

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

August 16 – 31, 2017

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **August 16 – 31, 2017**.

STATE CLEARINGHOUSE CONTACTS

Please contact the State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
E-mail: state.clearinghouse@opr.ca.gov
Website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown via email**.

STATE CLEARINGHOUSE MAILING ADDRESS

USPS: State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries: State Clearinghouse
1400 Tenth Street, Room 113
Sacramento, CA 95814

INFORMATION AVAILABLE ON-LINE

<u>Documents Received on Wednesday, August 16, 2017</u>			
2016082032	<p>Sewer Replacement Project Weed, City of Weed--Siskiyou</p> <p>The addendum addresses a revised alignment for the North Weed site that was determined to be required to avoid the potential for encountering contaminated groundwater and/or soils resulting from past activities associated with the former Morgan Products Company, previously located on the Roseburg property. The Addendum also addresses the addition of collection system improvements in the downtown area that are required to eliminate sanitary sewer overflows. The subject properties are not included on any list of hazardous waste facilities/sites pursuant to section 65962.5 of the CA Gov Code.</p>	ADM	09/14/2017
2017081031	<p>Proposed Amended Rule 1168 - Adhesive and Sealant Applications South Coast Air Quality Management District --</p> <p>PAR 1168 would further reduce emissions of volatile organic compounds, toxic air contaminants, and stratospheric ozone-depleting compounds from adhesive primers, sealants and sealant primers. PAR 1168 will clarify applicability; revise, delete, and add definitions; lower VOC limits for certain categories and allow for a three year sell through and use through; and new product categories with corresponding VOC content limits; require products marketed for use under varying categories to be subject to the lowest VOC limit; prohibit the storage of non-compliant products, unless for shipment outside of the SCAQMD; add test methods for analyzing VOC content; add labeling requirements; include reporting requirements for manufacturers, private labelers, big box retailers, distribution centers, and facilities that use a 55 gallons per year exemption; prohibit the use of Rule 102 Group II exempt solvents.</p>	EA	09/14/2017
2013082016	<p>Lyons Avenue/Dockweiler Drive Extension Project Santa Clarita, City of Santa Clarita--Los Angeles Note: Review Per Lead</p> <p>The Lyons Avenue and Dockweiler Drive extension includes the extension of Lyons Avenue from Railroad Avenue to the future connection with Dockweiler Drive. The Project will include re-profiling the intersection of Lyons Avenue and Railroad Avenue to allow the construction of a new SCRRA/UP railroad grade crossing. The City anticipates the Project may also include the potential upgrade or closure of an at-grade crossing at the intersection of Railroad Avenue and 13 Street.</p>	EIR	10/16/2017
2016112016	<p>Tracy Village Tracy, City of Tracy--San Joaquin</p> <p>The Tracy Village Project is a proposed gated community consisting of up to 600 single family detached residential homes. The project would include three man-made lakes totaling approximately ten acres, along with a community recreation center with pool, spa and bocce courts, open space, and trails/pathways. The following schools are located within a mile distance from the project site: Hirsch Elementary, Monticello Elementary, and Anthony Traina Elementary. The project site is within the City's Sphere of Influence. It includes</p>	EIR	09/29/2017

	annexation of the site and additional lots.		
2017031026	Design Review DRC2016-00695 Rancho Cucamonga, City of Rancho Cucamonga--San Bernardino A request for site plan and architectural review of two industrial buildings totaling 150,003 sf on two separate parcels totaling 7.52 acres of land, located north of 8th St and west of Industrial Lane in the General Industrial District.	MND	09/14/2017
2017081027	Merrill Gardens Assisted Living and Memory Care Facility West Covina, City of West Covina--Los Angeles The proposed project is an infill development project that involves the construction of a new five-story assisted living and memory care facility with a rooftop garden and surface parking. The building footprint of 29,077 sf would cover 42% of the 1.6 acre (69,279 sf) site. The gross floor area will be 121,061 sf across five stories. The 111 assisted living and memory care units would be occupied by 131 residents, for seniors aged 60 and older. The first floor would contain common areas, a secured memory care unit with 13 memory care units, building administration, commercial kitchen, and management. The second through fifth floors would contain 98 assisted living units and a rooftop garden for senior residents who require assistance with activities of daily living.	MND	09/14/2017
2017081028	Old Town Sidewalk Improvement Project Goleta, City of Goleta--Santa Barbara The project includes removing pedestrian access barriers and improving walkability for connections to businesses and alternative modes of transportation. The project would provide a continuous sidewalk, and curb and gutter, on at least one side of the street in Old Town Goleta. The project also includes installing American's with Disabilities Act access ramps at the intersections where there are new sidewalks. The project includes providing angled parking, pedestrian lighting at intersections and along sidewalks, and tree removals.	MND	09/14/2017
2017081029	River Valley R.V. Park (Special Use Permit No. PSP 14-049) Tulare County Porterville--Tulare The proposed phased project consists of the construction of a privately owned, public campground which includes a recreational vehicle park/campground on an 18+/- acre portion of a 36+/- acre site. The project includes construction of an RV park/campground with 60 stalls, each with a concrete pad with apron and hook-ups (electric and water); a fenced RV/boat storage area surfaced with all-weather decomposed granite; 2 communal restroom/shower buildings each with its own septic system; a 50-tent campground including a playground, lawn area; and recreational area; and a commercial/retail building. The project will be constructed in 4 phases. Phase 1 includes the RV park/campground and the RV/boat storage area. Phase 2 includes the restroom/shower buildings and associated septic systems. Phase 3 includes the commercial/retail building. Phase 4 includes the construction of the tent campground/recreational area. Construction of Phase 1 and 2 are expected to begin immediately upon approval of the project, whereas construction activities for phase 3 is anticipated to begin within 2 years of project approval and phase 4 is anticipated to begin within 3 years of project approval. The proposed operational hours of the campground is 24-hours, 7-days per week. The commercial/retail store proposes to be open 6:00 am to midnight	MND	09/14/2017

	7-days per week.		
2017081032	London Community Services District Water System Reliability Project London Community Services District Dinuba--Tulare The project will address existing distribution and source capacity deficiencies by equipping the existing Well No. 5 with a new pump, booster pump system, hydropneumatic tank, site piping, and appurtenances to connect to a newly constructed 900,000 gallon steel water storage tank. The capacity of the existing drainage pond located on the Well No. 5 parcel will not substantially change, as material from the existing pond will be excavated to build the foundation for the storage tank, effectively maintaining the existing capacity of the drainage pond. The project also includes replacement of approx 12,000 lf of primarily 4" diameter asbestos/cement and steel pipeline with 8" diameter PVC pipeline, approx ten fire hydrants, a SCADA system, sectionalizing valves, water services, and other incidental items throughout the District.	MND	09/14/2017
2017081033	Riverdale Wastewater Treatment Plant Improvement Project Riverdale Public Utility District --Fresno The RPUD wastewater treatment plant is operating near capacity and discharges are not consistently meeting effluent limits. The WWTP needs expansion and improvement to the treatment process to address deficiencies. The RPUD has obtained Clean Water State Revolving Fund and Proposition 1 funding to prepare a Preliminary Engineering Report, permitting and regulatory compliance documents, and the preliminary design of the expanded facilities. The proposed project will expand the WWTP to provide a capacity of 0.325 MGD. The selected expansion capacity will be used to design the ultimate WWTP improvements and for the new Waste Discharge Permit flow limit with the RWQCB.	MND	09/14/2017
2017081030	Sustainable Santee Plan Santee, City of Santee--San Diego Note: Extended Review Per Lead Proposed project would provide policy direction and identify actions the City and community can take significantly reduce the generation of greenhouse gas emissions consistent with CA AB 32 and EO S-3-05. The purpose of the Sustainable Santee Plan is to guide the development, enhancement, and the implementation of actions and strategies that reduce the City's GHG emissions. Overall, the goal of the Sustainability Plan is to reduce the City's community-wide GHG emissions by 15 percent below 2005 emissions by 2020 and 49 percent below 2005 emissions by 2035 in conformance with AB 32 Scoping Plan and post 2020 reductions in conformance with the goals set in Executive Order S-3-05. The City is also aiming to reduce community-wide emissions below six metric tons CO2e per capita by 2030 to implement SB 32.	NOP	10/02/2017
2017082047	IKEA Retail Center Project Dublin, City of Dublin--Alameda Project is proposing the development of approx. 432,099 sq. ft. of commercial uses on 27.45 acres. The project would be anchored by an IKEA store of approx. 339,099 sq. ft. and feature up to 93,000 sq. ft. of lifestyle retail-restaurant uses.	NOP	09/14/2017

2017021005	General Plan Safety Element Update Project South Gate, City of South Gate--Los Angeles The purpose of the general plan safety element to identify natural or human activity related hazards that exist in South Gate and to define policy objectives and implementation actions to address them. Some naturally occurring hazards may be unavoidable, but the potential impact on South Gate can be reduced through advance planning and preparation. The safety element addresses geologic, seismic, flood, and fire hazards, as well as hazards created by human activity such as hazardous materials and incidents that call for emergency protection. In addition, the city is updating the South Gate Local Hazard Mitigation Plan. The LHMP includes an assessment of the city's risk related to natural hazard impacts such as drought, seismic events, extreme heat, and flooding.	Neg	09/14/2017
1999111132	Fresno Metropolitan Flood Control District 2016 Services Plan Update Fresno Metropolitan Flood Control District Fresno, Clovis--Fresno The 2007 Master EIR and the 2016 Plan Update describe the District's major programs and service responsibilities. The 2016 Plan Update proposes construction of several new projects or improvements for the District and ongoing operation and maintenance of existing and future projects. The subsequent projects consist primarily of basin expansions, new basin locations and new and expanded drainage areas. The District's major programs and service responsibilities would remain unchanged.	SIR	09/29/2017
1988050210	HOVchild Project, Specific Plan and EIR Beaumont, City of Beaumont--RIVERSIDE CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2015-0183-R6, pursuant to section 1602 of the Fish and Game Code to the project Applicant, K. Hovnanian Companies, Inc. Project is limited to the construction of an approx. 60-foot by 110-foot span bridge over Potrero Creek that will connect the intersection of Four Seasons Circle and Green Creek Trail with the intersection of Four Seasons Circle and Crooked Creek within the Four Seasons housing development. The bridge will rest on gabions on each side of the bridge.	NOD	
1999091142	Subsequent EIR/Supplemental EIS to the Final EIR/EIS for the IID Water Conservation and Transfer Project Imperial Irrigation District --Riverside, Imperial, San Diego CDFW has executed lake and streambed alteration agreement no. 1600-2017-0066-R6, pursuant to section 1602 of the fish and game code to the project applicant, the Imperial Irrigation District. The project is limited to the preparation and utilization of a site to receive sediment removed from Sheldon Reservoir through the rehabilitation of an existing earthen ramp to access the project site, possible rehabilitation of an alternative ramp, clearing of vegetation on the project site, and the depositing, drying and spreading of sediment on site. Project activities will result in a total of 5 acres of temporary impacts and 12 acres of permanent impacts to streambed.	NOD

2014022030	Applications 31059 and 31060 of Linholme Properties, Ltd to Appropriate Water by Permit State Water Resources Control Board Ukiah--Mendocino Linholme Properties, Ltd. filed an application to appropriate water by permit in Mendocino County. The project includes diversion from an unnamed stream in the Russian River Watershed. A copy of the permit approving the water right application can be found at www.waterboards.ca.gov/waterrights/water_issues/programs/ceqa/index.shtml .	NOD	
2015112002	Tower Bridge Fender Replacement Project Caltrans #3 Sacramento, West Sacramento--Yolo, Sacramento Caltrans will remove and replace the existing timber fender system surrounding Pier 6 and Pier 7 of the Tower Bridge (Bridge No. 22-0021) located on SR 275 between the cities of West Sacramento and Sacramento, in Yolo and Sacramento counties.	NOD	
2017041061	City of Fresno Northeast Surface Water Treatment Facility Storage Tank Addendum Fresno, City of Fresno--Fresno In order to meet the water quality requirements, customer demands, and reduce the use of groundwater, the City proposes to install a new 6 MG water storage tank to provide a total of 7.5 MG of storage capacity at the NESWTF. The new 6 Mg tank will be located on the south side of the NESWTF, where the overflow spill pond is currently located. The circular tank will be approx. 230 feet in diameter and be approx. 24 feet in height. The existing over flow/spill pond will be reconfigured to allow space for the new tank. The tank will be pre-stressed concrete structure that is buried approx. 20 feet below ground with only the top four feet exposed above ground level. Construction of the tank will require excavation to a depth of approx. 23 feet to install the foundation. Piping inlet and outlets will be installed on the bottom of the tank, requiring some limited excavations as deep as 30 feet to place these pipes. The new tank will operate much like the existing tank, and will be configured in a similar manner. Filtered water will be fed to both tanks through a system of pipes and valves, and water from both tanks will be distributed to customers from the existing high service pump station. Hydraulic modeling will be conducted prior to construction to determine if the pumps need to be modified to accommodate the new tank. Valve and pump controls will be modified as required to accommodate the new tank.	NOD	
2017089002	Streambed Alteration Agreement No. 1600-2017-0240-R2 "Coutolenc" THP Forestry and Fire Protection, Department of --Butte Project is limited to the installation of a temporary vented ford (Map Point G) over an unnamed Class II watercourse that flows to Paradise Lake. Further info can be found in the THP 2-16-081-BUT and Exhibit A.	NOD	
2017088312	Florence Lake Dam, No. 104-9 Water Resources, Department of --Fresno The upstream face of a portion of the dam will be lined, the low-level outlet valves will be replaced, and the right outlet pipe will be extended.	NOE

2014061017	San Joaquin River Conservancy River West Fresno, Eaton Trail Extension Project San Joaquin River Conservancy Fresno--Fresno Note: Revised	EIR	10/02/2017
------------	--	------------	------------

The proposed project plants to extend the existing Lewis S. Eaton Trail by constructing a multipurpose trail extension approx 2.4 miles, from the Perrine Ave alignment near SR 41 on the east to Spano Park on the west. The Trail would be about 22 ft wide, with a 12-ft wide paved surface, a parallel 8-ft wide hard natural surface for equestrian use, and a 2-ft shoulder (opposite the natural surface area) and generally would proceed from SR 41 to a point below the Spano Park overlook.

