STATE CLEARINGHOUSE

---

**SUMMARY  
OF  
POSTINGS**

**August 16 – 31, 2014**

# STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **August 16 – 31, 2014**.

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov](http://www.opr.ca.gov)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Director

## CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

### USPS:

State Clearinghouse  
P.O. Box 3044  
Sacramento, CA 95812-3044

OR

### USPS/Courier Service / Hand Deliveries:

State Clearinghouse  
1400 Tenth Street, Room 113  
Sacramento, CA 95814

## INFORMATION AVAILABLE ON-LINE

The CEQA Statute and Guidelines are available through the Natural Resources Agency's website at:

<http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

## Environmental Document Filings with the State Clearinghouse 1999-2013

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at <http://www.ceqanet.ca.gov>

<b><u>Documents Received on Monday, August 18, 2014</u></b>			
2014081053	Legacy International Center San Diego, City of --San Diego Construct a mixed-use development with religious, lodging, administrative, recreational, and commercial uses. The project is located south of I-8 at 875 Hotel Circle South and consists of two parcels: APN 444-060-10 and 444-060-11 totaling approximately 18.1 acres. Commercial, lodging, and religious uses include an 105,104 sf pavilion (with training center, theater, TV studio and storage), a three-level 17,012 sf welcoming center rotunda, a 29,940 sf interfaith pavilion that has an entrance to the catacombs, 5,992 sf of underground catacombs passage and welcoming center to outreach pavilion passages and adjoining display rooms, an approximately 8,200 sf outdoor retail bazaar, and a 5-story 136,160 sf "tri-wing" tower containing 127 timeshare suites. Recreational components would include a trail system, a 300-seat outdoor amphitheater, pedestrian plazas, and a wellness center with a workout room, sauna, Jacuzzis, steam room, restrooms, showers, and an Olympic sized 7-lane pool. Executive offices would be housed in a three-story, 23,028 sf administration building including a subterranean basement with private parking spaces. There would be a total of 878 parking stalls, including 195 surface parking spaces and 683 spaces that would be either subterranean, or housed within the 5-story 75,152 sf "West Parking Structure".	<b>EIR</b>	10/01/2014
2013012073	Tract 8053 Residential Subdivision Alameda County --Alameda Addendum of previous project circulated Jan 29- March 1, 2013. Subdivision of the subject property into 18 separate residential lots, with one remainder lot held in common ownership to provide hydro-modification and other services. Reclassification of tract to a PD allowing R-1-BE-CSU-RV uses, reduced dimensions for specific side yards, and allowances for 28.5 foot building heights where a 25 foot height is normally allowed.	<b>MND</b>	09/16/2014
2014052046	Penryn Boat & RV Storage (PMPB 20130049) Placer County --Placer The project proposes a Minor Use permit and Design Site Review Agreement to allow for the construction and operation of an approximately 1.1-acre boat and recreational vehicle storage yard.	<b>MND</b>	09/16/2014
2014081049	Dunkin' Donuts Restaurant - Case No. 2014-51 Westminster, City of Westminster--Orange The proposed project involves the demolition of the existing 76 Gasoline Service Station, automotive repair facility, and food mart. A one-story, 2,251 sf Dunkin' Donuts Restaurant with an outdoor seating area and a drive-thru lane would be constructed in its place. The development would require a Conditional Use Permit in order to permit the business to operate prior to 6:00 am within 150 feet of residential uses. The proposed hours of operation are Monday through Sunday from 5:00 am to 11:00 pm. The proposed restaurant would include a 12-foot drive-thru lane that begins in the driveway entrance along Goldenwest Street and wraps around the three sides of the building, existing along the eastern portion of the building. The proposed project would consolidate the existing two driveway	<b>MND</b>	09/16/2014

	entrances on Goldenwest Street and McFadden Avenue into one driveway access on each roadway. The proposed parking would consist of 25 spaces including 23 standard spaces and two handicapped spaces. The project site is not listed on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5.		
2014081050	3rd and 5th Streets Improvement Project Inland Valley Development Agency San Bernardino--San Bernardino The proposed project consists of improvements to existing roads and drainage facilities which are located within a completely urbanized. Development in the project area includes residential, commercial and other urban development and the former Base, now the San Bernardino International Airport. No undeveloped or undisturbed land exists within the project footprint. No native or natural habitat which could support sensitive species exists within the project footprint. In cooperation with proposing to improve portions of Third and Fifth streets; Tippecanoe, Sterling and Victoria Avenues; and Del Rosa Drive. These roads not only provide direct access to the SBIA, but are major transportation corridors for the cities including access to the 210 Freeway. The roadway improvements proposed consists of improving existing roads by providing travel lanes and other improvements that are consistent with the designations of these roads in the applicable General Plans for each jurisdiction. This includes new construction, reconstruction, upgrading, and renovating the existing streets and the utilities infrastructure within the existing right-of-ways of the affected roads.	<b>MND</b>	09/16/2014
2014081051	Conditional Use Permit 2013-03 / Southern California Edison Service Center Inyo County Bishop--Inyo The applicant is proposing to build a full service operations center, on an approximate 7-acre site with an 82-acre property.	<b>MND</b>	09/16/2014
2014081054	SUB2013-00054/CO14-0021; Parcel Map / Development Plan / Coastal Development Permit San Luis Obispo County --San Luis Obispo A request by Damien and Katheryne Mavis and Patrick Arnold for a Tentative Parcel Map / Development Plan / and Coastal Development Permit to allow for 1) the subdivision of an existing 6,000 sf parcel into two 3,000 sf residential parcels, 2) construction of two single family residential units of 1,983 sf and 1,917 sf on the proposed residential parcels, and 3) use of the residences as two separate vacation rentals. The residences will be 25 feet in height above natural grade and will each have attached garages. The project will result in the disturbance of the entire parcel through development, landscaping and associated improvements. The project is located on the south side of Avila Beach Drive on Colony Lane, within the community of Avila Beach, in the San Luis Bay Coastal planning area.	<b>MND</b>	09/16/2014
2014082050	Canyon Estates General Plan Amendment, Pre-Zoning and Annexation American Canyon, City of American Canyon--Napa The project applicant, Edward Biggs, is proposing a series of land use entitlements, approval of which would facilitate the development of up to 38 new homes on western 38.2 acres of the project site which falls within the City's Urban Limit Line (ULL). The site would be divided into 38 lots, minimum 20,000 sf in size, which would accommodate one to two-story custom or semi-custom homes	<b>MND</b>	09/16/2014

	up to between 4,000 and 6,000 sf in size. Other major components of the project would include development of a water quality basin, a new internal roadway system, a private trail that connects with a nearby water tank access road, and the installation of utility connections for each proposed lot. Of the remaining 70.49 acres of the project site, outside from the City ULL, at least 67.5 would be placed in a permanent conservation easement.		
2014051029	Cimarron Ridge Specific Plan No. 2013-247, Tentative Parcel Map 36657, Tentative Tract Map 36658, General Plan Amendment No. 2014-016, Zone Change No. 2014-017 Menifee, City of Menifee--Riverside The proposed Project includes adoption, construction and implementation of the Cimarron Ridge Specific Plan which comprises a land use plan, designation of planning areas, circulation network, open space and recreation standards, development standards and maintenance requirements. The Specific Plan also sets forth guidelines for landscape and architectural design, infrastructure plans, phasing of development and administrative procedures.	<b>NOP</b>	09/16/2014
2014081052	Pebble Beach Company Inclusionary Housing Project Monterey County Pacific Grove--Monterey Proposed construction of 24 affordable housing units ranging in size from approximately 1,080 sf to 1,350 sf (dispersed within 4 separate buildings of approximately 7,000 sf each - 6 units per building), an approximately 500 sf management office, carports, and approximately 38,700 sf of impervious surface coverage (driveway access, parking, walkways, and patios). The proposal also includes the removal of approximately 583 oak and 133 Monterey pine trees, and associated grading of approximately 6,100 cubic yards (cut and fill).	<b>NOP</b>	09/16/2014
2013031022	Corona Regional Medical Center Expansion Corona, City of Corona--Riverside Notes: Response to Comment.  Universal Health Services is proposing the expansion and renovation of the 47-year-old Corona Regional Medical Center (CRMC or the Hospital). The Hospital sits on more than 9 acres of UHS owned property located at 800 S. Main Street within the City of Corona, CA. The project is in response to community need and entails the phased construction and long-term operation of an expanded CRMC which will provide a total of thirty emergency rooms and 241 hospital beds for acute care, 50 licensed non-acute patient beds at full project build out by 2035, and approximately 490,000 total sf of medical-related uses for the expanded Hospital and new adjacent Medical Office Building. The project would involve a multi-phased expansion of the CRMC, thereby implementing UHS Inc. goals and growth strategies for full build-out of the CRMC by 2035. In addition, the partnership between CRMC and a local medical clinic group (to be determined at a later time) will serve to improve the delivery of health care to the greater Corona valley.	<b>Oth</b>

2013061027	Santa Ana Harbor Boulevard Mixed Ust Transit Corridor Plan Santa Ana, City of Santa Ana--Orange Notes: Response to Comments.  The Harbor Boulevard Mixed Use Transit Corridor Plan would replace the existing 425-acre North Harbor Specific Plan (NHSP) to change the boundaries into two separate areas: 1) 305 acres within the existing 425-acre NHSP generally along Harbor Boulevard (or "Harbor Corridor Plan"), and 2) 120 acres within the existing NHSP in the Willowick Golf Course area (or "Conventional Zoning Area"). The Harbor Corridor Plan regulates 252 acres of the project through four zones: Transit Node, Corridor, Neighborhood Transitional, and Open Space. Buildout of the Harbor Corridor Plan would generate 3,884 additional dwelling units and 13,721 additional sf of commercial space. Buildout projections for NHSP areas proposed for conversion to conventional zoning assume no change in numbers of dwelling units or population.	<b>Oth</b>	
1991053014	DOUGHERTY VALLEY GPA AND SPECIFIC PLAN Contra Costa County DANVILLE--CONTRA COSTA The Project is limited to the construction of two vehicular bridges and one pedestrian bridge within the Gale Ranch Development. The two vehicular bridges; W6 & W7 will be clear-span bridges over tributaries of West Branch Alamo Creek. Abutments will be installed forty feet above the top of bank and approximately 5,000 square feet of rip-rap will be installed on bridge W6 and approximately 6,000 square feet or rip-rap will be installed within the riparian zone but not within the active channel, the bridge will be pre-fabricated and dropped into place on bents via crane. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2013-0380-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Applicant/Organization.	<b>NOD</b>	
1991105212	Lodestar Resoret and Country Club Mammoth Lakes, City of MAMMOTH LAKES--MONO The Tentative Tract Map is for a new single-family, 12 lot subdivision in Development Area 2 of the Lodestar Master Plan. Transient use of the single-family residences is also proposed, which requires a Use Permit under the Master Plan.	<b>NOD</b>	
1996013003	Windemere Contra Costa County The Project is limited to the construction of two vehicular bridges and one pedestrian bridge within the Gale Ranch Development. The two vehicular bridges; W6 & W7 will be clear-span bridges over tributaries of West Branch Alamo Creek. Abutments will be installed forty feet above the top of bank and approximately 5,000 square feet of rip-rap will be installed on bridge W6 and approximately 6,000 square feet or rip-rap will be installed on bridge W7. The pedestrian bridge to be installed will cross Alamo Creek, one set of piers shall be installed within the riparian zone but not within the active channel, the bridge will be pre-fabricated and dropped into place on bents via crane. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2013-0380-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Applicant/Organization.	<b>NOD</b>

2007042022	San Ramon City Center Project San Ramon, City of San Ramon--Contra Costa Amendment #6 to a portion of the Chevron Park Development Agreement Assigned to and Assumed by Sunset Building Co, LLC, and Amendment #8 to the Bishop Ranch Development Agreement to implement the terms of the City Center Memorandum of Understanding dated October 8, 2013 and are generally described as follows: (1) Construct a new approximately 45,000 sq. ft. City Hall in an amount not to exceed \$14,835,000, subject to cost of living escalator; (2) Modify the CCMU Zoning to allow general office and medical uses; (3) Retire the outstanding loan balance; and (4) Remove approximately 50,000 square feet of office flex space from the Plaza District.	<b>NOD</b>	
2007102040	Mather Airport Master Plan Sacramento County Rancho Cordova--Sacramento Note: Retracted - Per Lead Agency  The proposed project is the Mather Airport (MHR) Master Plan. The Master Plan establishes a program for modifications of existing facilities and development of new facilities and MHR through the year 2035. The Master Plan provides flexible recommendations for facilities and phasing of projects that will accommodate users and tenants. Recognizing uncertainties associated with long-range aviation demand forecasts, two planning activity levels (PALs) were identified to represent future levels of activity at which key airside and landside improvements would be triggered. For the Master Plan, PAL 1 corresponds to near-term (2018) activity and PAL 2 corresponds to long-term (2035) activity forecast. The purpose of the Revised Mather Airport Master Plan is to guide airport development over a 20-year period. The entire Revised Mather Airport Master Plan can be viewed at: <a href="http://www.sacramento.aero/scas/about/planning_design/">http://www.sacramento.aero/scas/about/planning_design/</a>	<b>NOD</b>	
2009052008	Rohnert Park Walmart Expansion Project Rohnert Park, City of Rohnert Park--Sonoma The project proposes to expand the existing 131,532 square foot Walmart store by a maximum of 40,260 square feet. The expanded store would retail general merchandise and groceries and would operate 24 hours a day, 7 days per week.	<b>NOD</b>	
2011071049	EIR MDH 08-11; Rising Tree Wind Energy Project by Rising Tree Wind Farm LLC Kern County Mojave--Kern This proposed Project involves the development of a wind energy production facility on an approximately 1,600 acre site. Project activities would occur on a smaller area within the 1,600-acre site and would include clearing, grubbing, and grading for roads, a laydown area, wind turbine pads, a substation, meteorological towers, and underground and overhead transmission and collection lines.  The Project will result in impacts to 163 acres of desert tortoise ( <i>Gopherus agassizii</i> ) and Mohave ground squirrel ( <i>Spermophilus mohavensis</i> ) habitat, and 7.64 acres of Bakersfield cactus ( <i>Opuntia basilaris</i> var. <i>treleasei</i> ) habitat including temporary impacts to 91 acres; the Project will permanently remove 72 acres of desert tortoise and Mohave ground squirrel habitat, and 7.64 acres of Bakersfield cactus habitat. The Project is expected to result in incidental take of desert tortoise and Mohave ground squirrel, which are designated as threatened species, and	<b>NOD</b>

	<p>Bakersfield cactus, which is designated as an endangered species, under the California Endangered Species Act (CESA). The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation. Minor Amendment No. 1 adjusts portions of the construction envelope to allow avoidance of unanticipated archaeological resources. The extent of habitat disturbance and other effects to desert tortoise, Mohave ground squirrel, and Bakersfield cactus are unchanged by Minor Amendment No. 1.</p>		
2012062003	<p>Laguna Flood Control Improvement Project Burlingame, City of Burlingame--San Mateo</p> <p>The Project includes installation of a tidal flapgate and a box culvert with a concrete headwall on Sanchez Creek and placement of 120 square feet of rock rip rap and excavation of accumulated sediment and overgrown vegetation from a storm water drainage ditch which flows into Sanchez Creek, in the city of Burlingame, San Mateo County. The Project will alleviate flooding and facilitate storm water discharge into Sanchez Creek from the surrounding developed areas. The 5-foot by 10-foot box culvert will be installed under Carolan Avenue parallel to and north of the Caltrain tracks and will be installed via open cut trenching construction. Approximately 500 cubic yards of sediment will be removed from the drainage ditch and will be off-hauled and disposed of an appropriately licensed facility. Installation of the tidal flapgate will occur in a culverted portion of Sanchez Creek near Rollins Road. CDFW is executing a Lake and Streambed Alteration Agreement. Number 1600-2012-0179-R3, pursuant to Section 1602 of the Fish and Game Code to the project Permittee, City of Burlingame.</p>	<b>NOD</b>

