STATE CLEARINGHOUSE

---

**SUMMARY  
OF  
POSTINGS**

**August 1 – 15, 2016**

# STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **August 1 – 15, 2016**.

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov](http://www.opr.ca.gov)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Director

## CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

### USPS:

State Clearinghouse  
P.O. Box 3044  
Sacramento, CA 95812-3044

2014121089	Lake Jennings Marketplace San Diego County --San Diego Note: Recirculation  The applicant proposes to develop a commercial center on a 13 acre site that would include six buildings totaling 76,100 sf and parking for 389 vehicles. The draft tentative map proposes to subdivide the site into eight lots. Lots 1 through 6 would contain the proposed commercial development and Lot 7 would contain an open space easement for Southern Riparian Forest habitat along Los Cochés Creek and its associated wetland buffer. A 20-foot wide trail easement including a 10-foot wide trail is proposed along the southern edge of Lots 7 and 8. Ten-foot-wide pathways are also proposed within the right-of-way for Rios Canyon Road on the east side of the site and Ridge Hill Road on the west side of the site.	<b>EIR</b>	09/14/2016
2015091023	Concordia University CUP Modification for Master Campus Build-Out Plan Update and Zone Change Irvine, City of Irvine--Orange The proposed project involves (1) a Major Modification to the existing CUP for Concordia University Irvine to reflect the proposed Campus Master Build-Out Plan Update; and (2) a Zone Change to revise Special Development Requirements. Of the 16 existing institutional (non-residential) buildings on campus (approximately 243,571 sf), 7 buildings would be demolished (approximately 71,231 sf). New construction (new buildings and additions to existing buildings) allowed would involve up to 148,880 sf of institutional sf. New residence halls would be constructed (74 units/296 beds), resulting in a total of 330 units/1,320 beds. New, relocated, and/or improved athletic facilities; a lap/recreational pool; vehicular, parking, and pedestrian access improvements; utility infrastructure and landscaping would also be implemented.	<b>EIR</b>	09/14/2016
2015112025	Land Park Commercial Center Project Sacramento, City of --Sacramento The proposed project would construct a 55,000 sf grocery store and five freestanding buildings that would provide approx. 53,165 sf of retail uses, 457 parking spaces, landscaping, and public gathering places. Vehicle access would be from Freeport Blvd. and Wentworth Ave.	<b>EIR</b>	09/14/2016
2015021079	Santa Clara River Levee Improvements Downstream of Union Pacific Railroad (SCR-3) Project Ventura County Watershed Protection District Oxnard--Ventura The project would implement structural improvements to the existing SCR-3 levee to allow for FEMA certification. Between Bailard Landfill and N. Ventura Rd. (reaches 1-3) two options and considered. Option 1A (Full Levee System) adds fill material and riprap to raise the existing levee (8,875 feet) with one tie-in to Bailard Landfill. Option 1B (Minimum Levee System) adds fill material along a portion of the existing levee (3,575 feet), with tie-ins to Bailard, Coastal, and Santa Clara Landfills. The existing River Ridge Golf Course swale would be filled in. Between	<b>FIN</b>

	N. Ventura Rd. and the UPRR bridge (Reach 4), a 968-foot long floodwall would be constructed on the river side of the road with a visible height of 6 feet; a flood gate would be installed across N. Ventura Rd. and then a 4- to 6-foot floodwall would be constructed on the south side of N. Ventura Rd. for 888 feet.		
2016041051	(Recirculation) Fontana Water Company Recycled Water Improvement Project Inland Empire Utilities Agency Fontana--San Bernardino San Gabriel Valley Water Company is a privately owned water company that provides water service to customers located within its Fontana Water Company division service area, which includes the City of Fontana and some unincorporated areas in the immediate vicinity. The FWC provides this water service pursuant to the regulatory jurisdiction of the Public Utilities Commission of the State of CA (CPUC). As a public utility water company, FWC is mandated to provide its customers a reliable supply of water that complies with state and federal safe drinking water standards. As a non-governmental entity SFVWC is not subject to CEQA unless its actions involve governmental participation, financing, discretionary permitting or approval. IEUA has agreed to serve as the CEQA lead agency for this project as it will deliver IEUA recycled water to FWC that will be used to offset existing potable water demand within FWC's service area.  The proposed project includes the expanded delivery of recycled water produced by IEUA Water Reclamation Facilities to FWC at its Regional Plant No. 3 recharge basin location. FWC proposes to install a reservoir, pump station, and recycled water delivery pipelines; most of the proposed pipelines have already been installed, though some yard piping is needed. The purpose of the proposed RP-3 improvements is to increase the Agency's program to max the beneficial reuse of recycled water to reduce dependence on imported water to replace use of potable water for landscape irrigation by using recycled water.	<b>MND</b>	08/30/2016
2016081001	3300 Panorama Drive, Demolition of Tanks and Associated Structures project (Case Nos, UP0-440 & CP0-500) Morro Bay, City of Morro Bay--San Luis Obispo Proposal to demolish & remove two large holding tanks (approx. 4,350,000 gallons each) once used by the US Navy to store jet fuel, one approx. 131,600 gallon water tank, all piping attached to the tanks, pumps & both exposed & underground piping behind the pump house building structure, & approx. 24 yards of shot-crete located along a center berm between the two large Navy tanks & the berm between the pump house & tanks. Primary staging area (for equipment and waiting trucks) to be located between the southern Navy tank & Panorama Dr; secondary staging area (for equipment and pump removal) near entrance to the project site, adjacent to Panorama Dr. Would require some level of disturbance over approx. 8 acres of the 10.6 acre site. Project expected to require 1.5 to 2 months to complete.	<b>MND</b>	08/30/2016
2016081002	RTA Use of County Yard for Bus Parking Facility in Paso Robles San Luis Obispo Regional Transit Authority Paso Robles--San Luis Obispo Proposed project will accommodate RTA's current and future planned North County based fleet of public transit buses and vans, as well as employee parking and office space. The improvements that will be made to approximately 1.5 acres of the 8.59 acre site would be designed to minimize disruptions to existing County Corporation Yard activities. A total of 18 Mitigation Measures will minimize to less	<b>MND</b>	08/30/2016

	than significant or completely avoid on going/long term environmental impacts that would occur as a result of RTA consolidating its two existing operating facilities into the proposed project site.		
2016081006	County of Riverside, Department of Public Social Services Administrative Facility Project Temecula, City of Temecula--Riverside The construction of two 50,000 sf professional office buildings with necessary support improvements and facilities such as parking areas, landscaping, lighting utility and service facilities, and street improvements.	<b>MND</b>	08/30/2016
2016082003	Vintage Park General Plan Amendment, Community Plan Amendment, Rezone, Tentative Subdivision Map, and Design Review Sacramento County --Sacramento General Plan Amendment, Community Plan amendment and rezone of a 17.89 acre parcel.	<b>MND</b>	08/30/2016
2016081004	Tustin Downtown Commercial Core Specific Plan (DCCSP) Tustin, City of Tustin--Orange The DCCSP allows for all previously allowed commercial and office intensity, up to 1.5: 1 max floor area ratio and introduces the option to include residential intensity as a part of mixed use projects that meet the requirements set by the specific plan. The DCCSP will rezone the parcels within the planning area to a new zoning designation, DCCSP. The specific plan establishes 6 development areas that identify development parameters including permitted land uses, development standards, and design guidelines. The City of Tustin has established an 887-unit residential bank that is available on a first come basis. The DCCSP also establishes the ability to transfer of intensity from one DA to another DA, excepting DA-5.	<b>NOP</b>	08/30/2016
2016081005	9000 Wilshire Boulevard Commercial Project Beverly Hills, City of Beverly Hills--Los Angeles The project would involve demolition of the existing two commercial buildings and the removal of the paved parking lot. The two-story building on the east side of the site is currently occupied by an antique/art shop, and the one-story building on the west side of the site consists of three retail spaces that are occupied by a cafe, vape shop/lounge, and vacant commercial space. After demolition, construction of a new 31,702 square-foot building would occur, which would consist of three stories of commercial office development and four levels of subterranean parking.	<b>NOP</b>	08/30/2016
2016082004	UCSF Minnesota Street Student and Trainee Housing University of California, San Francisco San Francisco--San Francisco UCSF proposes the construction of two residential buildings on two parcels of land at 566/590 & 600 Minnesota Street to provide needing housing for students and trainees. The proposed project consists of the demolition of existing buildings on each project site and the construction of a five-story residential building over parking on the northern site (566/590 Minnesota) and a six-story residential building over parking on the southern site (600 Minnesota). Each building will measure 58 feet in height. Overall the project would provide up to 610 residential units. In addition, approx. 3,000 sq. ft. of retail space would be provided on the	<b>NOP</b>	08/30/2016

2004032021	El Cerrito Plaza Mixed Use Development El Cerrito, City of --Contra Costa CDFW has executed Lake and Streambed Alteration Agreement No, 1600-2015-0209-R3, pursuant to section 1602 of the Fish and Game Code to Creekside Walk Ventures, LLC as represented by Derek Baak. The project is limited to the daylighting of 220 linear feet of El Cerrito Creek that is underground in a culvert below a parking lot at Evelyn Avenue in El Cerrito. The previously existing culvert shall be removed and a 45 foot wide stream corridor consisting of a restored equilibrium channel and riparian habitat shall be constructed along 225 linear feet.	<b>NOD</b>	
2008052075	Walt Ranch Erosion Control Plan Application No. P07-00800-ECPA Napa County --Napa The purpose of project (P11-00205-ECPA) is to develop approx. 356 acres of new vineyard (approx. 507 gross acres), including earthmoving activities, and installation and maintenance of erosion control measures within a 2,300 acre holding. The project applicant has prepared an Erosion Control Plan (ECP) as required by Napa County code (Ch. 18.108, "Conservation Regulations"). The project as mitigated and conditioned has been reduced to 209 net acres of vineyard (316 gross acres of overall land disturbance).	<b>NOD</b>

	embankments (north & south of UPRR).		
2015031026	Sierra Lakes Commerce Center Project Fontana, City of Fontana--San Bernardino The project includes the construction and operation of an approx. 597,818 net sq. ft. single building, consisting of a high-cube logistics warehouse use with associated offices. Four applications are associated with the Project: (1) Tentative Parcel Map No. 19693 (TTM 14-014); (2) Zone Change No. 14-012 to add APN's 1119-221-41 (approx. 4.81 acres) within the Approved Warehousing Distribution Logistics Overlay District (WDL0D) of the project site (APN's 1119-241-19, 1119-221-02, and 1119-221-44 are already subjected to the approved WDL0D); (3) CUP No. 14-034 to permit construction of a warehouse and set forth conditions and parameters for the operations of the use; and (4) Design Review Project NO. 14-024 to approve the site plan, site improvements, landscaping plans, and architectural elevations for the Project.	<b>NOD</b>	
2016012055	Site Cleanup Requirements for Phillips 66 Company Line 200 Release Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland Concord--Contra Costa Project is associated with a crude oil spill remediation project (Remediation Project) on the CNWS, a federal property outside of the CDFW's permitting jurisdiction, and on a property immediately south of the CNWS at 330 Holly Drive in Concord, CA that is within CDFW's permitting jurisdiction. On 330 Holly Drive, the Remediation Project will involve excavation and replacement of affected soils under existing developed surfaces that do not constitute habitat that supports species protected pursuant to CESA.  Incidental Take Permit 2081-2016-014-03 shall cover activities occurring in the swale restoration project (Restoration Project) implemented on 330 Holly Drive as partial mitigation for the Remediation Project. A drainage swale that now supports a landscaped area and vegetable boxes associated with the former residence at 330 Holly Drive will be restored to a natural drainage, swale as part of the Remediation Project. This 0.07 acre area is covered under this ITP, and the only location that the applicant has requested Incidental Take coverage. The Restoration Project will include the removal of non-native landscape species and eight large raised vegetable bed planters. The Restoration Project also includes the creation of a seasonal wetland within an existing upland area of the swale.  Project will result in impacts to 0.07 acres of CA tiger salamander habitat; the project will permanently remove 0.07 acres of CA tiger salamander habitat. The project is expected to result in incidental take of CA tiger salamander, which is/are designated as a threatened species under the CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.	<b>NOD</b>

