STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

August 16 – 31, 2015

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **August 16 – 31, 2015**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

<u>Documents Received on Monday, August 17, 2015</u>			
2015-13	Santa Ynez Band of Chumash Mission Indians of the Santa Ynez Reservation, CA APNs: 143-252-01, 02; 143-252-01, 02. Bureau of Indian Affairs Santa Barbara--Santa Barbara Note: Reference SCH# 2005-17	BIA	09/15/2015
	<p>The subject property encompasses ~2.11 acres more or less, commonly referred to as APNs (referenced in title) - Mooney and Escobar. The property is adjacent to highway 246 which runs along the Santa Ynez Reservation and is contiguous to the Reservation.</p> <p>The Tribe has no plans to change the use of the subject property. By placing the parcels into trust, the Tribe is able to irrigate the landscaping with recycled water generated by the Tribe's wastewater treatment plan, instead of the potable water which is now currently used. The purpose of the proposed fee-to-trust transfer will be to maintain such uses under the jurisdiction of the Tribe for future long range planning, including the ability to use its resources in a more environmentally proactive way. The property will serve to enhance the Tribe's land base, which supports tribal self-determination.</p>		
2013121077	Wolter Properties LP (Carmel Canine Sports Center) Monterey County Carmel-by-the-Sea--Monterey Use Permit and Design Approval for the development of a canine training/sports facility and event center for daily member usage and up to 24 "event days" (daily maximum of 250 people/300 dogs) per year, and related improvements. Modular (temporary) structures to include a 700 sq. ft. office trailer, 600 sq. ft. members trailer, 600 sq. ft. restroom trailer and 400 sq. ft. electrical/storage room. Site to also accommodate up to 70 recreational vehicles on a short-term basis during "events" (Maximum of 24 nights per year).	FIN	
2015081040	Live Oak Lanes Buellton, City of Buellton--Santa Barbara The proposed project consists of a Final Development Plan (13-FDP-03) for two contiguous buildings that encompass: a 49,790 sf Family Entertainment Center (42,172 sf on ground floor and 7,618 sf on second floor), which includes a bowling alley and other amenities as described below; an 18,470 sf warehouse facility; and parking and landscaping in support of those facilities. There would also be a lighted 5-stall batting cage and bocce ball courts outside the building adjacent to the Family Entertainment Center. The 5.08-acre property is located at the south end of Industrial Way, and includes two parcels (APN 099-690-045 and 099-690-046) The larger "Parcel 1" (4.01 acres) will be developed into the Family Entertainment Center and required parking, while the smaller "Parcel 2" (1.07 acres) will be developed with the warehouse facility.	MND	09/15/2015
2015082037	Peak 10 Multi-Family Residential Redevelopment (PLN15-00255) Placer County --Placer The applicant proposes a Conditional Use Permit for a Planned Residential Development and Subdivision in order to construct up to ten single-family Planned Residential condominium units within Lot A, a common area lot. Lot B will also be	MND	09/15/2015

	created as a common area lot, with no proposed improvements.		
2015082038	Tatom Zone Change (Z-15-02) and Tentative Parcel Map (TPM-15-02) Siskiyou County --Siskiyou The site is located within the McCloud Community Services District; water and sewer would be provided by the CSD. The project is a proposed rezone of a 15.12-acre project site from Planned Development - Commercial Highway (PD - C-H) and Commercial Highway (C-H) to Single-Family Residential (Res-1), as well as a proposed parcel map to subdivide said property into four lots, ranging in size from 2.09 to 3.04 acres, and a 4.58-acre remainder. Access to parcels 1, 2, 3, and 4 would have direct access to Haul Road, and the remainder parcel would be access via Forest Road.	MND	09/15/2015
2015082039	Burgstrom Minor Land Division Santa Cruz County --Santa Cruz The project proposes to divide a 13.06 acre parcel into two parcels of 6.49 acres (Parcel A) and 6.57 acres (Parcel B). Parcel B is developed with a single-family residence which was completed in 2002. The project requires Minor Land Division and LAFCO Extraterritorial Water Service approvals.	MND	09/15/2015
2015082040	James Johnstone Coastal Development Permit Humboldt County Trinidad--Humboldt A modification to a previously approved Coastal Development Permit and Special Permit (CDP-04-32/SP-04-40) in order to construct a single family residence. The scope of development includes a 2-story 2,198 sf single family residence that will have a maximum height of 25-27 feet, a 708 sf garage and storage area, 408 sf of decking, an on-site wastewater treatment system, a paved driveway, and four- to six- foot retaining walls to accommodate the driveway. The parcel will be served by water from Seawood Estates Mutual Water Company. A Special Permit is required for Design Review, removal of three trees, a parking exception due to topographical constraints, and a reduction to a 50-foot setback from a stream.	MND	09/15/2015
2015081039	South Education Center Palomar Community College District San Diego--San Diego The proposed project would establish the PCCD South Education Center by converting the existing four-story, 110,000 sf building into a comprehensive community college education center; make improvements to the existing parking structure; erect a new 1,000 sf free-standing PCCD campus police facility; construct an approximately 1,238 foot-long looped road connecting the existing parking lot to the existing parking structure; construct drainage improvements; and install walkways, hardscape areas, and landscaping.	NOP	09/15/2015
2015082041	PA-1500115 Specific Plan III Amendment Application and Three Revisions of Approved Actions Applications San Joaquin County --San Joaquin The Specific Plan III Amendment would add text that would enable third party mineral rights owners the ability to explore and extract mineral resources that exist for parcels located within the SP III planning area for the Mountain House Community. Also add a map figure showing the mineral rights boundary and conceptual surface entry locations within the SP III Planning area.	Neg	09/15/2015

<u>Documents Received on Monday, August 17, 2015</u>			
	The three Revisions of Approved Actions applications would amend the Conditions of Approval for PA-05-144; PA-05-145; PA-06-641 (SU) to include a condition stating that a surface entry site may be provided on original parcels encumbered by third party surface entry rights to access minerals.		
2011072055	Homes at Deer Hill (Terraces of Lafayette Project Alternative) Lafayette, City of Lafayette--Contra Costa "The Homes at Deer Hill" - Terraces of Lafayette Project Alternative, O'Brian Land Company, LLC (Applicant), AMD Family Trust (Owner), APO & R-20 Zoning: Proposal to construct 44 single-family residences and community park facilities including a multi-purpose athletic field, playground, multi-use trail, dog park and associated parking at 3312 & 3233 Deer Hill Road. APNs 232-150-027 & 232-140-016. (GP-15 & RZ01-15)	NOD	
2011122009	Use Permit 09-015 (Leaf) Shasta County --Shasta The project is an approximately 20-acre of a 140-acre parcel located in the Big Bend area at the end of Hot Springs Road, approximately 0.45 miles west of the intersection of Hot Springs Road and Big Bend Road. The applicant has requested approval to modify an approved conceptual development plan and standards adopted with the Commercial Recreation (C-R) zone district that applies to the property. The applicant has also requested an exception from Shasta County development standards that require parking areas and driveways to be surfaced with asphalt.	NOD	
2012051075	Daily II Tank Project Eastern Municipal Water District Menifee--Riverside SWRCB, Division of Drinking Water (Division), as the responsible agency, will be issuing a water supply permit. The Eastern Municipal Water District proposed project is for the construction of a two million gallon water storage reservoir (Daily II Tank).	NOD	
2015052044	Shells Road Bridge (No. 39C-0180) Replacement at Central California Irrigation District Main Canal BRLO-5938 (192) Stanislaus County Newman--Stanislaus The proposed (replacement) bridge would have a 32-foot clear width with two 12-foot travel lanes and two 4-foot shoulders as prescribed by the County standard 3-A5 and AASHTO for a facility carrying an Average Daily Traffic (ADT) count of 309 with a truck ADT of 14.7 percent. The proposed bridge structure would be single-span and approximately 77 feet long with a total bridge deck width of 34.8 feet (32 feet of clear width). The roadway profile of the replacement bridge would be on a higher vertical alignment in order to improve the hydraulic performance of the canal crossing and allow debris to flow under the bridge. In order for the replacement structure to provide equal or greater hydraulic capacity, the soffit of the replacement bridge would be set 12 inches higher than the high water elevation, which would increase the roadway profile by about 20 inches. The roadway approach work would extend approximately 200 feet east and west of the new bridge. Constructing the proposed bridge on the higher vertical roadway profile would require the acquisition of the right-of-way on either side of the bridge or would require the construction of retaining walls along the length of	NOD