2017031003	Monterey County USDA APHIS-WS IWDM Program and Agreement Renewal Monterey County --Monterey The Monterey County Agricultural Commissioner's Office and the US Department of Agricultural Animal and Plant Inspection Service - Wildlife Services have cooperatively conducted wildlife damage management activities in some capacity in the county since for several decades, with the IWDM program commencing in the early 1990s. The current 5-year Cooperative Services Agreement between the County and USDA expires June 30, 2018. The proposed project is the renewal of the County's 5 year cooperative agreement, including annual work plans with APHIS-WS. Activities performed under the IWDM program would be implemented by APHIS-WS Field Specialists. Neither APHIS-WS nor Monterey County are proposing any changes to the IWDM Program in conjunction with agreement renewal.	EIR	10/02/2017

	would have a generation output of 145 MW; site 2 would total 1,343 acres and would have a generation output of 221 MW; and site 3 would total 1,002 acres would have a generation output of 104 MW.		
2017062080	Giannini Bridge Replacement San Mateo County --San Mateo The applicant seeks a coastal development permit and grading permit for bridge repairs done in September 2015 and replacement of the bridge with a new 20-ft. wide free spanning bridge over Butano Creek on Giannini Ranch, owned by POST. The existing wood bridge will be demolished. The bridge site provides the only access to the agricultural fields on the west side of the segment of Butano Creek. Replacement of the bridge will restore bridge loading capacity necessary for agricultural operations. Construction of the new bridge includes new bridge supports (i.e. concrete abutments and wingwalls) to be constructed outward of top-of-bank and above the ordinary high and wingwalls) to be constructed outward of top-of-bank and above the ordinary high water line in order to minimize impacts to the creek. The project includes widening of the gravel roadway approaches to the bridge to conform to the new bridge width as well as the installation of a rock inlet at the existing storm drain, installation of swales, and placement of Class II aggregate base. A grading permit is required for 150 cy of cut and 400 cy of fill. No work is proposed to occur within Butano Creek and creek dewatering is not required to implement the project.	MND	09/15/2017
2017081034	Cantera Lofts La Mesa, City of La Mesa--San Diego A request by NTC Development, Inc. for a proposed Planned Residential Development on a vacant 8.51 acre site located on the north side of High Street, a private easement access road, in the city of La Mesa, County of San Diego. The project consists of 34 condo units within six three-story buildings, common parking and recreation areas, and open space. The property was formerly used as a rock quarry. The project includes a concurrent request for a variance for a reduced property line setback and special permit for over-height retaining walls. The site is zoned R1S and is designated by the La Mesa General Plan for suburban residential land use. City of La Mesa Case Files: tentative map TTM 16-01, Variance V 16-03, Special permit SP 16-10, Site development plan DAB 16-13, and design review DRB 16-13.	MND	09/15/2017
2017081036	Murrieta Senior Living Facility (Planning Case # DP-2017-1333 & CUP-201701334) Murrieta, City of Murrieta--Riverside Columbia Pacific Advisors, LLC is proposing to develop a two-story, 97,222 sf assisted living and memory care facility comprised of 87 suites on approx 7 acres at the northwest corner of Clinton Keith Rd and Greer Ranch Rd. Development of the project would also require off-site improvements, including the frontage of Clinton Keith Rd for road widening; the frontage of Greer Rd; and within Clinton Keith for extension of sewer, storm drain, and water lines to the project site.	MND	09/15/2017

2017081037	Van Buren Boulevard Widening Project Riverside County Riverside--Riverside Note: Extended Per Lead. The Riverside County proposes to widen Van Buren Blvd from approx King Ave eastward to Bountiful St, approx 2.5 miles. The project would widen the road from four lanes to six lanes and would include right turn pockets at the major intersections. The road would be widened by four ft on both sides within the project limits; this widening would result in the acquisition of additional ROW. Any existing sidewalk, driveways and curb returns will be reconstruction in compliance with the current accessibility standards.	MND	09/18/2017
2017082048	City of Eureka Elk River Estuary/Inter-Tidal Wetlands Enhancement and Coastal Access Project Eureka, City of Eureka--Humboldt The city of Eureka proposes to restore and enhance estuary and inter-tidal wetland habitats on approx 114 acres adjacent to Elk River. The project would enhance and restore approx: 78 acres of salt marsh, 13 acres of riparian habitat, and 13 acres of inter-tidal channels, which may provide nearly ten acres of valuable Eelgrass (<i>Zostera marina</i>) habitat. The city also proposes to enhance public access to Elk River and Humboldt Bay with an approx 1 mile extension of its Class 1 ADA Waterfront Trail, and the construction of a non-motorized boat launch, several causeways and viewing platforms, and a trail head parking area off Tooby Rd. The project may also create approx 2.8 miles of navigable channels connected to Elk River Slough.	MND	09/15/2017
2017082050	City of Santa Rosa Road Access Stabilization Repairs for Tank R7 Santa Rosa, City of Santa Rosa--Sonoma The proposed project would provide drainage improvements, road rehabilitation, and slope stability repairs along the Tank R7 access road and upgrades to the existing storm drain systems in portions of Yerba Buena Rd and St. Francis Rd to alleviate localized flooding risk. The project would include a new storm drain system and telecommunications line installed beneath the access road, slope stability repairs, a vehicle turnaround area, and approx 800 ft of retaining wall.	MND	09/15/2017
2010112042	Magee Ranches Danville, City of Danville--Contra Costa Notes: Refer to Revised NOP sent on 8/30/2017 The project proposes to develop approx 30 acres of the 410 acre project site with 69 single family homes and seven attached secondary dwelling units. Approx 380 acres of the project site would be permanent open space used for ongoing cattle grazing operations, habitat preservation and enhancement, storm water treatment, and public trails. The project would rezone the approx 410 acre property from A-4, A-2, and P-1 to a new P-1. In addition, a vesting tentative map is proposed to create the 69 single family lots on the site. The lots would be clustered and located primarily on the flatter portions of the property. The project plans are on file and available for review at the Town of Danville Planning Division. The project applicant is Davidon Homes.	NOP

2017081035	Campus Master Plan 2018 California State University, Dominguez Hills Carson--Los Angeles The Campus Master Plan 2018 provides a framework for implementation of the University's goals and programs by identifying needed facilities and improvements at the campus for this enrollment level and addressing the University needs to the year 2035 planning horizon.	NOP	09/15/2017
2017082051	East Whisman Precise Plan Mountain View, City of Mountain View--Santa Clara The Precise Plan would include up to 2.3 million net new sq. ft. of office uses, 100,000 net new sq. ft. of retail uses 200 hotel rooms, and 5,000 multi-family residential units. Retail uses included in the proposed Precise Plan would be located in an approx. 10-acre "Village Center" commercial area at the intersection of East Middlefield Road and North Whisman Road. The East Whisman Precise Plan could also include new parks and trails, new public streets, and recreational facilities. The Precise Plan will require approval of a General Plan Text and Map amendment and a Precise Plan Zoning and Zoning Map Amendment by the City.	NOP	09/15/2017
2017082049	PA-1700045 San Joaquin County --San Joaquin A revisions of approved actions application to remove the sign requirement in the conditions of approval and apply the current development title sign standards for the limited industrial zone.	Neg	09/15/2017
2008062075	Southwest Estates Santa Rosa, City of Santa Rosa--Sonoma This proposed project involves the development of 10.18 acres of undeveloped land into a single-family residential development with associated infrastructure such as public streets, sanitary sewer lines, utility lines, and storm drains. Project will result in impacts to 10.18 acres of CA tiger salamander (<i>Ambystoma californiense</i>) habitat including temporary impacts to 0.70 acres; the Project will permanently remove 9.48 acres of CA tiger salamander, which is designated as a threatened species under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation. Minor Amendment No. 1, as approved, modifies the previously issued ITP to decrease the Project Area and required Habitat Management Land area. In approving Minor Amendment No. 1, CDFW determined, among other things, that no substantial increase in the nature or scope of the previous authorization by the ITP, and that no new significant or substantially more severe environmental impacts than previously considered and disclosed would occur.	NOD	
2017022012	Fremont Weir Adult Fish Passage Modification Project Water Resources, Department of Davis, West Sacramento--Yolo The proposed project would improve salmonid and sturgeon passage in the Yolo Bypass. The Fremont Weir fish ladder would be modified to accommodate a wider, deeper concrete box culvert. The channels that extend downstream and upstream of the fish ladder would be realigned. In addition, two earthen agricultural road crossings along the Tule Canal would be modified. At Ag crossing 2, a bridge	NOD

2016012053	<p>South Canal Diversion Fish Screen Project Yuba County Water Agency Marysville--Yuba Located approximately 1,000 feet upstream of Daguerre Point Dam on the south bank of the lower Yuba River, the South Canal Diversion diverts water from the lower Yuba River to approximately 30,000 acres of land in south Yuba County. Currently, fish screening/fish protection at the South Canal Diversion is provided by a 450-foot-long porous rock gabion berm fitted with a fine-mesh barrier within the barrier. Although this structure is intended to protect juvenile fish from becoming diverted from the river, the level of protection has been questioned by NMFS and CDFW. The EIR will analyze several alternatives at the project site that would improve protection of anadromous almonids in the Yuba River at the South Canal Diversion.</p>	EIR	10/02/2017
2016052012	<p>Proposed Liberty Specific Plan West Sacramento, City of West Sacramento--Yolo The LSP proposes 1,503 low-, medium-, and high-density residences, including single family detached, single family attached, and multi family residences. The project would also include a pedestrian-friendly 2.8-acre centrally located recreation area (The Commons) that would contain private recreational amenities, an adjacent neighborhood commercial site with up to 10,000 sf, and a proposed bus stop on Liberty Dt. The LSP would create parks and greenbelts. A K-8 school is proposed between The Commons and Village Parkway. The LSP also provides for a public roadway circulation system and the installation of backbone infrastructure/utilities.</p>	EIR	10/02/2017
2016111016	<p>Fullerton College Facilities Master Plan North Orange County Community College District Fullerton--Orange The District plans to construct a new Welcome Center, new instructional buildings, a Horticulture and Vocational Services Center, a pedestrian bridge, and an 840-space parking structure; realign campus access to the parking structure; construct a new maintenance and operations facility and thermal energy storage; construct new storage, offices, and a shower/locker room north of the existing pool; create new parking lots; and construct a performing arts complex. Renovations would include the Math Building, Physical education, Wilshire Theatre, business building, humanities building, campus services, administration building, fine arts gallery, and academic computing. It is anticipated that these improvements will be phased over a 10-year period.</p>	EIR	10/02/2017
2012011010	<p>Recirculated Santa Clarita Valley Sanitation District Chloride Compliance Project EIR - Separation of Recycled Water Project Los Angeles County Sanitation District Santa Clarita--Los Angeles The proposed project for this draft recirculated EIR is the Chloride Compliance Project. The Chloride Compliance project is unchanged from the projects analyzed in the 2013 EIR and the 2016 Trucking SEIR except that the SCVSD plans to proceed with the Chloride Compliance Project separately from the Recycled Water Project. This project continues to propose UV disinfection at the SWRP and VWRP, advanced water treatment at the VWRP, and brine disposal by limited trucking to the JWPCP in Carson, CA, which is owned and operated by another of the county Sanitation District of LA County.</p>	FIN

