STATE CLEARINGHOUSE

NEWSLETTER

December 1-15, 2008

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **December 1-15, 2008.**

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown.**

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: February 13, 2007
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, Senior Planner
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner
916-445-0613
scott.morgan@opr.ca.gov .

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2007**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

<u>Documents Received on Monday, December 01, 2008</u>			
2007112006	Vesting Tentative Parcel Map Application No. 2006-44 - Willms Ranch LLC Stanislaus County --Stanislaus Request to divide a 2,302.34-acre project site comprised of four (4) separate assessor parcels, to create a total of 48 parcels, ranging in size from 40.0 to 69.9 acres. The project underwent a two week referral in January of 2006 after which traffic, biological and archaeological studies were requested from various referral agencies. The project underwent an additional two week referral in October 2007 to reflect the completed studies and revised maps. The maps have now been modified again to adjust access easements at the request of Public Works and Fire.	CON	12/15/2008
2004071063	Tentative Tract Map 239 / Walters Inyo County --Inyo NOTES: Recirculated This is an additional re-circulation of the REIR for Tentative Tract Map #239/Walters. It consists of the portion of the original EIR that deals with the analysis of the feasibility of a project alternative consisting of a land exchange with the Bureau of Land Management.	EIR	01/21/2009
2004072028	Atwood 80 (PEIR T20040346) Placer County Auburn--Placer The project proposes the subdivision of a 79 acre lot to provide for the development of 61 custom homes along with grading for home pads, roads, emergency access, and water and sewer infrastructure to serve the homes.	EIR	01/14/2009
2006042024	Marina Center Eureka, City of Eureka--Humboldt The project applicant, CUE VI, LLC proposes a mixed-use development of Nurseries/Garden; 104,000 sf of Office; 72,000 sf of Multi-Family Residential (54 dwelling units); 70,000 sf of Light Industrial use; 14,000 sf of Restaurant; and 12,500 sf Museum. The new buildings would be between one and five-stories. The project would include approx 1,590 parking spaces, including about 462 spaces in a four-level parking structure. The project would include remediation of the brownfield project site to meet federal and state environmental cleanup and water quality standards.	EIR	01/31/2009
2007032030	Valley Oaks Planned Development Draft Environmental Impact Report Lake County --Lake The proposed project would include a General Plan Amendment and rezone to allow for residential, commercial, parks and open space development on the approximate 151 acre parcel. The residential component would feature approximately 380 single-family dwelling units on approximately 84 acres, approximately 53 senior living/multi-family residential units, a residential care facility and approximately 55 medium density residential units with each of these project components clustered on smaller parcels. The commercial component would include five separate villages ranging from approximately 2.37 acres to	EIR	01/23/2009

	11.07 acres in size and include retail, theatre, and office/retail land uses. The project would also include a linear park along Coyote Creek, a neighborhood park and other common areas and open space for active and passive recreation and pedestrian and bicycle opportunities.		
2007071038	State Route 74 Lower Ortega Highway Widening Caltrans #12 San Juan Capistrano--Orange To widen SR 74 from two lanes to four lanes from Calle Entradero (PM 1.0) to the City of San Juan Capistrano limits PM 1.9.	EIR	01/14/2009
2005062128	Easton Project: Easton Place and Glenborough at Easton Sacramento County Rancho Cordova, Folsom--Sacramento The project includes 1,391 gross acres stretching from Hazel Avenue on the west to Prairie City Road on the East Glenborough at Easton would be 1,208.3 acres providing 3,239 DU's with a mix of commercial office and open space. Easton Place would be a transit-oriented village with 5 million square feet of developed space inclusive of 1,644 DU's the proposed project includes 513 acres of space and park uses, parkways urban parks and natural preserves.	FIN	
2008102026	Project No. 151-691-218(332) 2 and 3 BIA Proposed Route No. 218 Bridgeport Indian Colony Bureau of Indian Affairs --Mono The Bridgeport Indian Colony in coordination with the Bureau of Indian Affairs Pacific Region Office proposes to upgrade/reconstruct drainage structures, concrete curbs, gutters, populated area sidewalks and place new asphalt overlay material along existing Sagebrush Drive (0.59 miles), Aurora Canyon Rd. (0.38 mi), Ki-Ba Way (0.09 mi), and Pine Nut Circle (0.09 mi) all within existing delineated right-of-way boundaries.	FON	01/02/2009
2008121001	TM 5489 San Diego County Fallbrook--San Diego A Major Subdivision to create 5 single family parcels on a 24.62 acre parcel in the Fallbrook Community Plan Area. Access to each lot would be provided by a private road connecting to Monserate Hill Road. The project would be served by on-site septic systems and imported water from the Rainbow Municipal Water District. The applicant proposes to extend an existing off-site water line 9,550 linear feet and earthwork will consist of cut and fill to a maximum of 20,000 yd. An existing single family home and outbuildings existing on the proposed Lot One.	MND	12/30/2008
2008121002	Kemerko Minor Subdivision San Diego County --San Diego The project is a Tentative Parcel Map for a minor subdivision of 94 acres into 4 lots plus one remainder. The proposed parcels range in size from 5.7 to 38.1 gross acres. The project site is located east of Mountain View Road and northwest of Harbison Canyon Road in the Crest/Dehesa/Harbison Canyon/Granite Hills Subregional Plan area, within unincorporated San Diego County. The site is subject to the General Plan Regional Category 1.3 Estate Development Area, Land Use Designation (18) Multiple Rural Use. Zoning for the site is S92-General Rural Use and A72-General Agricultural use. The site is currently undeveloped. Access would be provided by a private road connecting to Mountain View Road. 	The project would be served by on-site septic systems and imported water road connecting to Mountain View Road. The project would be served by on-site septic systems and imported water from the Padre Dam Municipal Water District. Approx 280 ft of water utilities will be extended on Mountain View Road. Earthwork will consist of a cut volume of 14,800 cubic yards, fill volume of 21,000 cubic yards, and a net import of 6,200 cubic yards of material.		
2008121003	Delore Tract Map San Luis Obispo County --San Luis Obispo Request by Michael Frederick for a Tentative Tract MAP (TRACT 2774) and Minor Use Permit (DRC2007-00132) to subdivide an existing 7.41 acre parcel into 10 parcels industrial lots ranging in size from .33-1,5 acres each for the purpose of sale and/or development. The project will result in the future disturbance of approx 2.5 acres of a 7.41 acre parcel due to grading for building pads and parking lots. The proposed project is within the Industrial land use category and is located on the south side of Concrete Court, within the community of Templeton. The site is in the Salinas River planning area.	MND	12/30/2008
2008121006	Colton Sanitary Landfill Expansion Project San Bernardino County Colton--San Bernardino The proposed project will increase the permitted landfill boundary by 15 acres, from 98 to 113 acres, and the solid waste disposal footprint by 6 acres, from 82 to 88 acres.	MND	12/30/2008
2008121007	Demeter Minor Use Permit San Luis Obispo County Atascadero--San Luis Obispo Request by James Demeter for a Minor Use Permit to allow a conversion of an existing 2,400 sf agricultural building into a wine production facility. Use within the building will consist of the following 1,078 sf to accommodate win productions, 800 sf for a small tasting room, and 298 sf for an office. The project will result in approx 20,000 sf of disturbance due to off-site road improvements and approx 15,440 sf of disturbance for driveway access.	MND	12/30/2008
2008121009	Carmel Valley Market San Diego, City of San Diego--San Diego Coastal Development, Conditional Use Permit and Site Development Permit for tenant/site amenity improvements and a new retail and storage area addition to an existing commercial building. The project site is located on a 13, 726 sf site at 2302 Carmel Valley Road in the CN-1-2 Zone within the Torrey Pines Community Plan, Coastal Overlay Zone (non-appealable), Coastal Height Limit Overlay Zone, Residential Tandem Parking Overlay Zone, Parking Impact Overlay Zone (Coastal), 100 Year Floodplain and Marine Corps Air Station Miramar Airport Influence Area. Council District 1.	MND	12/30/2008
2008121010	R2005-03283 Los Angeles County Lancaster--Los Angeles The proposed project is a request for a conditional use permit to allow an automobile impound yard, a twenty by sixty foot office trailer and 2 automobile repair garages that will be constructed in approx 5 years after initiation of impound yard. Grading of 2,500 cubic yards is proposed and will be balanced on site. A ten	MND	12/30/2008

