

Arnold Schwarzenegger, Governor

STATE CLEARINGHOUSE

NEWSLETTER

August 1-15, 2008

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **August 1-15, 2008.**

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown.**

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: February 13, 2007
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, Senior Planner
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner
916-445-0613
scott.morgan@opr.ca.gov

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2007**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

2007011069	<p>The Projects at Main Gate Seaside, City of Seaside--Monterey</p> <p>Specific Plan that allows development of two components: 1) an open-air retail center (up to 559,500 square feet) and 2) a hotel/spa/conference facility.</p>	EIR	09/15/2008
2007111090	<p>General Plan Update Rosemead, City of Rosemead--Los Angeles</p> <p>The proposed project analyzed in the Program EIR is the adoption and long-term implementation of a comprehensive update of the City of Rosemead General Plan. The project also includes revisions to the City's Zoning Code (Title 17 of the Municipal Code) that will be pursued to implement General Plan policy. This Program EIR provides a program-level assessment of the general environmental impacts resulting from development pursuant to land use policy and implementation of the goals and policies set forth in all chapters of the updated General Plan, and the long-term implementation of the revised Zoning Code.</p>	EIR	09/15/2008
2007112002	<p>Mammoth Crossing Project Mammoth Lakes, City of Mammoth Lakes--Mono</p> <p>The Project proposes redevelopment of three of the four corners that comprise the Main Street-Lake Mary Road/Minaret Road intersection with a combination of resort accommodations, retail uses, and public spaces. The Project is located within the North Village Specific Plan Area, and includes a series of amendments to the North Village Specific Plan ("Specific Plan"), amendments to the Town of Mammoth Lakes' General Plan, Use Permit (including Design Review), and a Tentative Tract Map. Proposed development at Site 1-3 would involve multiple buildings ranging in height from one to approximately seven stories. The Project's fourth site proposes no new development as part of this Project.</p>	EIR	09/17/2008

2008041068	South Region Elementary School No. 11 Los Angeles Unified School District Los Angeles, City of--Los Angeles The proposed project would entail approximately 62,000 square feet of development that includes 32 classrooms, 800 two-semester seats, and 72 parking spaces for faculty and staff. The school would be contained within a three-story structure (a maximum of 55 feet high) that includes administration space, a multipurpose room, a library, kindergarten facilities, food services, a health unit, and playground areas. The playgrounds would not be lit for nighttime use, and there is no current plan for joint use of the facilities.	EIR	09/15/2008
2007032125	American River Parkway Plan Update Sacramento County --Sacramento Update to the American River Parkway Plan, an Element of the Sacramento County General Plan.	FIN	
2008081002	TPM 18511 San Bernardino County --San Bernardino Tentative Parcel Map 18511 (TPM 18511) to create four (4) parcels on five (5) acres; located approximately 330 feet west of Sunset Road expanding from Navajo Trail to Sandalwood Trail in the Joshua Tree Planning Area; File No: P200700365; APN: 0588-281-09.	MND	09/02/2008
2008081003	Greenwald Avenue Commercial Center Lake Elsinore, City of Lake Elsinore--Riverside The project proposes a Tentative Parcel Map that would divide the 13.9 acres into five parcels with 1.4 acres in Parcel 1, 2.6 acres in Parcel 2, 2.1 acres in Parcel 3, 2.5 acres in Parcel 4, and 5.1 acres in Parcel 5. A north-south roadway that would divide the project site is needed in order to provide access for no more than 300 single-family dwelling units that would be developed north of the project site. This roadway corresponds with Dowling Road on the proposed Circulation Element of the City of Lake Elsinore Comprehensive General Plan Amendment. The portion of the project site west of Dowling Road is Parcel 4 and Parcels 1, 2, 3, and 5 make up the portion of the project site east of Dowling Road.	MND	09/02/2008
2008081005	State Route 74 & Interstate 215 Interchange Improvement Project Caltrans #8 Perris--Riverside The California Department of Transportation proposes to reconstruct and modify the existing interchange of State Route 74 (SR 74) and Interstate 215 (I-215) from the intersection of 4th Street and "G" Street to the I-215 at Redlands Avenue, and from the I-215 interchange to San Jacinto Avenue in the City of Perris in Riverside County.	MND	09/02/2008
2008082002	Newell Migrant Housing Modoc County --Modoc Development of 35 new housing units at the Newell Farm Labor Camp. Existing 48 housing units will be demolished following the construction of the new units so that the camp may remain in operation during the construction. Existing facility includes 53 housing units, 1 daycare facility, 3 shops, assistant manager housing, and manager housing. Proposed development includes 35 housing units, daycare	MND	09/02/2008

	facility, playgrounds, laundry facility, office building, manager housing new driveways and a parking lot (108 standard spaces and 6 handicap spaces). The existing daycare facility and 4 housing units will remain.		
2008082003	Thompson Parcel Map (PMLD T20070418) Placer County --Placer Project proposes a Minor Land Division to create four residential parcels on a 1.15 acre parcel and includes the demolition of four Tourist Accommodation Units.	MND	09/02/2008
2008082005	Vallejo Yacht Club Breakwater Replacement Project SD08-0006 Vallejo, City of Vallejo--Solano The VYC proposes to replace the existing degraded timber breakwater with a new steel breakwater located further into the channel of the Mare Island Strait. The existing degraded 894-foot long timber breakwater would be removed and replaced with a new 1,355-foot long steel sheet pile breakwater extending out about 80 feet to create a larger harbor; the outer face of the new alignment would be approximately in line with the outer face of the adjacent Vallejo Municipal Marina breakwater. The sheet piles would be installed to a minimum of 30 feet below the existing mud line.	MND	09/02/2008
2008082007	#P07-00869-MOD (Alpha Omega Winery Use Permit Modification) Napa County St. Helena--Napa NOTE: Document is a Subsequent Mitigated Negative Declaration. Approval to modify Use Permits: #U-118081, #U-538485, and #95037-MOD with request #P07-00869-MOD to develop a project in two phases (Phase A and B).	MND	09/02/2008
2006021046	First Street Waste Transfer Station Pomona, City of Pomona--Los Angeles The City of Pomona will be the Lead Agency under the CEQA and will prepare a Supplemental EIR for the proposed project. The proposed project consists of a Change of Zone (CZ 05-007) from O-Publicly Owned Land to M-2-General Industrial, as well as a Conditional Use Permit (CUP 05-041) for the development of a solid waste transfer station on a 4.5 acre property currently occupied by three municipal water wells, an existing solid waste direct transfer facility, and the former site of a quarter-midget racing track.	NOP	09/02/2008
2006051110	The Preserve at San Juan Orange County Lake Elsinore--Orange, Riverside The project applicant, the Preserve at San Juan, LLC, proposes to develop single-family residential lots under 2 development scenarios (Without Land Exchange: 169 lots or With Land Exchange: 165 lots) on primarily undeveloped land, with minimum residential lot size of 1.5 acres. In addition, vineyards would be located throughout the project site. Without Land Exchange involves 798 acres (the Preserve at San Juan North, South, and Old Dominion Mine properties) in Orange County and 62.5 acres (Preserve at San Juan North and South) in Riverside County, The With Land Exchange scenario involves a land exchange with USFS. The land acquired under the land trade totals 68.5 acres in Orange County and 165.5 acres in Riverside County in exchange for 469 acres in Orange County. The proposed project also includes the relocation of St. Michael's Abbey;	NOP	09/02/2008

2008088001	Santa Ana Pipeline Concrete Encasement Under Metrolink-SCRRA Tracks Water Resources, Department of Colton--San Bernardino DWR will encase a portion of the Santa Ana pipeline in concrete for reinforcement on property where the Southern California Railroad Authority (SCRRA) plans to install additional railway tracks. The pipeline encasement will occur within an area approximately 75-foot wide by 500 feet long (0.9 acre). Approximately 30-feet of the pipeline repair length (0.05 acre) will cross a railroad drainage ditch that flows into Lytle Creek (flood control) Channel. Soil surrounding the pipeline will be excavated and the pipeline inspected, forms will be built and concrete poured for the encasement, then soil backfilled to restore the pre-existing soil contours. The site is within a much larger area to be disturbed by the SCRRA railway expansion project. Most of the excavated soil will be backfilled, and extra soil may be used by SCRRA for their project or removed to an approved disposal site by the contractor. Storm water pollution prevent best management practices will control erosion, contain wet concrete, and prevent sediment release. The DWR pipeline encasement project will last 30-days maximum.	NOE	
2008088005	Boggs Tract Levee Maintenance Repair Project Fish & Game #3 Stockton--San Joaquin Levee work will include maintenance that is routine in nature, including minor erosion repair, vegetation trimming, and weed control. Erosion repair will consist of placing clean quarried rip-rap at previously armored levee sections. Issuance of a Streambed Alteration Agreement Number 1600-2008-0021-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2008088006	Polo Grounds Monitoring Well Soquel Creek Water District --Santa Cruz A monitoring well will be installed to monitor groundwater levels and water quality. The monitoring well will also be used to monitor any impacts on groundwater levels in the area. This well will benefit the Soquel Creek Water District, Central Water District, County of Santa Cruz, and any private wells in the local vicinity.	NOE	
2008088007	Netherlands Erosion Repair Project Fish & Game #3 --Yolo The proposed project involves levee erosion/damage repair along the Sacramento River. The damaged levee section will be repaired with existing material and new rock revetment. As part of the project, the waterside levee will be re-graded, revetted, and re-planted with native plants. Issuance of a Streambed Alteration Agreement Number 1600-2008-0177-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2008088008	Storm Damage Repair at Two Locations on State Route 35, Santa Clara County Fish & Game #3 --Santa Clara Work within the unnamed tributary to Stevens Creek involves removing approximately 120 cubic yards of accumulated sediment from a pipe riser, replacing the pipe riser, installing a debris rack to prevent future sedimentation, replacing the existing 24" corrugated metal cross culvert with a 24" welded steel cross culvert. The installation of the new cross culvert will require jacking equipment within the streambed. Approximately 1,600 square feet of streambed	NOE

	will be excavated and shored to accommodate jacking equipment. Approximately 116 square feet of rock slope protection (RSP) will be placed at the culvert outfall. The RSP will be backfilled with soil and revegetated to the largest extent possible. Issuance of a Streambed Alteration Agreement Number 1600-2008-0061-3 is pursuant to Fish and Game Code Section 1602.		
2008088009	Cell-fronts Improvement Project at Correctional Training Facility, Soledad, California Corrections and Rehabilitation, Department of Soledad--Monterey To promote the safety of staff and inmates at the Correctional Training Facility - Soledad (CTF), this project will improve the cell fronts/doors in the Administrative Segregation Units in O-Wing of CTF. The scope of improvements includes replacement of the existing cell fronts with solid wall/door units and locking mechanisms that conform to CDCR's Maximum Security design standards. The work will also include related modifications to the existing HVAC and electrical system; and a fire alarm system complete with a duct smoke detector for each cell, key operated pull stations, and audible/visual alarms. Removal of existing cell fronts will involve lead and asbestos remediation to safely remove and properly dispose of contaminated items that are disturbed through the construction process.	NOE	
2008088010	Cell-fronts Improvement Project at Deuel Vocational Institute Corrections and Rehabilitation, Department of Tracy--San Joaquin To promote the safety of staff and inmates at Deuel Vocation Institute - Tracy (DVI), this project will improve the cell fronts/doors in the Administrative Segregation Units of K-Wing at DVI. The scope of improvements include replacement of the existing cell fronts with solid wall/door units and locking mechanisms that conform to CDCR's Maximum Security design standards. The work will also include related modifications to the existing HVAC and electrical systems; and a fire alarm system complete with a duct smoke detector for each cell, key operated pull stations, and audible/visual alarms. Removal of existing cell fronts will involve lead and asbestos remediation to safely remove and properly dispose of contaminated items that are disturbed through the construction process.	NOE	
2008088011	Estero Americano Watershed Dairy Enhancement Projects 2008-2009 Gold Ridge Resource Conservation District (GRRCD) --Sonoma This is a stormwater management and manure management dairy enhancement project. The project involves the installation or repair of approximately 300 feet of gutters and the installation of approximately 6,000 feet of pipeline to improve manure transfer and utilization. The project also includes basic data collection and research on soils, vegetation, and manure for natural resource management purposes.	NOE	
2008088012	Estero Americano Watershed Dairy Enhancement Projects 2008-2009 Gold Ridge Resource Conservation District (GRRCD) Petaluma--Sonoma This project consists of the constructing a composting pad and a concrete solids separator pit to improve manure management and distribution, and to reduce the amount of wastewater generated on a dairy. A solids separator and composting facility will greatly enhance nutrient management and the transfer and distribution	NOE

	of manure to farm fields. These are pasture management dairy enhancement projects. The projects involve the installation of water pipeline and purchase of water troughs to facilitate rotational grazing, improve pasture management practices and to reduce pressures from overgrazing in critical areas.		
2008088013	California Prison Health Care Service Pharmacy Corrections and Rehabilitation, Department of Sacramento--Sacramento The California Department of Corrections and Rehabilitation, California Prison Health Care Services proposes to lease approximately 53,328 square feet of existing office space/warehouse at 8364 Rovana Circle, Sacramento, CA, to house the Central Fill Facility (pharmacy/office/warehouse) for the California Prison Health Care Receivership. There are sufficient electricity, water, gas, wastewater, and refuse removal services to adequately serve this property.	NOE	
2008088014	Abandoned Mine Closure - Carnegie State Vehicular Recreation Area (SVRA) Parks and Recreation, Department of --San Joaquin This project encompasses the closure and reclamation of abandoned mine features to ensure public safety, protection of wildlife habitat, and to prevent vandalism of historic sites. Closure measures will include fencing, signage, and/or bat culverts.	NOE	
2008088015	Residence Exterior Landscape/Hardscape Upgrades Parks and Recreation, Department of --San Benito The purpose of this project is to install a carport cover, concrete parking pad concrete sidewalks, front and back decks, and replace fencing at the residence located at 7600 Cienega Road, Hollister, CA, 95023. The residence is a 2001 mobile home placed on a site that has been a trailer pad and house site for over 30 years. There is currently no carport, sidewalk, or cement parking pad at the residence location; the area has a mixture of native soil and road base on the walking and parking areas. Bird Creek is located approximately 80 feet from the west side of the residence and approximately 50 feet from the southwest corner of the residence. There will be no removal of riparian vegetation for this project and all access will be via Cienega Road.	NOE	
2008088016	Upgrade Mini Track at Radio Ridge Parks and Recreation, Department of --San Benito This project will upgrade the beginner MX track at Radio Ridge. The track needs to be reshaped to take the flow of traffic away from the edge of the ravine. There is currently an uphill "tabletop" section located just above a deep ravine that is now fenced along the top with safety fencing and straw bales to protect riders. The new alignment will place a turn on the track just before where the tabletop exists currently, removing the tabletop from that location and turning the riders towards the infield of the track. There is currently a 24-foot corrugated metal culvert at the location of the tabletop that will be removed and replaced with a new corrugated metal culvert that will be placed properly. The outflow side of the culvert will be hardened with 12-24 inch angular rock to address erosion problems. Up to 3 shade structures and picnic tables will be built in the infield of the track for families to provide adult supervision to the young riders on the track.	NOE

