the community of Whitley Gardens, in the North County, Shandon-Carrizo North planning area. The proposed rehabilitation	<b>MND</b>	05/26/2017

	includes demolition and disposal of the existing abutments, construction of new abutments, temporary repositioning of the historic Parker steel truss, and construction of temporary timber truss supports. Other project components include removing, and disposing of the existing timber pedestrian walkway structure and concrete slab deck, installation of a new cast in place continuous concrete slab deck, and repainting the unmodified bridge elements. Construction staging areas will be established within the existing River Grove.		
2017041076	UCR Barn Expansion University of California, Regents of the Riverside--Riverside UCR proposes to expand the entertainment and dining facilities provided on campus through the demolition, renovation and expansion of existing Barn Group buildings, and construction of new buildings. With implementation of the proposed project and the Barn Replacement Option, there would be a total of up to 18,860 gsf of development associated with the expanded Barn Complex, a net increase of 10,765 gsf. The proposed project would also involve the construction of an outdoor West Courtyard and stage, and the existing East Courtyard would be renovated. A loading dock/service yard, bicycle parking, landscape and hardscape features, exterior lighting, and utility infrastructure would be installed to support the planned renovation and expansion. No new vehicular parking or roadways would be added.	<b>MND</b>	05/26/2017
2017041077	North Norco Channel Line NB, Stage 3 Project Riverside County Flood Control and Water Conservation Norco--Riverside The Riverside County Flood Control and Water Conservation District proposes to replace an existing interim dirt-lined trapezoidal flood control channel with a concrete lined trapezoidal and rectangular channel, including concrete culverts, across Valley View Ave and Sierra Ave and an Armorflex, gabion, or rock lined invert at the western end where the line reconstructed on Sierra Ave, Fortuna Rd, Valley View Ave, and Gallop Lane.	<b>MND</b>	05/26/2017
2017041078	2811 Air Park Drive Planned Development Permit Santa Maria, City of Santa Maria--Santa Barbara Two new two story commercial office buildings and associated parking on 5.2 acres within the seven acre parcel. The existing commercial office building on the property would not be altered.	<b>MND</b>	05/26/2017

<b><u>Documents Received on Thursday, April 27, 2017</u></b>			
	earthwork to adjust slopes and implement a storm water pollution prevention plan. A note on the grading plans read: The roads identified on the grading plan have not been approved for access to any permitted structures at this time. Should the property owner desire to use them for such access the road being used for that access shall be improved to the min acceptable standard, in effect at the time of such request. The improvements shall be done under a subsequent grading permit to be issued at that time.		
2017042075	Hook Tentative Parcel Map (TPM16-0009) Butte County Chico--Butte A tentative parcel map to divide a 5.0 acre parcel into four parcels (3 at 1.0 acres and 1 at 2.0 acres). Proposed lot 1 is developed with an existing residence will be accessed off of Bell Rd and proposed lots 2, 3, & 4 will be accessed off of Muir Ave. The existing and future res uses would be served by individual septic systems and private wells.	<b>MND</b>	05/26/2017
2017042076	Chico High School Athletic Fields Project Chico Unified School District Chico--Butte The proposed project is a completion of the various components identified in the Chico HS Physical Education/Athletics Master Plan.	<b>MND</b>	05/26/2017
2017042078	Encinal Dune Restoration and Shoreline Stabilization East Bay Regional Parks District Alameda--Alameda The East Bay Regional Parks District proposes the Encinal Dune Restoration and Shoreline Stabilization Project within the existing Encinal Beach Park area. The site offers excellent opportunities to restore the beach and adjacent dunes to a more natural condition while improving both recreation and habitat values. Currently the invasive ice plant over much of the site degrades the dune habitat. The rusty barge provides shoreline support, but has been degrading within the shoreline bank for decades. Removal of the barge and installation of more sustainable shoreline protection would stabilize the area. Water access and egress would be improved while linking with the existing Alameda Point Trail, the Encinal Boat Ramp, as well as parking area and jetty facilities.	<b>MND</b>	05/26/2017
2013092021	West Jackson Highway Master Plan Sacramento County Sacramento, Rancho Cordova--Sacramento A Master Plan to create two District Plan Areas (District 1 and District 2) (approximately 5,913 acres) and three Future Planning Areas (FPA). The Master Plan will require amendments to the Sacramento County General Plan and the Cordova and Vineyard Community Plans. The Project includes a rezone to Special Planning Area for District 1 and District 2. Within District 1 & 2, the Project includes a range of land uses, including: very low density residential (01-4.0 units/acre), low density residential (3-8 units/acre), medium density residential (7-18 units/acre), high density residential (20-30 units/acre), mixed use (20-30 units/acre), commercial, employment, industrial, parks/open space, schools (three elementary schools and one middle/high school), institutional and major roadways. The properties within the FPAs will not be rezoned as a part of this Project; it is anticipated that the landowners in the FPAs will initiate Specific Plans in the future, consistent with the Master Plan.	<b>NOP</b>	05/26/2017