2017042010	Truchard Family Winery - Use Permit P14-00330-UP & Variance P14-00331-VAR Napa County Napa--Napa Approval of a use permit for the operation and construction of a new 100,000 gallon winery within a 33,702 sf winery building and a 1,200 sf attached covered crush pad. The project also includes tours and tastings by appointment with a max of 40 visitors per weekday and 60 visitors on weekdays/holidays for a max weekly total of 320 visitors and a marketing program, which consists of 2 events per month for up to 30 people and four annual events for up to 150 people. A variance is also requested to allow construction of the winery 178 ft within the 600 ft winery setback for Old Sonoma Road.	MND	09/18/2017
2017081040	IS Application No. 7286 (CH4 Power) Fresno County --Fresno Allow an anaerobic digester to collect methane (biogas) from an existing dairy operation in the AE-20 Zone district and use methane to fuel an electrical power generator to produce renewable electrical power. Generated electricity will be used both for the dairy operation and to be sold to the power grid. The subject property is located on the south side of Floral Ave approx 2,642 ft west of its intersection with S. Jameson Ave and 5.2 miles northeast of the unincorporated community of Helm (11883 W. Floral Ave, Fresno) (Sup. Dist. 1) (APN 041-030-20S).	MND	09/18/2017
2017081041	Fay Major Subdivision Project San Benito County Hollister--San Benito The project applicant, Catalyst Development Partners, is proposing to subdivide the 27.26 acre site and construct 84 single family homes at the southern end of the Hollister Valley in San Benito County. The project site was used as an orchard since the 1950s and the northern portion of the site remains in cultivation today. Primary access to the site would be provided via a two-way, stop controlled driveway at the intersection of Southside Rd and Hospital Rd. It is anticipated that the project development would be served by Hollister area utilities. Water service would be provided to the site by the Sunnyslope County Water District.	MND	09/18/2017
2017082052	UPE14-0008 Ramey Winery Sonoma County Healdsburg--Sonoma Request for a use permit to construct a new winery building (two story, approx. 32,210 sf) with a max annual case production of 60,000 cases, a new wine cave (approx. 20,720 sf), a conversion of an existing hop kiln building to a public tasting room open from 10 am to 5 pm, 7 days a week, and a conversion of an existing hop bailing barn to a private tasting room with a two-guest room marketing accommodation unit on the upper floor. The request includes 22 agricultural promotional events per year with a range of max guests (10 events with 30 guests, 5 events with 60 guests, 5 events with 120 guests, & 2 events with 300 guests), and participation an industry wide events totaling two event days with a max of 300 guests on a parcel 75 acres in size. On the west side of the project site, agricultural promotional events would be limited to a max of 30 guests and industry wide events will not be held on this side of the project site. A four-year use permit term is requested under section 26-92-130 of the zoning code. No weddings, receptions, or concerts are proposed. The parcel is under a prime land conservation contact. No vines will be removed to accommodate the winery facility or related site infrastructure.	MND	09/18/2017

	restaurant uses, which would increase the minimum vehicle parking spaces required to 370 spaces. The proposed uses would be located within a 7-story building containing a ground-floor level with a mezzanine, 6 residential levels, and 4 subterranean parking levels. The proposed building would comprise approx 261,159 sf of floor area.		
2017082054	Folsom 2035 General Plan Folsom, City of Folsom--Sacramento The project includes all actions necessary to update the 1988 Folsom General Plan, including reorganizing and updating the existing Plan's ten chapters, which together address the seven mandatory General Plan elements required by State planning laws. The Folsom 2035 General Plan Project would include additional chapters on Economic Prosperity, Public Facilities and Services, Parks and Recreation, as well as revised Land Use and Circulation Diagrams.	NOP	09/18/2017
2012051078	DR 12-1002 and CDP 12-1003 to Construct a Single-Family Dwelling on a Vacant Lot at 731 Nyes Place Laguna Beach, City of Laguna Beach--Orange This proposed project involves construction of 2,420 sq. ft. building pad on a vacant 0.191-acre lot to accommodate a custom multi-level single family residential home with attached garage located at 731 Nyes Place, Laguna Beach CA (Project). Adjacent to the structure, fuel modification zones, consisting of a 20-foot wide irrigated Zone A and a non-irrigated Zone B, are required by the City of Laguna Beach Fire Dept. No improvements to the existing concrete-lined drainage swale present in the western portion of the property are proposed or required. Construction will utilize piers and pile driving to install structural supports. No mass grading is proposed.	NOD	
2014072028	1300 El Camino Real Greenheart Project Menlo Park, City of Menlo Park--San Mateo Project consists of approval and implementation of a RAW for environmental cleanup for a portion of a 3.5 acre multi-parcel site being developed for mixed uses consisting of retail, residential, restaurant, and office space. The overall development project has street addresses on Derry Lane, Oak Grove Ave., and El Camino Real in Menlo Park, CA. The RAW addresses contamination from spills, leaks, and discharges of perchloroethylene (PCE - aka Dry Cleaning Fluid) associated with historic operations at the former dry cleaning facility at 570 Derry Lane. An EIR was prepared for the overall development project by the City of Menlo Park (February 2016). As identified in the EIR and the RAW, cleanup at the site will consist of soil excavation with off-site disposal, in-situ chemical oxidation for groundwater treatment, and installation of vapor venting features to mitigate any residual risks associated with PCE vapors. In addition, a groundwater and vapor monitoring program will be implemented, and land use controls will be instituted to limit future sensitive uses of the site. The RAW and cleanup of a portion of the site are part of a larger development project. Greenheart Land Company is proposing to redevelop 11 assessor's parcels of land between El Camino Real and the CalTrain right-of-way into a mixed-use development. The overall development project would demolish the existing structures in the southern portion of the site and construct approx. 420,000 sq. ft. of mixed uses at the Project site. In total, the project would include three mixed-use buildings, a surface parking lot, an underground parking garage,	NOD

2017042066	Southeast Greenway General Plan Amendment and Rezoning Project Santa Rosa, City of Santa Rosa--Sonoma The 57-acre project site follows a 1.9-mile linear path from Farmers Lane and Hwy 12 to Spring Lake Regional Park in southeast Santa Rosa. The project involves a General Plan and Zoning amendment to allow for future development of parks and open space, school facilities, community gathering space, neighborhood retail/commercial, and housing within the project site; no construction is proposed. The project includes a Land Use Concept plan that frames the type and scale of development on the project site, a Circulation Concept plan that structures multi-modal paths, crossings, and connections throughout the project site, and proposed land use policies that provide a framework for future development of the project area. The project would consist of up to 47.2 acres of parks and recreational uses, up to 244 multi family housing units, and 12,000 sq. ft. of commercial space.	EIR	10/04/2017
2017032022	Conditional Use Permit 2017-001, Crop Production Services Glenn County --Glenn CUP 2017-002, Crop Production Services for a proposed retail agriculture facility offering crop nutrients, crop protection products, seeds and application services.	MND	09/19/2017
2017081042	Asilomar Coast Trail Managed Retreat and Restoration Project Parks and Recreation, Department of Pacific Grove--Monterey The project consists of a trail management and restoration project along the existing Asilomar Coast Trail to rehabilitate and enhance sections of an existing trail in order to protect sensitive coastal dune habitat and species, while providing continued public use and enjoyment of the site. The existing trail and proposed project are part of the existing long-term dune restoration program initiated by CA State Parks in the late 1980s. The project is intended to protect restored plant communities, reduce erosion and protect public access, and includes the construction and restoration of a total of approx 0.5 mi of existing trails within five segments.	MND	09/19/2017
2017081043	Initial Study Application No. 7091 and Amendment Application No. 3816 Fresno County Fresno--Fresno Rezone a 30.05-acre parcel from the AL-20 Zone district to an M-1(c) (light manufacturing, conditional) zone district to allow the uses in the attached list.	MND	09/19/2017
2017082059	Indian Grinding Rock Tentative Map Paradise, City of Paradise--Butte Tentative map application proposing to divide an existing 11.75 acre parcel containing one dwelling unit (to remain) into six lots of record for rural residential land use with a 5.6 acre remainder parcel. 	elevated dock with a ramp down to a floating dock. The existing dock facilities occupy 1,457 sf. The proposed facilities would occupy 3,063 sf, increasing the floating dock area by 401 sf and the elevated dock area by 1,205 sf. The rehabilitation is proposed to protect people and property from harm. The applicant is taking this opportunity to upgrade its facilities with amenities to better serve property owners and guests.		
2017082062	San Pedro Terrace Subdivision Pacifica, City of Pacifica--San Mateo The proposed project consists of the development of a six unit single family dwelling tentative subdivision map on a 2.42 acre vacant triangular lot in the Linda Mar neighborhood, and sited approx 20 ft south of San Pedro Creek. Proposed residential lots range in size from 5,035 to 36,104 sf. The project would also introduce a new 16,783 sf private street to facilitate site access, and the extension of utilities into the site (e.g. sanitary sewer, water, stormdrain, joint trench). Project entitlements include a GPA to change the LUD from high density residential to low density residential, rezone the project site from C-3, Service commercial zoning to R-1, Single family residential zoning, and a tentative subdivision map for six single family lots.	MND	09/19/2017
2017082063	Crowley Minor Land Division Placer County Loomis--Placer The project proposes to subdivide an approx 34.6 acre parcel into four parcels consisting of 5.1 acres, 10.1 acres, 14.3 acres and 5.1 acres.	MND	09/19/2017
2017032056	PA-1700032 (UP) San Joaquin County Stockton--San Joaquin A use permit application to expand an existing large winery in three phases over 15 years including the construction of various buildings totaling 894,873 sf.	Neg	09/19/2017
2017082057	White Ranch Minor Use Permit (MUP15-0004) Butte County Chico--Butte The applicant is requesting a minor use permit to bring an existing unpermitted special event facility into compliance with the requirements of Butte County Code 24-175.2. The outdoor special events facility will hold weddings, celebrations, ceremonies, receptions, corporate functions, and similar activities for up to a max of 250 guest per event. A max of 22 events will be held annually between April and October, with no events to occur during July. Events will operate between the hours of 4 pm and 10 pm, and may include the use of amplified sound and live bands.	Neg	09/19/2017
2017082058	PA-1700142 San Joaquin County --San Joaquin A minor subdivision application to subdivide an existing 28,500 sf parcel into two parcels. Parcel one to contain 17,000 sf. Parcel two to contain 11,500 sf.	Neg	09/19/2017

2015112011	Miner Slough Bridge Project Caltrans #4 Rio Vista--Solano Note: IS/MND/EA/FONSI Caltrans proposes to rehabilitate or replace the existing bridge on SR 84 over Miner Slough (the Minor Slough Bridge Project). The project proposes two alternatives for the bridge based on a current planning study. The first alternative, Alternative 1 (bridge replacement), is to build a new swing-span bridge approx. 100 feet west of the existing alignment. The second alternative, Alternative 2 (bridge rehabilitation), is to rehabilitate the existing bridge.	Oth	
2003021141	Addendum to FEIR 584 and FEIR 589, Trampas Canyon Dam and Reservoir Project Orange County --Orange Project is the construction of the 1,360 foot Gobernadora Creek Bridge in two phases. The first phase of construction will consist of a 78-foot wide superstructure. The second phase will consist of a varying width of 32 feet at the beginning (west end), gradually decreasing to 26 feet towards the middle, then gradually increasing to 40.5 feet at the east end of the bridge. Utilities extending into the Gobernadora Creek area between Planning Area 2 (PA-2) and PA-3 include the following Santa Margarita Water District facilities: a 30-inch Zone A Recycled Water Pipeline; a 20-inch Zone 1 Domestic Water Pipeline; and a 16-inch Sewer Force Main.	NOD	
2003122137	Western Placerville Interchanges Project Placerville, City of Placerville--El Dorado Project will construct improvements to the existing US Hwy 50/Placerville Dr./Forni Road Interchanges with the addition of ramps to the existing Ray Lawyer Dr. Overcrossing.	NOD	
2006019025	Conditional Use Permit #05-05, Variance #05-01 Barstow, City of Barstow--San Bernardino Construction of a retail store, the Home Depot, near the interchange of I-15 and L Street. 	convey stormwater within the project area and discharge it to the Sacramento River. The State Lands Commission action is an approval of a 20-year General Lease - Public Agency Use through August 16, 2037.		
2010091023	Olancha/Cartago Four-Lane Project Caltrans #6 --Inyo Construct roadway improvements including additional lanes on a portion of US 395 in Inyo County.	NOD	
2012061063	Portola Center Project Lake Forest, City of Lake Forest--Orange Site Development Permit 06-17-5048 is a request to approve a temporary "Welcome Center" comprised of a temporary trailer, landscaping, and associated parking lot for IronRidge, a residential community located in Portola Center South. The Welcome Center will be located along the southwest corner of Portola Oaks Dr. and Viejo Ridge Drive on Lots 83 and 84 of Tract 17948. The Welcome Center is intended to operate similar to a model home complex in that it will be temporary and will provide information to perspective home buyers about each of the five residential planning areas and their for-sale products. The project (SDP 06-17-5048) was evaluated in and contemplated by the SEIR that was prepared for the Portola Center and certified by the City of Lake Forest City Council on Nov. 5, 2013. The Portola Center certified SEIR was not challenged within the time period prescribed in subdivision (c) of Public Resources Code section 21167 and thus the SEIR is presumed valid in accordance with Public Resources Code section 21167.2. The proposed project is consistent with scope of the approved Area Plan and Tentative Tract Map 15353. Therefore, the certified SEIR serves as the environmental documentation for the project and the project is compliance with the requirements of CEQA.	NOD	
2013082011	5th Street Bridge Replacement Project Yuba City Yuba City, Marysville--Sutter, Yuba The City of Yuba City, in cooperation with Caltrans, proposes to replace the existing 5th Street Bridge over the Feather River with a new four-lane structure. The purpose of the project is to 1) enhance safety, 2) improve the existing transportation facility, and 3) improve traffic operations and transportation capacity. PG&E proposes to relocate the existing 12 kilovolt pole line that crosses over the Feather River that is in conflict with the new location for the 5th Street Bridge Project. The State Lands Commission action is an approval of a 20-year General Lease - Right of Way Use through August 16, 2037.	NOD	
2014042073	Clearlake Oaks County Water District Wastewater Infrastructure Rehabilitation Project Clearlake Oaks County Water District Clearlake--Lake While the District was in the process of having designs completed for the changes addressed in the 2016 Addendum to the 2014 IS/MND, the area experienced flood events that had not been encountered during the drought. Due to the inadequacy of the system, raw sewage was released to Clear Lake and the District received a Notice of Violation from the CVRWQCB. The District had the hydraulic analysis updated to incorporate flows experienced during the 2017 floods. The results indicated additional improvements are necessary to meet peak flows such as	NOD