2005032075	<p>South Lagoon Levee Repair Project Bel Marin Keys Community Services District Novato--Marin NOTE: Addendum filed w/ NOD</p> <p>The project proposes to restore 1,325 feet of the eroded sections of the levee and then place armor stone to absorb wave action and protect the slope from future erosion. The replacement of fill in the eroded areas is necessary in order to re-establish the full cross-section of the levee and thus reduce the amount of water seepage and the potential for levee failure.</p>	ADM	
2008032005	<p>American Engineering & Asphalt, Inc (PCPA T20070690) Placer County Rocklin--Placer Project proposes approval of a Conditional Use Permit and Design Review to operate an asphalt and concrete recycling facility.</p>	MND	09/02/2008
2008081007	<p>Project Casitas Gravity Main at San Antonio Creek Casitas Municipal Water District --Ventura The intent of this project is to address the scour of cover over the top of the 56" diameter water transmission pipe. The water main is exposed and is the key water supply from Lake Casitas to the communities of Oak View and Ojai. The water main is filled with chloraminated water and needs to have its cover restored to protect from rupturing.</p> <p>The project will be constructed in October when no or low flow is anticipated in the creek. Should any flow be present it will be diverted around the project site in an effort to mitigate this condition. The proposed pipeline protection will be constructed of 2' minus rock placed parallel to the pipe on both sides. The rock will extend approximately 70' from the bank into the creek bed on both sides of the pipe. In addition, willow stakes will be planted to add to the long-term stability and mitigate any loss of vegetation. Every effort will be made to follow the guidelines set forth in the California Salmonid Stream Habitat Restoration Manual in dealing with the stream bed.</p>	MND	09/02/2008
2008081008	<p>Vesting Tentative Parcel Map No. 066202 Los Angeles County --Los Angeles The proposed vesting tentative tract map project is a request for development of 31 detached single family residential condominium units. The detached condominium units will vary in design from one to two stories. The subdivision is proposed over 7.61 acres of land, of which 3.9 acres will be developed, 0.82 acres to be utilized for street construction, and 2.88 acres to remain as designated open space. Primary access to the site will be through an off-site access easement from Quinn Drive to the north. A 20 foot wide emergency access only driveway is proposed from Sierra Highway on the west end of the site. The grading proposed for VTTM 066202 is for 38,524 cubic yards of cut, 59,019 cubic yards of fill, with 20,495 cubic yards of fill to be imported for a total amount of 118,038 cubic yards</p>	MND	09/02/2008

	to be handled, with a conditional use permit filed for grading, hillside management, and density controlled development. A zone change is proposed for RPD-10,000 (Residential Planned Development Zone-10,000 square foot minimum of lot area required per unit).		
2008081013	Oak Ave. and School Ave. Extension Visalia, City of Visalia--Tulare Acquisition of right-of-way and construction of School and Oak Avenues from Tipton Street to Burke Street. In addition to the extension of these two "Local" streets, improvements to North Burke Street as a "Collector" status road, between Mill Creek and Goshen/Murray Avenue will also be constructed. Included in this project is acquisition of land and relocation of a gas line distribution facility on the south side of School Ave.	MND	09/03/2008
2008082012	Hamilton Wetlands Access Road Novato, City of Novato--Marin The Hamilton Wetlands Access Road proposes the construction and use of a temporary (20-year), approximately 3,900-foot long, one lane (approximately 12-14 feet wide), unpaved access road at the former Hamilton Army Airfield, located in Novato, CA. The Hamilton Wetland Access Road would provide temporary construction access for the Hamilton Wetlands Restoration Project, Bel Marin Keys Unit V Restoration Project, U.S. Army Corps of Engineers Formerly Used Defense Site (FUDS) clean-up project (lead abatement at a former Hamilton Army Airfield shooting range), as well as maintenance access for other public agencies with facilities Hamilton Field. The Hamilton Wetlands Access Road would be gated and not open to public vehicle travel. The Hamilton Wetlands Access Road is intended to serve as an alternate to the existing and currently used construction access at Todd's Road.	MND	09/02/2008
2008082013	Yingling Tentative Parcel Map P-08-09 Trinity County --Trinity Tentative parcel map to create 4 parcels from 8 acres. Project will require construction of access road, building pads and driveways, extension of utilities and community water and sewer.	MND	09/02/2008
2008082014	Use Permit UP-08-01 (Weed Berean Church) Siskiyou County Weed--Siskiyou The applicant is proposing to establish a church. Construction will include the building for the church, a gravel parking lot, a trash enclosure, and landscaping. The 12,484 square foot structure will be used for church gatherings, services, and events at various times throughout each week. The sanctuary will have a capacity of 296 and the choir will have a capacity of 38. The floor plan for the structure proposes 6 classrooms, 2 offices, 4 restrooms (2 men's and 2 women's), a conference room, a nursery, a fellowship area, 2 mechanical rooms, and 3 storage rooms. The structure also proposes a 1,894 square foot carport. The gravel parking lot will contain 105 parking spaces, including 5 handicapped spaces.	MND	09/02/2008

2008082016	Walters Subdivision Ferndale, City of Ferndale--Humboldt The project consists of a major subdivision of an approximately 3.8 acre residential parcel into eight new parcels ranging in size from approximately 17,000 square feet (sf.) to 36,000 sf. There is currently one residence on the parcel and one barn.	MND	09/02/2008
2008082017	Iron Canyon Fish Ladder Rehabilitation Chico, City of Chico--Butte The project will repair existing weirs, expand and modify existing weirs, and install 6 new weirs at the Iron Canyon Fish Ladder (Fish Ladder) on Big Chico Creek in Bidwell Park, Chico, California. The Fish Ladder was constructed in the mid 1950s to provide spring run salmon passage during low to moderate flows, so that the fish can reach holding and spawning habitat upstream. The ladder has suffered damaged and now does not function as designed. The United States Fish and Wildlife Service (USFWS) developed final designs and specifications (pending permit and funding agency conditions) and has provided funding to the California State University, Chico Research Foundation to complete environmental review, obtain permits and develop construction funding. The Foundation is working with the City of Chico, the Big Chico Creek Watershed Alliance, the CA Department of Fish and Game, and the CA Department of Water Resources to complete these tasks.	MND	09/02/2008
2008082018	Benson Certified Organic Vineyards Timberland Conversion Forestry and Fire Protection, Department of Calistoga--Napa The project requires the approval of a Timberland Conversion Permit (TCP), Timber Harvesting Plan (THP) and Napa County Erosion Control Plan (ECP) to convert 4.3 acres of timberland to establish a Certified Organic Vineyard. Environmental impacts have been identified and mitigated through measures in the TCP, THP, and ECP.	MND	09/03/2008
2008042079	The Mirabella San Francisco Bay/Parkview Plaza Development Project Foster City Foster City--San Mateo This project has changed since the original NOP was circulated in April 2008. The density within the project has been increased by approximately 25 percent. The proposed project would develop vacant City-owned property with a new Continuing Care Retirement Community (CCRC) and commercial development within multiple buildings and a public open space component. As revised, the CCRC, Mirabella San Francisco Bay, consists of 350 independent living apartments, 20 assisted living apartments, a 20-bed memory care unit, a 30-bed skilled nursing and 70 affordable housing one-bedroom rental apartments. The commercial component, Parkview Plaza, consists of 31,300 square feet of retail/restaurant space. The commercial component also includes the potential for 19,000 square feet of retail/restaurant space in a future development phase, for a total of 50,000 square feet of commercial retail and estaurant space. The proposed project also includes an approximately 1.3 acres of public open space deisgned to host a variety of public and private events, outdoor seating for restaurant patrons, a farmer's market, art displays, and entertainment areas. The project site is not included in the hazardous Waste and Substances Sites (Cortese) List.	NOP	09/02/2008

2008081009	<p>EDCO Recycling and Transfer Facility Signal Hill, City of Signal Hill--Los Angeles</p> <p>The proposed project is the development of a 68,000 sf recycling and transfer facility on a 3.75-acre site in the City of Signal Hill. The state-of-the-art facility will serve as a point to accept, process, recover, and transfer mixed municipal waste and residue following diversion activities to an appropriate permitted disposal facility. The Project component areas include office administration, material recovery operations, transfer/delf haul/load out, green waste, construction debris, and maintenance. The facility will be equipped with emission control systems for air quality, noise, odor (Rule 410), and dust. Specific truck routes will be designated for haul trucks. Technical studies are being prepared for air quality/climate change, odor control, traffic, noise, Phase II ESA, biological resources, hyrdology/water quality/runoff, and vector control.</p>	NOP	09/02/2008
2008081010	<p>The Wilshire Gayley Development Project Los Angeles, City of Los Angeles, City of--Los Angeles</p> <p>Wilshire Gayley, LLC, the project Applicant, proposes to redevelop the site with a 134-room luxury business hotel that would include amenities such as a business center with meeting rooms, swimming pool, and a fitness center. The proposed project would also include 10 for sale condominiums, a 5,522 square foot retsaurant, and approximately 7,520 square feet of ground floor retail uses. The project would include a total of approximately 286,493 gross square feet. The hotel and condominium units would be located on floors five through twenty-six. The building would be stepped back as the floor plates would decrease slightly in size as the building height increases. The 27th floor would contain mechanical equipment. An emergency helipad would be located on the buidling rooftop. Overall, the project would be 27 stories, approximately 345 feet in height. Parking would be provided in a four level, approximately 200 space subterranean garage. The parking would operate with a valet service and additional parking may be provided through covenants for off-site parking. Alternatively, the 134 hotel units could be subdivided and sold as condominiums, resulting in a total of 144 for sale condominiums. The building envelope and exterior treatment would be the same for either option.</p>	NOP	09/02/2008
2008082011	<p>Comprehensive Transportation Plan Sonoma County Transportation Authority --Sonoma</p> <p>The SCTA is updating its 2004 Comprehensive Transportation Plan, a long-range transportation blueprint that articulates how Sonoma County's transportation infrastructure (e.g. streets, highways, transit systems and bicycle/pedestrian pathways) will be maintained and improved over the next 25 years.</p> <p>The SCTA has set the following goals for the 2009 CTP update:</p> <ol style="list-style-type: none"> 1. Reduce Greenhouse Gas emissions, 2. Maintain the existing transportation system, 3. Relieve congestion, 4. Develop resources to collect relevant data, and 5. Pursue funding to implement the CTP. <p>As part of SCTA's CTP update, a series of "Visioning Scenarios" that represent transportation improvement strategies that could be implemented will be analyzed</p>	NOP	09/02/2008

	using the Sonoma County Travel Model. This modeling exercise will provide insights on the transportation policies or projects can help SCTA achieve the goals listed above. The CTP Plan also looks at smart growth opportunities that can help the county accommodate growth in ways that minimize transportation and environmental impacts, while recognizing the need to address climate change concerns.		
2008081011	Fresno Merger No. 1 Redevelopment Plan Amendments Fresno Redevelopment Agency, City of Fresno--Fresno The purpose of the proposed Amendments is to extend the Agency's ability to use eminent domain to acquire property within the Merger No. 1 Project Areas (excluding properties on which persons lawfully reside), streamline the redevelopment land use plan of some of the constituent redevelopment plans to remove details and substitute the City's General Plan, community plans, and specific plans as the redevelopment land use plan, and to amend specific time and financial limits for some of the constituent plans.	Neg	09/02/2008
2008081014	General Plan Amendment No. 8, Zone Change No. 14, Map No. 143-19. Exclusion from Agricultural Preserve No. 13 Kern County Bakersfield--Kern The applicant is requesting a General Plan Amendment from Map Codes R-IA to Map Code LI and a zone change from A-1 to M-1 PD to facilitate the creation of up to eight (8) 2 1/2-acre parcels for light industrial use from a 19.84 acre site. The applicant is proposing highway commercial type light industrial uses such as mini-warehouse, and commercial truck and trailer storage or other uses associated with capturing the traffic traversing along the adjacent State Highway 99. Access is provided by Costajo Road, which fronts State Highway 99. Costajo Road connects to the south to Bear Mountain Boulevard where an interchange at State Highway 99 is available for direct access to the freeway. The applicant is seeking exemption from the Metropolitan Bakersfield General Plan sewage requirements to allow disposal needs to be met through individual septic tanks rather than connection to a sewer system. Water requirements will be provided by a single water well to serve all parcels.	Neg	09/03/2008
2008082010	Truchard Vineyard - Vineyard Conversion #P08-00135-ECPA Napa County Napa--Napa The project includes earthmoving activities, and the installation and maintenance of erosion control measures associated with 4.9 gross acres (3.4 net acres) of new vineyard within a 7.75 acre holding. The site topography ranges from gentle to moderately sloping (slopes typically 6% to 21%) grassland, at elevations between approximately 120 and 190 feet above mean sea level.	Neg	09/02/2008
2008082015	Water Storage Reservoirs (Tanks) and Pump Stations Turlock, City of Turlock--Stanislaus The project involves the construction of two identical water storage reservoirs (tanks) at two separate locations. Each reservoir is cylindrical in shape with a storage capacity of 1 million gallons. The facilities are an on-ground design with a maximum height of 34 feet and a diameter of 86 feet. The water storage tanks will occupy an approximately 25,500 square foot portion of each site. Both locations will also contain a 2,275 square foot, single-story pump house measuring 35 by 65	Neg	09/02/2008

<u>Documents Received on Monday, August 04, 2008</u>			
2008082009	<p>feet with a height of approximately 20.5 feet. The pump house provides security for the pump equipment and to attenuate any noise that may be generated from the pumping activities. The purpose of the projects is increase the reliability of the City of Turlock's potable water system and to add capacity to meet peak water demands.</p> <p>Manchester-Point Arena Casino Tribal Environmental Impact Study Manchester-Point Arena Band of Pomo Indians Point Arena--Mendocino NOTE: Tribal Environmental Impact Study</p>	TRI	09/02/2008
2005032075	<p>The proposed project would involve the construction and operation of a casino to be owned and operated by the Tribe. The proposed project would create an 8,836 square feet gaming facility, construction of a parking lot, and developing a commercial office. The proposed gaming facility would total approximately 11,860 square feet in area and would house up to 249 slot machines, two table games, and a small food and beverage service. Adjacent, a 48'X 63' building will be used for surveillance and office purposes. A total of 214 parking spaces are projected for the proposed project.</p> <p>South Lagoon Levee Repair Project Bel Marin Keys Community Services District Novato--Marin The previously adopted Mitigated Negative Declaration authorized 1,325 linear feet of repairs to the southerly portion of the Bel Marin Keys South lagoon levee, adjacent to the South Lagoon. The previous project restored the eroded sections of the levee and installed armor stone to absorb wave action to protect the slope from future erosion. The replacement of fill in the eroded areas was necessary to re-establish the full-cross section of the levee which reduced the amount of water seepage and the potential for levee failure.</p> <p>The necessary repairs to the South Lagoon Levee are essentially the same as those recently performed on the southeast area of the lagoon as performed in 2005. The BMKCSD approves amending the NOD for the previous repairs to include the required areas along the South Levee. Additionally, the BMKCSD approves implementing the mitigation measures set forth in the Mitigated Negative Declaration as the proposed project does not pose any additional impacts to the environment since the repairs are the same as performed in the previous NOD.</p>	NOD	
2005122057	<p>Borup Tentative Parcel Map 04TPM-59(3) Tuolumne County --Tuolumne The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the project applicant, Lauren Borup, for the Culvert Installation Project. The applicant proposes to install seven, corrugated metal pipe (CMP) culverts, of diameters ranging from 18 to 60 inches, in unnamed tributaries to Garrotte Creek. Also proposed is the installation of rock rip-rap slope protection around culvert inlets and outfalls, and seeding and mulching of disturbed areas.</p>	NOD

	abandoned roads.		
2008061094	P07-1167 - Hunter Business Park Distribution Center Riverside, City of Riverside--Riverside Proposal by Bruce McDonald, on behalf of Master Development Corporation and MDC Hunter Park, LLC., for Environmental Review and Design Review of a plot plan and building elevations for the construction of an approximately 519,613 square foot building for warehousing purposes on approximately 25.35 acres developed with an existing approximately 103,000 square foot industrial building to be demolished at 1001 Columbia Avenue (previously 990 Palmyrita Avenue), situated north of Columbia Avenue and south of Palmyrita Avenue, generally situated west of Northgate Street, in the BMP-SP- Business and Manufacturing Park and Hunter Business Park Specific Plan (Industrial Park District-Manufacturing Park) Combining Zones.	NOD	
2008089002	Regional Intertie Project - SAA 1600-2005-0041-R2 Butte County Oroville--Butte The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0041-R2 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Del Oro Water - Stacey Jolliffe 530-538-7601. This project pertains to Phase 1 of the Region Intertie Project. Authorized activities includes the modification of the existing lake intake and submersible pump to include twin 16-inch diameter intake structures and a skid mounted 125 horsepower submersible pump. A new 8-inch inlet pipe and casing will also be placed parallel to an existing pipe along the lake bottom for approximately 115 feet. The pipe will be assembled on shore, floated out to the lake via barge, filled with water and sunk to the lake bottom. Pre-cast concrete anchors placed at 10-foot intervals will secure the pipe in position. The new 8-inch pipe will be buried from the lake shore to an above ground manifold located in the marina approximately 24 feet from the lake shore. A 3-foot wide by 4-foot deep trench will be excavated using a backhoe. The pipe will be set in the trench and backfilled with native material. The project is located on the West Fork Feather River arm of Lake Oroville at the Lime Saddle Marina.	NOD	
2008089004	Seacliff's Residence San Diego, City of La Jolla--San Diego Coastal Development Permit, Site Development Permit, Variance and Neighborhood Use Permit to amend permits under No. 96-7660 to convert a 225 square foot pavilion and an 81-square-foot storage area into a 306-square-foot guest quarters on an existing single family residence. 2008088018	<p>Timothy & Kathryn Cook, Applicant, Permit & Case No.: ZR-07-02, File No.: APN 104-191-06 & 105-121-01 Humboldt County --Humboldt A Zone Reclassification to Timberland Production Zone (TPZ) of approximately 160 acres currently zoned Unclassified and Agriculture Exclusive with a Special Building Site combining zone specifying a minimum 160 acres. The soil types, i.e. Timber Site Class III, are suitable for timber production and the property is capable of meeting the minimum timber stocking standard. The timber resource base is comprised of pure stands of Douglas fir, hardwood Douglas fir mix; areas of brush species intermixed with Douglas fir, hardwoods and open grasslands also exist. Per the Timber Management Guide, the purpose and intent for the management of the property is to nurture the existing conifer component of the ownership for eventual harvesting of timber.</p>	NOE	
2008088019	<p>Tamarack Fuel Reduction Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe South Lake Tahoe--El Dorado Reduce vegetative fuels such that a high-intensity crown fire is less likely to impact the Gold Coast and Rubicon residential communities.</p>	NOE	
2008088020	<p>Lucia Mar USD O&M Facility Culvert Installation, Agreement No. 2008-0065-R4 Fish & Game #4 Arroyo Grande--San Luis Obispo Installation of a culvert with rock rip-rap protection at the outfall within the north bank of Arroyo Grande Creek. The culvert will discharge storm water runoff conveyed via vegetated swale from the nearby elementary school.</p>	NOE	
2008088021	<p>Tahoe Vista mastication North Tahoe Fire Protection District --Placer This project will masticate approximately 14 acres of brush, dead material, and small trees owned by the Mourelato's Lakeside Resort. The goal is to reduce the fire hazard by removing ladder fuels and breaking the ground fuel continuity. The overstory consists of conifer groups with large openings between - and these openings are dominated by brush or thickets of saplings. No perennial stream within 1000 feet and no seasonal watercourses in project area.</p>	NOE	
2008088022	<p>Natomas Self Storage Use Permit Sacramento County --Sacramento The proposed project consists of an amendment to an existing Use Permit (98-UPP-0432) to legalize recreational vehicle and boat storage within an existing mini-storage facility on 3.7 +/- acres in the TC zone. NOTE: The recreational vehicles and boats will be stored in designated outdoor parking spaces at the southern end of the existing self storage facility. The storage facility was originally built in 2000. No new construction or development is being proposed with the current application.</p>	NOE