2016051063	Kaiser Permanente Baldwin Park Medical Center Parking Structure Expansion and Med Office Bldg Project Baldwin Park, City of Baldwin Park--Los Angeles The proposed project includes the expansion of the existing parking structure and construction and operation of a new medical office building. The parking structure expansion would provide 834 parking spaces, which would be a net increase of 546 spaces on the campus. The parking structure would have one level below grade, one level at grade, and four levels above grade for a total of six levels. A total of 44 accessible parking spaces would be provided. The medical office building would be a three-story, 60,000 sf facility.	<b>NOD</b>	
2016079024	Ericsson Fiber Deployment Project - Phase 1 (Streambed Alteration Agreement No. 1600-2016-0024-R3) Fish & Wildlife #3 San Jose--Santa Clara The project includes horizontal directional drilling (HDD) at sites on Coyote Creek, Guadalupe River, Canoas Creek, Los Gatos Creek, Alamos Creek, and Ross Creek for the purposes of installing fiber-to-the-premises infrastructure. The bore will be 1.5 times the pipe diameter. Eight-inch HDPE pipe with Standard Dimension Ratio 9 containing 6 (2-inch HDPE) conduits will be pulled. Each side of the pipe will be connected to a vault placed in a bore pit. To reduce the potential of a frac-out affecting sensitive resources, the entrance and exit points for drilling will be located at least 150 feet from riparian vegetation and depths below the invert of the stream will be 20 feet or greater. Gravel will be used to fill-in the bore pit. The CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0024-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Katerina Filatova/Ericsson, Inc. on behalf of Google Fiber CA, LLC.	<b>NOD</b>	
2016088001	Russian River (Blanz) Revegetation Project Fish & Wildlife #3 --Sonoma This project is being implemented in response to a 1602 violation related to channel modification and vegetation clearing. This project includes soil stabilization and habitat enhancement through riparian plantings. Issuance of a Lakebed Alteration Agreement Number 1600-2016-0170-R3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>

2016088039	Construct Rock Slope Protection at Four Locations - 2K230 / 0416000392 Caltrans #4 Petaluma--Sonoma DO contract to repair slope damage along Route 101 at four locations. Locations are along a frontage road in the vicinity of the Kastinia Road and Hwy 101. This project will make the transportation corridor safer.	<b>NOE</b>	
2016088040	Marina Fire Emergency Restoration Caltrans #9 --Mono Project includes emergency repairs and slope protection measures due to a wildfire. Purpose of the project is to restore damaged highway safety features (i.e. guardrail, signs, etc.) and provide additional rock fall protection measures. The traveling public and highway maintenance forces will benefit from this project.	<b>NOE</b>	
2016088041	Remove Accumulated Sediment Below Doak Creek Bridge - C60050 / 0000000056 Caltrans #4 --Napa Remove accumulated sediment below Doak Creek Bridge to reduce the possibility of flooding during rainy season on State route 29 in Napa County. This project will make the transportation corridor safer.	<b>NOE</b>	
2016088042	El Presidio Wayfinding Signs Parks and Recreation, Department of --Santa Barbara This project is the design and installation of 46 wayfinding and interpretation signs. Over the years the city of Santa Barbara has imposed its grid of streets through the Presidio compound making it difficult for visitors to find buildings and features and to understand the original layout. The perimeter walls and central parade grounds are currently in 4 separate city blocks. These signs will solve that problem while the sizes, colors, and designs are sensitive to the historic setting and are minimally intrusive. The signs are compliant with State accessibility and branding standards.	<b>NOE</b>	
2016088043	Lateral Well Solar Power Parks and Recreation, Department of --Marin Install a new three-panel solar array to provide power for water disinfection equipment for an existing well, and replace an existing pump shed in Samuel P. Taylor State Park to provide improved service to park visitors and park staff.	<b>NOE</b>	
2016088044	Cordelia Pumping Plant Vegetation Removal Water Resources, Department of Fairfield--Solano CCC crews will remove vegetation from around the perimeter of the Cordelia pumping plant and reservoir within the fence line. Loppers will be used to trim low hanging branches, and material will be chipped and spread as mulch in the same area. Approximately 1.3 acres of land will be disturbed. Debris and silt will be removed from the concrete v-ditch behind the plant and use to repack the eroded areas along the hillside adjacent to the v-ditch. Cedar chips will also be placed along barren soil.	<b>NOE</b>

2015082061	City of West Sacramento General Plan Update West Sacramento, City of West Sacramento--Yolo The City of West Sacramento has prepared an EIR that addresses the potential impacts of the proposed City of West Sacramento General Plan.	<b>EIR</b>	09/16/2016
2006032114	Auburn Creekside Center (PEIR T20050277) Placer County Auburn--Placer Note: 1 CD  The project proposes developing a commercial retail center on a 13.2-acre parcel located east of State Route 49, immediately north of the Target store in North Auburn. The proposed development areas are situated on the east and west sides of a tributary to Rock Creek, which traverses the site from south to north. The development site is approximately 6.6 acres in area; the remaining 6.6 acres will be provided as right-of-way dedications (3.3 acres) and open space (3.3 acres). The development will be phased, ultimately consisting of approximately 90,105 sf of new retail space and parking for 326 vehicles. The project proposes extending Education Street east, bridging the creek, and terminating at a new traffic circle at Quartz Drive. Required entitlements for this project include a CUP, Variance from minimum landscaping requirements, a Tentative Map to divide the parcel into four separate parcels, and a Design Review Agreement.	<b>FIN</b>

2016052022	Caldwell Creek Roadway Rehabilitation Project Caltrans #2 Alturas--Modoc FYI: Final  Caltrans proposes to rehabilitate the existing SR 299 from PM 24.5 to 33.5 in Modoc County. The existing pavement is distressed and exhibits a rough ride. Simple (routine) preventative maintenance measures are no longer adequate as a cost of effective strategy. The proposed rehabilitation project will conform to the new proposed base and a 0.45 ft hot mix asphalt overlay. The existing paved roadway and driveways will conform to the new proposed roadway work. Metal beam guardrail and terminal sections will be replaced. From MP 30.5 to 33.5 the paved roadway shoulders will be widened to 4 ft. When completed the rehabilitation effort will extend the pavement life for up to 20 years. Proposed project work, including equipment staging, will occur in the existing Caltrans ROW.	<b>FIN</b>	
2015072017	Dadurka Minor Land Division (PLN14-00121) Placer County --Placer The applicant is requesting approval of a Minor Land Division to subdivide a 26.61-acre property into two parcels consisting of 5.0 acres and 21.6 acres.	<b>MND</b>	09/01/2016

1998082005	Acquisition, Permanent Repair and Operation of the El Dorado Hydroelectric Project (Project No.184) El Dorado Irrigation District Note: Addendum to the FEIR	<b>ADM</b>	
	The activities addressed in the Acquisition, Permanent Repair, and Operation of the El Dorado Hydroelectric Project and Acquisition of 17,000 Acre-feet per year of New Consumptive Water Final EIR included acquiring Project 184 and associated features from Pacific Gas and Electric Company, conducting various permanent repairs to restore operation of Project 184, continuing to operate Project 184 consistent with Federal Energy Regulatory Commission requirements, and acquiring 17,000 acre-feet of consumptive water supplies to be diverted for the benefit of the El Dorado Irrigation District (District) customers at Folsom Reservoir through a Warren Act Contract with the U.S. bureau of Reclamation (Reclamation). The Final EIR did not contemplate the potential for a Contract amount less than full 17,000 acre-feet of consumptive water supplies provided by the water right permit held by the District. For the purposes of this temporary Contract, Reclamation and EID have agreed to limit the withdrawal of consumptive supplies made available by this water right permit to no more than 8,500 acre feet per year. No changes are proposed in the operation of Project 184 associated with the Project, and no new facilities are proposed. The Project 184 five-year Warren Act Contract and acquisition of 8,500 acre-feet will require minor, technical changes to the Final EIR. Therefore, an Addendum has been completed by the