	the roadway to retain the new approach fill.		
2015061059	Photovoltaic Solar Generating Project Valley Sanitary District Indio--Riverside The project would consist of installing 1,000 to 1,200 PV panels on ground-mounted fixed plane racks in rows covering approximately 2.5 acres located generally in the northwest corner of the VSD site. The project would generate ~1 megawatt of electricity to provide 50% of the electrical demand required by current VSD Operations.	NOD	
2015089020	Lake or Streambed Alteration Agreement No. 1600-2015-0261-R1 for NTMP 1-94NTMP-009MEN "Macdonald Ranch" Forestry and Fire Protection, Department of --Mendocino CDFW is issuing an agreement for up-grading culverts and rocked ford crossings in Class III watercourses.	NOD	
2015088152	Greenville and Patterson Vegetation Removal Water Resources, Department of Livermore--Alameda DFD staff shall remove vegetation at a site located between the South Bay Aquaduct and a private property off Greenville Road. The mowing and weed eating boundaries are from the entry gate off Greenville Road to the north eastern edge of the private property fence lines, approximately 750 feet along the canal, and from along the property fence lines to the edge of the 4:1 slope. DFD staff shall remove vegetation at a site located between the South Bay Aquaduct and a private property off Patterson Pass Road. The mowing and weed eating boundaries are from the private property lines within DWR right of way to the edge of the 4:1 slope and from the entry gate at Patterson Pass Road for approximately 350 feet south along the canal.	NOE	
2015088157	California Aqueduct (CAAQ) Burn and Vegetation Removal Project Water Resources, Department of Byron--Alameda, San Joaquin, Stanislaus DFD staff shall remove all vegetation and tumbleweeds from both sides of the primary and secondary roads along the specific portions of the CAAQ. On the upland side of each road, removal shall extend from the v-ditch located along the road and up to several feet into the adjacent hillside. On the canal side of each road, removal shall include the entire 4:1 slope between the canal and the road. The project footprint includes approximately 400 acres of land and 70 miles of roads.	NOE	
2015088158	Bethany Dams Vegetation Removal Water Resources, Department of Byron--Alameda DFD staff and CCC crews shall remove all vegetation from waterside and landside faces of Bethany Forebay Dam, Dam No. 1, Dam No. 2, and Dam No. 3, per Division of Safety of Dams. Silt and debris shall be removed from all culvert openings and concrete v-ditches along the dams, as well as from v-ditches along the roadways leading to the dam structures.	NOE

	(Grocery Outlet bargain market) within an existing 14,546 sf lease space in an existing commercial building with 170 shared parking spaces on an approximately 107,088 sf site, with proposed hours of operation from 7:00 am to 10:00 pm daily. The project includes a change in tenants and tenant improvements.		
2015081048	ENV-2015-1564-MND, CPC-2015-1564-CU-SPR Los Angeles, City of Los Angeles, City of--Los Angeles Refer to MND received on 09/14/2015	MND	
	The proposed project is for the construction, use, and maintenance of a new public charter middle school and high school that will function as two separate schools, sharing common space and parking. The facility would be two-stories within 30 feet of height, consisting of approximately 65,900 sf, serving a maximum of 1,050 students on a 74,930 sf site. Two existing single-family dwellings will be demolished as a part of the project. Parking for teachers, students, and visitor will be provided on-site within a one-level subterranean garage with 101 spaces and 17 short-term surface parking spaces will be provided in front of the school for pick-up and drop-off activities. The school proposes to utilize a public address system and bells. Hours of operation are proposed from 7:30 am to 7:30 pm Monday through Friday.		
2015081042	Sycamore Canyon Business Park Building 1 and 2 Riverside, City of Riverside--Riverside The proposed project consists of the grading, construction, and operation of a total approximately 1.4 million square feet of light industrial office and warehousing contained within two buildings on site, which will be subdivide into two parcels. Building 1 will be sited within the southern three-quarters of the project site and will include 72 dock doors along the east side of the structure and 75 dock doors along the west side of the structure, 444 parking stalls, and 359 trailer stalls. Building 2 will be sited along the northern quarter of the project site and will include 48 dock doors along the south side of the structure, 191 parking stalls, and 80 trailer stalls. Building 1 will be approximately 41 feet in height from grade, and Building 2 will be approximately 37 feet in height from grade.	NOP	09/16/2015
2015082042	Samaritan Medical Center Master Plan San Jose, City of San Jose--Santa Clara The project is the demolition of existing medical office buildings and improvements on the entire 13-acre project site, and redevelopment of the project site with five new, state-of-the-art buildings containing 475,250 sf of space designed for medical offices and related uses. This equates to a net increase of 364,726 sf of space on the site over existing conditions. The project would also include construction of three parking structures. The proposed buildings would be constructed in five phases. The installation of a traffic signal at the intersection of Samaritan Drive and Samaritan Court is also included in the project. 2015089024	<p>Amending the Water Quality Control Plan (Basin Plan) for the San Francisco Bay Region to establish a total maximum daily load (TMDL) for fine sediment in the Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland --Marin</p> <p>The Basin Plan amendment incorporates a sediment TMDL to restore properly functioning streambed substrate conditions and also a related plan to enhance stream-riparian habitat complexity and connectivity in the Lagunitas Creek watershed. Control actions are focused on sediment discharges from unpaved and paved roads and actions to control channel incision via construction of engineered log jams and reconnection of the channel to its floodplain (in channel reaches bordered by State and federal parklands).</p> <p>Lagunitas Creek provides essential habitat for federally-listed endangered coho salmon, steelhead trout, and California freshwater shrimp, and notably the largest population of coho salmon south of Mendocino County. Besides loss of habitat due to dams, the most significant cause for coho salmon and steelhead population declines is channel incision. Channel incision reduces the frequency of gravel bars and pools, side channels, and alcoves, and results in disconnection of the channel from its floodplain. Channel incision also is the largest source of sediment to the watershed.</p>	NOD

2015088194	Transmission POles 1118 and 1118A Replacement Project Sacramento Municipal Utility District Sacramento--Sacramento Improve and ensure safe and reliable electric service in Sacramento County, SMUD will replace two wood transmission poles supporting 115 kilovolt (kV) conductors that were damaged during the 2014 fire in the American River Parkway south of Cal Expo, Sacramento, California (within an existing easement). The two transmission poles are located in a seasonal wetland dominated with sandbar willow, south of Bushy Lake SMUD proposes to replace the 75-foot-tall and 80-foot-tall wood poles with hybrid poles (concrete base and steel upper sections) that are approximaely 71 and 80 feet above ground, respectively.	NOE	
2015088195	County Government Center Ocean Friendly Garden Ventura County Watershed Protection District Ventura--Ventura The County of Ventura has proposed a project to replace approx. 1780 sq. ft. of turf grass with an Ocean Friendly Garden consisting of drought tolerant native or climate appropriate plants. The project includes removing existing turf grass, minor grading to retain stormwater, soil preparation and planting. Project benefits include infiltration of stormwater runoff resulting in less water usage required for irrigation and also improvement of receiving water quality by removing various pollutants that are typically present in the runoff from the existing adjacent impervious surface areas. No trees will be removed as a part of this project. All proposed work would occur within the existing County Government Center property.	NOE	
2015088196	Bannister House Bathroom Repairs, California Citrus SHP (15/16-IE-1) Parks and Recreation, Department of --Riverside The bathroom in the Bannister House at CA Citrus SHP, currently a ranger residence, is dilapidated and in need of repairs. The bathroom will need to be gutted and rebuilt. All fixtures and flooring will be removed, joists inspected and possibly replaced, and rotted subfloor replaced. Drains will be inspected and toilet	NOE