<b><u>Documents Received on Monday, August 18, 2014</u></b>			
2014061061	King Basin Project Kaweah Delta Water Conservation District Exeter--Tulare The Project would consist of the construction, operation and maintenance of a water management basin for the purposes of flood control and groundwater recharge. The basin will be excavated below natural grade with the material being temporarily stockpiled on-site and then transported off-site in response to local demands for the export. A Repogle Flume will be constructed within Johnson Slough at the downstream boundary of the basin to retain, attenuate and measure flows within the channel.	<b>NOD</b>	
2014062041	Eureka Hill Road - Garcia River Bridge Seismic Retrofit Project Mendocino County Point Arena--Mendocino The proposed project includes seismic retrofits of the Eureka Hill Road Bridge (No. 10C-0034) over the Garcia River in Mendocino County. The proposed improvements would strengthen the structural components to resist seismic loads on the structure & loads imposed by the soil movement. Support is provided at the ends of the superstructure near the abutments. The retrofit work would involve the following activities within or adjacent to the Garcia River: 1) constructing a temporary clear water crossing (temporary work pad) beneath the bridge with temporary culverts to maintain flow & fish passage through the site as well as providing construction access to piers; 2) excavating, driving piles, and constructing top mats to reinforce the bent foundations around piers 2, 3, and 4; and 3) revegetating temporarily disturbed riparian areas. Retrofitting of the bridge abutments (i.e., excavating, constructing two 72-inch Cast-In-Drilled-Hole (CIDH) piles at each bridge abutments, and constructing concrete girders between the CIDH pile groups and bumpers to the superstructure soffit would occur outside of the channel.  In order to complete the needed seismic retrofit work, it is likely that the Eureka Hill Road Bridge would be limited to one lane traffic control through the project site for some construction activities, including drilling CIDH piles. Limited east-west connections exist between State Routes 1 and 128, and closing Eureka Hill Road and detouring traffic would result in a 125-mile detour around the project site. Two areas (one on each side of the Garcia River) north of the bridge are available for potential construction staging areas. All in-channel work would occur between June 15 and October 15.	<b>NOD</b>	
2014062056	Round Valley Airport Improvements & Safety Enhancements Mendocino County Covelo--Mendocino This project consists of the following activities: -Relocation of a portion of South Airport Road (CR 337B) around the runway safety area at the western end of Runway 10-28, -Addition of partial perimeter fencing and gates adjacent to the roadway.	<b>NOD</b>	
2014072003	Calpella Community Safe Routes to School Project Mendocino County --Mendocino MDOT, with grant sponsorship from State Safe Routes to School (SR2S) Program, proposes to construct sidewalks, curb and gutter and install bike lanes in the Calpella community. The main goal of the project is to create a safe and attractive pedestrian environment. Formal curb and gutter will occur at the southwest corner	<b>NOD</b>

	of the intersection of North State and Moore Streets. Swales will be utilized on North State Street, where feasible, for storm water retention and filtration prior to entering the drainage system and flowing to the Russian River.		
	Sidewalks will connect residents in the area to the school, businesses, and services. A 5-foot, Class II bike lane will be constructed along the west side of North State Street. Moore Street will have a Class II bike lane on the south side of the street from State Street to 3rd Street and a Class I bike lane the rest of the way to Calpella Elementary School.		
2014089013	Lake or Streambed Alteration Agreement No. 1600-2012-0006-R1 for Timber Harvesting Plan (THP) 1-12-005 MEN Forestry and Fire Protection, Department of Covelo--Mendocino The Department of Fish and Wildlife (CDFW) is issuing an agreement to replace one Class IIL culvert.	<b>NOD</b>	
2014088169	SJ 5 Median Barrier Caltrans #6 Stockton--San Joaquin The project would install double thrie beam barrier in the median of Interstate 5. A new count station will also be place in the median that will include adding loops to the existing pavement, a new pull box in the median and approximately 150 feet of trenching to connect the loop wires to an existng cabinet.	<b>NOE</b>	
2014088170	Norht Tahoe Public Utility District (NTPUD) Base Administration Facilities Replacement Placer County --Placer The project proposes replacement of three existing buildings with one two-story public service building totaling approximately 11,560 square feet of substantially the same size, purpose and capacity that serves the existing utility facilities, and converting existing overhead utilitieis to underground in order to reconnect utility distribution lines. The existing buildings to be removed do not comply with current Americans with Disabilities Act, building codes, and seismic codes.	<b>NOE</b>	
2014088171	Coronado Cays Channel Berm Maintenance Project Regional Water Quality Control Board, Region 9 (San Diego), San Diego Coronado--San Diego The San Diego Regional Water Quality Control Board is issuing a Clean Water Act Section 401 water quality certification (Cert. No. R9-2014-0025) to the project applicant, City of Coronado. The applicant proposed to perform maintenance of existing headwalls through the placement of 150 cubic yards of clean course sand fill with minimal fines along 171 linear feet of headwall at five locations within the Coronado Cays. The purpose of the fill is to restore the buttress berm profile that supports the headwall and prevent structural failure of the headwall.	<b>NOE</b>	
2014088172	Riverview Park Non-Motorized Launch Fish & Wildlife #3 Pittsburg--Contra Costa The purpose of the project is to provide a launch ramp for non-motorized watercraft. The project is limited to two key elements: 1) placement of an entrenched, prefabricated concrete abutment on the breakwater acting as an anchor for the launch ramp, and 2) placement of the prefabricated concrete launch ramps from the abutment into the Sacramento River. The abutment will be	<b>NOE</b>

<b><u>Documents Received on Monday, August 18, 2014</u></b>			
2014088178	Barker Slough Pumping Plant Grading Water Resources, Department of Rio Vista--Solano DFD staff shall grade the levee intake road from Hastlings Island Road to the Pumping Plant. The material resulting from the grading will be pulled from the sides of the road back onto the road surface. This will remove the washboards (series of regular bumps with short spacing) from the road surface. The road is approximately 3,230 feet long and 30 feet wide and the area to be graded is approximately two acres.	<b>NOE</b>	
2014088179	South Bay Pumping Plant (SBPP) Vegetation Removal Water Resources, Department of Byron--Contra Costa DFD staff shall remove all vegetation and sediment from the concrete lined channel located adjacent to the SBPP and terminating in Bethany Reservoir. This channel collects drainage from the surrounding area as well as overflow from a nearby stock pond and empties directly into Bethany Reservoir. This project is proposed at the request of Division of Safety Dams. Vegetation removal is needed for inspection purposes and to prevent overgrowth which creates ponds within the channel that require removal as they obstruct water flow and prevent the channel from operating as designed. The channel must be kept clear of debris to allow for unobstructed water flow throughout the year.	<b>NOE</b>	
2014088180	California Aqueduct (CAAQ) Burn and Vegetation Removal Project Water Resources, Department of --Alameda, San Joaquin, Stanislaus DFD staff shall remove all vegetation and tumbleweeds from both sides of the primary and secondary roads along the specific portions of the CAAQ (MM 9.35-25.71/MM 26.70-32.65/MM 33.40-45.97). On the upland side of each road, removal shall extend from the v-ditch located alongside the road and up to several feet into the adjacent hillside. On the canal side of each road, removal shall include the entire 4:1 slope between the canal and the road. Material removed/burned will be left onsite. Access to the aqueduct if from multiple locations. The entire project is within DFD right of way. The project footprint includes approximately 130 acres of land and 34.88 miles of road.	<b>NOE</b>	
2014088181	Patterson Dam Valve Exercise Water Resources, Department of Livermore--Alameda The Division of Safety of Dams (DSOD) requires that valves associated with low-level outlet works be exercised on an annual basis to verify the ability to dewater the reservoir. The Patterson Dam downstream 12-inch BFV shall be exercised by fully opening and closing. The total volume of water between the U/S and D/S valves that will need to be pumped during the valve exercise is estimated as 118 cubic feet. Prior to the proposed valve exercise, DFD staff shall collect a sample of the water contained within the conduit to be dewatered and the sample result shall be approved before the exercise beings. The entire project is within DFD right of way.	<b>NOE</b>	
2014088182	Sherman Island Mowing Water Resources, Department of --Sacramento DWR owns and maintain a seismic monitoring device on Sherman Island, in Southern Sacramento, CA. All vegetation shall be mowed within the seismic site	<b>NOE</b>

	fence line. Vegetation shall be removed at a 4-6 foot swath around the outside of the fence structure. The approximate size of the area to be mowed is 1000 sq. ft. The mowed material will be left onsite to decompose.		
2014088183	North Bay Aqueduct Vault Mowing Water Resources, Department of Fairfield--Solano DFD shall remove all vegetation along the North Bay Aqueduct (NBA) at specific locations between each major cross section of pipeline. All vegetation shall be removed within a full 20 foot swath for approximately 12.5 miles along the pipeline on the left side facing downstream and a 10 foot swath around each vault. There are over 100 vaults along the NBA in this footprint. Mowing will include approximately 378 acres. Firebreak creation is needed in order to protect structures, stop fires, and provide opportunity to fight fires, if necessary.	<b>NOE</b>	
2014088184	Sherman Island Siphon/Structure Vegetation Removal Water Resources, Department of --Sacramento DWR staff shall remove all vegetation within a fifteen foot buffer from the area around each of the 13 DWR/PG&E power poles that supply power to the DWR pump/valve structures located on Sherman Island. These structure function as the power source and pumps for the thirteen siphons located around Sherman Island. Vegetation shall also be removed from the roadway to the water's edge, as needed, to allow for divers to enter water for siphon inspection. The approximate size of the area to be mowed is 20,000 sq. ft.	<b>NOE</b>	
2014088185	Newell Creek Reservoir Petition for Temporary Urgency Change State Water Resources Control Board --Santa Cruz Renewal of February 14, 2014 Temporary Urgency Change Order to reduce the release or bypass requirement in order to preserve storage in Newell Creek Reservoir, which is needed due to current drought conditions. Beneficiaries are customers reliant on water supplied by the City of Santa Cruz.	<b>NOE</b>	
2014088186	Downtown Merced, Vacant Lot Purchase University of California Merced--Merced The Property is currently an abandoned parking lot at the northeast corner of "N" Street at 18th Street. The 226'x163' rectangular lot totals 36,930 sq. ft. (0.85 acre) and occupies the southwest portion of the block that was included in the City of Merced Redevelopment Agency project known as "Merced Center."	<b>NOE</b>

2014088190	Emergency Permit for Treatment of Hazardous Waste, Janssen Research & Development, Inc. Toxic Substances Control, Department of San Diego--San Diego DTSC has issued an emergency permit to Janssen Research & Development, Inc. to treat hazardous waste by chemical stabilization. It has been determined that these items are or may be highly reactive and must be stabilized prior to being transported offsite. The chemicals are expired and are currently being stored inside a storage area at the Janssen Research & Development facility located at 3210 Merryfield Row in San Diego, CA. The treatment of these items will be carried out by Clean Harbor Environmental Services (CHES) and involves the addition of a solvent to the containers to reduce the reactive characteristic of the chemicals. The treatment is anticipated to occur on August 26, 2014 in an exclusion zone at the facility.	<b>NOE</b>	
2014088191	185 Juniper Driver Pond Installation and Vegetation Removal Fish & Wildlife #6 --Mono CDFW is executing a Streambed Alteration Agreement (Agreement) pursuant to Section 1602 (SAA # 1600-2014-0127-R6) of the fish and Game Code to the Permittee, Mr. Paul Mora, 614 13th Street, Huntington Beach, CA 92648. The 185 Juniper Driver Pond Installation and Vegetation Removal Project is limited to the removal of herbaceous vegetation and willow saplings (diameter-at-breast-height of less than one-half inch) from 30 feet of the existing creek's bank and the creation of a 2-foot-deep, 20-foot-wide and 20-foot long pond using a combination of equipment (e.g. bobcat) and hand tools. The Streambed Alteration Agreement is being issued to address impacts to vegetated streambed from equipment access and pond creation, ensure there is no impact to downstream water quality, and address impacts resulting from the removal of vegetation from the stream bank (Project). The Project will result in temporary impacts to 30 sq. ft. of vegetated CDFW jurisdictional streambed from vegetation removal, and permanent impacts to 400 sq. ft. of vegetated CDFW jurisdictional riparian habitat from pond creation. The Project also includes future maintenance and vegetation removal. No sensitive species are expected to occur in the Project area.	<b>NOE</b>	
2014088192	The Buena Vista Lagoon Annual Cattail Maintenance Fish & Wildlife #5 Oceanside, Carlsbad--San Diego The Buena Vista Lagoon annual cattail maintenance project involves the mowing of approximately eight acres of cattails within the lagoon. Vegetation will be cut at or just below water level to increase vector control effectiveness and increase water circulation. Cattails will be mowed in a crosshatching fashion through the use of a boat-mounted mower, weedcutting vessel or by using hand tools. Rhizomes will not be dug out and no soil will be disturbed or removed. All cut vegetation will be removed. Cattail removal will occur from September 1 to February 14 to avoid the avian breeding season.	<b>NOE</b>

2011102038	Denniston/San Vicente Water Supply Project Coastside County Water District --San Mateo The District proposes to implement water supply improvements along Denniston and San Vicente Creeks to enable the expanded beneficial use of local water supply. The Proposed Project would entail the installation of a permanent diversion structure and pump station on San Vicente Creek, and the replacement of 2,000 ft of existing pipeline and installation of approximately 4,100 ft of new pipeline to convey water to the existing Denniston Reservoir pump station. The capacity of the Denniston water treatment plant would be expanded to 1,500 gpm. In addition, a new booster pump station and 3,460 feet of new pipeline along Bridgeport Drive would augment water delivery into the distribution system. The Proposed Project would authorize an extension of time for Permit 15882 and an expanded sediment dredging program from the Denniston Reservoir.	<b>EIR</b>	10/02/2014
2013081087	General Plan Update Solana Beach, City of Solana Beach--San Diego The proposed project for purposes of this draft PEIR consists of portions of Phase I of the City's comprehensive General Plan update, including updates to the Land Use and Circulation Elements, along with the CAP and minor updates to the City's Zoning Ordinance.	<b>EIR</b>	10/03/2014
2014081055	Hampton Inn-North Hollywood Los Angeles, City of Los Angeles, City of--Los Angeles Demolition of existing two commercial buildings, totaling approximately 2,962 sf and the construction of a four-story 51-foot tall, 80 unit hotel with 76 parking spaces.	<b>MND</b>	09/17/2014
2014081057	IS 6859 and CUP 3471 (The Termo Company) Fresno County --Fresno Allow two exploratory petroleum oil and natural gas wells with the possibility of a production facility on a 1.00 acre portion of a 360.69 acre parcel in the AE-40 Zone District. The subject parcel is located on the west side of Westlawn Avenue, between Paige Avenue and Excelsior Avenue, approximately three miles southwest of the unincorporated community of Lanare (Sup. 	<p>feet in order for the new bridge to accommodate a 100-year storm event. Project implementation would also include up to 400 feet of roadway approach improvements on the west and east side of the bridge. The overall Rocks Road alignment is not changing; however, a slight double "S" curve would be incorporated onto the roadway approach horizontal alignment to reduce the length of the replacement bridge and provide a less sharp angle between the centerline of the road.</p>		
2014081059	<p>Aircraft Demolition Facility Project San Bernardino International Airport Authority San Bernardino--San Bernardino</p> <p>The San Bernardino International Airport Authority (SBIAA) has received an application from Unical Aviation to establish an aircraft demolition facility in the northeastern-portion of the Airport. Aircraft demolition consists of manually stripping reusable equipment and then demolishing the fuselage, tail and wings by using large crushing equipment to obtain all recyclable materials such as aluminum. Retired jet aircraft will be brought to the demolition site and stripped of all its reusable and recyclable equipment/parts and this equipment will be transported to an offsite storage location. Then, the aircraft is crushed and the residual material, primarily aluminum, is transported to an offsite recycling facility. Thus, in effect the whole aircraft is recycled for equipment reuse and new material for future use. The key component of the project site will be the demolition pad.</p>	<b>MND</b>	09/18/2014
2014081060	<p>Lost Hills Utility District New Well Site Project Lost Hills Utility District --Kern</p> <p>The project would install a new potable water well in order to meet future maximum day demand for the community of Lost Hills and to provide a water source in the event that an existing well (East Well) were to fail.</p>	<b>MND</b>	09/18/2014
2014081056	<p>San Luis Obispo County Wide Water Program San Luis Obispo County --San Luis Obispo</p> <p>A water waste prevention ordinance would prohibit certain uses of water deemed to meet the definition of water wasting. In urban areas this may include hosing down hardscapes, using a hose without a shut-off nozzle, allowing landscape irrigation systems to water beyond property lines or onto sidewalks, or failure to repair leaks. In Agricultural areas the definition of water waste might include inefficient irrigation practices, leaking pipes, and other activities defined as water wasting. The County is working with members of the agricultural community to determine what can reasonably be considered an inefficient use of water.</p>	<b>NOP</b>	09/17/2014

