STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

August 1 – 15, 2013

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **August 1 – 15, 2013**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse

<u>Documents Received on Thursday, August 01, 2013</u>			
2010-12	Pit River Tribe - APNs: 027-330-006 Bureau of Indian Affairs --Shasta APNs for (Post Office and Store). The Pit River Tribe acquired the parcel for economic development purposes and is the sole owner of the parcel. A portion of the subject property will continue to be used for purposes of operating as Montgomery Creek Postal Service in one part of the building. The Pit River Tribe plans to develop a tribally owned and tribally operated store in the other part of the building, which was previously used as a grocery store and a small shop, many necessary features are already present. A tribally-owned and operated store could provide tribal members with both employment opportunities and the option of supporting a tribal business, thus helping to improve tribal members' economic situations. Contains 0.33 acres, more or less.	BIA	08/30/2013
2013-07	Rincon Band of Luiseno Mission Indians APNs: 133-120-12 Bureau of Indian Affairs --San Diego The subject property consists of land, encompassing ~5.49 acres more or less, commonly referred to as Assessor's Parcel Number: 133-120-12. The property lies within the exterior boundaries of the Rincon Indian Reservation.	BIA	08/30/2013
2011111044	Azusa Intermodal Parking Facility Project Azusa, City of Azusa--Los Angeles The proposed project analyzes two alternatives for an approximately 36-to 38-foot high, three-story parking structure with rooftop parking and 520 to 550 parking spaces that would serve patrons of the future Metro Gold Line Foothill Extension, Foothill Transit bus system, and Civic Center uses. The proposed project also includes four bus bays for loading and unloading passengers and for layovers and may include one electric bus charging station. The original alternative (Alternative 1) remains unchanged as described in the previous Draft EIR. The new alternative (Alternative 2) is located on vacant City-owned property north of the future Gold Line Azusa-Alameda Station. Construction of the proposed project is anticipated to begin in 2012 and be completed in 2014.	EA	08/30/2013
2013084001	Initial Scoping for Roads Rehabilitation Project EA National Park Service --Marin The NPS in cooperation with the Federal Highway Administration proposes to rehabilitate 22 miles of paved park roads and parking areas in Point Reyes National Seashore (PRNS) including Limantour Road and the roads to the Lighthouse and Chimney Rock. The purpose of the proposed action is to restore the structural integrity of these roads to ensure safe driving conditions for visitors traveling in the park, provide efficient parking space to support demand for recreational access in the park, correct road-related drainage problems, and reduce long-term road and parking area maintenance needs and costs. <u>Documents Received on Thursday, August 01, 2013</u>			
2012071082	Mission Cove Affordable Housing Oceanside, City of Oceanside--San Diego The project involves 288 units of income-restricted family and senior housing, with approximately 10,000 of commercial space. Ancillary improvements include a resident resource center, drive aisles and surface parking, common open space areas (pocket parks, plazas, pedestrian trails), landscaping, and stormwater management facilities. The project requires amendment of the existing land use and zoning designations of the subject site (from light industrial to residential and commercial).	EIR	09/18/2013
2013081003	301 East Jeanette Lane Project Santa Ana, City of Santa Ana--Orange The project proposes a 182-unit multi-family apartment project on the 2.008-acre site. The project would include a single structure that would consist of four levels of apartment units above two levels of parking (one level of parking at grade, and another below grade). As such, the proposed building would include five levels above grade and would reach a maximum height of approximately 60 feet. While the proposed project would consist of a single building, apartment units would be arranged around three large landscaped open air courtyards (one on each end and one in the center of the structure). The apartment units would include a mixture of one-, two-, and three-bedroom configurations.	MND	08/30/2013
2013082001	AT&T Mobility I-80 and Cummings Skyway Wireless Telecommunications Facility Contra Costa County --Contra Costa The applicant seeks approval of a land use permit to establish a wireless telecommunications facility on the subject property. The proposed facility will consist of outdoor equipment cabinets placed inside a steel platform and redwood fenced enclosure, which will be located within the footprint of a PG&E power transmission tower. Nine panel antennas will be mounted on the transmission tower legs, 15 remote radio units will be installed near the antennas and near the equipment enclosure, and two GPS antennas will be installed on an "H"-frame inside the equipment enclosure.	MND	08/30/2013
2013082004	L Street Reservoir and Pump Station Project Rio Linda/Elverta Water District --Sacramento The District is proposing to construct an approximately 1.2 million gallon (MG) water storage reservoir, pump station, control building, standby power generator, improvements to Well 12, and other minor improvements. The tank will provide redundancy in the distribution system in case of a well failure, and is an emergency provision in the event of a system-wide shut down.	MND	08/30/2013
2013082005	Abbott Lake Restoration Project Fish & Wildlife #2 Yuba City--Sutter CDFW has partnered with River Partners to conduct riparian vegetation and enhancement activities on 265 acres of riverside floodplain that are part of the 439-acre Abbott Lake Unit of the Feather River Wildlife Area located in Sutter County, CA. The Abbott Lake Restoration project includes two phases in three areas. The project area consists of three distinct activity areas: the North Field, the South Field, and the Enhancement Area. The restoration planting will occur in	MND	08/30/2013

	two phases on 169 acres of the project area: the 150-acre South Field in Phase I, and the 19-acre North Field in Phase II.		
2012122059	PA-1200237-Site Approval Application For a Farm Services Headquarters Office San Joaquin County Tracy--San Joaquin A Site Approval application for a farm services headquarter to be completed in three phases. Phase 1 to include the construction of a 1,440 sf modular office. Phase 2, with building permits to be issued within 3 years from the effective date of approval, includes the construction of a 5,000 sf cold storage building. Phase 3, with building permits to be issued within 5 years from the effective date of approval, includes the construction of a 2,916 sf, a 4,154 sf, and a 4,928 sf agricultural buildings and a 490 sf modular office.	Neg	08/30/2013
2013081001	El Centro Town Center Village Apartments El Centro, City of El Centro--Imperial The proposed project would subdivide 41 acres of vacant land into five parcels, and a remainder lot. Three of the parcels would be developed with a 247 unit apartment complex, while the remaining two parcels would not be developed but would be improved with dust preventative ground cover to the satisfaction of the City and the Air Pollution Control District. Apartments would range in size from 1,046 sf to 1,247 sf. Each three story building would be 9,460 sf and the total project building area would be 283,800 sf. A total of 565 parking spaces would be provided, including 240 attached garage spaces, 300 open parking spaces, and 25 garage/storage spaces for rent. The project also includes the expansion of an existing detention basin and related storm water conveyance infrastructure located just north of the proposed apartment site (west of 8th Street and south of Central Drain). When complete, the detention basin would be approximately doubled in size to accommodate a total of 915,840 cubic feet of water. Other site improvements include roadways, bicycle lanes, street trees, curbs, gutters and ADA access ramps, relocation of gas lines, and extension of other utility lines.	Neg	08/30/2013
2013081002	Housing Element/Implementing Zoning Code Amendments Hawaiian Gardens, City of Hawaiian Gardens--Los Angeles The Housing Element is a mandated element of the General Plan. The element identifies and assesses projected housing needs and provides an inventory of constraints and resources relevant to meeting these needs. Components of the Housing Element include: a housing needs assessment with population and household characteristics; identification of constraints to providing housing; an inventory of available sites for the provision of housing for all economic segments of the community; and a statement of goals, policies and programs for meeting the City's housing needs.	Neg	08/30/2013
2013082002	Visitor Accommodations Ordinance Amendment Santa Cruz County --Santa Cruz County General Plan Policy 2.16.7, associated program (a), and Section 13.10.333 of the County Code. Specifically, the proposed amendments, which apply to Type A accommodations in the commercial districts VA, C-2 and CT would: 1. Remove the existing density requirements of 1,300 sf per habitable room with a kitchen and 1,100 sf per habitable room without a kitchen;	Neg	08/30/2013