	foot tall metallic panel fence will be constructed on the west property boundary of parcel 3137-006-015 and an 8 ft tall metallic panel fence will be constructed on the south boundary of parcel 3137-006-015. A well with a water tank and a septic system is proposed. A 16 space parking lot will be located adjacent to the east property boundary along Division Street which will provide ingress and egress access to the project site. Landscaping is proposed for the area between the proposed parking lot and Division Street.		
2008122001	Shingletown Ridge Fuel Reduction Western Shasta Resource Conservation District --Shasta The Shingletown Ridge Fuel Reduction Project has a goal of reducing wildfire risk to a rural residential area, including two subdivisions, near Shingletown, Shasta County. Currently, the fire hazard rating for the vicinity is Very High, according to California Department of Forestry and Fire Protection surveys. The Fire Risk will be reduced by cutting and burning or masticating the shrubs and small trees standing within designated fuelbreak zones. Trees greater than 8" diameter at breast height will be retained. In areas where all vegetation is smaller than 8" diameter, small conifers or hardwoods with full foliar crowns will be retained at approx 20 ft spacing. This will result in an open, park-like forest condition known as a shaded fuelbreak. Shaded fuelbreaks are known to reduce intensity and spread rate of fires, allowing crews an increased chance to halt fire from advancing to nearby areas.	MND	12/30/2008
2008122002	Proposed Construction/Modernization of Dobbins Elementary School Marysville Unified School District --Yuba Modernization of administration/classroom/library building; construction of a multipurpose/kitchen building; demolition of existing buildings when new buildings are completed; reconstruction of an apparatus yard; construct building with 4 classrooms and 2 kindergarten classrooms; construct a staff parking lot/parent drop off area; construct visitor parking/bus loop; and hardcourts.	MND	12/30/2008
2008122003	Proposed Modernization of Yuba Gardens Intermediate School Marysville Unified School District --Yuba Replace 7 buildings and 5 portable classrooms with 47,800 sf of new classrooms, science rooms, wood shop, gym, multi-purpose room, library, and administrative rooms to accommodate anticipated growth, and improve parking and drop off of students. The modernization would include 18 portable classrooms.	MND	12/30/2008
2008122004	Proposed Modernization of Marysville High School Marysville Unified School District Marysville--Yuba Principal elements of the construction/modernization include: construction or modernization of buildings (primarily classroom); construction of soccer, baseball/softball fields; improvement including synthetic cover of other athletic field/facilities; construction/expansion of parking lots; and relocation of bus storage.	MND	12/30/2008

2008122008	<p>Town of Windsor Housing Element Update Windsor, City of Windsor--Sonoma</p> <p>The Town of Windsor proposes to adopt an update to the General Plan Housing Element pursuant to California State law. As required by State law, the proposed Housing Element Update has been prepared to ensure that the Town fairly accommodates its share of California's projects housing needs. Windsor has analyzed local housing needs and resources, identified specific sites for potential development and developed policies and implementation programs that are intended to meet the needs of all income segments of the community and of future residents. The proposed project under review identifies sites available for housing and sets forth policies and programs to accommodate and facilitate the construction of affordable housing to meet the housing needs of the community. The Housing Element Update addresses the 2009-2014 planning period.</p>	MND	12/30/2008
2008122009	<p>Montini Open Space Preserve Management Plan Sonoma County Sonoma--Sonoma</p> <p>The Preserve consists of 98 acres, including 9-acre of a parcel located within the city limits of Sonoma, a 26-acre site, also situated within the city limits, and a hillside area of about 63 acres located in the unincorporated county. The Management Plan (plan) for the Preserve addresses the management of natural, cultural, agricultural, and recreational resources on the Preserve. The plan provides for opening the Preserve for public use beyond the periodic guided tours currently offered. In addition, the plan provides for opening the Preserve for public use beyond the periodic guided tours currently offered. In addition, the plan provides recreational access for disabled individuals.</p> <p>The Plan includes measures such as weed control, revegetation, erosion control, fencing, and trail construction and management. The trail would be about 1.8 miles long and connect the east side of the Preserve to the city's Sonoma Overlook Trail and the city's historic plaza and would connect the west side of the Preserve to the city of Sonoma for neighborhood and disabled access. The construction of additional parking would be limited to a small parking lot with two disabled-vehicle-only parking spots at the western access point near parking lot with two disabled-vehicle-only parking spots at the western access point near the corner of Verano Ave. and 5th St. West and an overflow lot adjoining the Sonoma Overlook Trail trailhead and the Sonoma County Veteran's Memorial Hall. A more detailed description of the project is on file at the Sonoma County Agricultural Preservation and Open Space District at the address listed above.</p>	MND	01/07/2009

	childred and up to 25 staff members on approximately 3.85 acres developed with a single-family residence proposed to be demolished in association with the project.		
2008092087	Tahoe Pines Area-A Erosion Control Project Placer County Auburn--Placer The overall goal of the project is to design and implement erosion control and water quality improvement measures that will reduce the discharge of sediment and pollutants to Lake Tahoe from County rights of way in the Tahoe Pines area. The Tahoe Pines Area A ECP focuses on source control with the inclusion of conveyance improvements and treatment facilities to treat stormwater runoff. The project will have a direct benefit to the quality of nearby waterways and ultimately Lake Tahoe as well as benefits to the natural environment.	NOD	
2008092112	Calistoga Village Inn and Spa Redevelopment Project; Conditional Use Permit (U 2007-11) and Design Review (DR 2007-13) Calistoga, City of Calistoga--Napa The project includes complete redevelopment of the site, demolition and reconstruction. Once reconstructed, the site would contain approximately 82,933 square feet of structural footage. The remaining portions of the property, approximately 132,123 square feet, will be developed with parking and landscaping. Sixty-eight (68) guest lodging units will be housed in ten two-story craftsman style bungalow buildings, all with common entryways. There will be 7 of Building 'A's and 3 Building 'B's.	NOD	
2008101014	Modernization of Lincoln Alternative Elementary School Corona-Norco Unified School District Corona--Riverside Modernization of Lincoln Alternative Elementary School, which will include (1) construction of bell tower, plaza, covered walkway, asphalt hard-court, retaining wall, and trash enclosure; (2) installation of security fencing and electronic marquee sign; (3) conversion of three classrooms into Kindergarten classrooms with toilets and workroom; (4) relocation of shade structure to another location in the campus; (5) upgrade of restrooms; (6) extension, seal coating, and re-stripping of existing parking lot and adding lighting; (7) addition of two-story modular buildings which will consist of 14 classrooms, restrooms, teacher's workroom, library, and computer lab; (8) relocation of relocatable buildings for interim housing; and (9) removal of relocatable buildings.	NOD	
2008101067	Modernization of Vicentia Elementary School Corona-Norco Unified School District Corona--Riverside Modernization of Vicentia Elementary School, which will include (1) construction of entry pavilion and plaza, multi-purpose building, metal lunch shelter, Kindergarten classroom, hardscape area, and trash enclosure; (2) installation of new security fencing, new electronic school marquee, and two-story modular building for use as classrooms, teaching stations, computer lab, library and toilet facilities; (3) permanent removal of relocatable building(s); (4) renovation of toilet facilities; (5) drainage work; and (6) seal coating and re-stripping of existing parking lot and adding parking lot lighting. 	routine maintenance, within the easement boundaries.		
2008128005	Equestrian Water Trough Repair Parks and Recreation, Department of --Sonoma Replace existing Hunter Springs water trough with a wine cooperage trough including new equipment such as a 2 inch tank adapter, bypass down pipe, 2 inch ball valve, and T-down spout. Prior to setting new trough on the ground one cubic yard of gravel will be placed on the soil surface as base material for the new trough. Cement a new front 2 foot by 6 inch by 4 inch front cap on the existing spring box. Replace existing rotten spring box lid with new 2 foot by 2 foot square artificial wood lid. Replace 10 foot section of above-ground water pipe located between the spring box and water trough with PVC pipe.	NOE	
2008128006	Ulatis Flood Control Project: Emergency Channel Scour Repair Solano County Water Agency --Solano During a recent maintenance inspection by the Solano County Water Agency (SCWA) it was discovered that existing rock slop protection for the channel under the Hawkins Road Bridge at Ulatis Channel, a feature of the Ulatis Flood Control Project, was displaced from under the bridge. Channel scour remediation was previously installed at this structure. The structure was determined to be scour critical at that time with imminent threat for loss of the structure. SCWA will replace the lost cobble backfill with a large class of rock to preserve the installed protective measures and minimize future maintenance.	NOE	
2008128007	Ulatis Flood Control Project: Emergency Sweeny Channel Scour Repair Solano County Water Agency --Solano During a recent maintenance inspection by the Solano County Water Agency (SCWA) it was discovered that existing rock slop protection for the channel under the Sweeney Creek railroad crossing, a feature of the Ulatis Flood Control Project, was displaced from under bridge leaving the foundation of bridge exposed to high flow scour. Staff is concerned with the potential for the situation to worsen if not adequately protected before significant storms occur. The current channel flow-line is lower than the elevation of the top of the bottom of the footing. Therefore, a minimal amount of additional scour could endanger the structure. SCWA is responsible for maintenance of the channel. To prevent further undermining of the channel bottom, SCWA will install rock cross-vanes immediately US and DS of the structure to arrest further degradation of the channel bottom under the structure. Rock backfill (RSP) will be replaced between the grade control features to mitigate for loss of bed material around the foundation and prevent further erosion. The cross vanes features will hold the RSP in-place to minimize future maintenance.	NOE	
2008128008	Oak Street and N. Franklin Street Bike Lanes, Signage, and Bicycle Parking Fort Bragg, City of Fort Bragg--Mendocino Design and construct Class II/Class II bikeways using thermoplastic lines on approximately 0.65 miles of N. Franklin Street, and 1.1 miles of Oak Street in the City of Fort Bragg. Installation of rout signage and bicycle parking at various locations along Hwy 1 (Pacific Coast Bike Route) and in strategic locations within the commercial zoning district of Fort Bragg.	NOE