	Highway, Tracy) (Supervisory District 5).		
2014051064	Huasna Road Repair Project San Luis Obispo County Arroyo Grande--San Luis Obispo San Luis Obispo Co. Public Works Department proposes to re-establish Huasna Road adjacent to Tar Spring Creek by constructing rock slope protection (RSP) embankment and pavement widening. The purpose of the project is to improve safety. Storms during the winter of 2010-2011 resulted in the loss of a section of grouted rock wall that stabilizes the bank of Tar Spring Creek and the road. Staging will occur within County ROW or on private property. The project is located on Huasna Road, approximately 2000 feet east of Alisos Road approximately 2.5 miles (east) of the City of Arroyo Grande.	<b>NOD</b>	
2014052073	Waste Discharge Requirements for Timber Harvesting and Related Land Management Activities Conducted by H Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Humboldt This project consists of development of Waste Discharge Requirements (WDRs) for discharges, or threatened discharges, of wastes (e.g. earthen materials such as soil, sand, clay, and rock), organic materials (e.g. slash, sawdust, bark, nutrients, and manure), and temporary loss of shade resulting from timber harvesting and related land management activities on lands owned by HRC in Jordan Creek, a tributary stream to the lower Eel River in Humboldt County, CA. Activities covered by the WDRs include timber harvesting, road use, maintenance, construction, reconstruction, decommissioning, erosion control activities, stream restoration, and water quality monitoring.	<b>NOD</b>	
2014038226	EEWWTP Secondary Treatment Process Improvements Project Santa Barbara, City of Santa Barbara--Santa Barbara The Project involves internal non-structural improvements to existing wastewater treatment plant reactor basins and demolition and rebuild of the microfiltration (MF) ultrafiltration (UF) tertiary treatment building.	<b>NOE</b>	
2014088193	Bucks Lake UG Cable Replacement Project (SAA #1600-2014-0149-R2) Fish & Wildlife #2 Quincy--Plumas The project is limited to the replacement of an underground electric utility cable that has become exposed and poses a safety hazard. New electric conduit will be installed underground via horizontal directional drill (HDD) for approximately 680 linear feet and the existing exposed cable will be removed. The HDD entry and exit pits will be approximately 6 feet wide by 12 feet long by 6 feet deep, located approximately 25 feet from the ordinary high water mark of the eastern and western lakeshore. The conduit will be 6 inches in diameter and installed to a minimum depth of 20 feet under the lakebed.	<b>NOE</b>	
2014088194	Squaw Creek Associates Erosion Control Placer County --Placer The project proposes an erosion control that addresses the slope stabilization and erosion issues occurring along an excavated slope next to an existing ski run. No expansion of the ski run is proposed with this project.	<b>NOE</b>

2014044001	Tuolumne Wild and Scenic River Final Comprehensive Management Plan and EIS Yosemite National Park --Tuolumne FYI  Congress designated the Tuolumne River as Wild and Scenic in 1984, requiring the National Park Service (NPS) to develop a comprehensive management plan under the Wild and Scenic Rivers Act. The NPS completed an Environmental Impact Statement in February 2014, and will implement Alternative 4 as the Selected Action. Tuolumne Meadows will retain its overall rustic character with limited facilities and services, allowing for low-impact recreational activities. The visitor experience will be enhanced by rehabilitating the campground, improving traffic circulation and access to recreational opportunities, removing unsightly roadside parking, and improving the health and appearance of subalpine meadows. The plan will protect and enhance river values, establish a user capacity management program, and determine land use and associated developments.	<b>FIN</b>

2014082051	Routine Maintenance of Stream Channels and Drainage Facilities & Willow Creek Channel Restoration Folsom, City of Folsom--Sacramento The City of Folsom's Stormwater Program and drainage services are administered by the City's Public Works Department which includes engineering, regulatory compliance, and operations and maintenance of the storm drain system. The City is approximately 22 square miles and relies on approximately 23 miles of natural creeks/channels to convey stormwater and many detention/water quality basins to filter the stormwater. To continue City maintenance activities within jurisdictional components of the creek and stormwater system, the City is required to enter into a new Routine Maintenance Agreement (RMA) with CDFW that meets the current code requirements.	<b>MND</b>	09/18/2014
2014082052	Naval Properties Sycamore Road Rezoning, Parcel Map and Site Development Review Alameda County Pleasanton--Alameda Applicant proposes to rezone subject property from current "R-1-L-BE" (Single Family Residential, Limited Agricultural Uses, 5 acre MBSA) District to a "PD" District allowing "R-1-L-BE" uses, 2 acre MBSA, with a secondary unit conforming to the Policy on Secondary Units in Rural and Agricultural Areas. Applicant proposes Parcel Map to divide the subject property into two parcels of 2.23 and 2.75 acres, and residential development of both parcels with secondary units.	<b>MND</b>	09/18/2014
2014082054	Wohler Road Bridge over the Russian River Seismic Retrofit Sonoma County --Sonoma The existing Wohler Road Bridge over the Russian River will be seismically retrofitted to prevent bridge collapse during a strong earthquake. Work includes replacement of the existing bridge bearings with seismic isolation bearings, abutment and foundation retrofit, pier retrofit, expansion joint retrofit and deck replacement. Construction of the retrofit will require temporary vegetation removal and a temporary work pad in the Russian River.	<b>MND</b>	09/18/2014
2014082055	Hyatt House Hotel at Vallco Park Project Cupertino, City of Cupertino--Santa Clara The project proposes a 148-room, 5-story Hyatt House Hotel adjacent to the intersection of North Wolfe Road and I-280. Additionally, a full service 2,500 sf restaurant, 2,160 sf meeting room, and 320 sf boardroom would also be included. Parking would be provided by a surface parking lot and a one-level underground parking garage providing 156 parking spaces. In total, the project would be approximately 102,200 sf above ground and 35,400 sf underground.	<b>MND</b>	09/18/2014
2014082056	East Branch Russian Gulch Sediment Reduction Implementation Project Sonoma County --Sonoma The Objective of the Jenner Headlands Preserve Sediment Reduction Sediment Reduction Implementation Project is to address a series of road-related sedimentation delivery issues that currently contribute sediment to the Russian Gulch watershed. Recommendations from the Sonoma Resource Conservation District's 'Jenner Headlands Sediment Source Assessment Report' (July 2011) are utilized to make prescriptions for this and future restoration projects. The attached	<b>MND</b>	09/18/2014

<b><u>Documents Received on Wednesday, August 20, 2014</u></b>			
	list 9Exhibit A in CEQA) includes information from the report and identifies fifty-seven geographically specific sites, the types of structures, type and volume of material to be used, and an estimate of future sedimentation yield if the problem area was left untreated.		
2014081062	Hollywood Central Park Los Angeles, City of Los Angeles, City of--Los Angeles The Friends of Hollywood Central Park is proposing to develop and operate the Hollywood Central Park which would be an approximately 38-acre park and recreational facility constructed above the Hollywood Freeway on an engineered deck and support structure (Project). The Project would be built in the air space above the Hollywood Freeway and thereby enclose the approximately one-mile below-grade portion of the Hollywood Freeway located between Bronson Avenue and Santa Monica Boulevard. The purpose of the project is to recreate community connectivity by developing an open space resource that serves as a focal point for recreation and civic life in the community.	<b>NOP</b>	09/18/2014
2014072019	Vesting Tentative Parcel Map Application No. PLN2014-0064 - Sperry/Perry Stanislaus County Oakdale--Stanislaus Request to divide a 165 acre parcel into four 40+ acre parcels. The four parcels will remain a producing almond orchard. Each parcel will have frontage access to Warnerville Road.	<b>Neg</b>	09/18/2014
2014082053	Interim Measures Work Plan, Tesla Motors, Inc. Factory Toxic Substances Control, Department of Fremont--Alameda The IMW was submitted on August 11, 2014 by The Source Group Inc (SGI) on behalf of NUMMI. The purpose of the IMW is to prevent or minimize exposures to chemicals of concern (COCs) from known contaminated source areas in soil and groundwater and prevent migration of COCs from source areas to underlying groundwater. The interim removal action proposed for the Site consists of the following activities: excavation and off-site disposal of approximately 14,585 cubic yards ("yd3") of lead, total petroleum hydrocarbon (TPH), benzene, toluene, ethylbenzene, and xylenes (BTEX), and naphthalene contaminated soil from two areas, the Former Fuel Dispenser Island and Former Tank Farm Area (hereinafter the "Project Area"); soil will be transported off-site to approved Class I or Class II Landfills; excavation area groundwater will be removed and treated using granular activated carbon prior to discharge under permit to the Union Sanitation District ("USD"), the local Publically Owned Treatment Works "POTW"); after completion of removal activities, excavation areas will be backfilled with approximately 3,167 yd3 clean crushed rock and 20,622 yd3 clean fill soil from local sources. After backfilling, concrete and asphalt barriers will be installed to return the surface of the Project Area to its current covered condition. Groundwater monitoring wells that are within the excavation footprint will be destroyed and reinstalled after the Project Area is restored. The project activities are expected to be completed in approximately 100 days.	<b>Neg</b>	09/18/2014

1993112027	River Islands at Lathrop Lathrop, City of Lathrop--San Joaquin Development of recycled water storage and disposal sites on the Southeast Stewart Tract Property during Phases 1 and 2 of the River Islands project, which would assist in fulfilling the requirement for the acquisition of adequate offsite recycled water storage and disposal facilities anticipated to be necessary prior to development of Phase 2. This proposal accelerates the development of offsite recycled water storage and disposal facilities relative to the phasing which was not available at the time the River Islands SEIR was prepared.	<b>NOD</b>	
2005082045	Florin-Vineyard Gap Community Plan Sacramento County Sacramento--Sacramento Taylor Morrison Inc. has requested authorization under Clean Water Act Section 401 from the Central Valley Regional Water Quality Control Board for Casleman Ranch Project. The Programmatic Community Plan FEIR (2055082045) was certified by Sacramento County. The FEIR included project-specific analysis of Caselman Ranch Project. The Project is located north of Caselman Road in southern Sacramento County. The Project consists of a residential development on approximately 48-acre site.	<b>NOD</b>	
2009091040	Western Riverside County Regional Wastewater Treatment Plant Enhancement and Enlargement Project Western Riverside County Regional Wastewater Authority Corona--Riverside There are two components of the project that require funding; 1) improvement of the various wastewater treatment processes to reduce operating costs and 2) plant expansion to handle increasing wastewater influent flows due to projected regional development.  Construction that may need to occur include: Expansion and updates of the headworks facilities, installation of primary and secondary clarifiers to the treatment process, installation of additional filters to provide additional equalization basin capacity, upgrades to the dewatering system, and the addition of a separate maintenance building at the facility.	<b>NOD</b>	
2011031010	Oakmont II Tentative Map San Diego County --San Diego The applicant requests a two Unit Tentative Map and Administrative Permit to subdivide an existing 99.6 acre parcel into 20 residential lots ranging in size from 1.00 to 38.58 net acres and for lot area averaging pursuant to Section 4230 of the Zoning Ordinance. The project site is located north of Old Highway 80 and Interstate 80 and Interstate 8, and east of Flinn Springs Road in the Lakeside Community Plan Area within unincorporated San Diego County. Access would be provided by a private road off of Old Highway 80, Oak Creek Road, and private driveways off of Flinn Springs Road. Lots 2 through 11 of Unit 1 would be annexed into and served by the San Diego County Sanitation District. On-site septic systems would be provided for lots 12 through 20 of Unit 2, as well as lot 1 within Unit 1. Imported water would be provided by the Padre Dam Municipal Water District. Unit 1 would be a lot sales project. Unit 2 would be a tract build out project (except for lot #1).	<b>NOD</b>

	potable water deliveries until the creek is flowing again. Water will be hauled to the storage tank regularly to keep the tank full.		
2014088236	Drought Emergency Grant Funding Request for Chinowth Apartments State Water Resources Control Board Visalia--Tulare The State Water Resources Control Board (Board) is a lead agency for this project. The Board's Public Water System Drought Emergency Funding Program is providing state funds for the project. The proposed project consists of installing 275 feet of 1-inch water line to each of the three landlocked parcels. The waer lines will be installed from the street right of way within an easement of the property line of the 3 landlocked parcels. The 3 water meters will be located within the street right of way so that the City of Visalia staff can read and maintain the water meters. Backflow prevention devices will be installed downstream of the water meters to protect the City of Visalia water system.	<b>NOE</b>	
2014088237	Lake Forest Fire Preparedness Exercises Forestry and Fire Protection, Department of --Lassen A series of yearly Cal Fire training exercises is being proposed on portions of Sierra Pacific Industries (SPI) property in conjunction with Cal Fire. In general, the training exercises will involve Cal Fire personnel to demonstrate the safe and effective use of fire suppression tactics. Practices employed will include hand line construction utilizing chainsaws and assorted hand tools to cut vegetation and displace surface vegetation exposing some bare mineral soil. In addition, crews will also conduct a tool out exercise, which should not involve the cutting of vegetation. Not all of the area will be treated by training activities. Approximately five acres of vegetation may be treated in any one year.	<b>NOE</b>	
2014088238	Osprey Nestling Platform (14/15-SD-01) Parks and Recreation, Department of --San Diego This project will build a nesting platform for osprey (Pandion haliaetus), a diurnal fish eating bird of prey. The birds use a tall site to spot prey. The platform will be three feet square mounted horizontally on a 36 foot tall pole providing a 360 degree view. It will be located on the San Diego Bay at Silver Strand State Beach and give the birds and alternate place to perch, instead of the sailboat masts of the Crown Cove Aquatic Center, protecting public health and safety.	<b>NOE</b>	
2014088239	Silver Strand State Beach Waterline Upgrade-Phase 1 (14/15-SD-02) Parks and Recreation, Department of --San Diego This project will upgrade 900 feet of the original 2 1/2" main waterline to 6" PVC in Silver Strand State Beach. A new backflow unit and shut-off valve will be installed to support continued maintenance and use. The trenching will be 24" wide by 24" deep in the previously disturbed footprint in the sand between Parking Lot No. 3 and the park service road from the Tunnel 2 main shut-off valve to the Restroom No. 3 point of connection.	<b>NOE</b>