2017022044	<p>Main Canal Rehabilitation Project Patterson Irrigation District Patterson--Stanislaus</p> <p>The project includes the modernization and capacity recovery of three miles of PID's main conveyance system (reaches 1 through 5), ending at US 33 and Southern Pacific Railroad's right way. Reach 1 of the existing canal will be replaced with a new 195 CFS lined canal, reaches 2 and 4 with 195 CFS pumping plants and pipelines, reached 3 and 5 with 195 CFS lined canal, two new 195 CFS pump stations, decommissioning of sediment basins 3 and 5, decommissioning of pumping plants 3 and 5, canal reaches 2 and 4 will be decommissioned and removed from service, 9 aging laterals will be replaced, and 12 aging customer turnouts along the main canal will be replaced.</p>	NOD	
2017022074	<p>Performance Food Group Distribution Center Gilroy, City of Gilroy--Santa Clara</p> <p>The proposed project is a 347,651 sf warehouse and distribution center for Performance Food Group, which would be constructed in two phases. The first phase includes demolition of the existing house, well abandonment, site clearance, and construction of a 189,303 sf warehouse and distribution facility, loading docks, surface parking, gated access, landscaping, utilities, and a storm water detention pond. The building would include dry and cold storage, and office space. The second phase consists of a 150,968 sf addition to the building, additional loading docks, truck parking, and a 7,380 sf truck maintenance building and fueling station. Assumed operational date of the first phase is by 2020.</p>	NOD	
2017032061	<p>Conditional Use Permit 2017-001. California Olive Ranch Composting Facility Glenn County --Glenn</p> <p>COR has applied for a CUP to develop a facility to compost vegetative olive pomace residuals from the pressing of olives into olive oil. In addition, feedstock and bulking agents include almond trash (floor sweepings, etc., from almond harvest), dairy manure, orchard trimmings and stems, greenwaste, materials other than olives generated during processing, and other agriculture waste materials. Following composting, COR would reuse the compost following regenerative agricultural techniques on orchards under their control.</p>	NOD	
2017041061	<p>City of Fresno Northeast Surface Water Treatment Facility Storage Tank Addendum Fresno, City of Fresno--Fresno</p> <p>The City is proposing to refine the configuration of the previously approved facilities as analyzed in the certified Supplemental MND, which included changes to the existing overflow basin from an east-west alignment to a north-south alignment. The 6 million gallon (MG) water storage tank was proposed immediately to the east of the overflow basin. The current configuration would keep the existing overflow basin where it is currently located, but would move the location of the storage tank and associated infrastructure immediately south of the overflow basin, with a 10-foot high earthen berm to be constructed along the perimeter of the grove surrounding the tank. The storage tank would remain 6 MG in size but would extend farther into the existing grove than in the previously approved configuration. The current configuration may change slightly within the existing study area, and will result in the removal of the existing grove.</p>	NOD

2017088416	MDOT Eel River Road Culvert Replacement MPs 6.19 and 6.56 (Lake or Streambed Alteration Agreement No. 1600-2017-0057-R1) Fish & Wildlife #1E --Mendocino The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement number 1600-2017-0057-R1, pursuant to Section 1602 of the Fish and Game Code to Mr. Kent Standley The project is limited to two encroachment. One encroachment will replace a culvert at MP 6.19 on Rocky Creek. A 57-inch arch culvert will replace a failing 48-inch circular culvert. It will be properly aligned, maintain the stream gradient, and pass 100-year flow events. A second encroachment, at an Unnamed Tributary at MP 6.56, will correct the placement of a 24-inch circular shotgun culvert, which is not aligned with the stream channel. A new 24-inch culvert will be placed in alignment with the stream channel, but cannot be placed at gradient because of the steepness and substrate of the slope. A 30-foot flume will deliver the outflow directly into the active channel of the Eel River to avoid erosion issues. The original culvert will remain in place as an emergency overflow culvert.	NOE	
2017088417	Transfer of Land Coverage Rights to Enable Construction of a New Single Family Residence Tahoe Conservancy --Placer Project consists of the sale and transfer of 196 square feet of potential land coverage rights from Conservancy-owned land to a receiving parcel on which a private residence will be constructed. The transfer enables the receiving landowner to carry out the project without any net increase in the amount of existing land coverage in the Lake Tahoe Basin.	NOE

	<p>this project is to enhance base flows in late summer and fall and restore meadow, riparian, and aspen habitats through increased floodplain connectivity. This will improve water availability and wildlife habitat quality on the Ecological Reserve which supports the sole relictual habitat for the Walker River population of the Lahontan cutthroat trout. A series of up to six BDA structures will be installed in the two main channels of the North and South Forks of By-Day Creek in the vicinity of their confluence on the upper elevations on the Ecological Reserve. The BDA structures will consist of lodgepole pine vertical posts inserted into the streambed and floodplain across the channel to provide a framework for willow and other woody material to be woven horizontally between posts. The woven willow dams will be constructed to the height of the floodplain and packed with silty-gravelling loam from the active channel. The structures will be constructed of native vegetation available on-site including the use of lodgepole pine and willow cuttings. The work will be completed primarily using hand tools, chainsaws, hydraulic or pneumatic post drivers, and a small backhoe or mini-excavator only where necessary. The work will be completed on the CDFW-owned Ecological Reserve by CDFW staff and volunteers. The work will occur between September 15 and March 1 during low flows to minimize sediment transport concerns and in order to avoid potential impacts to nesting and migratory birds. There are no known cultural resources at the Project site</p>

	parking spaces and approximately 11,728 square feet of ground-level retail.		
2017012038	State Route 12/Church Road Intersection Improvements Project Caltrans #4 Rio Vista--Solano Caltrans proposes to enhance operation and safety characteristics at the intersection of SR-12 and Church Road by removing turn movements from the through traffic with the addition of a left turn lane, and providing acceleration/deceleration lanes for right turns.	FIN	
2017081045	Stephenson Conditional Use Permit/Map Amendment San Luis Obispo County Arroyo Grande--San Luis Obispo Request by Nicholas Stephenson for approval of SUB2015-00055 to amend recorded map conditions of approval for a recorded lot (parcel 4 of CO97-0236), and to approve CUP DRC2015-00015 to permit and remediate unpermitted grading and to create building pads for a primary and a secondary residence. Amendments to the recorded Parcel Map conditions include: expanding a recorded building control line to include the proposed pads; and, to modify oak tree removal limitations to reflect oak trees removed from the site. The CUP would authorize unpermitted grading that resulted in removal of 44 oak trees, and allow site restoration activities, drainage facility construction, and approx 3,880 cy of newly proposed grading to create two residential building pads. An as-built driveway access of approx 1,800 lf would also be approved. The project will result in disturbance of approx 5.75 acres in total on a 51.5-acre parcel. No additional oaks are proposed for removal. The proposed project is within the residential rural land use category and is located at 1180 Dairy Lane, approx 600 ft west of Corbett Canyon Rd and approx 3.5 mi north of the City of Arroyo Grande. The site is in the Arroyo Grande Fringe area, in the San Luis Bay Inland Sub Area of the South County Planning Area.	MND	09/20/2017
2017082064	City of Etna 16-CDBG-11138 Public Water System Improvement Project Etna, City of Etna--Siskiyou Construction of a new 200,000 gallon public water supply tank and installation of new water system filtration equipment on approx 0.55 acres of land zoned for and currently used for the city's water treatment facility.	MND	09/20/2017
2017082065	Siskiyou II Science Replacement Building Project California State University, Chico Chico--Butte The proposed project is the demolition of the existing Siskiyou Hall and the construction and operation of a new Siskiyou II Science Replacement Building on the CSU, Chico campus. This project replaces the functions in the existing Physical Science Building, which is inadequate for the teaching of science today. The new facility will be a four and five-story, 135,000 gsf structure that will efficiently use the land mass available for the building and meet the current and future instructional needs of the University. When completed, the project will provide a structure that will provide laboratories, support space, offices, classrooms, and a vivarium. The proposed project is consistent with the University's adopted 2005 Campus Master Plan.	MND	09/20/2017

2017082066	Use Permit 17-04 AT&T Austin Lane Tehama County --Tehama To establish a 150' monopine telecommunications tower. Associated equipment includes a propane generator, equipment shelter, entire tower, and an enclosed 6' fence. The proposed project is located in an AG-2 (Valley Floor Ag) zoning district/Valley Floor Ag GPD. The project is located within the southern Cottonwood area about 3000 ft northeast of the Austin Lane/View Drive intersection. The property is accessed from Austin Lane at 17100 Austin Lane, Cottonwood.	MND	09/20/2017
2017082067	City of Crescent City Water Improvement Project Crescent City Crescent City--Del Norte The existing transmission pipes operated by the city are fully functional. However, it has been identified that pipelines in the vicinity of: Kings Valley Road, Blackwell Lane, and Sutter Coast Hospital are vulnerable to system failure due to the lack of redundancy. Given the possibility of seismic events in our area that could disrupt drinking water service, it is critical that the city do all that is reasonable to increase reliability of the water system. Improvements are important to give the city and emergency services operational flexibility and protect the residents from a catastrophic failure. While there are not any existing compliance issues with the water pipes in the city, the pipeline improvements proposed herein are essential to water redundancy and security.	MND	09/20/2017
2017081046	Proposed Amendments to APCD Rule 74.2, Architectural Coatings Ventura County --Ventura Proposed amendments to APCD Rule 75.2 are designed to further reduce Reactive Organic Compounds (ROC) air pollution from the use of architectural paints.	NOP	09/20/2017

	<p>will be routed through the new 40 foot by 60 foot open air treatment facility by a pump. 2 Multimedia filters, 2 ion exchange filters, and a carbon filter will help treat the water. Wastewater will be pumped to a newly installed 12 foot wide by 7 foot tall 5,000 gallon tank, and through a 4-inch diameter pipe to an evaporation pond. A 1-inch diameter brine line will travel from the ion exchange filters to the brine tank. The clean water will be pumped through 1 1/2 and 3 inch piping to 2- 10,000 gallon clear well tanks, 12 foot wide by 12 foot tall. The treatment system is part of a larger project to construct 3 young hen houses, 7 lay houses, a manure handling system, wastewater handling, storm drainage storage, an office (2,734 feet), egg processing plant (20,843 feet), cooler (15,162 ft), dry storage (9,700 ft), and install 13 backup generators. Onsite parking, a vehicle wash station, and perimeter and facility fencing will be installed. The project will provide for the operation of the facilities.</p>		
2017012038	<p>State Route 12/Church Road Intersection Improvements Project Caltrans #4 Rio Vista--Solano Caltrans proposes to enhance operation and safety characteristics at the intersection of SR-12 and Church Road by removing turn movements from the through traffic with the addition of a left turn lane, and providing acceleration/deceleration lanes for right turns.</p>	NOD	
2017088474	<p>Lake Skinner Routine Maintenance Projects (Lake or Streambed Alteration Agreement No. 1600-2016-0192-R6) Fish & Wildlife #6 --Riverside The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement number 1600-2016-0192-R6, pursuant to Section 1602 of the Fish and Game Code to The Metropolitan Water District of Southern California (MWD). MWD proposes the removal of accumulated vegetation and sediment in the Lake Skinner Spillway and at the Lake Skinner Dam that has the potential to impede and compromise the proper functioning of the facilities. MWD is also proposing to excavate to restore flow capacity to Tualota Creek through the intersection of Auld Rd. and Borel Rd. Routine maintenance would also be conducted semi-annually and following large storm events on an as-needed basis for all three projects. Project 1 consists of recurring temporary impacts to 0.046 acres of freshwater marsh. Project 2 consists of recurrent temporary impacts to 0.631 acres of Southern willow scrub/woodland and freshwater marsh. Project 3 consists of recurring temporary impacts to 0.066 acres of southern willow scrub, and a one-time temporary impact to 0.181 acres of non-native grassland. Habitat restoration will include non-native invasive species removal and enhancement of 1.37 acres within the Tualota Creek/ Lake Skinner Watershed, and seeding to 0.181 acres of non-native grassland.</p>	NOE

2014011018	Chinese Bible Church of San Diego San Diego County San Diego--San Diego The project would construct five buildings in two phases totaling 89,234 sf of usable space. The buildings would consist of a sanctuary/administration building (43,500 sf), education building (12,934 sf), meeting building (5,932 sf), fellowship hall (13,812 sf) and learning center (13,056 sf). Parking would be provided for 417 vehicles, including 406 standard spaces and 11 handicap-accessible spaces.	SIR	10/06/2017
1985122502	Roadrunner Club Supplement, San Diego County San Diego County --San Diego Project is a Tentative Parcel Map Time Extension of the previously approved TPM 21181, approved by the Director of Planning & Development Services on June 19, 2012. The project consists of converting an existing rental mobile home park on a single lot into a 4 lot resident-owned condominium mobile home park. Parcel 1 is 139 acres, parcel 2 is 32 acres, parcel 3 is 10 acres, and parcel 4 is 9 acres. The applicant has requested an extension of 6 years to complete all conditions and record the Parcel Map.	NOD	
2002112033	Sonoma-Marin Area Rail Transit Todd Road Operations and Maintenance Facility Sonoma Marin Area Rail Transit Commission Petaluma--Marin, Sonoma CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0092-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, SMART as represented by Bill Gamlen. Project will construct approx. 2 miles of passenger rail service from the Smart Downtown San Rafael Station to the proposed SMART Larkspur Station. In general, the project will utilize the existing Northwestern Pacific (NWP) Railroad rail corridor. The proposed railway improvements include three major components: track work, road crossing improvements, and trestle replacement at three locations. Two trestle replacements are over water bodies; San Rafael Creek and, what is referred to as, the Unnamed Channel. The third trestle replacement is over a roadway.	NOD	
2003101060	Aliso Viejo General Plan Aliso Viejo, City of --Orange Project modification will allow for construction of two Residence Halls and Science Technology, Engineering and Mathematics (STEM) academic building and within the existing Soka University campus (the "Modified Project"). The Project requires a CUP to amend the Master Plan of Development for Soka University to consolidate five classroom/laboratory buildings into one larger science building, increase the total sq. footage of the building from 65,000 sq. ft. to 90,425 sf, and increase the maximum building height from 65 feet to 79 feet. The modified project requires Site Development Permits to construct the residence halls and STEM Building, and a Site Development Permit. Each residence hall is approx. 23,077 sf (total of 46,155 sf for both dormitories) and would provide 50 student units and 1 apartment for faculty/staff (total of 100 student housing units and 2 faculty/staff apartments) on approx. a 2.29-acre site. The 4-story STEM Building will be constructed on approx. 1.16 acres located in the center of the campus. Parking to serve the Modified Project is currently available on the campus.	NOD