2013111026	Vision 2020 Facilities Master Plan Orange Coast College Costa Mesa--Orange The proposed project involves construction of approximately 1,238,542 assignable square feet of new academic, administrative, residential, and parking facilities on the Orange Coast College campus. In addition to new construction, the proposed project would involve the renovation of two existing buildings, totaling approximately 54,000 ASF and demolition of approximately 200,900 ASF. A new Planetarium, an 818-bed student housing project, and a parking structure would be added to the campus. The proposed project would also involve improvements to the pedestrian circulation network in and around campus and the enhancement of open space areas through landscape and pedestrian plaza improvements. Construction of the proposed project would result in the reconfiguration of existing parking lots and vehicular entryways.	EIR	10/05/2015				
2015081053	Calle Joaquin Hotel Development San Luis Obispo, City of San Luis Obispo--San Luis Obispo Proposed 69,293 sf, 4-story, 114-unit extended-stay hotel on a 2.84-acre parcel. Maximum height would be 45 feet. Amenities include: outdoor swimming pool, fire pits, and barbecue patio surrounded by noise wall; guest laundry; fitness room; breakfast buffet room with tables and serving areas; breakfast patio; and a meeting/multi-purpose room. Occupancy would be 221 persons, including 206 guests and 15 employees. Onsite parking spaces include: 117 vehicular, 6 motorcycle, and 8 bicycle. Project includes onsite landscaping, signage, exterior lighting, and stormwater management. Estimated ground disturbance: 2.84 acres.	MND	09/18/2015

2015082047	Crain Park Master Plan Paradise Recreation & Park District --Butte The PRPD proposes to improve approximately 0.4 acres of the Crain Park site with various recreational amenities and facilities which would support passive recreation and create a public gathering space. The proposed project would serve as a community park and be open to public use in the hours between dawn to dusk. Park hours may be extended for approved special events. The project consists of the following components: parking lot, playground area, picnic tables and barbeque area, restroom facility, landscaping.	MND	09/18/2015
2014121046	National City Marine Terminal Tank Farm Paving and Street Closures Project & Port Master Plan Amendment San Diego Unified Port District National City--San Diego Note: Extended Review The Project includes the following components: (1) Paving of the former National City Marine Terminal (NCMT) Tank Farm; (2) Closure of portions of Quay Avenue and 28th Street; (3) a Port Master Plan Amendment (PMPA) to remove the streets from the Port Master Plan; and (4) Potential renewal of four short-term use permits. The proposed tank farm and street closure site encompass approximately 9.7 acres, and the four short-term use permit sites are divided between four areas in National City that comprise approximately 47.3 acres. Combined, the overall Project site covers approximately 57 acres. The Project will provide additional space for marine terminal operations, including primarily import, export, handling, and storage of motor vehicles and may also include cargo transported aboard a Pasha Hawaii Transport Lines vessel.	NOP	09/28/2015
2015082048	Alameda-North Bay Farm Island Pipeline Crossings Project East Bay Municipal Utility District Alameda, Oakland--Alameda The project involves the construction and operation of three transmission pipeline segments (24-inch diameters) within Alameda County in the City of Oakland, the City of Alameda, and on North Bay Farm Island (also in the City of Alameda). The proposed pipelines would be located within existing city streets, one business park parking lot, Towata Park, and underneath the Oakland Inner Harbor, Tidal Canal, and San Leandro Bay Channel surrounding Alameda Island. 	Section 17.652.060(I) of the Tuolumne County Ordinance Code. The proposed signs include two attached 97.5 sf signs, one facing Parrotts Ferry Road and the other Howser Lane, and one detached 32 sf monument style sign.		
2015021080	Remedial Action Plan, for Soil and Groundwater at the Former Service Chemical Facility Toxic Substances Control, Department of Santa Ana--Orange Note: Response to Comments	Oth	
	This Initial Study evaluates the environmental impacts from implementation of a proposed Remedial Action Plan and Feasibility Study, herein referred to the RAP and/or the Project. The Project is proposed on approximately 0.5 acres of land located at 1341 East Maywood Avenue, in the City of Santa Ana, County of Orange, CA. The RAP was prepared in consultation with the Department of Toxic Substances Control, pursuant to Health and Safety Code Section 25356.1. The anticipated schedule for implementation of the RAP is approximately 20 months.		
2004112063	Master Permit for Env. Enhancement Projects Santa Cruz County Capitola--Santa Cruz The project is limited to the following activities located on Soquel Creek removal of 1,500-2,000 cy of rock from above the 5-yr water surface elevation along 1,500 linear ft of stream to create new flood terraces, stabilization of the toe of an active landslide, installation of rock barbs and large woody debris, creation of inset flood terraces and creation of at least one high flow secondary channel to reconnect the channel with a portion of its floodplain. CDFW is executing a Lake and Streambed Alteration agreement no. 1600-2015-0174-R3 pursuant to section 1602 of the fish and game code to the project applicant, Chris Coburn, Resource Conservation District of Santa Cruz County.	NOD	
2011122032	Cabin Creek Biomass Facility Project Placer County Truckee--Placer The project proposes to construct a two-megawatt (MW) wood-to-energy biomass facility that would use a gasification technology at the Eastern Regional Materials Recovery Facility (MRF) and Landfill. The proposed project would include construction of an approximately 11,000 square-foot, two-story structure to house the power generating and emission control equipment, an approximately one-acre material storage area including a 7,000 square-foot open aired pole barn structure, and additional onsite improvements to support operations at the facility.	NOD	
2013062024	Rio Linda Boulevard Bridge Replacement Project Sacramento, City of Sacramento--Sacramento CDFW has executed lake and streambed alteration agreement no. 1600-2015-0092-R2, pursuant to section 1602 of the fish and game code to the project applicant, City of Sacramento, Department of Public Works.	NOD	
2013091009	Pasadena General Plan Update Pasadena, City of Pasadena--Los Angeles The proposed project is the adoption and implementation of an update to the City of Pasadena General Plan and specific plan amendments to update the development caps within each specific plan area. 	<p>the Land use and Mobility Elements and Land use Diagram. The update also includes the consolidation of optional elements into required elements of the General Plan. The Land use and Mobility Elements, together with the other General Plan elements, would guide the overall physical development and circulation of the entire City through horizon year 2035.</p>		
2013101098	<p>Wet Weather Intermittent Stream Discharge San Diego, City of --San Diego</p>	NOD	
	<p>The project proposes the creation of an access roadway, installation of piping and dechlorination systems, and upgrades to the existing storm water outfall structure. The upgrades to the storm water outfall structure consist of installing a rip rap apron to dissipate energy and slow down velocity of the discharged water to prevent erosion. Approximately 245 cy of riprap will be used to construct the apron.</p>		
2014022015	<p>Pacific Gas and Electric Manufactured Gas Plant Toxic Substances Control, Department of --Tehama</p>	NOD	
	<p>The project is limited to the remedial activities to address elevated levels, VOCs, SVOCs, PAHs, and TPH in soil, soil vapor and groundwater, and lead in the soil at the site that resulted from the operation of the former Red Bluff MGP. Specific work includes: excavation and offsite disposal of approximately 4,000 cy of shallow-zone contaminated soils (0-10 ft deep); in-site solidification/stabilization treatment of approximately 2,000 cy of deep zone contaminated soils (10-35 ft deep); backfilling, compacting and grading of excavated sites with clean fill; and revegetation activities as per the Pacific Gas and Electric Manufactured Gas Plant, IS/MND for impacts on property owned by BOR (including SR 36 right of way).</p>		
2014101018	<p>Squaw Mountain Road Bridge Repair Project Riverside County Transportation Commission Corona--Riverside</p>	NOD	
	<p>The Squaw Mountain Road Bridge Repair Project includes repair of the bridge by lining the channel bottom below the bridge with concrete, connecting the concrete-lined channel to the existing bridge abutments, placing 1/4 ton of riprap on the upstream and downstream sides of the concrete-lined portion of the channel and installing riprap slope protection on the northwest slope. An existing asphalt access road will also be extended approximately 40 ft.</p>		
	<p>There is also a side tributary to Coldwater Wash that was previously realigned for the Painted Hills Development Project and was intended to flow adjacent to Squaw Mountain Road before entering the wash. As a result of significant degradation of the channel wash, the side channel has head cut back from the wash and is now eroding into the slope of Squaw Mountain Road and needs to be stabilized. The proposed repairs would consist of regrading the upper portion of the channel to the appropriate elevation, leaving this portion of the channel as a natural drainage. Flow would be directed to a basin before entering into a pipe that would outlet at the base of the slope in Coldwater Wash.</p>

