

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

August 1 – 15, 2015

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **August 1 – 15, 2015**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

State Clearinghouse
1400 Tenth Street, Room 113

<u>Documents Received on Monday, August 03, 2015</u>			
2015082003	Tentative Parcel Map Application No. PLN2015-0052 - Wells & Sons Properties LLC. Stanislaus County Modesto--Stanislaus Request to divide a 3.52 acre parcel into two parcels of .64 acres and a 2.89 acre remainder. The parcel is currently improved with an existing 31,185 sf professional's office and 206 parking stalls.	CON	08/24/2015
2015081004	Environmental Assessment, Installation of Cathodic Protection on Calnev Pipeline, Soda Lake National Park Service Barstow--San Bernardino The EA analyzes a no action and three action alternatives to protect the Calnev Pipeline, two underground pipelines that cross Soda Lake playa in Mojave National Preserve. The Calnev Pipeline transports gasoline, diesel, and jet fuel from Compton, CA to Las Vegas, NV and points in between. Calnev proposes to install a cathodic protection system to prevent the pipelines from corroding and releasing hazardous liquids into the environment. Soda Lake was designated wilderness under the Wilderness Act by the 1994 California Desert Protection Act. Wilderness impacts are addressed in the EA.	EA	09/01/2015
2012051080	Teal Club Specific Plan Oxnard, City of Oxnard--Ventura Note: 60 Day Review The proposed project would involve annexation of the approximately 186-acre project area to the City of Oxnard, and adoption of a specific plan for the 174.6-acre Teal Club Specific Plan Area. The proposed Specific Plan would allow for up to 990 residential units in a variety of densities and product types on ~91 acres; up to 132,000 s.f. of business park development on ~10 acres; up to 60,000 sf of retail commercial uses on ~6 acres; ~8 acres for a school site; potential development of an ~14,000 sf Y.M.C.A. facility; ~21 acres of community park space and 4 acres of pocket parks and greenbelts; and a City fire station ~one acre. Eight additional parcels south of Teal Club Road would also be annexed and zoned Light Manufacturing (M-1).	EIR	10/05/2015
2013012003	I-80/SR-65 Interchange Improvements Project Caltrans #3 Roseville, Rocklin--Placer Caltrans - in cooperation with the Placer County Transportation Planning Agency; Placer County; and the Cities of Roseville, Rocklin, and Lincoln - proposes to improve the I-80/SR 65 interchange in Placer County, CA, to reduce future traffic congestion, improve operations and safety, and comply with current Caltrans and local agency design standards. Project limits consist of I-80 from the Douglas Boulevard interchange to the Rocklin Road interchange and SR 65 from the I-80 separation to the Pleasant Grove Boulevard interchange.	EIR	09/16/2015

<u>Documents Received on Monday, August 03, 2015</u>			
2015082001	Belmont SpringHill Suites Hotel Belmont, City of Belmont--San Mateo The project applicant proposes to construct a 169-room hotel intended to serve the technology corridor of Highway 101 (US 101). The four-story hotel would occupy a 147,668 sf (approximately 3.39-acre) lot set at the southeast corner of the intersection of Shoreway Road and Cormorant Drive. The proposed building would have a footprint of 22,675 sf and would provide a total building area of 91,465 sf, resulting in a floor area ratio (FAR) of 0.62. The project site is currently zoned M-1 Limited Manufacturing and it would be rezoned to C-3 Highway Commercial as part of the project approvals.	MND	09/01/2015
2015082002	Truckee Tahoe Airport District - Office/Warehouse Building (GP15-001; Z15-002; U15-004; EIS15-006) Nevada County Truckee--Nevada A proposed general plan amendment and rezone from IND/M1-SP to CC/C2. A use permit to construct a 12,840 sf office/warehouse building with 10,840 sf for office use and the remaining 2,000 sf for car rentals. Project includes associated improvements landscaping, lighting, signage storm drainage, widening of Truckee Tahoe Airport Road, and 322 parking spaces for the office use, rental car parking and long term airport parking. Approximately 130 employees will work at the site.	MND	09/01/2015
2015082009	Rutishauser/DRG Builders, Inc. TR-8218 and PLN2014-00173 Castro Valley Residential Subdivision Project Alameda County Dublin--Alameda The project proposal is to rezone and subdivide a 1.28 acre parcel into 7 single family lots ranging in size from approximately 5,565 sf in area to approximately 6,370 sf, gross area. The proposal would be inconsistent with the current PD District which allows C-N District uses. In addition, the project would require a General Plan Amendment to change the land use designation within the Castro Valley General Plan of Open Space-Park area to a Single Family Residential designation. The proposed lots would be accessed through a private street connecting to the south end of Clement Drive. Proposed housing is two-stories up to 28 feet in height, floor areas ranging from 2,355 to 2,938 sf. Two car garages would be provided each unit and 7 guest parking spaces.	MND	09/02/2015
2015082004	Security Communications Tower San Joaquin County Tracy--San Joaquin An ISD project to construct a 180-foot radio communications tower with equipment container, fencing, and 30' x 12' storage shed for storage of radio equipment. The purpose of the tower is to provide sufficient system capability to achieve broadband emergency radio coverage throughout San Joaquin County.	Neg	09/01/2015
2014082022	Gateway Station West Residential Newark, City of Newark--Alameda Note: Reference SCH# 2010042012 The project site is within the Dumbarton Transit Oriented Development (TOD) Specific Plan area with a purpose of facilitating development of a new neighborhood in close proximity to a train station planned separately as part of the	SIR	09/16/2015

	Dumbarton Rail Service (DRS) Project. The proposed project includes the development of ~589 single and multi-family residential units on ~41 acres, as well as approximately 13.5 acres of designated open space. The proposed residential development is consistent with the approved TOD Specific Plan area's Low-density Residential (LDR), Medium-density Residential (MDR), and Medium/High-Density Residential (MHDR) land use designation.		
2001082058	Oakland Army Base Area Redevelopment EIR Oakland, City of Oakland--Alameda Enhancement and preservation of sensitive wetland and riparian habitat, as well as the creation of new wetland, riparian and upland habitat areas adjacent to Agua Hedionda Creek.	NOD	
2004041045	State Route 138 Two-Lane Realignment Caltrans #8 Hesperia--San Bernardino CDFW is executing Streambed Alteration Agreement No. 1600-2015-0035-R6, pursuant to section 1602 of the Fish and Game Code to the Permittee, Caltrans, represented by Mr. Scott Quinnell. The SR138 Realignment Project, East of I-15 (project) includes the construction of three new bridges and wildlife crossings, placement of fill within CDFW jurisdiction, construction of eleven culverts associated with construction of 2.1 miles of 2-lane (39.4 ft wide) highway, removal of 15 existing culverts, and restoration of streambed currently within the existing roadway. The project also includes the demolition or obliteration and subsequent restoration of the existing roadway. The project will result in permanent impacts to 4.0 acres of CDFW jurisdictional, vegetated streambed and temporary impacts to 0.9 acres of CDFW jurisdictional, vegetated streambed. Ingress/egress will occur from the existing roadway, shall avoid all identified wetland areas, and minimize impacts to streambed habitats to the greatest possible extent.	NOD	
2006012092	Oakland Army Base (OARB) Auto Mall Oakland, City of Oakland--Alameda Final passage/adoption of an Ordinance Levying Special Taxes Within Community Facilities District No. 2015-1 (CFD; Gateway Industrial District).	NOD	
2012031014	Coronel Apartment Project Los Angeles, City of --Los Angeles The Proposed Project includes the demolition of four existing 2-story apartment buildings and the retention of two existing 1-story bungalow structures that are currently on the Serrano Property. The two bungalow structures to be retained contain three, 1-bedroom dwelling units and will be relocated on-site to have direct access from the sidewalk along the Serrano Ave. frontage. A new 3- to 4-story apartment building over one level of subterranean parking will be constructed behind the relocated bungalow buildings and will contain 51 new dwelling units. The Proposed Project would result in a total 54 dwelling units on-site, a net increase of 24 dwelling units compared to existing conditions and 56 subterranean parking spaces. All the proposed units will be reserved for low-income households except one unrestricted unit for the apartment manager.	NOD