2008088023	<p>UPRR Valley Subdivision Bridge 134.99 Replacement Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento --Yuba</p> <p>The purpose of this project is to replace Bridge 134.99 because the existing bridge is structurally deficient due to age, and it does not meet the Union Pacific Railroad Company (UPRR) standard hydraulic design criteria for 50-year and 100-year flood events. The final goal is to build a structure according to UPRR safety standards, with an increased drainage capacity to accommodate 50-year and 100-year flood events.</p>	NOE	
2008088024	<p>Valentine Camp Stream Improvements University of California, Santa Barbara Mammoth Lakes--Mono</p> <p>The University of California, Natural Reserve System's Valentine Reserve is proposing to: (1) remove some instream vegetation and downed trees from a short, small, spring-fed stream to improve flows; (2) repair existing gabions installed approximately 20 years ago to trap sediment; (3) install two new sets of gabions to trap sediment, raise stream level, and inhibit down-cutting of the stream. The stream is quite small and originates on Reserve property and is tributary to a constructed pond, and then to Mammoth Creek. Standard measures (filter-fiber rolls or the like) will be used to prevent downstream sediment transport.</p>	NOE	
2008088025	<p>Siskiyou Co. DPW - Canyon Creek Bridge Replacement Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Siskiyou</p> <p>The project includes replacement of the existing steel truss bridge with a rail car bridge. The existing steel truss bridge rests on deteriorated timber abutments and associated wingwalls. The timber abutments and wingwalls will be removed and new abutments will be constructed in the same location using rock gabion baskets. Concrete caps will be poured on top of the gabion baskets to support the new railcar bridge. Rock slope protection (RSP) will be added around the gabion baskets to protect the new bridge abutments. The new abutments and RSP have been designed so they will not result in any additional areas of permanent impact to the streambank. The project includes installation of a temporary bridge over Canyon Creek approximately 70 feet downstrea of Boulder Creek Road in order to provide a temporary crossing and access to private property.</p>	NOE	
2008088026	<p>Mendocino County Department of Transportation, East Road, M.P. 2.43 Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Mendocino</p> <p>The purpose of the project is to repair erosion caused by the Russian river in a heavy storm event and to prevent future damage. The erosion is undermining a metal beam guardrail (MBGR) and threatening a 30 foot length of road.</p> <p>The project will excavate a 50'L x 8'W x 4'D trench and damaged 24" diameter corrugated metal pipe (CMP) culvert (55 CY). Install a 24" diameter x 60' long high density polyethylene (HDPE) culvert and backfill trench with reclaimed material. Resurface 30'L x 10'W area with 1' thick (11 CY) aggregate base and 0.3' thick (3 CY) AC paving. Place 10'L x 6'W x 1.5'T (3 CY) rip-rap energy dissipator below outfall. Line existing ditch to edge of bluff with 40'L x 5'W x 1'T layer of rip-rap lining (8 CY). Repair MBGR posts. Construction will be confined to the existing footprint.</p>	NOE

2008088027	Issuance of Streambed Alteration Agreement No. R1-08-0124, South Avenue Interchange Improvement Project, Tehama County Fish & Game #1 Corning--Tehama The project will improve the existing South Avenue interchange by reconstructing the northbound ramps, widening and repaving portions of existing roadways, installing new traffic signals and providing additional stormwater detention capacity at the existing interchange.	NOE	
2008088028	Issuance of Streambed Alteration Agreement No. R1-08-0202, Unnamed Tributary to Wiley Flat Gulch, Tributary to Middle Fork Cottonwood Creek, Shasta County Fish & Game #1 --Shasta The project will remove and replace an existing culvert crossing with a new 42-inch by 40-foot corrugated steel pipe. The project will have no significant effect on the environment.	NOE	
2008088029	Issuance of Streambed Alteration Agreement No. R1-08-0088, Eastside Aggregate Mine and Wakeboard Park Fish & Game #1 Redding--Shasta The project proposes the installation and removal of one 40-foot long, 3-foot diameter culvert in Fish Out Creek.	NOE	
2008088030	Dr. Fine Bridge Geotechnical Drilling Caltrans #1 --Del Norte Geotechnical drilling is proposed for the replacement of the Dr. Fine Bridge over the Smith River along Route 101 in Del Norte County. There will be two phases of drilling over the course of approximately two years. Geotechnical investigation will provide information that will assist with bridge type section.	NOE	
2008088031	Storm Damage Repair Caltrans #1 --Humboldt Major storm events during the 2005/2006 winter season caused the deterioration of the shoulder on highway 299 between post miles 21.39 and 21.5, resulting in the undermining of the westbound travel lane. The proposed project would restore the highway to pre storm damage conditions by constructing a tieback wall and rebuilding 200 feet of roadway.	NOE	
2008088032	Storm Damage Repair Caltrans #1 --Humboldt Major storm events during the 2005/2006 winter season caused substantial earth flow, resulting in measurable highway settlement on Route 36 in Humboldt County between post miles 39.4 and 39.56. This settlement cause the highway alignment to shift horizontally and vertically, resulting in a drainage impediment and a reduction in a vehicles vertical site distance. This project would premanently restore the highway repairing and improving highway drainage and site damage.	NOE

	(formerly the Department of Health Services) recycled water regulations contained in Title 22 of the California Code of Regulations. In addition, the proposed project would be subject to conditions imposed by the Regional Water Quality Control Board (RWQCB) pursuant to Water Recycling Requirements (WRRs). Construction activities for installation of the new pipelines, pump stations, and storage tanks (reservoirs) potentially would require open trenching in city streets, jack-and-bore or micro-tunneling under key intersections and creeks, and demolition and grading at reservoir sites.		
2007101132	Highland Fairview Corporate Park: PA07-0088, PA07-0089 (GPA), PA07-0090 (TPM 35629), and PA07-0091 Moreno Valley, City of Moreno Valley--Riverside The project is generally described as a tentative parcel map to subdivide a 158.4 acre portion of land into four separate buildable parcels and two parcels dedicated for freeway improvements, with the first phase to include a plot plan for a 1,820,000 square foot distribution warehouse building (total of 2,620,000 square feet for the entire development) on approximately 85 acres. The project site and relevant offsite areas encompass approximately 265.3 acres. The proposed project site currently lies within the BP (Business Park) and CC (Community Commercial) land use districts and will require a change of zone to LI (Light Industrial) for all proposed industrial warehouse uses and a General Plan Amendment for the elimination of a required multi-use trail over Highway 60 and adjustment of the trail to the north side of future Eucalyptus Avenue as well as the adjustment of parcel lines and land use for two parcels located in the CC land use district. The proposed project is located south of State Route 60, north of Eucalyptus Avenue, east of Redlands Boulevard, and west of Theodore Street.	EIR	09/18/2008
2007111089	Bellwood Condominiums Project Los Angeles, City of Los Angeles, City of--Los Angeles The project site is consists of 26,218 square feet of lot area zoned C2-1VL-O and 47,201 square feet zoned R3-1-O, 112 apartment units, and Bellwood Avenue. The project proposes 158 for-sale flats and townhome units, with a zone change for the project site from C2-1VL-O and R3-1-O to RAS4-1VL. The project also proposes the merger and re-subdivision of the project site, including the vacation of the public street easement for Bellwood Avenue through the project site. As part of the project, a new private street easement will be created pursuant to LAMC § 17.09. The new private street easement will be realigned and wil provide public vehicular and pedestrian access to both ends of Bellwood Avenue.	EIR	09/18/2008
2008061139	Housing Element Focused Rezone Program Santa Barbara County Santa Maria--Santa Barbara The 2003-2008 Housing Element Focused Rezone Program proposes to amend the existing zoning for two sites to accommodate a minimum of 370 units of multifamily housing. Portions of two sites identified in the Orcutt Community Plan as Key Site 3 and 30 can accommodate 372 units of affordable multifamily housing on a combined 18.6 acres. Five sites located in Orcutt and Vandenberg Village/Mission Hills will be analyzed as alternatives. This program is being proposed in order to comply with the California Department of Housing and Community Development (State HCD) requirements to demonstrate the capacity to provide additional affordable housing opportunities and is necessary to maintain certification of the 2003-2008 Housing Element.	EIR	09/18/2008

MND	09/12/2008
2008082022	2008 Annexations, General Plan and Zoning Amendments Rio Dell, City of Rio Dell--Humboldt The proposed project includes two annexations (Sawmill and Blue Slide Road) and five General Plan Amendments or GPAs and Zoning Amendments or ZAs (East Side, Withrow, Timmerman, Waters and Enes), totaling 388.9 acres.	MND	09/03/2008
2008082023	Liberty Hills Planned Unit Development and Subdivision Project Yreka, City of Weed--Siskiyou The project proposes a Conditional Use Permit (CUP) for a Planned Unit Development (PUD) for 5.07 acres and subdivision of 64.27 acres into 16 single family lots on 5.07 acres and one remainder parcel, consisting of 59.2 acres. The project requires a use permit for a PUD to allow for subdivision of property accessed from a private road. The project proposes two private roads, accessed via Greenhorn Road and connection to City water, sewer and stormdrain.	MND	09/03/2008
2008082024	New Susanville Courthouse Administrative Office of the Courts Susanville--Lassen The Administrative Office of the Courts proposes acquisition of parcels, construction of a new 3-courtroom courthouse, and operation of the courthouse for the Superior Court of California, County of Lassen. The new courthouse will replace the court's current 3-courtroom facilities in the County's Historic Courthouse and other facilities. The new courthouse will have approximately 140 parking spaces. The proposed courthouse parcel is adjacent to other commercial buildings, and the site is the former location of the Paul Bunyan lumber processing facility.	MND	09/03/2008
2008082020	Lagunitas Road Bridge Replacement Project Ross, City of Ross--Marin The project site is on Lagunitas Road between Sir Francis Drake Boulevard and Ross Commons Lane in Ross, California. The project consists of replacing a bridge over Corte Madera Creek and improvements to the approach roadway and immediate surroundings on and adjacent to Lagunitas Road. The bridge has been periodically inspected by Caltrans and has been subject to the federal bridge inspections and rating guidelines, which have noted various deficiencies over the years. Corte Madera Creek has also been studied as part of the ongoing flood control efforts in the Ross Valley watershed. The purpose of the project is to replace the approximately 100-year old width, and is eligible for replacement funding through the Federal Highway Bridge Program (HBP). The bridge also contributes to local flooding by acting as an impediment to flow during high water in the creek. Past investigation of the bridge foundation has also determined a susceptibility to liquefaction-induced settlement during a seismic event. To improve the safety of the traveling public and to reduce the potential for localized flooding, the Town of Ross has decided to replace the bridge.	NOP	09/03/2008

2007072075	City of Alameda Transportation Element Update Alameda, City of Alameda--Alameda The City of Alameda is proposing to update the Transportation Element in its General Plan. The Transportation Element Update will affect the entire City of Alameda and will be consistent with the existing goals and policies of the other elements of the City's General Plan.	EIR	09/19/2008		
2008012009	Phase 2 and Future Phase 3 Well Utilization Diablo Water District Oakley--Contra Costa The proposed project involves installation of two wells, Phase 2 and a future Phase 3 (Phase 1 has already been completed and was covered under a separate environmental document). DWD plans to use this additional groundwater to supplement surface water deliveries from Contra Costa Water District. The current Phase 1 well has an annual average pumping of 0.75 mgd, and the Phase 2 and future Phase 3 wells are expected to pump at similar capacities.	EIR	10/03/2008		
2008081015	Carmel Hill and River Class I Bicycle Trail Project Monterey County Transportation Agency Carmel-by-the-Sea--Monterey The proposed project includes a paved Class I bicycle path/trail within California State property from Canyon Drive to Rio Road, following an existing fire road /sewer utility easement for approximately 1.7 miles. The trail would consist of a 12-foot wide paved path with a 2-foot shoulder on one side of the trail and a 4-foot shoulder on the opposite side. The project includes a grade-separated undercrossing at Carmel Valley Road. The bicycle trail would include storm water drainage features, such as rock slope protection, culverts and manholes, energy dissipaters, and rock-lined ditches. Lighting is only proposed above the trail within the grade-separated pedestrian undercrossing of Carmel Valley Road. The project also proposes tree removal and replanting/relocation, as well as planting locally native, drought resistant, non-invasive plants.	MND	09/04/2008		
2008081016	College of the Desert, Interim Campus - East Valley Desert Community College District --Riverside College of the Desert proposes to develop an interim campus facility on 5.3 +/- acres owned by the Desert Community College District. 2008082026	<p>Smith Tentative Map P-08-06 Trinity County --Trinity Tentative Map to create 6 residential lots and a large remainder parcel from 103.5 acres. The Trinity River runs through the middle of the project. Access is from Hwy 299 and Red Hill Road. Homesite development is proposed for the Rural Residential 2.5 and 5-acre minimum areas. The remainder is Open Space and Flood Hazard.</p>	MND	09/04/2008
2006102012	<p>Bonavita Estates Merger Resubdivision Lake County --Lake This project is a substantial redesign from a previously submitted planned development proposing 22 residential lots and a ten acre ski lake. The current proposal is for a merger of two lots to allow for the subdivision of the new 534 acre parcel into 5 parcels (Parcel 1 = 5 acres, Parcel 2 = 5 acres, Parcel 3 = 51.2 acres, Parcel 4 = 83.3 acres, Parcel 5 = 389.9 acres). The proposal also includes a major use permit to construct an 11 acre water-ski lake and a deviation from road standards to allow for a road that exceeds 1000 ft in length. The site is currently used for grazing land and is relatively flat. The project proposes water from onsite wells and private septic systems. The lake is proposed to be filled by groundwater. The project also proposes up to six (6) special events at the ski lake per year. A portion of the property is in a flood zone and Long Valley Creek, a tributary to Putah Creek, crosses the property. The majority of the property contains serpentine soil. The project proposes avoidance of wetland features onsite for construction of the pond and road improvements, with soil excavated for the pond to be redistributed onsite with no exportation of fill proposed.</p>	Neg	09/04/2008

1985101602	Sweetwater Reservoir Recreation Master Plan-Shoreline Fishing Program Draft Supplemental EIR San Diego County Chula Vista--San Diego The Sweetwater Reservoir Recreation Master Plan Shoreline Fishing Program provides public access and recreation along 2.5 miles (at high water) of the southwestern shoreline of the reservoir. The following component activities were included in the project: widening of the existing on-site maintenance road; improvement of existing trails; construction of a 150-space parking lot on San Miguel Point; installation of water lines, irrigation, native landscaping, and portable restrooms.	NOD	
2002112068	Caldecott Improvement Project Caltrans #4 Oakland, Orinda--Alameda, Contra Costa The California Department of Transportation (Caltrans) proposes to permanently impact a riparian corridor as part of the State Route 24 Caldecott Tunnel Fourth Bore transportation project. Approximately 450 square feet of riparian vegetation will be permanently impacted by the new tunnel. As part of the Streambed Alteration Agreement being issued by the Department of Fish and Game (DFG) Caltrans shall mitigate for the riparian impacts by implementing a riparian mitigation, monitoring, and reporting program to be submitted to DFG prior to riparian impacts which are expected to occur in June of 2009.	NOD	
2005011070	Cook's Reservoir Replacement Project San Juan Capistrano, City of San Juan Capistrano--Orange The proposed project will consist of the construction of a 1.34 MG reservoir, which will replace the existing 0.3 MG reservoir. The proposed tank, as decided by City Staff, will be rectangular in shape and constructed of cast-in-place reinforced concrete.	NOD	
2005122006	Marketplace Redevelopment Project Emeryville, City of Emeryville--Alameda The project involves a phased mixed-use development on the 15-acre project site that will be substantially redeveloped to replace surface level parking; realign Shellmount Street directly in front of the Marketplace Tower and Public Market buildings; add two new street segments with on-street parking (62nd and 63rd Streets); add nine new buildings within the site; and enlarge and redesign Christie Avenue Park. The construction of the nine proposed buildings will accommodate 674 multi-family residential units, 180,000 square feet of retail, 120,000 square feet of office, and parking garages to serve these uses and existing uses on the site. The decisions included: second reading of an Ordinance Approving a Planned Unit Development - Mixed Use Zoning Designation for the Marketplace Redevelopment Area and A Preliminary Development Plan.	NOD	
2007061095	City College Facilities Master Plan San Diego Community College District San Diego--San Diego Implement the Facilities Master Plan for City College. The plan includes the acquisition of two blocks south of the campus in the area bounded by C Street on the north, Broadway on the south, 15th Street on the west and 17th Street on the east.	NOD