	<p>2. The number of stories would no longer be limited to three by the provision of subsection (A) of Section 13.10.333, but structures would remain subject to the limits on height in 13.10.333 and to design standards in Chapter 13.11;</p> <p>3. Amend Section 13.10.355 and 13.10.510 for consistency with the changes proposed in Section 13.10.335;</p> <p>4. Reduce parking requirements from 1.1 spaces per unit to 1 space per unit as outlined in Subdivision (B) of Section 13.10.552, of the Code. Outside commercial districts, eliminate the 1.1 spaces per unit standard and rely solely on the existing standard requiring 1 space per habitable room.</p>		
2013082003	<p>UC Davis Jan Shrem and Maria Manetti Shrem Museum of Art University of California, Davis Davis--Yolo</p> <p>UC Davis proposes to construct and operate the Jan Shrem and Maria Manetti Shrem Museum of Art building to provide space for displaying art, conducting art classes, and managing the UC Davis art collection. The new building would include approximately 30,000 sf of space and would be located on 1.6 undeveloped acres in the southern portion of the Central Campus at UC Davis in Yolo County.</p>	Neg	08/30/2013
2002082043	<p>Martin Slough Interceptor Project Eureka, City of Eureka--Humboldt</p> <p>As Phase 2b of the Martin Slough Interceptor Project, the City of Eureka is proposing to construct force main piping from the new Martin Slough pump station in the Eureka Municipal Golf Course to the Elk River Wastewater Treatment Plant using both trenching and trenchless methodologies, including horizontal directional drilling (HDD). The City is constructing the portion of this force main piping between the new pump station and APN 302-171-035 as a separate project (HDD Project). A portion of the HDD Project is the subject of this coastal development permit and includes approximately 1,300 LF of pipeline to be installed using horizontal directional drilling (HDD) methodology, pipeline laydown and staging areas, and temporary access improvements.</p>	NOD	
2006101002	<p>Reservoir 7990-2 Coachella Valley Water District --Riverside</p> <p>The California Department of Public Health (Department), as the responsible agency, will be issuing a water supply permit. The Coachella Valley Water District - Cove Community proposed project included construction of a 0.5 MG water storage tank and appurtenant structures.</p>	NOD	
2007091099	<p>Coachella Valley Water Management Plan 2010 Update Coachella Valley Water District Coachella--Riverside, Imperial, San Diego</p> <p>The proposed project is the conveyance by DWR of up to 16,500 acre-feet per year of RRBWSD's water to CVWD through 2035. The delivery of water to CVWD will be accomplished through the existing conveyance facilities by two means: (1) delivery of a portion of RRBWSD's allocation of KCWA's approved Table A to CVWD, as an exchange for a like amount of RRBWSD's water within KCWA's service area; and/or (2) conveyance of RRBWSD's water pursuant to Article 55 of CVWD's Water Supply Contract with DWR by direct delivery of RRBWSD's water into the Cross Valley Canal and then into the California Aqueduct in Reach 12E for subsequent delivery to CVWD.</p>	NOD

	<p>Bureau of Indian Affairs --Yolo</p> <p>Currently, the property contains five (5) single family homes, all owned by the Tribe. All are unoccupied, except for the residence on APN 160-030-016, which was restored by the tribe and currently houses the Tribe's Cultural Department. Nearly all of the Property is currently in agricultural production. Thirteen (13) of the fifteen parcels are subject to the California Land Conservation Act of 1965 (commonly referred to the Williamson Act), and notices of non-renewal of the Williamson Act contracts have been filed for each parcel. The Tribe contemplates development on portions of six (6) parcels, and continued use of the remaining portion of those parcels as well as the other nine (9) parcels for agricultural purposes. Of the +-852.9 acres, it is estimated that ~753.90 (over 88% of the Property) will remain in agricultural production. The Tribe's proposed use of the Property is the development of 25 residential housing units, a new Tribal school, cultural and educational facilities, a wastewater treatment system, and the remaining as continued use for agricultural purposes.</p>		
2011112022	<p>Reunification of Courthouse Square Project Santa Rosa, City of Santa Rosa--Sonoma Note: Extended Review per lead</p> <p>The project consists of the reunification of Courthouse Square. The project would involve removal of one block of Mendocino Avenue. The two existing park areas would then be rejoined to create one square. The square would serve as a central gathering place for Santa Rosa residents and visitors.</p>	EIR	09/25/2013
2012061057	<p>Grand Park Specific Plan Ontario, City of Ontario--San Bernardino</p> <p>The proposed project is the Grand Park Specific Plan for the development of a master planned residential community on approximately 320 gross acres of land. The Grand Park Specific Plan is divided into 10 planning areas and an approximately 130-net-acre Grand Park. Planning Area 10 includes a high school and Planning Area 9 includes an elementary school. The remaining planning areas contain a mix of low-density, medium-density and high-density residential development. Exhibit 4 of the IS shows the proposed land use plan. The Grand Park Specific Plan is comprised of 5 land use designations: 1) Residential: Low-Density (6-12 DU/AC Gross Max); 2) Residential: Medium Density (12-18 DU/AC Gross Max); 3) Residential: High Density (18-25 DU/AC Gross Max); 4) public schools; and 5) the Grand Park. The Specific Plan area anticipates the development of up to 1,327 residential units with trails and pocket parks, a high school, elementary school, and the Grand Park. It is also anticipated that Tentative Tract Map application(s), Development Agreement(s), and Williamson Act contract cancellation application(s) will be submitted in conjunction with the Specific Plan.</p>	EIR	09/16/2013