2012022068	West of Hills Northern Pipelines Project East Bay Municipal Utility District Berkeley--Alameda The project involves the construction and operation of four transmission pipeline segments in western Alameda and Contra Costa Counties - a proposed 1.5 mile long, 48-inch diameter pipeline in the City of Berkeley; a proposed 36-inch diameter, 2.5 mile long pipeline in the City of El Cerrito; a proposed 36-inch diameter, 2.5 mile long pipeline in the Cities of El Cerrito and Richmond; and a proposed 36-diameter, 1.9 mile long pipeline in the Cities of Richmond and San Pablo. The proposed pipeline routes are located within existing city streets and on non-street properties owned by EBMUD ans City of San Pablo.	<b>ADM</b>	
2016-13	Santa Rosa Rancheria - APNs: 024-160-005, -006 Bureau of Indian Affairs --Kings The subject property consists of two parcels of land with a total of 10 acres, more or less, commonly referred to as Kings County APNs 024-160-005, containing .50 acres, 024-160-006, containing 9.38 acres. The parcels are within the exterior boundaries of the Santa Rosa Rancheria. The property is Valley flat and with large, dense patches of salt grass, mallow and other California Native grassland plants, as well as a cottonwood tree, willow and palo verde trees. The prior owners of the land were enrolled members of the Tribe and the Catholic Church. There was a family residence on the property and a portion of the property was used for public parking. There is no immediate proposed change in land use or planned development of this land. Long term uses anticipated by the Tribe include planning for community infrastructure, housing, employment and cultural resource demands.	<b>BIA</b>	09/02/2016
2014042087	County General Plan and Airport Land use Compatibility Plan updates Stanislaus County --Stanislaus Stanislaus County proposes to update its General Plan and Airport Land Use Compatibility Plan to extend the 20-year planning horizons to 2035 and reflect the population projections adopted by the Stanislaus Council of Governments for the 2014 Regional Transportation Plan/Sustainable Communities Strategy. The update does not include any changes in Land Use map designations, but rather is a 'clean up' of the General Plan to incorporate changes in state law and local standards, such as SB 375, SB 5 (floodplains), AB 359 (groundwater mapping), and SB 244 (disadvantaged communities). The update is limited to revisions in the land use, circulation, conservation/open space, noise, and safety elements. The ALUCP update addresses land uses/changes around each airport using the pertinent Airport Layout Plan, Master Plan, or airport diagram as a foundation.	<b>FIN</b>	
2016082013	Decker Island Restoration Project Water Resources, Department of Rio Vista--Solano The Decker Island Restoration project is a tidal restoration project proposed by DWR and located in Solano County along the Sacramento River. The project site is currently an established emergent wetland with muted tidal connectivity to Horseshoe Bend to the south that transitions to upland habitat in the north. The project would enhance up to 140 acres of tidal wetland, associated high marsh, and riparian habitats, benefiting special status species like Delta Smelt, Chinook	<b>MND</b>	09/06/2016

	Salmon, and Swainson's Hawk.		
2016081014	LACMA Building for the Permanent Collection Los Angeles County Los Angeles, City of--Los Angeles Museum Associates proposes the LACMA Building for the Permanent Collection (the Museum Building) within the eastern portion of the LACMA Campus (LACMA East) and the adjacent property owned by Museum Associates on the south side of Wilshire Blvd. at the corner of Wilshire Blvd. and Spaulding Ave. The Museum Building would comprise one building of approx. 368,300 gross sq. ft. and would replace four buildings within LACMA East collectively comprising approx. 392,871 gross sq. ft. Overall, the Museum Building would result in a decrease in the sq. footage of museum buildings by approx. 24,571 sq. ft. and a reduction in the maximum theater size from 600 seats to 300 seats. A new parking facility providing approx. 260 parking spaces is also proposed.	<b>NOP</b>	09/02/2016
2016081015	Mount Saint Mary's University Chalon Campus Wellness Pavilion Project Los Angeles, City of Los Angeles, City of--Los Angeles Demolition of all existing uses on a 3.8-acre project site and construction of the proposed Wellness Pavilion, a two-story, approximately 38,000 sf multi-use building, which would house a recreation and practice gym, multi-purpose rooms, exercise rooms, physical therapy lab, dance and cycling studios, offices and support space (i.e. lockers, showers, restrooms, equipment storage, and mechanical spaces). The project does not include a request to increase the max student enrollment (2,244 students) on the campus, nor would it create a need for a future increase in the max student enrollment.	<b>NOP</b>	09/02/2016
2016081016	Pure Water San Diego Program, North City Project EIR/EIS (PTS No. 477184) San Diego, City of San Diego--San Diego A site development permit and EIR/EIS for the project. Overall, the pure water program will ultimately produce 83 MGD of locally-controlled water, recycling a valuable and limited resource that is currently discharged to the Pacific Ocean. The program will be implemented in phases over a 20 year period, grouped by geographical area: North City, Central Area, and South Bay. The North City project, which is the subject of this NOC and EIR/EIS NOP, will produce 30 MGD of purified water and is scheduled to be later operational in 2021.	<b>NOP</b>	09/02/2016
1997022074	Reservoir #6 Water Tank, Associated Infrastructure and 8 Residential Parcels Lincoln, City of Lincoln--Placer PCWA is approving an addendum which addresses project changes to a proposed transmission pipeline (Phase 3 of the Lincoln/Penryn Pipeline and Metering Project),, which was evaluated first as a 24-inch pipeline in the Revised Twelve Bridges Specific Plan SEIR (1998 SEIR) and later as a 30-inch line in the 1999 Addendum. The Project as revised would increase the size of the proposed Phase 3 water supply pipeline from a 30-inch diameter pipe to a 42-inch diameter pipe. As previously analyzed, the pipeline would extend approx. 6,000 feet northward from the existing Phase 1 30-inch pipeline and Phase 2 42-inch Lincoln/Penryn pipeline intersection, near the 5 million gallon Tank #2 storage tank site to a proposed pressure reducing/metering (PR&M) station, the Twelve Bridges PR&M Station as a separate project, evaluated in the Reservoir #6 and Infrastructure SEIR certified by the City of Lincoln. As described in the Reservoir	<b>NOD</b>

	#6 and Infrastructure SEIR, water from the Phase 3 transmission pipeline would exit the Twelve Bridges PR&M Station through 16-inch and 36-inch diameter pipelines. The proposed project change would occur within the same Project footprint that was analyzed in the 1999 Addendum.		
1998082005	Acquisition, Permanent Repair and Operation of the El Dorado Hydroelectric Project (Project No.184) El Dorado Irrigation District The activities addressed in the Acquisition, Permanent Repair, and Operation of the El Dorado Hydroelectric Project and Acquisition of 17,000 Acre-feet Per Year of New Consumptive Water Final EIR included acquiring Project 184 and associated features from PG&E Company, conducting various permanent repairs to restore operations of Project 184, continuing to operate Project 184 consistent with Federal Energy Regulatory Commission requirements, and acquiring 17,000 acre-feet of consumptive water supplies to be diverted for the benefit of the El Dorado Irrigation District (District) customers at Folsom Reservoir through a Warren Act Contract with the U.S. Bureau of Reclamation (Reclamation). The Final EIR did not specify the current proposed term of the Contract with Reclamation nor did it contemplate further environmental review and protections addressed in the Remand EIS. No changes are proposed in the operation of Project 184 associated with the Project, and no new facilities are proposed. The Project 184 Long-Term Warren Act Contract and further environmental review will require minor, technical changes to the Final EIR. Therefore an Addendum has been completed by the District in accordance with CEQA Guidelines Section 15164.	<b>NOD</b>

2013111016	Northwest State Route 138 Corridor Improvement Project Caltrans #7 Lancaster--Los Angeles The proposed project is located in LA County, on SR 138 between I-5 and SR 14. The project would widen and improve SR 138 from postmile 0.0 to 36.8. The purpose of the proposed project is to improve mobility and operations in northwest LA County, enhance safety within the SR 138 corridor based on current and future projected traffic conditions, and accommodate foreseeable increases in travel and goods movement. The project alternatives are: The no build, alternative 1 (freeway expressway), Alternative 1 with a design option that bypasses the community of Antelope Acres, and Alternative 2 (expressway conventional highway).	<b>EIR</b>	09/19/2016
2010091044	Sylmar Ground Return System Replacement Project Los Angeles, City of Los Angeles, City of--Los Angeles The Los Angeles Dept. of Water and Power is proposing to replace the existing marine cables and the marine electrode portions of the Sylmar Ground Return System. The proposed marine facility would originate at the existing Gladstone Vault, from this location, the new marine cables would extend to a new electrode array in the Santa Monica Bay. The marine cables would be installed several feet beneath the ocean floor by means of a water-jet plow to the site of the proposed electrode array, approx. 2 miles offshore. The electrode array would be located on the ocean floor at a depth of approx. 100 feet below mean sea level and consist of 36 concrete vaults, arranged in two rows of 18 vaults. Each vault is 20 feet long 8 feet wide, and four feet high.	<b>FIN</b>

	Mosquito and Vector Management Program (Program/Project).		
2015061060	Interstate 405 at Crenshaw Boulevard / 182nd Street Interchange Improvement Project Caltrans #7 Torrance--Los Angeles Note: Joint-EA, FONSI, Neg Dec	<b>FIN</b>	
	Caltrans proposes to improve the operation conditions of the I-405 freeway mainline, and its on-and-off ramps at Crenshaw Blvd./182nd St. in the City of Torrance, LA County, from pm 14.4 to 15.6. The project consist of increasing capacity/storage at the interchange by adding auxiliary lanes on both the northbound/southbound freeway mainline between the Western Ave. and Crenshaw Blvd/182nd St. interchanges, adding an additional lane to all existing on-and-off-ramps, constructing a new, two-lane on-ramp to southbound I-405 from Crenshaw Blvd., and geometrical improvements and widening of interfacing arterial streets.		
2015101001	McCadden Project Los Angeles, City of Los Angeles, City of--Los Angeles The Project includes the development of 100 affordable housing units for seniors, up to 35 affordable housing units for young people, and approximately 69,250 sf LGBT facility, including a senior and youth center, administrative offices, accessory recreational space, a kitchen/service area, transitional living and emergency guest rooms, and retail. These uses would comprise approximately 185,560 sf of new floor area and would be provided within three new buildings that would range in height from 20 to 75 feet. In addition, 350 parking spaces would be provided in two subterranean parking levels. Outdoor areas include plazas, courtyards and gardens. An existing 28,600 sf office building and surface parking areas would be removed to allow the proposed uses.	<b>FIN</b>	
2016081017	Institution Road Reconstruction and Maintenance Project San Bernardino County San Bernardino--San Bernardino San Bernardino County proposes the reconstruction of Institution Road over a distance of approximately 5,400 ft to a uniform 26' paved width and a max 10' disturbance at the shoulder areas (total of 20'). Reconstruction may include removing existing asphalt concrete surfacing, excavation of roadway, placement of new asphalt concrete over aggregate base, placement of Portland Cement Concrete, including cutoff walls, and the painting of traffic striping and pavement markings. Regular and routine maintenance and repair activities will occur, such as debris removal, pothole patching, chip seal, fog seal, shoulder grading (up to 10 ft from pavement edge), storm clean-up (up to 20 ft from pavement edge), and repair, traffic control; maintenance of traffic signage, pavement striping and markings.	<b>MND</b>	09/06/2016
2016081018	Bouquet Canyon Creek Restoration Project Los Angeles County Santa Clarita--Los Angeles The project involves five pre-defined reaches of Bouquet Canyon Creek where restoration activities would occur (from downstream to upstream, labeled as sites 1 through 5), and a sixth site in the abandoned Zuni Campground, where a fish preserve would be constructed. The project sites are located within an	<b>MND</b>	09/06/2016