2015081005	General Plan Amendment (GPA 14-005) Earlimart Community Plan Update Tulare County Tulare--Tulare 1: Land Use and Environmental Planning - Promote development within the planning areas next to Regional Highway 99 Corridor. 2: Improvements for a "disadvantaged community" 3: Strengthening Relationship with TCAG - An important benefit of this community plan process will be the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG) in that this community plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, Bike/Pedestrian Projects, and major state Transportation Improvement Program project.	NOP	09/02/2015
2015082005	1028 Canada Road Woodside, City of Woodside--San Mateo The applicant proposes to demolish two existing main residences and nine accessory structures including four barns, a loafing shed, a detached garage, a well house, an outhouse, and a shed; and construct a new main residence with a partial basement, a detached garage, two accessory living quarters, an accessory structure (office), swimming pool, vehicular gate, fencing, and other site and landscape improvements.	Neg	09/02/2015
2015082007	BUT 162 Traffic Signal Upgrade Caltrans #3 Oroville--Butte The project is located in Butte County on Highway 162 in Oroville, from post mile 16 to 16.7. At PM 16.4, the proposed project will upgrade the current traffic signal by installing four new signal poles, along with overhead mast arms and separate left turn phases for the 5th Avenue Streets. At this intersection, the project will also upgrade six curb ramps, upgrade drainage, upgrade signing and striping and striping, and improve the distressed pavement. A signal coordination system from PM 16 to 16.7 will also be improved.	Neg	09/02/2015
2015082008	PA-1500102 San Joaquin County Stockton--San Joaquin A site approval application for the construction of a 1,200 sf storage area for the expansion of an existing farm equipment repair shop.	Neg	09/02/2015
2015041054	Civic Center Project Long Beach, City of Long Beach--Los Angeles The project includes a new City Hall, a new Port Building for Harbor Department administration, a new and relocated Main Library, a redeveloped Lincoln Park, a residential development, and a commercial mixed use development. The project also includes the demolition of the former Long Beach Courthouse building. In total, the proposal includes six new buildings, three new parking garages, related infrastructure and landscaping, and two new public street extensions of Chestnut Avenue and Cedar Avenue through the project site. The Lincoln Park garage and Broadway garage would be preserve and would be used by city staff and public parking as it is today. Existing buildings that would be demolished include the former Long Beach Courthouse, Long Beach City Hall, and Long Beach Main	SIR	09/17/2015

2015041027	College Boulevard Mitigation Carlsbad, City of Carlsbad--San Diego Enhancement and preservation of sensitive wetland and riparian habitat, as well as the creation of new wetland, riparian and upland habitat areas adjacent to Agua Hedionda Creek.	NOD	
2015041069	North Norco Channel, Stage 11 Project Riverside County Flood Control and Water Conservation Norco--Riverside The District proposes to construct, operate and maintain the North Norco Channel, Stage 11 Project (Project). The Project area is currently served by an unlined flood control channel that does not have 100 year flood capacity. Therefore, the project is designed to provide 100 yr flood protection, allow revision of the Federal Emergency Management Agency (FEMA) mapping of Flood Hazard Areas and provide safe access across the road crossings at Sixth Street, Valley View Avenue and Corona Avenue. The proposed facilities consist of improvements to an aboveground channel (the North Norco Channel, or mainline) and installation of several underground storm drains (or laterals) that would feed into the channel. The project totals approximately 5,950 lineal feet of drainage improvements. These facilities would be constructed in phases, however, for the purpose of the environmental assessment, are collectively referred to as the North Norco Channel, Stage 11 Project.	NOD	
2015051055	ELA Station 55 New Reservoir Project State Water Resources Control Board Commerce--Los Angeles SWRCB as the lead agency will be issuing a water supply permit. 	site. The project is proposed as two phases with The Commons as Phase One and the new exhibition hall/circulation upgrades as Phase Two.		
2015082012	Toplean Minor Land Division (PMLD 20140068) Placer County Roseville--Placer The project proposes a Minor Land Division to divide a 2.87-acre parcel into two parcels consisting of 1.74 acres and 1.13 acres.	MND	09/03/2015
2015081006	McFarland General Plan Amendment McFarland, City of McFarland--Kern The City proposes a General Plan Amendment to amend the Land Use Element to add two new land use designations, establish new policies and objectives associated with the new land use designations and other development within the planning area, and amend the Land Use Map to assign land uses to specific areas within the SOI and change existing land use designations for several properties within the City boundaries. Approximately 4,850 dwelling units and 24.8 million square feet of non-residential sf could be accommodated based upon the land use designations and estimates for the amount of development that could occur within the planning area over the next 25 years (to approximately 2040) if all sites with the opportunity for development are developed to their identified potential. However, it should be noted that the project does not propose site-specific development on any site within the City or SOI. Individual development projects would occur in incremental phases over time, based largely on economic considerations, market demand, and other planning considerations. The phasing and exact details of each project would be evaluated on a case-by-case basis. No development is proposed or associated with the GPA.	NOP	09/03/2015
2015082013	Michigan Bar Road over Cosumnes River Bridge Replacement Sacramento County Rancho Murieta--Sacramento The project involves the demolition of the existing bridge and construction of a new prefabricated pony truss bridge to improve roadway safety. The new bridge will be placed in the same location as the existing bridge; but will be slightly wider to accommodate safer passage.	NOP	09/03/2015
2001031043	San Antonio Creek Crossing Repair Santa Barbara County Flood Control District Santa Barbara--Santa Barbara CDFW is intending to execute a Streambed Alteration Agreement (#1600-2015-0053-R5) pursuant to section 1602 of the Fish and Game Code to the project applicant, the Santa Barbara County Flood Control District. The project proposes to temporarily and permanently impact an unknown acreage of streambed/lake due to various maintenance tasks that are determined and conducted on an annual basis. The majority of the project activities proposed will result in temporary impacts to vegetated habitat using a 1:1 acreage to replacement ratio. A 3:1 acreage replacement ratio will be applied for permanent impacts.	NOD

2015061012	<p>Pfeiffer Falls Trail Parks and Recreation, Department of --Monterey</p> <p>The proposed project includes improvements to existing trail segments (1060 linear feet) and construction of a new trail segment (1500 linear feet). The new trail segment would replace the previously existing Pfeiffer Falls Trail which was damaged by wildfire and has been closed to public access since 2008. The improved and new trail segments would provide enhanced pedestrian trail access within the Pfeiffer Big Sur State Park. Trail improvements to the existing segments would feature a five-foot wide compacted aggregate surface contained in redwood header boards. The new segment would be a five foot wide natural surface trail. Wood steps, split wood rail fencing, and rock retaining walls would be installed where needed in areas of steep slopes and to protect natural resources. Two existing gathering areas and new canyon overlook would be improved with a compacted base, rock retaining walls, benches and interpretive kiosks/displays. The proposed project also includes a new 70-ft long free spanning pedestrian bridge that would also be constructed further up the creek corridor over an unnamed tributary.</p>	NOD	
2015061072	<p>ATP - Murrieta Road Improvement Perris, City of Perris--Riverside</p> <p>The Murrieta Road Improvement project consists of the following improvements along existing Murrieta Road, a two lane roadway, from San Jacinto Avenue to the Line "J" Storm Channel to the north: sidewalk installation, bike lane installation, access ramp upgrades and intersection improvements. New sidewalk, curb, and gutters would be installed along the west side of Murrieta Road between Dale Street and Patriot Lane, between Mildred Street and Crystal Creek Road, and between Neuvo Road and the existing bridge over the Line "J" Storm Channel. New sidewalk would also be installed on Dale Street between Murrieta Road and Wilson Avenue. The proposed project would also involve installation of a traffic signal and intersection improvements at Nuevo Road, construction of a new 10-ft wide pedestrian/bicycle slab bridge over the existing Metz Storm Channel at Patriot Lane, and installation of a new suspended bicycle bridge over the Line "J" Storm Channel.</p>	NOD	
2015061077	<p>ATP - Perris Valley Storm Channel Trail Perris, City of Perris--Riverside</p> <p>Replacement of an existing decomposed granite and dirt maintenance road along the Perris Valley Storm Channel with a 10-foot wide asphalt pathway for bicycling and a five-foot wide decomposed granite pathway for pedestrian use. A six by eight inch concrete mow curb will separate the trail from the adjacent channel slope. The mow curb will be notched every 10 feet for drainage and would be set two inches above the slope grade and one inch above the trail. Land opposite the Perris Valley Storm Channel would be landscaped to the property line or to a minimum of 10 feet from the property line at City-owned properties. Landscaping would consist of native, drought resistant vegetation along with a drip irrigation system.</p>	NOD