2008128009	<p>Upgrade Signs Caltrans #2 --Tehama</p> <p>The California Department of Transportation (Caltrans) is planning to upgrade two existing speed limit signs on State Route 36/Antelope Boulevard in Tehama County, in front of Antelope School. The purpose of the project is to improve pedestrian safety of school children in the vicinity of the school. Currently, there is one school-zone speed limit sign on each side of Antelope school informing drivers of a reduced speed limit. To increase awareness of the school zone and reduced speed limit, the existing speed limit signs will be equipped with a flashing yellow light. Underground power will be supplied from existing utility box on the north side of State Route 36 / Antelope Boulevard. Power will be bored under Antelope Boulevard to avoid traffic delays. No additional right-of-way will be needed to make the improvements. A temporary construction easement for equipment staging will be acquired in a commercial parking lot on the north side of the highway. No biological or archaeological resources were identified within the limits of the project. If cultural resources are encountered during construction, work will cease and Caltrans Professional Qualified Staff will be consulted to evaluate the findings. Construction drawings and focused environmental studies are on file for this project at the Caltrans, District 2 office located at 1657 Riverside Drive, Redding, California.</p>	NOE

2008-08	Enterprise Rancheria of Maidu Indians - APN: 014-280-095 Bureau of Indian Affairs --Yuba The Tribe proposes to develop the site for recreation/tourism by constructing a casino, hotel, and parking structure. The casino and hotel resort would include a main gaming hall, food and beverage services, retail space, banquet/meeting space, administrative space, pool, and spa. Several food and beverage facilities are planned, including a buffet, casino bars, and two restaurants. The resort would include an eight-story hotel with 170 rooms, a pool area, an exercise room, and an arcade. Approximately 2,750 parking spaces would be provided for the casino/hotel resort, with 600 of those spaces within a multi-level parking structure.	BIA	12/31/2008
2007111003	City of Lancaster 2030 General Plan Lancaster, City of Lancaster--Los Angeles The General Plan Update is a comprehensive update of the 1997 General Plan. This includes an update of existing elements; update of existing conditions, with 2006 serving as the baseline year; update of General Plan development projections to the year 2030 based upon the Southern California Association of Governments (SCAG) 2004 Regional Transportation Plan (2004) projections; adjustment of the allowable land use pattern and density of development permitted on the General Policy Map to be consistent with SCAG's 2030 growth projections; and additions, deletions or modifications to the 1997 General Plan goals, objectives, policies and specific action for each element. The General Plan Land Use Map identifies the type, location, and density/intensity of future development within the City of Lancaster. Based upon development projections for the City, the following three land use alternatives are being considered as part of the General Plan Update: No Project Alternative; Balanced Growth Alternative; and GPCAC Preferred Plan Alternative. 	improvements on Shingle Springs Drive and Looking Glass Lane and one-site road improvements on Looking Glass Ln. to be constructed to the required County Design and improvements Stds. Manual and fire safe standards.		
2008122012	Heflin Agriculture Timberland Conversion Forestry and Fire Protection, Department of --El Dorado The 14 acres, including 2 acres of waterline easement will be converted from timberland to a variety of agriculture crops including, but not limited to, grapes, berries, Christmas trees and fruit and nut trees.	MND	01/02/2009
2008091149	Riverwalk Marketplace Phase 2 Porterville, City of Porterville--Tulare The project involves construction and operation of a retail commercial center containing a total of up to 256,471 square feet of retail distributed among five building pads. The proposed project includes a total of up to 215,000 sq ft associated with the Wal-Mart Supercenter. The Wal-Mart Supercenter is proposed to consist of a 184,129 square foot store (which is anticipated to include, among other things, 30,907 sq ft of grocery sales area and 10,373 sq ft of grocery support areas); a 10,655 sq ft indoor garden center and seasonal sales area, 2,823 sq ft of vestibule area at store entries; and a 14,216 sq ft outdoor garden center area. While this amounts to a total of only 211,823 square feet, the EIR will conservatively assume for the sake of evaluating impacts a total of up to 215,000 sq ft, with the extra 3,177 sq ft assumed to be general retail merchandise area.	NOP	12/31/2008
2008121008	California Health Care Facility, Ventura California Prison Health Care Receivership Camarillo--Ventura In accordance with the CEQA (pub. Resources Code, Section 21000 et seq.), the CPR will be preparing an EIR to evaluate the environmental effects associated with development of a new sub-acute medical care facility that will include an approximately 1,500-bed health care facility, associated parking, and multipurpose support buildings within the existing property boundaries of the Ventura Youth Correctional Facility (VYCF). VYCF is a 96-acre campus located at 3100 Wright Road within an unincorporated portion of south Ventura County, California. In order to fulfill a 2005 mandate from the Federal Court, CPR had been tasked with the statewide construction of up to seven new correctional care facilities, which CPR estimates will provide approximately 10,000 medical and mental health patient beds. The proposed project represents one of the seven facilities to be constructed over the next three years. The proposed health care facility would consist of one- to three-story buildings including clusters, diagnostic and treatment centers, an armory, warehouse facilities, a central plant, an outdoor recreation area, a gatehouse, and parking. Access to the facility would be from Wright Road. The proposed project would include construction of a double security fence and electrified fence (e-fence) along the periphery of the property, as well as internal roadways, outdoor lighting fixtures, and a guard tower at the vehicle sally port. Additional improvements would include storm drains and the extension of water, sewer, natural gas, and electrical utilities to the new buildings. The proposed project would employ approximately 1,300 - 1,600 employees. Approximately 75 to 100 visitors are anticipated per day.	NOP	12/31/2008