	certified by the City of Lake Forest City Council on May 15, 2012. The Shea/Baker Ranch certified SEIR was not challenged within the time period prescribed in subdivision (c) of Public Resources Code section 21167 and thus the SEIR is presumed valid in accordance with Public Resources Code section 21167.2. The proposed Site Development Permit is consistent with the scope of the approved Area Plan and Tentative Tract Map 16466. Therefore, the certified SEIR serves as the environmental documentation for the project and the project is in compliance with the requirements of CEQA.		
2005121098	Sugarbush Residential Development Project San Diego County San Marcos, Vista--San Diego CDFW has executed Lake and Streambed Alteration Agreement no. 1600-2014-0197-R5, pursuant to section 1602 of the fish and game code to the project applicant, Meritage Homes of California, Inc.	NOD	
	The Sugarbush Residential Development Project includes the new development of 45 single family residences, roads, and associated infrastructure on a 115.5 acre property. On-site stream impacts include replacing portions of streams with underground storm drains and fill to establish building pads and an internal road. Off-site stream impacts are due to improvements of a secondary emergency access across Buena Creek. Riparian vegetation will be impacted along Cleveland Trail to accommodate road improvements between Buena Creek Road and the development. The project will permanently impact up to 0.06 acre of stream habitat, temporarily impact up to 0.02 acre of stream habitat, and re-establish a minimum of 0.12 acre of stream habitat as compensatory mitigation.		
2013072021	Offshore Geophysical Permit Program Update California State Lands Commission -- The California State Lands Commission has statutory authority, pursuant to Public Resources Code section 6826, to issue geophysical permits in State waters to qualified permittees for the use of low energy geophysical equipment to perform geophysical surveys of the ocean bottom, subject to specified terms and conditions. The California State Lands Commission is issuing a three-year non-exclusive geophysical survey permit to the following entity: eTrac., Inc.	NOD	
2014042033	Plymouth Wastewater Treatment Plant Improvements Plymouth, City of Plymouth--Amador Installation of a new floating outlet, modifications to the existing outlet and seepage return system, and minor grading of the reservoir.	NOD	
2014071057	Owens Lake Dust Mitigation Program - Phase 9/10 Project Los Angeles, City of --Inyo The City of Los Angeles Department of Water and Power is currently implementing the Owens Lake Dust Mitigation Program on Owens Lake in order to reduce emissions of particulate matter less than or equal to 10 microns in diameter (PM10). LADWP will construct and operate dust control measures (DCMs) on 3.61 sq miles on the lake in compliance with Orders from the Great Basin Air Pollution Control District (GBUAPCD). The State Lands Commission action is an amendment of a 20-yr General Lease - Public Agency Use through April 30, 2019.	NOD

2014108074	Luther Pass Power and Control Project South Tahoe Public Utility District South Lake Tahoe--El Dorado The South Tahoe Public Utilities District (District)'s Luther Pass Pump Station (LPPS) was originally constructed in 1968 and has operated continuously since that time to convey treated wastewater out of the Tahoe Basin in compliance with the 1967 Porter-Cologne Water Quality Control Act. LPPS receives wastewater that has been pumped from the District's storage facilities in A-Line to two storage tanks located at LPPS. LPPS conveys this wastewater to to the District's storage facilities in Alpine County by way of the B-Line and C-Line, lifting the water 1240 vertical feet over Luther Pass. At this facility a new electrical building to house switchgear, motor controllers, battery bank and SCADA control panel are necessary for continued operation.	NOE	
2015088230	Railroad Avenue Roadway Improvements Blue Lake, City of Blue Lake--Humboldt The proposed project will rehabilitate and improve a section of Railroad Avenue in the City of Blue Lake and will include the following activities: 1) resurface roadway pavement 2) upgrade ADA facilities; 3) add bike route signage and signage and striping; and 4) add traffic calming features.	NOE	
2015088231	U.S. 50 - Phase 2 Waer Quality Caltrans #3 South Lake Tahoe--El Dorado The primary objectives of the project is to collect and treat highway storm water runoff in compliance with National Pollution Discharge Elimination System Permit requirements and Treatment Best Management Practices. In addition, the project will implement pavement rehabilitation and operational improvements.	NOE	
2015088232	Drought Measures Caltrans #3 --Nevada, Sacramento, Placer Caltrans is proposing to modify the irrigation system on State Routes 20, 51 and Interstate 80 in Nevada, Placer and Sacramento Counties. Lid-locking pull boxes with concrete aprons, the irrigation mainline, irrigation lateral lines, remote control valves, and control and neutral conductor (CNC) wiring will be installed.	NOE	
2015088233	Butte 99 Drought Measures Caltrans #3 --Butte Caltrans is proposing to modify the irrigation system on State Route 99 in Butte County. The irrigation mainline, lateral lines, remote control valaves, and control and neutral conductor (CNC) wiring will be installed from 0.05 mile south of Lindo channel to the E. Lassen Avenue undercrossing.	NOE	
2015088234	Pave to Median Gores and Install Vegetation Control Under Metal Beam Guardrail Caltrans #4 Fairfield, Vacaville--Solano The purpose of this project is to minimize the frequency of highway worker exposure to traffic by providing safe access to work areas and by providing features to reduce repetitive maintenance activities.	NOE

2015088235	American River Parkway Enhancements at Sutter's Landing Project (Streambed Alteration Agreement No. 1600-2015-0132-R2) Fish & Wildlife #2 --Alameda Project will modify approx. 2/3 mile segment of gravel service road at the toe of the existing levee to incorporate a paved multi-use trail above the American River. The project will place several inches of aggregate base on top of the existing gravel and then place 3 inches of asphalt surfacing on top of the gravel/aggregate. In addition, Permittee proposes to restore floodplain habitat by removing non-native ruderal vegetation and installing approx. 4,000 native herbaceous small container plants. Restoration and planting will be done using hand tools.	NOE	
2015088236	Geotechnical Exploration at Clifton Court Forebay Water Resources, Department of Byron--Contra Costa DWR proposes to conduct geotechnical exploration to obtain data to support the development of an appropriate geologic model, characterize ground conditions, and reduce the geologic risks associated with the construction of proposed water pumping plant facilities. Exploration methods would include bore hole drilling and Cone Penetration Tests (CPTs).	NOE	
2015088237	San Francisco-Oakland Bay Bridge East Span Seismic Safety Project; California Endangered Species Act (CESA) Incidental Take Permit No. 2081-2001-021-03 (ITP), Fish & Wildlife Marine Region Oakland--Alameda, San Francisco Major Amendment No. 4 Project involves removing and replacing the east span of the San Francisco Bay Bridge to provide earthquake relief access between San Francisco and the East Bay. The CDFW for purposes of this notice, has approved a major amendment to an incidental take permit (ITP) issued to Caltrans for the project pursuant to Fish and Game Code section 2081, subdivision (b). The ITP issued on Nov. 26, 2001, and amended on August 7, 2015, authorizes Caltrans to take Sacramento River winter and spring run Chinook (<i>Oncorhynchus tshawtscha</i>), Central Coast Coho Salmon (<i>Oncorhynchus kisutch</i>), and longfin smelt (<i>Spirinchus thaleichthys</i>), incidental to otherwise lawful project activities subject to various conditions of approval prescribed by the Fish and Game Code. All the species noted above are designated as either threatened or endangered under CESA. In issuing the major amendment, CDFW found, among other things, that all authorized impacts of the taking would be fully mitigated and that the project would not jeopardize the continued existence of any of the species.	NOE	
2015088238	Demonstration Cabin Installation Parks and Recreation, Department of --Monterey Install a pre-manufactured 'Wedge' demonstration cabin at Pfeiffer Big Sur State Park to give visitors the opportunity to experience this alternative camping method. The cabin will be installed in an existing campsite and be available for use for no more than 36 months.	NOE