Two soil nail walls would be constructed: one near post mile 33.15 that would be 10-12 feet tall and 115 feet long and one near post mile 33.20 that would be 8-10 feet tall and 100 feet long.	NOD	
2015089006	Lake or Streambed Alteration Agreement No. 1600-2015-0263-R1 Upper Dogget Emergency Timber Operations 2-15EM-077-SIS. Fish & Wildlife #1E --Siskiyou The project is limited to 1 temporary dry skid trail crossing or Spittler style encroachment along an unnamed Class II watercourse. If water is present during operations, a Spittler crossing shall be utilized. If the watercourse is dry, the crossing may be used as is. Upon completion of operations, banks shall be pulled back to create a broad U shaped feature to channel water in the future. Exposed soil outside the channel shall be slash packed approximately 50' in each direction.	NOD	
2015089007	Lake or Streambed Alteration Agreement No. 1600-2015-0262-R1 CLT Xmas Tree Ridge Emergency Timber Operations 2-15EM-067-SIS. Fish & Wildlife #1E --Siskiyou The project is limited to 2 encroachments including the installation of a permanent vented ford at map point A and permanent corrugated metal pipe (CMP) and map point B. These structures shall be constructed and maintained in such a way so as to withstand 100-year flows.	NOD	
2015089008	Lake or Streambed Alteration Agreement No. 1600-2015-0239-R1 Wolf Creek Emergency Timber Operations 2-15EM-070-SIS. Fish & Wildlife #1E --Siskiyou The project is limited to one permanent culvert crossing along Wolf Creek. It is an existing crossing that is currently downcut sufficiently where minimal excavation will be required. A 24" corrugated metal pipe (CMP) shall be used to capture flows. Culvert calculations have been performed utilizing the rational method. Minor bank disturbance will occur. Large rock shall be placed along culvert and at the inlet and outlet. This structure shall be constructed and maintained in such a way so as to withstand 100-year flows.	NOD	
2015089010	Nathanson Creek Preserve Project (Lake or Streambed Alteration Agreement No. 1600-2015-0018-R3) Sonoma, City of --Sonoma CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2015-0018-R3, pursuant to section 1602 of the fish and game code to the project applicant, Sonoma Ecology Center, Mark Newhouser. The current work, which is part of a larger overall plan of action to create a healthy riparian corridor through the Preserve, will occur on a City-owned parcel and at the existing Demonstration Park that is also owned by the City of Sonoma. The primary goals for the current project are to: 1) reduce frequency and impacts of overbank flooding and erosion; 2) enhance aquatic and riparian habitat; and 3) continue to promote opportunities for community education and stewardship. This	NOD

2015088045	<p>Grizzly Flat Fuel Reductio Project GF 12 Forestry and Fire Protection, Department of --El Dorado The use of rubber tired or tracked vehicles to cut, chip, and scatter all shrubs and small trees up to 10" diameter at breast height (dbh) (4 1/2) above the ground on the uphill side. Trees shall be spaced approx. 20' between tree trunks. Trees in order of importance and to be retained on site if possible: 1) Sugar Pine, 2) Dogwood, 3) Ponderosa Pine, 4) Douglas Fir, 5) Black Oak, 6) Cedar 7) White Fir. Retention of these trees is important but meeting the spacing requirements is the more important consideration. All trees not removed in the project area will be limbed up to 8 feet above the ground surface. Brush cover shall be reduced by creating a mosaic of treated and untreated shrubs. Openings between shrubs shall be twice the height of the shrubs and 70%-90% of the shrubs shall be treated. Brush that is treated shall be cut to the maximum of 6 inches in height no individual pieces of cut material shall be greater than 4 feet long. All masticated stumps shall be cut to within 6 inches of the ground. No debris shall average more than 6 inches in depth over project area. All cut vegetation will be kept within the project boundaries. Any cut vegetation falling into ditches, roads, road banks, trails, or adjacent parcels not within the project boundaries shall be immediately removed. Hand Thin11 Acres The hazard fuels reduction work on the properties fronting on Wooded Glen Drive, Wood View Court, Golden Aspen Drive, and Grizzly Flat Road shall be done with hand crew labor using chainsaws. Hand thinning shall include: Trees, up to 6" diameter at breast height (dbh) or 4 1/2 feet above the ground on the uphill side, shall be cut with 20' spacing between leave trees (trees not cut), unless otherwise designated by the Project Coordinator. All stumps will be cut to within 6" of the ground and with their cup stump tops approx. level. Leave trees shall be limbed up to 8' above the ground, but not more than 1/3 of a tree's total height; limbed material shall be treated by chipping. No surface debris shall average more than 6" in depth over the entire hand thin Treatment area. Trees in order of importance and to be retained on site if possible: 1) Sugar Pine, 2) Dogwood, 3) Ponderosa Pine, 4) Douglas Fir, 5) Black Oak, 6) Cedar, 7) White Fir. Retention of these trees is important but meeting the spacing requirements is of a greater importance. Piling Cut Materials All cut trees, shrubs and trimmings shall be dragged or otherwise moved to the roadside edge and piled for chipping by others. Chipping Mechanical chipping redistributes forest vegetation, cut with chainsaw as a part of hand thinning, back into the forest environment. chips shall be blown back onto the ground and scattered ont he project area at a relatively uniform depth not to exceed 3".</p>	NOE

2015081011	Ventura Harbor Marina and Yacht Yard Expansion Ventura Port District Ventura--Ventura The project involves expansion and improvements of the existing Ventura Harbor Marina and Yacht Yard to increase the number of boat slips from 40 to 80 (40 new boat slips). The proposed expansion involves removing the existing dock structure, concrete ramps, a portion of the existing pier, and fuel docks; construction of an expanded dock structure; relocation of the fuel dock; onshore parking improvements; and other related facility improvements. The expanded dock would extend further into the main channel of Ventura Harbor as compared to the existing dock, but would be consistent with the channel limit considered by the Ventura Port District Commission in June 2014. The proposed parking improvements would require removal of several mature palm trees and other landscape elements.	MND	09/04/2015
2015082015	Cader Corporate Center Petaluma, City of Petaluma--Sonoma The applicant has applied to the City of Petaluma for Site Plan and Architectural Review for the development of three concrete tilt up warehouse buildings, totaling 267,840 sf in floor area, to house light manufacturing / processing and wholesaling/distribution uses. The project site is situated at the southeastern portion of Petaluma, the approximate 20.41 acre project site is substantially covered by an asphalt-paved parking lot from an abandoned office development.	MND	09/04/2015
2015082016	Altura Apartments Petaluma, City of Petaluma--Sonoma The applicant, The Reliant Group, is requesting Site Plan and Architectural Review approval to authorize development of one-hundred fifty residential apartments contained within five separate three-story buildings. Occupancy in 15% of the project is proposed to be restricted to low and very-low income households. The project would implement a General Plan suggested "road diet" by restriping Baywood Drive, between Alterwood Court and Perry Lane, to include one travel lane in each direction, insert a center turn lane, and provide on-street parking along the project site frontage.	MND	09/04/2015
2015082018	Voltaix LLC - Mixed Use Development (PLN15-00092) Placer County --Placer The project proposes a Minor Use Permit to include the merger of 12 existing lots to create three resultant lots and construction of two, two-story commercial buildings with 9,389 sf of commercial use on the first floors and five residential units in conjunction with commercial uses on the second floors. 2015088064	204 Evergreen - Reed Creek Repair Project Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland Unincorporated--Marin The Project seeks to repair a stream bank damaged in December 2014 by stormwater discharged from a misplaced drain pipe, which has subsequently been moved to a proper location. The repair will be performed by implementing bioengineering methods utilizing rock and willow stakes that will enhance 24 square feet and 5 linear feet of creek by reducing erosion and sedimentation and generating a canopy of native riparian vegetation. 2010091023	Olancha/Cartago Four-Lane Project Caltrans #6 --Inyo Note: 60 Day Review Caltrans, as CEQA lead agency, and the Federal Highway Administration, as NEPA lead agency, propose to convert approximately 12.6 miles of the existing US Highway 395 from a two-lane conventional highway into a four-lane expressway or partial conventional four-lane highway from post mile 29.2 to post mile 41.8 in Inyo County. The project proposes six alternatives with varying amounts of construction on new alignments.	EIR	10/12/2015
2014051041	West of Devers Upgrade Project Public Utilities Commission Loma Linda, Colton, Beaumont, Banning--Riverside, San Bernardino Remove existing 220 kV transmission structures and replace with new structures along a 45 mile existing transmission line right-of-way. Extends from Devers Substation (North Palm Springs) to Vista Substation (Grand Terrace) and San Bernardino Substation (San Bernardino).	EIR	09/21/2015
2014072044	Trellis Residential Project Walnut Creek, City of Walnut Creek--Contra Costa The project includes the construction and operation of a single-family residential community comprised of up to 71 single-family detached residences, as well as associated improvements including roads, drainage, utilities, and landscaping. Each home would consist of a three-story structure not to exceed 40 feet in height. As part of the project, the existing community center and associated structures will be demolished and commercial plant nursery removed, and site graded and developed. However, the adjacent Tice Valley Community Gymnasium and Tice Valley Neighborhood Park will remain in place. To accommodate consolidation of parking spaces currently spread throughout the project site, the project applicant will enlarge the existing parking lot just north of the gymnasium and will improve this area with new landscaping and lighting.	EIR	09/21/2015
2014111024	Pechanga Resort Hotel Expansion Project Pechanga Band of Luiseno Indians Temecula--Riverside The Project includes the development of new facilities on a 54-acre Project site that would directly support the existing Pechanga Resort and Casino. New facilities include a hotel wing, events center, spa, resort pool and stage area, event lawn, warehouse storage, parking structure, surface parking, and associated infrastructure. Total indoor building floor area for all new uses, including all below grade areas, is approximately 717,600 sf. The Project includes 20,800 sf of tenant improvements to existing facilities and reconfiguration of internal access roads, parking, and utilities. The Project does not propose additional gaming uses.	EIR	09/21/2015
2015021050	Innovation Village @ Campus South California State University, Pomona Pomona--Los Angeles Future development of the Innovation Village @ Campus South site with a range of uses, including student and faculty housing, as well as retail, commercial, and commercial/warehouse uses developed through public-private partnerships pursuant to the Precinct Plan. 2012111079	PG&E Topock Compressor Station Soil Investigation Project EIR Toxic Substances Control, Department of Needles--San Bernardino Notes: 1 CD Soil within the PG&E Topock Compressor Station fence line and surrounding vicinity has been affected by historical releases of contaminants of potential concern. The proposed Project involves soil investigation activities including soil sampling and sample analysis, bench scale tests, pilot studies, geotechnical evaluations, and plant and other biota sampling to support ecological risk assessment. This document is the revised Biological Resources section of the PG&E Compressor Station Soil Investigation Project DEIR. As lead agency, the Department of Toxic Substances Control is exercising its discretion by affording agencies and the general public an opportunity to review additional information incorporated into the DEIR subsequent to the original public review period. Modifications to the Biological Resources section resulted primarily from new information and surveys related to several bat species, conducted, in part, in response to comments on the DEIR from the CDFW and additional information discovered during the environmental impact report process regarding Nelson's bighorn sheep.	FIN	
2015081012	Vista Grande and Culinary Support Center Project California State University Trustees San Luis Obispo--San Luis Obispo The Vista Grande component includes the demolition of the existing 20,000 sf dining facility, and the construction of a 39,000 sf dining facility including approx. 33,000 sf of dining facilities, 5,000 sf of office space, and a 1,500 sf market. Includes landscaping, planter boxes, and access paving. The disturbance area is approximately 1.5 acres, including the excavation of 2,000 cubic yards of soil and import of 1,000 cubic yards of fill. The Culinary Support Center component includes the demolition of 4,150 sf of an existing warehouse, and construction of a 4,000 northern expansion and 8,059 sf southeastern expansion. Project includes replacement of existing 400 ft of sewer line. The disturbance area is approximately 0.5 acre, including the excavation of 800 cubic yards of soil and import of 800 cubic yards of fill.	MND	09/08/2015
2015081014	North Grasslands Water Conservation and Water Quality Control Project Grassland Water District Gustine--Merced Grassland Water District proposes to construct and operate water conveyance facilities and associated pumps and structures, to intercept and recirculate high-quality maintenance flows and operational spill from existing District conveyance during the fall and early winter. The project would recover approximately 5,200 to 16,500 acre-feet annually to meet demands within the managed wetlands of the Grassland Resource Conservation District. As a result of these efficiency improvements more water will be available for optimum habitat management.	MND	09/08/2015
2015082021	West Lake Tahoe Regional Water Treatment Plant Tahoe City Public Utility District --Placer The Tahoe City Public Utility District proposes to construct a new domestic drinking water treatment plant using Lake Tahoe surface water as its source. The proposed West Lake Tahoe Regional Water Treatment Plant would include	MND	09/08/2015