	The existing VYCF would be closed, existing buidings demolished, and the existing ward population would be relocated to other youth correctional facilities within the Department of Juvenile Justice system.		
	Construction of the project is expected to start in 2010 and would last for up to 30 months.		
2008121014	Los Angeles River Ecosystem Restoration Feasibility Study, Los Angeles, California Los Angeles, City of Los Angeles, City of--Los Angeles Pursuant to the National Environmental Policy Act of 1969, as amended (NEPA), and the California Environmental Quality Act of 1970, as amended (CEQA), the U.S. Army Corps of Engineers (Corps), and the City of Los Angeles intend to prepare a Feasibility Study/Environmental Impact Statement/Environmental Impact Report (FS/EIR/EIR) to examine alternatives and address the potential environmental benefits and consequences from implementing ecosystem restoration measures for the Los Angeles River. This report will function as a site specific FS/EIS/EIR for the Los Angeles River Ecosystem Restoration Feasibility Study. The Corps will serve as the Lead Agency under NEPA, and the City of Los Angeles will be the Lead Agency under CEQA.	NOP	12/31/2008
2008032025	Cedarwood Subdivision 9088 Oakley, City of Oakley--Contra Costa The proposed project includes the subdivision of 14.95-acres into 34 lots for the development of 34 new single-family units, and a rezone from General Agriculture (A-2) to Residential Single Family (R-12).	Neg	01/02/2009
2008101075	Gen. Plan Amendment #2008-02; Rezone 2008-3; CDP 2008-4 / Poole Inyo County --Inyo A request to amend the Inyo Co. General Plan to increase the Floor Area Ratio (FAR) for the Retail Commercial (RC) land use designation from 0.4 (40%) to 0.6 (60%), with a conditional use permit. Also requested is a zone text amendment for two corresponding zone districts (C-1 & C-2) to reflect this increase. Concurrent with these two action, if approves, is a conditional use permit for a FAR increase to 0.55 (55%) for property at 188 Pa Me Lane, owned by Corey Poole.	Neg	12/24/2008
2008111092	Remedial Action Plan and Post-Closure Permit for Chemwest Ponds/Consolid Waste, ASTs, Chrome Ponds Toxic Substances Control, Department of Fontana--San Bernardino The project involves DTSC approval of a Remedial Action Plan for remediation of the Chemwest Ponds/Consolidated Waste, ASTs, and Chrome Ponds (CCAC) which are owned by ProLogis and located on the former Kaiser Steel Mill site in Fontana, California. The Project also involves issuance of a Post-Closure Permit for the CCAC to ensure proper long-term operation and maintenance of the remedy. Components of the Remedy include,: Constructing and maintaining a remedial cap permanently converting the contaminated soil; installing and monitoring groundwater monitoring wells, vadose zone monitoring wells, and settlement monuments; Recording a deed restriction to limit future land uses on the Site; and Long-term operation and maintenance of the remedy. 	supports the reentry and integration of released inmates into productive society and reduce the odds that they will return to detention.		
2008031109	<p>Charnock Well Field Restoration Project Santa Monica, City of Los Angeles, City of--Los Angeles</p> <p>The project involves implementation of a water treatment system and other improvements that would help to remove groundwater contamination from the Charnock groundwater sub-basin and restore this resource as a water supply for the City of Santa Monica. The project involves implementation of a water treatment system and other improvements that would help to remove groundwater contamination from the Charnock groundwater sub-basin and restore this resource as a water supply for the City of Santa Monica. Improvements are proposed at two existing City-operated water service facilities; the Charnock Well Field site and the Santa Monica Water Treatment Plant (SMWTP). The improvements proposed at the Charnock Well Field site involve the installation of a Granular Activated Carbon (GAC) absorption system to treat contaminated groundwater from three wells within the Charnock well field. The proposed improvements at the SMWTP facility include demolition of three onsite structures and installation of a greensand filtration facility, reserve osmosis facility, air stripping decarbonators, chemical storage and feed facilities for disinfection and fluoridation and electrical upgrades. The treatment process includes filtration using greensand filters to remove iron and manganese and a softening system utilizing reverse osmosis membrane technology.</p>	NOD	
2008041112	<p>Central Region Elementary School No. 21 Los Angeles Unified School District Los Angeles, City of--Los Angeles</p> <p>The proposed project involves the development of a two- or three-story elementary school classroom building with underground parking, administration offices, a library, a multi-purpose building, a playground area, a sports field, hardcourts, and a service yard. The proposed project would demolish all existing structures on the site and would relocate the Vernon Library Pocket Park within the school boundaries for use of the proposed school's students during school hours and for the public after hours.</p>	NOD

	<p>Imperial Beach, as well as future land use plans and anticipated development and population densities, to determine the best way to accommodate, improve, and promote safe and efficient bicycle travel within the City. Recommendations consist of Class 1 bicycle paths, Class 2 bicycle lanes, and Class 3 bicycle routes. The intent is to provide a comprehensive and coordinated plan for bicycle transportation that benefits the entire City so that specific proposals for bicycle-related improvements may be evaluated for conformance with the BTP. These future projects may require right-of-way acquisitions, modification of vehicle travel lanes, sidewalks, curbs, gutters, crosswalks, signage, and other modification for the public right-of-way. The specifics of potential future projects cannot be determined until such time as they are proposed. One project, the ECO Bikeway Palm Avenue Traffic Calming Project, has been proposed to date. This EIR provides project-level analysis of that project. Future projects would be subject to additional review under the California Environmental Quality Act (CEQA). That review could lead to the issuance of a Categorical Exemption, Negative Declaration, Mitigated Negative Declaration, or EIR depending upon the project specifics and the potential for significant environmental impacts.</p> <p>ECO Bikeway Palm Avenue Traffic Calming Project - The proposed project BTP include the reclassification of Palm Avenue, between 3rd and the 7th Streets, from a four-lane collector to a two-lane collector with a two-way left turn lane. This reclassification will allow for modifications to existing motor vehicle travel lanes, parking areas, medians, landscaping, sidewalks, curbs, gutters, and signs and the addition of Class 2 bicycle lanes along Palm Avenue. The purpose of the project is to provide an improved bicycle connection between the Bayshore Bikeway and the beachfront commercial area in Imperial Beach. The proposed bicycle lanes, traffic calming measures, and associated improvements within the Palm Avenue right-of-way are in conformance with the Imperial Beach ECO Route Bikeway proposed in the City's 1994 General Plan Circulation Element:</p> <ul style="list-style-type: none"> " Curb extensions along Palm Avenue between 3rd Street and 7th Street; " Potential median curb installation at Carolina Avenue, 4th Street, and 5th Street for westbound Palm Avenue and Corvina Street for eastbound Palm Avenue; and " Westbound Palm Avenue land transition from two to one lane, either on Palm Avenue west of 7th Street or at the SR-75 and Palm Avenue intersection. 		
2007111029	<p>AT&T Asia America Gateway Project (AAG) California State Lands Commission San Luis Obispo--San Luis Obispo</p> <p>The Project is being proposed by AT&T Corporation (AT&T) is to install and maintain one fiber optic cable with self contained power from AT&T's existing gland facility in the Montana de Oro Sanspit Beach parking lot near Los Osos, in San Luis Obispo to Hawaii, Guam, and Southeast Asia. This would increase network resiliency and ameliorate the effects of a natural disaster potentially breaking numerous cables in a discrete geographic region.</p>	EIR	01/16/2009