<b><u>Documents Received on Thursday, April 27, 2017</u></b>			
2016082077	<p>Medical Cannabis Cultivation Program Food and Agriculture, Department of -- Note: Revised</p> <p>CFDA circulated an NOP in September 2016 for its Medical Cannabis Cultivation Program. As a result of new legislation, CDFA has expanded the M CCP to become CalCannabis Cultivation Licensing, which includes commercial cultivation of non-medical cannabis. The regulatory licensing program would ensure cannabis cultivation operations are performed in a manner that protects the environment, cultivation workers, and the general public from the individual and cumulative effects of these operations, and fully complies with all applicable laws. CalCannabis would also establish a track and trace program to ensure the movement of cannabis items are tracked throughout the product chain. The regulatory licensing program would apply to all commercial cannabis cultivation statewide.</p>	<b>NOP</b>	05/26/2017
2017041074	<p>West Ontario Commerce Center Specific Plan Ontario, City of Ontario--San Bernardino</p> <p>The proposed West Ontario Commerce Center Specific Plan includes two planning areas totaling approx 120-net acres and will allow a max development of 555,505 sf of Business Park use and 2,350,005 sf of industrial use with a total development of 2,905,510 sf. The specific plan has the flexibility to determine the individual building size based on the market conditions. The proposed business park use will accommodate industrial-serving commercial and office uses, very light industrial uses, and allow multi-tenant buildings and single tenant buildings. The proposed industrial use will allow storage and warehousing use. The proposed industrial use will also allow the development of e-commerce use, distribution, and a wide range of manufacturing and assembly uses. Business park uses are depicted as future development, on the northern portion of the site.</p>	<b>NOP</b>	05/26/2017
2017042077	<p>Santa Clara Sustainable Residential Project Santa Clara, City of Santa Clara--Santa Clara</p> <p>Note: Review per lead.</p> <p>The project site is currently vacant. In 2007, the city approved the development of up to 165 affordable senior residential units and a one acre park on the site as part of the larger 17-acre Santa Clara Gardens project.</p> <p>As proposed, the project would construct the 165 affordable senior apartments. In addition, the project would construct up to 419 additional housing units with a mix of affordable and market-rate units, for a total of up to 584 units. Fifty percent of the total units on-site would be affordable.</p>	<b>NOP</b>	05/30/2017
2007072023	<p>Modesto Master EIR Update and General Plan Amendment Modesto, City of Modesto--Stanislaus</p> <p>Proposal to rezone 0.46 acres within the Baseline Developed Area of the City from Low Density Residential (R-1) Zone to Medium Residential (R-2) Zone.</p>	<b>NOD</b>