2014088308	Lethal Electrified Fence Netting Installation Corrections and Rehabilitation, Department of Ione--Amador Since 1992, the California Department of Corrections and Rehabilitation (CDCR) has operated Lethal Electrified Fences (LEFs) at prison facilities to prevent inmate escapes, protect the safety of the public, and reduce operational costs. CDCR operates its LEFs pursuant to the Habitat Conservation Plan (HCP) that addresses the provisions of its incidental take permits with U.S. Fish and Wildlife Service and California Department of Fish and Wildlife. As part of the mitigation measures of the HCP, CDCR is installing Wildlife Mitigation Netting, to create a barrier that covers the bottom nine wires of the LEF to substantially reduce the opportunity for wildlife to come in contact with electrical wires.	<b>NOE</b>	
2014088309	Health Care Facility Improvement Project Corrections and Rehabilitation, Department of --Lassen CDCR will implement a number of small health care facility improvements at CCC to remedy deficiencies to the areas of primary care, specialty care, pharmacy, health records, laboratory, health care administration, and Minimum Support Facilities (MSF). To accomplish the necessary improvements, CDCR will renovate the vacated vocational dry cleaning space and unused temporary classroom space in building D to provide a primary care clinic; the existing facility C primary care clinic will be renovated and expanded; a new primary care clinic will be constructed for the inmate-patients housed at MSF; and the existing Central Health Services Building will be renovated and expanded to provide specialty clinics. These facility improvements are necessary to deliver a basic level of health care to the inmate-patients at CCC.	<b>NOE</b>	
2014088310	Health Care Facility Improvement Project Corrections and Rehabilitation, Department of --Lassen CDCR will implement a number of small health care facility improvements at HDSP to remedy deficiencies to the areas of primary care, specialty care, pharmacy, laboratory, and Administrative Segregation Unit (ASU) clinic. To accomplish the necessary improvements, CDCR will renovate and expand existing facilities A, B, C, and D health clinics; a new primary care clinic will be constructed for the ASU inmate-patients to provide separate clinical treatment; and the existing Central Health Care Services Building will be reconfigured, renovated, and expanded. These facility improvements are necessary to provide specialty clinical services and consultation consistent with the delivery of a basic level of care.	<b>NOE</b>	
2014088311	Ventura Ranch Resort Restoration and Maintenance Fish & Wildlife #5 Santa Paula--Ventura CDFW is proposing to execute a Lake and Streambed Alteration Agreement No. 1600-2013-0176-R5. The Applicant proposes the restoration of areas along Santa Paula Creek and to conduct future project and routine maintenance activities. Each revegetation areas consists of an average 50 sq. ft. area where these areas will be restored by cleaning up the area, addressing potential erosion, and re-vegetation with native species. There are also a number of new projects proposed over the next several years within the property that are, for the most part, located away from the stream and consist of minor impacts to native upland vegetation. Maintenance activities include two existing public trails within the	<b>NOE</b>

	stream corridor, the dismantling of any small man-made dams within the flowing portion of the stream, routine tree and vegetation trimming in compliance with local fire department requirements and an annual trimming of trees and brush located along any trails, pathways, roads, and other associated structures.		
2014088312	Sears Ditch Liner Repair Project, SAA No. 1600-2014-0160-R2 Fish & Wildlife #2 Sacramento--Sacramento The project is limited to repair of a 550' long section of an existing concrete lined channel known as Sears Ditch. 100 cubic yards of concrete liner will be removed and replaced. One 12" diameter ash tree will be removed.	<b>NOE</b>	
2014088313	Foxwhelp Farms Bank Stabilization Fish & Wildlife #3 Healdsburg--Sonoma Project is limited to the stabilization of an approximately 140-foot long, 8-foot high, 8-foot wide section of stream bank that is currently eroding towards a structure. The project will utilize 1/2-tonsize class rock slope protection to rebuild a slope of 1.7:1 that will be planted with native tree species. A track-mounted excavator will be operated at the top of bank to excavate a footing trench and place rock. During stabilization operations at least two car bodies will be removed from the stream bank and disposed of at an appropriate facility. Dewatering may occur and two trees will be removed as part of the Project. Issuance of a Streambed Alteration Agreement No. 1600-2014-0266-3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>	
2014088314	Berm on Rodrigues Property Fish & Wildlife #3 Santa Rosa--Sonoma Project is limited to the installation of erosion control measures and riparian planting on landscaping berms located at the top of bank of a stream as well as maintenance of an existing culvert. These activities are being undertaken in order to abate a Sonoma County Code violation related to the installation of the features. After coordination with CDFW, it was determined that the berms adjacent to the stream and culvert will not be physically modified in order to reduce additional impacts to the streambed and bank. Issuance of a Streambed Alteration Agreement No. 1600-2013-0396-3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>	
2014088315	Lands of Wilt Russian River Bank Bioengineering and Revegetation Project Fish & Wildlife #3 --Sonoma The project is limited to the grading of a 2:1 stream bank slope, installing Live Willow Brush Layering and Willow Stakes on the lower to mid portion bank of the stream and completing a Riparian Revegetation Plan from the mid to upper portion of the stream bank. The project will affect approximately 110-linear foot of stream bank and require the excavation of 365-cubic yards of material in order to establish a stable 2:1 slope. Excavation will begin approximately 3.5 to 7-feet from the edge of the water and proceed backwards to establish the new slope. Shallow trenches will be excavated within the stream bank and filled with live willow cuttings. Fiber roll will then be installed over the project site. Native vegetation will then be planted along the mid to upper bank. Issuance of a Streambed Alteration Agreement No. 1600-2014-0223-3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>

2014088316	983 Fairway Drive Car Removal Fish & Wildlife #3 Sonoma--Sonoma The project is limited to the removal of an old car embedded within a stream channel using a backhoe. The depression left by removing the car body will be filled with clean local alluvial gravel. Issuance of a Streambed Alteration Agreement No. 1600-2014-0277-3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>	
2014088317	Alexander Valley Road Bridge Over Russian River Fish & Wildlife #3 Healdsburg--Sonoma The project is limited to three geotechnical exploratory borings at the Alexander Valley Road Bridge at Piers 2, 3 and 4 to support the design of a seismic retrofit of the bridge. Piers 2 and 4 are located outside the active channel and will be accessed from an existing road. Pier 3 may be located within the river and will be accessed from the existing bridge deck with a drill casing used to create a closed system that protects water quality. A rubber-track mounted drill rig will be used to access all piers and no vegetation removal is anticipated. Each approximately 4 to 6 inches in diameter bore will sample to a depth of approximately 100 feet. Approximately 30 cubic yards of soil will be removed in total. Plastic sheeting will be used in the work area to contain cuttings and any drilling mud/water. Straw wattles will be placed at ground surface surroundings the work area. Cuttings and drill fluid will be placed in drums and appropriately disposed of. Holes will be backfilled with cement grout and the upper 5 feet of the hole will be backfilled with native alluvial gravel. Issuance of a Streambed Alteration Agreement No. 1600-2014-0259-3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>	
2014088318	Bodega Highway Culvert Replacement Fish & Wildlife #3 --Sonoma The project is limited to the replacement of a failing 135-foot long by 36-inch diameter corrugated metal pipe (CMP) culvert under Bodega Highway with a corrugated plastic pipe culvert of the same length with a diameter of 48-inches.	<b>NOE</b>	
2014088319	Coalinga Zoning Ordinance Update Coalinga, City of Coalinga--Fresno The Coalinga zoning code update implements the goals, policies and implementation measure of the City's General Plan which was approved in 2009. The zoning ordinance was drafted in order to be consistent with that of the General Plan.	<b>NOE</b>	
2014088320	Freeman Diversion Routine Maintenance Fish & Wildlife #5 Oxnard--Ventura CDFW is proposing to execute a Lake and Streambed Alteration Agreement No. 1600-2013-0223-R5. The Applicant proposes to conduct maintenance activities at the Freeman Diversion facility, located on the Santa Clara River. Project activities include: Vegetation control at the Roller Compacted Concrete Dam (RCCD) along the slopes of the dam and within a 5-foot wide zone on the upstream and downstream side of the dam. In the event that clearance takes place within the maximum width (15 feet), the total disturbance area would be 30 feet (15 feet on either side of the dam) by 1,175 feet, which would result in an impact area totaling	<b>NOE</b>

<b><u>Documents Received on Thursday, August 21, 2014</u></b>			
	0.80 acres; Vegetation control along riprap and access areas consists of the removal and prevention of vegetation growth within access areas and riprap structures of the facility. Vegetation control will be conducted within a 15-foot wide zone along the toe of all rip rap structures within the facility. In the even that vegetation clearance occurs within the maximum width (15 feet from toe of riprap slopes), the total disturbance area would be 15 feet by 5,185 feet, which would result in an impact area totaling 1.79 acres. This 1.79 acre area of vegetation disturbance has been subject to this same maintenance regime for many years; establishment of a low-flow channel requires the creation, or excavation, of a low-flow channel that will connect the downstream entrance of the fish ladder to the thalweg (active channel area) of the Santa Clara River and will require bulldozing a channel to remove built up sediment. The maximum distance is estimated not to exceed 300 feet in length and the average width of this channel will be 15 feet; repair of existing structures includes the in-kind repair fo riprap bank stabilization structures and access areas; and de-watering of the settling basin. There are occasions when it is necessary to lower the water level in the basin to perform maintenance and/or repairs to associated infrastructure and to remove accumulated sediment from the basin. A gate is located in the desilting basin that allows for water to be released from the desilting into the south side of the Santa Clara River.		
2014088321	A-13 Disposal Site Caltrans #2 --Plumas Using state and federal funds, Caltrans is proposing to create a permanent disposal site for earthen material generated by routine maintenance and construction projects. The proposed project will include ground disturbance vegetation removal, which requires a removal window of Sept. 2, to February 14.	<b>NOE</b>	
2014088322	Macdoel Excess Right-of-Way Disposal Caltrans #2 --Siskiyou Caltrans proposes the sale of an excess portion of State owned property on State Route 97, at post mile 40.2, in Siskiyou County. The excess property (APN# 035-024-130) to be sold is approximately 0.4103 acres in size and consists of a paved side street.	<b>NOE</b>	
2014088323	Bogard SRRA Parking Lot Seal Caltrans #2 --Lassen This project will remove and replace parking lot striping and place an asphalt seal within the paved portions of the rest area.	<b>NOE</b>	
2014088324	Dead Horse Overlay Caltrans #2 --Siskiyou Caltrans is proposing a pavement overlay maintenance project which will include fill of 7 miles of roadway with a thin blanket overlay within the existing roadway hinge points. No vegetation removal or work in a jurisdictional waterway is required. Equipment will be staged in existing pullouts.	<b>NOE</b>

	<p>parcels through the Mount Signal Solar Farm Project to the Imperial Solar Energy Center South (ISECS) switchyard. The CUPs are anticipated to use a single Project switchyard common to all CUPs. Alternatively, each CUP may independently construct a 230 kilovolt step-up transformer and switchyard. Collector lines located within the 32 solar field site parcels (plus two parcels that are not included within the solar fields for this Project) will aggregate the electricity from all of the solar fields and convey it to the Gen-Tie line. Eight towers will be added to the Mount Signal Solar Farm Project Gen-Tie to accommodate co-location of the Project's Gen-Tie line. The Project also includes PV and/or CPV panels, inverters, transformers, Power Conversion System (PCS) enclosures, Operations and Maintenance (O&amp;M) building(s), and a type of energy storage facility that could accommodate a variety of evolving energy storage technologies within each CUP (13-0036 thru 13-0052). The Project would also include additional auxiliary facilities such as raw water/fire water storage, treated water storage, water filtration buildings and equipment, equipment control buildings, Onsite Wastewater Treatment System (OWTS) and parking. The Project will include electric line crossings and vehicular crossings of Imperial Irrigation District facilities (which may include infrastructure improvements such as a culvert widening) and County facilities.</p>		
2013102023	<p>Heritage Oaks Memorial Park, File No. PDC13-016 San Jose, City of San Jose--Santa Clara Planned Development (PD) Rezoning on approximately 275 acres to allow development of a memorial park (cemetery) on approximately 102 acres of the site. The remaining 173 acres would be maintained as protected natural open space. The proposed cemetery would include burial grounds, an administration building, maintenance facility, private roadways, parking areas, septic system, water storage lakes, and a water storage tank. No crematory is proposed. Buildout of the cemetery is expected to occur in 200 years or more. Access is proposed from McKean Road as a fully improved private driveway along an existing Santa Clara Valley Water District access road.</p>	<b>EIR</b>	10/06/2014
2013112051	<p>Heavenly Mountain Resort Epic Discovery Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe South Lake Tahoe--El Dorado Note: Review Per Lead</p>	<b>EIR</b>	10/21/2014
	<p>The Epic Discovery project is intended to enhance summer activities in response to the USDA Forest Service Ski Area Recreational Opportunity Enhancement Act of 2011. Heavenly proposes to improve year-round recreation opportunities within the developed portions of the ski area on National Forest System lands using existing facilities and infrastructure to meet the expanding needs and expectations of visitors to Lake Tahoe, better support the year-round local economy of the South Lake Tahoe area, and connect a diverse group of visitors to our national forest with recreation and educational opportunities to further inspire passion and excitement for the outdoors. The summer activities are designed to suit a wide range of visitors from the casual sightseer to the avid mountain adventurer.</p>

	parking and transportation demand management.		
2014051032	Castor Solar Project by Green Light Energy, Corp; CUP 5, Map No. 139-22 Kern County --Kern The Castor Solar Project proposes to construct and operate a 1.5 megawatt (MW) solar photovoltaic (PV) power-generating facility with 5,800 PV solar panels, on 12 acres of 20.11 acre parcel in unincorporated Kern County, California near the community of Dustin Acres. The entire project site is within the jurisdictional boundaries of the Kern County General Plan. Implementation of the project would require approval of a Conditional Use Permit (CUP) (CUP No. 5, Map 139-22). The proposed project would construct an offsite overhead or underground 12.74kV generation tie-line along Evans Ranch Road. This 0.25 mile-long line would connect the project to the PG&E approved point of interconnection utility pole on the Elk Hills 1104 12.74kV distribution line on Evans Ranch Road to a point ~0.25 mile north of the parcel on which the proposed solar facility would be constructed. The facility would consist of the following project components: (1) PV modules and support structures; (2) direct current (DC) to alternating current (AC) inverters and transformers; (3) additional electrical equipment; (4) interconnection point and equipment; and (5) security improvements including fencing.	<b>EIR</b>	10/06/2014
2014061043	Antelope Valley Areawide General Plan Update Los Angeles County --Los Angeles The proposed project is a comprehensive update of the Antelope Valley Area Plan. The project includes goals, policies, implementing programs and ordinances. The project covers the unincorporated areas of the Antelope Valley in Los Angeles County and identifies 1) Rural Preserve Areas, where important ecological and agricultural resources will be preserved; 2) Rural Town Areas, where rural character will be protected; 3) Rural Town Centers, where urban commercial uses will be discouraged but rural commercial uses will be incentivized; and 4) Economic Opportunity Areas, where plans for major infrastructure development are underway that necessitate the need for more detailed planning activities in these areas to determine any appropriate land use and zoning changes needed when these infrastructure projects are completed.	<b>EIR</b>	10/06/2014
2000014004	Merced Wild and Scenic River Comprehensive Management Plan/EIS National Park Service Yosemite Village, Wawona, El Portal--Mariposa, Madera FYI Final  Congress designated the Merced River as Wild and Scenic in 1987, requiring the National Park Service to develop a comprehensive management plan under the Wild and Scenic Rivers Act. This plan establishes the boundaries and segment classifications of the Merced Wild and Scenic River, establishes a formal process for protecting the river's free-flowing conditions, refines descriptions of the river's outstandingly remarkable values, documents the condition over river values, establishes a user-capacity program that addresses the kinds and amounts of public use that the river corridor can sustain, and defines the size and location of facilities needed to provide for public use and enjoyment of the river resource, this plan presents six alternatives with a wide range of visitation levels, desired visitor experiences, and restoration objectives.	<b>FIN</b>