2008012100	Rancho Murieta Recreation Area Tree Management Plan Sacramento County --Sacramento SAA #1600-2007-0303-R2 The California Department of Transportation (Caltrans), Division of Aeronautics, is enforcing State Airport operating regulations that rely on Federal Aviation Regulations (FARs) which govern the allowable height of objects near airports. Specifically, the County has been directed to address potential obstructions within the County owned Recreation Area under the surfaces defined by Part 77 of the Code of Federal Regulations (FAR Part 77) near the Airport.	NOD	
2008042069	PL 84-99 Levee Rehabilitation Project - RD 765 Central Valley Flood Protection Board Rio Vista--Yolo, Solano The Applicant proposes to repair approximately 5 erosion sites, along an intermittent 1,015 linear feet reach, on the west bank of the Sacramento River near West Sacramento, in Reclamation District 765. The eroded waterside levee slope will be excavated in steps at least 0.5 feet beyond the damaged surface. The slope will be reconstructed with compacted impervious fill and covered with a 6-inch layer of bedding material. Rock riprap will be restored to the height and thickness of the adjacent undamaged area. All construction activities will occur on the upper levee slope and small vegetation along the waterline and lower levee slope will be avoided. Large trees, greater than 4 inches diameter at breast height (DBH), along the water line and levee slope will be protected in place. Willow pole cuttings will be planted along the water's edge at sites that currently do not have shrubs along the waterline. All trees that provide Shaded Riverine Aquatic (SRA) habitat will be protected in place. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2008-0261-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Tirath Pal Sandhu, California Department of Water Resources.	NOD	
2008042070	PL 84-99 Levee Rehabilitation Project - RD 150 Central Valley Flood Protection Board Rio Vista--Yolo, Solano The Applicant proposes to repair approximately 17 sites along the Sacramento River on Merritt Island. For sites 010,013,014,015,018, and 019, repairs consist of clearing the levee of vegetation and excavating in steps the eroded levee slope at least 0.5 foot beyond the damaged surface. The waterside levee slope will be reconstructed to 3(H):1(V) slope. The levee slope will be reconstructed to pre-flood conditions with impervious fill. The existing rock protection will be removed, stockpiled, and reused. Lost rock protection will be restored to the thickness and	NOD

2008052090	<p>height of the adjacent undamaged areas. For sites 002-008, 011,012,016, and 017, the repairs consist of reconstruction of the levee toe with compacted impervious fill and restoration of the lost rock protection to the height and thickness of adjacent undamaged areas. The levee slope will be cleaned and grubbed at least 10 feet above the eroded area. All trees that provide Shaded Riverine Aquatic (SRA) habitat will be protected in place. Trees greater than 4-inches diameter at breast height (DBH) will be protected in place. Willow pole cuttings and button brush will be planted along the toe of the levee slopes. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2008-0258-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Tirath Pal Sandhu, California Department of Water Resources.</p> <p>Public Law 84-99 Levee Rehabilitation Project - RD 536 Central Valley Flood Protection Board Rio Vista--Solano, Yolo</p> <p>The Applicant proposes to repair approximately 12 erosion sites, along a 4-mile section of Lindsey Slough, on the watershed toe of the levee upstream of the Lindsey-Cache Slough confluence. All areas will be cleared and grubbed to a depth of 3 feet below the existing ground surface. After the material has been removed, 18-inch minus rock will be placed where needed by pushing into place from the crest. Four-inch minus rock will be broadcast on top to fill interstitial voids. Orange fencing will be placed in the water 1-foot away from the levee toe to protect in-water vegetation located 1-foot or more away from construction. All trees that provide Shaded Riverine Aquatic (SRA) habitat will be protected in place. Trees greater than 4 inches diameter at breast height (DBH) will be protected in place. Willow pole cuttings and button brush will be planted along the two of the levee slopes. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2008-0259-3 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Tirath Pal Sandhu, California Department of Water Resources.</p>	NOD	
2008052091	<p>Public Law 84-99 Levee Rehabilitation Project - RD 2098 Central Valley Flood Protection Board Rio Vista--Solano, Yolo</p> <p>The Applicant proposes to repair approximately 22 erosion sites, for a total of 6,384 linear feet, along Cache Slough and Shag Slough/Yolo Bypass. Erosion repair sites will be excavated at least 6 inches beyond the damaged area on the levee slope. The slope will then be backfilled with select fill to a 3:1 (H:V) slope, or to a safe slope that matches adjacent slopes, to a distance of 2.5 feet below the projected levee surface. 24-inch riprap will be placed at the levee toe to a height of 1-foot above the design water elevation and will extend into the water to meet the projected levee slope. Surface voids in the riprap shall be filled by casting 4-inch minus-clean infill rock onto the newly repaired sites. The newly finished levee slopes will be covered in topsoil and hydroseeded per project specifications. A mix of tule and bulrush will be planted to replace the moved in water vegetation. All trees that provide Shaded Riverine Aquatic (SRA) habitat will be protected in place. Trees greater than 4 inches diameter at breast height (DBH) will be protected in place. Willow pole cuttings and button brush will be planted along the toe of the levee slopes. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2008-0260-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Tirath Pal Sandhu, California Department of Water Resources.</p>	NOD

2008088058	Issuance of Lake of Streambed Alteration Agreement No. R1-08-0158, Francis Creek Vegetation Management Project, Humboldt County Fish & Game #1 --Humboldt Remove vegetation less than 4-inch diameter at breast height along 108 miles of the Francis Creek stream channel.	NOE	
2008088059	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0140, Alderpoint Road post mile 10.0, 2005-2006 Storm Damage Repair Project, Humboldt County Fish & Game #1 --Humboldt Replace an existing 24-inch diameter culvert with a 48-inch diameter, 135 feet long high-density polyethylene pipe, and place approximately 50 cubic yards of rock armor at the culvert outlet.	NOE	
2008088060	Olema Creek Sediment Reduction Project State Water Resources Control Board --Marin The proposed Project reroutes a multipurpose recreational trail to avoid wetlands and constructs a new creek crossing bridge that will be suitable for equestrian use. The Project involves rerouting approximately 1,500 linear feet of the existing Randall Spur Trail and creek crossing bridge in open space located in the Point Reyes National Seashore. The Randall Spur Trail bisects Olema Creek and soil from the trail is entering the creek during heavy rain events. Equestrian use of the trail causes disturbance of the creek bottom and reduces water clarity. The purposes of the Project are to reduce soil erosion from the existing trail, improve the Olema Creek crossing, and improve fish spawning potential for salmonid species. In addition, the planning and design elements of the Rift Zone Trail pose no environmental impacts and are included in this Notice of Exemption.	NOE	
2008088061	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0139, Alderpoint Road 45.64; 2005-2006 Storm Damage Repair Project, Humboldt County Fish & Game #1 --Humboldt Work will consist of stabilizing a hillslope failure (approximately 145-feet long, 24-feet wide, and 12-feet deep), relaying a 24-inch diameter plastic culvert pipe, and placing a rock energy dissipater.	NOE	
2008088062	City of San Clemente Grade Crossing Improvements San Clemente, City of San Clemente--Orange The proposed project consists of safety and quiet zone improvements, including: improved signage, striping, raised markers, pedestrian gets and/or fencing, ballard replacements, security gate installation, and installation of a pre signal. The proposed project is not anticipated to require right-of-way acquisition.	NOE	
2008088063	Culvert Repair near Moccasin Caltrans #10 --Tuolumne The California Department of Transportation (Caltrans) proposes a maintenance project to repair a 54-inch diameter corrugated pipe (CMP) culvert on State Route 49 at post mile 5.2 east of the town of Moccasin in Tuolumne County. The scope of work would include filling any voids at the invert (bottom) of the existing rusted-out culvert with concrete. The purpose of the project is to improve drainage	NOE

2008088069	Deer Creek Restoration Project Fish & Game #5 --Solano The applicant intends to alter the streambed by creating a new channel that will simulate the pre-2005 flows of the streambed. The 2005 floods, coupled with increased sediment load from a previous fire caused the migration of the low flow channel. The existing channel has eroded the pasture area of the ranch and has remained as a present condition. The applicant will cross the existing channel and create a new secondary channel (10 feet in width and 600 feet in length) and create a small diversion to push flows in to this new channel. The diversion will consist of large boulders or rocks and will be installed at an angle to guide the water into the new channel. This project will prevent future erosion of the banks at the pasture area. This newly created channel will then meet the existing channel 600 feet downstream of the diversion point. The existing low flow channel will not be altered and the established vegetation within the channel shall remain intact. Work will be conducted outside of the bird nesting season and work shall not commence before September 15th. Work will mainly consist of the use of a small bobcat that will remove the dense fire-related sediment to create the new channel. A few minor stands of non-native vegetation will be removed in the creation of the new channel. The applicant will also remove a few large pieces of broken concrete upstream of the project area. SAA# 1500-2008-0145-R5	NOE	
2008088070	Conduct Well Tests Parks and Recreation, Department of --Mendocino Conduct flow tests on two existing well holes to determine if the wells produce enough water to be used as new reliable water sources at Mendocino Woodlands State Park. Clean both wells for test pumping by swabbing the inside of each well casing to remove sediment and by removing excess water in the well from the initial drilling and pumping process. Pump wells for a constant twenty-four hour period using electrical pumps installed in the well holes and power generators with noise-reducing features. Each well could produce up to 600 gallons of water per hour during the test. Convey any water that is produced through a hose, series of irrigation valves, and a sprinkler system so that the water is sprinkled in a uniform pattern across the forest floor. Collect test samples of the water for analysis by a certified laboratory. Best Management Practices will be used during well testing activities to control any sediment runoff. Remove and dispose of any sediment and debris produced by well testing off site at an approved disposal facility. Access well sites by existing park roads and sprinkler sites on foot. Re-cap well holes when work is completed at each site.	NOE

2006041096	Yucaipa Freeway Corridor Specific Plan Yucaipa, City of Yucaipa--San Bernardino The Yucaipa Freeway Corridor Specific Plan is a land use, policy and regulatory document to guide the development of the 1,241.5-acre Yucaipa Freeway Corridor Specific Plan area in the City of Yucaipa. Designated land uses in the Specific Plan include Residential, Regional Commercial, Business Park, Public Facilities and Open Space.	EIR	09/22/2008
2006112097	Rocklin Crossings Project Rocklin, City of Rocklin--Placer NOTE: Partial Recirculated Draft EIR The Rocklin Crossings project (proposed project) includes the construction of a regional shopping center on approximately 55.1 acres at the southeast corner of Interstate-80 and Sierra College Boulevard. The property is proposed to be subdivided into 18 parcels. A variety of retail uses are proposed for the center, including major tenants (expected to be a Wal-Mart Supercenter and a Home Depot), smaller retail tenants and restaurants. Other traveler-serving uses could also be developed within the project site. Preliminary plans call for approximately 21 buildings totaling a maximum of 543,500 square feet with approximately 2,463 parking stalls.	EIR	09/22/2008
2006041080	Vasquez Rocks Natural Area Park Interpretive Center Los Angeles County --Los Angeles NOTE: Revised copy of Volume III of the Final EIR. The proposed project would consist of a single-story, 2,700-square foot interpretive center that would include a multipurpose exhibit room with interpretive displays, classroom, office space for staff, new restrooms, custodial room, and storage room. An entry plaza, would serve as the main entryway to the Interpretive Center connecting it to the parking lot. The Interpretive Center would be supported by septic tanks since municipal sewer service is not available at this location. A 30,000-square-foot surface parking lot, consisting of 43 parking spaces (35 visitor, 5 staff, and 3 handicap access) and a bus drop-off area accommodating two visitor buses would be included. The proposed project would include indigenous plants to be used as landscape screening and a low-flow irrigation system, which would help limit the use of potable water for landscape irrigation. Other components including the existing outdoor lecture benches, rescued animal enclosures, and storage and trash containers would be relocated on the proposed project site. Utility lines supporting the proposed project would be located underground. A water storage tank would also be located in the proposed project site for the fire suppression system.	FIN	
2006081126	Tulare Protein Harvesting and Processing Plant Tulare, City of Tulare--Tulare The project includes a 90-acre zoning change from Public Lands (PL) to Heavy Industrial (M-2), a General Plan Amendment changing the 90-acre's land use designation from Public to Heavy Industrial, issuance of a conditional use permit, approval of a parcel map separating the 90-acre section of land from 163-acre parcel and the 70-acre project site from the 20-acre residual parcel, and	FIN

	construction and operation of a beef harvesting and processing plant on the 70-acre site currently in agricultural production (cotton). The residual 20 acres of land to the east of the beef harvesting and processing site will be used for storm drainage purposes and will be zoned for future industrial development.		
2007081071	VEN/SB 101 HOV Project Caltrans #7 Carpinteria--Santa Barbara, Ventura NOTE: Joint Document consists of MND and EA	JD	09/22/2008
	The State of California Department of Transportation is proposing to construct a High Occupancy Vehicle Lane in each direction of the U.S. 101 within the existing median between the Mobil Pier Undercrossing (PM 39.8) in Ventura County and Casitas Pass Road (PM 2.2) in Santa Barbara County. Proposed project features include: Intelligent Transportation Systems, improvement of median barriers and closure of median openings. The length of the proposed project is six miles and would provide six lanes, three northbound lanes and three southbound lanes through the communities of Mussel Shoals, La Conchita, and Rincon in Ventura County and the City of Carpinteria in Santa Barbara County.		
2008081019	Cherry Avenue Four-Lane Project Caltrans #6 --Kern NOTE: Joint Document consists of MND and EA	JD	09/05/2008
	The California Department of Transportation (Caltrans) proposes two alternatives to widen a portion of State Route 119 from the existing two-lane highway to a four-lane highway in Kern County. The first alternative proposes to widen 7.3 miles of State Route 119 from 0.26 mile west of Cherry Avenue (post mile 6.0) to Tupman Road (post mile R13.3). This alternative would widen the existing highway through the communities of Valley Acres and Dustin Acres (from post miles 6.26 to R9.1). The second alternative proposes a four-lane expressway for 7.8 miles from 0.75 mile west of Cherry Avenue (post mile 5.5) to Tupman Road (post mile R13.3). This alternative proposes a southern bypass around the communities of Valley Acres and Dustin Acres.		
2008081020	State Route 99 Tulare to Goshen Six-Lane Project Caltrans #6 Tulare--Tulare NOTE: Joint Document consists of Neg. Dec., EA, and FONSI	JD	09/05/2008
	The California Department of Transportation proposes to widen State Route 99 from four to six lanes between Prosperity Avenue in the City of Tulare, and the North Goshen Overhead within the community of Goshen. Various structures would be widened, modified or replaced to accommodate a six-lane freeway. Three soundwalls, four infiltration basins, and the construction of a frontage road are proposed.

	The upgrade will provide an air quality benefit by reducing nitrogen oxide emissions. The upgrade also improves the cogeneration plant efficiency, resulting in lower consumption of natural gas per megawatt-hour. The upgrade makes changes to the engine, the turbine housing internal package, controls systems, and adds a small water injection skid to improve engine efficiency by increasing the mass flow rate in the turbine.		
1996082016	Tuolumne County General Plan Update Tuolumne County Rezone an 11.6+/- acre parcel from A-10 (General Agricultural, Ten Acre Minimum) under Title 17 of the Tuolumne County Ordinance Code as follows: RE-2 (Residential Estate, Two Acre Minimum 8.6+/- acres O (Open Space) 3.0+/- acres	NOD	
2004051053	Whittaker-Bermite Facility Operable Unit 1, Remedial Action Plan Toxic Substances Control, Department of Santa Clarita--Los Angeles The State of California Department of Fish and Game is entering into a Lake and Streambed Alteration Agreement (SAA #1600-2008-0154-R5) pursuant to Section 1602 of the Fish and Game Code with Whittaker Corporation. The applicant proposes to alter the streambed to remove contaminated soils from the Whittaker Bermite facility (Site) in Operable Unit 1 (OU1). OU1B-Drainage bottom from the Area 55 operations pad. Approximately 2,070 cubic yards of materials will be removed from the channel at a depth of about 15 feet. The soils will be cleaned and replaced. The site will be re-graded to pre-existing conditions and reseeded with native seed mix. OU1C-Drainage bottom from the toe of Golden Valley Road. Approximately 1,680 cubic yards of materials will be removed from the channel at a depth of about 15 feet. The soils will be cleaned and replaced. The site will be regarded to pre-existing conditions and reseeded with native seed mix.	NOD	
2006012099	Kelseyville Wastewater Treatment System Upgrade Lake County --Lake The purpose of the project is to bring the Kelseyville Wastewater Treatment Plant (KWWTP) into compliance with wastewater discharge requirements, as required by the Central Valley Regional Valley Water Board's Cease and Desist Order, by improving hydraulic, treatment and storage capacity and upgrading the treatment process. Upgrading the KWWTP includes: (1) upgrading the existing effluent pump station to increase capacity to 0.79 million gallons per day; (2) replacing the existing facultative treatment system with a Rich-Lagoon treatment system; (3) converting a portion of the existing ponds into interim effluent storage reservoirs; and (4) installing effluent pipeline.	NOD	
2006031027	Arsenic Removal Project Home Garden Community Services District Hanford--Kings The proposed project includes construction and operation of an arsenic water treatment facility and a 4,000 ft. 12-inch pipe to connect the Margo Lane Site with the Office Site. This project will direct water from the well at Margo Lane to the Office well site, where all the water will be treated to reduce arsenic before being distributed to the District's service area. Ordance for Zone Change 05RZ-132 to rezone a 211.+/- acre site from AE-37 (Exclusive Agricultural, thirty-seven acre minimum) to AE-37:AP (Exclusive Agricultural, thirty-seven acre minimum:Agricultural Presere Combining) under Title 17 of the Tuolumne County Ordinance Code. 2. Appliction 05WA-122 to rescind the existing Williamson Act land conservation contract on the 211.1+/- acre site pursuant to Resolution 122-70 and to execute a new Williamson Act land conservation contract pursuant to Resolution 106-04, including approval of the agricultural management plan.	NOE	
2008088089	Pacific Gas & Electric Company's Gas Line 119B Project, Sacramento, California Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento --Sacramento Pacific Gas and Electric Company (PG&E) proposes to prepare Gas Line 119 for internal inspection in keeping with pipeline safety requirements. These preparations include excavation and modification of the pipeline to allow passage of internal inspection equipment. PG&E will use a backbone to expose the existing pipeline with an excavation measuring approximately 5 by 8 feet and replace the current "T" fitting with an "elbow fitting". The excavated materials will be stockpiled outside of the wetland or riparian areas. The total area of wetland disturbance is expected to be 20 by 20 feet. The top six inches of soil will be removed from the excavation site, and segregated. Following construction, the excavated soil would be backfilled and compacted in place. The top soil would be replaced from where it was excavated, and stabilized with erosion control measures such as fiber rolls or	NOE