	unincorporated area of northern LA County and within the southern part of the Santa Clara portion of the US Forest Services Santa Clara/Mojave Rivers Rangers District of the Angeles National Forest. The primary purpose of this project is to restore in stream and riparian habitat by reestablishing creek flows along sections of Bouquet Canyon Creek that currently are dry.		
2016081019	City of Ontario Recycled Water Distribution System Project Ontario, City of Ontario--San Bernardino The City is proposing the Recycled Water Pipeline Design Project to reduce its use of potable water, specifically for landscape irrigation applications. The proposed recycled water pipeline will provide a connection point to the existing recycled water pipeline within Euclid Ave-between the I-10 and Riverside Dr-and the parks surrounding the Euclid Ave corridor with recycled water to be used for irrigation. In addition, a pipeline will be installed to connect two existing OMUC recycled water lines in Riverside Dr to provide recycled water to the service area north Riverside Dr including the Deer Creek Loop, Lytle Creek Loop, and their surrounding common landscaping. The proposed project will also construct a booster pump station within the Euclid Ave median at Fourth St and another at one of three proposed alternative pump station locations on South Bon View Ave.	<b>MND</b>	09/06/2016
2016082014	Chevron Long Wharf Maintenance and Efficiency Project California State Lands Commission Richmond--Contra Costa Chevron Products Company proposes to implement modifications to the Richmond Refinery Long Wharf to improve its reliability and efficiency, comply with Marine Oil Terminal Engineering and Maintenance Standards requirements, and enhance the safety of crews and operators. The proposed project site is located in SF Bay adjacent to the Chevron Refinery in Richmond, CA. The project would involve modifications to four berths. Proposed modifications to the Long Wharf include a seismic retrofit to the Berth 4 loading platform, replacing gangways and cranes, adding mooring hook dolphins and new standoff, and modifying the fire water system at Berths 1, 2 and 3. The project would include installation of piles and over water structures.	<b>MND</b>	09/06/2016
2016082015	Daws Tentative Parcel Map (TPM-16-01) Siskiyou County Fort Jones--Siskiyou The project is a proposed tentative parcel map to subdivide a 72.22 acre parcel into four parcels, ranging in size from 10.01 to 11.11 acres, plus a 30.80 acre designated remainder parcel. The parcels would be served by individual groundwater wells and septic systems. Parcels A and B have Caltrans approved encroachments for access onto Hwy 3. Parcel C would have access to Air Force Way, a private road, which connects to Hwy 3. Parcel D and the designated remainder have access to Mineral Range Rd, which is also a private road that connects with Hwy 3.	<b>MND</b>	09/06/2016
2016082016	Outingdale Verizon Wireless (S15-0013) El Dorado County Placerville--El Dorado CUP for the construction of a wireless telecommunication facility consisting of a 150 ft monopine tower with two GPS antennas, twelve eight ft wireless panel antennas mounted at 141 ft, eight radio heads, two six ft diameter microwave antennas mounted at 132 ft, a 30ks standby generato with a 132 gallon diesel tank	<b>MND</b>	09/06/2016

	and outdoor equipment within a 30x30 ft lease area enclosed with an eight ft chain link fence. The facility as has been designed as a monopine with foliage that matches the surrounding vegetation. The tree cover surrounding the site would camouflage the tower from off site residences.		
2016082018	Tahoe Donner Trails Five-Year Implementation Plan (5YIPlan) (File No. MGT 16-004-MGT16-008 & EIS 16-002) Nevada County Truckee--Nevada Floodplain management plan (MGT 16-004), high erosion potential management plant (MGT16-005), biological resources management plan (MGT16-006), significant cultural resources management plan (MGT16-007), rare, threatened and endangered species and their habitat management plan (MGT16-008), and adoption of the MND for the project (EIS16-002).	<b>MND</b>	09/06/2016
2011111065	Issuance of Hazardous Waste Facility Permit for CleanTech Environmental, Inc. Toxic Substances Control, Department of Irwindale--Los Angeles The project consists of making a permit determination on the CleanTech Environmental Inc. hazardous waste facility permit application to allow the construction and operation of a hazardous waste storage and treatment facility. The CleanTech project, located at 5820 Martin Road in Irwindale, covers 0.98 acres within a commercial/industrial area of Irwindale. CleanTech collects and receives used oil from offsite generators (gas stations, oil changers, auto repair shops, etc.) and consolidates the used oil in tanks at the facility . The used oil is treated by blending, gravity separation, and by adding a chemical reagent if necessary, to remove metals and enhance dehydration to meet the recycled oil standards. CleanTech then certifies the treated used oil as "recycled oil." The projects proposed maximum monthly used oil throughput is 1,000,000 gallons, or approx. 3,750 tons per month. CleanTech also collects drums of used oil, waste antifreeze, and non-RCRA wastewater and stores them in a drum storage area. The liquid waste in containers may then be pumped into the appropriate storage/treatment tanks. Additionally, CleanTech collects drums of solid waste including solid waste contaminated with oil, oil/water separation sludge, contaminated soil with oil, contaminated containers, etc. and places the drums into the drum storage area. Consolidated waste antifreeze, non-RCRA wastewater, and oil-contaminated solid waste are shipped off site to a recycling, treatment, or disposal facility. An oil filter crushing operation is also currently operating at the site.	<b>NOP</b>	09/06/2016
2012011010	Santa Clarita Valley Sanitation District Chloride Compliance Supplemental EIR for Brine Concentration and Limited Trucking Los Angeles County Sanitation District Santa Clarita--Los Angeles The Project involves the analysis of potential impacts to the unarmored threespine stickleback fish as a result of reductions in discharge from the Valencia and Saugus WRPs to annual average flows of 8.5 and 4.5 million gallons per day (mgd), respectively, Further, the daily minimum flows both WRPs would not be reduced below the current daily minimum flows of 5 and 4 mgd, respectively, except as may be required by an emergency. The Project only seeks to make quantities of recycled water available to water purveyors that are in excess of a volume established to be protective of the beneficial uses of the SCR. This project does not involve any construction. Facility to convey recycled water would be constructed by water purveyors and would need their own environmental review	<b>NOP</b>	09/06/2016

	under CEQA before being implemented.		
2016082017	San Rafael High School Implementation Plan San Rafael City Schools San Rafael--Marin This EIR address the long-range implementation plan for SRHS as well as one of the implementation plan elements - the stadium project. The stadium project is to be addressed at a project level of detail in accordance with CEQA guidelines section 15161. The remaining implementation plan elements are less refined at this stage, and therefore this EIR addresses them at a programmatic level of detail in accordance with CEQA Guidelines section 15168. Therefore, this EIR is both a program EIR on the implementation plan and a project EIR for the stadium project. A program EIR address a series of actions that are related and part of one large project. This approach allows the EIR to address the cumulative impacts of these actions and to recommend program-wide mitigation measures. If a later activity would have impacts that are not addressed in the program EIR, additional environmental review may be needed at that time.	<b>NOP</b>	09/06/2016
2015122006	Amendments to the Cap-and-Trade Regulation & California's Compliance Plan for the Federal Clean Power Plan Air Resources Board -- Note: Federal  ARB staff is proposing to amend the Cap-and-Trade Regulation and to develop and finalize a CPP Compliance Plan for California. Approval of the proposed project, developed by the Air Resources Board, would result in the continuation of the Cap and Trade Program beyond 2020, Program linkage with Ontario, Canada, compliance with the federal Clean Power Plan, and other changes to streamline implementation of ARB's Cap and Trade Program.	<b>Oth</b>	09/19/2016
2016031048	SR 140 Slope Repair Caltrans #10 --Mariposa Note: Response to Comments  Caltrans proposes to repair a failed slope beneath an 84 inch reinforced concrete pipe culvert adjacent to eastbound lane of SR 140 at PM 32.2 in Mariposa County. Construction of a rock-filled gabion basket wall with stone base support/buttress is the proposed repair method to repair the failed slope and stop erosion from culvert at this site.	<b>Oth</b>	
2003041001	1122 4th Avenue Project San Diego, City of --San Diego The applicant proposes redevelopment of an existing urban parcel in downtown San Diego, at the intersection of the 4th Ave and C St. Preliminary plans for the project proposes to demolish and replace the existing California Theatre building with a new, high density, mixed use building. The project proposes to construct a 40 story, 282 unit residential tower core (414 ft tall) in the central portion of the site, and a nine story structure to the east facing 4th Ave to mimic the scale of the existing office building. The project also proposes three levels of underground parking, street level retail, lobby, residential amenities, and four levels of above-grade parking.	<b>SIR</b>	09/19/2016

<b><u>Documents Received on Friday, August 05, 2016</u></b>			
1996041084	SANTA CLARITA VALLEY JOINT SEWERAGE SYSTEM FACILITIES PLAN Los Angeles County Sanitation District SANTA CLARITA VALLEY--LOS ANGELES CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2016-0004-R5) to the project applicant, Santa Clarita Valley Sanitation District. The project proposes to impact 0.53 acres of streambed/lake, including 0.53 acres of permanent impact to stream bank and 0.11 acres of temporary impact to stream bank habitat and mitigate with 1.33 acres of creation, restoration and/or enhancement. The CDFW prepared an addendum to the EIR that was prepared by the lead agency for this project.	<b>NOD</b>	
2005091148	San Clemente Dam Seismic Safety Project Water Resources, Department of Carmel--Monterey CDFW has executed Amendment No. 7 to Lake and Streambed Alteration Agreement No. 1600-2013-0063-R4 (Agreement), to the Permittee, California American Water.  The project includes the removal of the San Clemente Dam and the Old Carmel River Dam on the Carmel River in Monterey County. The Carmel River upstream of the existing San Clemente Dam will be rerouted through a new, created channel. Amendment No. 7 includes adding follow-up work to refine project components following initial installation and associate dewatering and access-related activities.	<b>NOD</b>	
2009012077	Fred Stockett - Minor Subdivision - MS0818 Del Norte County --Del Norte The project involves a previously approved tentative map in which three parcels and a remainder were approved. This project would modify that previous tentative map to create two parcels and a remainder. proposed Parcels 1 and 2 are on the east side of the hwy while the Remainder Parcel is on the west side of the highway. The project area is approx. 127.5 acres. Proposed Parcel 1 is 44.47 acres. Parcel 2 is 9.29 acres, and the Remainder Parcel is 73.72 acres. The Arbor Glen RV Park is located on Parcel 2.	<b>NOD</b>	
2010091044	Sylmar Ground Return System Replacement Project Los Angeles, City of Los Angeles, City of--Los Angeles The Los Angeles Dept. of Water and Power is proposing to replace the existing marine electrode portions of the SGRS. The replacement facility will be located in the vicinity of the existing SGRS marine facility in Santa Monica Bay. While the new marine facility would be in a different alignment than the existing, it would serve the same purpose and function as the existing facility. The SGRS is an integral component of the Pacific Direct Current Intertie Transmission Line (PDCI), which transmits bulk power between Los Angeles and the Pacific Northwest. The PDCI is a direct current system, and it cannot operate reliably without a ground return system. Due to physical and operational system deficiencies with the existing marine facility of the SGRS, its replacement is proposed to increase the reliability and stability of the power generation and delivery system for the Southern CA; to continue to meet current and projected demand for power in the region; and to help increase the available share of renewable resource energy for the PDCI partners.	<b>NOD</b>