2017048577	Emergency Permit for Treatment of Hazardous Waste, Land O Lakes, Tulare County, California Toxic Substances Control, Department of Tulare--Tulare DTSC, pursuant to authority granted under CA Code of Regulations, Title 22, Division 4.5, Section 66270.61, has issued an Emergency Permit to Land O Lakes (EPA ID CAD982368417) to treat hazardous waste by chemical stabilization. This hazardous waste item is expired. The item is currently being stored in the Land O Lakes Lab Store Room located at 400 S. M Street, Tulare, CA 93274-5431. DTSC has determined as a safety precaution to prevent an accident or severe injury, an Emergency Permit should be issued to chemically stabilize the hazardous waste prior to transportation off site by Clean Harbor Environmental Services. The treatment of the hazardous waste involves the controlled addition of solution to the containers to reduce the reactive or ignitable characteristics of the chemicals. Treatment will take place within a designated exclusion zone. Only reactive material technicians from CHES will be allowed in the exclusion zone. Movement, preparation, and treatment of the items will be accordance with established standards. A report will be submitted to DTSC by Land O Lakes. The report shall include certification that the treatment area has been cleared of all residual hazardous waste generated waste has been properly managed and/or disposed. The Emergency Permit is effective beginning May 5, 2017 and shall expire on June 3, 2017.	<b>NOE</b>	
2017048578	MD-6 Lake Shore & MD-7 Marina View Water Distribution System Improvements Madera County --Madera The project will include a Feasibility Study, the Design & Specs of the MD-6&D7 Infrastructure Improvements at. 2017048586	Repair Slide with Soldier Pile Wall and Repair Damaged Roadway - 4K420 / 0417000308 Caltrans #4 --Sonoma, Santa Clara Repairs to slope and construct a sheet pile wall and repair roadway. This project will make the transportation corridor safer.	<b>NOE</b>	
2017048587	San Pasqual Battlefield Monument Wall Repair (16/17-SD-28) Parks and Recreation, Department of --San Diego This project will repair the damaged and failed parts of the wall around the monument at San Pasqual Battlefield State Historic Park. The stone needed to make the repairs will be recovered and reused on-site whenever possible. This project will protect park resources. Measures to be implemented to avoid impact may be obtained by submitting a request to the project Environmental Coordinator listed below.	<b>NOE</b>	
2017048588	Jacovini Water Diversions Project (Lake or Streambed Alteration Agreement No. 1600-2017-0013-R1) Fish & Wildlife #1E --Humboldt CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0013-R1, pursuant to Section 1602 of the Fish and Game Code to Mr. Joseph Jacovini. Project is limited to 3 encroachments. One is for water diversion from an Unnamed Tributary to the Mattole River for domestic use and irrigation. Work for this water diversion will include removal of existing infrastructure and installation, use, and maintenance of new diversion infrastructure. The second is for water diversion from the Mattole River to storage for irrigation. Work for this water diversion will include seasonal installation, use, and maintenance of the water diversion infrastructure. The third encroachment is for removal of old and unused water diversion infrastructure from an Unnamed Tributary to the Mattole River.	<b>NOE</b>

2017041080	Standley Middle School and Spreckels Elementary School Joint Use Facilities Project San Diego Unified School District San Diego--San Diego The proposed project involves the construction, expansion and operation of JUF at Standley MS and Spreckels ES that would be jointly operated by the District and the city of SD through an amended joint use agreement for each site and the installation of some related improvements at the city of SD's Standley Community Park. New facilities include a jogging trail, pool, pavilion, way finding monuments, marquee, safety and separation fencing, natural grass playing field and expanded parking lot.	<b>MND</b>	05/30/2017
2017042079	Minor Use Permit MUP16-0005 (Kooner) Butte County Oroville--Butte A request for a minor use permit to construct a gas station and convenience store in the northwest corner of (1.84 acres) of the 13.48 acre parcel. The convenience store will be 3,420 sf. The gas station will have 4 pump stations with a 4,320 sf canopy coverage.	<b>MND</b>	05/30/2017
2017042081	Guadalupe River Trail Master Plan San Jose, City of San Jose--Santa Clara The project is a master plan that would construct an approx 4.9 mi reach that would provide a continuous trail connection between the northern terminus of the Guadalupe River Trail in Alviso to its southern terminus at Gleman Rd. The majority of the trail would consist of 16-ft wide trail sections with limited landscaping, and trail and gateway plazas.	<b>MND</b>	05/30/2017
2017041081	NOP of a Program EIR for the 2018 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) Kern County Council of Governments Bakersfield, Delano, Shafter--Kern The project consists of preparation of the 2018 RTP/SCS. The 2018 RTP/SCS is an update to the 2014 RTP/SCS. The RTP will be used to allocate federal and state funding for regional transportation projects. The SCS component of the project identifies policies and strategies to balance land use and transportation systems to reduce emissions from cars and light trucks. Kern COG does not implement individual projects in the RTP/SCS; these projects are implemented by local jurisdictions and other implementation agencies. The RTP identifies the region's mobility needs and associated land use patterns through 2042. The SCS will contain land use, housing, and transportation strategies that, if implemented, would allow Kern County to meet GHG emission reduction targets for cars and light trucks for the years 2020 and 2035.	<b>NOP</b>	05/30/2017