2008088090	<p>jut netting. The project should be completed in three to five work days.</p> <p>Hemet High School Stormwater Detention Basin - Minor Alterations Project Hemet Unified School District Hemet--Riverside</p> <p>The Hemet Unified School District is proposing connection of a temporary stormwater retention basin to a newly installed storm drain (County project). The retention basin would subsequently be filled and used as a soccer field. The District's recent stadium project included a soccer field area designed to provide interim flood control until the County extended storm drain facilities to the project area. In cooperation with the Riverside County Flood Control District, an oversized storm drain was installed in Stetson Avenue, between Dartmouth Street and Stanford Street, concurrently with the stadium project's construction and was "capped" until the completion of lower lines west of Dartmouth Street were available for connection. The project's drainage plan is discussed in the Hemet High School Stadium EIR, dated July 2004.</p> <p>Connection of the detention basin to the county's master storm-drain system would provide improved flood control and would be of benefit to the community of East Hemet. In addition, filling and developing the detention basin as a soccer field would provide additional recreational facilities to the students of Hemet High School and the community.</p>	NOE

2007121022	<p>Edgemoor Facility Demolition San Diego County Santee--San Diego</p> <p>The Edgemoor Facility Demolition project proposes the demolition and removal of 26 historical buildings within the City of Santee. There are 27 total structures on the site, and all on-site structures are treated as historical resources due to their contribution to the overall context of the site. The 26 buildings proposed for demolition are currently associated with the Edgemoor Geriatric Hospital, which is owned and operated by the County of San Diego, as well as other buildings that surround the hospital. Since their construction (ranging from 1913 to 1961), most of the buildings have been in continual use. Five of the buildings have been vacant since the early 1980s. Two of the buildings are used by the Santee Food Bank and the Salvation Army on an interim basis unrelated to the hospital operations. One building, the Polo Barn, will be retained on site since it is listed in both the National Register of Historical Places and the California Register of Historical Resources. No development is proposed as part of the project.</p>	EIR	09/22/2008

2008021073	<p>City of Beverly Hills General Plan Update EIR Beverly Hills, City of Beverly Hills--Los Angeles</p> <p>The proposed General Plan Update is a comprehensive update of the current General Plan. Elements of the existing General Plan have been re-organized by thematic topic. The updated City of Beverly Hills General Plan is organized into the following chapters; Community Conservation and Development which includes three elements, Infrastructure and Public Services which includes six elements, and Community Safety which includes six elements. The primary focus of the GPU is on development of policies and limited land use revisions. The GPU conserves the existing pattern of uses and establishes policies for protection and long-term maintenance of established neighborhoods. Proposed changes in land use or intensity of land use focus exclusively on the City's commercial corridors and commercial districts.</p>	EIR	09/22/2008
2006081138	<p>Atwater-Merced Expressway Merced County Association of Governments Atwater, Merced--Merced</p> <p>The Atwater-Merced Expressway (AME) is a proposed 7-mile-long expressway located in the northeast portion of Merced County. The AME would provide motor-vehicle travel between State Route (SR) 59 at Bellevue Road and SR 140 at Gurr Road providing an alternative route to existing SR 59 which travels through downtown Merced.</p> <p>The AME project would be a new four-lane divided access-controlled expressway with limited cloverleaf style interchanges with major roadways (SR 99 and Santa Fe Drive) and signal-controlled intersections with local roads. The project would include the realignment of some existing roads, including a portion of SR 99, and the extension of some local roads to connect with the new expressway.</p>	FIN

The Griffith Park Campus contains the Museum of the American West and the Institute for the Study of the American West. The proposed project would be implemented in two phases over an estimated six year period (anticipated to end in 2014) the key features of which are as follows: Phase 1: Expansion of the existing Campus Building by 79,000 sq. ft. to provide new and reconfigured galleries, exhibition and collection storage areas and education classrooms, and a new community room; rearrangement of the surface parking facilities; and pedestrian access and landscape improvements. Phase 2: construction of a 50,000 sq. ft. Institute Building that would contain a reading room, collection storage rooms, and staff offices; and construction of a semi-subterranean parking facility beneath the Institute Building. The parking improvements in both phases would result in a total of 476 spaces being available for visitors and staff.</p>	FIN

2008081023	Safe Drinking Water Project Pixley Public Utility District --Tulare The project proposes to construct and operate replacement wells for Well No. 1, 2A, and 3A including plans for possible treatment if arsenic levels are above the Environmental Protection Agency's standard of 10 parts per billion. The wells would be placed at three of 18 identified locations near the community of Pixley, in Tulare County.	MND	09/08/2008
2008081024	Aliso Creek Runoff Recovery, Reuse, and Conservation Project South Coast Water District Laguna Beach--Orange South Coast Water District proposes to capture and reuse approximately 800,000 gallons per day (gpd) of urban runoff in Aliso Creek in Laguna Beach, California. The recovered urban runoff collected by the Project will be treated and reused by combining the water with recycled water produced at the Advanced Wastewater Treatment (AWT) System at the Coastal Treatment Plant. There will be an improvement to the water quality of the combined supply, making the AWT recycled water lower in salinity as well as increasing the overall recycled water supply for South Laguna, Dana Point, and Capistrano Beach. Downstream improvements in water quality are expected at Aliso Beach County Park because a portion of the urban runoff will be removed from Aliso Creek and constituents removed from the runoff water will be discharged in the Coastal Treatment Plant outfall. Removal of a portion of the urban runoff will also help to reduce excessive stream flow from urbanized areas and return stream flows in lower Aliso Creek to more natural levels.	MND	09/08/2008
2008082032	East Fork Road Bridge Replacement at Clear Creek Shasta County --Shasta Shasta County proposes to replace an existing one-lane bridge (100 feet by 14 feet) by constructing a new bridge immediately upstream from the existing bridge. The roadway approaching from the west will require about 100 feet of realignment. The roadway approaching from the east will require approximately 600 feet of realignment. The existing bridge will remain open to traffic during construction.	MND	09/08/2008
2008082033	Buzzard Roost Road Bridge Replacement at Cedar Creek Shasta County --Shasta Shasta County proposes to replace an existing one-lane bridge (50' long x 11' wide) by constructing an new single-span 70-foot long by 28-foot wide bridge, on a new alignment approximately 140 downstream from the existing bridge. The new alignment will be 20 feet wide with five foot shoulders. The existing bridge will remain open to traffic during construction.	MND	09/08/2008
2008082034	Kings Beach Water Quality and Stream Environment Zone Improvement Project Placer County --Placer The Project proposes to improve the quality of stormwater discharging into Lake Tahoe from the Kings Beach community by stabilizing exposed soils with vegetation and/or mulch; improving the existing drainage system with new curbs, gutters, earthen berms and underground pipes, and treating runoff with a variety of methods including fill removal, sediment traps and vaults, swales, infiltration and/or detention basins, and media filters. In addition, the Project proposes to	MND	09/08/2008

	improve fish passage and habitat in Griff Creek by replacing culverts, constructing in-channel habitat features, excavating portions of channel, constructing new channel, and installing rock channel bed stabilization (grade control) structures.		
2008082035	Parcel Map 07-042 (Hansen) Shasta County --Shasta The proposed project involves a two-parcel land division consisting of a 5.01-acre parcel and a 5.02 acre remainder parcel. Access to proposed Parcel A would be from Deschutes Road, a County-maintained roadway. Access to the remainder parcel would be through a road easement through Parcel A. Water will be provided by an individual well on each parcel. On-site septic tank/leach field systems will be used to dispose of sewage.	MND	09/08/2008
2008082038	Capital Center Lot 64 Rancho Cordova, City of Rancho Cordova--Sacramento The project applicant has requested design review for a 74,436 square foot, two-story concrete tilt-up office building on a 6.26 acre site. The project site would include approximately 404 parking spaces.	MND	09/08/2008
2008082039	Embassy Suites and Candlewood Suites Rancho Cordova, City of Rancho Cordova--Sacramento The project applicant has requested design review and a special review of parking. The design review is for two hotels on a 5.885 acre site. The special review of parking is to allow a reduction in the amount of parking from the number of spaces required by the City's Zoning Code. The proposed Embassy Suites hotel would be eight stories in height, contain 217 guest rooms, and include approximately 194,849 square feet of floor area. The proposed Embassy Suites would also include a restaurant and numerous meeting rooms. The proposed Candlewood Suites would be four stories in height, contain 112 guest rooms, and include approximately 58,570 square feet of floor area. The project site would contain 330 parking spaces, 59 of which would be in an underground parking garage located beneath the proposed Embassy Suites. The proposed project would also include an underground stormwater storage facility designed to hold approximately 244,899 cubic feet of water during large storm events.	MND	09/08/2008
2008082040	Proposition 50: Tuscan Aquifer Monitoring, Recharge, and Data Management Project Butte County --Butte This is a field research and data analysis project to improve current knowledge regarding recharge and recovery of the Tuscan Aquifer in Butte County.	MND	09/08/2008

	particular, the proposed Project would provide a new crossfield taxiway, identified as Taxiway C13, and an associated connection to, and extension of, the existing Taxiway D. In addition, a new parallel service road would be built.		
2008081022	Clean Energy Compressed Natural Gas Fueling Facility Glendale, City of Glendale--Los Angeles The City of Glendale and Clean Energy have formed a partnership to build a CNG fueling facility within the City of Glendale.	Neg	09/08/2008
2008082037	Tract Map 1948 and Use Permit 06-030 - Sean and Nichola Batten Revocable Trust Shasta County Redding--Shasta The request is for a two-phase light-industrial condominium development. The development would include seven airspace condominium units. The units would be within the existing building, of which there are three, or would be developed within four proposed future buildings. Two existing buildings measure 6,000 square feet each; the third existing building measures 7,200 square feet. One of the four proposed future buildings would measure 6,000 square feet with other the three remaining buildings being 7,200 square feet. Each building would have an adjacent outdoor storage area. Uses to be conducted within the buildings would be those that are permitted in the M-L-ASP zoning district. Each building would be served by an individual on-site septic system. An existing well would serve the existing buildings (Phase I) and one future building, provided the number of persons served by the well does not exceed 25. A proposed second well would serve three of the four future buildings (Phase II). Should either the existing or proposed wells serve greater than 25 persons, a small non-transient water system would have to be developed for the site. Parking and landscaping improvements would be made incrementally in a manner that meets requirements applicable to the development of each building or phase. Road and encroachment improvements including paving of the road shoulder, curb, gutter, and sidewalk would be constructed prior to recording the final map. A fire suppression system that meets standards for commercial projects without a centralized water system would also be constructed prior to recording the final map.	Neg	09/08/2008
2007092024	Klein Foods, Inc; Cooley Ranch Water Rights Applications 31304, 31362, and 31363 State Water Resources Control Board Cloverdale--Sonoma The project is approval of Water Rights Applications 31304, 31362, and 31363, which involves diversion and use of 226 acre-feet of water per year for the purposes of irrigation and recreation. Major project features include development of four onstream reservoirs, one offstream reservoir, six offset wells, and 280 acres of vineyard. The project will also include construction of access roads, pipelines, culverts, and development of other agricultural appurtenances. Additional detail is provided in the Initial Study for this project.	NOD	
2007101085	1296-3 Reservoir Otay Water District --San Diego In compliance with the OWD's Water Resources Master Plan, the proposed project is the construction of a 2.0 million gallon reservoir in the 1296 Pressure Zone. The proposed project will reduce an existing and projected water deficiency	NOD

<u>Documents Received on Friday, August 08, 2008</u>			
	and add storage capacity to the Pressure Zone. The design of reservoir will be similar to the existing 1296-1 and 1296-2 Reservoirs.		
2007101087	CIP P2009: Jamacha Road 36-inch Potable Water Pipeline and CIP P2038: 12-inch Potable Water Pipeline Replacement Otay Water District El Cajon--San Diego As outlined in the original IS/MND, CIP P2009 consists of the proposed construction of a 36-inch cement mortar lined and coated steel pipeline to transfer potable water from the San Diego County Water Authority's Otay Flor Control Facility No. 14 to the OWD Regulatory Site. CIP P2009 is approximately five miles in length and would start at the northwest corner of Lexington Avenue and Third Street in the City of El Cajon and terminate at the OWD 640-1 and 640-2 reservoirs, located at the OWD Regulatory Site at 11880 Campo Road in Rancho San Diego.	NOD	
2008011046	Target Store Redevelopment Project Azusa Redevelopment Agency Azusa--Los Angeles The proposed project would develop an approximately 168,000-square-foot Target retail store, including 420 parking spaces. The proposed project would reach two stories in height. The Target sign tower, located above the main store entrance, would reach approximately 69 feet in height. Parking spaces and a receiving and loading dock would be located at-grade beneath the main sales and storage floor located on the second level. Additional angled parking spaces would be provided by the City and located adjacent to the project site, along San Gabriel Avenue. Vehicles would access the at-grade parking area from 9th Street, Azusa Avenue, and San Gabriel Avenue. Trucks would access the receiving and loading dock by entering on San Gabriel Avenue and exiting on Azusa Avenue. Several mature Coast Live Oak trees located on the east side of San Gabriel Avenue would be protected in place or removed and replaced per City ordinance. The proposed project would require an overlay zone, which would allow for additional building height, reduced parking stall size, and building articulation. Approximately 47,646 square feet of existing commercial and industrial buildings on the project site would be demolished with the construction of the proposed project.	NOD	
2008088088	ASR Wells 4-82 and 4-83 Health Services, Department of Lancaster--Los Angeles Wells 4-82 and 4-83 will be drilled to replace wells 4-06 and 4-09 and will be located at the same site (419 W. Avenue J).	NOE	
2008088092	Alderpoint Forest Fire Station - Potable Water Project Forestry and Fire Protection, Department of --Humboldt The proposed project will involve installing a new 20,000 gallon water tank on state property. A deeper well will be drilled to provide a more reliable source of water, which will require a well drilling permit. Minor trenching and backfilling will be required to repair pipes and/or install new pipes. In addition, the existing water pipes running from Dobbyn Creek to the Water tanks will be repaired or replaced.	NOE

2005062143	Docks Area Specific Plan Sacramento, City of Sacramento--Sacramento The proposed project is the adoption of a Specific Plan through an amendment to the Central City Community Plan (CCCP) for the Docks Area, and a General Plan Amendment, a rezone, planned unit development guidelines and a schematic plan for the entire project site. The Specific Plan would provide for a range of mixed-use development densities, including: 1,000-1,155 dwelling units; 200,000-500,000 square feet office; 40,500-43,300 square feet retail; and 1,870 to 2,920 off-street parking spaces.	EIR	09/24/2008				
2008031038	8th & Grand/Hope Mixed Use-Project Los Angeles City Community Redevelopment Agency Los Angeles, City of--Los Angeles The applicant proposes to entitle a mixed-use development consisting of residential condominium units, hotel uses, commercial retail uses, and associated parking and open space on the project site. The proposed project would include the demolition of the existing 65-space surface parking lot and the 222-space, 4-story parking structure, and the construction of a mixed-use project that would include a high-rise tower(s) with up to approximately 61 stories (approximately 700 feet above ground level) and a maximum of 481,520 square feet of net floor area (approximately 780,000 gross square feet), resulting in a Floor Area Ratio (FAR) of 13:1.	EIR	09/24/2008