The CPU also expands the Urban Reserve Line and identifies two future expansion areas. The EIR will evaluate the CPU at a conceptual level of detail and will serve as a programmatic EIR pursuant to section 15168 of CEQA Guidelines.		
2014101061	Mariposa Public Utility District Wastewater Treatment Facility Improvements Mariposa Public Utilities District --Mariposa The operation of the WWTF and discharge are regulated through permit issued by the CVRWQCB, specifically NPDES Permit NO CA0079430, Order R5-2015-0041 adopted April 17, 2015. The permit specifically requires the District to construct tertiary treatment unit process in addition to the installation of new process to meet additional and more stringent discharge limitations. The CVRWQCB has adopted two time schedule orders for constituent limitations unattainable with the existing WWTF.	<b>MND</b>	09/06/2016
2016081022	Leggitt Minor Use Permit San Luis Obispo County San Luis Obispo--San Luis Obispo Request by Jason Leggitt for a minor use permit to allow the installation of two duplex manufactured units (four new dwelling units) totaling 2,592 sf, a common space between the two buildings, and eight onsite parking spaces. Each unit would be 648 sf with two bedrooms and a front porch. The project will result in the disturbance of approximately 7,500 sf on a 7,500 sf parcel.	<b>MND</b>	09/06/2016
2016081023	251 Harloe Coastal Bluff Remediation Pismo Beach, City of Pismo Beach--San Luis Obispo The project site consists of an existing deteriorating coastal bluff protection/stabilization wall protecting the subject parcel from shoreline erosion. A portion of an existing, vacant residence currently extends over the bluff face. The project would stabilize the eroding bluff with a concrete protection device that will have a native bluff looking finish. The proposed project extends onto the residential property to the north and proposes a construction bench, soil placement, and hydroseeding on State Parks property.	<b>MND</b>	09/06/2016
2016081024	UP 1140-16 Betabel RV Use Permit Amendment San Benito County --San Benito The applicant is requesting: to increase the number of long term occupancy RV stalls from 100-150. To add an RV storage area in a location of the property that was recently increased in area via a lot line adjustment with a neighboring property. This storage area is proposed to contain no more than 120 storage stalls. A photovoltaic solar system is being proposed to create a covered parking facility and to generate electricity for the existing RV park. The applicant has indicated that all motorized vehicles will be stored outside of the flood plain and only road worthy recreational vehicles, such as pull behind trailers, will be stored within an are identified as floodplain AE. The development of the RV storage structure will require approximately 1,560 cy of cut (max cut of 4') and 1,370 cy of fill. As part of this earthmoving activity, the parking area will consist of 6" aggregate base material. The majority of cut will result from the creation of a storm water retention pond. The applicant proposes to utilize Arizona Cypress trees for the purpose of screening the storage area and structure from HWY 101. An	<b>MND</b>	09/06/2016

	existing building, located directly east of the project site, would also work to screen direct views from HWY 101.		
2016081025	Guidance Charter School Palmdale, City of Palmdale--Los Angeles The Guidance charter school has been proposed for a 30 acre project area located south of Ave R and west of 40th St East in the City of Palmdale. The Guidance Charter School is permitted in Z R-1, provided that a CUP is obtained pursuant to the provisions of Chp 2, Art 22 of the Palmdale Municipal Code. The Guidance Charter School will serve middle school and high school students and will include a library, gym, multi-purpose room, administration building, locker rooms, basketball/volleyball courts, classrooms, installation of paved parking areas, track, soccer and football facility, baseball field, and access roads and utilities (natural gas, water sewer, electric, telephones). The middle school will serve 533 students and the high school will serve 605 students for a total of 1,138 students.	<b>MND</b>	09/06/2016
2016081026	Windset Farms Phase IV Expansion Santa Maria, City of Santa Maria--Santa Barbara A planned development permit (PD2016-0008) for Windset Farms to allow new ghg, packing facilities and associated utility and site improvements on 47.2 acres. The project would establish previously approved temporary hoop house greenhouse structures as permanent structures on 9 acres; allow construction of new GH No. 5 (covering 10.29 acres or 448,200 sf); allow construction of new GH No. 6 (covering 20.45 acres or 891,000 sf); and allow construction of a new packing and shipping shed (on 1.98 acres or 86,000 sf); and associated driveway, parking, stormwater, landscape and infrastructure improvements.	<b>MND</b>	09/06/2016
2016082019	Pruneyard Shopping Center and Offices - Expansion Project Campbell, City of --Santa Clara The Pruneyard Shopping Center and Office Expansion project would allow construction of several new retail buildings (48,600 sf) a 100,000 sf five story office building, and expansion of the existing parking garage. The proposed project also includes a master use permit that will allow establishment of a new land use program for the project site; a master sign plan will provide allowance for new on site signage, including a freeway oriented sign; a tentative parcel map will allow the division of the project site into three parcels; a zoning map amendment to extend the O Zoning overlay across the entirety of the pruneyard; and a zoning text amendment to modify various provisions of the campbell zoning code to allow consideration of the master use permit and the master sign plan.	<b>MND</b>	09/06/2016
2016081020	Hyatt Hotel Project - Planned Development (PD 16-003) Paso Robles, City of Paso Robles--San Luis Obispo The project is intended to provide visitor serving uses consistent with the City General Plan. The project would result in a new four story, 116-room hotel on a 2.03 acre property. The hotel would total 69,821 sf and is 65 ft tall at its highest point. The site is currently developed with the single story, 22-room River Lodge Motel with a gazebo and pool area, and associated parking. Prior to construction, the existing building and associated structures would be demolished and removed. A proposed entry drive would provide access from the grand entry onto the site	<b>NOP</b>	09/06/2016

	from Alexa Court. A secondary entry drive would provide access to the site from Theatre Dr. In later phases of the project, the temporary driveway would be abandoned for more parking. Contingent upon implementation of the proposed entry drive location, the project proposes between 128 to 130 parking spaces. Proposed site improvements include a pool, spa, variation of seating types and areas, fire pit, and rear patio.		
2016081027	Morro Bay Water Reclamation Facility Morro Bay, City of Morro Bay--San Luis Obispo The proposed Morro Bay Water Reclamation Facility Project will provide wastewater treatment services for the City of Morro Bay and potentially additional nearby customers. The proposed project is intended to provide opportunities for the City to produce and beneficially reuse advanced treated recycled water and would meet or exceed all wastewater treatment requirements of the SWRCB. The proposed project includes all necessary pipeline collection and conveyance infrastructure needed to support the treatment facility itself. The existing Morro Bay-Cayucos Wastewater Treatment Plant would be replaced by the proposed WRF, and its eventual decommissioning is also considered part of the proposed project.	<b>NOP</b>	09/06/2016
2016081028	Hannah Dam Replacement and Friant-Kern Canal Turnout Structure Kaweah Delta Water Conservation District --Tulare The project would continue to allow diversion capability from the Lower Kaweah River with the Hannah Dam Replacement and from the Friant-Kern Canal with the Friant-Kern Canal Turnout Structure. Specific project elements would include replacement of the Hannah Dam structure in the Lower Kaweah River, construction of a replacement diversion inlet structure from the Lower Kaweah River, construction of a turnout structure from the Friant-Kern Canal and construction of a gravity return structure to the Lower Kaweah River.	<b>NOP</b>	09/06/2016
1992013033	Noble Conditional Use/Surface Mining Permit/Reclamation Plan Extension CUP-15-003/SMP-15-002/RP-15-003 Humboldt County Eureka--Humboldt Note: Supplemental  The proposed project is for a renewal of a 15 year CUP and reclamation plan for a previously approved gravel mining and processing operation. The operation has been permitted and operating for the past 15 years. No modifications to the existing permit are proposed. This mine consists of extracting instream river run aggregate from exposed gravel bars located in 14 parcels along the Van Duzen River and at the mouth of Yager Creek. The 14 parcels are located between river mile 3.2 and 6.0 on the Van Duzen River and at the mouth of Yager Creek (at river mile 5.0 on the Van Duzen River). This operation may excavate up to 100,000 cy of aggregate per year. Five stockpile sites are located on six parcels adjacent to the river. Gravel may be sorted on site. No other aggregate processing is permitted. Annual extraction volume would continue to be limited by the County of Humboldt Extraction Review Team prescription process. The approved mining and reclamation plan describes the entire project.	<b>Neg</b>	09/06/2016

2016081021	<p>City of Clovis Active Transportation Plan Clovis, City of Clovis--Fresno</p> <p>The project consists of the adoption of the City's ATP. The City has developed the ATP with the intent of providing a comprehensive document outlining the future of walking and bicycling in Clovis. Specific development is not being proposed under this ATP and adoption of the CEQA document would not authorize any development. The City's ATP is intended as a guidance document with the ultimate vision of a connected and complete network of trails, walkways, and bikeways that provides safe, convenient, and enjoyable connections to key destinations around the city.</p>	<b>Neg</b>	09/06/2016
2001091025	<p>Bear Valley Parkway/East Valley Parkway Improvement Project (ER 99-33) Escondido, City of Escondido--San Diego</p> <p>The applicant proposes to widen approx. one half mile of East Valley Parkway from two to six lanes extending from Beven Drive to Lake Wohlford Road, and widen Valley Center Road to four lanes from this intersection to the northern city limits. The total Project area comprises 8.9 acres. Related improvements will include new paving, sidewalks, bike lanes, sound walls, street lighting, utility undergrounding, traffic signal modifications, bridge widening, landscaping and irrigation work.</p>	<b>NOD</b>	
2004092011	<p>East Cypress Corridor Specific Plan Oakley, City of Oakley--Contra Costa</p> <p>CDFW has executed Land and Streambed Alteration Agreement No. 1600-2015-0035-R3, pursuant to section 1602 of the Fish and Game Code to ACD-TI Oakley, LLC. A Delaware LLC., as represented by Perry Hariri. Project is associated with the 2,546 acre area zoned for the East Cypress Corridor. The Project is limited to the Rock Slough Bridge that will span Rock Slough and connect with Byron Highway to the south. The structure will be comprised of three spans of precast-pre-stressed concrete voided slab girders sitting on reinforced concrete two-column piers and seat-type abutments. The total length of the span will be approx. 220 feet and the width will be approx. 56 feet. The length of the bridge over the slough will be approx. 210 feet; a total of 12,320 sq. ft. of structure over Rock Slough will result from construction of the bridge. the height of the bridge will be a minimum of 10 feet above mean high water level.</p>	<b>NOD</b>	
2014061085	<p>Upland Wells Project Solvang, City of Solvang--Santa Barbara</p> <p>The SWRCB, as the responsible agency, will be issuing a water supply permit. The City of Solvang Water Division (City) has developed a well siting study for possible "upland" well sites to increase local water supplies to the City. Five upland well sites have been selected for study, drilling, and testing; potentially up to three of which may be future wells that would provide the City with potable water supplies to meet water demand. Construction of the project would entail the drilling of five well sites. The City is looking to obtain a total yield for the proposed wells of 500 to 600 gallons per minute to meet potable demand needs. The associated pipeline infrastructure will be installed upon well completion and testing.</p>	<b>NOD</b>