2017041079	Bridging The Aqua Santa Ana, City of Santa Ana--Orange The project proposes to demolish the existing motel to construct 56 supportive housing units, including 12 studio units and 45 one-bedroom units. An on-site property manager will live a one-bedroom unit, bringing the total residential units to 57. The project will provide permanent housing to individuals who are chronically homeless earning at or below 60% of the Area Median Income. The project includes 24-hour on site management and dedicated office space for service providers. The project proposes a four story building with 36 residential units and a three story building with 21 residential units. A three story building with five truck under parking spaces and a street level lobby is located closest to 17th St and includes meeting space for temporary social workers, a leasing office, office space for service providers, and a community room and 30 parking spaces within an enclosed parking garage for residents. The design includes undulating buildings to buffer the site from the Santa Ana Freeway east of the site and create outdoor community spaces, a central courtyard and a community garden in the northwest area of the site. The buildings vary in height from 30 ft for the three story buildings to a max of 40 ft for the four story buildings.	<b>Neg</b>	05/30/2017
2017042080	Hessel Road Minor Subdivision (MNS15-0008) Sonoma County Santa Rosa--Sonoma Minor Subdivision of a 15.03 acre parcel into two lots of 4.57 acres and 5.85 acres in size intended for single family development and a designated remainder parcel of 4.51 acres in size for continued use of the existing residence and related site.	<b>Neg</b>	05/30/2017

2010021034	<p>project includes widening Commercial Place, construction of a road encroachment for access to the public roadway, construction of customer and employee parking areas, improvement of a one-acre outdoor storage yard, and incorporation of fencing and landscaping.</p> <p>Yucca Loma Road/Yates Road/Greentree Boulevard Transportation Improvement Project Apple Valley, City of Apple Valley, Victorville--San Bernardino</p> <p>The Green Tree Blvd Extension Project is part of a roadway gap closure project that would connect Yucca Loma Road in the Town of Apple Valley with Hesperia Road and Green Tree Blvd. in the City of Victorville with cooperative agreement with San Bernardino County. The project provides approx. 1.5 miles of new roadway and a 600 foot long bridge over the Burlington Northern Santa Fe (BNSF) Railroad, where no crossing currently existing.</p> <p>The Project will result in permanent impacts to 14.23 acres of Mohave ground squirrel (<i>xerospemophilus mohavensis</i>) habitat. The project is expected to result in incidental take of Mohave ground squirrel which is designated as a threatened species under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.</p>	<b>NOD</b>	
2013101066	<p>Griffith Park South Water Recycling Project Los Angeles Department of Water and Power Los Angeles, City of--Los Angeles</p> <p>The proposed project would begin at the existing Greenbelt Water Recycling pipeline 2,040 linear feet pipeline would connect to an existing recycled water pipeline. The pipeline would connect to a new pump station. From the pump station, the pipeline would continue for 2,830 feet. Approx. 1,400 linear pipeline would be constructed from the HOD receiving pit to a new recycled water storage tank, to be located southeast of existing Tank 114. The existing service main for the Roosevelt Golf Course would be split into two separate pipelines. A new ductile iron pipeline would be connected to the downstream portion of the pipeline and extend approx. 700 linear feet to the new recycled water storage tank. A new steel pipeline would connect to the upstream portion and extend approx. 700 linear feet to the proposed recycled water storage tank. A recycled water pump station would be located within the City easement. The proposed pump station would consist of two operating pumps and one back-up pump. The recycled water storage tank would replace the existing steel Tank 114. The existing Tank 114 would be demolished and aboveground appurtenances removed. The proposed recycled water storage tank would also have a potable water back-up supplied from the existing potable water system. Appurtenant facilities such as valves, vaults, air gaps, flow meters, discharge system would also include disinfection monitoring systems, a corrosion control system, provisions for water treatment, and provisions for security standards.</p>	<b>NOD</b>