2006061101	<p>General Plan Amendment 04-05, Zone Change 04-06, Tentative Tract Map 62757 Lancaster, City of Lancaster--Los Angeles</p> <p>The proposed project involves the development of 160 acres of vacant land with 650 single family dwellings. The project site is currently designated in the City's General Plan as non-urban (NU) residential and zoned as RR-2.5, which would permit approximately 64 units on the project site with minimum lot sizes of 2.5 acres. The proposed project includes the approval of Tentative Tract Map Number 62757 and an associated General Plan Amendment and Zone Change. The proposed General Plan designation would be urban residential (UR) and the zoning R-7,000 which would permit one dwelling unit on a minimum of a 7,000 square foot lot. The gross density of the proposed project including streets, landscaping, open space, flood control and streets is 4.06 dwelling units per acre.</p>	FIN	
2007051141	<p>Lakeview Promenade Santa Maria, City of Santa Maria--Santa Barbara</p> <p>The proposed project is a mixed use commercial, residential, office, and entertainment project on a site totaling 9.4 acres. The project development is delineated as follows: 266 condominiums; approximately 40,000 sf of retail space; approximately 14,000 sf for restaurant use; approximately 14,000 sf for use as a spa/fitness/physical health care facility; and a 250-seat movie theater.</p>	FIN	
2007052115	<p>Davis Road/Pixley Slough Bridge Replacement Project Stockton, City of Stockton--San Joaquin</p> <p>The project is in the growing North Stockton Area, on Davis Road between Waterbury Drive and Eight Mile Road. A Programmatic EIR (PEIR) was completed and a Notice of Determination (NOD) issued in November 1998 for the North Stockton Projects Annexation which included studies for widening Davis Road from two lanes to four lanes between Bear Creek and Eight Mile Road. Subsequent to the NOD, residential developments have been built both east and west of Davis Road and north and south of Pixley Slough. Davis Road has been progressively widened to four lanes as development has taken place. As such, the widening of the bridge to four lanes is warranted. The City of Stockton applied for and received approval of funding to replace the existing Davis Road bridge crossing Pixley Slough under the federal Highway Bridge Program (HBP). The bridge's roadway will be widened to match the approaching section of Davis Road. It is anticipated that the proposed road and utility improvements will be constructed within the existing right of way. Limits of construction associated with the Pixley Slough Bridge Replacement Project are between Waterbury Drive to the south and Eight Mile Road to the north. During construction of the new bridge, it is contemplated that Davis Road will be closed to through traffic. North-bound traffic on Davis Road will be routed west on Waterbury Drive, to Rivermont Drive, which terminates at Eight Mile Road. Likewise, south-bound traffic at Davis Road from Eight Mile Road will head south on Rivermont Drive, turn east on Waterbury Drive to the intersection of Davis Road, and continue south.</p>	FIN

	for public meetings, health and educational programs, a passive museum and cultural center, services for senior citizens, and a "mail box" service to be used on a daily basis. The project will provide recreational and public services to the growing communities of the Coachella Valley. The proposed project would include extensive interior rehabilitation of the North Shore Yacht Club to suit the proposed use of the facility as a community center. The exterior would be restored to its original design, including any updated building code compliance requirements. Outdoor areas would be improved with landscaping, demolition of the existing dilapidated pool terrace, and replacement of existing flat work and retaining walls.		
2008082043	V.V. Park Private Residence Use Permit Sacramento County Folsom--Sacramento A Conditional Use Permit to allow the establishment of a single-family residence on property zoned O and O(F) Recreation zones. A Tentative Parcel Map to create two lots from an existing 78.1 acre (gross) parcel.	MND	09/09/2008
2008082044	Tentative Parcel Map No. 2753 Amador County --Amador This is a proposal to divide 39.17 acres into two parcels of 19.17 and 20 acres in size; located north of State Highway 26 on the west side of Joyce Road, approximately 4,000 feet south of State Highway 88 in the Pioneer area (APN 031-010-035-000).	MND	09/09/2008
2008082045	Tentative Parcel Map for Michael Wimer TPM07-0005 Butte County Chico, Paradise--Butte The applicant is requesting a Tentative Parcel Map to divide a 10.5-acre parcel, zoned FR-5, into two parcels of 5.25 acres. The parcels are proposed to be served by individual sewage disposal systems and private wells.	MND	09/09/2008
2008082048	Mission Boulevard Arco AM/PM (PLN2008-00226) Fremont, City of Fremont--Alameda A proposal to demolish the existing service station located at 40077 Mission Boulevard and construct a new gas station with a 2,400 square foot 24-hour convenience store. The new station will feature 8 fuel pumps with 16 fueling stations. The existing underground fuel tanks will remain in their present locations.	MND	09/09/2008
2008062056	California Health Care Facility Stockton California Prison Health Care Receivership Stockton--San Joaquin NOTE: Recirculated NOP The proposed 1,800-bed health care facility would consist of housing clusters, diagnostic and treatment centers, an armory, warehouse facilities, a central plant, outdoor recreation fields, a gatehouse, and parking areas. A lethal electrified fence would surround the secured area, a sally port would be incorporated into the fencing, and guard towers, at a minimum, would be located at each corner and at the vehicle sally port. The project also includes exterior lighting. Parking would be provided for staff personnel and visitors. On-and off-site infrastructure improvements would also be required. The proposed health care facility would employ as many as 3,030 staff and approximately 75 to 100 visitors are anticipated per day.	NOP	09/09/2008

2008081025	Tulare Industrial Complex Tulare, City of Tulare--Tulare The proposed Tulare Industrial Complex project is located in a southern portion of unincorporated Tulare County along State Route 99 (SR-99), immediately adjacent to the existing City of Tulare corporate limits. The proposed project consists of approximately 272.44 acres of active agricultural land and is generally bounded by Hosfield Road to the north, SR-99 to the west, the Road 192 alignment to the south, and Laspina Street to the east. The proposed project includes a pre-zoning of the enter 272.44 acre site to M-1 (Light Industrial), consistent with the Tulare 2030 General Plan Update. The proposed project also includes a Sphere of Influence (SOI) amendment to the Tulare 2030 General Plan and annexation into the City. (Note: The 2030 General Plan is currently in litigation; therefore, this environmental document will assume that a General Plan Amendment to Light Industrial (LI), as well as a SOI amendment, will be needed). The Tulare 2030 General Plan Update Land Use Diagram included this area with the sphere boundary. The SOI limits identified under the City of Tulare 1993 General Plan does not include the proposed project site and is therefore identified as A (Agricultural) under the County's land use designation and AE-40 (Exclusive Agriculture, 40 acre minimum), per the County's currently zoning for the site.	NOP	09/09/2008
2008081032	City of Lompoc General Plan Update EIR Lompoc, City of Lompoc--Santa Barbara The proposed project is the update of the City of Lompoc General Plan Land Use, Circulation, and Housing Elements. The Land Use Element addresses the community's vision for development during the planning horizon, identified as the year 2030. The Element includes a map of proposed urban boundaries and planned land use categories. The Circulation Element outlines the transportation network required to support development proposed under the City's Land Use element. The updated Housing Element is a policy document that implements the different types of single-family, multifamily, and mixed use developments that are envisioned by the Land Use Element.	NOP	09/09/2008
2008082041	El Dorado Canal Flume Replacement Program El Dorado Irrigation District --El Dorado The proposed flume replacement program is a project under the California Environmental Quality Act (CEQA). The flumes contained within this project consist of wooden trapezoidal flumes of varying lengths, elevations, and age. All of the flumes will remain in the same footprint, located within the existing Federal Energy Regulatory Commission (FERC) boundary. There will be no change to Project operations. Access and staging for each replacement will be at site identified in the approved Trails and Transportation System Management Plan.	NOP	09/09/2008
2008082042	Atkinson Lane Specific Plan/Master Plan Santa Cruz County Watsonville--Santa Cruz The County of Santa Cruz and the City of Watsonville are preparing a joint Specific Plan/Master Plan for the Atkinson Lane future growth area (project site). The project site falls within the City's Urban Growth Boundary. The total gross acreage of the project site is 67 acres, which includes 16 acres of land to be re-zoned by the County prior to annexation by the City to meet County's affordable	NOP	09/09/2008

2008088123	New leased space in West Sacramento Pesticide Regulation, Department of West Sacramento--Yolo The Department of Pesticide Regulation, North Regional Office for Enforcement will lease about 4,600 square feet of office space in an existing multi-tenant office building in West Sacramento. The building was constructed in 1996. The new leased space would accommodate about 14 employees performing general office duties and the project requires no special tenant improvements. Twenty parking spaces are available for visitors and employees use. Local transit service is available within a quarter mile of the project site.	NOE					
2008088124	2008-26 Extension of Time Calaveras County --Calaveras Tentative Subdivision Tract Map 2003-05, for Jim Platner was approved May 23, 2005 to divide the 40 acre into 83 single family residential lots, 2 open space lots and 1 recreation lot. The request for an extension of time for 24 months was received prior to the expiration date of the map.	NOE					
2008088177	Muhlbaier Culvert Repair (1600-2008-0119-R2) Fish & Game #2 Paradise--Butte Repair or replacement of an existing culvert stream crossing damaged during high water flows. The driveway will be back filled over the culvert in the same location of the damaged culvert.	NOE

2006051022	Ocean View Estates Encinitas, City of Encinitas--San Diego Tentative Parcel Map to subdivide three acres into four residential lots and construct four single-family detached homes.	EIR	09/25/2008
2007111111	Beach and Orangethorpe Mixed-Use Specific Plan Buena Park, City of Buena Park--Orange The proposed project is the adoption of the Beach and Orangethorpe Mixed-Use Specific Plan (BOMUSP). The project site consists of approximately 12.75 acres in the city of Buena Park in Orange County, California. The project site is bordered by Melrose Street to the north, Beach Boulevard (State Route 39/SR39) the west, Orangethorpe Avenue to the south, and Brenner Avenue to the east. The project site is predominantly flat with no distinguishing topographical features, and on-site vegetation is limited to ornamental trees, grass, and shrubs. The center and southeastern portions of the site are undeveloped with exception of one single-family residence on Orangethorpe Avenue. Residential uses are located along the northern and eastern perimeters (15 single-family residences), and commercial and restaurant uses are located along the northwestern and southwestern corners of the site. 2008081035	San Antonio Creek Restoration Regional Water Quality Control Board, Region 3 (Central Coast), San Luis Obispo --Santa Barbara NOTE: Joint Document consists of NOI, EA, FONSI. VAFB proposes to remediate extensive damage to the banks and stream channel caused by heavy storm flows to this reach of San Antonio Creek, which has resulted in severe scouring and erosion, particularly in the area between Barka Slough and the downstream crossing of San Antonio Road.	JD	09/02/2008
2008081034	Sewer Forcemain Replacement Project 22nd District Agricultural Association Del Mar--San Diego The proposed project entails the replacement of an existing approximately 35-year old pipeline with a new forcemain pipeline under the San Dieguito River. The new pipeline would have the same carrying diameter as the existing pipeline (eight-inch) and would not increase wastewater flows beyond the amounts agreed upon by the 22nd DAA and the City of Del Mar. The peak flow would remain constant at 630 gallons per minute (gpm). As discussed in Section 1, the 22nd DAA anticipates the need to increase the peak flow in the future based upon the projects proposed in the on-going Master Plan. However, no increase in peak flow is proposed at this time. Environmental review associated with the potential increase in peak flows will be included in the EIR being prepared for the Master Plan. The proposed project would not result in an increase in pipeline pressure nor would it require modifications to the existing pump station. Similarly, infrastructure for receiving the forcemain located within the City of Del Mar's Public Works yard would not need to be modified.	MND	09/02/2008
2008081036	Aloft Hotel EA 773/CUP 07-07, 101 Continental Boulevard El Segundo, City of El Segundo--Los Angeles The project applicant proposes to construct a 6-story, 61,104 square foot hotel. The hotel would be constructed to a maximum height of 77 feet 8 inches. The hotel would include 167 rooms, a 566 square-foot conference room, a 700 square-foot café, and a 1,059 square-foot bar area. The hotel would also include a pool and a fitness area. The design is contemporary with tinted glass windows and exterior walls constructed of composite metal panels. The first floor would include Prodema (wood lining) panels. The hotel exterior would also include colored light strips and colored accent metals.	MND	09/10/2008
2008082050	Bay Division Pipelines 3 and 4 Crossover Facilities Project San Francisco, City and County of Santa Clara, Palo Alto, Atherton--Santa Clara, San Mateo Three crossover facilities in SFPUC right-of-way to interconnect the SFPUC's Bay Division Pipelines 3 and 4. At each site, the SFPUC would construct a concrete vault, pipes and valves, emergency generator (with propane fuel tank), control panel, and associated utility connections. Crossover valves and connections would be within concrete-lined vaults 61 by 35 feet in area and 20 feet deep. Guadalupe River Site: In Santa Clara's Ulistac Natural Area. Barron Creek Site: In landscaped area at the Veterans Administration hospital complex, Palo Alto (Lat. 37 deg 24' 9.38" N, long. 121 deg 57' 11.28"). Bear Gulch Site: In the corporation yard of the California Water Service Company, Atherton (Lat. 37 deg 25' 54.52" N, long. 122 deg 13' 27.70" W).	MND	09/10/2008

2008082051	Z06-0040/P06-0043/Marcyan Rezone and Parcel Map El Dorado County --El Dorado Rezone a 46.23-acre parcel from Residential Agricultural 20-Acre/Planned Development (RA-20-PD) to Estate Residential Ten-acre (RE-10) and a tentative parcel map create four parcels ranging in size from 10 to 16.23 acres.	MND	09/10/2008
2008082053	Waste Discharge Requirements for Surfactant Flushing of Contaminated Soil and Groundwater Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Santa Rosa--Sonoma NOTE: Lead Agency re-circulated revised MND and extended the review period. Chevron Environmental Management Company is proposing to conduct surfactant flushing activities as an interim remedial action to remove separate phase hydrocarbons from the subsurface. The proposal was submitted for the Regional Water Board's consideration of Waste Discharge Requirements under the applicants Report of Waste Discharge. The proposal includes injection of a diluted surfactant solution in the affected area, an equilibration period, followed by extraction and disposal. Monitoring activities will be conducted during all phases of the project.	MND	09/17/2008
2008081033	Birtcher Center at Canal Street Riverside County --Riverside Overall, the proposed project consists of 28 industrial park buildings with a total square footage of 739,134 square feet. The buildings will consist of concrete tilt-up structures supported by conventional slab-on-grade foundation system. Concrete and asphaltic pavement, as well as landscaping and hardscape, are proposed. The development is divided into 3 areas for clarification of boundaries, parcel identification and zoning designations.	NOP	09/10/2008
2008082052	Kaiser Permanente San Leandro Medical Center/Marina Point Mixed-Use Development Project San Leandro, City of San Leandro--Alameda The City of San Leandro, Kaiser Foundation Hospitals (Kaiser), and ICI Development Company (ICI), are undertaking review of a significant project to be located on a 65-acre site near I-880 and Marina Boulevard. The northern approximately 30 acres of the site would be developed with a 387,000-square foot retail project (consisting of large format stores, multi-tenant retail uses, restaurants, soft goods, and service-oriented retailers) and a mixed-use residential project (consisting of up to 250 one-and two-bedroom apartments and 25,000 square feet of retail uses). The southern approximately 35 acres of the site would include up to 865,000 square feet of medical uses to be developed by Kaiser. The medical uses to be developed by Kaiser would include a 434,000 square-foot, six-story, 262-bed hospital; a 400,000-square foot, six-story hospital support building; a 35,000 square foot central utility plant; a 20,000 square foot outdoor service yard; and parking necessary to meet projected demand, estimated to be no more than 2,510 stalls. Parking facilities could include surface parking and an additional 800-stall, five-story parking structure.	NOP	09/10/2008

1996124006	<p>Developing Homeport Facilities for Three Nimitz-Class Aircraft Carriers in Support of U.S. Pacific Fleet U.S. Navy Coronado--San Diego</p> <p>A primary focus of this SEIS is on vehicular traffic (hereafter referred to as traffic) and traffic-related issues. The document evaluates the effectiveness of traffic mitigation measure implemented pursuant to the 2000 ROD, and reevaluates the 1999 FEIS traffic impact analysis in light of new circumstances or information relevant to traffic conditions. Among these changes is an anticipated increase in the number of intermittent, nonconsecutive days each year (from 13 to 29) when the 3 nuclear powered aircraft carriers (CVNs) homeported at Naval Air Station North Island (NASNI) are in port simultaneously. The supplemental traffic analysis also addresses current information regarding local traffic conditions, personnel loading, and CVN operations deployment and maintenance schedules that could influence the number of days that 3 CVNs are simultaneously in port in any given year. Past, present, and reasonably foreseeable future actions impacting traffic are also examined from a cumulative impacts perspective.</p>	SIS	09/22/2008
2007032084	<p>New Main Kitchen and Remodel Existing Satellite Serving Kitchens and Dining Rooms at Napa State Hospital Mental Health, Department of Napa--Napa</p> <p>The proposed project consists of the construction of a new 29,000 square foot (sq ft) single story Main Kitchen replacement facility on the northwest corner of Madrone Drive and Acacia Drive and the renovation of 10 satellite kitchens and dining rooms (totaling approximately 51,000 sq. ft.) located in existing buildings. This project would support the complete conversion of the hospital to a cook/chill method of food service. With the cook/chill method, meals are prepared in the main kitchen, placed on trays, blast chilled, and transported to satellite kitchens where they are re-heated and served. Construction of the new main kitchen would require demolition of five structures, four of which are contributors to the Napa State Hospital Historic District that is eligible for listing on the National Register of Historic Places (NRHP) and the California Register of Historical Resources (CRHR). These buildings include Building 151 (storage), Building 153 (storage), Building 154 (storage), and Building 155 (welding shop). Building 152 (former auto shop/storage) has been determined not to be a contributor to the district. The storage and welding shop functions would be relocated to existing buildings on the campus. The new main kitchen has been designed to qualify for Leadership in Energy and Environmental Design (LLED) silver certification. Satellite kitchen improvements include new cook/chill compatible equipment, improved finishes, and electrical and mechanical upgrades. There would be no changes to the total number of employees, employee shifts, and deliveries; however, some employees currently reporting to satellite kitchens would report to the main kitchen when the cook/chill method is implemented.</p>	NOD