	crossing of a minor unnamed drainage. Construction will take place between September - October 2015.		
2015081062	CUP No. C-14-041, City of Fresno Southeast Surface Water Treatment Facility Fresno, City of Fresno--Fresno Pursuant to the adopted City of Fresno Metropolitan Water Resources Management Plan Update ("Metro Plan"), CUP Application No. C-14-041 has been filed as an implementation measure to develop the City of Fresno Southeast Surface Water Treatment Facility (SESWTF) as a subsequent project identified in the Metro Plan and a facility critical to optimizing the conjunctive use of the City's available water resources to provide a sustainable, reliable, and safe drinking water supply. The SESWTF would have an ultimate capacity of up to 80 million gallons per day and would be sited on the 37-acre easterly parcel (APN 310-083-04) comprising the subject property. The plant will receive raw surface water via a 6-foot diameter underground water pipeline and will distribute treated potable water via large-diameter and standard water mains.	MND	09/22/2015
2015081058	Supplement to the Certified EIR Prepared for the LLUH Campus Transformation Project Loma Linda, City of Loma Linda--San Bernardino LLUAHSC, doing business as LLUH, is proposing revisions to its campus master plan which was reviewed in a Program EIR that was certified by the City of Loma Linda City Council in January 2014. The LLUH Campus Master Plan that was reviewed and approved consisted of a multi-phased development to construct new facilities and improvements to the existing campus facilities in order to accommodate growth in the services provided, and to meet regulatory requirements. The Master Plan, to be built-out in phases over 10-year period, includes construction of new facilities, modernization of existing facilities, and replacement of the 1967 portion of the hospital structure in response to California's SB 1953 Hospital Seismic Safety Act mandate. The existing campus and all improvements proposed in the Master Plan are in the City of Loma Linda;	NOP	09/22/2015
2015081063	West Cat Canyon Revitalization Plan Project Santa Barbara County --Santa Barbara All proposed project facilities would be located within an approximately 73-acre portion of the Applicant's 8,054-acre West Cat Canyon property holdings. Newly proposed project development would disturb approximately 21.11 acres of the proposed project area. Of the total project disturbance, 4.04 acres would be temporarily disturbed for the upgrade of the PUC gas pipeline and the permanent disturbance would consist of 17.07 acres for well pads and access roads. The proposed new Project production wells would be located on previously graded well pads whenever feasible. The sites are generally level or gently sloping, at an elevation that ranges between approximately 700 to 1,200 feet above sea level.	NOP	09/22/2015
2015082054	Corralitos Creek Diversion Operations and Maintenance Agreement Watsonville, City of Watsonville--Santa Cruz The Corralitos Creek Diversion and fish ladder is located on Eureka Canyon Road in Corralitos, Santa Cruz County, California approximately 1.3 miles north of the intersection with Hames, Corralitos and Browns Valley Roads. 	providing water to the Town of Corralitos and by 1896 to Watsonville. The City of Watsonville formally acquired the diversion facility in 1923 and continues to use it for municipal water supply.		
2015081061	Housing Element Update 2015-2023 Bakersfield, City of Bakersfield--Kern An update of the Metropolitan Bakersfield General Plan Housing Element for the 2015-2023 planning period. The Housing Element is a state-mandated element of the City's General Plan that must identify and analyze existing and projected housing needs of our community. It is a comprehensive city-wide planning document that includes a statement of goals, policies, quantified objectives, financial resources and programs for the preservation, improvement and development of housing. This Housing Element Update complies with the requirements of Government Code section 65580. The Housing Element identifies vacant residential land for future development that can be developed as proposed projects are brought to the City.	Neg	09/22/2015
2015082053	Tehama 2015 Regional Transportation Plan Tehama County --Tehama The Tehama 2015 Regional Transportation Plan is a 20-year planning document that guides transportation investments in Tehama County involving local, state, and federal funding over the next 20 years. There are no new roadways proposed as part of the RTP, and it does not directly provide for the implementation of transportation projects. It identifies necessary improvements in order to provide the best possible transportation/circulation system to meet the mobility and access needs of the entire county. As individual projects near implementation, it will be necessary to undertake project specific environmental assessments/review per CEQA/NEPA before each project is approved and implemented.	Neg	09/22/2015
2004071039	Shea / Baker Ranch Lake Forest, City of Lake Forest--Orange Site Development Permit 6-15-4804 provides for the construction of two-story single-family homes (one per lot) with attached two-car garages on 64 lots; and associated improvements, including driveway paving, parkway landscaping, and walls/fences. All lots are previously approved and rough graded per Tentative Tract Map 16466. Site Development Permit 5-15-4800 was evaluated in and contemplated by the SEIR that was prepared for the Shea/Baker Ranch project and certified by the City of Lake Forest City Council was evaluated in and contemplated by the Supplemental EIR that was prepared for the Shea/Baker Ranch project and certified by the City of Lake Forest City Council on May 15, 2012. The Shea/Baker Ranch certified SEIR was not challenged within the time period prescribed in subdivision (c) of Public Resources Code section 21167 and thus the SEIR is presumed valid in accordance with Public Resources Code section 21167.2. The proposed Site Development Permit is consistent with the scope of the approved Area Plan and Tentative Tract Map 16466. Therefore, the certified SEIR serves as the environmental documentation for the project and the project is in compliance with the requirements of CEQA.	NOD

2015062007	<p>Scotts Valley Transit Center LID Retrofit Project Scotts Valley Water District Scotts Valley--Santa Cruz</p> <p>The project proposes improvements to the existing stormwater control measures on the project site by improving water quality and increasing infiltration capacity through low impact development (LID) and landscape improvement features. All LID features would be located underground, within existing landscaped areas, or flush with the existing grade of the site and would not disrupt the existing pedestrian or vehicle circulation on-site. Landscape improvements, including efficient low water use and recycled water drought tolerant plantings, between the parking aisles will reduce erosion and sedimentation, increase shade, and improve aesthetics.</p>	NOD	
2015062088	<p>Stream Maintenance - Priority Projects 2015 Zone 7 Water Agency Pleasanton, Dublin--Alameda</p> <p>In order to provide integrated water resources management (including flood protection, water supply, and protecting water quality) within the Livermore-Amador Valley, Zone 7 conducts routine stream maintenance activities. The 2015 "priority" maintenance activities include five bank repair projects on engineered flood control channels within Zone 7's service area - four sites in Pleasanton and one in Dublin. Projects range from 30 to 120 linear feet.</p>	NOD	
2015088323	<p>ClearCreek Community Services District Water Treatment Plan Backwash Recycle Modification Project Clear Creek Community Services District --Shasta</p> <p>The Clear Creek Community Services District (District) formed in 1963 is a California Special District with approximately 2,700 water service units and an estimated 2,335 metered connections. Water is provided to approximately 9,000 users in an unincorporated area in Shasta County. The District service area encompasses approximately 19,000 acres or 29.6 square miles and abuts the City of Redding to the east. The District's primary raw water supply is obtained from the Whiskeytown Reservoir through the Clear Creek South Unit, Trinity River Division of the Central Valley Project as administered by the U.S. Bureau of Reclamation (USBR). The annual Water Service Contract is for 15,300 acre-feet and is classified as an Irrigation/Municipal and Industrial Contract.</p>	NOE	
2015088324	<p>Shoreline Park Sewer Repair Project - LA County Sanitation District Rancho Palos Verdes, City of Rancho Palos Verdes--Los Angeles</p> <p>The Los Angeles County Sanitation District requests a Coastal Permit to allow for the repair of a sanitary sewer known as joint outfall "J" unit 1E at Shoreline Park at the Ocean Trails Reserve. Said repair work includes the rehabilitation of a corroded concrete sewer pipe by relining approximately 44 feet of the pipe.</p>	NOE	
2015088325	<p>Russ Creek Debris and Vegetation Management Project (Lake or Streambed Alteration Agreement No. 1600-2015-0181-R1) Fish & Wildlife #1E Ferndale--Humboldt</p> <p>The project is limited to one encroachment to conduct as needed periodical and seasonal stream maintenance activities on the Belli property along an approximate half mile reach of Russ Creek. The activities are proposed to maintain stream flow capacity, help prevent out-of-channel stream flow diversion, reduce bank erosion,</p>	NOE