2012072055	Lee Vining Rockfall Safety Project Caltrans #6 --Mono Note: Notice of Availability of FONSI	FON	
	Caltrans proposes to reduce rockfall at six slopes along U.S. 395 north of Lee Vining in Mono County. The proposed project begins at post mile 52.3 and ends at post mile 53.7. The main purpose of the project is to improve safety for the traveling public and maintenance personnel by reducing rockfall from the existing steep slopes between these post miles.		
2013081004	Wellhead Treatment Project Ontario, City of Ontario--San Bernardino City of Ontario Wellhead Treatment Project which proposes to install infrastructure to treat groundwater that has been impacted by perchlorate and deliver the treated water to the City of Ontario's municipal water supply. The project will be funded by State Proposition 50. Specifically, the project proposes to pump water from existing City Well No. 41, convey the water through a new pipeline, where it will be treated in a new treatment plant, and discharge the treated water into the City's existing water distribution system. Well No. 41 is located on Hellman Avenue, approximately 300 feet south of the intersection of 5th Street, in the northeastern portion of the City. Water extracted from Well No. 41 will travel approximately 1,300 feet in new conveyance pipeline, to be constructed within North Hellman Avenue, to the new treatment plant, which will be constructed on East 4th Street near the intersection of 4th Street and Hellman Avenue. The new pipeline will be constructed of 16-inch cement-mortar lined and coated steel. The new treatment plant will be constructed within a City-owned vacant parcel that is approximately 50 feet wide and 100 feet deep. Once treated, the water will be pumped into approximately 200 feet of new conveyance pipeline to be constructed in 4th Street, between the treatment plant and the City's existing 36-inch water distribution pipeline.	MND	09/03/2013
2013081005	Well V817 Rose Valley Pipeline Installation Project Los Angeles Department of Water and Power --Inyo The Well V817 Rose Valley Pipeline Installation Project would install a 1,542 linear foot long, 8-inch diameter water pipeline along a dirt access road across an abandoned agricultural field in the Rose Valley area of Inyo County. The pipeline would transport pumped water from Well V817 to the First Los Angeles Aqueduct (LAA1), providing an additional water source from the existing well. The well would be equipped with a motor pump designed to withdraw a total of 1.5 cubic feet per second (cfs) of water through the new pipe to the LAA1. This would result in approximately 1,100 acre feet per year of water to be withdrawn from the well and delivered to the aqueduct.	MND	09/03/2013