2008088134	<p>Five Mile Slough Erosion Repair Project San Joaquin County Stockton--San Joaquin San Joaquin County Department of Public Works proposes to stabilize approximately 1,200 feet of the north bank of Five Mile Slough from Interstate 5 to approximately 700 feet east of Plymouth Road in Stockton (map attached). The bank is sloughing off along the bottom of the slope. The purpose of this project is to prevent levee failure which could result in potential flooding and impact the adjacent residences and their properties. An excavator would be used to re-shape the slope to its existing slope angle. Fabric and rock slope protection (RSP) (approximately 4 to 5 feet from top of bank toward the water) would then be placed on top of the slope. Approximately 2 feet of the emergent marsh habitat along the toe of the bank will need to be removed for the placement of the RSP. The work would be conducted in fall 2008.</p>	NOE	
2008088135	<p>A/C 9556900 Radiology Research Remodel University of California, Davis --Sacramento The project will convert approximately 3,000 gsf of existing radiology film file space in the Ellison Ambulatory Care Center at the UC Davis Medical Center campus in Sacramento into radiology research space. The scope of work includes demolition, new walls, doors, casework, vibration isolation, fire protection, mechanical, electrical, and finishes. The project is categorically exempt from CEQA under Article 19, Paragraph 15301, as it consists of minor alteration of an existing structure involving negligible or no expansion of use beyond that previously existing. The project is located at the southeast corner of the intersection of 48th Street and Y Street in Sacramento.</p>	NOE	
2008088136	<p>Temporary Household Hazardous Waste (HHW) Collection Event - Auburn Western Placer Waste Management Authority Auburn--Placer Conduct temporary HHW collection event in the Auburn area for residents and Conditionally Exempt Small Quantity Generators (CESQG). 2008062092	Lighting Efficiency Standards Energy Commission -- The Energy Commission intends to accelerate the effective date of federal Tier I and Tier II lighting efficiency standards. The proposed lighting standard for the federal Tier I standards would become effective beginning in 2011 and would require general service incandescent lamps to use 30 percent less energy than current general service lamps. The proposed lighting standard for the federal Tier II standards would become effective in 2018 in California and would require general service lamps to use 60 percent less energy than current general service lamps. The project also includes new standards to increase the efficiency for portable lighting fixtures.	EIR	10/03/2008
2007061011	Change of Zone of No. 7026, Tentative Tract Map No. 32531 Riverside County Riverside--Riverside Change of Zone No. 07026 is a proposal to amend the current zoning classification of the subject property from Residential Agriculture -2 1/2 acre minimum (R-A-2 1/2) to Residential Agriculture 2 acre minimum (R-A-2). Tentative Tract Map No. 32531 is a schedule B subdivision of 22.86 acres into 11 single-family residential lots with a minimum lot size of two gross acres.	MND	09/11/2008
2008081037	Las Mansiones de Bonita Major Subdivision (5 Lots) San Diego County San Diego--San Diego Project proposes a Tentative Map to subdivide a 6.16 acre parcel into 5 residential lots.	MND	09/11/2008
2008081038	Shellstorm Minor Subdivision (4 units); TPM 20850RPL1; S04-066; Log No. 04-14-025 San Diego County Santee--San Diego This project proposes to build a two-story structure consisting of four two-bedroom condominium units on the last undeveloped lot on Lakeshore Drive in the Community Plan area of Lakeside. The project will be adjacent to a three-story apartment building to the west, and a single-family residence directly to the east. The area consists of apartment complexes, condominiums, and small businesses. Directly across the street from the proposed complex is a single-story business and behind the lot is a one-story storage business. Just beyond the storage buildings is Highway 67, elevated above the level of the structures on Lakeshore Drive. The site, 50x150 feet (7,500 square feet), is basically flat and will require little or no grading. The existing vegetation consists of sparse, disturbed urban vegetation. The General Plan Land Use Designation is (9) Residential. The Regional Planning Category is Current Urban Development Area (CUDA). Zoning is RU 29 (Urban Residential) with a minimum lot size of 6,000 square feet. The zoning has Special Area Regulation "B", meaning that a site plan is required for compliance with the Lakeside Design Review Guidelines. The project provides for 6 parking spaces (1.5 per unit), five off-street and one on Lakeshore Drive.	MND	09/11/2008

Applicant is also requesting annexation to the City of Bakersfield. The project would allow the development of approximately 150,000 square feet of commercial uses.	MND	09/11/2008
2008081043	North Jamul Wireless Telecommunications Facility San Diego County --San Diego The project is a Major Use Permit to construct and operate an unmanned wireless telecommunication facility.	MND	09/11/2008
2008081044	Santa Monica Canyon and Palisades Park LFD Upgrades and Coastal Interceptor Relief Sewer Los Angeles, City of Santa Monica--Los Angeles The City of Los Angeles (City) is proposing to upgrade two existing low flow diversions (LFDs) and construction of a 4,500-foot long relief sewer within the Community of Pacific Palisades and the northern limits of the City of Santa Monica. The project is funded by Proposition O, a Clean Water Bond Measure, which was approved by voters November 5, 2004. The project is needed to help the City meet the winter dry-weather bacteria Total Maximum Daily Load (TMDL) requirements for the Santa Monica Bay.	MND	09/11/2008
2008082055	Deschutes Road-Factory Outlets Drive/Interstate 5 Interchange Modifications Anderson, City of Anderson--Shasta The City of Anderson, in cooperation with the California Department of Transportation (Cal-trans), proposes to modify the interchange of Deschutes Road-Factory Outlets Drive and Inter-state 5 (I-5) within the City of Anderson. The project is located at post mile (PM) 4.0 to 4.6. The Project includes the construction of a new off-ramp northbound I-5 to Deschutes Road. Roundabout intersections are proposed for I-5 southbound off-ramp intersection with Factory Outlets Drive and at the intersection of Deschutes Road, Locust Road and the I-5 northbound on- and off-campus. Additional roadway improvements are proposed along Factory Outlets Drive between the I-5 southbound off-ramp intersection and the intersection with State Route 273 (SR 273). The project may include the adoption of plan lines for the new roadway alignments. Improvements to the ACID irrigation canal will be necessary as a result of this project.	MND	09/11/2008
2008082056	William F. James Boys Ranch Temporary Modular Installation Santa Clara County Morgan Hill--Santa Clara The William F. James Boys Ranch is an existing minimum security juvenile detention facility original built to hold up to 96 boys between 15½ to 18 years of age. The facility currently houses only 60 juveniles due to previous change in the overall treatment program which required more dorm floor space per individual. The proposed project is to install temporary residential and shower modular buildings, relocate a classroom trailer from the adjacent Harold Holden Ranch, install new paved walkways, and install a fire access road to increase capacity from 60 to 84 juveniles at the facility in Morgan Hill, California. 2008082057	Loukos Property Stream Bank Repair Project, Contra Costa County, File TP07-0027 Contra Costa County Martinez--Contra Costa The applicant is requesting a tree permit for the removal of five protected trees for the purpose of creek bed reconstruction and stream bank stabilization for a portion of San Ramon Creek located on the subject property. This project includes the replacement of a retaining wall, fence, and driveway repair.	MND	09/11/2008
2008082059	Hill Top Center (PMPA T20080204) Placer County Auburn--Placer Project proposes the construction of a hotel, restaurant and retail center on a 7.5 acre hillside that is comprised of three parcels.	MND	09/11/2008
2008062027	Sunrise Mall Development Project Citrus Heights, City of Citrus Heights--Sacramento Steadfast BLK-LLC is proposing a phased plan for the expansion of Sunrise Mall, known as the Sunrise Mall Development Project. The project is located in the City of Citrus Heights, within a 10-block commercial area known as the Sunrise MarketPlace. The Sunrise MarketPlace is composed of over 500 businesses and 70 property owners, which serve primarily as a retail shopping area with some office uses. The MarketPlace serves as the City's economic core and main gathering location for the community. The Sunrise Mall serves as the anchor for this important commercial area. The project will be implemented in two phases. Phase 1 consists of the demolition of 9,718 square feet (SF) of existing commercial space, and the construction of 77,300 SF, for a net increase of 67,582 SF. Phase 1 construction consists of the following: - Development of 7 building pads for future restaurants, including 2 drive-thrus - Development of 3 building pads for retail or financial uses, including 1 drive-thru for a financial institution Phase 2, the Future Redevelopment Scenario, would include the demolition of 20,000 SF, and construction of 146,694 SF of new building space. The net increase in building area for Phase 2 would be 126,694 SF. Phase 2 would provide for a 71,000 SF theater with approximately 3,000 seats (the existing 14,891 SF, 1000-seat theater inside the mall would be converted to general retail use).	NOP	09/11/2008

	Standards.		
2008062019	Persson Minor Subdivision Humboldt County Eureka--Humboldt The project consists of a parcel map subdivision of an existing +/- 10.2-acre parcel creating three parcels ranging in size from 1.08 acres to 1.27 acres, and a remainder parcel of 6.7 acres. The remainder parcel is already developed with a residence and residential outbuildings and an on-site sewage disposal system. The area is served by community water, but the one-acre minimum reflects the parcel sizes needed to support on-site sewage disposal systems. All parcels will be accessed via public roads. The project also involves an exception to the lot frontage requirement to permit a flag lot design for proposed remainder parcel pursuant to Section 7-2 of the Subdivision Regulations. The site drains to the southwest toward Orton Creek and Elk River. There are no known wet areas or other watercourses in the vicinity of this site.	NOD	
2008089013	Tentative Parcel Map and Planned Development Permit for Robert & Jean Blount Plumas County --Plumas This proposed project is an application for a Tentative Parcel Map to divide an undeveloped 30.07-acre parcel into two (2) residential parcels, with Parcel 1 sized at 15.45 acres and Parcel 2 sized at 14.62 acres. Included with the map is an application requesting a transfer of residential density.	NOD	
2008088125	West Point Water Treatment Plant Improvements (SCN# 1999062068) Calaveras County Water District --Calaveras Demolition and replacement of existing clearwell at the water treatment plant including new construction of two 300,000-gallon corrosion resistant coated steel clearwell tanks covered with metal (steel or aluminum) roofs. The project will require site grading for tank foundations and replacement of associated site piping.	NOE	
2008088140	Malibu Creek State Park, Asphalt Road Removal Parks and Recreation, Department of --Los Angeles The project involves removing a portion of old asphalt road bed located in Malibu Creek State Park measuring approximately 170' long X 8' wide X 3" thick. This section of road is no longer in use and is currently contributing to significant erosion in the area. The asphalt paving will be hand removed by first breaking it into manageable sizes using sledge hammers and pry bars. The pieces will be loaded into the bed of a small pickup and transferred to a dumpster. This method will minimize ground disturbance to the surrounding area and the substrate currently capped by the asphalt. The area will be seeded with native bunchgrass at the completion of the project.	NOE	
2008088141	Fee Schedule Revision Parks and Recreation, Department of --Butte, Calaveras, Contra Costa, El Dorado, Glenn, ... Adoption of a State Park System fee schedule revision. As set forth in the attached Statement of Findings, the purpose of the fee change is to fund the operation of the California's State Park System.	NOE

<u>Documents Received on Thursday, August 14, 2008</u>			
2008082061	<p>Holiday Haus Project Mammoth Lakes, City of Mammoth Lakes--Mono</p> <p>The project proposes a Hotel Condominium that would include a total of 91 units (135 bedrooms) that would encompass 77 condominium units (120 bedrooms) and 14 on-site workforce housing units (15 bedrooms) constructed above an underground parking structure. A single 182,431-square foot structure would house the project on the 1.55-acre site. The project would also include lock-off units. With implementation of the lock-off units, the project would encompass a total of 88 nightly rental single units and 16 nightly rental two-bedroom units for a total of 104 nightly rental units (120 bedrooms). Five building levels are proposed above three levels of underground parking. The building, garage, pavement, and patio footprints would be approximately 60 percent of the lot (40,386 square feet of the total 67,345-square foot lot). The project would provide on-site affordable housing, conference space, and year-round recreational facilities (both indoor and outdoor) for hotel guests. The project is proposed to be of modular construction. Fire access would be provided by the future Intrastar 7B Road that is anticipated to parallel the south side of the project site.</p> <p>In the event that the Intrastar 7B Road is not constructed upon project implementation, the Applicant would construct a fire access road from the current proposed entry at SR-203/Main Street into the eastern portion of the project site, trending south. Should the fire access road alternative be implemented, the project would result in one fewer hotel condominium unit and one fewer affordable housing unit (76 Hotel Condominium units [119 bedrooms] and 13 affordable units [14 bedrooms]). It should also be noted that under this alternative, three one bedroom units (under the proposed project) would be changed to studio units.</p>	MND	09/12/2008
2008082063	<p>Tentative Subdivision Map Application S-12-05, Ausonio Subdivision Redding, City of Redding--Shasta</p> <p>Proposal to subdivide three existing parcels totaling 24.3 acres to create 48 lots for single-family residential development. Up to three phases are proposed. Developable lot areas average around 0.17 acre (7,400 square feet) per lot. Public utilities (water, sewer, electric, etc.) currently abut the site and are available for extension to serve all lots. Site grading is proposed to prepare most lots for home construction and to extend the public road system through the subdivision between the end of Auburn Drive and West Street. Areas on lots with steep natural terrain over 20 percent slope that are not graded with subdivision, along with natural drainage features, will largely be protected by private open-space easement. Public road right-of-way abandonments are also proposed for parts of Milo Avenue and Rey Avenue. Off-site improvements necessary to support the project include the construction of Arcadia Street downhill to West Street and a storm-drain utility access off Grandview Avenue. A few private property owners bordering the off-site work areas could potentially be impacted in order for the developer to obtain sufficient public right-of-way and/or easements. The required land/easement acquisitions would not be substantial, but will require the consent of affected property owners.</p>	MND	09/12/2008

2008082064	Bicycle and Pedestrian Master Plan Update Tiburon, City of Belvedere--Marin The Town of Tiburon has been working in conjunction with a private consulting firm, Alta Planning & Design, on the update to the existing Bicycle and Pedestrian Master Plan (BPMP). The Town's original BPMP was adopted in 2001 and is being comprehensively updated. Alta Planning & Design is the primary author of the document and has been updating all BPMP's across Marin County, including for the County of Marin. Therefore, there is a high degree of consistency in the content and format of the documents, including general policies and programs that are not unique to each jurisdiction. The updated plan is also consistent with the 2008 Marin County Unincorporated Bicycle and Pedestrian Master Plan and the Metropolitan Transportation Commission's (MTC) 2001 Regional Bicycle and Pedestrian Plan for the San Francisco Bay Area.	MND	09/12/2008
2008082065	Clarksville Professional Business Park Z07-0028/ P07-0030/ PD07-0027 El Dorado County --El Dorado The project would include a Rezone, Planned Development, and Parcel Map. The Rezone would change the parcel zoning from One-Acre Residential (R1A) to Commercial - Planned Development (C-PD). The Planned Development would allow the construction of ten commercial buildings totaling 98,992 square feet. The buildings would range in size from 5,100 to 44,992 square feet. The Parcel Map would create ten parcels ranging in size from 0.37 to 2.26 acres. Each of the proposed buildings would be located on a separate parcel. One Design Waiver has been requested to allow the following: to allow sidewalk on one side of the proposed roadways.	MND	09/15/2008
2005062009	Antioch Wal-Mart Expansion Project Antioch, City of --Contra Costa Expansion and remodeling of the existing Wal-Mart store located in the Williamson Ranch Plaza. The existing 141,498 square-foot Wal-Mart store will be enlarged by 33,575 square feet, increasing the total floor area to 175,073 square feet. The project will include the development of approximately 3.7 acres of currently vacant land in the western portion of the approximately 21.6-acre Wal-Mart site.	NOP	09/12/2008
2006091067	West Lilac Farms Residential Tentative Map San Diego County Fallbrook--San Diego The proposed project is a major subdivision to create 28 single-family lots ranging in size from 2.1 to 5.9 acres on a 92.8-acre parcel in the Bonsall Community Planning area. 15 of the 28 proposed lots equal or exceed 3 acres in size with 8 lots 4 acres or larger. Access to each lot would be provided by private roadways connecting to Via Ararat Drive and Aqueduct Road. The project would be served by on-site septic systems and imported water from the Rainbow Municipal Water District. Earthwork will consist of cut and fill of up to 84,000 cubic yards of material. 	is required for an exception to the loading space requirement for commercial development. Four trees over 12 inches in diameter will be removed for the development of the site. Water and sewer service is provided by the McKinleyville Community Services District.		
2008089014	Rocklin Unified School District Maintenance and Food Services Building Rocklin, City of Rocklin--Placer The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2008-0107-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Rocklin Unified School District Removal of thirteen mature trees and associated understory of blackberry bushes from the riparian zone associated with an unnamed stock pond located at 4090 Del Mar Avenue in Rocklin. The school district plans to construct two large buildings at the site.	NOD	
2008088146	Gonzalez, R. Residential Accessory Dwelling Use Permit Sacramento County --Sacramento The proposed project consists of a Use Permit to convert an existing 1196 square foot primary residence into a residential accessory dwelling, and to legalize an existing 1,400 square foot older home into the primary residence, on 10.27 acres in the AG-20 zone. The existing mobile home will be removed from the site.	NOE	
2008088147	Doench Temporary Mobilehome Use Permit Sacramento County --Sacramento The proposed project consists of a Conditional Use Permit to allow a temporary hardship mobile home on a 4.76 plus or minus acre parcel zoned A-5.	NOE	
2008088148	Seasonal Tributary at Ukiah Golfcourse SEP Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Ukiah--Mendocino The proposed project consists of the restoration of a 300 foot portion of the seasonal tributary that would include restoring high flow capacity and bank stabilization. Restoring capacity will include increasing the size of two undersized culverts (a 36 inch and a 10 inch culvert) and widening a constricted portion of the bank. Secondly, a combination of native vegetation plantings will include 5 (1 Gal) Red Stem Dogwoods, 16 (1 Gal) California Wild Roses, 24 (1 Gal) California Honeysuckles and 13 (1Gal) Snowberry plantings arranged along both sides of the 300 foot section of the creek specified by the schematics submitted to the Regional Water Board. In addition to the aforementioned plantings the area will hydro-seeded with approximately 2,285 square feet of native grasses, as specified in the plans. Materials will be utilized to shore the banks and additional hydro-seeding will stabilize an adjacent upland hillside from which runoff enters. Biotechnical methods may include such measures as brush mattress, vegetative wall, and biodegradable erosion control blankets. Rip-rap or other bank hardening will be avoided in favor of aforementioned biotechnical stabilization methods.	NOE

	better served by the removal of this expense from the Districts operating budget allowing designated funds to be used elsewhere to provide service.		
2008088150	Lower American River Salmonid Spawning Gravel Augmentation Program Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento --Sacramento The Lower American River Salmonid Gravel Augmentation Program will increase and improve salmon and steelhead spawning and rearing habitat by replenishing spawning gravel and establishing additional side-channel habitat at new restoration sites in the Lower American River between Nimbus Dam and Arden Rapids. The need is due to the loss of spawning and rearing habitat through curtailment of gravel recruitment from blockage of the river channel by dams. This project consists of three distinct components: acquiring, processing, and stockpiling of spawning gravel; depositing gravel in the spawning sites; and creating side-channel habitats.	NOE	
2008088151	Swanton Pacific Ranch Jubata grass Removal Santa Cruz County Resource Conservation District --Santa Cruz The proposed area of restoration is the extent where Jubata grass is (~0.25 acres). The Jubata grass is located above the Scotts Creek Estuary, and visible from Highway 1. Cal Poly Corporation/ Swanton Pacific Ranch staff will complete manual removal of Jubata grass in the project area. To avoid impacts to local fauna and flora, particularly Red-legged frogs, these activities will be completed between August 1 and October 15 as recommended for such activities at a similar site, Elkhorn Slough. Furthermore, a consulting botanist will be brought to the site ahead of any management activities to avoid any impacts to native botanicals in this un-surveyed reach of Scotts Cree, (G. Hayes per comm. 2008). The removal of invasive plants from the site will improve habitat for a variety of wildlife in the area.	NOE	
2008088152	Nun's Canyon road Repair and Rehabilitation Fish & Game #3 --Sonoma The project will repair and rehabilitate Nun's Canyon Road, which is used as a pedestrian trail and for transporting cattle. Sections of the road were severely damaged during the January 2006 floods. The repair work consist of minor grading of the road surface to facilitate appropriate flow across the road surface and placing rock armor and fill for small stream crossings and road stability. Issuance of a Streambed Alteration Agreement Number 1600-2008-0190-03 is pursuant to Fish and Game Code Section 1602.	NOE	
2008088153	Grant Street Village Storm Water Outfall project Fish & Game #3 Healdsburg--Sonoma Installation of a 30-inch diameter concrete storm water discharge pipe cast into the existing Grant Street box culvert's southeastern headwall allowing for drainage flows to enter Foss Creek. Issuance of a Streambed Alteration Agreement Number 1600-2008-0202-03 is pursuant to Fish and Game Code Section 1602.	NOE