2014052011	Richmond Ferry Terminal Project San Francisco Bay Area Water Emergency Transit Authority Richmond--Contra Costa Note: Revised Final FYI Final 1 HC  The proposed project includes a new ferry terminal to replace existing facilities along the southern end of the Ford Peninsula. The proposed terminal would include landings, a new gangway, passenger float, ramping system, and piles adjacent to the existing wharf. The new passenger float would be approximately 10 percent larger than the existing float, accommodating one vessel at a time for passenger loading and unloading. The vessels would be designed to offer up to 299 passenger seats, operating between Richmond and San Francisco. It is anticipated that the proposed ferry service begin as a commute-period only service, providing approximately two to three trips during each AM and PM peak period. An existing kayak launch would be demolished and relocated adjacent to the public boat launch ramp.	<b>FIN</b>	
2014082066	White Wolf Lodge Rehabilitation Yosemite National Park --Tuolumne Note: Fonsi  The White Wolf Lodge is a recreational and historical attraction for park visitors traveling along Tioga Road in Yosemite. The purposes of this rehabilitation project are to (1) provide access for visitors and staff with disabilities; (2) build new foundations for the Lodge and Duplex Cabin structures to correct deterioration and settlement, control moisture infiltration, and reduce erosion from runoff; (3) rehabilitation the historic structures' roofs, floors, walls, and foundations to a condition that can be maintained through routine cyclical maintenance; and install an accessible restroom in the Lodge parking area.	<b>FON</b>	09/22/2014
2014081068	Sigma Clay Mine Revision to Mining & Reclamation Plan (County Case No. AP20120001) San Bernardino County --San Bernardino Revision to Mining & Reclamation Plan by extending the life of the project to 2052, allow excavations up to 40 feet deep, and provide erosion control for a 40 acre clay mine.	<b>MND</b>	09/22/2014
2014081069	Southwestern College National City Higher Education Center Two-Story Facility Project Southwestern College National City--San Diego Construction of an approximately 24,780 total sf two-story facility and renovate approximately 14,000 sf of the existing two-story structure to accommodate Faculty Offices, and create an Economic Development Center at the National City Higher Education Center.	<b>MND</b>	09/22/2014
2014081070	Greenville-Banning Channel Improvements Project Orange County Costa Mesa, Orange--Orange Downstream of California Street: The project would remove and replace the existing concrete lining, and extend the lining to the tops of the banks. California	<b>MND</b>	09/22/2014

## CEQA Daily Log

Documents Received during the Period: 08/16/2014 - 08/31/2014

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Friday, August 22, 2014</u></b>			
	Street to New Hampshire Drive: The proposed project would steepen and concrete-line the channel side; partially concrete-line the channel bottom; and widen the earthen bottom by two feet. The New Hampshire Drive RCB would be replaced to improve channel capacity. The road would be closed for an estimated 8-10 weeks. Upstream of New Hampshire Drive: The project would steepen the channel sides and widen the bottom. The channel would be concrete-lined to increase its capacity.		
2014081071	Beck Reservoir UV Facility Project Rainbow Municipal Water District Fallbrook--San Diego The Rainbow Municipal Water District proposes to construct an ultra violet Disinfection and Chloramination (through chlorine and ammonia addition) Facility adjacent to Beck Reservoir. The District constructed Beck Reservoir in 1983 to provide finished water for fire suppression and emergency purposes and improve reliability for customers served by the Back Pressure Zone of the water distribution system.	<b>MND</b>	09/22/2014
2014081072	Sunset/Huntington Harbour Maintenance Dredging and Waterline Installation Project Orange County Seal Beach, Huntington Beach--Orange The County of Orange (herein County or OC Parks) and the City of Huntington Beach (herein City) are responsible for the proposed Maintenance Dredging and Waterline Installation project components. The County is responsible for maintenance dredging actions within the Sunset Aquatic Marina area and the Main Channel between the Pacific Coast Highway Bridge and Warner Avenue. As such, approval to allow dredging for navigational purposes (Maintenance Dredging) would be responsible of the County. The installation of a 14-inch-diameter waterline pipe within the Harbour (both in-water and landside) would be the responsibility of the City. The proposed landside activities associated with the Waterline Installation component of the project would involve connecting the waterline pipe to existing utility infrastructure and construction staging activities on either side of the Harbour channel. Access to the Harbour would be unchanged by the project, i.e. access would continue to be provided from Sunset Way East and Edinger Avenue to the north, Warner Avenue to the south, Saybrook Lane to the east, and the Pacific Coast Highway to the southwest.	<b>MND</b>	09/22/2014
2014081076	Morse Street Townhomes Oceanside, City of Oceanside--San Diego The proposed project involves four entitlements requests (Development Plan D13-00004, Coastal Permit RC13-00003, Conditional Use Permit CUP13-00009 and Tentative Map T13-00008) for the development of a 38-unit residential townhome community with various three and four unit configurations, at a density of 16.5 dwelling units per acre on a 2.3 acre vacant parcel. The project site is located at the northeast corner of Coast Highway and Morse Street within the South Oceanside neighborhood planning area and non-appeal jurisdiction of the Coastal Zone. The project is in compliance with applicable R-3 residential zoning standards. A tentative subdivision map is proposed for condominium purposes to create 38 airspace units. A conditional use permit is required under section 1506 of the 1986 Zoning Ordinance for multiple family residential developments of 20 units or more.	<b>MND</b>	09/22/2014

<b><u>Documents Received on Friday, August 22, 2014</u></b>			
2014081078	Fresno Recycled Water Distribution System Public Utilities Commission Fresno--Fresno Note: Tiered SCH# 2010051015  The Project would distribute up to approximately 8.1 million gallons per day (mgd) of tertiary-treated wastewater as recycled water across the southwestern quadrant of the City of Fresno. The Project includes construction and operation of approximately 22 miles of 8 to 54-inch diameter recycled water distribution lines, plus a pump station to help maintain system pressure. All pipelines would be installed within roadways or roadway right of way. The proposed pipelines would connect to the City's Regional Water Reclamation Facility, which is undergoing upgrades under a separate project. The environmental documentation for the present Recycled Water Distribution Project is tiered from the City of Fresno Recycled Water Master Plan Program EIR (SCH# 2010051015).	<b>MND</b>	09/23/2014
2014081080	DRC2014-00127 Rancho Cucamonga, City of Rancho Cucamonga--San Bernardino The proposed project is a 139,983 sf office/warehouse on a vacant parcel of 6.6 acres located south of Mission Park Drive between Richmond Place and Buffalo Avenue in the Industrial Park (IP) District - APNs: 0229-401-06, 07, 08, 09.	<b>MND</b>	09/23/2014
2014082049	Lake Camanche Water System Compliance Project IS-MND Amador County Water Agency --Amador The proposed project would install a new 12-inch diameter water distribution line and construct a 0.5 MG water storage tank at the Tank 9 site. An existing 8-inch water line between the existing Tank 9 and Wells 14 and 9 will remain in place and serve as a dedicated line to fill the new tank in order to achieve chlorine contact time and enable the Agency to provide better quality water to the consumers served by the County Service Area (CSA) #3 / Water Improvement District (WID) #7 system. The proposed water pipeline would convey water from the proposed new water storage tank at the Tank 9 Site pas Well No. 14 to connect to the existing local distribution system. The new storage tank would replace the substandard and problematic redwood water storage tank located at the Tank 9 Site that was constructed in the early 1970s.	<b>MND</b>	09/22/2014
2014082067	Industrial Wastewater Pipeline Extension Lodi, City of Lodi--San Joaquin The City of Lodi is proposing to build an approximately 11,500 foot long industrial wastewater force main within San Joaquin County existing public rights-of-way from the south east portion of the Michael / David Winery to the City of Lodi industrial wastewater line crossing in Devries Road.	<b>MND</b>	09/22/2014
2014082068	Glenn Medical Center New Hospital Building Willows, City of Willows--Glenn Glenn Medical Center, Inc proposes the development of a new 25,580 sf hospital building at the existing Glenn Medical Center campus within the City of Willows. The proposed project would replace its existing hospital facilities within the present medical center with a new building, totaling approximately 25,580 sf. Upon completion, the site would be developed with a one-story, free-standing hospital	<b>MND</b>	09/22/2014

	<p>than analyzed previously. As such, the revised brine pipeline will result in less environmental impacts and will not be addressed in the SEIR. The approved compliance project components and the general location of the alternate DWI site are shown in Figure 1. The specific location of the alternate DWI site and surrounding land uses are shown on Figure 2.</p>		
2014082070	<p>Capital Reserve Elk Grove, City of Elk Grove--Sacramento</p> <p>The proposed Project is requesting the following entitlements: General Plan Amendment of the 16.7-acre site from Commercial (C) to Medium Density Residential (MDR), Commercial (C), Public Open Space Recreation (PubOS/REC) and Private Streets. Rezoning of the site from AR-10 (PDC) (Agricultural Residential, Minimum 10-acre Lot, Planned Unit Development) to RD-10 (Medium Density Residential, Maximum 10 Dwelling Units Per Acre), LC (Limited Commercial), and O (Open Space). Small-lot Tentative Subdivision Map (TSM) of 84-single-family residential lots on approximately 10 acres, 4 commercial lots on approximately 3.3 acres and 0.8 acres of park, as well as landscaping, right-of-way, open space, and a water quality basin.</p>	<b>NOP</b>	09/22/2014
2014081074	<p>Mayflower Park Boat Launch Improvement Project Riverside County Regional Park and Open Space District Blythe--Riverside</p> <p>The proposal is to extend the existing boat ramp for pile guided boarding floats and aid in erosion at the bottom of the ramp. The extension of the ramp is approximately 30 feet long by 44 feet wide. Also included in the project is to construct four piles for five sections of eight foot wide by 20 foot long pre-manufactured boarding floats on the north side of the boat launch and installation of a drainage and filter (to collect and filter surface run-off at the top of the ramp to prevent run-off from parking areas from entering into the river), remove three median islands (with light poles) in the existing parking lot for added parking spaces, and add an accessible parking stalls and accessible path of travel from the parking lot for a full accessible pedestrian path of travel.</p>	<b>Neg</b>	09/22/2014
2014081075	<p>Reach Air Medical Helipad Oceanside, City of Oceanside--San Diego</p> <p>REACH Air Medical Services currently provides emergency air medical transportation services for the region from a temporary facility located at the Oceanside Airport. The proposed project would develop and operate a new permanent helipad, air medical crew trailer and supporting facilities at the City of Oceanside Fire Training Center located at 110 Jones Road. The helipad and support facilities would be situated at the northwest portion of the project site and approximately 100 feet from any structure. The services provided by REACH from the proposed facility would include: one fully certified turbine engine helicopter that is available 24 hours a day, seven days a week with three crew members - a pilot, a registered paramedic, and a registered nurse (collectively, the "flight team"); on-site aircraft maintenance; and aircraft fueling activities.</p>	<b>Neg</b>	09/22/2014

<b><u>Documents Received on Friday, August 22, 2014</u></b>			
2007082085	Jelly's Ferry Road Bridge Replacement Project Tehama County --Tehama This project will remove and replace the existing seismically and structurally deficient single-lane bridge over the Sacramento River with a bridge that will accommodate two 12-foot undivided lanes and two six-foot shoulders with Class II bike lanes. The project will also realign Jelly's Ferry Road, relocate existing Bureau of Land Management (BLM) recreational facilities, and construct a second Overflow Bridge to the north.	<b>NOD</b>	
2009091125	California High-Speed Train Project Merced to Fresno Section High Speed Rail Authority, California Fresno--Fresno The proposed Project involves construction and operation of the Merced to Fresno segment of the California High-Speed Train (HST), as approved by the lead agency, affecting or generally related to fish and wildlife resources subject to the regulatory authority of CDFW, including natural resources subject to the California Endangered Species Act (CESA). The ITP authorizes incidental take of California tiger salamander ( <i>Ambystoma californiense</i> ), Swainson's hawk ( <i>Buteo swainsoni</i> ), and San Joaquin kit fox ( <i>Vulpes macrotis mutica</i> ) (collectively, the Covered Species), all in connection with otherwise lawful activities within the Project area. The Project will result in permanent impacts to 75.08 acres of upland refugia habitat and temporary impacts to 2.26 acres of aquatic breeding habitat for California tiger salamander; permanent impacts to 164.96 acres of foraging habitat and one nest tree for Swainson's hawk; and 304.47 acres of permanent impacts to foraging and denning habitat for San Joaquin kit fox. The Project is expected to result in incidental take of the Covered Species. Minor Amendment No. 1 makes the following minor modifications to ITP Conditions of Approval: 1) allows a Designated Biologist to be approved on an individual species by species basis rather than only for all of the Covered Species; 2) clarifies allowable activities at the Mitigation Site to accommodate ITP requirements; and 3) deletes a redundant Condition of Approval. The extent of habitat disturbance and other effects to the Covered Species are unchanged by Minor Amendment No. 1.	<b>NOD</b>	
2010122013	Hayward Maintenance Complex Project Bay Area Rapid Transit District Union City--Alameda This project will expand the San Francisco Bay Area Rapid Transit District (BART) maintenance and storage facilities by acquiring three adjacent parcels, improving and/or reconstructing warehouse buildings and constructing additional storage tracks for up to 250 vehicles to serve an expanded BART fleet.	<b>NOD</b>	
2011061015	Salinas River Bridge Widening Caltrans #5 Salinas--Monterey The California Department of Fish and Wildlife is executing a Lake or Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the Project applicant, California Department of Transportation. The Project includes activities related to widening the inside and outside shoulders of both the eastbound and westbound bridges of Highway 68 over the Salinas River.	<b>NOD</b>

2011062057	Statewide Plant Pest Prevention and Management Program Food and Agriculture, Department of -- The overall goal of the Statewide Pest Prevention and Management Program is to protect California's agriculture from damage caused by invasive plant pests. Other goals of the Statewide Program include: (1) providing rapid response resources to pest infestations as they occur, and (2) using an IPM approach in conducting activities. The Statewide Program encompasses a range of prevention, management and regulatory activities, carried out or overseen by CDFA against specific injurious pests and their vectors, throughout California. The Statewide Program is made up of a variety of focused programs, each including a set of options for controlling target pests or pathogens. The Statewide Program is ongoing and currently is implemented pursuant to existing CEQA authorizations. This PEIR is intended to provide CEQA compliance for the future Statewide Program activities.	<b>EIR</b>	10/08/2014
2000082139	Civic Center Aquatics Complex Project Elk Grove, City of Elk Grove--Sacramento Construction and operation of a competitive/training swim facility and water and adventure park on 57.3 acres (~30 acres for the facility and ~27 acres for overflow parking). The competition venue includes a competition swimming pool and a dive pool with a driving tower, bleacher seating for ~1,100 people, therapy spa, team prep area, restrooms/showers, equipment storage space, and concessions. The water park component would include, but would not be limited to, a lazy/adventure river, wave pool, slide attractions, a possible future children's aquatic play system, a family activity pool, and spray grounds, geysers, and water play features. The adventure park would include ropes courses, zip lines, a family adventure sky trail, and a family entertainment center.	<b>FIN</b>	
2014062057	Hall Winery Distillery Building Napa County St. Helena--Napa The project includes a request to modify Use Permit Modification No. P05-0140 to allow demolition of the existing 1,752 sf Distillery Building located in the approximate center of the Hall Winery complex. The Distillery Building was constructed in 1936 and was used for making distilled wine products. In the 1940's and until recently, the building was used for storage and winery offices. The building is constructed as a two-story structure using concrete blocks with a wood framed roof structure.	<b>FIN</b>	
2014051042	Conditional Use Permit 13-05 California City California City--Kern The project will include within a chain-link fenced area, 28,500 solar modules, racking, power inverters, transformers, switch-gear, wiring, lighting and security cameras.	<b>MND</b>	09/23/2014

	effluent per the NPDES discharge permit and commence ground discharge into infiltration/evaporation ponds per a WDR permit. This entails discharging the treated effluent to land where it will infiltrate into the ground and be evaporated into the air. No changes are proposed for the wastewater treatment process; thus, the quantity and quality of the discharged effluent and any associated solids (sludge) will not change.		
2014081082	ENV-2014-1542-MND / 454 E. South Venice Boulevard Los Angeles, City of --Los Angeles A Preliminary Parcel Map involving the demolition of an existing 2-story duplex, and construct two 3-story condominiums on one lot in the R3-1-O Zone. Each condominium will provide one covered parking space and one uncovered parking space for a total of two spaces per unit. Unit "A" will consist of approximately 1,970 sf and Unit "B" will consist of approximately 2,119 sf. Both units will have a deck containing approximately 233 sf.	<b>MND</b>	09/23/2014
2014082076	Willow Creek Shopping Center (PCPA 20140057) Placer County Auburn--Placer The applicant requests approval of a Conditional Use Permit to construct a shopping center with approximately 65,000 sf of retail and restaurant uses.	<b>MND</b>	09/23/2014
2014082078	Log Cabin Diversion Dam Apron Curtain Repair, Yuba River Development Project Yuba County Water Agency --Yuba The objective of the proposed project is to fix two small areas of scour located on the toe of the Diversion Dam spill apron. The proposed project area is 0.75 ac in size and located on TNF lands. Repair work will take place in the following steps: 1) build dam diversion; 2) pressure wash with a water source to clean the area; 3) drill dowels into the existing concrete and stream bed in scour area; 4) epoxy dowels into the drilled holes; 5) lay out a concrete pump, shotcrete hoses and visquin plastic to protect the area outside of the work zone; 6) spray bond agent on the surface; 7) place fiber reinforced shotcrete; 8) clean up shotcrete rebound and visquin plastic; 9) allow shotcrete to cure; and 10) remove dam diversion. Work including mobilization and demobilization would occur over five 10-hr days in Sep/Oct 2014. If work is not done in 2014 it will take place in 2015 or 2016.	<b>MND</b>	09/24/2014
2012072061	Barrett Ranch East Sacramento County --Sacramento The project includes the development of 496 single family homes on lots of varying densities and designs throughout most of the project site. The homes along the future Titan Way would have alley-loaded garages, which the applicant intends to provide a safe and pedestrian-friendly streetscene. The plan also includes two multi-family parcels totaling 10.5 acres situated along Antelope Road and the future Antelope-Elverta connection roadway adjacent to a 5.8-acre shopping center at the northwest corner of Antelope Road and Elverta Road. The shopping Center is intended to provide a village-like gathering place for Antelope residents to shop and eat locally.	<b>NOP</b>	09/23/2014