	installation of submersible intake pumps within Lake Tahoe, a power line between the pumps and the electrical and chemical feed room, a raw water pipeline from the lake intake to the proposed WLTRWTP, treated water distribution pipelines from the WLTRWTP to the existing MQWSA water distribution system. An intake pump station electrical and chemical feed room and a WTP facility would be constructed. The existing lake intake pipeline and Interim Surface WTP would be replaced/decommissioned. The project would also include a land exchange between the TCPUD and California Tahoe Conservancy.		
2015081013	San Diego Bay and Imperial Beach Oceanfront Fireworks Display Events Project San Diego Unified Port District San Diego, Chula Vista, Coronado, Imperial Beach--San Diego The project involves fireworks display events (events) in and around San Diego (SD) Bay and the Imperial Beach (IB) Oceanfront for a period of ten years. Events include the Big Bay Boom and other smaller events operated by the District's tenants. Typically, fireworks associated with these events are detonated from piers, flight decks, and/or barges located adjacent to and in the waters of SD Bay and the IB Oceanfront. Spectators for each of the events typically gather in public parks and public areas surrounding the event locations, utilizing the surrounding roadway network and public parking facilities. Approx. 50 events take place or are allowed to take place in and around SD Bay and the Pacific Ocean near IB annually. The project assumes an annual growth rate of approximately 2% in the number of events to occur in and around SD Bay and the Pacific Ocean near IB.	NOP	09/08/2015
2015082019	PA-1500021-Site Approval Application to Expand an Existing Lumber Re-Manufacturing Facility San Joaquin County Lodi--San Joaquin A Site Approval application to expand an existing lumber re-manufacturing facility by constructing 4 storage sheds totaling 24,000 sf and converting 2 existing warehouse buildings totaling 100,000 sf to manufacturing buildings. The applicant is requesting a parking and surfacing modification.	Neg	09/08/2015
2014112039	Saban Design Review and Variance Neg Dec Marin County --Marin The proposed project is to complete the demolition of a pre-existing 870-square foot residence (of which all but 265 square feet has already been demolished) and construct a new residence on the vacant lot. The total proposed building area would be 1,429 square feet, consisting of 940 square feet of floor area and a 488 square foot garage. The proposal also includes 46 square feet of covered porches. The proposed project would result in a floor area ratio of approximately 5 percent on the 17,890 square foot lot. The proposed residence would reach a maximum height of 22 feet above surrounding grade and the exterior walls would have the following minimum setbacks: 20 feet from the top of the stream bank; 62 feet from the eastern from the eastern front property line; 66 feet from the northern side property line; 26 feet from the southern side property line; and 8 feet 3 inches from the western rear property line. Various site improvements are also proposed, including a vehicle bridge and a footbridge across the stream, a new septic system, a six foot high fence in the front yard, low retaining walls, a parking area made of pervious pavers, and landscaping. An existing above-ground, two story parking garage and adjacent two story building at this location would be demolished, an existing surface parking lot would be removed, and a new six story, mixed use building would be constructed. This building would house an approximately 42,000 sf grocery store on the ground floor. The grocery store would be occupied by a Whole Foods Market. Customer parking would be located on the 2nd and 3rd floors. Approximately 141 apartments in a range of sizes from approximately 544 sf studios to approximately 1,330 sf, two bedroom units would be constructed on the 2nd through 6th floors of the building. A club and fitness center for residents, along with an outdoor kitchen, dining, and lounge spaces, would be located on the 4th floor of the building.</p> <p>The 2101 Capitol Avenue component of the project proposes to replace the existing surface parking lot with a six-level structure with approximately 13,000 sf of retail/commercial space and parking for the retail on the ground floor. The structure would include an additional five levels of parking above the ground floor. The replacement parking structure would serve the existing 2020 L Street offices, which are currently served by the two-story parking garage to be demolished on the 2025 L Street property. This new parking would also replace the existing surface parking on the 2101 Capitol Avenue property.</p>	NOD