2008122013	Annual Creek and Channel Facility Maintenance Program Burlingame, City of Burlingame--San Mateo The City of Burlingame (City) has experience localized flooding during storm events partially due to sediment and debris buildup and vegetation growth in City creeks and drainage channels. The City has identified five creeks and channels that require on-going maintenance. Burlingame Creek, Sanchez Creek, Easton Creek, Mills Creek and El Portal Creek. The maintenance activities include removal of accumulated sediment, debris (such as garbage, shopping carts, etc) and non-native vegetation, and cutting or mowing vegetation in and around the channels. The maintenance activities would be conducted annually.	MND	01/02/2009
2008122014	Caldwell Vineyard - Vineyard Conversion #98581-ECPA Napa County Yountville--Napa The project includes earthmoving activities, and the installation and maintenance of erosion control measures associated with the construction of 34.4 gross acres of new vineyard (29.9 net acres) within a 71.87 acre holding. The project proposes the installation of vineyard within five blocks with topography ranging from gentle to moderately sloping (slopes typically 2% to 29%, average 20%) chaparral, grassland, and oak woodland at elevation between approximately 1,350 and 1,600 feet above mean sea level.	MND	01/02/2009
2008122015	Shops at Calvine Elk Grove, City of Elk Grove--Sacramento The proposed project is a Tentative Parcel Map to subdivide a 10.26-acre parcel (APN: 121-0190-009) into two commercial parcels 4.68 acres in size and one residential parcel 5.57-acres in size (Figure 1). The proposed project would include a Design Review for the construction of three commercial buildings on the commercial parcels totaling 30,025 square feet. Proposed uses include 16,800 square feet of retail uses and a proposed 13,225 square foot pharmacy.	MND	01/02/2009
2008122016	Elk Grove Retirement Residence Elk Grove, City of Elk Grove--Sacramento The proposed project is a 54,000 square foot, 115 unit senior retirement facility on an approximately five acre parcel. The project requires a Conditional Use Permit to permit the facility in the Agricultural Residential 5-acre minimum (AR-5) zoning and a Design Review. The units are proposed to be independent living facilities without kitchens. Support services will be provided to the residents, but no medical care. The project includes the demolition of an existing +/- 2,200 square foot single	MND	01/02/2009

	stock) from existing numbers.		
2006062053	Stoneridge Drive Specific Plan Amendment/Staples Ranch DEIR Pleasanton, City of Pleasanton--Alameda The proposed 124-acre Staples Ranch development would include an approximately 37-acre auto mall to accommodate the relocation of the Pleasanton Auto Mall, a 45-acre senior continuing care community with a health center, an 11-acre commercial/retail development, a 17-acre community park, and a 5-acre neighborhood park that includes a storm water detention basin. Access to the auto mall and future commercial development would be from a new road off El Charro Road, with no through connection to Stoneridge Drive except for emergency vehicles.	FIN	
2007052109	San Joaquin Regional Water Quality Improvement Project San Francisco, City and County of Tracy--San Joaquin The San Francisco Public Utilities Commission (SFPUC) proposes to improve the disinfection capabilities of the Tesla Portal site and the Thomas Shaft site. The proposed Tesla Portal Disinfection Station would be located at the Tesla Portal site and includes closing the existing Tesla Portal Hypochlorite Station and the construction and operation of replacement facilities. Also at the Tesla Portal site, the project would include the construction and operation of a new Advanced Disinfection Facility that would pass water by a series of ultraviolet light arrays. At the Thomas Shaft site, the Lawrence Livermore Water Quality Improvements would upgrade water treatment facilities.	FIN	
2007071011	Tulare Motor Sports Complex Tulare, City of Tulare--Tulare NOTE: Partial Recirculation This EIR considers the environmental effects of the motor sports complex and commercial project proposed by Tulare Motor Sports Complex, L.P. (applicant). The applicant proposes to develop a 711.09-acre site with uses including a 1 mile D-shaped oval super speedway racetrack and drag strip. The potential seating capacity is 52,800 spectators for the super speedway track and 39,800 spectators for the drag strip including grandstands and sky boxes. The track and drag strip are expected to host a wide variety of national, regional, and local racing events. The racing venues would provide approximately six large events and numerous smaller events per year. In addition, the applicant proposes a mix of uses to be developed to include entertainment-related uses, luxury condominiums, commercial offices, a technology-oriented business park, retail stores, hotels, a RV park, public services, and improved infrastructure. The site would be designated Entertainment Commercial by the City of Tulare General Plan. The project requires a 965 acre annexation, a conditional use permit for approval of the overall master site plan, rezoning to C-4 (Service Commercial) and C-3 (Retail Commercial, Mixed Use). A height variance is also requested to allow a stadium height of 140 feet.	FIN

2008061145	Lagoon Restoration Project University of California, Santa Barbara Goleta--Santa Barbara The Santa Barbara Campus proposes restoration activities in three sites adjacent to the Campus Lagoon including an area adjacent to San Nicolas Hall and on Lagoon Island and Campus Point consistent with the UC Santa Barbara Lagoon Management Plan. A stairway is proposed at Campus Point and a labyrinth is proposed for development on Lagoon Island. Restoration activities include habitat restoration and enhancement, public access and infrastructure improvements, education improvements, and opportunities for ongoing research projects.	FIN	
2008012079	In-Situ Groundwater Treatment Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Willits--Mendocino The project proponent proposes to inject into shallow groundwater a carbohydrate solution of organic molasses or emulsified oil with a vitamin supplement and pH buffer at five initial areas within the property boundary to dechlorinate volatile organic compounds (VOCs). The injection of the carbohydrate solution is to enhance the cleanup of groundwater. The treatment process is to provide a food source for the existing microorganisms in the aquifer. The microorganisms consume the food substances and donate electrons in the course of their metabolism. Once the electron acceptors are depleted, the microorganisms use the chlorinated VOCs as electron acceptors and thereby breakdown VOCs into benign end products such as carbon dioxide and water.	MND	01/05/2009
2008121023	Gangavalli Minor Subdivision San Diego County --San Diego The project is a residential minor lot split to subdivide into 2 lots. The project site is located on 10418 King Sanday Lane in the Valley Center Community Planning Group, within unincorporated San Diego County. This site is subject to the General Plan Regional Category. Estate Development Area, Land Use Designation 17, Estate Residential. Zoning for the site is A70, Limited Agriculture. The site contains an existing single family residence that would be retained. Access would be provided by a private road connecting to West Lilac Road. The project would be served by on-site septic systems and imported water from the Valley Center Municipal Water District. No extension of sewer or water utilities will be required by the project. Earthwork will consist of 250 cubic yards cut and 250 cubic yards fill.	MND	01/02/2009
2008122022	Use Permit 983-07 San Benito County San Juan Bautista--San Benito This is a phased project that will entail construction of new facilities, industrial waste ponds, new parking space and retrofitting the existing facility.	MND	01/02/2009
2008122023	Gruber Mountain Estates (PSUB T200070256) Placer County --Placer Project proposes approval of a Tentative Subdivision Map on six separate parcels totaling 57 acres. The proposed subdivision will include 11 single family custom home lots and access roads, including the improvement of an existing roadway and the construction of a new access road and cul de sac. 2008122024	Margot Property Pre-Zone for Annexation Mount Shasta, City of Mount Shasta--Siskiyou The proposed project is pre-zoning property R-1, Single Family Residential, for a potential annexation into the City of Mt. Shasta. The proposed area for annexation consists of 4 parcels totaling approx 4.1 acres adjacent to and east of South Washington Drive and approx 650 ft south of McCloud Avenue. The parcels proposed to be annexed are APN's 037-190-350, -360, -030, -040. The parcels include in this application are currently all under one ownership.	MND	01/02/2009
2008122025	McCloud Springs Ranch Subdivision (Z-06-04 and TSM-06-04) Siskiyou County --Siskiyou The applicant is requesting Zone Change and Vesting Tentative Subdivision Map approval to redesignate ninety-three acres from the Non-Prime Agricultural, Single-Family Residential, and Neighborhood Commercial zone districts, into a Planned Development zone district with 69 lots consisting of single-family residential, multi-family residential and open space uses, where a total of 81 residential units and 14 acres of open space would be established.	MND	01/15/2009
2008124002	Bridgeport Travel Management U.S. Forest Service --Mono NOTE: Scoping Document The proposed action covers 1.2 million acres in Nevada and California. It would restrict motor vehicles to designated roads and trails, consistent with the national travel management rule; and change the forest transportation system, including the recognition and designation of certain user-created routes for motor vehicle use. The proposed action would recognize and adopt an additional 300 additional miles of existing informal (user-created) roads and trails. Most of these have been in existences for many years, but have not been recognized as a part of the forest transportation system. Maps describing the proposed action can be found at http://www.fs.fed.us/r4/htnf/projects/#bridgeport .	NOI	12/31/2008
2008121022	Waste Management Health Care Solutions Vernon, City of Commerce--Los Angeles Waste Management Health Care Solutions has submitted an application for a conditional use permit to operate a medical waste transfer station and treatment facility located at 4280 Bandini Blvd, Vernon CA. The proposed operation will consist of transferring and treating of medical waste from generators such as hospitals, laboratories, dialysis centers, medical clinics or other producers of medical waste. The autoclave facility would include two autoclaves that would accept, handle, and treat regulated medical wastes and wastes regulated by the Animal and Plant Health Inspection Service that are delivered to the site. The project proposed will treat the medical waste via steam sterilization also known as "autoclaving". The medical waste will be containerized, treated and transported, all in accordance with California State Law. The project is subject to the CEQA because it requires discretionary approval. The proposed project is consistent with the City of Vernon Comprehensive Zoning Ordinance and the City of Vernon General Plan.	Neg	01/02/2009