	single-family dwelling and detached garage in the single Coastal Jurisdiction Zone; and a Mello Determination. The project site is an approximately 4,500 net sf lot in the RD1.5-1 Zone.		
2013081007	Vassar Solar Project Merced County Merced--Merced The proposed project is solar PV power generating system that would produce 3.0 megawatts of power. Nearly all of the on-site project improvements consist of solar panel arrays, and related inverter and transformer equipment. These improvements would be constructed within a development area of about 29.1 acres of a 39.9-acre parcel identified as APN 066-061-013-0000. The remaining 10.8 acres are comprised of setbacks from each side of the subject parcel within which no development other an access road and an underground interconnection cable would be constructed. Switchgear equipment would be mounted by PG&E on an existing electrical pole located along SR 59 (Los Banos Hwy). The project site address is 221 Vassar Avenue. Primary access is provided via SR 59.	MND	09/03/2013
2013081008	Site Plan Review 13-003 Palmdale, City of Palmdale--Los Angeles Note: Refer to MND submitted on 08/23/13. An application to construct a 35-megawatt ground mounted solar photovoltaic (PV) facility on a 160-acre site.	MND	
2013082007	1400 Page Mill Road Office Project Palo Alto, City of Palo Alto--Santa Clara The proposed project site involves three parcels [142-19-014 (1400 Page Mill Road), 142-19-011 and 142-19-012 (2670-2680-2690 Hanover Street)] that would be combined into one 199,940 sf site. The proposed project includes the demolition of two existing office buildings and the development of one 86,925 sf two-story office building with both below and at-grade parking; the square footage for the new building does not exceed the existing area of the two office building. The project site has the Stanford Channel, a concrete channelized waterway, running through it, which will remain undisturbed. The project includes the removal of approximately 100 trees and the installation of approximately 150 new trees and additional landscaping on the site. For the surface parking lot, photo-voltaic panels would be installed and utilized for shaded parking.	MND	09/03/2013
2013082008	45 Buckingham Residential Project Santa Clara, City of San Jose--Santa Clara General Plan Amendment #76 from community mixed use to high density residential & rezone from thorough fare commercial (ct) to planned development to construct a four-story 222 unit multi-family residential project with wrap parking structure & total of 375 on-site parking spaces, site improvements & landscaping in conjunction with demolition of an existing one-story commercial building. 2013088035	Walking Trail Restoration Fish & Wildlife #5 Los Angeles, City of--Los Angeles SAA #1600-2013-0073-R5 - The Applicant conducted the Walking Trail Restoration (project) in violation, without prior notification to CDFW. The perrmittee notified CDFW after the fact, about the restoration of an eroded portion of walking trail, located on the embankment of the GWWP, above a storm drain that enters the preserve from under New Hampshire Avenue. An existing decomposed granite trail began eroding and to prevent further erosion the City of Gardena restored the trail by taking the following measures: 1) All access to the site was through a gate on New Hampshire Avenue, approximately 50 feet north of the project site. All hauling was done by wheel barrow. 2) Two branches that supported a willow tree limb had to be removed for access to the project site. An arborist designed and installed a metal pole to support the limb that became in danger of falling. 3) Two cubic yards of clean improted soil was used to backfill the void and compacted. 4) Approximately 0.5 cubic yards of cement grout was used to immobilize five to ten inch diameter rock riprap, on top of the storm drain and in front of the repaired embankment, for stabilization. 5) Two inches of decomposed granite was compacted on top of the soil.	NOE	
2013088036	Dos Rios Ranch Fish Screens Reclamation District 2092 Modesto--Stanislaus The project will outfit existing irrigation pumps with fish screens approved by the National Marine Fisheries Service to prevent entrainment of juvenile salmoinds. 2 pumps will be outfitted: one pump on the San Joaquin River and one pump on the Tuolumne River.	NOE	
2013088037	Issuance of Streambed Alteration Agreement No. 1600-2013-0081-R1, Ford Bridge Project Fish & Wildlife #1 --Mendocino The project involves one encroachment activity and is limited to installation of a railcar bridge.	NOE	
2013088038	Pete's Creek Habitat Restoration Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe --Lassen Remove ten check dam structures and numerous culverts and restore the hydrology by reconnecting the channel to its floodplain. All ten check dams have been breached by high flows, which have resulted in culvert displacement, channel incision, erosion, and habitat degradation. The Applicant proposes to fill the incised gullies by using excavated material from the check dams and return the flow to the meadow surface by using either remnant historic channel sections or repairing the existing channel to mimic historic stable dimensions through riffle augmentation (raising the bed elevation and placing native rock to stabilize the channel).	NOE	
2013088039	Santa Ana State Building Access Barrier Removal Project General Services, Department of Santa Ana--Orange The proposed project would improve the accessibility, functionality and American's with Disabilities Act compliance of the existing State owned office building, which was constructed in 1973. <u>Documents Received on Wednesday, August 07, 2013</u>			
2013088051	Gas Pipeline 1816-01 Rodeo Creek Fish & Wildlife #3 --Santa Cruz The project is limited to the one time removal of understory vegetation over Gas Pipeline 1816-01. The vegetation trimming work is necessary to conduct gas pipeline leak surveys and to assess the necessity for future vegetation removal and maintenance within the gas pipeline right-of-way. An approximately 2-foot wide by 500-foot long foot path will be manually cut with hand tools within 2-4 inches of ground level. Vegetation removal shall cease within five (5) horizontal feet of the top of bank.	NOE	
2013088052	Streambank and Shoulder Repair on Calle del Arroyo, Stinson Beach Fish & Wildlife #3 --Marin The project involves creek bank/road shoulder stabilization along 13 linear feet of Easkoot Creek. Once aquatic species have been relocated and the work site dewatered, the creek bank and road shoulder will be excavated to about one-foot below the channel bed elevation and approximately 2-foot wide along the length of repair. The 12-foot by two-foot trench will be backfilled with 18-inch class riprap. The riprap will be placed into the keyway trench and filled to within about one-half of a foot from the road surface elevation. The riprap will then be capped with native soil, and salvaged grasses will be replanted. SAA #1600-2013-0153-R3.	NOE	
2013088053	Weaverville Water Conservation and Rainwater Catchment Demonstration Projects Trinity County Resource Conservation District --Trinity Installation of up to 20 rainwater catchment demonstration water storage tanks (capable of storing approximately 2,000 to 5,000 gallons per tank), pipes and irrigation systems at 4 public facilities to provide effective rainwater capture, water use, and public demonstration and outreach. The goal is to increase awareness of the potential and benefits of these systems. The actual number of sites implemented will be dependent to the total costs.	NOE	
2013088054	Eastern Turlock Subbasin Local Groundwater Assistance Grant Program Study of the eastern Turlock Subbasin Turlock, City of --Stanislaus, Merced In order to develop an understanding of the hydroeology of the eastern Turlock Subbasin and to apply that understanding to predict impacts of increased groundwater use on subbasin groundwater levels and quality, the City of Turlock (on behalf of the Turlock Groundwater Basin Association) is proposing to conduct a detailed hydrogeologic characterization of a 115-square-mile portion of the eastern Turlock Subbasin (Project Area). The Project will accomplish the following objective: Develop an updated hydrogeologic conceptual model for the aquifers and groundwater system in the Project Area * Document changing land use and groundwater use in order to better evaluate land use impacts on groundwater * Revise, expand, and apply a subbasin-wide numerical groundwater flow model as a tool to assist with land use planning and groundwater monitoring and management programs including the CASGEM program (supplementing the current monitoring plan that covers the Applicant's service area), mapping of recharge zones as required by Assembly /bukk 359, and implementation of the Turlock Groundwater Basin Association (TGBA) GWMP. 2013088055	Prado Park Utility Repair and Cattail Removal San Bernardino County Chino--San Bernardino The San Bernardino County Regional Parks Department proposes to drain Prado Park Lake in order to repair critical utilities at the lake bottom. While the lake level is down, cattails growing along the lake shore will be selectively removed via hand crews. This work is proposed to occur from October 1st until October 31st.	NOE	
2013088056	Citywide Recycled Water Conversion Project San Juan Capistrano, City of San Juan Capistrano--Orange The scope of the City Wide Recycled Water Conversion Project is to convert existing irrigation accounts which currently use potable water and connecting them to recycled water by installing recycled water meters and recycled water service connections to the recycled water mains along Rancho Vieje Road and San Juan Creek Road.	NOE	
2013088057	Aboveground Storage Tank Removal - Oceanside Area Office California Highway Patrol Oceanside--San Diego The proposed project would remove an 8,000 gallon aboveground storage tank (AST) and associated appurtenances, including but not limited to, dispensers, fuel pumps, tank footings, lighting structure, drive pads, fuel supply and vapor recovery lines, associated aboveground piping, waste oil tank, bollards and any additional items needing to be removed to bring the site back to the condition it was prior to the installation of the AST. If soil contamination related to the AST is discovered, the project will also include removal of up to 50 tons of contaminated soil. If contamination is more extensive, the remediation will be considered a separate action for purposes of CEQA. Any removal action will comply with applicable State and local environmental permitting requirements.	NOE	
2013088058	Underground Storage Tank Removal and Above Ground Storage Tank Installation - Alturas California Highway Patrol Alturas--Modoc The proposed project would remove a 8,000 gallon underground storage tank (UST) and associated appurtenances. To replace the UST, this project also involves installation of a 12,000 gallon aboveground storage tank (AST) and associated fueling appurtenances, including dispensers, fuel management system, bollards, monitoring systems, entrance/exit gates, and fuel canopy. Parking lots will also be re-paved and re-striped to comply with the Americans with Disabilities Act. If soil contamination related to the UST is discovered, the project will also include removal of up to 50 tons of contaminated soil.	NOE	
2013088059	Underground Storage Tank Removal - San Andreas Area Office California Highway Patrol --Calaveras The proposed project would remove a 6,000 gallon underground storage tank (UST) and associated appurtenances, including but not limited to, dispensers, bollards, concrete fuel island, lighting, kiosk, tank pad, fuel supply and vapor recovery lines, and all associated piping. The site will be returned to the condition it was prior to the installation of the UST. If soil contamination related to the UST is discovered, the remediation will be considered a separate action for purposes of CEQA.	NOE

2009042016	Addendum to the Adopted MND for the Biggs Wastewater Improvement Project Biggs, City of Biggs--Butte Note: Addendum The proposed Addendum to the Biggs Wastewater Improvement Project includes the same objective of bringing the existing wastewater plant into regulatory compliance, and most of the components of the originally proposed project, with the exception of the location of the proposed headworks. The WWTP currently does not have a mechanical headworks facility. The original project proposes installation of mechanical headworks at the existing WWTP site. The headworks consist of a mechanical screen designed to remove debris prior to the extended aeration device secondary treatment. The Addendum to the corner of the City Corporation Yard. The Corporation Yard is a disturbed site located 0.3 mile directly east of the WWTP and connected by an existing gravel road. Construction would occur on two adjacent parallel concrete channels at the Corporation Yard, one of which will include a mechanical screen, while the other channel will include a manual bar screen so that wastewater can be diverted around the mechanical screen during maintenance of high flow events. After screening, the wastewater will be directed into a flume structure equipped with a sensor to measure influent flows. The screened wastewater will then be pumped 0.3 miles west through an existing west through an existing pipe under the gravel road to the WWTP and inevitably to the existing facultative pond No. 1 in the WWTP. The pump station improvements at the Corporation Yard are the same analyzed in the Biggs Wastewater Improvement Project IS/MND (2009).	ADM	09/09/2013