2013111041	<p>Mariners Village Renovation Project Los Angeles County --Los Angeles</p> <p>The project would renovate the 981 unit apartment community, expand commercial space by 7,000 sf within the existing footprint, and improve open space areas. The project would also renovate the infrastructure on the site and replace the existing landscaping with large amounts of drought tolerant plants and water-efficient irrigation systems. The renovation activities would require residential units to be sequentially vacated during work to their buildings or related infrastructure.</p> <p>The project would provide internal circulation improvements to eliminate dead-end conditions, and parking on the site would be increased by over 300 spaces. The existing private waterfront walkway and utility road would be developed into a 28-foot wide public promenade that would connect with neighboring parcels and provide an onsite public and bike access way. The project would also develop a vertical bulkhead and an anchorage that would include a 110 foot transient dock, 92 berths and storage for 20 non-motorized kayaks or paddle boards and 24 personal watercrafts. Dock facilities would include: restrooms, showers, laundry room, and a dockmaster office. Access to the docks would be provided by three gangways, one of which would be ADA-accessible.</p> <p>Project improvements to Parcel BR include: pedestrian improvements; replacing the existing view platform with a new 1,200 sf view platform; developing a 90-foot public dock; replacing the existing major vegetation and landscaping; providing a fire lane, and providing a pedestrian crossing between Parcel BR and the public parking lot across Via Marina.</p>	<b>NOP</b>	09/23/2014
2014081083	<p>Pacific Palisades Village Remediation and Site Restoration Project Toxic Substances Control, Department of Los Angeles, City of--Los Angeles</p> <p>DTSC is considering approval of a Draft Final Response Plan (RP) pursuant to Health and Safety Code, Division 20, Chapter 6.82 as submitted on July 30, 2014 on behalf of Caruso Acquisition Co. LLC. The proposed project consists of the remediation of contaminated soil and soil vapor, and in-situ bio enhancement and monitoring of groundwater associated with the property located at 1045 Swarthmore Avenue, in the community of Pacific Palisades, City of Los Angeles, California (Figure 1). The project would be implemented in Substances Control (DTSC). The DTSC and the project sponsor, CAH Acquisition Co., LLC, will enter into an agreement, pursuant to the California Land Reuse and Revitalization Act (CLRRA) of 2004. Pursuant to the CLRRA agreement CAH Acquisition Co., LLC, a prospective project purchaser, will agree to perform those actions necessary to remediate the project Site as set forth in the RP.</p>	<b>Neg</b>	09/23/2014

2007052104	<p>Agliolo Minor Subdivision and Special Permit Humboldt County --Humboldt</p> <p>A Parcel Map Subdivision to divide an approximately 6.31 acre parcel into three parcels of approximately 1.8 acres, 3.1 acres, and 1.4 acres each. A Special Permit is required for road work within a Streamside Management Area. The parcels will be served with water by the McKinleyville Community Services District and on site septic systems are proposed.</p>	<b>NOD</b>	
2009091125	<p>California High-Speed Train Project Merced to Fresno Section High Speed Rail Authority, California Fresno--Fresno</p> <p>The proposed Project involves construction and operation of the Merced to Fresno segment of the California High-Speed Train (HST), as approved by the lead agency, affecting or generally related to fish and wildlife resources subject to the regulatory authority of CDFW, including natural resources subject to the California Endangered Species Act (CESA). The ITP authorizes incidental take of California tiger salamander (<i>Ambystoma californiense</i>), Swainson's hawk (<i>Buteo swainsoni</i>), and San Joaquin kit fox (<i>Vulpes macrotis mutica</i>) (collectively, the Covered Species), all in connection with otherwise lawful activities within the Project area. The Project will result in permanent impacts to 75.08 acres of upland refugia habitat and temporary impacts to 2.26 acres of aquatic breeding habitat for California tiger salamander; permanent impacts to 164.96 acres of foraging habitat and one nest tree for Swainson's hawk; and 304.47 acres of permanent impacts to foraging and denning habitat for San Joaquin kit fox. The Project is expected to result in incidental take of the Covered Species. Minor Amendment No. 1 makes the following minor modifications to ITP Conditions of Approval: 1) allows a Designated Biologist to be approved on an individual species by species basis rather than only for all of the Covered Species; 2) clarifies allowable activities at the Mitigation Site to accommodate ITP requirements; and 3) deletes a redundant Condition of Approval. The extent of habitat disturbance and other effects to the Covered Species are unchanged by Minor Amendment No. 1.</p>	<b>NOD</b>

<b><u>Documents Received on Monday, August 25, 2014</u></b>			
2014031050	North Avenue Bridge Maintenance ER13-0006 Lompoc, City of Lompoc--Santa Barbara The City of Lompoc proposes to conduct preventative maintenance on the North Avenue Bridge (Bridge # PM00058) over the San Miguelito Creek Channel. The proposed project would seal the bridge deck with High Molecular Weight Methacrylate Resin and repair structural members of the bridge.	<b>NOD</b>	
2014062065	Pruss Minor Land Division (PMLD 20120303) Placer County --Placer The project proposes a Minor Land Division of a 10.33-acre property in order to create four parcels consisting of 2.59 acres, 2.78 acres, 2.47 acres and 2.49 acres.	<b>NOD</b>	
2014062070	Reynolds Minor Land Division (PMLD 20130357) Placer County --Placer The project proposes the approval of a Parcel Map to subdivide a 2.38-acre residential property into two parcels, 1.26-acres for Parcel A and 1.12 acres for Parcel B.	<b>NOD</b>	
2014071019	Tractor Supply Company Project Lake Elsinore, City of Lake Elsinore--Riverside The proposed project includes the construction of a tractor supply store consisting of a 18,800-square-foot tractor supply building; two drainage basins consisting of 8,000 and 2,100 square feet; permanent outdoor display areas of 18,120 square feet; perimeter landscaping; and accompanying parking areas with 91 parking spaces. Two driveways are proposed off Enterprise Way and one driveway is proposed off Collier Avenue (SR-74). The requested variance reduces the building setback and landscaping requirements along Collier and Enterprise in order to facilitate full right-of-way dedications and future development of the ultimate road widths. The project will include the construction of offsite roadway improvements, the purpose of which is to improve the local circulation following development of the project.	<b>NOD</b>	
2014071037	Well 46 (Snow Creek) Desert Water Agency Palm Springs--Riverside The Agency's Well 46 (Snow Creek) project (herein also referred to as the Project) consists of the construction and operation of one domestic groundwater production well and pumping plant on DWA's existing Snow Creek Power Plant property and connection of said well to the Snow Creek Village Reservoir via the existing Snow Creek Penstock. The well is expected to be approximately 14 to 20 inches in diameter and to extend to a depth of up to 1,500 feet below ground surface. The well is anticipated to have a capacity of up to 1,000 gallons per minute (gpm) and to operate up to approximately 90 days per year when the Snow Creek and Falls Creek surface water diversions are out of service. Water resulting from development and testing of the proposed well, and water resulting from periodic well purging during operation, will be discharged to Snow Creek via the existing 20" waste pipeline. The project location is shown on Figures 1 and 2 attached to the Initial Study.	<b>NOD</b>

2014088352	Installation of Rock Slope Protection on Interstate 880 in Alameda County Caltrans #4 Fremont--Alameda This project will repair the eroded slop below a railroad underpass on Interstate 880 in Alameda County. The purpose of the project is to prevent further erosion and damage to the slope by installing approximately 1,200 square feet of rock slope protection in the existing eroded area.	<b>NOE</b>	
2014088353	Peterson Brush/Debris Clearing (LSAA# 1600-2014-0106-R2) Fish & Wildlife #2 --Amador The project is limited to the removal of vegetation and the placement of a temporary culvert in order to cross a small tributary on the property while removing vegetation. When necessary to provide defensible space from fire, a masticator (or similar equipment) will remove shrubs, fallen trees, up to Sutter Creek in an area of approximately 1.75 acres. The banks of the creek shall not be disturbed with equipment. All cut vegetation shall be properly disposed of and not placed in an area where it will enter Sutter Creek. Additionally, bare soil that could wash into Sutter Creek during a storm event shall be stabilized with herbaceous vegetation.	<b>NOE</b>	
2014088354	Woodstove Replacement Program Mammoth Lakes, City of Mammoth Lakes--Mono The Town of Mammoth Lakes' Woodstove Replacement Program (WRP) is funded by 'Environmental Public Benefit Funds' from the Great Basin Unified Air Pollution Control District specificallyfor the purpose of funding air pollution reduction projects within the Air District. The WRP is intended to identify and encourage funding the replacement of non-EPA compliant wood burning systems throughout the Town with new, EPA Phase 2 healing appliances, thereby providing more efficient and cleaner burning heating systems that result in significantly less wood smoke particulate emissions throughout Mammoth Lakes and beyond.	<b>NOE</b>	
2014088355	Danoha Road Bridge Bypass Fish & Wildlife #3 --Sonoma The project is limited to the grading and stabilization of a disturbed area at the top of bank of Pole Mountain Creek. Soil originally displaced to allow the creek to "bypass" the bridge and travel overland will be replaced to its original location and stabilized using erosion control best management practices. Erosion control measures will include the placement of a geotextile (jute, coir, etc) cloth over the disturbed areas, staked 4-foot on center around its perimeter.	<b>NOE</b>	
2014088356	SR 710 Surplus Unimproved Property Sale Project CE# 201408007 Caltrans #7 Pasadena, South Pasadena--Los Angeles Caltrans is proposing to sell 14 vacant lot parcels in the Citi8es of Pasadena and South Pasadena.	<b>NOE</b>	
2014088357	Whitney Creek Dike Creation Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Unincorporated, Weed--Siskiyou Extend the left bank dike of Whitney Creek downstream to prevent braiding of the Whitney Creek channel upstream of the State Route 97 cross culvert. Project	<b>NOE</b>	

## CEQA Daily Log

Documents Received during the Period: 08/16/2014 - 08/31/2014

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, August 25, 2014</u></b>			
	activities include: removing a large ponderosa pine from the creek channel to restore the former flow path; and extending an existing earthen dike approximately 750 feet downstream the left bank to help prevent creek flows from leaving the existing channel.		
2014088358	Homewood Mountain Resort Master Plan Placer County --Los Angeles A request from JMA Ventures to the County to determine whether proposed revisions resulting from a settlement agreement between Homewood Village Resorts, LLC (HVR), the Friends of the West Shore and the Tahoe Area Sierra Club executed on January 27, 2014 are in substantial conformance with the HSAMP conditions of approval as listed in the 2011 Conditional Use Permit.	<b>NOE</b>	
2014088359	Arsenic Compliance Project - Test Well Riverdale Public Utility District --Fresno The Project will consist of drilling a test well (to a depth of 1,800 feet below site grade) and conducting zone testing to obtain data needed to design a production well and determine water quality characteristics. The test well will be abandoned in compliance with state and local requirements after testing is completed. Test well findings will be used to determine if treatment facilities will be required to remove arsenic (or other constituents). Plans and specifications will be prepared for a production well upon approval from the Division of Drinking Water. Construction of the proposed production well improvements is not part of this Project.	<b>NOE</b>	
2014088360	Crossfit 916 - Minor Conditional Use Permit - EG-14-022 Elk Grove, City of Elk Grove--Sacramento The Project consists of a Minor Conditional Use Permit to utilize an existing building zoned Light Industrial (LI) for an indoor fitness use (Crossfit).	<b>NOE</b>	
2014088361	2014 Elk Grove Landfill Final Cover Repairs Elk Grove, City of Elk Grove--Sacramento The project consists of importing a maximum of 4,000 cubic yards of clean dirt for fill in order to re-establish finished grade at the landfill. Some locations will require fill ranging from one foot up to three feet. In addition, the project includes re-laying of some black header gas piping on the surface of the landfill. The project will also require an amendment to the post-closure maintenance plan and compliance with the recently adopted Revised Waste Discharge Requirements. Maximum area of disturbance will be about 5 acres.	<b>NOE</b>	
2014088362	Grove Village 48 - Minor Design Review - EG-14-019 Elk Grove, City of Elk Grove--Sacramento The proposed Project consists of a Minor Design Review for four (4) Master Residential Home Plans with three (3) different elevations each. These designs will be distributed over 49 single-family lots located in a previously-approved subdivision in the Laguna Ridge Specific Plan Area.	<b>NOE</b>

2011072039	Newman Ridge Project Amador County Ione--Amador The proposed project consists of the following two components: 1) the Newman Ridge Quarry; and 2) the Edwin Center North. The Newman Ridge Quarry is an andesite quarry on approximately 278 acres, with operations occurring on approximately 216 acres. The production level of the Quarry is anticipated to be 5 million tons per year, to be extracted over approximately 50 years, depending on market demand. The Edwin Center North site would host various material processing facilities on approximately 141.37 acres, including an aggregate plant, an asphalt concrete (AC) plant, ready-mix concrete plant, an asphalt and concrete recycling plant, and a rail load out facility for finished products, as well as ancillary administration and support facilities (e.g., fuel storage, truck scales, temporary construction trailer). Mining would not occur within the Edwin Center North, which is geographically separate from the Quarry. The railroad load out facility would be located directly off the existing Union Pacific-Ione Branch rail. The majority of material processed at the Edwin Center would be railed to regional markets, rather than trucked, to the regional market.	<b>EIR</b>	10/10/2014

	accordance with the CEQA and City Morgan Hill standards.		
2014072009	Butterfield Keenan General Plan Amendment Project Morgan Hill, City of Morgan Hill--Santa Clara The project would change the General Plan designation from Industrial to Multi-Family Medium (14-21 dwelling units per acres). Approval of the GPA would allow future development of the site with up to 409 residential units.	<b>EIR</b>	10/09/2014
2014081084	Parkhill Fuel Reduction Project Forestry and Fire Protection, Department of --San Luis Obispo The proposed project would include approximately 1,331 acres of roadside brush removal along 52 miles of designated truck trails, ranch roads, highways, and throughout selected fuel breaks and reduced fuel zones. The purpose of this work is to reduce the wildfire threat associated with local hazardous fuel conditions by strategically removing dead and small diameter trees, shrubs, and brush species. The primary work for this project consists of utilizing a variety of fuel treatment techniques and may include any or all of the following as specified: felling, removing, and disposing of dead and dying trees and snags, hand crew fuel treatment with chain saws, mechanical mastication (shredding), chipping, brush/slash pile mastication, lopping and scattering, pile burning, and road grading.	<b>MND</b>	09/24/2014
2014081088	Los Flores Communication Project Santa Maria, City of Santa Maria--Santa Barbara Review of a MND to facilitate construction of a 160-foot-tall communication tower, associated support facilities; the extension of electrical power; and minor access roadway improvements on a two-acre portion of a 324-acre parcel. The communication tower facility would improve Public Safety and communication services for the City of Santa Maria.	<b>MND</b>	09/24/2014
2014082079	Tentative Parcel Map-Sierra Group L.P. (TPM 1-10/11-02) Plumas County --Plumas Tentative Parcel Map to divide 80 acres into four parcels of seven acres each plus a remainder for single-family residential use.	<b>MND</b>	09/24/2014
2014082080	Anatolia II Elementary School Elk Grove Unified School District Rancho Cordova--Sacramento The District proposes to construct a new elementary school approximately 70,000 sf in size to accommodate 900 students with provisions for future expansion to 1,100 students under a traditional schedule. The school may convert to a multi-track year-round schedule, which would allow the number of students enrolled at the school to increase to 1,400. However, the number of students attending classes on campus would not exceed 1,100 students during any session. The project would include administrative offices, classrooms, a library, and a cafeteria/multi-purpose room. In addition, the project would provide outdoor athletic/recreational facilities with features such as hard courts and turf play fields.	<b>MND</b>	09/24/2014