2008051121	<p>2008 Northwest Housing Infill Project and LRDP Amendment University of California, Los Angeles --Los Angeles</p> <p>UCLA proposesto develop additional undergraduate student housing consisting of 1,525 dormitory beds, dining, and support space totaling 550,000 gross square feet (gsf) in four buildings on three infill sites within the Northwest zone of the campus. The 2008 Northwest Housing Infill Project (NHIP) requires an Amendment to the 2002 Long Range Development Plan (LRDP). The LRDP, as amended, would provide an additional 550,00 gsf entitlement in the Northwest zone to accommodate the 2008 NHIP. Because the 2008 NHIP has an estimated completion date of 2013, and the LDRP has a planning horizon of 2010, the DEIR will account for an extended LRDP planning horizon from 2010 to 2013, but will not modify ti the previously adopted campus-wide vehicle trip generation and parking limits established in the 2002 LRDP.</p>	EIR	01/20/2009
2006011114	<p>Southern Marine Buildings Demolition Project Los Angeles, Port of Los Angeles, City of--Los Angeles</p> <p>Demolition of 16 buildings, 7 cranes, and ancillary structures and restoration of the site to its original condition. 	<p>both the State Water Project (Aqueduct) and the Federal Central Valley Project (San Luis Canal). While most of the construction was done by the Federal Program, the Aqueduct is maintained and operated by the California Department of Water Resources.</p> <p>The San Luis Canal (California Aqueduct) has been leaking at Milepost 88.3 for over 8 years. A number of different methods have been used to try and spot the leaking and protect the Aqueduct and surrounding land, but it continues to leak. In order to prevent a failure in the Aqueduct, to protect surrounding land and water deliveries another method is being proposed. A stability berm with drainage will be constructed next to and on top of the existing berm. It will be constructed from about 300 feet south and 500 feet north of Milepost 88.30 for a total length of 800 feet. The berm will extend about 40 feet east from the toe of the existing embankment and will lay about 40 to 50 feet on top of the existing embankment. Some material will be stock piled at the site. By managing this leak, DWR can further protect water quality and water deliveries for downstream municipal and agricultural water users.</p>		
2008128054	<p>Automatic Meter Reading Program Golden Hills Community Services District Tehachapi--Kern</p> <p>GHCSO owns and operates the domestic water system for the Golden Hills community. GHCSO has applied for a grant from the Department of Water Resources ("DWR") that would provide partial funding for a GHCSO project to purchase and install approximately 2,000 automatic meter readers ("AMR") water meters to replace older existing conventional meters. The AMR meters will provide continuous flow data for each water connection. The purpose of the meter replacement project is to reduce water consumption and reduce demand on the GHCSO's water supplies.</p>	NOE

1990010217	Firth Amendment to the Central Imperial Redevelopment Plan San Diego, City of San Diego--San Diego The program EIR addresses the potential environmental impacts, mitigation measures, and alternatives related to proposed Community Plan Amendments, Rezones, and nine specific redevelopment activities located within the Project Area. The project includes amendments to the Southeastern San Diego Community Plan and Skyline-Paradise Hills Community Plan, the Southeastern San Diego Planned District Ordinance and the Land Development Code. Rezones and a Community Plan Implementation Overlay Zone are proposed in order to implement specific development within the Project Area. The Program EIR analyzes a net potential increase in development within the Project Area of 2,125 residential units, and 429,750 square feet of non-residential uses, assuming that all nine of the redevelopment activity areas are developed as currently anticipated. These areas would develop upon market and other factors. The maximum development potential of the nine redevelopment activities areas is not anticipated to be realized for approximately a 10 to 15 year period.	EIR	01/21/2009
2006041097	SR-60/Lemon Avenue Interchange Project Caltrans #7 Diamond Bar--Los Angeles The purpose of this project is to improve traffic operations by providing direct access to this area, which is urbanized and largely built out. This interchange location is based on a Freeway Agreement dated March 26, 1968, between Los Angeles County (County) and Caltrans. The project limits extend east and west of the existing Lemon Avenue undercrossing (UC), extending west approximately 3,100 feet (ft) (950 meters [m]) to the Brea Canyon Road interchange and east to approximately 1,950 ft (594 m) east of Lemon Avenue. The project proposes a partial interchange with SR-60 at existing Lemon Avenue. Two of the Build Alternatives would require the acquisition of right-of-way (ROW).	FIN

2001042086	Bohemia Retail Project Placer County Auburn--Placer The proposed project would be constructed as a single-phase retail development consisting of an approximately 155,000 square-foot building on 18.62 acres. The project could include an outdoor garden center and fueling area depending on the end user(s). The improvements would include new underground utilities, paving, parking, lighting, and landscaping. The proposed parking design requirements, circulation and landscaping would conform to Placer County standards as contained in the Placer County Design Guidelines Manual and the Auburn/Bowman Community Plan. The proposed parking lot would include 717 standard parking stalls, 17 Handicap (HC) accessible spaces, and two van accessible stalls. Cart corrals would be used in the parking lot. Retaining walls are proposed along the property line of existing residential lots to the north and along Canal Street to the east. In addition, a detention pond is proposed in the northwest portion of the site.	NOP	01/06/2009
2008121037	9936 Durant Drive (Tentative Tract No. 70035) Beverly Hills, City of Beverly Hills--Los Angeles The project is currently developed with a two-story, 28-foot tall, 12,145 square foot apartment building with five dwelling units. The existing Colonial Revival-style apartment building was constructed in 1935 and is the work of architect Robert V. Derrah. Under the proposed project, the existing apartment building would be demolished and replaced by a single four-story, 45 foot high, 24,906 square foot building containing 13 units, with two levels of subterranean parking containing 41 parking spaces. Access to the subterranean parking would be from the alley.	NOP	01/06/2009

	capacity to make informed decisions about water quality and related watershed issues. Education Coordination will include field trips and activities, curriculum documentation, regional stewardship education efforts, teacher trainings, and program presentations to other regions. Community Outreach Coordination will include naturalist-led outings that will include willow planting along stream banks, creek walls and clean-ups, stream ecology, etc. All student education and community outreach activities will occur on public lands.		
2008128062	<p>Inyo Complex Post-Fire Watershed Recovery (SNC 080181) Sierra Nevada Conservancy --Inyo</p> <p>The Bureau of Land Management is requesting \$34,300 of Sierra Nevada Conservancy Prop. 84 Strategic Opportunity Grant funds to study the subsequent recovery of burned streams, their upland watersheds, and plant and wildlife populations in the areas burned by the Inyo Complex Fires in 2007. The project involves using two burned streams and two unburned streams and their watersheds, and comparing pre-fire baseline data. The study will include intensive stream monitoring, water quality and aquatic invertebrate sampling, small mammal and reptile observations, rangeland vegetation monitoring, and riparian songbird population and habitat studies. The final report will consider the interaction of these ecosystem elements and fire effects, and make wildfire management and restoration recommendations.</p>	NOE	
2008128063	<p>Fine Gold Creek Riparian Fencing (SNC 080189) Sierra Nevada Conservancy --Madera</p> <p>The Sierra Foothill Conservancy is seeking \$100,000 in Sierra Nevada Conservancy Prop. 84 funding to create a riparian corridor along one mile of lower Fine Gold Creek, just before it enters Millerton Lake. By excluding cattle from the riparian area, SFC hopes to re-establish native grasses, willows, and other riparian plant species, as well as stabilize the banks of Fine Gold Creek and reduce erosion. SFC staff will monitor the levels of Residual Dry Matter in the riparian area for a four yr period to document growth and utilization by grazing. In addition to fencing, the grant would provide funding for a water development project to provide water for cattle away from the creek. The water development project will include spring development on the east side of the preserve and a solar water pumping station from an existing collection system near Fine Gold Creek. The solar pump will fill two water holding tanks high on the west side of the preserve, from which two water troughs will be filled to supply water for cattle and wildlife.</p>	NOE	
2008128064	<p>Post-Fire Invasive Weed Management in the Upper Merced River Watershed (SNC 080205) Sierra Nevada Conservancy --Mariposa</p> <p>The Upper Merced River Watershed Council is seeking \$60,500 in Sierra Nevada Conservancy Prop. 84 funding to implement a post-fire invasive weed management project to protect and enhance the ecological health of the Upper Merced River Watershed. The project would fund two seasons of intense, integrated weed management in targeted areas along 7 miles of the Merced River from Briceburg downstream to the North Fork. The work will focus on removing invasive weeds, targeting the areas affected by the recent Telegraph Fire, where increased germination is expected. Due to the Wild and Scenic status of the Merced River, no herbicides will be used; the invasives removal work will be accomplished by manual removal (weed eaters, picks, weed claws, scythe).</p>	NOE