2017078085	2017 Storm Damage- DWR Emergency Rehabilitation Water Resources, Department of --Colusa, Lake, San Joaquin, Solano, Stanislaus, Sutter, ... The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement number 1600-2017-0525-R1, pursuant to Section 1602 of the Fish and Game Code to the California Department of Water Resources. The Project is limited to reconstructing and enlarging a pre-existing levee slope, which failed during the 2016/2017 winter floods. The project includes installing a turbidity curtain, clearing of surface vegetation, removing fallen valley oak within the repair footprint, protecting native trees within the repair footprint, excavating levee soils disturbed by the failure and transition zones to 1.5:1 slope, excavating a key trench for clean rock placement, placing geotextile fabric along bottom key trench, placing clean launch rock below water surface, reconstructing levee slope with rock fill and soil in voids from the excavation or from an off-site borrow areas to a 2:1 slope, installation of willow pole cuttings, and hydro seeding with native grasses and forb seed mix for all disturbed area located above the water level.	NOE	
2017088504	Temporary Permit Authorization for CleanTech Environmental, Inc. Toxic Substances Control, Department of Irwindale--Los Angeles The project consists of approving a new 180-day Temporary Permit Authorization (TPA) to CleanTech Environmental, Inc. (CleanTech) for the continued operation of a used oil filter-crushing unit. The treatment capacity will remain unchanged and all operations will occur inside the existing facility.	NOE	
2017088505	Renewed office space lease is a multi-tenant office building. Insurance, Department of Sacramento--Sacramento Agency will renew lease for +_ 92,114 square feet of office space in a multi-tenant office building.	NOE	
2017088506	Stafford River Bar Signs Installation Parks and Recreation, Department of --Humboldt Install one (1) boundary/management sign and one (1) information kiosk sign along the access road running from North Road to the Stafford River Bar in Humboldt Redwoods State Park to provide location and interpretive information to park visitors. Work will: For the boundary/management sign: - Excavate by hand one (1) 2' x 2' x 3' deep hole; - Pour concrete footing and set a 8' metal post in the concrete, and - Attach (1) 3 1/2" x 24" sign delineating the park's boundary and two (2) 18" x 24" standard land management signs. For the information kiosk sign: - Excavate by hand two (2) 2' x 2' x 3' deep holes; - Pour concrete footings in each hole and set 4" x 4" redwood posts; and - Attach a 5' wide x 6.5' high x 1' deep bulletin board type sign for posting	NOE

	survive without it; Mulch, water and prune the orchard trees; and remove competing vegetation		
2017088514	San Joaquin River Erosion Repair Project (Streambed Alteration Agreement No. 1600-2017-0191-R4) Fish & Wildlife #4 Ripon--Stanislaus The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement number 1600-2017-0191-R4, pursuant to Section 1602 of the Fish and Game Code to the California Department of Water Resources. The project includes activities related to the armoring of an approximately 715 foot linear length of the left (west) bank of the San Joaquin River that has eroded to a condition of near vertical slope.	NOE	
2017088515	Installation and Soft Cost Reduction for Horizontal Single Axis Trackers (Stage II) Energy Commission Davis--Yolo Nevados Engineering proposes to demonstrate an all-terrain single axis solar PV tracker that can fit to sloped and rolling terrains. This tracker will help solar developers build projects on lands that typically would not be considered, creating more site options. The new tracker uses standard support posts found in the conventional flatland tracker market. These support posts utilize load distribution design that allows each post to resist the "Slope Load". The Construction costs are dramatically reduced by eliminating the need for grading soil with reduced environmental damage and mitigation costs. The tracker system was developed through a DOE award and installed at PVUSA testing site in Davis. This Energy Commission grant will fund tracker system improvements operation and testing of various components in an effort to find cost-cutting opportunities to update the product design and optimize it for full-scale manufacturing. Further testing will be conducted to demonstrate the reliability and robustness of the single axis tracker design.	NOE	
2017088516	Development, Implementation, and Integration of a Holistic Solar Forecasting System for California Energy Commission Los Angeles, City of, Ontario, Benicia, Visalia--Los Angeles, San Bernardino, Solano, Tulare The purpose of this Agreement is to fund the development of improved forecasting of solar irradiance in California, with a particular focus on fog and stratus conditions, through targeted deployment of data collection instrumentation. The improved forecasts will be integrated into operational tools for use by the California Independent System Operator (CAISO) and utilities. This Agreement will utilize a targeted instrumentation network, consisting of existing and new sensors, to improve the models used for forecasting fog and stratus conditions. The Recipient will design and deploy this network with the aim of improving the forecast that are most important to CAISO and utility operations. The equipment to be installed in the five existing monitoring sites is: ceilometers, pyranometers for solar irradiance, SODARs, and surface meteorological stations. The beneficiaries of this project will include utility ratepayers.	NOE

	for areas with seasonal closures; and purchasing materials to maintain informational kiosks. The project also includes annual soil monitoring.		
2017088522	Plumas National Forest, Restoration Parks and Recreation, Department of Oroville--Butte, Plumas, Yuba, Sierra The project funds restoration activities in areas impacted by unauthorized OHV use in the Feather River Ranger District. The restoration activities will focus on effectively closing illegal routes and improving existing closure points with boulders or wooden barriers, installing trail signage, and disguising visible illegal sections of trail using slash and other onsite native materials. Sites will be monitored following implementation to evaluate effectiveness of the treatments.	NOE	
2017088523	San Bernardino National Forest, Ground Operations Parks and Recreation, Department of --San Bernardino The project funds trail maintenance on 65 miles of ATV/motorcycle trails, including materials, supplies, and equipment. Maintenance activities include installing rock to harden stream crossings and comply with existing Biological Opinions and BMPs and purchasing trail limiters and hand tools. Trail maintenance uses a SWECO 480 tractor, Kubota trail tractor, and Kubota KX71 excavator. Facilities operations and maintenance includes maintaining and repairing 5 staging areas, 6 parking/trailer sites, and 3 full service developed campgrounds, including cleaning, stocking, trash removal, painting, and repairing facilities including buildings, toilets, loading ramps, shade structures, picnic tables, and signs.	NOE	
2017088524	Stanislaus National Forest, Ground Operations Parks and Recreation, Department of Sonora--Tuolumne, Calaveras The project funds ground operations located on the Mi-Wok, Calaveras, Summit, and Groveland Ranger Districts in Stanislaus National Forest. Ground operations and maintenance include restroom cleaning, garbage services, campsite cleanup (break up fire rings and pick up litter), vault restroom pumping, and informational kiosk maintenance. Routine route repair will occur on designated routes. Routine route repair includes travel way brushing,; rock, log, and debris removal; drainage structure maintenance; tread grading; sign repair/replacement; and immediate repair of traffic control barriers to confine OHVs to designated routes.	NOE	
2017088525	Cleveland National Forest, Ground Operations - North (Wildomar) Parks and Recreation, Department of Lake Elsinore--Riverside The project funds the trail and operations maintenance within Wildomar OHV Area. ground operations maintenance includes cleaning the use areas, vault toilet pumping, potable water quality testing, trash removal, restocking restroom supplies, maintaining and replacing signs, and trail use monitoring. Light to heavy trail maintenance includes grading and recontouring the trail tread and maintaining and installing drainage features such a rolling dips, water bars, and siltation basins. Funding will also be used to staff wildlife biologists, archeologists, botanist, and hydrologist/soil scientist positions to provide monitoring, record data, and prepare reports.	NOE

2017081049	Infrastructure Master Plan Update & Capital Improvement Projects South Coast Water District Dana Point--Orange SCWD has prepared an infrastructure master plan update with recommended Capital Improvement projects for the district's water, wastewater, and recycled water systems. Since the District's service area is generally built out, the IMP update is intended to focus on meeting projected demands for redevelopment, resolving facility deficiencies, and planning for infrastructure replacement and expansion. The IMP Update identifies current and potential system inefficiencies or deficiencies and recommends CI Project necessary to sustain reliability, support ongoing maintenance and provide a basis for future planning and design of infrastructure over the next 25 years.	MND	09/22/2017
2017082074	Deadman Gulch Restoration Project Santa Cruz County --Santa Cruz The proposed Deadman Gulch Restoration Project would apply silvicultural treatments to approx 110 acres of second growth redwood and redwood-Douglas fir forest with the goal of restoring conditions under which the forest would more rapidly re-acquire its former "old growth" condition. Treatments would focus on thinning hardwoods and small conifers, where such treatments would benefit already-established redwoods, Douglas-fir, and hardwoods. Treatments of this kind have been shown to increase growth rates of retained trees and to expedite the acquisition of old-growth characteristics. Other treatments would be used to convert small areas of hardwood to Douglas fir, where it is determined that Douglas fir have been displaced by fire and timber harvest. Treatments would also reduce the risk of catastrophic wildfire.	MND	09/22/2017
2017082075	2017 Calaveras County Regional Transportation Plan Calaveras County Council of Governments --Calaveras The proposed project is the adoption and implementation of the 2017 Calaveras County RTP. 	goods movement. The RTP contains policies, actions, and financial strategies for short-term and long-term transportation projects. The RTP has a planning horizon through 2037, but is updated every five years.		
2017081051	4th Corner Apartments San Diego, City of San Diego--San Diego A Site Development Permit to demolish an existing historic structure (American Legion Hall, HRB #525) and construct 73 apartment units with amenities totaling approx. 99,537 sq. ft. on multiple lots with 86 on-site, at-grade parking spaces. One existing commercial building located at 4089 Fairmount Avenue would remain unaltered. The proposed residential amenities would consist of 6,150 sq. ft. of outdoor community recreation open space on the podium deck; a 1,447 sq. ft. community room; a community kitchen; laundry room; and lounge. Various site improvements would also be constructed that include associated hardscape and landscape. The project would conform to the Affordable/In-fill Housing and Sustainable Buildings Expedite Program by providing affordable housing. Deviations from applicable regulations for two non-contiguous parcels as a single premise, floor area ratio, height, setbacks, and building transparency are also being requested.	NOP	09/22/2017
2017081050	San Diego Creek Water Rights Change Petition Project Irvine Ranch Water District Irvine--Orange The proposed project is a modification of IRWD's SWRCB Permit for Diversion and use of water (permit 20979), which is an appropriate water right to divert water from the San Diego Creek for "Wildlife Enhancement" at the IRWD San Joaquin Marsh. The San Joaquin Marsh is a constructed treatment wetland, and water is discharged back to San Diego Creek with improved water quality. The proposed modifications would include changing the Place of Use to include the entirety of IRWD's San Joaquin Marsh and Wildlife Sanctuary and the neighboring Freshwater Marsh Reserve owned by the UC NRS and increase the Rate of Diversion from 5 cfs to 13.3 cfs. The proposed project would not change the permit's face value of 3,600 AFY.	Neg	09/22/2017
2017051024	UCLA Long Range Development Plan Amendment (2017) and Housing Projects University of California, Los Angeles Los Angeles, City of--Los Angeles UCLA proposes to amend the existing long range development plan to add 1,500,000 gross square feet of development space allocated to student housing at 5 sites on the UCLA main campus. Up to 6,900 new student beds would be accommodated by the proposed LRDP amendment.	SIR	10/09/2017
2009072025	Reuse of the Mare Island Drydocks Vallejo, City of Vallejo--Solano CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0306-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Mare Island Dry Dock, LLC. Project is limited to clamshell bucket dredging to remove accumulated sediment in front of Dry Docks 1-4 and Berths 12-15. Mare Island Dry Dock (MIDD) will dredge approx. 80,000 cubic yards of sediment per year from the Mare Island Strait. To accommodate the docking of deep draft vessels, MIDD will also perform three	NOD

	maintenance dredging episodes removing approx. 20,000 cubic yards per episode, for an annual total of 140,000 cubic yards.		
2010042093	Fairfield Train Station Specific Plan Fairfield, City of Fairfield--Solano This proposed project involves the development of agricultural grassland into an industrial park. Project activities include grading and filling of the entire project site to accommodate foundation pads for buildings, streets, parking areas, other infrastructure and utilities. Project will result in impacts to 82.62 acres of CA tiger salamander (<i>Ambystoma californiense</i>) habitat; the project will permanently remove 52.29 acres of CA tiger salamander habitat and temporarily impact 30.33 acres. The project is expected to result in incidental take of CA tiger salamander, which is designated as a threatened species under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of project implementation.	NOD	
2010061037	Imperial Solar Energy Center West Imperial County --Imperial The Project will consist of construction of a 150 Megawatt (MW) photovoltaic solar energy facility and a transmission interconnection line (T-line) on approximately 1,145.55 acre. The Amendment will increase the permit from 90 days to 21 months, increase the disturbance acreage by 478.26 acres by adding Blocks 4-5, and will increase the direct number of lizards taken by morality/injury/relocation. Construction will continue in Blocks 1-3 and will begin in Blocks 4-5. Once construction is complete Operation and Maintenance activities will occur within the solar site and continue along the transmission line. This will result in total impacts to 1,145.55 acres of flat-tailed horned lizard (<i>Phrynosoma mcallii</i>) habitat. The project is expected to result in incidental take of flat-tailed horned lizard, which is designated as a candidate species under the California Endangered Species Act (CESA). The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation. The Amendment will extend the time the Permittee has to provide compensatory Habitat Management lands from 18 months to 36 months ending in March 1, 2018.	NOD	
2014032060	Saranap Village Mixed Use Project Contra Costa County Walnut Creek--Contra Costa The applications below were approved by the Board of Supervisors on Aug. 15, 2017: Hall Equities Group (Applicant), Saranap Village Developers LLC. (Owner), Atrium Villa HOA (Owners), County File #GP13-0003: The applicant requests approval of amendments to the General Plan in relation tot he proposed Saranap Village Mixed Use Project that consist of 1) changing the existing commercial (CO) and Multiple-Famiyl Residential, Medium Density (MM) land use designation of the project site to a project-specific Mixed-Use designation (M-15), 2) amending text of the Land Use Element to describe the M-15 designation, 3) amending the Roadway Network Plan of the Transportation and Circulation Element by way of changing the roadway classification for a segment of Blvd Way from "Arterial" to "collector" with associated text, and 4) modifying language of General Plan Implementation Measure 5-w pertaining to the maximization of traffic flow on	NOD