2014021064	<p>access road construction, bridge column construction, bridge deck widening, bridge railing replacement, road resurfacing, and the placement of rock slope.</p> <p>Widening and Railing Replacements at Three Bridges Caltrans #6 Woodlake--Tulare</p> <p>CDFW has executed Streambed Alteration Agreement NO. 1600-2016-0097-R4, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Caltrans.</p> <p>Project includes activities related to widening of the bridge at the SR 201 crossing over Sand Creek. Project activities will include water diversion, bridge column construction, bridge deck widening, bridge railing replacement, road resurfacing, and placement of rock slope protection.</p>	<b>NOD</b>	
2015112003	<p>Downtown Martinez Jail Demolition Project Contra Costa County Martinez--Contra Costa</p> <p>The Project would involve demolition and removal of the existing Jailhouse building, including all building elements (i.e., foundations, roof equipment, and building appurtenances). The basement of the Jailhouse building and the sunken garage would also be demolished and filed. The existing Jailhouse building consists of the original structure, built in 1903, and an annex built in 1944. The Jailhouse building is on the National Register of Historic Places. The Jailhouse building is approx. 19,008 gross sq. ft. and 35 feet in height. There are seven parking structures in a parking lot to the south of the building and five in a parking lot to the north of the building. The Jailhouse is currently vacant (with the exception of a limited amount of obsolete storage). The Jailhouse building is currently contaminated with hazardous materials including asbestos and lead-based paint.</p> <p>Following demolition of the existing Jailhouse building, the Project site would be leveled to match the surrounding area and a surface parking lot would be constructed on the Project site. As described above, the existing parking lots have a total of 12 striped parking spaces. The County Public Works Dept. would repave the entire site, providing a total of 25 to 30 spaces. The proposed parking lot would serve some of the parking demand from the adjacent County buildings and would be restricted to County employees only. Construction activities would include abatement of hazardous materials and the demolition of the existing Jailhouse, site preparation and excavation, site grading, and paving of the new parking lot. Additionally, the Project would include the demolition and removal of all other site features, including building footings, granite bollards, granite curb, concrete curb, metal railings, walls, paving, and limited portions of sidewalks within the Project site. All existing planters and landscaping would be removed as well. The Project would have significant effects with regard to historic architectural resources, biological resources, hazards and hazardous materials, and noise. With the exception of historic architectural resources, these impacts could be reduced to a less-than-significant level with mitigation. The Project site is not included on a hazardous materials/contaminated sites list compiled pursuant to Government Code Section 65962.5.</p>	<b>NOD</b>

2017048609	Miller Water Diversion, Micro-hydro Power Generation, and Pond Spillway Project (Lake or Streambed Alteration Agreement No. 1600-2016-0581-R1) Fish & Wildlife #1E --Humboldt CDFW has executed lake and streambed alteration agreement no. 1600-2016-0581-R1, pursuant to section 1602 of the fish and game code to Mr. Dustin Miller. The project is limited to four encroachments. Three encroachments are for water diversion, two from unnamed tributaries to the Little Van Duzen River, and one direct diversion from the Little Van Duzen River. Water is diverted for domestic use and irrigation. Work for the water diversion will include modification, use, and maintenance of the water diversion infrastructure. The fourth proposed encroachment is to install a spillway from a rainwater catchment pond that has not yet been constructed. Work for this encroachment will include excavation and rock armoring as necessary to minimize erosion.	<b>NOE</b>	
2017048610	Levin Water Diversion Project (Lake or Streambed Alteration Agreement No. 1600-2016-0513-R1) Fish & Wildlife #1E --Humboldt CDFW has executed lake and streambed alteration agreement no. 1600-2016-0513-R1, pursuant to section 1602 of the fish and game code to Mr. Sherod Levin. The project is limited to one encroachment for water diversion from Mattole Canyon Creek. Water is diverted for domestic use. Irrigation water is utilized from an off-stream rainwater catchment pond. Work for the water diversion project will include use and maintenance of the water diversion infrastructure.	<b>NOE</b>	
2017048611	Shasta Bridge Joint Maintenance Caltrans #2 Redding--Shasta Caltrans proposes to conduct joint maintenance on two bridges in Shasta County to repair normal wear and tear from traffic and exposure to the elements. This project is necessary to maintain current operations and to extend the useful life of bridges.	<b>NOE</b>