2015101019	La Quinta Village Build-Out Plan La Quinta, City of La Quinta--Riverside The City of La Quinta has undertaken a planning process to develop a build-out plan for the Village, its traditional downtown. The project area consists of approximately 137 acres of land, generally located south of Calle Tampico, east of Eisenhower Drive and west of Washington Street. In addition, the 9.3 acre property at the northwest corner of Calle Tampico and Washington Street, currently developed as a commercial center, is included in the project area. There are approximately 20 acres of vacant land in the project area that could be developed with a mix of uses - commercial, professional, and/or residential. Future development in the project area assumes development of the remaining vacant properties, as well as redevelopment of underutilized properties with more intensive uses.	<b>EIR</b>	09/22/2016
2016081029	Wickstorm Jersey Farms Modification Project Merced County --Merced The project site is located on approximately 35 acres of an existing farm totaling approximately 282 acres in the Hilmar area. CUP15-014 proposes to allow the construction of a new special needs barn and modification of the dairy to increase the milk cows from 1,800 to 2,400 but with an overall decrease of 65 animals from existing numbers with removal of support stock.	<b>MND</b>	09/07/2016
2016081030	ENV-2015-1817-MND Los Angeles, City of --Los Angeles The project is the construction, use & maintenance of a new 151 unit, approx. 162,500 sf (3:1 FAR), 6-story apartment building having 267 automobile parking spaces & 166 bicycle parking spaces within 4 levels of parking. Vehicular access will be provided on Chavez Ravine Place via a new 30 ft wide driveway. The project requires approx. 59,250 cy of net earth export. The applicant requests the following discretionary approvals: 1) a site plan review to allow a project resulting in an increase of 50 or more dwelling units & 2) a haul route for the export of approx. 59,250 cy of earth material. The applicant also requests a street vacation for a portion of Stadium Way & Chavez Ravine Place to revert excess right of way (approx. 2,353 sf in area) to private ownership.	<b>MND</b>	09/07/2016
2016081033	Oceanside Beach Facilities Oceanside, City of Oceanside--San Diego The project proposes to upgrade the beach entry at the western terminus of Mission Ave by remodeling the historic bathroom facility and relocating the adjacent City police offices to this building. No expansion of the 1,313 sf building is proposed. New public restrooms would be provided in a new one story City Services building that would also include a beach maintenance office, storage space, and garages for City vehicles. The square-footage of the new building would be approximately 3,000 sf. An adjacent 330 sf structure would house the relocated sewer lift station and include a roofed trash enclosure. This building would reach a max height of 20.5 ft; zoning standards establish a 45-ft height max.	<b>MND</b>	09/07/2016

	<p>The project does not include design, construction, or modifications to any physical facilities or infrastructure. As future improvement projects are implemented, CEQA documents will be prepared for each specific project. The intent of the project is to plan needed improvements to District infrastructure over the next decade. The project consists of the preparation of a planning document only.</p>		
2012022068	<p>West of Hills Northern Pipelines Project East Bay Municipal Utility District Berkeley--Alameda</p> <p>The Wildcat Pipeline (Berkeley) is 1 of 4 water transmission pipelines approved and certified in the West of Hills Northern Pipelines Project (Project) EIR which includes construction of about 8,200 feet of 48-inch pipeline from Nogales Street to Parker Street, predominantly in Dana Street, Stuart Street, Benvenue Avenue, and Woolsey Street, in the City of Berkeley. A new pipeline alignment (Ellsworth Street Alignment) was identified during detailed design and includes construction of about 5,450 feet of 48-inch pipeline from Benvenue Avenue to Bancroft Way, predominantly in Stuart Street and Ellsworth Street. Staff conducted an evaluation and determined that the new alignment is a minor project change that does not result in new significant impacts or causes an increase in the severity of previously identified impacts from the revised alignment. EBMUD will implement the same mitigation measures for the Ellsworth Street Alignment as presented in the project EIR.</p>	<b>NOD</b>	
2012102047	<p>West Oakland Specific Plan Oakland, City of Oakland--Alameda</p> <p>The granted approvals include Regular Design Review for new construction of 128 new townhouse-style condominium units (110 residential and 18-live work) at a 4.32-acre identified as Opportunity Site 8 within the Mandela/West Grand Opportunity Area of the West Oakland Specific Plan, Vesting Tentative Parcel Map for a one lot subdivision for condominium purposes, and an updated CEQA analyses for the project. The Project relies on the previously certified Final EIR for the West Oakland Specific Plan (the "WOSP EIR"; ER12-018; SCH#2012102047, certified July 15, 2014), and will implement all applicable SCAs and mitigation measures identified in the WOSP EIR.</p>	<b>NOD</b>	
2013062011	<p>Green Valley Convenience Center El Dorado County --El Dorado</p> <p>CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2014-0006-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Cameron park Petroleum, Inc.</p> <p>Project is limited to the following activities: 1) installation of approx. 22 feet of 12-inch diameter storm water drainage pipe with construction of an associated concrete headwall type outfall into the tributary. A rocked flow dissipater to slow exit flows of storm water runoff and minimize risk of erosion will be installed at the mouth of the outfall. The outer edge of the flow dissipater will end approx. 10 feet from the ordinary high water mark associated with the tributary. 2) Construction of a contoured retaining wall along the southern edge of the natural area. The purpose of the wall is to isolate the structure on the site and will range to a height of 12 feet. 3) Removal of nine trees and temporary disturbance of some associated riparian habitat to allow for construction on site. This project activity will be mitigated through implementation of a revegetation plan for the wetland/tributary area using local native plant species, including Fremont</p>	<b>NOD</b>

	cottonwoods, valley oaks, sandbar willow, arroyo willow, Gooding's black willow, and various shrub plants from the following genera: Heteromeles; Ceanothus, and Fremontodendron.		
2016012057	The Veranda Shopping Center Concord, City of Concord--Contra Costa The project proposes to demolish office buildings totaling approx. 619,000 sq. ft. and related site improvements on a 80-acre site in order to develop a commercial shopping center up to 375,000 sq. ft. of floor area. Proposed shopping center uses consist of a grocery store, a luxury theater with dining service, general retail, restaurants (including drive-through restaurant), health club, and banking/financial services.	<b>NOD</b>	
2016041052	Proposed Expansion of Thurgood Marshall Elementary Oxnard School District Oxnard--Ventura OSD proposes to construct and operate a new two-story, 12-classroom building on the existing Marshall Elementary School site. The school would be reconfigured to include grades 6 through 8 thereby accommodating students in grades K-8 at the Thurgood Marshall Elementary School site. The new facilities are needed to accommodate growing District enrollment in the 6th through 8th grades. The proposed 12-classroom permanent structure would increase capacity at the Marshall School to 900 students at State loading standards, satisfying the District's education specifications for a K-8 facility.	<b>NOD</b>	
2016042028	Wallace Weir Fish Rescue Facility Project Reclamation District 108 Woodland--Yolo CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0097-R2, pursuant to section 1602 of the Fish and Game Code to the project, Applicant, Reclamation District 108.  Project is limited to the following activities: Driving of sheet piling into the bed of the Knights Landing Ridge Cut (Ridge Cut) to create a temporary coffer dam to block downstream flows within the stream. These pilings would be removed at the completion of the project. Driving of permanent sheet pilings into the bed of the Ridge Cut to secure the upstream side of the new water passage structures and the fish salvage facility. Temporary dewatering of the channel downstream of the existing earthen berm weir for a distance of approx. 300 feet. Driving of concrete pilings into the bed of the Ridge Cut to support a bridge for vehicle crossing of a new concrete weir and fish salvage facility. Placement of between 6 and 15 power poles along the existing water diversion canal adjacent to the west bank of the Ridge Cut to bring power to a structure control building. Construction and placement of six picket weirs as part of the new facility to prevent upstream movement of anadromous fish species that may have enter the Colusa Basin Drain system. Construction of a new concrete fish salvage/rescue facility integral to the new Weir being constructed. Removal of the existing water diversion control structure adjacent to the west bank of the Ridge Cut and its replacement with a new diversion control structure for the water supply canal.	<b>NOD</b>

<b><u>Documents Received on Wednesday, August 10, 2016</u></b>			
	<p>in place and be converted to an employee break facility and substation for the Hospital Police Dept. The new visitor center would be a one-story building located south of the SNF. The building would include a lobby/waiting area, three private visiting rooms, separate visitor and patient restrooms, and two secured entryways consisting of a series of doors and gates, called "sally ports." The visitor building would be 15.5 feet high. The building's roof would include 6.6 foot high mechanical equipment screens on all four elevations, making the building appear to be 22.1 feet high.</p> <p>The project proposes to provide upgraded security features to two buildings which house patients, Continuing Treatment West (CTW) and Skilled Nursing Facility (SNF), as well as for the park area.</p> <p>The majority of parking spaces surrounding the CTW and SNF buildings would be relocated to a new parking lot to accommodate the new security fencing around the Continuing Treatment West (CTW) and SNF buildings, and to improve vehicular circulation. This parking lot would replace the open space east of the CTW building and south of the SNF building and visitor center. Upon project implementation, the southern part of the MSH campus would accommodate 634 parking spaces, or 71 more spaces compared to existing conditions. The total number of parking spaces on the MSH campus would be 1,619.</p> <p>The primary vehicular access for the CTW, SNF and CTE would be from an existing sally port (i.e. a secured entry consisting of a series of doors and gates) located on Date Street and from a new sally port west of the Visitor Center.</p> <p>The project proposes new lighting fixtures along the new security fence. The proposed 180-watt LED, pole-mounted light fixtures would be 25-feet tall and would be approx. 60 feet apart along the new fence. Lighting would be directed downward and shielded to avoid spillage onto neighboring residential properties along Balsam Street.</p> <p>The existing oleander shrubs would remain in place and new 5-gallon Hopbush shrubs, would be planted along Balsam Street between 5th Street and the terminus of Balsam Street, beyond 9th Street. The new shrubs, which are expected to grow 8-12 feet in height, would provide a landscape buffer between the residential homes west of the chain-link fence. New irrigation lines would be installed to ensure the new landscaping is maintained. Construction of the new security fence and relocation of the parking area west of the CTW building would remove approx. 10 the mature ornamental trees on the east side of Balsam Street. These trees would be replaced with approx. 27, 15-gallon trees. Sixteen new trees would also be planted along Balsam between 8th Street and 9th Street to help conceal the existing water tanks.</p>		
2016062030	<p>Dennett Dam Removal Modesto, City of Modesto--Stanislaus</p> <p>Proposed project is the removal Dennett Dam. The dam removal would occur during projected low flow periods in the summer. Specific actions include installing a temporary upstream channel block, re-routing of mainstem flows along the recently constructed overflow channel north of the dam, and expeditious demolition of the existing structure.</p>	<b>NOD</b>