<b><u>Documents Received on Tuesday, August 26, 2014</u></b>			
2014081085	Los Angeles Regional Interoperable Communications System (LA-RICS) Land Mobile Radio (LMR) System Joint Powers Authority --Los Angeles Installation and operation of up to 90 LMR communications sites in Los Angeles County and portions of adjacent Orange and San Bernardino counties to provide voice communications coverage for emergency responders. The proposed sites are within or adjacent to existing communication facilities to the maximum extent feasible. The project consist of installation of antennas on existing and new lattice towers and monopoles and supporting radio equipment in existing and new shelters. Sites may also include new emergency generators. New lattice towers would generally not exceed 180 feet in height. New monopoles would generally be 70 feet tall. Maximum construction footprints would not exceed 5,000 sf at a site.	<b>NOP</b>	09/24/2014
2014081086	Creekside Terrace Slope Stabilization University of California, Regents of the Riverside--Riverside The proposed project involves stabilization of the north bank of an existing drainage channel located adjacent to the University-owned residential development and partially located on property owned by others. The channel will be reshaped and rip-rap will be placed on the north bank to match existing conditions on the south bank. The proposed improvements will require the removal of all vegetation located on the north bank as well as the channel bottom. The proposed project involves the recommended remedial measures which consist of stabilization improvements within a previously improved stream channel to ensure long-term stability of the stream bank in proximity to substantial keystone retaining walls along the north side of the drainage.	<b>Neg</b>	09/24/2014

2010061063	Coto de Caza Specific Plan Amendment/TTM 17325 Orange County --Orange CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2014-0057-R5) to the project applicant, Coto Meadows, LLC. The project proposes to impact 0.916 acre of streambed, including 0.890 acre of permanent impact to southern coast live oak riparian forest and 0.026 acre of temporary impact to southern coast live oak riparian forest and mitigate with an undetermined acreage of creation, restoration and/or enhancement.	<b>NOD</b>	
2012061063	Portola Center Project Lake Forest, City of Lake Forest--Orange CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2013-0118-R5) to the project applicant, USA Portola Properties, LLC. The project proposes to permanently impact 1.02 acres of stream bed, bank, channel, and/or associated wetland/riparian vegetation. Permanent impacts to southern willow scrub will not exceed 0.16 acre. Permanent impacts to mulefat scrub will not exceed 0.76 acre. Permanent impacts to unvegetated streambed will not exceed 0.10 acre.	<b>NOD</b>	
2012061069	General Plan and Development Code Update Clovis, City of Clovis--Fresno The proposed project is an update to the City of Clovis General Plan and Development Code. The Clovis General Plan Update (GPU) is intended to shape development within the Plan Area through 2035 and beyond, while the update to the Development Code is intended to consolidate and compile amendments adopted since the 1970s into a reorganized and reformatted document that also reflects changes to the General Plan. The GPU consists of the following elements: Land Use, Circulation, Community Facilities (previously Public Facilities), Open Space/Conservation, Safety. Noise, Air Quality, and Economic Development. The Development Code Update reflects changes to the General Plan and the revised land use and zoning designations. The update would also compile existing information and past code amendments; provides a procedures guide; update land uses to contemporary standards; and proposes limited land use and development standard policy modifications.	<b>NOD</b>	
2013032081	General Plan Amendment and Rezone Application No. PLN2012-0038 - Brite Transport Systems, Inc. Stanislaus County Riverbank--Stanislaus Request to amend the current General Plan designation of Urban Transition and zoning designation of A-2-10 (General Agriculture) to Planned Development (P-D), for three (3) parcels totaling 20.98 +/- acres, to expand an existing agricultural trucking business to include an RV storage/parking facility on an adjacent property. A lot line adjustment, as a separate application, is also proposed to separate the RV parking and agricultural truck parking operations.	<b>NOD</b>

	proposed zone change does not itself permit any development, but it does allow new land uses. There is non preferred development option for this site and a preferred site plan has not been established.		
2013091062	RGF 5-13; Alon Backersfield Refinery Crude Flexibility Project by Paramount Petroleum Corporation Kern County Bakersfield--Kern Note: Response to Comments	<b>Oth</b>	
	The Alon Bakersfield Refinery Crude Flexibility Project is a Modification of a Precise Development Plan that would allow greater flexibility for the Refinery to utilize a variety of crude oils that can be processed onsite. The project proponent is requesting: 1) expansion of rail, transfer and storage facilities including an addition of up to three boilers; 2) process unit upgrades and/or modifications; 3) repurposing of existing tankage; and 4) relocation and modernization of existing Liquefied Propane Gas (LPG) truck rack and upgrades to sales rack. The rail expansion would consist of the construction of a double rail loop from a new spur connection off of the existing Burlington Northern and Santa Fe Railway (BNSF) and would be fully contained onsite. Most of the proposed process unit changes are minor in scope. The Refinery's 70,000 barrels per day (BPD) maximum crude processing capacity would not be increased.		
2013122053	Bay 101 Casino and Mixed Use Project, Planned Development Rezoning file number PDC13-017 San Jose, City of San Jose--Santa Clara Note: 1st Amendment	<b>Oth</b>	
	The project consists of five main elements: 1) rezoning the site from Commercial General to Planned Development, 2) demolition of all buildings, entire site grading and tree removal, 3) new construction of a card club, two hotels, ancillary commercial buildings, parking, and long term airport parking or construction of a 10 story office building, two hotels, ancillary commercial buildings, parking, and long term airport parking, 4) land transactions to facilitate roadway improvements and modifications, and 5) construction of extension between two existing public streets and converting a two way street to a one way street.		
2011061056	Wiseburn High School (201 N. Douglas Street Site) Wiseburn School District El Segundo--Los Angeles The District proposes to develop and operate a joint-use sports complex comprising a gymnasium with 500-seat bleachers, an aquatics center with lighted outdoor 50-meter competitive swimming pool, 20-meter warm pool, and 200-seat spectator bleachers, and associated 91-spc parking lot accessed from Duley Road. The new gymnasium would house three volleyball courts, lockers, restrooms, and storage. The District would enter into an agreement with the City of El Segundo to share the sports complex for school and City programs. The existing 335,000 sf building would be renovated per the Certified EIR for Wiseburn High School. New district office use also be added for 20 district staff.	<b>SIR</b>	10/13/2014

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Thursday, August 28, 2014</u></b>			
2014042021	Event Center Zoning Text Amendment (PZTA 20130133) Placer County --Placer The project proposes a Zoning Text Amendment (ordinance) to amend Placer County Code Chapter 17 to add new definitions for "community center", "commercial event center" and three categories of "agricultural event center" (small, intermediate, large agricultural event center) to Article 17.04, Section 17.04.030 and to amend Article 17.06, Section 17.06.050(D) to designate the zone districts for such uses. The project also proposes amendments to the individual zone district use tables to conform the same to the proposed changes in Section 17.06.050(D). Event center development and operational standards are proposed to be added to Article 17.56 as Section 17.56.340. The standards include parking, access, minimum parcel size, event size and frequency, noise and hours of operation.	<b>NOD</b>	
2014061088	Whittier Boulevard and Hacienda Road Intersection Improvements Project La Habra, City of La Habra--Orange The City of La Habra is proposing to improve the level of service and increase the vehicular capacity of the intersection of Whittier Boulevard and Hacienda Road. The Proposed Project would restore the northbound approach of Hacienda Road and widen and restripe the southbound approach of Hacienda Road and the westbound and eastbound approaches of Whittier Boulevard. The traffic signal for north-south split phase operation on Hacienda Road would be modified while the existing southbound right-turn overlap phase would be maintained. The existing crosswalk on the east leg of the intersection would be relocated to the west leg of the intersection.	<b>NOD</b>	
2014088387	Lundberg Residence Placer County --Placer The project proposed a Variance to the south, side setback for an upper and lower deck and a portion of the residential structure. On May 22, 2014, the Planning Commission granted a variance for the structure, granted a maximum 3-foot variance to the 5-foot setback for the upper deck and denied the variance for the lower deck. The decision on the upper and lower decks was appealed to the Board of Supervisors by two separate parties. (The grant of the variance for the structure was not appealed.) On August 26, 2014, the Board denied both appeals. The Board denied both variance requests. The Board confirmed that the lower deck would have to comply with the 5 foot setback requirement as new construction. The Board recognized that the upper deck had been originally constructed in 1978 and at that time, Section 1726(c)(2) of the zoning code permitted a 3-foot extension into the 5-foot setback for "unenclosed porches" which the County historically interpreted to include decks. The Board found that the portion of the reconstructed upper deck within the 3-foot extension area should be treated and accepted as legal non-conforming.	<b>NOE</b>	
2014088388	Tallac Creek Sewer Line Protection (1600-2014-0119-R2) Fish & Wildlife #2 South Lake Tahoe--El Dorado Project is limited to the transport and placement of approximately 170 70-lb. clean black gravel filled Caltrans bags abutting the downstream edge of a concrete sewer line encasement. The purpose of the gravel bags is to minimize or preclude further undercutting of the concrete encasement by the creek which would	<b>NOE</b>

<b><u>Documents Received on Thursday, August 28, 2014</u></b>			
	<p>otherwise result in a rupture of the sewer line and subsequent release of sewage into Tallac Creek and Lake Tahoe. The bags are 8 ounce fabric weight, 24 inch by 16 inch nonwoven black gravel bags. They are rated at 900 gpm/ft flow rate with a 500 pound burst strength. The bags will be transported from a staging area to the site using an ATV and attached ATV trailer. It is anticipated that between 8 to 11 trips will be required to deliver the necessary number of gravel bags to the project site. All bags will be placed by hand crews to minimize the risk of ground and habitat disturbance at the site and along the creek. Prior to transport and placement, the Permittee will ensure that all gravel and bags are free of loose soils and sediment that could otherwise wash into the creek. This is a temporary repair project. It is anticipated that a final solution to protect the sewer line will be implemented and be incorporated into the US Forest Service restoration plan within 3 years of this project at which time the gravel bags will be removed from the creek.</p>		
2014088389	<p>South Entrance Sign Replacement Parks and Recreation, Department of --Humboldt</p> <p>Replace the existing, deteriorated south entrance sign for Prairie Creek Redwoods SP to enhance the visitor experience. The new sign will be installed in the same location as the existing sign, mounted on two concrete footings with breakaway brackets for increased safety.</p>	<b>NOE</b>	
2014088390	<p>Integrated Solar PV, Advanced Compressed Air Energy Storage, and Microgrid Demonstration Energy Commission Oxnard--Ventura</p> <p>Project will demonstrate management of renewable and non-renewable electricity using a vanadium redox flow battery energy storage system (BESS) at the Mobile Utilities Support &amp; Equipment facility located at Naval Base Ventura County in Oxnard, California. Installed equipment will include 150 kW of solar PV generating capacity paired with a 100 kW/400 k Wh BESS system all interconnected to a new microgrid and related system controls capable of operating in either grid-connected or grid-independent modes.</p> <p>The vanadium redox BESS packages the power cells, electrolyte tanks and various pumps and electrical controls in three standard 20 foot shipping containers which will also serve as housings for the installed system. The electrolyte, consisting of vanadium ions in a &lt;16% HCL solution, is considered non-toxic and is stored in chemically compatible tanks (HDPE, XLPE, or FRP). Secondary spill containment is also provided. The footprint of the BESSS will be approximately 40x40 feet and will be either placed on extant asphalt concrete (AC) surface or a Portland cement concrete pad may be poured on top of the existing AC surface. The AC surface serves as a barrier over a low-grade radiation-contaminated soil in some areas and no trenching or otherwise piercing the barrier will be permitted in those areas. The solar systems consists of 75 modules that will be racked and mounted to shipping containers or military storage shelters and placed along an approximately 500 foot section of the MUSE facility perimeter. The shelters will be set on the extant AC surface outside the contaminated zone, and if necessary will be anchored to the ground through the surface. The PV-Storage set up will be interconnected and distributed through an extant distribution substation on the site, to which a new 480V breaker will be added.</p>	<b>NOE</b>

2014088391	<p>High Resolution Measurement of Levee Subsidence Related to Natural Gas Infrastructure in the Sacramento-San Joaquin Delta Energy Commission Menlo Park--San Mateo</p> <p>This project will produce observations of subsidence related to the Delta Island levee system with unprecedented detail in space and time. These observations will be focused on the most critical areas of the Delta's energy infrastructure, which involves natural gas pipelines and storage as well as electricity transmission lines. Initial surveying will occur at the Rio Vista Gas Field, followed by PG&amp;E's McDonald Island Gas storage, and then systematic scanning of levees associated with gas pipelines. Sampling will take advantage of the mobile Platform's ease of deployment and ability to respond to quickly to emerging information. If investigators' findings or measurements made external to this project indicate that a particular region merits more detailed data acquisition, the sampling plan will be modified accordingly. Investigators will rely primarily on a Balloon-suspended LiDAR (B-LiDAR) mounted on a specially outfitted truck that is already in the USGS's possession. Bi-monthly surveys along levee crest roads will enable surveying a distance of approximately 1700 km of levee crests, with higher frequency surveys to explore high-priority infrastructure zones.</p>	<b>NOE</b>