2015031086	<p>Groundwater Land Retirement/Groundwater Conservation Easement Program Angiola Water District --Tulare</p> <p>The Program includes AWD's imposition of covenants restricting groundwater use on up to about 75 Project Parcels consisting of about 7,181 acres, and possibly other parcels within the Program area, which covenants would prohibit groundwater extractions and use on those lands in the critically over drafted Tule Subbasin. AWD could pump an additional 1.6 acre feet over a 5-year rolling average period from its existing well field lands per acre of land enrolled in the Program, subject to applicable terms and conditions of a Cooperative Agreement for Groundwater Protection between AWD, and Pixley and Lower Tule River Irrigation Districts effective Jan. 1, 2013.</p>	NOD	
2016012025	<p>Airway Community Care Santa Rosa, City of Santa Rosa--Sonoma</p> <p>CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0181-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Pacifica Airway LP.</p> <p>Project is limited to the following: Realigning the current flow line of the Southern portion of Piner Creek southward to accommodate for the care facility. The realigned creek channel will have approx. 3 times the cross sectional area of the current Piner Creek to establish lower water velocities and help reduce erosion. A 72-inch culvert will be extended south from its current location under Airway Dr. in order to connect to a new 5-foot by 7-foot box culvert that will be the new outfall for the realigned creek. A riprap apron will extend from the outfall for approx. 35-linear feet downstream. Two new bioswales and storm drain outfalls will be constructed along the banks of the newly aligned South Piner Creek. One bioswale and outfall structure will be constructed along the bank of North Piner Creek.</p>	NOD

	provides an emissions inventory forecasts for VOC and NOx, and describes photochemical modeling results. Establishes motor vehicle emissions budgets (for 2018, 2021, 2024), and demonstrates Reasonable Further Progress.		
2017088587	Mil Potrero Mutual Water Company New/Replacement Wells 9 and 10 State Water Resources Control Board --Kern The State Water Resources Control Board as the lead agency will be issuing a water supply permit. The Mil Potrero Manual Water Company proposes to drill 2 new wells, Well 9 and 10, each at or below 125 gallon per minute. Mil Potrero MWC will also be installing two 128 square foot, 12-foot tall buildings, one to house each new well, along with 800 feet of 6 inch piping and 100 feet of 3-inch piping to connect the wells to the system and provide for discharge. A 47-gallon chlorination tank. 5.25 square feet, chlorination pump, and .25 inch tubing may also be installed near each well to provide for chlorination of the water produced. The wells will be used in combination with the system's existing wells to maintain the typical production rate of the system. Existing wells 2-5, each between 30-45 years old, have each failed in the past and will each be phased out as they fail in the future. Well 1, that is over 45 years old, and well 6, that is over 30 years old, is planned to be used as a standby well. As the old wells are phased out the production capacity from wells 9 and 10 will be increased to maintain the normal demand. For each phased out well, a destruction permit will be obtained and corresponding failed well will be destroyed. This project will provide for the operation of these facilities.	NOE

2017088598	<p>San Bernardino Courthouse Annex Tenant Improvements Judicial Council of California San Bernardino--San Bernardino</p> <p>The proposed project would consist of interior tenant improvements to the 1st floor of the San Bernardino Courthouse Annex, which is currently used for storage. Once renovations are complete, approximately 30 technology department staff members would relocate to the Courthouse Annex building. The technology department is currently in a building leased from the County of San Bernardino and the lease will expire in 2018. The proposed renovations would provide for a permanent and functional space consistent with the work performed by the technology department. In addition, moving the technology department to the newly renovated building within the downtown court complex would put them in closer proximity to a majority of the court staff and in turn, would improve response time when technical support is required.</p> <p>The proposed renovations include the construction of five new offices, one conference room, one computer and equipment repair room, replacement of ceiling tiles where needed, installation of new carpet, new paint, and ungraded cabinets and sink in the existing breakroom. Proposed demolition involves the removal of carpeting throughout, demolition of several interior walls, removal of suspended ceiling, and the removal of cabinetry and book cases. Construction would begin in late 2017 and be completed in early 2018.</p>	NOE

2017011048	<p>Mesa Housing Nuevo West and East University of California, San Diego La Jolla--San Diego</p> <p>The proposed Mesa Housing Nuevo West and East project consists of two campus student housing developments and a parking structure located on separate but proximate sites within the east campus Mesa Housing Neighborhood. Nuevo West would redevelop an approx 6.2-acre site, replacing existing low-density housing with 802 new student beds and 82 new beds for the UC SD Family House. The parking structure would be developed on an adjacent 3.2-acre. Nuevo East would redevelop an approx 13.2-acre site, replacing existing low-density student housing with 1,374 new beds. Utility and roadway improvements associated with the project are also proposed along and in the vicinity of Miramar Street and Athena Circle and include constructing an internal campus connection between Miramar St and Athena Circle.</p>	EIR	10/09/2017
2017081053	<p>Raznick Mixed Use Project Calabasas, City of Calabasas--Los Angeles</p> <p>The proposed Raznick Mixed Use Project includes the demolition of two existing commercial buildings and a parking lot, and construction of a four-story senior apartment building, a one-story stand alone commercial building, and associated grade level parking. The proposed four story apartment building would be approx 43,000 sf and would include 42 units surrounding a central outdoor courtyard located on the second floor. The ground floor of the apartment building would include two lobbies, mail room, office space, kitchenette, lounge area, recreation</p>	MND	09/25/2017

	room, and a 38-stall parking garage.		
2017081054	Vesting Tentative Tract Map 13-002 (Tract 2985) and Planned Unit Development 13-002 Arroyo Grande, City of Arroyo Grande--San Luis Obispo The development plan will create eleven residential lots and construct 11 single family homes on a 4.6 acre property that includes a portion of Arroyo Grande Creek. The lots are arranged around a private drive accessed off of Highway 227 and located between the 35' creek setback area and the highway. The topography of the property is relatively flat. Several mature pine and eucalyptus trees line the top of the creek bank, most of which are proposed to be removed due to declining health. A planned unit development application is required to deviate from net lot size, lot dimensions and setbacks.	MND	09/25/2017
2017081055	Temescal Canyon Road Widening Project - Dos Lagos Segment Riverside County Corona--Riverside The Riverside County proposes to widen Temescal Canyon Road between Leroy Road and Dos Lagos Drive to relieve traffic congestion and bring the roadway up to current County design standards for Major Highways. The existing roadway consists of one lane in each direction through most of the project area but has already been improved to a four lane facility near the intersection of Dos Lagos Rd. Temescal Canyon will be widened from two lanes to four lanes with sidewalks and shoulders.	MND	09/25/2017
2017081056	Temescal Canyon Road Widening Project - Dawson Canyon Segment Riverside County Corona--Riverside Riverside County proposes to widen Temescal Canyon Road to provide two travel lanes in each direction from south of Dawson Canyon Rd to 0.7 mile northerly to match the four-lane roadway facilities north and south of the project and bring the roadway up to current County design standards. The existing roadway consists of one lane in each direction. The purpose of the project is to relieve congestion along Temescal Canyon Rd and improve safety, which includes an increase in sight distance along Temescal Canyon Rd. The project's purpose will also bring the roadway up to current County design standard for Major Highways.	MND	09/25/2017
2017082076	General WDRs for Discharges from Hydrostatic Testing of Natural Gas Pipelines & Related Activities State Water Resources Control Board -- The State Water Resources Control Board prepared a general order for planned, emergency and unplanned discharges from the hydrostatic testing of natural gas facilities and for site dewatering related to excavation, construction, testing, and repair of natural gas facilities to surface waters and to land, that will apply statewide. The adoption of the general order is considered a project and is subject to environmental review pursuant to the CEQA. The general order shall implement the provisions, prohibitions, and water quality objectives contained in statewide and/or region-specific water quality control plans that govern the discharge. 2008121014	Los Angeles River Ecosystem Restoration Study Los Angeles, City of Los Angeles, City of--Los Angeles LA River - Taylor Yard G2, ID #2015058. Allocation for a grant to the Mountains Recreation and Conservation Authority to assist with the acquisition of a Multipurpose Easement over 9+ acres of a 41+/- acre property, commonly known as the Taylor Yard G2 parcel, for habitat restoration, open space preservation, and to provide potential future wildlife oriented public use opportunities.	NOD	
2014062010	Rohner Creek Flood Control, Habitat and Seismic Improvement Project Fortuna, City of Fortuna--Humboldt Project received a grant from DWR Urban Streams Restoration Program to fund Phase 1. The project consists of in-stream channel improvements to Rohner Creek and Hillside Creek, the replacement fo five bridges, a Rohner Creek floodplain swale and channel improvements through existing undeveloped agricultural pastures, and retrofitting of the 12th Street culvert. The improvements, in conjunction with the larger project, will convey flows up to the 100 year even and allow smaller flows to regularly inundate the inset floodplain along Rohner Creek, restoring channel-floodplain connectivity.	NOD	
2015011041	San Joaquin River Parkway Sycamore Island Pond Isolation Project San Joaquin River Conservancy Fresno--Fresno, Madera The San Joaquin River Conservancy proposes to restore alternate vehicle access between Sycamore Island and the Van Buren Unit on the San Joaquin River, repairing a 2005 berm breach, and isolating Gravel Pit 46e from the river channel. The project would additionally construct an equalization saddle, strengthen the existing berm, create a gravel road on top of the saddle and berm, and create and restore floodplain habitat.	NOD	
2015081009	PLAN Hermosa: City of Hermosa Beach General Plan and Local Coastal Program Update Hermosa Beach, City of Hermosa Beach--Los Angeles The City of Hermosa Beach has initiated a comprehensive program to update its General Plan and Local Coastal Program (PLAN Hermosa). OPR 2003 General plan guidelines suggest integration of the general plan and local coastal program into a "coherent and internally consistent local general plan. As such the city has decided to update both the general plan and the LCP at this time. The general plan and lcp update addresses land use; mobility; parks, recreation, and open space; coastal hazards; water quality; air quality and climate change; noise; and other issues that are important to the community. The LCP consists of two parts: a coastal land use plan and a local implementation plan.	NOD	
2015101049	Las Virgenes Creek Restoration Project - Phase II Calabasas, City of Calabasas--Los Angeles The proposed project involves two primary components: creek restoration and development of public access facilities. Creek and riparian corridor restoration includes activities such as: debris removal, erosion and sediment control and biotechnical slope and bank stabilization, fish habitat enhancement, fish passage barrier removal, and improving flood carrying capacity through selective willow thinning and removal of aggressive exotic trees and shrubs. Public access	NOD

	facilities that would be developed as part of the proposed project include public trails and environmental education areas.		
2015122055	2016 Fisheries Restoration Grant Program, the Steelhead Report Fish & Wildlife #2 --Del Norte Project will construct large wood structures at three locations to enhance/restore floodplain connection, increase stream channel habitat with LWD structures. Restore floodplain connectivity and increase instream channel habitat complexity in a .21 mile reach of the South Fork Scott River, a tributary to the Scott River.	NOD	
2016122052	The 2016 Fish Habitat Restoration Project Fish & Wildlife (HQ) Environmental Services --Del Norte Project is limited to installation of eight double-walled, smooth bore plastic pipe (DWPP) culverts at watercourse crossings, which will be dry during construction. All culverts will be 15 inch diameter and are designed to accommodate 100 year flow events. Culverts will be placed at grade with each crossing excavated by a small excavator. After placement, culverts will be covered with excavated dirt and road rock. One culvert will have 10 yards of 1/2 ton boulders placed at its outfall to stabilize cattle-induced erosion.	NOD	
2017052003	MDP 2017-07 Super Store Industries (Amended) Turlock, City of Turlock--Stanislaus The applicant requesting approval to construct of the development of three parcels totaling 26.14 acres for the construction of a new processing plant, guard shack, and parking lot for Super Store Industries. The project will be constructed in two phases. Phase 1 will include the construction of two parking lots at 1013 S. Kilroy Road (Stanislaus County APN 044-010-012) and will begin construction within one year of approval. Parking Lot 1 will have a total of 242 parking spaces for employees and Parking Lot 2 will have a total of 97 spaces for trailer parking and a restroom for those waiting to be called to unload their trucks. Phase 2 will include construction of a 157,018 sq. ft. processing plant that will connect to the existing 155,728 sq. ft. processing plant at 2600 Spengler Way (Stanislaus County APN 044-010-013) and will begin construction once construction of the parking lots is completed. The guard shack and truck scale will include an off street stacking lane for incoming delivery trucks to be packaged dairy and juice. The proposed project will be an expansion of the current facility and will increase the production of the same packaged dairy and juice.	NOD	
2017061043	Bison Avenue Surface Parking Lot University of California, Irvine Irvine--Orange The proposed project would construct an approx 330,000 gsf surface parking lot that would accommodate up to 1,100 spaces on the approx 7.6-acre site. The project scope includes vegetation clearing; grading; asphalt paving including two driveway connections to Health Sciences Drive; construction of pedestrian walkways; and installation of lighting to allow 24-hour use, drainage improvements, electric vehicle charging stations, landscaping, and irrigation. The proposed project would be constructed to allow for the future installation of an information booth and security access gate if deemed necessary at a later time.	NOD