2014122048	<p>The 2015 Fisheries Restoration Grant Program Fish & Wildlife #2 --Santa Cruz</p> <p>The project is limited to restoring and providing access to a total of 1.94 acres of off-channel non-natal winter rearing habitat on the floodplain of Jacoby Creek for juvenile coho salmon. Of this area, a total of 1.76 acres will be low gradient, low velocity, complex habitat sought out by juvenile salmonids for rearing and high-flow refugia. The off-channel habitat will be restored within two historical meander bends of Jacoby Creek that have since become disconnected with the main channel.</p>	NOD	
2015022040	<p>White Slough Restoration California State Coastal Conservancy --Humboldt</p> <p>CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2015-0073-R1, pursuant to section 1602 of the fish and game code to the project applicant, Mr. Eric Nelson representing USFWS Humboldt Bay National Wildlife Refuge. The project is limited to 1 encroachment to temporarily realign stream channel and divert flows in the terminal reach of Chism Creek to dewater an access and staging area for a larger tidal wetlands restoration project (26 acres), and upon completion realigned and restored channel into the middle basin of the restoration area (approximately 580 ft in length and 820 cu yds of excavation), and the banks planted with riparian vegetation.</p>	NOD	
2015042031	<p>Tobin Fire Flow Project Feather River Canyon Community Services District --Plumas</p> <p>CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2015-0080-R2, pursuant to section 1602 of the fish and game code to the project applicant, Jeffrey Wilson, Feather River Canyon Services District.</p> <p>The project is limited to the replacement of the existing pipeline that was destroyed during the 2008 fires with a new 4-in and 6-in line to a new 60,000-gallong capacity storage tank. The water will be diverted for the purpose of fire protection and distributed to a series of hydrants throughout the Community of Toblin. The project will divert a max of 7,000 gallons per day as needed to fill the storage tank. Installation of the horizontal well screen within the diversion structure within Jackass Creek will be completed with an excavator. The excavator will be used to place cofferdams for water diversion, if needed, and to restore the channel to the original shape.</p>	NOD	
2015052029	<p>YUB-20 & 70 ADA Improvements Project Caltrans #3 Marysville--Yuba</p> <p>Caltrans proposes to upgrade existing or install new pedestrian infrastructure at various locations along SR 20 (PM 0.5/2.0) and along SR 70 (PM 14.1/15.2) in the City of Marysville in Yuba County. The proposed improvements would include: installing new or upgrading existing curb ramps, cross-walks, pedestrian crosswalk signals and driveways to ensure compliance with current Americans With Disabilities Act standards.</p>	NOD

	of water from underflow of the Trinity River, pursuant to a legal riparian water right.		
2015088081	Eel River Estuary Preserve: Failing Culvert Replacement Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Ferndale--Humboldt The primary purpose of the project is to replace the existing failing culvert with a 48" double-walled plastic culvert to provide access to part of the Reserve. The proposed Project would include installation of fish exclusionary fencing on either side of the culvert, installation of sediment curtains, installation of a temporary coffer dam and removal and replacement of the failing culvert. Additionally, 3/4" Class-2 Aggregate base and plantings will be used to stabilize the banks and culvert.	NOE	
2015088082	Sonoma County Fleet & Material Lab Facility Relocation & Russell Avenue Improvements Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Santa Rosa--Sonoma The primary purpose of the project is to construct a new Fleet Services facility within the existing County Center. The current Fleet Services facility is to be demolished so a new State courthouse can be constructed.	NOE	
2015088083	Snow Snake Culvert Replacement Project (LAA# 1600-2015-0102-R2) Fish & Wildlife #2 --Alpine Project consists of replacing an existing 24-inch diameter corrugated metal pipe that is 72 feet in length with a new 30-inch diameter smooth walled HDPE pipe of the same length. The original 24-inch CMP was damaged in August 2014 from a high density, short duration storm that also created a large scour bowl upslope of the culvert, and over topped the existing road. The new High Density Polyethylene HDPE culvert is designed to convey the 100-year storm even as required by the El Dorado National Forest Land and Resource Management Plan as amended by the 2004 Sierra Nevada Forest Plan Amendment Record of Decision. Additionally, rock rip rap will be placed for 12 feet downstream at a depth of 2 feet from the culvert outlet and will extend to the top of slope on both banks. At the inlet of the culvert, rock rip rap will be placed and used to fill and stabilize the existing scour hole to transition from the channel and rock lined inlet. The existing flow line of the channel will be maintained.	NOE	
2015088084	Four Seasons HOA Stream Management (Lake or Streambed Alteration Agreement No. 1600-2015-0071-R2) Fish & Wildlife #2 --El Dorado Project is limited to use of hand tools and manual labor to remove excessive emergent aquatic vegetation from the center twenty feet of the stream channel and other accumulated debris including dead trees, and human rubbish from within the stream channel that is impeding storm water flows within the stream.	NOE

2015088093	<p>Contra Costa Wallflower Seeding Project (Project) Fish & Wildlife (HQ) Environmental Services Oakley--Contra Costa</p> <p>CDFW is issuing a permit the DWR, FloodSAFE Environmental Stewardship and Statewide Resources Office (FESSRO) pursuant to Fish and Game Code Section 2081(a) for a project to collect and redistribute seed of Contra Costa wallflower (<i>Erysimum capitatum</i> var. <i>angustatum</i>). The project includes seed collection and dispersal to expand the distribution of Contra Costa wallflower and to aid in the recovery of this species. Seed will only be collected late summer through early fall of 2015 if sufficient seed is available. If seed is not collected in 2015, then seed collection and dispersal will be attempted again in 2016 or 2017. Seed pods will be trimmed from the plants with pruners and will be placed in bags. Seeds will be cold-stratified for two weeks in a refrigerator and then introduced at the Dutch Slough planting area. Contra Costa wallflower seed will be sown into a grouping of three small (0.5 m x 0.5m) plots, which will be replicated three times across the entire restoration area; a total of nine plots will be seeded with Contra Costa wallflower. The exact locations of the Contra Costa wallflower seeding plots will be determined in the field based on habitat conditions. Weeds within two feet of the Contra Costa wallflower seeding plots will be pulled. Plants will be monitored annually for five years after seeds have established.</p>	NOE

	parking spaces would be provided. Resident-serving amenities and private and shared open space are proposed for each building. Additionally, approximately 3,000 sf of ground-floor retail space is currently proposed for the buildings.		
2015081018	At Mateo Los Angeles, City of Los Angeles, City of--Los Angeles The Project Site is generally located on the southwest corner of Mateo Street and Palmetto Street in the Central City North of community Plan Area of the City of Los Angeles. The Project Site is bounded on the north by Palmetto Street, on the east by Mateo Street, and on the south and west by existing industrial warehouse uses. The total area of all the parcels that compose the Project site is approximately 154,736 sf (or 3.55 acres). The Project Site is zoned M3-1-RIO and the General Plan land use designation for the site is Heavy Industrial. The Site formerly contained three adjacent industrial warehouse buildings, one of which included rooftop parking. Most of these structures have recently been demolished. The Project proposes to incorporate a portion of the building located at 581 S. Mateo. The Project would develop a 170,906 sf commercial center, consisting of 73,291 sf of retail space, 48,040 sf of creative office space, 2,000 sf of retail space set aside in specialty market for off-site sales of alcoholic beverages, and 47,575 sf of restaurant space in Buildings 1-4, resulting in an overall 1.1:1 FAR for the Project Site. Project Building 4 would consist of ground level retail with three levels of above grade parking and one subterranean level used for loading/parking.	MND	09/09/2015
2015081019	Environmental Review 2015-121/ENV "Happy Hill Trail" Big Bear Lake, City of Big Bear Lake--San Bernardino The Happy Hill project is the construction of a 1,100 foot long and 10-foot wide paved pedestrian pathway along the westerly side of the existing Civic Center parking lot, from the USFS boundary on the south, connecting to the parking lot on the north. The path will contain amenities of trailhead signs, four gravel picnic nooks, bench seating and trash and dog waste receptacles. An existing 900 sf building will be renovated into a public restroom. 2014112012	Mace Ranch Innovation Center Davis, City of Davis--Yolo The 228.58-acre project site consists of the proposed 212-acre Mace Ranch Innovation Center (MRIC) site, and a separate 17-acre area (referred to as the "Mace Triangle"), south of CR 32A, which has been included within the bounds of the project site to ensure that an agricultural and unincorporated island is not created and to allow the continuation and expansion of existing uses. The MRIC site has historically been used for agricultural operations and is currently vacant and undeveloped. The MRIC site is designated AG by the Yolo County General Plan and is zoned A-N by the Yolo County Zoning Code.	EIR	09/28/2015
2015081020	2015 General Plan Update and EIR Palm Desert, City of Palm Desert--Riverside The City of Palm Desert is preparing an update to its existing General Plan, which was extensively updated in 1980 and, again in 2004. The update will focus on key areas of the City, including the 111 corridor/City Center and the areas around the Cal State University campus. The General Plan update will also include goals and policies that provide the City with tools to seek pedestrian oriented development patterns to diversify the City's existing primarily automobile-oriented development patterns and realize both a true City Center and a vibrant university campus area.	NOP	09/10/2015
2015081021	General Plan Update and Climate Action Plan Indio, City of Indio--Riverside The proposed project includes a comprehensive update to the City of Indio's General Plan, which was adopted in 1993, and the development of a Climate Action Plan. The General Plan is a state-mandated document that outlines goals, policies, and programs that provide the framework for future development in the City and its SOI. The General Plan Update addresses land use, all modes of transportation, housing, safety, conservation, open space, noise, public health, sustainability, and economic development. The City's General Plan will be reorganized into eight elements. New policies are proposed that emphasize mobility, healthy communities, and sustainability.	NOP	09/10/2015
2015081022	SUHSD New Middle School #5 Construction Salinas Union High School District Salinas--Monterey The proposed project includes development of a new middle school campus to accommodate between 800 - 1,000 seventh and eighth grade students in the city of Salinas. The school is expected to have approximately 29 standard classrooms, 6 science classrooms, 12 special use rooms, administration buildings, gymnasium, multi-use building with kitchen, media center with computer lab, locker room, courtyard, and restrooms, totaling approximately 75,750 sf. Outdoor areas are expected to include sports fields (soccer, football, baseball and softball), basketball courts, an all-weather track, parking lots and drop-off area, and a storage area for bicycles and skateboards. Project design will include construction of an off-site road to connect the project site to Boronda Road and on-site landscaping and storm water retention facilities.	NOP	09/10/2015