2008088170	Reclamation District 1001 Pipe Replacement Project Reclamation District 1001 --Sutter The purpose of the Reclamation District No. 1001 (RD1001) Pipe Replacement Project(Proposed Project) is to replace two pipes connected to auxiliary discharge pumps at the terminus of the Main Drain. The existing discharge pipes connected to the two auxiliary pumps are 36-inch and 42-inch diameter steel pipes that have two major issues. The first issue of concern is that the pipes cross through a levee below the 100-year water surface elevation and have inadequate siphon-breaks and closure structure that may cause water to siphon back through the pipe if the pumps fail during a 100-year event. The second issue is that the pipes have been in use for 50 years and, upon inspection, have been found to be extremely thin	NOE

and corroded in multiple areas. The corrosion and inadequate closure structure result in a significant risk of pipe failure during a flood event, which would result in backup of the Main Drain and flooding to the RD1001 property. In addition, failure of these pipes would also threaten the integrity of the Natomas Cross Canal levee. These are critical flood protection utilities that need to be improved.

2005122135	<p>The Ridge at Trinitas Calaveras County --Calaveras</p> <p>The project proposes to subdivide 280 +/- acres into 14 parcels consisting of 13 single family residential lots (approximately 2.0 +/- acres each); and one additional parcel of 244 acres to accommodate the recreational facilities (golf course, clubhouse, lodge with overnight accommodations), agricultural activities, and one single family residential dwelling unit. The residential area would be in a gated community, with restricted access off Ospital Road. Clubhouse facilities for residents and members and a Lodge with overnight accommodation are proposed on Lot 14, the 244-acre site within the property boundaries. An 18-hole golf course has already been constructed within the boundaries of the proposed Lot 14, but will be analyzed as part of this Revised Draft EIR. The project includes a rezone from AP (Agricultural Preserve) to REC-X-PD (Recreation-Existing Parcel Size-Planned Development) to accommodate both the subdivision and the recreational uses on the property. The Conditional Use Permit (CUP) will regulate the Lodge and other uses requiring a CUP in the REC zoning district.</p>	EIR	09/29/2008
2007121019	<p>SRG Chino South Industrial Park Chino, City of Chino--San Bernardino</p> <p>The project is a request to construct four concrete tilt-up industrial buildings on approximately 125.06 acres, although the Industrial Park and related roadway dedications will only occupy approximately 73.7 acres. The rest of the site will remain undeveloped and will retain current agricultural and open space zoning and general plan land use designations. Existing structures will be demolished and replaced by the proposed project, consisting of approximately 1,351,430 square feet of warehouse/distribution building space and approximately 102,960 square feet of general light-industrial building space. The warehouse/distribution and light-industrial buildings will consist of one-story, concrete tilt-up and glass construction. The project will be built in one phase, with grading and construction scheduled to commence in early 2009. The project includes a General Plan Amendment from Agricultural (AG)/Transitional Area-Industrial (T) to General Industrial (GI) and a change of zone from AG (General Agricultural) to M2 (General Industrial). Portions of the project site west of the industrial park will remain under existing AG and GS (Greenspace) zoning. In addition to the General Plan Amendment and Zone Change as previously discussed, the project includes the approval of the following land-use applications by the City of Chino; a Site Approval to construct four concrete tilt-up industrial buildings ranging in size from 102,960 square feet to 788,621 square feet totaling 1,454,390 square feet, a Parcel Map to subdivide the existing site into six lots ranging in size from 7.71</p>	EIR	09/29/2008

	acres to 35.99 acres, plus right-of-way dedication and improvements for Fern Avenue, Pine Avenue, and Euclid Avenue, and a Potential Development Agreement.		
2007122045	Sheldon/99 GPA and Rezone Project Elk Grove, City of Elk Grove--Sacramento The proposed project would change the General Plan land use designations and zoning designations of 18 parcels (5 of the 19 parcels are for rezoning only) totaling 44.95 acres affected by the Sheldon Road/SR 99 Interchange Improvement Project from Low and Medium Density Residential to Commercial and High Density Residential. Of those 18 parcels, 10 parcels are located within the Calvine/99 Special Planning Area (SPA) and will require an amendment to the land use exhibit.	EIR	09/29/2008
2007122089	Creekside Mixed-Use Development Project Oakland, City of Oakland--Alameda Demolition of an existing commercial building and surface parking and construction of up to 120 residential units (comprised of 115 market-rate units and five very low-income units), approximately 7,700 square feet of ground-floor commercial space, 120 enclosed parking spaces, and approximately 5,000 square feet of courtyard open space.	EIR	09/29/2008
2008021086	City of Victorville General Plan Update 2030 Victorville, City of Victorville, Apple Valley, Hesperia--San Bernardino The project consists of five primary components: 1. General Plan 2030 which would comprehensive update and supersede the City's current General Plan, with the most significant change to land use being the provision of larger commercial corners at major intersections, and a circulation plan to implement it. This includes deletion of the Old Town and SCLA Elements which are included in the existing General Plan; and 2. Prezoning of the unincorporated County islands to include Mountain View Acres North and South and the Coad Road area, and prezoning of the City's existing northern sphere area to include 2.049 acres of land adjacent to the existing sphere. All of the proposed area is to be zoned Specific Plan upon annexation into the City; and 3. Extension of the City Sphere of Influence to include the Northern Expansion Area of approximately 37,000 +/- acres and the Victorville Water District Sphere of Influence to be coterminous with the proposed City Sphere of Influence; and 4. Expansion of the Victorville Water District boundary to be coterminous with the northern sphere prezoning; and 5. Deletion of the Midtown and Southdown Industrial Specific Plans.	EIR	09/29/2008
2008021130	Valley Region Blythe Street Elementary School Addition Los Angeles Unified School District --Los Angeles The proposed project includes the construction and operation of the Valley Region Blythe Street Elementary School Addition project. The proposed project would include an addition to the campus, the reconfiguration of the existing Blythe Street Elementary School's play area, some minor interior remodeling of the existing facility to expand the current library and the expansion of the lunch shelter. The proposed project will result in 13 new classrooms, and 400 new two semester	FIN

	seats.		
2008081057	Desert Diamond Minor Subdivision San Diego County --San Diego The project is a Tentative Parcel Map to subdivide a 169.84 gross acre piece of property in the Borrego Springs area. The project consists of the proposal to create four lots and one remainder parcel. The project site is located on Borrego Springs Road in the Borrego Springs Community Planning Group, within unincorporated San Diego County. The site is subject to the General Plan Regional Category Regional Development Area and Land Use Designation (18) Multiple Rural Use. Zoning for the site is S 92, General Rural Use Regulations. Access would be provided by multiple driveways connecting to Borrego Springs Road to the west and Di Giorgio Road to the east. The project would be served by on-site septic systems and groundwater from the Borrego Water District. Two thousand, one hundred foot extension of water utilities will be required by the project.	MND	09/15/2008
2008081058	Fast Track Change of Zone No. 7597/Fast Track Plot Plan No. 23155 Riverside County Palm Springs--Riverside The Desert Commerce Center project is a proposal to change the zoning from Industrial Park (I-P) and Controlled Development Areas (W-2) to Manufacturing Service Commercial (M-SC) on a 44-acre portion of the 161-acre property. The plot plan proposes to construct an approximately 2,952,000 square-foot industrial warehouse and distribution center consisting of four buildings ranging in size from 254,300 square-foot to 1,194,900 square-foot, at a building height of approximately 42 feet, with accessory parking area containing 1,830 spaces for automobiles and 1,230 spaces for trailers with approximately 1 mile off-site sewer line extension and a package treatment plant.	MND	09/15/2008
2008081061	Conditional Use Permit No. C-07-58 Fresno, City of Fresno--Fresno City of Fresno Conditional Use Permit Application No. C-07-58 requests authorization to establish the Fresno City Police Department Regional Public Safety Training Facility on 36.26 acres of fallow agricultural land. The facility will consist of an outdoor shooting range; a 17,900 +/- square foot building housing an armory, classrooms, and control center for the outdoor firing range; a 3,036 +/- square foot simulation training building; an outdoor pursuit driving area; a public noncommunity water system under permit issued by the California Department of Health Services/Office of Drinking Water; and an onsite wastewater collection and transfer system constructed and operated pursuant to requirements set by the Regional Water Quality Control Board.	MND	09/15/2008
2008082068	Gazos Creek Watershed Improvements Project - Phase 1 San Mateo County --San Mateo The applicant proposes to make watershed improvements at several locations throughout the Gazos Creek watershed in unincorporated San Mateo County. Both federally threatened steelhead and federally endangered coho salmon are present in Gazos Creek. The proposed project involves bank repair and debris management at the location of a large redwood tree fall and modifications to five logjams to improve migration to upstream spawning and rearing habitat for	MND	09/15/2008

	steelhead and coho salmon and protect the adjacent roadway. The work is designed to improve fish passage and bank and roadway stability while also preserving rearing and over wintering habitat that is provided by the large in-channel wood and associated pools. The proposed modification method does not involve complete removal of the logjams but rather clearing a path for stream flow. Large rootwads and conifers providing habitat will not be removed. Sections of very large spanner logs will be strategically cut to promote flow. Some wood will be removed and placed against the banks for protection. Smaller non-conifer wood and debris may be moved onto the adjacent terraces above ordinary high water level.		
2008082070	Fields Winery UPE04-0022/PLP05-0111 Sonoma County Cloverdale--Sonoma Request for a Use Permit for a winery with a maximum annual production capacity of 10,000 cases with public tasting and 20 special events a year with a maximum of 215 people per event and a Lot Line Adjustment.	MND	09/15/2008
2008082071	Tolay Lake Regional Park - Interim Plan Sonoma County Petaluma--Sonoma Trails, trailheads, picnic areas, portable restroom, entry kiosk park office, ranger residences, operations and maintenance areas, parking areas, minor safety improvements on Cannon Lane. Public access limited to 2-3 days/week under a Day-Use Permit Program.	MND	09/15/2008
2008082072	Sutter Hill East Annexation Sutter Creek, City of Sutter Creek--Amador The project consists of a Sphere of Influence Amendment for parcels 044-010-099 and 100; Annexation and Reorganization of 56.3 acres to the City of Sutter Creek and the Sutter Creek Fire Protection District, with concurrent detachment from the Amador County Fire Protection District; Prezone, General Plan Amendment and Rezone.	MND	09/15/2008
2008082074	Wet Weather Bypass Improvement Project Central Contra Costa Sanitary District Martinez--Contra Costa Central Contra Costa Sanitary District (CCCSD) is the agency responsible for wastewater collection, treatment, and disposal in central Contra Costa County. CCCSD proposes to improve its wastewater treatment plant's wet weather bypass system by constructing a new outlet that will allow, under appropriate conditions, wet weather and other treated and stored flows to be discharged directly to the Walnut Creek channel.	MND	09/16/2008
2008082066	Site Characterization and Remediation Project Parks and Recreation, Department of Grass Valley--Nevada The Project consists of remediation activities required to abate risks in areas of the Empire Mine State Historic Park under a Cleanup and Abatement Order and an Imminent and/or Substantial Endangerment Determination and Partial Consent Order that DPR and Newmont USA LTD. entered into with the Department of Toxic Substance Control and Central Valley Regional Water Quality Control Board. The Draft Program EIR will evaluate potential environmental impacts from anticipated remediation activities in areas of the Park southwest of Highway 174.	NOP	09/15/2008

2008082069	<p>City of San Pablo General Plan Update San Pablo, City of --Contra Costa</p> <p>The City of San Pablo has initiated a comprehensive update of its General Plan (including the Housing Element). The purpose of the project is to update the City's existing General Plan to accommodate development through 2030. It is intended that this General Plan update will include land use and physical design, circulation, conservation, growth management, economic development, environment resource management (parks and recreation, noise and safety), and housing in addition to a public facilities and services element. The Update offers the Planning Commission and City Council an opportunity to establish the City's priorities related to growth through development of key infill sites, cross-town connectors, neighborhoods, and activity centers. The new General Plan will serve as the framework for the City's Capital Improvements Program (CIP), and needed changes to zoning and other implementing ordinances, annual budget, and operations and maintenance activities.</p>	NOP	09/15/2008
2008081059	<p>Valley County Water District SA1 Treatment Facility Improvements - Single Pass Ion Exchange Equipment Valley County Water District Baldwin Park, Irwindale, West Covina--Los Angeles</p> <p>New modular type ion exchange equipment will be added to the existing regenerable resin ion exchange (ISEP) equipment. The new equipment utilizes a National Safety Foundation (NSF) approved anion resin for the removal of Perchlorate, and the spent resin will require disposal once it has reached saturation point. The modular system will be set up in a lead-lag configuration, where source water will flow from the top of the lead vessel, discharged at the bottom, and continue to the top of the lag vessel. By removing the regeneration process of the resin, the brine solution generated will no longer contain any Perchlorate contamination, resulting in significant reduction of salt usage and brine disposal. The existing ISEP system would be modified to remove solely Nitrates. The proposed ion exchange equipment will be placed on a new concrete pad located across from the existing reservoir on the south side of the access road. The influent to the new ion exchange equipment will be connected at a point downstream of the existing air stripper booster station.</p> <p>A new booster pumps station with five (5) booster pumps and wetwell may be installed downstream of the new ion exchange equipment to increase the pressure for the water to make it through the remaining ISEP and UV treatment. The proposed booster station will be located adjacent to the single pass ion exchange equipment to the west. The booster pumps will be housed inside a new building similar in style to the existing booster building on-site. The wetwell will be constructed below grade under the new booster station.</p>	Neg	09/15/2008

	goals, objectives, and policies of the Antelope Valley Area Plan. The development standards contained within the CSD are oriented towards maintaining the low densities, rural character and natural resources of the area.		
2008081062	Granite Land Company Parcel Transfer Sand City Sand City, Seaside--Monterey The Granite Land Company has offered to donate the 2.31 acre site to the City of Sand City. The proposed project is the parcel transfer from the current landowners (Granite Construction Company) to the City of Sand City Redevelopment Agency. The project site was historically used in sand mining operations and there is some contamination. The extent of the contamination is being evaluated, and a soil remediation process is being developed that will eliminate any public health risks. Once the property has been adequately remediated to the satisfaction of the regulatory requirements of the Monterey County Environmental Health Department (MCHED), the MCEHD will issue a "closure letter" to this effect. The City has indicated that the property transfer is contingent upon receiving this closure letter.	Neg	09/15/2008
2008081063	Well No. 2 Iron and Manganese Removal Facility Project Ventura County Waterworks District No. 19 Unincorporated--Ventura Ventura County Waterworks District No. 19 (District) is proposing to modify its existing Well No. 2 to include a new Iron (Fe) and Manganese (Mn) removal facility to treat the water for high levels of these constituents and bring them below the State minimum contaminant levels (MCLs) in order for the well to serve as a primary potable water source for the District's system. The proposed new FeMn removal facility will require expansion of the Well No. 2 site. The expansion area will be located east and adjacent to the existing well site, and is presently in lemon production. The existing well site is approximately 50 feet by 80 feet in size. The proposed expansion would result in a maximum total site size just over 0.25 acre.	Neg	09/16/2008