	conduct riparian enhancement, and exclude cattle from the riparian corridor. The activities will not substantially alter the stream bank topography.		
2015088329	SLO/MON Bridge Deck Maintenance Project (05-1G320) Caltrans #5 --San Luis Obispo, Monterey The Purpose of the project is to prevent major rehabilitation/replace of 11 bridge structures. The project is needed because the bridges are deteriorating and could worsen further if unmaintained.	NOE	
2015088330	California Aqueduct Reach 7 (MP 169.72) Erosion Repairs Water Resources, Department of --Fresno, Kings DWR's SLFD will repair erosion sites along the Aqueduct. Each site will be backfilled with the eroded material, additional fill would come from existing SLFD spoil piles. Once backfilled, each site will be re-constructed to pre-erosion Aqueduct embankment conditions. State Water Project contractors will benefit.	NOE	
2015088331	Sector Office Interpretive Panel Installation Parks and Recreation, Department of --Placer Install two interpretive panels in front of the sector office at Auburn State REcreation Area to provide the general public with information about the native fauna, flora and recreational opportunities.	NOE	
2015088332	Hamilton Creek Fish Passage Barrier Removal Project Parks and Recreation, Department of --Del Norte Remove a 72" x 40" culvert along Hamilton Creek, a tributary to the West Branch of Mill Creek at Del Norte Coast Redwoods State Park, to restore fish passage. The culvert has been identified as a barrier for fish passage to a high value reach of Hamilton Creek. Picnic Road runs over the culvert, providing access to old timber and road networks that are no longer needed.	NOE	
2015088333	South Bay Aqueduct (SBA) Levee Road Maintenance M.M. 16.30 to M.M. 15.72 Water Resources, Department of Byron--Alameda Routine maintenance activities will be performed on the secondary access road located adjacent to the SBA canal levee. The road is approximately 0.58 mile long by fifteen feet wide. A grader will be used to grade the access road beginning at MM 16.30 and ending at MM 15.72. The grader will also establish the v-ditch against the embankment by running it inside along the v-ditch removing sediment and re-cutting the grade. A dump truck will apply 3/4 inch aggregate base (AB) to the top of the graded access road.	NOE	
2015088334	Creston Tank Vegetation Removal Water Resources, Department of American Canyon--Solano Vegetation will be removed from surrounding fence line of Creston Tank, from the entry fence line up to and around the tank and vault structure to reduce fire risk. The mowing boundaries are approximately one acre and are within DWR right of way. Crews will use weed eaters, industrial flail arm mower, and loppers.	NOE

The applicant will conduct routine maintenance of facilities and structures within the Upper American River project as delineated. These maintenance activities may include bank stabilization, building maintenance, sediment removal, minor repair of existing structures and vegetation management.	NOD	
2009121006	Arroyo Simi Greenway Specific Plan: SP-S-28 / Z-S-677 / CUP-S-723 Simi Valley, City of Simi Valley--Ventura Adoption of the Arroyo Simi Greenway Specific Plan SP-S-28; approval of zone change Z-S-677 to apply the Specific Plan Overlay and Conditional Use Permit CUP-S-723 to allow construction of a multi-modal trail along the Arroyo Simi and various park improvements adjacent to the trail.	NOD	
2013021042	Groundwater Reliability Improvement Program (GRIP) Recycled Water Project Water Replenishment of Southern California Whittier--Los Angeles The proposed project would offset the current use of imported water with a combined total of 21,000 AFY for groundwater replenishment in the Central Basin via the Montebello Forebay. An AWT plant would be constructed for treatment of tertiary treated recycled water from San Jose Creek Water Reclamation Plant prior to recharge via spreading. Influent/effluent diversion structures would connect the AWT plant to the existing outfall pipeline allowing advanced treated water to be blended with tertiary treated recycled water prior to spreading. Additionally, a proposed brine would be constructed from the AWT plant to connect with an existing sewer pipeline in Beverly Road.	NOD	
2014081078	Fresno Recycled Water Distribution System Public Utilities Commission Fresno--Fresno Recycled water distribution pipelines operated by the City are currently limited to those used to apply agricultural users with reclaimed water from the Regional Water Reclamation Facility (RWRF), plus an approximately one-mile recycled water distribution pipeline that serves the Copper River development. Recycled water from the RWRF is not presently used for urban reuse, but would be with implementation of the Project and other future projects proposed under the City's Recycled Water Master Plan. The project would include installation of 22 miles of 8 to 54 in diameter recycled water distribution pipelines and a proposed pump station to convey recycled water for use in the southwest quadrant of the city.	NOD

2015032097	General Plan Amendment & Rezone Application No. PLN2015-0021 - Gallo Glass - Tenaya Drive Stanislaus County Modesto--Stanislaus Request to amend the General Plan Designation from Industrial Transition to industrial and rezone from R-1 (single family residential) to M (industrial) on 16 parcels, totaling 2.5+/- acres, to be used for storage and parking for Gallo Glass Company.	NOD	
2015042053	Use Permit Application No. PLN2015-0034 - Westside Hulling Association Stanislaus County Patterson--Stanislaus Request to expand an existing almond and walnut hulling operation by adding a 6,000 sf shop and four 10,000 sf agriculture storage buildings on a 20+/- acre parcel in the A-2-40 (General Agriculture) zoning district. APN: 016-031-014	NOD	
2015062094	Cal Waste Materials Recovery & Recycling Facility Expansion and Transfer Station Galt, City of Galt--Sacramento Cal Waste obtained a CUP in July, 2012 from the City of Galt to operate a MMRF with a conditional maximum capacity of 150 tons per day. Cal Waste sought approval to increase capacity of recycling materials to 480 tons per day. Cal Waste also sought approval to operate a 150 ton per day transfer station from the site. The initial study and negative declaration (IS/ND) evaluated whether the project operations would result in adverse impacts to the environment. The IS/ND determined that the project would not result in any potentially significant impacts and that mitigation measures would not be required.	NOD	
2015071023	Elkhorn Slough Tidal Marsh Restoration Fish & Wildlife #4 --Monterey This is a tidal marsh restoration project to be done through sediment addition in the Elkhorn Slough Ecological Reserve. It includes restoration of 147 acres of tidal salt marsh, ecotone and native grasslands. The site includes 104 acres of former tidal marsh that have subsided approximately 2' and no longer support vegetated marsh, and up to 43 acres of ecotone and ruderal grassland. The approach would use imported and onsite sediments to raise marsh and mudflat elevations and restore tidal marsh habitats in these areas. The elevation of the new marsh would be just over Mean Higher High Water and the ecotone and grassland would be planted with native ecotone and grassland plants.	NOD	
2015072013	Boss Commercial Project (PMPC 20140083) Placer County Auburn--Placer The project proposes a Minor Use Permit to allow for the construction of a commercial retail building, approximately 5,881 sf in size, which could accommodate one or more service or sales uses. The site would be improved with a new/replaced parking surface, additional landscaping and exterior lighting.	NOD

2015082062	<p>Brunswick Street Apartment Project Daly City Daly City--San Mateo The proposed project is a mixed-use project consisting of both residential and office/commercial uses. The project site totals approximately 1.15 acres. The land use designation is C-MU, which allows for both residential and commercial development. The proposed project's residential component is made up of 100% affordable senior housing with supporting office/commercial space on street level; both which are consistent with the Daly City General Plan and City Zoning Ordinances.</p>	SEA	09/28/2015
2002092005	<p>The Adoption of Revised Compostable Materials Transfer/Processing Regulations Resources Recycling and Recovery, Department of -- This project is the adoption of proposed regulations revising existing Compostable Material Handling Operations and Facilities Regulatory Requirements and adapting existing regulations to create a stand-alone, standardized regulatory framework for in-vessel digestion activities. The proposed project clarifies several feedstock definitions and the types of operations and facilities that can accept these materials; revises maximum metal concentrations allowed in compost; provides enforcement agencies with discretion to authorize temporary storage of additional material; revises inspection frequency language to ensure consistency throughout Title 14; provides operators and enforcement agencies with a mechanism to address chronic odor and identify sources of odor; establishes criteria for safe land application of compostable material; requires compost products to meet a physical contaminant limits; and clarifies small-scale composting requirements at sites, such as community gardens and schools. The proposed project provides a standardized regulatory framework for in-vessel digestion activities. Currently, in-vessel digestion activities are subject to either existing Transfer/Processing Operations and Facilities Regulatory Requirements or Compostable Material Handling Operations and Facilities Regulatory Requirements, depending on the nature of the feedstock and how it is handled. The proposed regulations combine portions of the transfer/processing and compostable material handling requirements into a stand-alone set of in-vessel digestion regulations.</p>	NOD