	0.5 mile portion of the Pit River owned by three landowners approx 5 miles northeast of Lookout, CA; flood flows along this reach of the Pit River are known to erode 1 to 2 ft of soil each yr. The project will stabilize eroding riverbanks and improve floodplain conditions. Rock will be installed along portions of the river where vertical incision occurs at depths of fifteen ft. In addition, some soil removal and minor grading will occur to improve floodplain conditions and allow the establishment of riparian vegetation. The project also includes livestock fencing and watering structures. The project will be monitored by the PRCD to determine if project goals have been met.		
2008128077	Assignment of Ground Restoration Credit to El Dorado County APN 17-041-17 Tahoe Conservancy Unincorporated--El Dorado Project consists of the sale and transfer of 5,884 sf of SEZ Restoration Credit and 2,712 sf of Class 1-3 Restoration Credit from Conservancy-owned land, to a receiving parcel where an existing driveway will be paved and widened to existing Code for emergency vehicles, for an existing residence. The assignment enables the receiving landowner to carry out the project without any net increase in the amount of existing land coverage in class SEZ or 1, 2, or 3 areas within the Lake Tahoe Basin.	NOE	
2008128078	SR-41 at Serpa Canyon Road Drainage Maintenance Caltrans #6 --Madera Caltrans proposes drainage maintenance along SR-41 between post miles 29.4 and 31.3. Activities include placement of Best Management Practices to maintain slope and erosion protection adjacent to the highway (cobble, riprap, and/or gabion baskets, hydroseeding or other plantings). Extension of various drainage culverts and spouts with minor excavation is necessary, including near Coarsegold Creek.	NOE	
2008128079	Petition for Change State Water Resources Control Board -- Water is supplied to Twin Lakes campground via the Mammoth County Water District treatment and distribution system using Forest Service held water rights under a master operating agreement signed November 23, 1983 in order to meet California State Health regulations for treatment of domestic water supplies. The Licensee submitted a petition to change the point of diversion in order to correct the license record to match the current POD at Lake Mary.	NOE	
2008128080	Solar Energy Project for the San Joaquin County Robert J. Cabral Agricultural Center. San Joaquin County --San Joaquin The project includes acquisition, planning, design, purchase of equipment, and construction of a solar project for the San Joaquin County Agricultural Center. The purpose of this project is to stimulate economic development by financing a public project that will provide near term results and economic benefits, including job creation, consistent with the area's strategic plan. The project is to be completed in two phases. Phase One is a 63 kW (DC) roof mounted, fixed tilt solar electricity photovoltaic generating system on the roof of the Main Building. The Phase one project is anticipated to offset approx. 15% of the expected Agricultural center's electric usage. Phase Two is for a solar electric generating system to be mounted	NOE

	River, as required by Regional Board Waste Discharge Requirements (WDRs) Order No. R1-2003-0026, which serves as the District's National Pollutant Discharge Elimination System (NPDES) Permit (No. CA0024058). The UV system will be designated so that disinfected effluent meets California Code of Regulations, Title 22 requirements for reuse and NPDES permit requirements for river discharge. The Project will be installed on approx. 8,000 sf of previously developed land within the treatment plant boundaries.		
2008128086	Emergency Park Structures/Facilities Demobilization Parks and Recreation, Department of --Monterey Demobilize visitor and park personnel structures, facilities, and equipment at Limekiln State Park by temporarily relocating/removing, and installing specified items. Demobilization of the park unit is necessary to prevent severe damage to Highway 1 bridge footings and to park assets from upcoming winter storms. The Chalk Fire in Southern Monterey County in November 2008 burned 95% of the ground vegetation in Limekiln State Park along steep drainage channels making the land vulnerable to mudslides and flooding. After seasonal rains and high runoff have ceased, structures, facilities, and equipment will be replaced in their prior location using existing footings, and abutments. This project involves the following work: Bridge Removal, Mobile Home and Park Furniture Removal, Energy Utilities.	NOE	
2008128087	West Orange County Feeder Periodic Shutdown and Dewatering Metropolitan Water District of Southern California Buena Park, Fullerton--Orange The Metropolitan Water District of Southern California proposes to conduct the periodic shutdown and dewatering of the West Orange County Feeder pipeline for routine maintenance, inspection and repair.	NOE	
2008128088	Santiago Lateral Pipeline Discharge and Repair at Station 382+20 Metropolitan Water District of Southern California Orange--Orange The Metropolitan Water District of Southern California proposes to discharge and repair an existing blow-off structure pipeline exposed by erosion of the patrol road. Metropolitan proposes to excavate, remove and replace the damaged corrugated steel drain line within an approx 15 ft area. The pipe will be encased with concrete to further protect the pipeline from future erosion events.	NOE	
2008128089	Emergency Permit for Blue Diamond Growers to Treat Spent Aluminum and Magnesium Phosphide Toxic Substances Control, Department of --Sacramento BDG fumigates its nut products with pesticides containing the active ingredients aluminum phosphide and magnesium phosphide. The fumigation is conducted in enclosed structures such as warehouses, storage bins and silo; these structures are tightly sealed during the fumigation. When the fumigation is complete, the spent pesticide residues are removed from the warehouse, bin or silo. DTSC determined that, for public safety reasons and to minimize exposure of the BDG employees and the public to the hazards posed by the partially-spent waste aluminum and magnesium phosphide pesticide residues, it is essential that BDG be able to, on an ongoing basis, immediately place these hazardous wastes into the deactivation treatment process. DTSC is issuing this emergency permit as interim authorization to store and treat these wastes, while a permanent regulatory or statutory means of authorization is identified. Because of the nature of the	NOE

	<p>partially-spent waste residual, it cannot be shipped to another facility for treatment. The partially-spent residuals continually produce phosphine gas. This gas must be allowed to escape, or the gas pressure may build up to dangerous levels. The MSDS for Phostoxin, one of the widely-used of such products, state: "The phosphine [gas], if it is allowed to concentrate in a confined area, may be toxic and/or flammable." This characteristic makes the waste residuals unsafe to containerize for offsite shipment.</p> <p>BDG is in the process of converting the Sacramento facility fumigation process from the tablet-form to the pesticide to a gas-dispenser system. When conversion is completed, the Sacramento facility will no longer be using aluminum phosphide. The fumigant will VaporPhos, which is phosphine gas; there will be no residual materials to deactivate. As of Dec 2008, construction of the gas system is almost completed, and most of the product (nut) storage units are already being fumigated with VaporPhos. Only a small part of the fumigation is currently being done with the metallic phosphides. BDG expects that the full conversion will be completed and functioning well within the 45-day effective period of this emergency permit. BDG must notify DTSC and local regulatory agencies when the gas-dispenser system is completed, no more phosphide residuals will be treated, and the current treatment containers and secondary containment impound have been cleaned of all residues. This notification must occur before the last effective date of this emergency permit, January 26, 2006.</p>		
2008128090	<p>Worthington Road Intersection Improvements Regional Water Quality Control Board, Region 7 (Colorado River Basin), Palm Desert --Imperial</p> <p>The County of Imperial proposes to improve the intersection of Worthington Road and McConnell Road. Improvements to the intersection consists of widening each side of Worthington Road and constructing an eastbound left turn lane off Worthington Road onto McConnell Road. The widening of Worthington Road will require the extension of existing Imperial Irrigation District drain pipes approx 16 ft on each side of the Mesquite Drain. The pipes located within this drain will be extended in a northerly and southerly direction along Worthington Rd. In combination with the old age of the Mesquite Drain Pipe Crossing. Since these additional operation and maintenance activities are a direct result of the proposed action by the County of Imperial, the County of Imperial will be paying the full cost of these improvements as part of the Worthington Rd intersection improvements.</p>	NOE	
2008128091	<p>Test Borings on Horse Trail for Sediment Study (08-06-SD-12) Parks and Recreation, Department of --San Diego</p> <p>This project consists of the drilling of 10 borings along the Horse Trail (aka Beach Trail) located in Border Field State Park. Borings will be approx 8" in diameter and 10' deep. The purpose of the borings is to test the underlying material of the trail so effective design improvements could be implemented on the road. These improvements would allow use of road by heavy equipment transporting sediment to the beach. Per standard policy, a biologist or cultural resource specialist will ensure avoidance of significant natural or cultural resources during project implementation.</p>	NOE