2011-03	San Pasqual Band of Diegueno Mission Indians - APNs: 190-110-01, 03; 190-100-01,190-020-01, 05, & 190-031-06 Bureau of Indian Affairs --San Diego The subject property consists of six parcels of land, encompassing ~533 acres more or less, commonly referred to as APNs: 190-110-01, 03; 190-100-01,190-020-01,05, & 190-031-06. The parcels are contiguous to the San Pasqual Reservation. The vast majority of the subject property is located north of Lake Wohlford Road in the area of Valley Center, CA. ~20 acres was developed by previous owner's decades ago for agricultural use, which included two wood-frame houses (destroyed by wildfires in 2003), a paved access road from the highway, and three-hand-dug wells.	BIA	09/09/2013
2013021011	Vega Solar Project Merced County Los Banos, Dos Palos--Merced Project includes the development of a 20-megawatt photovoltaic solar array on approximately 165 acres. Electricity generated by the Vega project would interconnect with the existing Pacific Gas and Electric Los Banos-Canal-Oro Loma 70-kilovolt (kV) Line via an interconnection line directly west of the proposed project site.	EIR	09/23/2013
2013051009	San Joaquin Apartments and Precinct Improvements University of California, Santa Barbara Goleta--Santa Barbara Note: Extended Review The San Joaquin Apartments and Precinct Improvements Project will be located at the Santa Catalina Residence Hall on El Colegio and Stroke Roads (formerly known as Francisco Torres) at UCSB in Santa Barbara County. The Project will provide 2 to 3 story apartments and 5 to 6 story tower apartment style residential housing for approximately 1,000 new students along with additional housing for staff and faculty in conjunction with a new dining commons, a cafe, and a convenience store. There would be a 181-space surface parking lot and bicycle and pedestrian access. Recreational amenities would also be constructed.	EIR	10/24/2013
2012061092	2012 Bicycle Plan's First Year of the First Five-Year Implementation Strategy and Figueroa Streetscape Project Los Angeles, City of Los Angeles, City of--Los Angeles The proposed projects consist of the Bicycle Plan First Year of the First Five-Year Implementation Strategy and the Figueroa Corridor Streetscape Project. This proposed project would include the implementation of approximately 43 miles of projects (see Table 1, below). The proposed project consists of new bicycle lanes that would be striped along existing City of Los Angeles streets within existing rights-of-way as identified in Figure 1. Installation of the bicycle lanes is anticipated to take less than 12 months and would begin sometime in 2013.	FIN

2013082038	Consumer Products; Deodorants; Aerosol Coatings; Reactivity Tables; TestMethod 310; Hairspray Credit Repeal Air Resources Board --Sacramento Note: Functional Equivalent Doc & Review Per Lead Proposed regulatory amendments to Antiperspirants & Deodorants; Consumer Products; Aerosol Coatings; Reactivity Values Tables; Test Method 310; and Repeal of the expired Hairspray Credit Program would require various consumer products to reformulate products in order to reduce VOC or reactivity content to meet specified limits. Reformulations would result in VOC emission reductions that will reduce ground level ozone concentrations. The amendments would also streamline and clarify various regulatory provisions, improve enforcement, and add analytical procedures. Additionally, these amendments would strengthen enforceability of provisions for "Multi-purpose Solvent" and "Paint Thinner" to ensure that all of the expected benefits from ARB's regulation and the SCAQMD's Rule 1143 are fully realized.	Oth	09/26/2013
2013082039	Amendments to Alternative Fuel Conversion Certification Procedures Air Resources Board -- Note: Functional Equivalent Doc & Review per lead Similar to U.S. EPA's new regulations, the proposed amendments will establish streamlined requirements for manufacturers of alternative fuel conversion systems, which are needed because current demonstration requirements for certification of alternative fuel conversions are relatively time consuming and costly that potentially creates barriers for small volume conversion manufacturers to bring their product to market. The proposed modifications will reduce costs and time required to bring the conversion systems to market while preserving air emissions benefits. These changes will also create a single process for certifying an alternative fuel retrofit system, which would reduce the up-front demonstration requirements and allow systems to be sold sooner than they are under the current process.	Oth	09/26/2013
2008111048	Forest Lawn Memorial Park - Hollywood Hills Master Plan Los Angeles, City of --Los Angeles CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-201-0351-R5) for the project applicant, Forest Lawn Memorial-Park Association. 2013082044	<p>Clover Valley Reservoir Desilting and Supply Pipeline Project Placer County Water Agency --Placer</p> <p>The proposed project involves improving the operational efficiency of the Clover Valley Reservoir system and reducing future downstream siltation entering into the reservoir and Clover Valley Creek. The proposed project would restore the capacity of Clover Valley Reservoir and eliminate the sources of siltation and sediment that are currently being deposited into the reservoir. The project elements consists of (1) desilting the 2.2 acre Clover Valley Reservoir; (2) installing a permanent water supply pipeline from Antelope Canal to the reservoir; and (3) installing a temporary bypass pipeline to support delivery of water to Clover Valley Creek (and downstream water users) during reservoir desiltation activities.</p>	MND	09/10/2013
2013082042	<p>Nearby Lagoon Storm Drain Improvement Project Santa Cruz, City of Santa Cruz--Santa Cruz</p> <p>The project proposes to install stainless steel gates on the existing 48" storm drain culverts underneath the SCCRTC Branch Rail Line to facilitate cleaning; replace existing non-functioning hatch in the beach outlet vault with a new hatch to enable vault cleaning, install a temporary steel plate on the opening of the 66" gravity pipeline at beach outlet, line or repair above pipelines if needed using cured-in-place-pipe, investigate the optimum design for a small water evacuation pump station on the gravity line between the pump station and the beach outlet vault and install a small storm water evacuation pump station near the railroad bridge to facilitate cleaning.</p>	Neg	09/10/2013
1996103570	<p>Martinez Intermodal Project Martinez, City of MARTINEZ--CONTRA COSTA</p> <p>The project is limited to construction of a new vehicle bridge over Alhambra Creek, installation of an 80-linear foot culvert in an unnamed drainage channel, installation of two new storm water outfalls, and daylighting a 50-linear-foot culverted channel as proposed mitigation for project impacts. These improvements will be constructed as part of the larger Martinez Intermodal Facility Phase III project, an expansion and upgrade of the existing Martinez Amtrak station.</p>	NOD	
2003102095	<p>Woodland Davis Clean Water Agency Joint Intake and Fish Screen Project Reclamation District 2035 Woodland--Yolo</p> <p>The California Department of Fish and Wildlife is executing Lake and Streambed Alteration Agreement number 1600-2012-0209-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Reclamation District 2035/Woodland - Davis Clean Water Agency.</p>	NOD	
2007061044	<p>Foothill Parkway Westerly Extension Corona, City of Corona--Riverside</p> <p>The proposed work consists of constructing a berm on the upstream face of the dam and raising the height of the dam eight feet to accommodate a proposed new expressway that will span the dam, extending the existing low-level outlet to the new face of the dam, and modifying and extending the existing spillway to the new face of the dam.</p>	NOD