1996022060	Vineyard Springs Drainage Master Plan Revision of Laguna Creek Flood Control Sacramento County Vineyard (subdivision)--Sacramento CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0073-R2), pursuant to section 1602 of the Fish and Game Code to the project Applicant, County of Sacramento. Project is limited to the installation of a diversion weir and outfall structure as part of the Southgate Water Quality Basin. The diversion weir will be constructed to direct subdivision runoff through a water quality basin prior to entering Laguna Creek. The weir elevation has been designed to allow for runoff during large storm events to bypass the basin and flow directly into Laguna Creek. The outlet structure will be constructed to allow water to flow from the basin into the creek. Improvements to the creek will include the installation of a concrete headwall and wing walls, a 24-inch diameter pipe outlet with a flap gate, and rip rap surrounding the new concrete structure.	NOD	
2010082030	Eastside Retention Basin Drainageswale Vegetation Clearing Project Santa Clara, City of San Jose--Santa Clara CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0328-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, City of Santa Clara. The City of Santa Clara will conduct routine maintenance activities in an unnamed drainage channel (Eastside Retention Drainage Channel). The Eastside Retention Drainage Channel is 3,780 feet long and 25 feet wide. This channel will be mowed annually to a height of 4-6 inches above the ground using a Marsh Master with twin hydraulic cutters. Vegetation will be raked, loaded into a dump truck, and disposed of offsite.	NOD	
2010102044	Supplemental PEIR - 2017 Central Valley Flood Protection Plan Update Water Resources, Department of -- The 2017 CVPP Update builds on and refines the system wide approach described in the 2012 CVFPP for implementing possible future food management improvements in the Central Valley with a focus on lands currently protected by the State Plan of Flood Control. The SEIR analyses potential environmental impacts resulting from the 2017 CVFPP Update.	NOD

2017082089	Sloat-Poplar Valley Road Bridge (NO. 9C-0149) Replacement at Middle Fork Feather River Plumas County --Plumas The project would construct a new 344 ft long and 26 ft wide bridge over the Middle Fork Feather River on Sloat-Poplar Rd consisting of two 11 ft wide shoulders and the removal of the existing one-lane bridge. The new bridge approaches will conform back to the existing roadway. Traffic on the existing bridge will remain in place during construction to provide access to residences, mining operations, and private and federal forest lands. The preferred alternative is to construct a new structure immediately adjacent to the existing bridge in order to accommodate traffic on the existing structure, thus avoiding development of a temporary river crossings. The existing bridge will be removed after the new bridge is operational.	MND	09/28/2017
2017081059	Duke Warehouse at Perris Boulevard and Markham Street Project Perris, City of Perris--Riverside The project applicant proposes an amendment to the Perris Valley Commerce Center Specific Plan to change the land use designation to the western 35 acres of the project site from BPO to LI and to remove Goldenvue Drive, Johnson Ave, and Via Verona St from the Circulation Plan. The specific plan amendment is proposed to accommodate the construction of an approx 1,189,860 sf building with approx 1,169,860 sf for warehouse distribution uses and approx 20,000 sf of supporting office space. The project also includes a tentative parcel map 37304, street improvements, and water (potable and recycled) and sewer facilities.	NOP	09/27/2017
1998101001	UNIVERSITY CIRCLE REDEVELOPMENT PROJECT East Palo Alto, City of Moreno Valley--Riverside This project involves approval of contract documents for the construction of landfill gas collection system components at the Badlands, Lamb Canyon, and Highgrove Landfills and as needed as needed perimeter probe installation at any Riverside County-owned landfill.	NOD	
2003011131	Malibu La Paz Ranch Development Agreement Malibu, City of Malibu--Los Angeles In Nov. 2008, the La Paz Development Agreement Project Final EIR was certified by the City. Mitigation Measure K-2 contained in the Final EIR requires intersection improvements within the existing Caltrans right-of-way to add a westbound right-turn lane along Pacific Coast Hwy at Cross Creek Road/Pacific Coast Hwy intersection improvements (CDP No. 14-036) analyzed whether the anticipated removal of a protected native sycamore tree and several non-native eucalyptus trees associated with the intersection improvements would result in any significant impacts or substantially increase the severity of the previously anticipated impacts, and concluded that no significant impacts would occur and no increase in the severity of previously anticipated impacts would result. Nevertheless, the coastal development permit for the Cross Creek Road/Pacific Coast Hwy intersection improvements was approved subject to conditions of approval which require preservation of the protected sycamore tree and non-native eucalyptus trees, and the final design of the project complies with this requirement. The coastal development permit addresses and approves these improvements required by Mitigation Measure K-2 of the La Paz Development	NOD

2016081031	<p>ICON at Panorama Project Los Angeles, City of Los Angeles, City of--Los Angeles Note: Revised</p> <p>Demolition of three existing vacant commercial buildings totaling 172,500 sf of floor area and the removal of associated surface parking areas in order to construct an approx 584,000 gsf mixed use development on an approx 8.9-acre site. The project involves the construction of seven buildings containing approx 200,000 sf of commercial floor area and 422 multi family residential units. In addition, parking for approx 1,690 vehicles and 858 bicycles would be provided on site.</p>	EIR	10/13/2017
2017081060	<p>IS Application No. 7214 (Smith Mountain, LP) Fresno County Reedley--Fresno</p> <p>Allow expansion to an existing private school approved under DRA 3481 by permitting a school-related sports facility on two contiguous parcels totaling 58 acres in the AL-20 Zone district and O Zone districts. The project site is located adjacent to the Kings River on the west side of Tulare County Road No. 44 and at its intersection with Tulare County Rd No. 428 approx one mile southwest of the nearest city limits of the city of Reedley.</p>	MND	09/28/2017
2017081061	<p>Reds Meadow Road Improvements Mammoth Lakes, City of --Madera</p> <p>The purpose of the project is to improve the deteriorated condition of Reds Meadow Rd and improve mobility to continue to provide access to recreational resources. These improvements would facilitate emergency response in the valley and facilitate the USFS goal of enhancing traffic safety by reducing the likelihood of a vehicular crash. Reds Meadow is a popular area for outdoor recreational and is important to the local tourism economy during the summer. The road provides the only vehicular access to the valley and DPNM, and is a popular access point for two nationally significant trails: John Muir Trail and Pacific Crest Trail.</p>	MND	09/28/2017
2017081062	<p>Biogas Renewable Generation Project Glendale, City of Glendale--Los Angeles</p> <p>The proposed project includes construction and operation of an approx 12 MW power generation facility that would utilize landfill gas as fuel to generate renewable energy. The proposed approx 2.2-acre power plant would be located on a portion of an approx 95-acre site owned by LA County within the city of Glendale's land use and zoning jurisdiction. The proposed project would beneficially use the landfill gas and would provide environmental and economic benefits regardless of ultimate capacity of the landfill. The proposed project would include the plant facility, natural gas pipeline, water pipeline and two water tanks.</p>	MND	09/28/2017
2017082090	<p>Bridgeway Lakes Drainage Pipeline Project Reclamation District No. 900 West Sacramento--Yolo</p> <p>The proposed project will involve construction of a stormwater drain pipeline, varying in diameter from between 24" and 54", extending from the stormwater detention basin in the north of the project area approx 11,700 ft to the south. The construction will take place parallel to the existing Bridgeway Lakes Drainage</p>	MND	09/28/2017

	Ditch. The new stormwater pipeline is necessary due to sloughing, debris, and sediment build-up in the Bridgeway Lakes Drainage Ditch that occurred during the flood events of the past winter. The least environmentally damaging alternative is to construct the pipeline versus excavation and re-constructing the damaged areas within the Bridgeway Lakes Drainage Ditch. Construction of the pipeline will avoid impacts to seasonal wetland habitats while providing efficient stormwater and flood protection.		
2010112042	Magee Ranches Danville, City of Danville--Contra Costa Note: Review Per Lead	NOP	10/02/2017
	The project proposes to develop approx 30 acres of the 410 acre project site with 69 single family homes and seven attached secondary dwelling units. Approx 380 acres of the project site would be permanent open space used for ongoing cattle grazing operations, habitat preservation and enhancement, storm water treatment, and public trails. The project would rezone the approx 410 acre property from A-4, A-2, and P-1 to a new P-1. In addition, a vesting tentative map is proposed to create the 69 single family lots on the site. The lots would be clustered and located primarily on the flatter portions of the property. The project plans are on file and available for review at the Town of Danville Planning Division. The project applicant is Davidon Homes.		
2016052024	Spring Lake Village East Grove Santa Rosa, City of Santa Rosa--Sonoma Off-site expansion of the existing Spring Lake Village Continuing Care Retirement Community. A previous NOP was issued for the project on May 11, 2016. The enclosed NOP provides info about proposed project modifications, including development of two additional properties located adjacent to the original project site, and construction of additional independent living units and other improvements.	NOP	09/28/2017
2017082091	Tulelake Municipal Airport Perimeter Fence Project Modoc County --Modoc Note: Review Per Lead	NOP	10/10/2017
	The proposed project, for which the Draft EIR is being prepared, includes construction of about 16,000 lf of 8-ft tall fencing near the perimeter of the airport. Portions of the Tulelake Municipal Airport are currently enclosed by a combination of wire fences while other areas have no fencing. The existing fencing does not restrict the general public from inadvertently walking or driving onto the airport operations area, including the runway. A wildlife hazard study of the airport found that mule deer regularly cross the active airfield, increasing the risk of a collision between an aircraft and a deer.

1994112056	<p>Adoption of the Promontory Specific Plan El Dorado County CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0156-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Russell-Promontory, LLC. Project is limited to the construction of three (3) pedestrian bridges (Crossings A - C) over three unnamed tributaries to Humbug Creek as part of a larger multi-use trail within the Promontory Specific Plan. Crossing A will be 8 feet wide and span 25 feet from bank to bank. Crossings B and C will both be 3 feet wide and span 8 feet from bank to bank. All three bridges will include associated concrete footings, wing walls, and retaining walls, which will be placed outside of the stream channel.</p> <p>During construction, temporary haul road bridges will be installed over the streams to facilitate the movement of equipment and construction materials across the site. The temporary haul road bridges will be 8 feet from bank to bank. All three bridges will include associated concrete footings, wing walls, and retaining walls, which will be placed outside of the stream channel.</p>	NOD	
2008041009	<p>University of California (UC) Merced and University Community Plan, UC Merced Phase 2 Campus University of California, Merced Merced--Merced Project consists of a boundary change for the Merced 2020 Project site to include the approx. 4.84 acre P3 construction staging and parking area located northeast of the North Bowl parking lot, and exclude a triangular area located between Le Grand Canal and Fairfield Canal and a second triangular located to the east of Fairfield Canal. The project results in a decrease in total site area from 153.4 to 143.7 acres. The boundary change encompasses the alignment of a proposed roadway that would be constructed from the 2020 project site east of the Fairfield Canal to the P3 area. This road will be paved and used to access the P3 area during 2020 project construction, and remain in place as part of the final 2020 Project. The project also relocates portions of a previously installed CA Tier Salamander exclusion fence to align with the modified 2020 Project site boundary. The Project will install the new segment of the CTS fence prior to removing the affected segment of the CTS fence.</p>	NOD	
2011089005	<p>Palmdale Hybrid Power Plant Energy Commission --Los Angeles On July 20, 2015, Palmdale Energy LLC submitted a Petition to Amend the previously approved Palmdale Hybrid Power Project. On Aug. 9, 2017, the Energy Commission approved the Petition to Amend with a Final Decision. This Committee-assigned amendment to the previously approved Palmdale Hybrid Power Project changes the project to a natural-gas-fired combined-cycle power plant with an approx. net output of 699.4 MW. The approval reduces the site to 50 acres, eliminates the solar component and replaces the combustion turbine technology with fast start flexible technology.</p>	NOD