1999011011	<p>Yosemite Lake Estates General Plan Amendment Merced County Merced--Merced</p> <p>As approved by UC and County of Merced, the project involves the construction and operation of a major research University campus in Merced County which will sustain up to 25,000 full time students and a contiguous associate community to support the needs of the university. The ITP and Minor Amendment No. 1 (collectively, the ITP as amended) will result in permanent impacts to 1,870 acres of California tiger salamander, Swainson's hawk, and San Joaquin kit fox habitat, portions of which are occupied by succulent owl's clover; Colusa grass, and San Joaquin orcutt grass. Major Amendment No. 2 revises the Project Description to include off-site wetland restoration work. The wetland restoration work will result in the conversion of 35.5 acres of CTS upland habitat to potential CTS breeding habitat, and result in temporary impacts to 80 acres of CTS upland habitat. The Project, as modified, is expected to result in incidental take of CTS, Swainson's hawk, and San Joaquin kit fox which are designated as threatened species under CESA; and succulent owl's clover, Colusa grass, and San Joaquin orcutt grass which are designated as endangered species under CESA. The ITP, as amended, as issued by CDFW, authorizes incidental take of these species that may occur as a result of the project. Major Amendment No. 2 documents the location and description of the wetland restoration work, including details of the increased impacts to the Covered Species and an analysis of the potential for take; adds measures to minimize take and fully mitigate the wetland restoration-related impacts to the covered species; removes a remnant reference to the originally-required small mammal burrow excavation activities which was overlooked during preparation of amendment no. 1; and allows the permittee to use alternative exclusion fence designs with CDFW written approval. In major amendment no. 2, the increased habitat disturbance is mitigated by an increase in the compensatory mitigation required of the permittee.</p>	NOD

2015088124	Emergency Permit for Treatment of Hazardous Waste, University of California-Davis Toxic Substances Control, Department of Davis--Yolo DTSC pursuant to authority granted under Chapter 6.5, Cal. Code Regs., title 22, Section 66270.61 has issued an Emergency Permit to the UC Davis to treat hazardous waste by chemical stabilization. The hazardous waste items are expired and are currently being stored inside a storage area at UC-Davis. Because UC Davis does not have a permit for the treatment of the hazardous waste, DTSC has determined as a safety precaution to prevent an accident or severe injury, an Emergency Permit should be issued to chemically stabilize the hazardous waste prior to transportation off-site by CHES.	NOE	
2015088125	Emergency Permit for Treatment of Hazardous Waste, Tyco Electronics Toxic Substances Control, Department of Menlo Park--San Mateo DTSC pursuant to authority granted under Chapter 6.5, Cal. code Regs., title 22, Section 66270.61 has issued an emergency permit to Tyco Electronics to treat hazardous waste by chemical stabilization. The chemicals are expired and are currently being stored inside a storage area at the Tyco Electronics facility located at 304 Constitution Drive in Menlo Park, CA. The treatment of these items will be carried out by CHES and involves the addition of a solvent to the containers to reduce the reactive characteristic of the chemicals. The treatment is anticipated to occur on August 17, 2015 in an exclusion zone at the facility.	NOE	
2015088126	Temporary Emergency Permit for Treatment of Hazardous Waste, Los Angeles City of RSM, Hyperion Safe Center, CA Toxic Substances Control, Department of --Los Angeles It has been determined that this item is or may be highly reactive and or ignitable and must be stabilized prior to being transported offsite. The item is currently being stored inside a laboratory at Los Angeles City of RSM, Hyperion SAFE Center, Playa Del Rey, CA. The chemical is potential safety hazard and presents an unacceptable risk for continued storage. Los Angeles City of RSM, Hyperion SAFE Center does not have a permit for the treatment of the hazardous waste, and therefore DTSC has determined that as a safety precaution to prevent an accident or severe injury, an Emergency Permit should be issued for CHES to chemically stabilize the hazardous waste prior to transportation off site.	NOE	
2015088127	Climate Appropriate HVAC Systems for Commercial Buildings to Reduce Energy Use and Demand Energy Commission Torrance--Los Angeles The purpose of the agreement is to develop a Climate Appropriate commercial HVAC system for commercial building in California integrating two standalone technologies. This project includes a combination of existing Variable Refrigerant Flow (VRF) technology with the addition of Indirect Evaporative Cooling (IEC)	NOE

integrated into existing air handler plenums and then be operationally optimized through an improved building control system. The IEC technology reduces outdoor air loads and provides "free night cooling" by pre-conditioning the fresh air required by the building. Control algorithms that monitor and optimize the operation of these two systems together will enable substantial reduction in annual energy use and peak demand and can be wired into existing control systems.

2014061031	Centerpointe 78 Commercial Center Escondido, City of Escondido--San Diego The project proposes to redevelop a 3.7-acre former automotive dealership into an approximately 43,500 sf market and a 3,200 sf restaurant pad. To support these proposed uses, the project also includes parking (199 spaces), three access driveways on Lincoln Avenue, project frontage improvements on Lincoln Avenue and North Broadway, landscaping, on-site utility improvements, and connections to off-site utilities. The project also includes extending two eastbound SR-78 left turn-lanes to North Broadway prior to the restaurant occupancy. The redevelopment of the site would involve demolition of the existing structures and pavement, grading and construction. Off-site mitigation includes various street improvements and on-street parking removal.	EIR	09/28/2015
2014091039	Vineyard at Delano and Delano West Pavilion Projects Delano, City of Delano--Kern The development of 872 medium density residential units and 340,000 sf of commercial uses on ~110 acres in southwestern Delano.	EIR	09/28/2015
2015022048	901 16th Street and 1200 17th Street, Case No. 2011.1300 E San Francisco, City and County of San Francisco--San Francisco Note: Extended Review The proposed project would merge 4 lots into 2 lots, demolish the 2 warehouses and the modular office building, preserve the brick office building, and retain some materials from a steel shed for reuse within the proposed project. The project sponsor proposes to construct 2 new buildings on-site: a new 6-story, 68 foot tall, residential mixed use building consisting of 260 dwelling units and 20,318 sf of retail on the northern lot and a new 4-story, 48-foot tall, residential mixed use building consisting of 135 dwelling units and 4,650 sf of retail on the southern lot. A new publicly accessible pedestrian alley would be constructed along the entirety of its western property line. Combined, the two new buildings would also contain 388 vehicular parking spaces and 455 off-street bicycle parking spaces.	EIR	10/05/2015

2015042040	Richmond Solar PV Project Marin Clean Energy Richmond--Contra Costa The proposed 10.5 MW PV system would deploy approximately 80,000 thin-film solar panels at the project site. The solar panels would be non-reflective and, in combination with 11 utility scale inverters, would convert sunlight into electricity, which would be fed directly into the PG&E utility grid at locations adjacent to the site. The project would be a combination of non-penetrating ballasted fixed tilt arrays (maximum height of approximately 6 feet) and single axis tracking ground mount arrays (maximum of height of 14 feet in highest position). Multiple transformers would be connected via aboveground lines to adjacent switching substations. Access would be from the existing Hensley Street gate to the property.	EIR	09/28/2015
2015081026	ENV-2015-1552-MND Los Angeles, City of --Los Angeles Pursuant to the Los Angeles Municipal Code (LAMC) Section 12.24-W, 27, a Conditional Use to allow the operation of a 2,550 sf 24-hour convenience store (7-Eleven).	MND	09/11/2015
2015081027	ENV-2015-1564-MND, CPC-2015-1564-CU-SPR Los Angeles, City of Los Angeles, City of--Los Angeles The proposed project is for the construction, use, and maintenance of a new public charter middle school and high school that will function as two separate schools, sharing common space and parking. The facility would be two-stories within 30 feet of height, consisting of approximately 65,900 sf, serving a maximum of 1,050 students on a 74,930 sf site. Two existing single-family dwellings will be demolished as a part of the project. Parking for teachers, students, and visitors will be provided on-site within a one-level subterranean garage with 101 spaces and 17 short-term surface parking spaces will be provided in front of the school for pick-up and drop-off activities. The school proposes to utilize a public address system and bells. Hours of operation are proposed from 7:30 a.m. to 7:30 p.m. Monday through Friday.	MND	09/11/2015
2015081029	ENV-2015-2022-MND Los Angeles, City of Los Angeles, City of--Los Angeles The project involves the addition of a spray painting booth and associated vehicle preparation activities in conjunction with an existing automotive repair building of an existing automobile repair building of an existing automobile dealership that includes automotive sales, repair and maintenance functions, in the C4-1LD and P-1LD Zones. The spray painting booth will be approximately 400 sf and the vehicle dismantling and preparation services associated with the body shop and spray paint booth uses will be approximately 2,750 sf. The new functions will replace an existing 3,115 sf service bay area in the northwest corner of the property in one of the existing buildings on site. No new floor area is being added to the site, as all construction will be a tenant improvement within an existing structure.	MND	09/11/2015