<u>Documents Received on Monday, August 12, 2013</u>			
2013088096	Frei Road Sediment Removal Project Fish & Wildlife #3 --Sonoma The project is limited to the removal of accumulated sediment along a 950-linear foot segment of stream. The roadside stream at this location along Frei Road is a captured ephemeral stream which exhibits more natural stream characteristics above and below the roadside segment. The roadside section of the stream is a natural deposition area with upstream residential and agricultural development contributing the stream's excess sediment load. The sediment removal will restore the capacity of the stream and alleviate roadway flooding. If water is present in the stream at the time of project operations, a coffer dam and settling basin will be constructed on the downstream end of the channel in order to prevent sediment from traveling downstream.	NOE	
2013088097	Creek Bank Repair Fish & Wildlife #3 Hillsborough--San Mateo The project is limited to the repair of the bank up- and downstream of the existing sack concrete wall to prevent it from being further undercut by the creek flow. The Permittee notified the CDFW for Emergency Work on October 15, 2012, which included placement of 8-inch to 12-inch rock covered with larger 18-inch rock along the toe of the bank below the sack concrete wall to prevent further erosion along the bank and undercutting of the wall. The new rip-rap will be keyed into the bank upstream of the wall, and the bank downstream of the the wall will be graded back before the rock will be keyed in. Willows, alders or other native vegetation will be planted on top of bank and within the rock rip-rap to help stabilize the bank. SAA #1600-2012-0455-R3.	NOE	
2013088098	Road Maintenance on Ephemeral Crossings Fish & Wildlife #3 Healdsburg--Sonoma The project is limited to the repair and replacement of two existing culverts and a rock ford crossing on an unnamed seasonal tributary to Felta Creek using a mini excavator operating from the existing road bed, as detailed below: Northwest Rock Ford Crossing: The crossing will be widened by approximately 5-foot using 1.5 - 2-foot diameter rock keyed into the bed and bank, then backfilled with graduated rock sizes. Northeast Cuvlert: The existing culvert will be replaced with a 30-foot long, 24-inch diameter HDPE culvert. Angular rock will be installed at the inlet and outlet of the culvert for scour protection. Southeast Culvert: The existing culvert will be replaced with a 15-foot long, 24-inch diameter HDPE culvert. Angular rock will be installed at the inlet and outlet of the culvert for scour protection. SAA #1600-2012-0417-3.	NOE	
2013088099	Bollinger Canyon Road Culvert Repairs Fish & Wildlife #3 San Ramon--Contra Costa The project is limited to the removal of sediment and debris from culverts and the repair and relining of the culverts at two locations: Bollinger Creek and San Catanio Creek. SAA #1600-2013-0145-3.	NOE

2013088100	Exterior Wall Rehabilitation at Casa de Estudillo (13/14-SD-03) Parks and Recreation, Department of --San Diego This project will repair the exterior walls of the CAasa de Estudillo adobe and direct the drianage away from the house, located in Old Town San Diego State Historic Park. It supports continued maintenance and use.	NOE	
2013088101	Research PProject Microbial Source Tracking and Verification Monitoring in the Santa Barbara Region University of California, Santa Barbara --Santa Barbara This is a research project that would gather data and understanding regarding what are the various fecal sources (i.e. human, septage, sewage, bird, dog, and cow) impacting freshwaters, surf zones, and groundwaters in Santa Barbara County, California (CA). Surface water samples and some groundwater samples would be taken during mainly summer months, with some winter time storm sampling. Samples would be analyzed at UCSB in a laboratory, to quantify fecal indicator bacteria, and DNA-based markers of human, bird, and dog fecal material.	NOE	
2013088102	Geotechnical Investigations - 01-0B500 Caltrans #3 --Mendocino The purpose of this drilling is to obtain information regarding the distribution and engineering properties of soil and rock, the distribution of ground water, and the likelihood of naturally occurring asbestos for the design and construction of the landslide stabilization proposed at this location.	NOE	
2013088103	Geotechnical Investigations 01-40280 Caltrans #3 --Mendocino The purpose of this drilling is to characterize the materials that will be encountered when a new culvert is placed 10 feet north of the existing culvert.	NOE	
2013088104	Northstar Defensible Space Grant, Phase II Northstar Community Services District --Placer The proposed project is derived from an awarded California Fire Safe Council grant that has allowed a phase II portion of the project to exist by providing additional funding for defensible space work on open common space areas adjacent to residential properties. The residential properties that are adjacent to this proposed work have been completed or are in the process of having State and District required defensible space work done to meet compliance. Both portions of the project are to create public safety in the event of a wildfire and are identified as Priority One in Northstar's Community Wildfire Protection Plan (CWPP). The project consists of four sites totaling 31.47. The project areas are located in the lower portion (northern) of the community of Northstar.	NOE	
2013088105	Geotechnical Investigations for the California High-Speed Train Program, Fresno to Bakersfield Section High Speed Rail Authority, California Unincorporated--Kern This project consists of geotechnical investigations for the purpose of gathering data to support preliminary engineering for the California High-Speed Train (HST) Project Fresno to Bakersfield Section. To achieve this, 13 exploratory soil borings and 34 cone pentrometer test (CPT) soundings will be conducted within public	NOE

2003111120	Hazardous Waste Facility Permit Modification and DEIR for Edwards Air Force Base Toxic Substances Control, Department of Lancaster--Kern, Los Angeles, San Bernardino Edwards has requested a Class 3 Permit Modification to their current hazardous waste (HW) Facility Permit to add two existing treatment units for open burn and open detonation (OB/OD) activities. Edwards current HW permit, issued by DTSC in November 2005 and effective through November 2015 allows Edwards to store onsite generated HW waste in containers. Currently, Edwards is authorized by DTSC to operate OB/OD treatment units from a June 1981 Interim Status Authorization pursuant to HSC Section 25200.5 and the January 19, 1993 Stipulation and Order. The authorization allows for operation of the OB/OD units only until DTSC makes a hazardous waste facility permit determination.	EIR	09/26/2013