<b><u>Documents Received on Thursday, August 11, 2016</u></b>			
2009112071	Addendum to SEIR - Fort Bragg Coastal Restoration and Trail Project Phase II Fort Bragg, City of Fort Bragg--Mendocino FYI: Addendum to Final	<b>ADM</b>	
	CDP-3-16 for remedial activities primarily composed of hot spot excavation in Operable Unit E at the former Georgia-Pacific Lumber Mill located on the western edge of the City of Fort Bragg. The proposed project would consist of excavation of approximately 3,500 cy of contaminated soils in a relatively small area of wetlands and uplands totaling 24,630 sf. The project also includes decommissioning of 57 monitoring and injection wells, filling in four pits, and re-establishing one monitoring well after construction is complete. The project includes implementation of a wetland mitigation and monitoring plan.		
2014051041	SCE West of Devers Upgrade Project Public Utilities Commission Loma Linda, Colton, Beaumont, Banning--Riverside, San Bernardino FYI: Final EIS	<b>FIN</b>	
	Southern California Edison Company proposes to upgrade 45 miles of existing 220 kV transmission line system to a higher capacity transmission line. This includes modifications to several substations.		
2016081038	Restaurant Row PLN16-00014 Victorville, City of Victorville--San Bernardino A site plan, tentative parcel map and sign program CUP with a proposed MND to allow for the development of approximately 29,700 sf of commercial buildings on approximately 5 acres of disturbed land, the creation of five parcels from a single parcel, and a master, sign program for the entire commercial complex.	<b>MND</b>	09/09/2016
2016081040	Campbell Moreland Ditch Company Ditch Replacement with Pipeline project Vandalia Irrigation District Porterville--Tulare The ditch replacement with pipeline is principally focused on water conservation to use water as efficiently as possible, with aspects of other Evaluation Criterion. The goal of this project is to replace the existing channel, approximately 2,600 ft, with pipeline to prevent any further water loss. The project is expected to take up to 8 months to design, bid, and construct once grant funding is secured and CEQA is complete.	<b>MND</b>	09/09/2016
2016082026	Hotel Sebastopol Sebastopol, City of Sebastopol--Sonoma The project involves the development of a 66-room hotel, which will consist of multiple buildings, ranging from two to four stories with a height of 50 ft as its highest elevation at 6828 Depot St. The project proposes to convert Brown St to one way (southbound), and parking will be provided at 6826 and 6824 Depot St and 215 and 225 Brown St. A use permit (hotel use with 50+ rooms and parking reduction), alcohol use permit, variance, zoning amendment, and design review permit are required.	<b>MND</b>	09/09/2016

2016082031	Roseville Automall Electronic Readerboard Replacement Roseville, City of Roseville--Placer The Roseville Auto mall Association is seeking approval to replace the existing electronic reader board sign located adjacent to I 80 with a new 480 sf light emitting diode reader board. The existing electronic reader board is 1,082 sf overall, with a 586 sf reader board. The existing reader board is 29.5 ft in height and the new reader board proposed height is 43 ft.	<b>Neg</b>	09/12/2016
2000014004	Merced Wild and Scenic River Comprehensive Management Plan/EIS National Park Service Yosemite Village, Wawona, El Portal--Mariposa, Madera Note: FYI - Public Notice Per Section. 15225.  Congress designated the Merced River as Wild and Scenic in 1987, requiring the National Park Service to develop a comprehensive management plan under the Wild and Scenic Rivers Act. This plan establishes the boundaries and segment classifications of the Merced Wild and Scenic River, establishes a formal process for protecting the river's free-flowing conditions, refines descriptions of the river's outstandingly remarkable values, documents the condition over river values, establishes a user-capacity program that addresses the kinds and amounts of public use that the river corridor can sustain, and defines the size and location of facilities needed to provide for public use and enjoyment of the river resource, this plan presents six alternatives with a wide range of visitation levels, desired visitor experiences, and restoration objectives.	<b>Oth</b>	
1991122014	Silver Springs Parkway to Bass Lake Road (south segment) El Dorado County EL DORADO HILLS--EL DORADO Project would construct the southern segment of Silver Springs Parkway as a two-lane road connecting Bass Lake Road to the southern terminus of the recently constructed northern segment of Silver Springs Parkway. The project would also construct an intersection at the southern end of the proposed Silver Springs Parkway at Bass Lake Road. The project segment of Silver Springs Parkway is approx. 0.25 miles long. The project would also realign and reconstruct Bass Lake Road approx. 800 feet south and 500 feet east of the Silver Springs Parkway intersection, and includes Class II bicycle lanes, concrete sidewalks on both sides and a landscaped center median. The project is identified in the County Capital Improvement Program (CIP) (CIP Project #76108).	<b>NOD</b>	
1995103069	Competitive Local Carriers Petitions For Local Exchange Public Utilities Commission VARIOUS--VARIOUS The Grassland Drive at North Branch Horse Creek Horizontal Directional Drilling Project is part of a larger fiber optic installation project between Vacaville and West Sacramento. This portion of the project involves the installation of a 2-inch diameter plastic conduit using horizontal directions drilling (HDD) technique under North Branch Horse Creek. The HDD will be approx. 200 feet long at a depth of no less than 5 feet below the low point of the creek. The bore pits on either side of the creek will be at least 50 feet away from the top of bank. CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0168-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Ron Chamberlain, Integra Telecom.	<b>NOD</b>

<b><u>Documents Received on Thursday, August 11, 2016</u></b>			
	through existing pipeline and turnouts. The Project consist of a SJR crossing described as the Red Top Pipeline crossing. The pipeline will connect a new turnout at the Paso Canal, to existing pump stand on the other side of the SJR. The connecting pipeline will be approx. 452 feet in length and will be either be placed across the river using a jack and bore technique, or placed across the river using an open cut trench. The State Lands Commission action is an approval of a 10-year General Lease - Public Agency Use through August 8, 2026.		
2016041034	Keys Creek Channel Access and Maintenance Project San Diego County Fallbrook--San Diego CDFW has executed Streambed Alteration Agreement No. 1600-2016-0111-R5, pursuant to section 1602 of the Fish and Game Code to the project applicant, County of San Diego, Dept. of Public Works.  The project will construct two access ramps and routinely maintain a portion of Keys Creek immediately upstream of the confluence with the San Luis Rey River. A portion of the project site is a compensatory mitigation area for the Lake Rancho Viejo Development Project (SAA 1600-20004-0157-R5). Two access ramps will be constructed on the west stream bank near the northern and southern termini of the existing concrete low-flow channel. Maintenance activities are described using 5 different tiers of maintenance activities. County engineers will use professional judgment as to the appropriate level of maintenance tier necessary for each maintenance activity based on the estimated accrued sediment in the stream. The project will mitigate project impacts beyond those activities described as Tier 1 as an undermined ratio dependent on the tier of maintenance activities deemed necessary.	<b>NOD</b>	
2016061001	Southwest Regional Operations Center Colton, City of San Bernardino--San Bernardino The project is an industrial trucking facility consisting of a 19,900 sq. ft. two-story office building; fuel station; truck wash facility; and parking for cars, trailers and trucks (108 vehicular spaces, 101 trailer spaces, and 52 tractor spaces). The City actions requested include the following: adoption of a MND and approval of a Lot Consolidation, Parcel Map, Architectural Site Plan Review, Building Plan Check, Building and Grading Permits, and an Easement for Site Access via Fog Avenue Realignment.	<b>NOD</b>	
2016061041	Anaheim South Recycled Water Project Anaheim, City of Anaheim--Orange Anaheim South Water Recycling Project to be located in Anaheim, & consists of 3 main components: 1) a metering connection near 2400 E. Orangewood Ave. to capture recycled water from Orange County Water District's Groundwater Replenishment System; 2) recycled water pump station with approx. 50,000 gallon tank at 2400 E. Orangewood Ave. or alternative site of 1050 E. Stanford Ct.; & 3) approx. 8 miles of recycled water distribution pipelines to be installed in the streets noted above & as shown on attached map. All work will occur with ROW or on City owned property. Project lies within the Platinum Triangle & Anaheim Resort Areas. Project will deliver recycled water for landscaping & chillers & will replace 1,775 acre ft per year.	<b>NOD</b>

2016088199	Quartz/Stent Waer Main Extension Project Tuolumne Utilities District --Tuolumne Emergency water main extension project to deliver potable water to over thirty residences in the Quartz and Stent areas of Jamestown, California that are experiencing well failures due to the drought.	<b>NOE</b>	
2016088200	Antelope Dam Downstream Slope Paths Water Resources, Department of --Plumas To build pathways on the downstream slope of the main and auxiliary embankments at Antelope Dam. Installation of these pathways will make it easier and safer for DWR employees to traverse the downstream slopes of the dam when obtaining measurements from the piezometers and observation wells.	<b>NOE</b>	
2016088201	Storage & Exchange Program between AVEK Water Agency & Metropolitan Water District Antelope Valley-East Kern Water Agency --Kern, Los Angeles To improve water reliability, AVEK will store at least 30,000 AF of MWDSC SWP supplies within Agency's groundwater banking locations in the Antelope Valley. With program exchange, AVEK will provide at least 30,000 AF of its SWP supplies to MWDSC in an uneven exchange. The duration of the program is 10 years.	<b>NOE</b>	
2016088202	Disposal of 38th and J Street Substation Property Sacramento Municipal Utility District Sacramento--Sacramento SMUD owns a parcel of land located at 38th and J Streets within the City of Sacramento and intends to dispose of the property by means of sale to the public. SMUD Real Estate has contacted adjacent property owners to determine interest in purchasing the property. The site was originally used as a neighborhood substation. The substation has since been demolished and all impacted soils removed and remediated. The site is currently vacant with no structures. A fence surrounds the previous substation footprint. SMUD is seeking to dispose of the property within the September to October 2016 timeframe.	<b>NOE</b>	
2016088203	Nugget Market Elk Grove Electric Vehicle Fast Charging Project Sacramento Municipal Utility District Elk Grove--Sacramento SMUD proposes to construct and operate an Electrical Vehicle Charging Station located in the parking lot of the Nugget Market. Vehicles will access the charging station from Elk Grove Blvd, Backer Ranch Road and Bruceville Road.	<b>NOE</b>	
2016088204	Transmission Pole Recoating Pilot Project Sacramento Municipal Utility District Sacramento--Sacramento SMUD proposes to test the removal of the coating material from three 230 kilovolt transmission poles with 69kV underbuilt. The poles were originally installed in late 1970s and the paint to be removed contains lead. The proposed action is not undertaken to address the potential release of lead paint, but rather to perform a traditional form of maintenance and prevent further corrosion of the existing poles. The effects of the lead paint removal and pole repainting on the environment have been evaluated indicating the project would comply with air quality and worker exposure regulations and would have no significant adverse effects on any other resources, as described below. No impacts are expected to occur to agricultural	<b>NOE</b>