<u>Documents Received on Friday, August 28, 2015</u>			
2014042053	Sutter Bypass Collecting Canal Culvert Rehabilitation - Hughes Road Water Resources, Department of Yuba City--Sutter The project is limited to replacing a deteriorated and undersized 36-inch diameter corrugated metal culvert with a precast box culvert with dimensions: length 60 feet, width 7 feet, and height 5 feet. Precast concrete headwalls (width 11 feet by height 8 feet) with flared wing walls (angled 30 degrees from headwall surface) will be installed on the inlet and outlet. Once the culvert and headwall assembly are in place, a reinforced concrete apron will be poured to key the structure into the channel bottom, and approximately 5 tons of 18-inch minus revetment will be placed around each headwall to reduce erosion. Sutter Maintenance Yard (SMY) staff will perform all site work except traffic control and asphalt paving, which will be performed by the Sutter County Public Works Department. SMY staff will continue routine annual maintenance of the collecting canal within 50 feet of the culvert. This includes: removal of debris, spraying herbicide, mowing or burning of vegetation on slopes, dragging slopes, re-grading access roads, and minor erosion repairs. The increase water conveyance of the proposed culvert design will reduce the need to remove debris from the culvert inlet.	NOD	
2014071078	Homen Dairy Expansion Merced County --Merced Request to expand an existing dairy from 3,602 cows to 7,720 cows and construct a new shade addition, a heifer shade, a special needs barn, three new freestall barns, an exercise pen and an addition to an existing silage slab.	NOD	
2014081074	Mayflower Park Boat Launch Improvement Project Riverside County Regional Park and Open Space District Blythe--Riverside The proposal is to extend the existing boat ramp for pile guided boarding floats and aid in erosion at the bottom of the ramp. The extension of the ramp is approximately 30 feet long by 44 feet wide. Also included in the project is to construct four piles for five sections of eight foot wide by 20 foot long pre-manufactured boarding floats on the north side of the boat launch and installation of a drainage and filter (to collect and filter surface run-off at the top of the ramp to prevent run-off from parking areas from entering into the river), remove three median islands (with light poles) in the existing parking lot for added parking spaces, and add an accessible parking stalls and accessible path of travel from the parking lot for a full accessible pedestrian path of travel.	NOD	
2015061007	Santa Barbara County Regional Active Transportation Plan Santa Barbara County Association of Governments --Santa Barbara This plan provides an overview of bicycle and pedestrian travel, assesses current and future bicycle and pedestrian demand, and identifies needed bicycle and pedestrian infrastructure improvements in the Santa Barbara County region. This plan was prepared by the Santa Barbara County Association of Governments to meet the requirements of the Caltrans Commission's 2014 Active Transportation Program Guidelines, with input from member governments, advocacy groups, the public and various stakeholders. 	The project is limited to a pond restoration including an adjacent water development to reduce pressure on the livestock pond.		
2013122050	The 2014 Fisheries Restoration Grant Program Fish & Wildlife #2 Arroyo Grande--Mendocino CDFW has executed Lake and Streambed Alteration Agreement no. 1600-2015-0119-R3, pursuant to section 1602 of the fish and game code to the project applicant, San Mateo County Resource Conservation District.	NOD	
	Demolish existing vehicle ford at Sequoia Flat location and replace it with a permanent, pre-cast 15'-wide arched culvert. Modify existing concrete foundation of the seasonal dam by creating a v-notch approximately 37' wide with a max depth of 4.1', with a low-flow channel 2' wide by 0.5' deep. Modify wing walls of seasonal dam by removing them down to the level of existing riprap immediately downstream.		
2015041027	College Boulevard Mitigation Carlsbad, City of Carlsbad--San Diego Zone change associated with the enhancement and preservation of sensitive wetland and riparian habitat, as well as the creation of new wetland, riparian and upland habitat areas adjacent to Agua Hedionda Creek.	NOD	
2015051071	Low Volume Street Sweeper Transfer Facility Pico Rivera, City of Pico Rivera--Los Angeles The City of Pico Rivera is seeking to construct a street sweeper transfer facility at the existing City Operations Yard at 9633 Beverly Road. The project consists of the development of a 26-foot-long by 15-foot-wide concrete slab with three 5-foot-high perimeter walls to be developed along the northeastern perimeter of the existing Operations Yard. An 8-inch sewer line would be constructed for leachate and wastewater collection. The new sewer line would connect to the existing car wash clarifier located in the center of the Operations Yard, approximately 320 feet from the street sweeper transfer facility.	NOD	
2015052039	Bear Gulch Station 13 Improvement Project Portola Valley, City of Portola Valley--San Mateo The project is part of the overall upgrade to California Water Service Company (Cal Water) water supply pumps serving the southern portion of Bear Gulch system in Portolla Valley. This project entails installation of two miles of a new pipeline in the Portola Road right of way and combining booster pumps into a single facility. The project covered under the lake and streambed alteration agreement no. 1600-2015-0085-R3 CDFW is executing pursuant to section 1602 of the fish and game code, is limited to the installation of the new pipeline under the Sausal Creek box culvert crossing near 828 Portola Road. Approximately 50 lf of steel bore casing, up to 32 in in diameter, will be installed approximately two ft of vertical clearance from the bottom of the existing culvert. The water pipeline to be installed inside the bore casing is a 22 in diameter coated and lined cement mortar steel pipe. The pipeline will be installed utilizing dry jack and bore method of drilling. A bore pit approximately 40 ft long, 12 ft wide and 12 ft deep will be dug on the east side of the culvert approximately 25 ft from the culvert center line. The	NOD

	receiving pit, approximately 15 ft long, 8 ft wide and 12 ft deep, will be dug on the west side of the culvert approximately 25 ft from the culvert center line. The pit walls will be shored to provide adequate structural support for traffic and safety. The debris carried back to the bore pit will be removed with a skidsteer and hoisted out of the pit.		
2015061066	CUP for Escondido Disposal Inc (EDI) Transfer Station / MRF Master Plan Expansion (City File No. ENV15-0005) Escondido, City of Escondido--San Diego A modification of a Conditional Use Permit for a master planned expansion of the existing EDI Transfer Station/Material Recovery Facility (TS/MRF) on W. Washington Avenue into the adjacent northerly parcel fronting on W. Mission Avenue to accommodate additional sorting and improve recovery of recyclable material in order to increase diversion of waste from landfills, as required by state regulations. The proposed project would provide for a total of 216,476 sf of TS/MRF building area. The project does not propose any increase in permitted daily or annual throughput allowances. The master plan improvements include both renovation of existing buildings as well as demolition and construction of buildings to provide additional space for materials separation; reorganization of the site circulation; off-site storm drain improvements; and future construction of an anaerobic digester facility that would produce biogas to generate electricity for the TS.MRF and/or provide Compressed Natural Gas fuel for waste collection vehicles. The project would be constructed in 4 phases, which would be combined or switched as needed for the orderly development of the project.	NOD	
2015061069	Mittal Minor Use Permit / DRC2013-00086 / ED14-085 San Luis Obispo County --San Luis Obispo A request by Kunal and Neeta Mittal for a Minor Use Permit to allow the phased construction of a winery facility with a public tasting room. At build-out the winery facility would total 3,600 sf that includes a 400 sf tasting room. No Special Events have been proposed. Industry-wide events are allowed per land use ordinance. Wine production is estimated at 5,000 cases per year. The applicant requests a setback modification for the tasting room of the min 200 ft setback to the property line requirement to allow setbacks of 143 ft (west front setback), 179 ft (south side setback) and a setback modification for the wine processing building of the min 100 ft setback to property line to allow 69 ft (west front setback). The project will result in the disturbance of approximately 0.96 acres of a 13.6 acre parcel.	NOD	
2015061093	Vandenberg Minor Use Permit DRC2014-00067 San Luis Obispo County --San Luis Obispo Request by Jon and Vicki Vandenberg for a Minor Use Permit / Coastal Development Permit to allow for the demolition of an existing residence and the construction of a new 1945 sf residence. The project will result in the disturbance of approximately 1,600 sf on a 0.08 acre parcel. The proposed project is within the residential single family land use category and is located at 41 23rd st, Cayucos, CA, approximately 300 ft west of HWY 1, 3 miles north of the community of Morro Bay. The site is in the [Coastal Zone]* Estero planning area.	NOD