2012041037	DANA Land Use Ordinance Amendment and Conditional Use Permit San Luis Obispo County Nipomo--San Luis Obispo The proposed amendments to the County's LUO would clarify the intent of the LUO by addressing emergency access conditions and updating design and approval standards. The amendment would remove the reference to the Southland Street Interchange, which is no longer proposed for construction by the County and the Caltrans, and add a requirement for privately-developed emergency access. The proposed LUO amendments also include minor updates to correctly identify land currently owned by DANA, design standards to maintain historical context and ensure continued preservation and restoration of the Dana Adobe, and a requirement for Master Plan and CUP approval. The proposed amendments would not remove any intended impediment to growth.	EIR	09/26/2013
2013081027	ZA-2013-1281(CU) Los Angeles, City of Los Angeles, City of--Los Angeles Conditional Use approval to permit the construction, use and maintenance of a childcare/day-care facility within two existing one-story single-family dwellings on an approximately 11,275 sf site in the R3-1, R1-1, and [Q]C1-1VL Zones. The facility would include four classrooms and approximately 3,177 sf of floor area within two buildings, outdoor playgrounds, a through driveway from Vantage Street to Burbank Boulevard for drop-off and pick-up of children, and 4 on-site parking spaces. The project does not involve any grading, but does include the removal of 1 eucalyptus tree. The facility would accommodate up to 50 children between 2-6 years of age, 5 to 8 staff members, and would operate from 8:00 a.m. to 5:00 p.m., Monday through Friday. The southerly dwelling frontage Burbank Boulevard was approved on March 21, 2013 for a change of use to a child care center for up to 20 children through a new Certificate of Occupancy. The requested conditional use approval would expand this use to also include the northerly dwelling fronting Vantage Avenue, and would expand the facility to up to 50 children.	MND	09/11/2013
2013081028	Poway Pump Station Secondary Power Source Project Ramona Municipal Water District Poway--San Diego The proposed project is located at the Poway Pump Station at the eastern edge of the City of Poway, in the Blue Sky Ecological Reserve. Lake Ramona is located to the north and Lake Poway is located to the south. The proposed pipeline would be located within an existing dirt access road that is located south of and generally parallels the Green Valley Truck Trail within the Blue Sky Ecological Preserve. The proposed new natural gas powered engine would be located at the existing Poway Pump Station. The Poway Pump Station is located on land owned by the Ramona Municipal Water District. The existing RMWD pipeline easement, which coincides with the dirt access road, traverses land owned by the City of Poway, County of San Diego, and State of California (in association with the Blue Sky Ecological Reserve).	MND	09/11/2013
2013081029	Beckman Coulter Facility Demolition and Remediation Project Fullerton, City of Fullerton--Orange The proposed project involves the demolition of the existing buildings (with the exception of the Administration Building) and above-grade associated facilities on-site and remediation activities to remove and treat VOC- and PCB-contaminated soils and VOC-contaminated groundwater. The IS addresses	MND	09/11/2013