2016082036	<p>Rezone Application No. PLN2016-0066 - Bronco Wine Company Stanislaus County Ceres--Stanislaus</p> <p>Request to rezone the entire 117.9+/- acre parcel to a new Planned Development, to expand an existing wine manufacturing facility. The project includes 14 proposed buildings totaling 1,462,186 sf, which includes warehousing, office and administrative buildings, and an employee center. The expansion also includes railroad access to UPRR by constructing two rail spurs, which will minimize traffic in surrounding areas. All access to the project site will occur along Bystrum Rd, and no new access will be created along E. Keyes Rd. Phase one of development will occur within five years of project approval, while future phases will be built upon market demands.</p>	<b>CON</b>	09/02/2016
2016081045	<p>Schmitz Minor Use Permit San Luis Obispo County --San Luis Obispo Note: Review Per Lead</p> <p>A request by David Friedberg for a minor use permit to allow for the construction of a 9,100 sf general retail store and related site infrastructure, including associated parking, landscaping, lighting, and storm drainage. Construction of the project will necessitate demolition of one unoccupied single family dwelling currently located on site. The project will result in the disturbance of approximately 34,560 sf on a 0.79 acre parcel. The proposed project is within the commercial retail land use category and is located at 972 K St, on the northeast corner of the intersection at 9th St, within the community of San Miguel. The site is within the Salinas River sub-area of the North County planning area.</p>	<b>MND</b>	09/23/2016
2016081046	<p>ENV-2016-1854 Los Angeles, City of --Los Angeles</p> <p>The applicant is seeking coastal development permit authorizing the demolition of an existing approximately 1,577 sf one story single family dwelling and the construction of a new approximately 2,922 sf, two story single family dwelling on an approximately 8,486 sf lot in the R1-1 zone. Two on-site parking spaces would be provided in an existing detached garage. The existing garage, accessory structure, and swimming pool would all remain. No existing trees, protects or non-protected, would be removed. Eight cubic yards of earth material would be exported from the project site.</p>	<b>MND</b>	09/13/2016
2016082037	<p>Ione Small Hydroelectric Project Amador County Water Agency Ione--Amador</p> <p>The project would add a new 448 kW hydroelectric facility to existing facilities at the Amador Water Agency Ione Reservoir. An in-conduit turbine generator and 432 sf powerhouse would be built at the Reservoir and a short, distribution level voltage power line would be installed below grade to interconnect with an existing 3-phase power line approx. 1/3 mile away. No changes in total water use would result from the proposed project.</p>	<b>MND</b>	09/13/2016

2016082039	<p>Land Division LDA 2016-123 Wyrinda Harper Applicant Mariposa County --Mariposa</p> <p>The project proposes to divide a 31.23+/- acre parcel into three parcels; 8.68 +/- acres, 16.27+/- acres, and 6.28 +/- acres. The proposed parcel A is improved with an on-site leach field, a water tank and one out building. This parcel is accessed by an unnamed 60' wide non-exclusive public utility &amp; access easement offered for dedication per parcel map book 17, page 4 located at the northern most end of the parcel. Parcel B is improved with 2 storage buildings, 2 wells, pump house, shop, animal shed, dwelling, pool, 2 carpools, game room, leach field, water tank pads, foot bridge and paved driveway. A paved/concrete driveway accesses off of Oak Grove Rd, a county maintained road. Parcel C is improved with a carport and dirt pad and will be accessed by a new encroachment off of Oak Grove Rd. The property is located at 4110 Oak Grove Rd, approximately 4.5 miles from the intersection of Indian Peak and Hwy 49N, approximately 9.8 miles southeast of the town of Mariposa. 2015031026	<p>Sierra Lakes Commerce Center Project Fontana, City of Fontana--San Bernardino Zone Change No. 14-012 was adopted via Ordinance (Ordinance No. 1746) by the Fontana City Council on July 26, 2016 and the second reading of the Ordinance No. 1746 was held on August 9, 2016 and the associated entitlement applications for Sierra Lakes Commerce Center project which included Tentative Parcel Map No. 19693 (TPM 14-014), Conditional Use Permit No. 14-034, and Design Review Project No. 14-024 went into full effect on August 9, 2016.</p> <p>Zone change No. 14-012 provided a Warehousing Distribution/Logistics Overlay District on two (2) of the five parcels. The two (2) parcels are labeled APN NO. 1119-221-19 and 1119-221-41. The total acreage of two parcels is 4.81 acres. These parcels were not part of the parcels that were included in the Ordinance that established the Warehousing Distribution/Logistics Overlay District. The remaining 3 parcels -1119-241-19, 1119-221-02, 1119-221-44, for the project are already subject to the Warehousing/Distribution/Logistics Overlay District. Zone Change provides consistency between the General Plan land use and Zoning, and therefore allows the two(2) parcels to be developed for high cube warehousing and distribution facility.</p> <p>Tentative Parcel Map No. 19693 to combine five contiguous parcels that are under common ownership into (1) for the proposed development of high cube warehouse and distribution facility. CUP No. 14-034 to permit the construction of a warehouse and distribution facility and to establish conditions of approval and parameters for the development and operations of the project; and Design Review No. 14-024 to approve the site improvements including parking and circulation, conceptual landscaping, and building architecture for the project.</p>	<b>NOD</b>	
2015042036	<p>French Bar Road at South Fork Jackson Creek Bridge (26C0035) Replacement Project Jackson, City of Jackson--Amador CDFW has executed Streambed Alteration Agreement No. 1600-2016-0117-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, City of Jackson (the Permittee) as represented by Gary Ghio.</p> <p>The project consists of removing and replacing the French Bar Road Bridge. The existing French Bar Road Bridge is a 15-foot 8 inch wide and 32ft-2.5 inch long single span cast-in-place reinforced concrete deck on steel stringers supported on concrete abutments. The City intends to replace the existing structure with a 40-ft. long cast-in-place single span structure that will accommodate two approx. 10-foot traffic lanes, two 3-ft shoulders, a 6-ft wide sidewalk on the south side of the bridge, and a 2-ft wide standard metal bridge railing barriers on both sides of the bridge. The new bridge abutments will be realigned to provide improved hydraulic capacity through the project area. The replacement bridge will be designed to comply with the Hydraulic Design Criteria established in the Caltrans Local Procedures Manual. Road approaches will conform to the existing roadway.</p> <p>Sediment and debris will be removed to improve creek hydraulics. A debris and sediment terrace has formed west of the bridge due to the existing bridge geometry. The debris and sediment terrace will be removed and the creek will be restored to its approx. original geometry, decreasing potential scour and sediment releases. Rock Slop Protection (RSP) will be placed on a portion of the</p>	<b>NOD</b>

2016062073	PA-1600084 (SU) San Joaquin County Stockton--San Joaquin A Major Subdivision Application No. PA-1600084 (SU) of Royal Funding Management LP (c/o Dillon & Murphy) to subdivide an existing 38-acre parcel into eighteen (18) parcels, each to contain at least two acres. The project is located within the unincorporated urban community of Morada. The Property is zoned R-R (Rural Residential) and the General Plan designation is R/R (Rural Residential). The project site is located on the south side of Ashley Lane, 1,243 west of Hildreth Lane, Stockton.	<b>NOD</b>	
2016089010	Yellow Creek Bridge, Replacement Project (Lake or Streambed Alteration Agreement No. 1600-2015-0218-R2) Caltrans #6 --Plumas Note: Reference SCH # 2013128281  The proposed project will involve removal of the existing Yellow Creek Bridge and construction fo a new bridge on the same alignment. The new bridge will include a single span, cast in place (CIP) pre-stressed (PS) concrete box girder structure. The following components are included as part of the project: A single 204.5-ft long single span (CIP/PS box girder structure with a total of five girders; two 12 ft. wide lanes, an 8 feet wide left shoulder and a 12.5 feet wide right shoulder for a total bridge width of 48 feet; pile foundations using 24-inch diameter cast-in-drilled hole (CIDH) concrete piles with permanent casing placed for new foundations; seat Type bridge abutments, using 2 feet diameter CIDH piles; two Type 1 retaining walls constructed on both ends of the bridge parallel to the Feather River, and excavated to an approx. depth of 10 feet supported on 24-in. diameter CIDH piles with permanent casing; one retaining wall with the length of approx. 152 feet and height of 10 feet, the other with a length of 80 feet and a height of 14 feet; Rock slope protection (RSP) will be placed along the banks of Yellow Creek in front of the retaining walls and the retaining walls that parallel the North Fork Feather River (NFFR). The RSP will be approx. 6.5 feet thick. The toe of the RSP bank will be "keyed-in" approx. 10 feet deep. Placement of RSP will require excavation, and excavation may require driven sheet piles to be use as cofferdams; Clear water diversion to key the bottom of RSP into the streambed along the banks of Yellow Creek and the Feather River. Diverting the flow of creek and river may require driven sheet piles to be used as cofferdams; Temporary work trestles will be installed in Yellow Creek or equipment access into the channel and work above the high water outflows of Belden Power House. Temporary falsework will be installed in Yellow Creek to support the new bridge structure while it is being constructed. The temporary trestles and falsework may be required to be left in the creek over winter, replacement of existing culverts west of the new bridge require trenching up to depth of 10 feet. The existing culvert will be replaced with a 24-inch culvert; removal of the existing bridge will include the demolishing of the existing deck, girders, and the removal of bridge	<b>NOD</b>