2015081030	Coffee Bean & Tea Leaf ZA-2015-223(CUB)(CU), ENV-2015-224-MND Los Angeles, City of --Los Angeles A Conditional Use to allow the proposed hours of operations from 4:00 am to 12:00 midnight, daily, in lieu of the standard Mini-Shopping Center hours of limitation from 7:00 am to 11:00 pm. The project includes tenant improvements to a retail tenant space. The coffee shop will consist of 2,879 sf (2,254 sf interior and 625 sf outdoor patio) with a total of 64 seats (44 interior and 20 outdoor), and a drive-thru.	MND	09/11/2015
2015084002	Tejon Indian Tribe Trust Acquisition and Casino Project Bureau of Indian Affairs --Kern The proposed action is the acquisition of approximately 306-acre of fee land in trust by the United States upon which the Tejon Indian Tribe would construct a gaming facility. The facility would initially be approximately 250,000 sf, and in a subsequent phase, an approximately 300-room hotel and banquet space would be added. The proposed property is located in unincorporated Kern County, immediately west of the town of Mettler and approximately 14 miles south of the City of Bakersfield.	NOI	09/11/2015
2009042129	Port of Redwood City Wharves 1 and 2 Redevelopment Project Redwood City, Port of Redwood City--San Mateo The main objective of the Wharves 1 and 2 Redevelopment Project was to reconstruct and modernize the wharves and adjacent upland areas such that the Port could better serve its existing and projected customer base. The changes anticipated at the Port were planned to be undertaken in two distinct phases, Phase 1 and Phase 2, with separate entities, the Port and the Parcel tenant, sponsoring each phase independently. Construction of Phase 1 was completed by the Port in March 2014. CEMEX Aggregates is now proposing to implement Phase 2. The project as proposed by CEMEX includes expanding operations to 24-hours per day. The existing conveyor/hopper would remain at its existing location. CEMEX is proposing to increase the throughput capacity by approximately 900,000 metric tons over that analyzed previously. This increase would result in corresponding increases in deliveries of aggregate by marine vessels and truck loads as compared to the 2010 EIR.	NOP	09/11/2015
2015081025	El Monte Sand Mining and Nature Preserve San Diego County --San Diego The project would extract up to 18 million tons of mineral resources (sand) over a 15-year period from a 167-acre mining footprint in the San Diego River bed in El Monte Valley. The reclamation plan area would cover 233 acres and ultimate use of the area would be as a nature preserve including recreational trails.	NOP	09/11/2015

	facility. The project is to be developed on three new parcels, totaling approximately 8.8 acres. An additional two new parcels totaling 32.3 acres surrounding the proposed development would be dedicated as open space/preserve (Exhibit 2) or dedicated to BLM as an extension of the Pine Hill Preserve pursuant to the terms of a 2010 settlement agreement between CNPS, the County and the applicant.		
2015081024	Gaviota Holdings Habitat Restoration Santa Barbara County Goleta--Santa Barbara The proposed project is for restoration of approximately 8.55 acres, including restoring 2.21 acres of coastal sage scrub, and restoring 2.55 acres of native grassland. In addition, 0.56 acres of disturbed eucalyptus woodland will be allowed to naturally regenerate from shoots of stumps and seeds of surrounding trees and a mix of erosion control, weed removal and limited planting over 3.23 acres is proposed to account for habitat value lost as result of removal of 3.01 acres of non-native annual grassland. The restoration plan includes post-planting maintenance activities, such as irrigation, weed removal, and a 5-year monitoring program. It requires remedial actions, if necessary, to ensure that the project meets specific performance standards. Existing surfaced and unsurfaced roads provide access to and within the project site. Implementing the restoration plan will not require any tree removal, grading, utilities, or other development.	Neg	09/11/2015
2015081028	ZA-2015-1734-CU / ENV-2015-1735-MND Los Angeles, City of --Los Angeles A conditional use to allow an 800 sf drive-through coffee shop in the C2-1 Zone with operating hours beyond what is permitted per the Commercial Corner regulations.	Neg	09/11/2015

	<p>SEIR was not challenged within the time period prescribed in subdivision (c) of Public Resources Code sec 21167 and thus the SEIR is presumed valid in accordance with Public Resources Code sec 21167.2. The proposed Site Development Permit is consistent with the scope of the approved Area Plan and Tentative Tract Map 16466. Therefore, the certified SEIR serves as the environmental documentation for the project and the project is in compliance with the requirements of CEQA.</p>		
2004092011	<p>East Cypress Corridor Specific Plan Oakley, City of Oakley--Contra Costa Approval of a development agreement between the City of Oakley and ACD-TI Oakley, LLC relating to the project known as Dal Porto South Subdivision 9401, which is located in and consistent with Planning Area 3 of the adopted East Cypress Corridor Specific Plan, for which an environmental impact report was previously certified on March 10, 2009, per Oakley City Council Resolution No. 46-09. The site is zoned SP-1 (East Cypress Corridor Specific Plan) District.</p>	NOD	
2010091080	<p>Whittier Boulevard Specific Plan Amendment Whittier, City of Whittier--Los Angeles This is to advise that the City of Whittier conducted a second reading and adopted Ordinance No. 3040 for Specific Plan 15-001 on August 11, 2015. The Ordinance adopts the Addendum to the Whittier Boulevard Specific Plan (WBSP) Final Supplemental Environmental Impact Report (SPEIR) and various amendments to the development standards and land use regulations for the WPSP Workplace District under Specific Plan Amendment 15-001. On July 23, 2013, the Whittier City Council adopted a moratorium (Ordinance No. 3009) prohibiting residential development in most sections of the Whittier Boulevard Specific Plan (WBSP) Workplace District. The moratorium was extended under Ordinances Nos. 3010 (August 13, 2013) and 3023 (July 8, 2014). The purpose of the moratorium was to provide sufficient time to update the City's regulations to address potentially unlimited residential development which would undermine the purpose and intent of the Workplace District to promote business and job opportunities in the community. The WBSP Amendment addresses the Workplace District through the formation of a Residential Subarea to reduce allowable development in this subarea. The subarea would allow for a maximum of 300 residential dwelling units (du) or a max 782,607 sf of non-residential land uses, or a combination thereof. The WBSP Amendment represents a reduction in allowable residential development as compared to the Workplace District defined in the 2011 WBSP and evaluated in the 2011 WBSP Final SPEIR. This is to advise that the City of Whittier approved the following on July 28, 2015; Urgency Ordinance adopting an Addendum to the WBSP SPEIR for SPA 15-001, and adopting amendments to the development standards and land use regulations for the WBSP Workplace District under SPA 15-001. Due to the expiration of the moratorium on residential development, the City determined that adoption of this ordinance restriction on both the location and number of residential units in the Workplace District must be done on an urgency basis to ensure that SPA 15-001 can be implemented immediately rather than creating undue expense and confusion in the public and with landowners by having a six week window of time in which application for residential development could otherwise be accepted and processed.</p>	NOD