	alternative methods of soil treatment and groundwater treatment. It is expected that demolition would occur between Oct. and Dec. 2013; soil remediation would occur between Oct. 2013 and Oct. 2014; and groundwater remediation would begin in Jan 2014.		
2013081034	Bloemer and Kirschenman Oil Well Project Division of Oil, Gas, and Geothermal Resources --Kern Project proposes activities necessary construct 6 well sites and drill and produce one well from each site.	MND	09/12/2013
2013082045	Ardenwood Farm Historic Buildings Demolition Project East Bay Regional Parks District Fremont--Alameda The proposed project is the demolition of three buildings of potential historic significance known as the Mowry Schoolhouse and the Bettencourt and Brown Houses which were moved from other locations in 1984-1985 and stored on cribbing at Ardenwood Historic Farm Regional Preserve. Previous efforts at restoration and reuse by the East Bay Regional Park District have been unsuccessful due to the high cost of renovation. Because of public safety issues, the Park District has proposed demolition without replacement of the three structures.	NOP	09/11/2013
1999041103	Southern Trails Pipeline Project California State Lands Commission The Project consists of removal of 200 feet of an existing pipeline and installation of a new segment of pipeline adjacent to the existing one. A 10-foot wide trench will be excavated to lay the new pipe in. All pipeline activates will occur within the ROW and all excavated soils will be stockpiled within the Project area and used to backfill the trench after installation. The Project will be accessed by an existing pipeline patrol road and an existing dirt road. Vehicles and equipment will be staged in an approximately 200-foot by 40-foot staging area located in an upland area on the patrol road on the north side of the drainage.	NOD	
2008092095	2010 Water System Engineer's Report Modesto, City of Modesto--Stanislaus The proposed project consists of two components: (1) the City of Oakdale 2030 General plan, and (2) a Climate Action Plan for the City of Oakdale. The 2030 General Plan outlines the City's long term public policies and sets guidelines for the use of the public and private lands within the City, the City's Sphere of Influence, and some areas adjacent to the City's Sphere of Influence. The Climate Action Plan sets goals to reduce greenhouse gas emissions by establishing City policies to incorporate environmental responsibility into the City's operations and management of residential, commercial and industrial growth. The Climate Action Plan also establishes responsible policies regarding education, energy and water ruse, air quality, transportation, waste reduction, economic development, and open space and natural habitats.	NOD	
2009051044	San Vicente Road Improvement Project San Diego County Escondido--San Diego The project proposes widening an approximately 2.25-mile segment of San Vicente Road. 	only permitted by the CA Air Resources Board to operate on the subject site a maximum of 60 days a year. Heavy equipment storage includes construction equipment (mobile concrete crusher, front-end loaders) and agricultural equipment.		
2013081043	2014-2021 Housing Element Stanton, City of Stanton--Orange The City of Stanton Housing Element identifies and analyzes the existing and projected housing needs; articulates the City's official policies for the preservation, conservation, improvement, and production of housing within the City; evaluates governmental and non-governmental constraints; and evaluates the past performance of the previous Housing Element Cycle.	MND	09/13/2013
2013081045	Sydney Peak Stone Kern County --Kern A CUP to allow for surface mining operations and development of a reclamation plan on 306 acres, in accordance with the Surface Mining and Reclamation Act (SMARA) of 1975. The 306-acre area consists of a proposed 125-acre mine expansion to a previously approved surface mining operation (CA Mine ID No. 91-15-0077).	MND	09/13/2013
2013081046	Curtis School Modifications to Master Plan Los Angeles, City of --Los Angeles Continued operation and maintenance of an existing private school (Curtis School) of 63,970 sf of floor area, with a 4,500 sf renovation/expansion of the Ahmanson building currently in progress and the proposed demolition of approximately 20,670 sf of buildings and construct approximately 82,440 sf of new school facilities. Seven new buildings and additions resulting in a net increase of 62,270 sf for a total project buildout of 130,240 sf, with a total of 223 parking spaces. Project construction would be phased over time and could start as early as the Summer/Fall of 2016 or as late as 2017 and end as late as 2035. A redesigned athletic field and parking area, as well as a proposed secondary limited access road from Mulholland Drive utilizing an existing Caltrans service road will be constructed and generate grading of 149,048 cubic yards of earth, including 12,681 cubic yards of off-site grading. Staffing, hours of operation, and programing will be expanded. No additional enrollment is proposed.	MND	09/13/2013
2013082048	1980 Las Trampas Road Ground Mount Solar Array Contra Costa County Alamo--Contra Costa The applicant is requesting approvals to modify the restricted development area and scenic easement required by condition of approval #6 of Subdivision 6419. This condition of approval granted the development rights within the scenic easement to the County. The applicant has proposed to install an ~18,500 sf solar panel array, where the solar panels will be mounted on to frames and the feet of the frames will be anchored to the ground within a portion of the scenic easement. In order to build the proposed solar array, the boundary of the restricted development area and scenic easement will need to be modified. To accommodate the ~18,500 sf of the scenic easement that would allow be allowed to the developed, an additional 18,500 sf on a separate portion of property would be dedicated as new scenic easement. 2013081038	San Miguel Community Plan San Luis Obispo County --San Luis Obispo San Miguel Community Plan Update.	NOP	09/13/2013
2013081039	Fort Independence Hotel and Casino Project Fort Independence Indian Community of Paiute Indians --Inyo The Tribe proposes to develop a combination Class II and Class III Gaming Complex and associated full service hotel structure (Proposed Project). The multi-phase development at build-out would include an approximately 80,000 sf of gaming floor accommodating up to 800 gaming machines and table games. The initial development phase would involve the construction of a fabric membrane structure occupying approximately 46,000 sf with 36,000 ft of gaming-related space and up to 60-room, four-story hotel tower. Phase 2 would include an expanded facility with increased gaming floor, restaurant space, and additional amenities. At full build-out the associated facilities would include a conference center and a multi-purpose event center, developed primarily by the conversion of the Phase 1 fabric membrane structure. Surface parking, included under both the first and second phases, would be constructed primarily to the south and east of the gaming structure with initial access to the project site provided from the existing Miller Lane intersection to the south of the project site. At full build out an additional access may be developed at the existing eastbound Fort Independence Road intersection with US 395.	NOP	09/13/2013
2013081040	Parcel 44 Development Los Angeles County --Los Angeles The proposed project consists of the demolition of all existing landside structures on Parcel 44 and redevelopment of the landside parcel. Proposed development includes 83,778 sf of commercial, office, retail, restaurant and boater serving uses. In addition, an open-air boat stacking/rack system will be included on the northwest portion of the project site along Bali Way, allowing outdoor storage of up to 44 boats (stacked three-boats-high), along with 13 "mast-up"/small sailboat storage spaces adjacent to the yacht club/boat repair building. The project proposes 479 on-grade parking spaces on the subject parcel, of which 284 are standard-dimensioned spaces, 11 are accessible spaces and 184 are compact parking spaces. 70 of the parking spaces are in a tandem configuration. The project also proposes 74 bicycle parking spaces.	NOP	09/13/2013
2013081037	Improvements to North Indian Canyon Drive and Dillon Road Desert Hot Springs, City of Desert Hot Springs--Riverside Construction will include: - Removing existing pavement. - The removed pavement will be repurposed (recycled) and used as part of 10 inch class II aggregate base. - 6,900 linear feet of curb, and gutter, will be constructed south of the intersection of North Indian Canyon Drive and Dillon Road to 20th Avenue. -The width of the proposed street improvements along the existing road alignment will range from 94 to 117 feet which is in accordance with Desert Hot Springs Major Arterial design standards. - Intersection improvements (inclusive of those mentioned above) will extend 250 linear feet to the north, west and east of the centerline of the intersection of North	Neg	09/13/2013

2013088149	CP 7248 Reservoir 3 Wells - Blending Improvements Cucamonga Valley Water District Rancho Cucamonga--San Bernardino The Water District is re-activating existing wells and will blend the groundwater with treated imported water at the Reservoir 3 site. The work include extending an existing 30-inch transmission line 450 lineal feet and performing on-site piping modifications and several connections to existing tanks. The goal is to decrease the Districts dependence on imported water from the State Water Projects.	NOE	
2013088150	Transfer of 2,500 acre-feet of Water to Westland Irrigation District State Water Resources Control Board --Butte Thermalito Water and Sewer District petitioned the Division of Water Rights under Water Code section 1725 for temporary change to transfer up to 2,500 acre feet of water under water right License 845 (App. 1739) to Westlands Water District. Temporary changes may be effective for a period of up to one year.	NOE	
2013088151	Quincy Orchard Irrigation Installation (Project ID No. 112) Parks and Recreation, Department of --San Diego A Prop. 84 Cultural Stewardship Grant has been awarded to CDD to construct improvements to the historic Quincy Orchard in Palomar Mountain State Park. One component of this project will install approximately 4,400 feet of underground irrigation line to a depth of between 14 and 20 inches below ground surface within the orchard. Underground irrigation will be placed in approximate location of current deteriorating above ground pipe.	NOE	
2013088152	LA-60 Ditch Maintenance Fish & Wildlife #5 Industry--Los Angeles SAA #1600-2009-0216-R5 - The project is limited to maintenance of the LA-60 Ditch, a section of Diamond Bar Creek characterized as a trapezoidal concrete-lined channel (1,200 lineal feet, 20 feet bottom width, 48 feet top width), to return the facility to the design standard. The project will occur in two phases. Phase one will consists of vegetation removal outside of the nesting bird season. Phase two will consist of annual operations and maintenance during the life of the agreement to maintain design capacity and prevent flooding of adjacent residences. Annual operations and maintenance will consist of inspection of the channel at least once in the spring after the rainy season and once in the fall prior to the start of the rainy season each year to verify structural integrity.	NOE	
2013088153	Remove Metal Beam Guardrail and Widen Existing Unpaved Shoulder (edge) Caltrans #2 --Trinity The Department of Transportation (Caltrans) proposes a state funded project to remove existing metal beam guardrail (MBGR) and widen the existing unpaved shoulder approximately 25 feet from the existing edge of travel way on (SR) 36 in Trinity County near Forest Glen. All work will be confined to the existing Caltrans DOT easement with the US Forest Service. The purposer and need of the proposal is to widen the unpaved shoulder of (SR) 36 and remove the metal beam guardrail to prevent snow removal vehicles from striking the metal beam guardrail and to provide safer access into the existing chain on area.	NOE