2015071013	Carson Regional Water Recycling Facility Expansion Project 2015 West Basin Municipal Water District Carson--Los Angeles WBMWD has been working with regional business partners to expand the use of recycled water use in place of potable water waste. West Basin has been evaluating an expansion of the CRWRF. Since 2000, the CRWRF produced two qualities of recycled water for Tesoro's Carson Refinery: nitrified tertiary disinfected recycled water for cooling towers and single pass reverse osmosis recycled water for boiler feed and cooling towers. At this time, West Basin has developed a project proposal to provide an additional 2,240-acre ft per year of tertiary nitrified recycled water. The environmental evaluation complies with California Environmental Quality Act requirements as stated in Article 17.	NOD	
2015071049	Water Reclamation Plant No. 7 Biosolids Upgrade Project Coachella Valley Water District Indio--Riverside The proposed project will maximize the existing capacity and provide redundancy to the biosolids handling system at WRP7 by constructing a new facility to replace the existing facility that is over 16 yrs old. The new facility will be constructed on CVWD land within the existing and fenced WRP7 site. The proposal includes a new building structure that will house these improvements: new gravity belt thickener units; sludge dewatering units; polymer blender units; polymer storage; sludge grinders; conveyor and truck scales. A below grade concrete structure is also proposed and will house a sludge holding tank and a pump station. An odor control bio-filter vessel will be installed adjacent to the below grade concrete structure. The proposed biosolids upgrade project will consolidate all biosolids handling operations under one building; thus resulting in labor and operational efficiency by locating it in closer proximity to related treatment processes.	NOD	
2015088380	Crystal Cove State Park - No Brains Cactus Restoration Fence Installation Parks and Recreation, Department of --Orange The purpose of the project is to install approx. 150 feet of wooden fencing along the edge of "No Dogs" trail as it transitions into the "No Name Ridge" trail. The wood fence will serve as a public barricade to "No Brains" road which is only used by staff and restoration teams to access a cactus restoration site. This fencing project ensures that the closed area utilized for restoration will not be accessed by the public.	NOE	
2015088381	SLO/SB Bridge Deck Maintenance Project (05-1G350) Caltrans #5 --San Luis Obispo, Santa Barbara The purpose of the project is to prevent major rehabilitation/replacement of 19 bridge structures. The project is needed because the bridges are deteriorating and could worsen further if unmaintained.	NOE	
2015088382	Property Acquisition for Future Desaler Well Site Eastern Municipal Water District Menifee--Riverside Eastern Municipal Water District (District) proposes the evaluation of two parcels located northwest of the intersection of Rousse Road and Evans Road in the City of Menifee, for feasibility as a future site for a desalter well. The parcels are located near an existing transmission line for the District's existing Menifee and Perris I Desalters. The site evaluation will include a Phase I Environmental Site	NOE

	Assessment.		
2015088383	2060 Pressure Zone Storage Tank Siting Evaluation Eastern Municipal Water District Moreno Valley--Riverside The 2060 Pressure Zone Storage Tank Siting Evaluation project (project) will identify and evaluate parcels that may be acquired as potential sites for a new potable water storage tank (tank) in the 2060 Pressure Zone. Sites to be evaluated as part of this project are located to the east of Perris Blvd., from the existing Casey Court Tank site in the north to just west of the Covey II Tank site in the south, as shown in Exhibit B. The project would identify potential properties and conduct preliminary surveys, Phase 1 Environmental Assessments, and geotechnical analysis. The project is strictly for gathering information that may lead to a future action that has not been approved. No construction of a tank is proposed through this project. However, the construction of a future tank on property acquired through this Project would require a separate CEQA analysis to be completed.	NOE	
2015088384	Menifee and Perris I Desalters - Noise Abatement Project Eastern Municipal Water District Menifee--Riverside Eastern Municipal Water District proposes the Menifee and Perris I Desalters - Noise Abatement Project to be constructed at their Perris I and Menifee Desalter Facilities, located at Valley Blvd and Honeyrun Road in the City of Menifee, Riverside County. To evaluate and mitigate noise issues at the Menifee and Perris I Desalters, the District performed a site assessment and the following four noise sources were identified for abatement: (1) transfer pumps, (2) finished water pump station, (3) building air conditioning unit, and (4) plant ventilation louver.	NOE	
2015088385	San Jacinto Valley Well Property Identification and Evaluation Eastern Municipal Water District Hemet, San Jacinto--Riverside The San Jacinto Valley Well Property Identification and Evaluation Project will identify and evaluate parcels that may be acquired as potential sites for new potable groundwater wells in the San Jacinto Upper Pressure Management Zone. The project would identify potential properties, conduct pre-purchase evaluations that may include Phase 1 Environmental Assessments, and open escrow for up to five new properties. The project is strictly for gathering information that may lead to a future action that has not been approved. No construction of wells is proposed through this Project. However, the construction of any future wells on property acquired through this Project would require a separate CEQA analysis to be completed.	NOE	
2015088386	Pinebrook Lake and Stream Vegetation Removal Project (LAA#1600-2015-0039-R2) Fish & Wildlife #2 --Calaveras Project consists of the removal of downed woody debris (dead trees, brush, and limbs) from within the reservoir. At the point where Moran Creek enters into the reservoir, blackberry bushes will be trimmed back to allow for swimming. Maintenance work along the reservoir, margin will include the removal of ruderal weeds to provide access for fishing. Furthermore, dead cattails will be cut and removed off site. All material removed from the lake and stream will be moved to an offsite location and burned or hauled away. Vegetation management within the	NOE

	spaces will be reserved for a limited time period, the project will not result in significant impacts related to public parking.		
2015088418	San Diego Festival of Beer San Diego Unified Port District San Diego--San Diego Project will take place at the Port Pavilion on Broadway Pier on Friday, Sept. 18, 2015. The District will provide sponsorship in the form of District services for the event, which will feature live music and nearly 60 different breweries serving up to 120 varieties of beer. The purpose of the event is to raise funds for local cancer charities, like Rady Childrens Hospital and Cancer Angels. the event has an expected attendance of over 4,000 people. Parking will be available at the public parking facilities located near Broadway Pier and the County Administration Center parking garage.	NOE	
2015088419	Tideland Use and Occupancy PERmit to Quality Coast, Inc. for a Cafe at Embarcadero Marina Park San Diego Unified Port District San Diego--San Diego The proposed project is a tideland use and occupancy permit (TUOP) to Quality Coast, Inc. (Tenant) for their use of approx. 427 sq. ft. of building area, 610 sq. ft. of outdoor seating area, and 60 sq. ft. of storage space located at Embarcadero Marina Park South (EMPS) in the City of San Diego. The area proposed for use under this TUOP will be used only and exclusively for the purpose whatsoever without prior written consent of the Executive Director of District. Hot food will be prepared using a mobile food car located on the patio (similar to the carts used by the Tenant along the Embarcadero). The mobile food cart will be cleaned and stowed daily off the premises. Concession and retail items could include food, non-alcoholic beverages, alcoholic beverages, souvenirs, gifts, novelties, clothing, cigarettes, candy, sundries, snack food, and rentals of bait and tackle and fishing equipment. Tenant agrees that it will, at a minimum, provide food service and bait and tackle sales 8 hours per day, 7 days per week except during periods of inclement weather. The TUOP also allows for Tenant to make minor interior renovations, including, but not limited to, replacement of existing cabinets, refrigeration, beverage dispenser, display counters, lighting and paint. 2015088420	Chaffey High School Gardiner W. Spring Auditorium Modernization Chaffey Joint Union High School District Ontario--San Bernardino Chaffey Joint Union High School District is planning to modernize the Gardiner W. Spring (GWS) Auditorium located on the Chaffey High School Campus. An elevator in the vicinity of the front lobby will be installed to the second floor balcony. Restrooms will be upgraded to accommodate accessibility requirements. An elevator will be installed in the southwest corner of the auditorium to provide access to the basement stage, and the second level music classrooms. A fire sprinkler system will be installed throughout the existing building.	NOE

	Agreement with Dix Development Incorporated for the Property at 9420 Sierra Avenue, Fontana, California.		
2015088422	Cutoff Sough Culvert Replacement Project (Lake or Streambed Alteration Agreement No. 1600-2015-0207-R1) Fish & Wildlife #1E Ferndale--Humboldt Project is limited to one stream encroachment on Cutoff Slough, which is tidally influenced. The activity is associated with an existing and unimproved access property road that has an undersized and failing 24-inch diameter culvert that has eroded portions of the road bed. The slough has been in the past significantly constricted in width with placement of road fill and an undersized culvert, which resulted in the culvert failing and fill slopes eroding. Currently a culvert replacement is being proposed that will better fit the channel-area at the road crossing.	NOE