The stabilization project includes the use of live willows and stacked boulders along the toe of the river bank and vegetated soil lifts above the stacked boulders. The stream bank will be cleared of vegetation in preparation for the boulder placement and soil lifts. An excavator, using a bucket and grapple (thumb), will place approx. 70 cubic yards of large (3.5 foot) boulders along the toe of the bank to the summer time impounded water surface elevation Issuance of a Lakebed Alteration Agreement No. 1600-2015-0144-R3 is pursuant to Fish and Game Code Section 1602.	NOE	
2015088132	SPI King Fire Emergency Salvage Projects Fish & Wildlife #2 --El Dorado CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2015-0160-R2, pursuant to Section 1602 of the Fish and Game Code to Sierra Pacific Industries. This project includes replacement and/or restoration of six existing crossings within the King fire area that were damaged or adversely impacted by storm events following the fire and two new water drafting sites necessary to remove substantially damaged timber. Activities include: re-establishment of channels and decommissioning of crossings at locations where plastic and metal corrugated pipes (culverts) were destroyed or compromised by fire (Pine Flat, Sonion 1); replacement of culverts destroyed or compromised by fire or substantially damaged during post-fire precipitation events (Sonion 2, Sunsad Yeti 1, Yeti 3); removal of accumulated sediment from watercourses and crossing locations due to post-fire runoff; and construction of water drafting sites necessary to conduct Emergency Timber Salvage operations (Yeti 2, Yeti 4). 2015-01	Pauma Band of Luiseno Mission Indians - APNs: 131-090-11, 03; 131-060-25 Bureau of Indian Affairs --San Diego The subject property consists of three adjoining parcels totaling 23.32 acres more or less. The subject parcels are located in San Diego County, CA and are adjacent to the Tribe's Main Reservation. The parcels currently contain orchards, one residence and storage of household and orchard materials. The purpose of the Pauma Tribe placing the subject parcels into trust is so that the Tribe may rightfully exercise sovereignty over the properties and expand its land base. The three (3) contiguous parcels are owned by the Tribe and located immediately adjacent to the west boundary of the Tribe's Main Reservation. Parcel APN 131-090-11 is currently developed as a citrus orchard and contains one residence. Parcel APN 131-060-25 is a vacant lot that was devegetated by the previous owner. Parcel APN 131-090-03 contains devegetated vacant lands, a driveway and ~2.3 acres of citrus producing orchards.	BIA	09/14/2015
2014121018	Proposed Amended Regulation XX - Regional Clean Air Incentives Market (RECLAIM) South Coast Air Quality Management District --Orange, Los Angeles, Riverside, San Bernardino Note: Extended Per Lead The proposed amendments to Regulation XX would reduce emissions from equipment and processes operated at NOx RECLAIM facilities located throughout the entire SCAQMD jurisdiction. In particular, the environment could be impacted from the proposed project due to facilities installing new, or modifying existing control equipment for the following types of equipment/source categories in the NOx RECLAIM program: 1) fluid catalytic cracking units; 2) refinery boilers and heaters; 3) refinery gas turbines; 4) sulfur recovery units - tail gas treatment units; 5) non-refinery/non-power plant gas turbines; 6) non-refinery sodium silicate furnaces; 7) non-refinery/non-power plant internal combustion engines; 8) container glass melting furnaces; 9) coke calcining; and, 10) metal threat creating furnaces. 2015082035	Proposed Amendments to Dungeness Crab Recreational Fishing Regulations and Crab Trap Requirements Fish & Wildlife #3 --Sonoma The proposed regulation changes to the Dungeness crab recreational fishery and crab trap requirements would modify Sections 29.80 & 29.85, Title 14 California Code of Regulations: 1. Uniform size and bag limit for recreationally caught Dungeness Crab of ten Dungeness crab that are at least 5.75 inches 2. Require destruct device for recreational crab traps 3. Require buoys be labelled on recreational crab traps 4. Seven-day moratorium on deploying crab traps prior to Dungeness crab recreational season opener.	Neg	09/15/2015
2014042078	West Antioch Creek Channel Improvement Project Antioch, City of Antioch--Contra Costa CDFW has executed Lake and Streambed Alteration Agreement no. 1600-2014-0350-R3, pursuant to section 1602 of the fish and game code to the project applicant, City of Antioch as represented by Ron Bernal. The project is limited to the improvement of the West Antioch Creek Flood Control Channel and replacement of a previously existing culvert under West 10th Street with a 4 barrel, pre-cast structure. Each barrel is 14 ft long and 7 ft high and the entire structure is approximately 100 ft long. The project will also include upstream sloped wingwalls that vary from 15 ft in height to 2 ft in height and downstream wingwalls that vary from 21.6 ft in height to 2 ft in height. The pre-cast structures will be backfilled with 200 cubic yards of native soil. Two-forty ft long aprons will be installed at the upstream end and the downstream end. Approximately 1,200 cubic yards of sediment will be removed to accommodate construction of the project from within the banks of the channel. The project also consists of the conversion of 400 linear ft of existing concrete lined channel into earthen bottom channel and the daylighting of an additional 240 linear ft of earthen bottom channel. Approximately 5,000 cubic yds of sediment and debris will be removed to accommodate the conversion of the new channel.	NOD	
2015051031	Eastern Service Area Secondary Connection Project Padre Dam Municipal Water District El Cajon--San Diego The project consists of the construction and operation of the Eastern Service Area Secondary Connection Project, which consists of a water supply pipeline, flow control facility, reservoir, pump station, discharge pipeline, and related facilities. 	<p>LLC., on behalf of The Parks at Monrovia Station Square I, LLC. The purpose of the project is to remediate subsurface soil at three onsite locations where cobalt, lead, or hexavalent chromium was found to exceed the respective screening level using excavation and off-site disposal. The project is the final action for the site. The removal reduces the human health-based risk assessments to an acceptable standard for residential use. The Parks at Monrovia Station Square, LLC has slated this property for residential development.</p>		
2015088149	<p>Brushy Creek Standipipe Erosion Repair Water Resources, Department of Livermore--Alameda</p> <p>DFD staff will repair erosion damaged caused by water overtopping the standpipe located adjacent to SBA Backsurge Pool. erosion damage occurred in several areas including: the standpipe perimeter, the v-ditch east of the standpipe, the culvert inlet and area surrounding the adjacent power pole, the culvert outlet and v-ditch, exposed fiber optics and pipeline leading to a large scour hole, the access road, the hillside adjacent to the culvert outlet, and hillside below the access road on either side of the fence line, as well as a large gully cut adjacent to the fence line. The entire footprint is approx. 0.46 acres.</p>	NOE	
2015088150	<p>Patterson Yard Vegetation Removal Water Resources, Department of Livermore--Alameda</p> <p>CCC crews or DFD staff shall remove all vegetation from the face of Patterson Dam including all vegetation within a 10-foot radius of the edges of the toe road and from around the reservoir crest to the toe road. The toe road is approx. 2,500 feet long. Silt and vegetation shall be removed from the v-ditches along the toe road and reshaped if necessary. Excessive debris and low hanging branches from the two oleander bushes will be removed. Vegetation removal will be primarily done with weed eaters. If not sufficient, then loppers/chain saws will be used. All work will be within DWR right-of-way. The project footprint includes approx. two acres of land. Material removed will be left as much in the same area. Access to the site is at 8400 Patterson Pass Road.</p>	NOE	
2015088151	<p>Curtis Landing Vegetation Removal Water Resources, Department of --Sacramento</p> <p>All vegetation shall be mowed around the Curtis Landing Release site entry gates. The proposed project is requested due to an imminent fire hazard and because the automatic gate has become inoperable due to vegetation growth. Vegetation shall be removed at a ten foot swath around the outside of the fence structure. The approx. size of the area to be mowed is 200 sq. ft. The mowed material will be left onsite to decompose.</p>	NOE	
2015088153	<p>Well Drilling and Development Parks and Recreation, Department of --Mendocino</p> <p>Drill up to 4 new test wells, 3 within the Pinewood Campground and 1 within the Surfwood Campground at MacKerricher State Park to locate and develop water supply well(s). Work will drill potential wells with a 10" diameter auger to a maximum 60 feet in depth, collect soil samples and spread approximately 20 cubic feet of spoils generated during drilling around each site; develop wells with surging, balling and pumping to clean, discharge approximately 500 gallons of water from each well to the ground surrounding the well site.</p>	NOE	

CEQA Daily Log

Documents Received during the Period: 08/01/2015 - 08/15/2015

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
	Coilect water samples from each well for general content analysis and perform 24-hour drawdown tests to evaluate the drawdown, recovery and yield; during pump tests, discharge approximately 10,000 gallons of water at each well to landscaped areas or existing drainage courses adjacent to each well site that drain toward Lake Cleone. Produce a Water Well INstallation and Testing REport.		
2015088154	Waller Tract Water District - SDWSRF Project Indio, City of Indio--Riverside The City of Indio's Water Authority will be receiving funds from SWRCB to conduct a planning study to address the project's issue.	NOE	
2015088155	Neill Water Diversion Project (Lake or Streambed Alteration Agreement No. 1600-2015-0148-R1) Fish & Wildlife #1E --Humboldt The project is limited to one stream diversion and includes installation of the diversion structure. The water diversion is located on the South Fork Eel River. Diverted water will be used for domestic use and irrigation. This diversion will replace a diversion located on Sproul Creek, a tributary to the South Fork Eel River.	NOE	
2015088156	Rehabilitation and Forest Enhancement Parks and Recreation, Department of --Santa Cruz Restore the native broadleaf trees such as canyon live oak, black oak, madrone and big leaf maple trees within the Mt. Bielawski area of Castle Rock State Park to manage natural resources.	NOE