The property is designated Low Density Residential in the Turlock General Plan and zoned RL, allowing a minimum lot size of 5,000 sf and a residential density ranging between 3 and 7 dwelling units per acre. The proposed lots will range in size from 5,500 to 7,210 sf and the overall density of the project is 7 dwelling units per acre. The applicant is requesting to rezone the property to a Planned Development to allow for deviations in the minimum lot dimensions, setbacks, and street width.</p>	<b>CON</b>	09/18/2014
2012071065	<p>Harmony Specific Plan (SPR-011-001) Highland, City of Highland, Redlands, Yucaipa--San Bernardino The proposed Project is a master-planned residential community consisting of a maximum of 3,632 residential units on approximately 658 acres providing a variety of residential product types. Approximately 5.7 acres of the Project site is planned for development of neighborhood commercial land uses to provide retail goods and services to the community. An additional 15.9 acres of neighborhood commercial are allowed in residential areas designated with a Neighborhood Commercial Overlay. Areas designated with a Neighborhood Commercial Overlay may develop as their underlying residential land use, as neighborhood commercial, or as combination of residential and neighborhood commercial uses. Parks will be improved as active and passive recreational areas. Approximately one acre of Harmony's community greenway has been designated with an Agriculture Overlay; this area is envisioned to provide space for community gardens, stands for local farmers to sell their produce, and/or potentially recreational amenities for residents. The Harmony Specific Plan also includes the provision of approximately 4.3 acres for "The Parkhouse", a private recreation facility featuring a clubhouse, swimming pool, and other active and passive amenities. An 8-acre elementary school site is adjacent to a City joint-use park and a 1.5-acre fire station site is provided.</p>	<b>EIR</b>	10/13/2014

	will accommodate 405 middle school students in grade 6 to 8. The proposed project includes the construction of a classroom building with 16 classrooms, an administration building, a multi-purpose building with lunch shelter, and underground parking. Existing uses on the project site, including bungalow buildings, surface parking, and a basketball court, will be removed to accommodate the proposed project.		
2014081100	Conditional Use Permit Case No. 32, Map No. 214; Blue Eagle Lode Mine Company (PP11249) Kern County --Kern The proposal is for a Conditional Use Permit for and underground mining operation (Section 19.08.080) and development of a surface reclamation plan (Section 19.12.030.G) in accordance with the Surface Mining and Reclamation Act (SMARA) of 1975. The applicant proposes to employ underground mining techniques, including the drill and blast method, to extract gold and silver ore. The underground mine portal is to be located at the bottom of an existing open pit. Proposed surface development consists of a stormwater pond, water tanks, stockpile areas for ore and waste rock, trailers for office and shop, and access roads. Surface disturbance will be limited to approximately 2.45 acres on a portion of three parcels totaling 260 acres in size. Approximately 200 acres of the 260-acre parent parcels have been previously disturbed as a result of past mining operations. Consequently, there will be no disturbance of previously undisturbed surface area.	<b>MND</b>	09/29/2014
2014081101	Tentative Parcel Map 13-002 Poway, City of Poway--San Diego A proposal to subdivide a 4.69 acre residential property into two lots. The property has been completely disturbed and areas of the site were used in the past for agricultural purposes. A single family home and detached garage presently exist in the southerly half of the property and will be contained within proposed Parcel 2 of the subdivision. Future development of the property will involve grading to create a level building pad and access driveway for proposed Parcel 1 and ultimately potential development of a single-family residence.	<b>MND</b>	09/29/2014
2014081102	Freedom Ranch Alcohol and Drug Treatment and Recovery Facility San Diego County --San Diego The project is the expansion of the existing Freedom Ranch Alcohol and Drug Treatment and Recovery Facility from 50 beds to 125 beds.	<b>MND</b>	09/29/2014
2014081103	Evergreen Nursery Major Use Permit San Diego County --San Diego The project is a Major Use Permit for a retail nursery on a site that currently contains a wholesale nursery. Per Section 2700 of the Zoning Ordinance, a wholesale nursery is permitted by right in the A70 Use Regulations, whereas a retail nursery is permitted upon approval of a Major Use Permit in the A70 Use Regulations. The project also includes green waste recycling and production.	<b>MND</b>	09/29/2014

2006052101	5555 Mariposa Residential Citrus Heights, City of Citrus Heights--Sacramento The California Department of Fish and Wildlife is executing Lake or Streambed Alteration Agreement number 1600-2014-0148-R2 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Northridge Grove 46 LLC. The project is limited to the following; the placement of two clear span metal railcar style bridges. One bridge measures 63' x 69', the second measures 59' x 39' feet. Concrete abutments will be installed above the ordinary high water mark, and outside of the riparian area. Permanent impacts associated with the bridge total 0.20 acres, temporary impacts total 0.15 acres. In addition to the bridges, one 24" storm drain will be added to the banks of the Brooktree Creek. Approximately 0.25 ton of rock slope protection (RSP) will be added to the base of the storm drain to prevent erosion.	<b>NOD</b>	
2007102040	Mather Airport Master Plan Sacramento County Rancho Cordova--Sacramento Note: NOD filed on August 18, 2014 has been retracted. On August 26, 2014, the Sacramento County Board of Supervisors rescinded their August 12, 2014 approval of the project.  The proposed project is the Mather Airport (MHR) Master Plan. The Master Plan establishes a program for modifications of existing facilities and development of new facilities and MHR through the year 2035. The Master Plan provides flexible recommendations for facilities and phasing of projects that will accommodate users and tenants. Recognizing uncertainties associated with long-range aviation demand forecasts, two planning activity levels (PALs) were identified to represent future levels of activity at which key airside and landside improvements would be triggered. For the Master Plan, PAL 1 corresponds to near-term (2018) activity and PAL 2 corresponds to long-term (2035) activity forecast. The purpose of the Revised Mather Airport Master Plan is to guide airport development over a 20-year period. The entire Revised Mather Airport Master Plan can be viewed at: <a href="http://www.sacramento.aero/scas/about/planning_design/">http://www.sacramento.aero/scas/about/planning_design/</a>	<b>NOD</b>	
2011051014	San Joaquin Hatchery Public Access and Trail Project Fish & Game #4 --Fresno Construction of a day use trailhead entrance and parking lot, with a universal accessible trail and stairway through the west edge of the San Joaquin Hatchery grounds that will connect to the San Joaquin River Parkway Trail and Lost Lake Park Recreation Area. The parking lot and associated trailhead facilities occupy approximately 2 acres, and the trail is approximately 1 mile in length and will be approximately 12 feet in width.	<b>NOD</b>	
2011091078	Salinas Watershed Invasive Non-native Plant Control and Restoration Program Resource Conservation District, Monterey County King City--Monterey The Project includes a watershed-based, invasive, non-native plant control and riparian restoration program within the Salinas River watershed. The primary target species for control is giant reed ( <i>Arundo donax</i> ), although other non-native species will be removed depending upon local conditions.	<b>NOD</b>

2012072030	The Alameda County Voluntary Local Program Alameda County Resource Conservation District --Alameda The Alameda County Resource Conservation District will implement up to eight wildlife-friendly pond restoration projects in Alameda County.	<b>NOD</b>	
2013092014	Proposed Regulation for State Implementation Plan Credit from Mobile Agricultural Equipment Air Resources Board -- The Regulation for State Implementation Plan Credit from Mobile Agricultural Equipment provides an administrative mechanism to ensure emission reductions from voluntary incentive programs implemented following the Carl Moyer Program Guidelines are eligible for SIP credit and can be used towards meeting a SIP commitment. The regulation is intended to complement SJVAPCD's Rule 9610, which provides administrative requirements on local, state, and federal voluntary incentive programs in the San Joaquin Valley to ensure that emission reductions will be eligible to receive SIP credit. Other air districts in California may opt-in to be considered for SIP credit; however, they must comply with the requirements of this proposed regulation to be eligible.	<b>NOD</b>	
2013092025	Sherman Island Whales Mouth Wetland Restoration Project Reclamation District 341 --San Joaquin The purpose of the 877-acre Project is to restore permanent wetlands within the Sacramento-San Joaquin Delta in order to halt and reverse subsidence. The Project is located on Sherman Island within the boundaries of the Delta. The Project area is bordered by Mayberry Slough to the north, agricultural land to the west, Mayberry Slough and the San Joaquin River to the South, and by Sherman Island East Levee Road to the east. The Applicant has requested authorization under Clean Water Act Section 401 from the Central Valley Regional Water Quality Control Board.	<b>NOD</b>	
2014032084	Leininger Ranch Stock Pond Repair and Spring Improvement Project Tehama County --Tehama The Tehama County Resource Conservation District will improve two stock ponds and up to five natural springs on the Leininger Ranch for both wildlife and stock use.	<b>NOD</b>	
2014052059	Redirected Contract PG&E Water from the Miocene Canal to the Thermalito Power Canal Butte County Oroville--Butte California Water Services Company (Cal Water) provides water services to 38 communities throughout California. The Cal Water Oroville District incorporated in 1926 and has provided water service to the Oroville community since 1927 (UWMP).  The proposed project consists of the Cal Water Oroville District redirecting approximately 3,000 AFY of its 33,000 AFY Pre-1914 Pacific Gas and Electric (PG&E) water from the Miocene Canal to Lake Oroville, into the Thermalito Power Canal, and to the District's Filtration Plant (Water Treatment Plant - WTP). The redirected contract PG&E water will be moved from the Middle Miocene Canal at	<b>NOD</b>

	the Lime Saddle Powerhouse to Lake Oroville via an unnamed channel that extends from Kunkle Reservoir to the Lime Saddle Powerhouse and, subsequently, Lake Oroville. PG&E uses this channel to divert water into the Miocene Canal or from the Powerhouse to Lake Oroville will be used to eliminate water quality degradation that would otherwise be produced from flowing through Miocene Canal's open ditch system. A simplified system schematic of Cal Water's existing and proposed water conveyance for a portion of its contract PG&E water is provided in Figure 3 of Cal Water's Negative Declaration, Existing and Proposed Conveyance Schematic.		
2014061020	Siemens' Energy Savings Performance Contract Project (Waste-to-Energy Facility) San Bernardino County Local Enforcement Agency --San Bernardino The Proposed Project would entail the construction and operation of a 34 ton per day (tpd) pyrolytic conversions system (PCS) power plant designed by Funks Engineering with a maximum energy generation capacity of 1.6 megawatts (MW) and 1,882 kilovolts (Kva). The PCS power plant, also referred to as the Waste-to-Energy (WTE) Facility, would be located on approximately 5.5 acres of currently vacant land within the Fort Irwin cantonment adjacent to the existing landfill and the MSW processing facility (Landfill Baler Building). Temporary construction staging areas would also be located within the 5.5 acres.	<b>NOD</b>	
2014062026	Middle Truckee and Upper Little Truckee Watersheds Restoration Project Tahoe Resource Conservation District Truckee--Sierra, Nevada The proposed project restoration elements are composed of multiple parts in the Middle Truckee and Upper Little Truckee watersheds and are intended to improve the resiliency of ecosystems to climate change. The project will protect and enhance fish and wildlife habitats, restore the hydrologic connectivity of the watersheds and reduce erosion and sediment loads in the Middle Truckee and Upper Little Truckee watersheds in the Tahoe National Forest.	<b>NOD</b>	
2014071026	Red Rock Ranch Agricultural Drainage Water Research Studies Water Resources, Department of --Fresno The proposed project is to conduct research studies on approximately six acres of agricultural land in western Fresno County. The primary goal of the project is to be able to separate salts from the brine produced at the end of the studies, and to use the salts commercially. Many of the facilities required for the research studies have already been constructed and have been used for other studies, but some additional equipment and materials will be needed for project implementation. However, no construction is required to implement the proposed project. The anticipated term of the proposed project is 10 years.	<b>NOD</b>	
2014072008	Red Bluff Riverfront Park Boat Launching Facility Red Bluff, City of Red Bluff--Tehama This project will construct a boat launch ramp, boarding float, restroom and amenities at Red Bluff River Front Park.	<b>NOD</b>

2014089019	San Joaquin River Parkway, Owl Hollow Improvements Fresno County Fresno--Fresno Develop a park including an outdoor amphitheater, camping and picnic areas, a shade structure, and launch area for non-motorized watercraft.	<b>NOD</b>	
2014088405	Pedestrian Bridge - Professional MX Track - Prairie City SVRA Parks and Recreation, Department of --Sacramento The existing pedestrian bridge at the "Hangtown" Professional MX track will be replaced with a pre-fabricated pedestrian bridge. All existing infrastructure for the old "Hangtown" bridge will be demoed. The new bridge will be measuring 40'x8'. This engineer approved design will have reinforced concrete abutments, controlled access, and increased load capacity. This bridge will be connected to existing ADA approved facilities through 34.5'x8' pathway.	<b>NOE</b>	
2014088407	Launchland Dock Repair and Remodel; Streambed Alteration Agreement No. 1600-2014-0056-R2 Fish & Wildlife #2 Truckee--Nevada Project is limited to the replacement of existing exposed worn dock area and construction of a wider deck area (total 400 sq. ft. = 20ft by 20ft.) at the end of an existing dock. The project includes placement of six concrete footings for six to eight new steel support piers for the new deck area. Top boards only will be replaced on the existing dock. No removal of support structures is anticipated. The pier connection to the existing stem wall will not be disturbed. The deck material above the waterline might be a poly product called "Trek" with a cedar fascia board below it or hardwood called "Ironwood". Equipment includes a cement mixer, hand shovels, and hand tools.	<b>NOE</b>	
2014088408	PW 3482; Intersection Improvements for Second Street and East Madison Avenue El Cajon, City of El Cajon--San Diego Project will widen a section of East Madison Avenue, install new left turn lanes, relocate a traffic signal, and construct new curb gutter, sidewalk, curb ramp, and driveways improvements.	<b>NOE</b>	
2014088409	Street Overlay, and Repair 2014 -PW3486/Bid Number 009-15 El Cajon, City of El Cajon--San Diego Project will overlay approximately five (5) miles of streets with tire modified asphalt concrete to improve the ride of the road and increase the road surface life expectancy. The project will also include the replacement of a damaged driveway and sidewalk panels, curb and gutter and a repair of a cross gutter.	<b>NOE</b>	
2014088410	Whitney Creek Berm Project Caltrans #2 Weed--Siskiyou Project will extend an existing berm on the west bank of Whitney Creek 750' to an existing culvert passing under SR 97. Whitney Creek 750' to an existing culvert passing under SR 97. Whitney Creek is currently jumping the west bank where material flows down to the highway. The berm will contain flows to the existing channel and will be constructed of debris from within the channel.	<b>NOE</b>

2014088411	Replace AC Surfacing Caltrans #2 --Lassen Place 0.10' of hot mix asphalt overlay with digouts. All work will be done within the existing roadbed hinge points. The project will require staging within existing pullouts and will be constructed 2015, taking 30 working days to complete.	<b>NOE</b>	
2014088412	Point Reyes National Seashore 2014 Stock Pond Maintenance Project Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland --Marin Proposed project would maintain nine stock ponds for both livestock and California red legged frog (CRLF) breeding habitat.	<b>NOE</b>	
2014088413	Relocation of National Tribute Grove Memorial Stone and Marker Parks and Recreation, Department of --Del Norte Relocate the National Tribute Grove memorial stone and marker ("memorial") from its current highway-side location to the day-use area of Jedediah Smith Redwoods SP to provide parking and safe access for public viewing.	<b>NOE</b>	
2014088414	Liberty Energy Utility Line Clearance - TC 7100 / TC 7300-6 / 1002 Bijou St Tahoe Conservancy --El Dorado, Placer This project involves the trimming and removal of dead, dying, diseased, insect infested and suppressed trees near utility structures and contains a secondary benefit of reducing forest fuels for forestry and fire hazard reduction purposes.	<b>NOE</b>	
2014088415	Increase to Residential and Commercial/Industrial Development Fees Turlock Unified School District Turlock--Merced, Stanislaus The fees provide for the school construction needed to address the unfunded needs resulting from new development. The fees are authorized by statute and made applicable to residential and commercial industrial development.	<b>NOE</b>	
2014088416	Temporary Emergency Permit for Treatment of Hazardous Waste, Bio-Rad Laboratories - Hercules Toxic Substances Control, Department of Hercules--Contra Costa DTSC has issued an emergency permit to the Bio-Rad Laboratories - Hercules to treat hazardous waste by chemical stabilization. These items are expired and currently being stored in the building at 200 Alfred Nobel Drive, Hercules, CA 94547 (see Section 7.0 of the Permit Application). It has been determined that these materials may be highly reactive (TNP, TNBS, HOBt being shocked sensitive and BPO, AIBN being temperature/shock sensitive) and should be chemically stabilized as a safety precaution prior to being transported offsite by Clean Harbors Environmental Services (CHES). The treatments involve the addition of: DI Water for TNBS, HOBt and AIBN; DI Water and Alcohol to TNP; and Inert Solid/DI Water to BPO to dilute/destroy the chemicals in container(s). CHES personnel are scheduled to arrive at the facility sometime between Sept. 2 and Sep. 30, 2014 to conduct the treatment operation.	<b>NOE</b>