	<p>10 years and would subject the Facility to the terms and conditions set forth in the Permit and Approved Applicant dated February 14, 2017.</p> <p>The John Smith Road Landfill consists of a Class I Area and Class III Area, occupies approx. 95.47 acres. The Class I Area Hazardous Waste Management Unit encompasses approx. 5.11 acres and includes two inactive and closed hazardous waste disposal surface impoundments measuring less than one half acre each. The Class III Area is an operating municipal solid waste landfill which encompasses approx. 90.37 acres. The Class 1 area operated between 1977 and 1983 as an unlined disposal facility of hazardous liquid waste. Impoundment 1 received the liquid hazardous waste and Impoundment 2 served as the overflow protection during storm events. Waste disposed at the Class 1 Area was primarily pesticide rinse water. The Class 1 Area was required to close under consent agreement with the U.S. Environmental Protection Agency and DTSC, and a draft closure plan was submitted to DTSC in Aug. 1989. DTSC approved the Closure Plan for the Class I Area, John Smith Road Disposal Site on May 2, 1991. Closure of the Class I Area was completed in Oct. 1992. The closure activities included the installation of a cover system, construction of surface water drainage ditches for erosion control measures, and hydraulic containment of releases to groundwater from the adjacent municipal solid waste landfill (Class III Area) with off-site treatment of the captured groundwater.</p>		
2014091020	<p>Tesoro Los Angeles Refinery Intergration Project South Coast Air Quality Management District Palmdale, Long Beach--Los Angeles</p> <p>On May 12, 2017 the South Coast Air Quality Management District, as the Lead Agency, certified the FEIR for the Tesoro Refining & Marketing Company, LLC Los Angeles Refinery Integration and Compliance (LARIC) Project as complete and in compliance with the CEQA. The project includes integration of the former BP West Coast Products LLC Carson Refinery with the Tesoro Los Angeles Refinery - Wilmington Operations to form the Tesoro Los Angeles Refinery (Refinery). The Refinery includes: 1) Wilmington Operations located at 2101 East Pacific Coast Hwy in the Wilmington District of the City of LA; and 2) the Carson Operations (former BP Carson Refinery) located at 2350 East 223rd St in the City of Carson.</p> <p>The Port must issue a joint revocable permit to Tesoro for the element of the Project described as "Interconnecting Pipelines", which would install a bundle of pipelines under the Alameda Corridor and Sepulveda Blvd. which is jointly owned by the City of Long Beach and the City of Los Angeles as part of the work that would connect pipelines between Tesoro's Wilmington and Carson operations.</p>	NOD	
2017089011	<p>8700 Antelope North Road Grading Permit Sacramento County --Sacramento, Placer</p> <p>Project consists of a grading permit to allow the development of vacant industrial property for a truck storage yard. The project will grade and install improvements on approx. 13 acres of the entire 38 acre property. Improvements will consist of street frontage improvements and landscaping along Antelope North Road; extension of utilities onto the property; mass grading for two building pads, driveway and access loop, truck parking facilities, detention basin and outfall structures.</p>	NOD

2017081063	Bermuda Dunes Country Club Non-Potable Water Golf Course Connection Project Coachella Valley Water District Indio--Riverside The project consists of construction and operation of a non-potable water connection pipeline to provide non-potable water from the Coachella Canal to the Bermuda Dunes Country Club water impoundments for irrigation. The non-potable water connection includes a connection to the Canal, a pump station at the Canal, and a pipeline from the pump pipeline will also include a stub-out connection near the intersection of Glass Dr and Avenue 42 to provide water to Myoma Dunes Mutual Water Company in the future, if necessary.	MND	09/29/2017
2017081065	City of Clovis Peach Avenue Improvements Project Clovis, City of Clovis--Fresno The project is comprised of two main components: 1) widening of the approx half-mile segment, which includes completion of a 12-ft wide quarter-mile long continuous left-turn lane north of Sierra Ave; and 2) installation of curb/gutter, and pedestrian and bicycle pathways along the entire half-mile segment. The project will require approx 13,000 sf of additional ROW from six adjacent parcels. Construction is expected to begin in September 2018 and last up to four months.	MND	09/29/2017
2017081067	Replacement Water Wells, Storage tanks & Related Improvements Tulare, City of --Tulare Replacement of 6 water wells, addition of 1-new water well (1200 gpm), addition of 2-new storage tanks, construction of new and replacement water pipelines.	MND	09/29/2017
2017081068	Rosamond Community Services District Arsenic Compliance Project Rosamond Community Services District --Kern Rosamond Community Services District would integrate eight water systems to their distribution system to provide potable water that meets applicable state and federal water quality standards. The project has been recommended by SWRCB. The district is expected to begin construction in January 2018 and take approx nine months to complete the annexation of the eight communities. All of these systems have a water distribution system currently supplied by groundwater wells. Arsenic levels for most of the systems are above the Max Contaminant Level of 10 micrograms per liter. High levels of other constituents such as chromium and uranium are also present. Additionally, six of the eight systems contain only well, and lack reliability of supply if that single well failed. Construction would consist of activities with digging, trenching, and excavation of soil to install various sizes of new pipeline.	MND	09/29/2017
2017081070	Church of Jesus Christ of Latter Day Saints Meetinghouse Project San Juan Capistrano, City of San Juan Capistrano--Orange The project includes development of a 16,558-sf Meetinghouse/Cultural Hall building and chapel with 292 fixed seats and pews on the 4.54-acre site. The max occupancy of the proposed Meetinghouse/Cultural Hall building and chapel is estimated to be 1,151 persons. The building includes a multi-purpose room which is intended to be used for basketball, volleyball, and dining purposes. The remainder of the proposed Meetinghouse/Cultural Hall building consists of offices, classrooms, and support uses. The project also includes a storage shed, an outdoor 1,990-sf pavilion, and a trash enclosure.	MND	10/02/2017

2013101008	Citywide Cat Program Los Angeles, City of Los Angeles, City of--Los Angeles Note: Review Per Lead The city of LA Animal Services Division is proposing a citywide cat program that focuses on public education and policy implementation in the city of LA. The Modified Trap, Neuter, Return policy and program for free-roaming cats would include: engaging in or providing funding for the staying and neutering of free-roaming cats (feral or stray) to be returned to where they are found; use of city facilities for educational programming; establishing collaborative relationships with organizations engaged in TNR; waiving cat trap rental fees; adopting changes to the city administrative and municipal codes related to accessing funds from the city's Animal Sterilization Fund to spay/neuter free-roaming cats; and allowing an increase in the currently permitted number of cats per household from three to five with certain restrictions.	NOP	10/30/2017
2017052062	Envision Stockton 2040 General Plan Update and Utility Master Plan Supplements Stockton, City of Stockton--San Joaquin Note: Recirculated The City of Stockton is preparing a comprehensive update to its existing General Plan. The update is expected to be completed in 2018 and will guide the city's development and conservation through 2040. The project also includes the preparation of Utility Master Plan Supplements (UMPS). The UMPS will consist of separate documents that will identify needed improvements to water, wastewater, and storm drainage facilities to serve anticipated development under the updated GP. The 2040 GP Update will include revision to the policies of the existing GP and consider changes to land use designation within the EIR Study Area where change or enhancement of existing uses is desired through 2040. The draft revision to the GP land use map will shrink the possible future footprint of the city	NOP	09/29/2017

	<p>by changing areas currently designated "village," which allows a variety of urban uses, to Open Space/Agriculture, including within the Delta Secondary Zone, where development is subject to Delta Protection Commission review. The City's Housing Element was recently updated and adopted by the City Council on April 12, 2016, and is not included as part of the proposed project.</p> <p>The overall purpose of the 2040 GP Update is to create a policy framework that articulates a vision for the city's long-term physical form and development, while preserving and enhancing the quality of life for Stockton's residents. The key components of this project will include broad community goals for the future of Stockton and specific policies and actions that will help meet the goals.</p>		
2017081066	<p>Fire Station 10 Goleta, City of Goleta--Santa Barbara</p> <p>The project is a single-story, three apparatus bay fire station of ~11,600 sf. The project would include a bifurcated above-ground fuel tank (250-gallon gasoline and 1,000-gallon diesel), an emergency generator, and outside hose drying racks. Due to on-going erosion of the northerly slope above and south of the UPRR corridor, a soldier pile wall would be constructed at the mid-slope along the northern project site property line. All project grading would be balanced on site and is estimated at ~1,350 cubic yards (CY) of cut and 2,250 CY of fill, with 900 CY of import. A General Plan Amendment is required to change the existing land use designation from Commercial Visitor Serving (C-V) to Public and Quasi-Public (P-QP) and a rezone from C-1 Limited Commercial to PI Professional and Institutional. A Coastal Development Permit is also required.</p>	NOP	09/29/2017
2017081069	<p>Rockport Ranch Menifee, City of Menifee--Riverside Note: Review Per Lead</p>	NOP	10/05/2017
	<p>The project includes the following applications: GPA 2016-287, Change of Zone 2016-288, Specific Plan 2016-286, and Tentative Tract Map 2016-285.</p> <p>The approx 79.68-acre project will be comprised of two main land uses; a residential land use component and an open space land use component. These individual land uses will be subdivided to accommodate two forms of residential development and two forms of open space use. Residential land uses totaling 38.4 acres will be a mix of single-family homes and single family courtyard residential development with each type located in clusters of like products. Open space within the specific plan area will total 20.1 acres and is the only other land use allowed within the specific plan area. Open space also will be subdivided into two categories; passive open space and recreational open space.</p>		
2017082093	<p>Well 15A Rio Linda/Elverta Water District --Sacramento</p> <p>The Rio Linda/Elverta Community Water District proposes to construct a second production well (Well 15A) at the existing Well 15 site to replace the capacities of aging and potentially noncompliant wells in Rio Linda, CA. The project includes the construction of an approx 1,500-gpm production well and extended security fencing.</p>	Neg	09/29/2017

2017082096	<p>6th Street Pedestrian Safety Project San Francisco, City and County of San Francisco--San Francisco</p> <p>The city's vision zero program sets forth the goal of eliminating all traffic-related fatalities in SF by 2024. Program efforts identified the Sixth St corridor as having the highest concentration of severe and fatal pedestrian injuries in the city. Between 2005 and 2009, pedestrian collision rates along the Sixth St corridor were ranked among the highest in the city, with the Market St/Sixth St/Taylor St/Golden Gate Ave, Howard St/Sixth St, and Mission St/Sixth St intersections ranking first, second, and third, respectively, in the Civic Center and Tenderloin neighborhoods. Under the direction of the SF Municipal Transportation Agency, the Sixth St Pedestrian Safety Project would implement multi-modal changes to Sixth St between Market and Brannan Streets with the intent to improve safety and access for pedestrians, bicyclists, transit, and drivers.</p>	Neg	09/29/2017
1989032707	<p>Green Valley Perris, City of PERRIS--RIVERSIDE</p> <p>The proposal is a request to approve the Commercial and Residential Design Guidelines for the Green Valley Specific Plan (GVSP) approved in 1990 and to develop the first two Tentative Tract Maps totaling 314 single-family lots (TTM 36989 with 145 units and TTM 36988 with 169 units) located north of Ethanac Road and west of Murrieta Road. The Specific Plan is a master-planned community totaling 1,269 acres of land envisioned to have 3,460 single family detached homes, 750 multi-family units, 42.3 acres of business and professional office space, 72.7 acres of commercial retail, 108.7 acres of industrial, 24 acres for three school sites and 51.1 acres of public parks to be developed in four phases totaling 48 planning areas. The applicant intends to build the GVSP in six phases instead of the original four phases. The development or changes of future phases will be reviewed by the Planning Commission as development occurs.</p>	NOD	
2012011010	<p>Recirculated Santa Clarita Valley Sanitation District Chloride Compliance Project EIR - Separation of Recycled Water Project Los Angeles County Sanitation District Santa Clarita--Los Angeles</p> <p>The SCVSD has prepared a Final Recirculated Santa Clarita Valley Sanitation District Chloride Compliance Project EIR - Separation of Recycled Water Project (Final Recirculated EIR) for its Chloride Compliance Project. This FEIR revised analysis from SCVSD's prior 2013 Chloride Compliance Facilities Plan and EIR, which was certified by the SCVSD Board of Directors on Oct. 28, 2013. The Chloride Compliance Project was modified by the SCVSD Supplemental EIR for Brine Concentration and Limited Trucking in March 2016 (2016 Trucking SEIR). The purpose of this recirculated FEIR is to allow SCVSD to evaluate the potential approval of the Chloride Compliance Project alone, while separating that project from the Recycled Water Project, which was also analyzed in the 2013 EIR. Unrelated to the chloride compliance solutions, the SCVSD also considered a plan to reduce the discharge of treated water from the water reclamation plants to the Santa Clara River. The 2013 EIR described this activity as "Support for Municipal Reuse of Recycled Water" (Recycled Water Project) and analyzed the potential environmental impacts to biological resources (including an endangered fish known as the unarmored three-spine stickleback, or UTS) that could occur from a proposed approx. one-third reduction in discharge associated with that project. The technical analysis that supported the 2013 EIR concluded that no</p>	NOD

The LA Refinery Integration and Compliance Project is expected to substantially reduce GHG, SOx, NOx, CO, and particulate matter emissions at the Refinery. This will be accomplished by reconfiguring the combined Refinery complex to enable shutting down the Fluid Catalytic Cracking Unit (FCCU) at the Wilmington Operations, by installing interconnecting pipelines, and by reconfiguring the combined Refinery complex to improve the gasoline to distillate production ratio from the integrated Refinery in order to expeditiously respond and adjust to ongoing changes in market demand for various types of petroleum products. Additionally, heat recover will be optimized by installing new heat exchangers and modifying specified units to further minimize criteria pollutant and GHG emissions. All new and modified stationary sources with emission increases will be required to comply with Best Available Control Technology (BACT) requirements in South Coast Air Quality Management District (SCAQMD) Rule 1303.</p> <p>Modified Conditional Use Permit for Underwood Family Farms, Case No. PL16-0031 Ventura County Moorpark, Simi Valley, Thousand Oaks--Ventura</p> <p>The permit authorizes the continued operation, and seasonal increases in the intensity of use, of an existing agricultural promotional facility. The existing permitted uses authorized to continue and the authorized changes in the facility are described in more detail below.</p> <p>The existing 5,000 sq. ft. agricultural sales building and 200 sq. ft. office/ticket booth will continue to be used. A variety of accessory structures will continue to be used and include: a play area, slide, tractor ride, wooden train area. The use and maintenance of the property, the size, shape, arrangement, and location of structures, parking areas and landscape areas shall conform to the project description above and all approved County land use hearing exhibits in support of the project and conditions of approval. The Permittee shall also continue to maintain the existing windrows or other trees along the eastern boundary of the site.</p>	NOD