2008128092	Silver Lake Outlet Tower and Gate Repairs El Dorado Irrigation District --Amador The project involves replacing the steel tower, gate and appurtenances, trashrack, mechanical operators, and miscellaneous concrete repairs. An overflow parking area at the dam will be used as the staging area for construction equipment and materials. Access to the dam base will be via the existing parking lot and adjacent road. No tree removal or vegetation removal will be necessary with the access routes. Snow removed from the laydown area will be stockpiled at the far end of the parking area. The existing outlet gate, trash rack and tower will be removed. A new stainless steel gate, new stem, and new brackets will be mounted to a new steel tower with walkway. A new mechanical operator and floor stand will be installed on the new tower. The gate will be aligned and tested. The new trash rack will be replaced with a like steel bar structure on the tower. The outlet system capacity will remain unchanged. No emergency, untimely, or extraordinary drawdown of the reservoir is anticipated because the plan is to have the work coincide with the normal annual draw down cycle. Specifically, the target construction window is early February through early April, before reservoir refill commences for the yr. Full scale operation of the renewed gate operating system will commence upon completion of the construction work before the reservoir refill conditions commence in 2009.	NOE			
2008128093	Right of Entry Permit for Department of Water Resources Parks and Recreation, Department of --Sacramento Issue a temporary, three-yr, non-exclusive right of entry permit to the DWR to allow DWR and its contractors access to a state-owned railroad right of way (under jurisdiction of the State Dept of Parks and Rec) for the purpose of conducting field investigations, including ground surveys, engineering, biological, geological, archaeological, floral and faunal studies, phase 1 environmental assessments and other incidental purposes as may be necessary. 	The project is located approx 4 miles north of Boulder Creek at the 17.09 mile marker on Hwy 9. The site may also be accessed off of Reynolds Drive at 338 Reynolds Drive, Boulder Creek CA.		
2008122032	Riparian Habitat Restoration of the Codora Unit California Wildlife Conservation Board --Glenn The purpose of the proposed project is to restore riparian and associated habitats within the SRNWR Codora Unit in a flood neutral manner to help fulfill USFWS' congressional mandate to preserve, restore, and enhance riparian habitat for threatened and endangered species, songbirds, waterfowl, other migratory birds, anadromous fish, resident riparian wildlife, and plants.	MND	01/08/2008
2008122033	Solid Waste Transfer Station Expansion Brentwood, City of --Contra Costa The proposed project consists of the expansion and relocation of the existing Brentwood Solid Waste Transfer Station operations. The transfer station would be relocated to a 5.7 acre site north of the Brentwood Wastewater Treatment Plant, approx 1,000 ft north of the existing transfer station site. The proposed project would require revisions to an existing City of Brentwood CUP 97-2 and Contra Costa County Environmental Health Solid Waste Facility Permit (07-AA-0053) to allow for the relocation and expansion of the existing transfer station. The expansion of the transfer station would include installation of a transfer facility building and various site improvements. The site would include a new, fully-enclosed transfer building, a tipping pad, a parking area, a materials storage area, and a container storage area.	MND	01/14/2009
2008122034	Hughes Drive and Retaining Wall Point Arena, City of Point Arena--Mendocino The applicants propose to construct a driveway and retaining wall. The driveway has previously been graded and has cuts and fills. The amount of ground preparation (clearing-stripping, keying, bench, and subdrainage) to support the fill, and the amount of moisture conditioning and compaction effort during the fill placement operations is unknown to BACE. The brush-covered slope below the driveway in the retaining wall area has a steep gradient of approx 1.9 ft horizontal to one ft vertical. The slope above the retaining wall varies from 1.3H:1V to 1.8H:1V for a height of approx 22 ft above the proposed retaining wall.	MND	01/19/2009
2008122039	Eticuera Creek Watershed Invasive Plant Control and Habitat Restoration Fish & Game #3 St. Helena--Napa The project proposes to enhance and restore riparian and upland habitat functions and values by the removal and control of invasive plants along the banks and associated floodplains of perennial and seasonal-flowing streams of the Eticuera Creek watershed. Plant control techniques may include the use of mowing, cutting, herbicides, and grazing. In the northern portion of the watershed, invasive plant control will be followed by the planting of native vegetation along creek banks and associated uplands.	MND	01/08/2009

	campus would include a hard court playground area and turf playfields, and a lunch shelter. An eight-ft. masonry wall would be installed along the eastern edge of the campus to separate the school from adjacent residential homes. The main pedestrian entrance will be located along 61st St. The drop-off and pick-up zone for passenger cars would be along the north side of 61st St. Approx. 72 parking spaces would be provided for faculty and staff in a surface parking.		
2008062092	Lighting Efficiency Standards Energy Commission -- The project consists of the adoption and implementation of statewide efficiency standards for State-Regulated General Service Lamps and Portable Lighting Fixtures (referred to generally as lighting standards). The regulations for State-Regulated General Service Lamps will consist of the: (1) early adoption of the federal Energy Independence and Security Act of 2007 (EISA 2007) Tier I standards for incandescent lamps, to be effective Jan. 1, 2011; and (2) early adoption of federal EISA 2007 Tier II standards for General Service Lamps, to be effective Jan. 1, 2018. The regulations for Portable Lighting Fixtures will consist of efficiency standards to reduce the energy use of the fixtures. The standards do not address site-specific conditions and do not require or mandate construction of new facilities or infrastructure.	NOD	
2008081034	Sewer Forcemain Replacement Project 22nd District Agricultural Association Del Mar--San Diego Authorize issuance of a 20-year General Lease - Public Agency Use to the 22nd Dist. Agricultural Assoc., beginning Dec. 3 2008, for the construction, use and maintenance of an eight in. diameter sewer forcemain pipeline encased within a 16-in. diameter high density polyethylene pipeline, and the abandonment in place of an existing 8-in. diameter sewer forcemain pipeline.	NOD	
2008102085	Rosemore-Woodland 69-kV Transmission Line Project Modesto Irrigation District Modesto--Stanislaus The MID proposes build a 69-kV transmission line connecting the Woodland Generation Station to the newly expanded 230/69/12-kV Rosemore Substation. MID would construct approx. two miles of 69-kV transmission line along Woodland Ave. (Woodland), Carpenter Rd. (Carpenter), and MID Lateral No. 4 to provide a direct connection between the two substations. The new 69-kV transmission line would be overbuilt above the existing 12-kV distribution taller poles. The alternate route along the remainder of the route along Carpenter a separate 60-kV transmission line will be constructed on the opposite side of the roadway. The new 69-kV line would be located in public rights-of-way along Woodland and Carpenter and on MID property along the canal. Although most of the route is adjacent to commercial and industrial land use, the route also passes through residential areas and agricultural lands.	NOD	
2008102091	2008 Amendments to Appliance Efficiency Regulations Energy Commission -- The Energy Commission's mandate is to promote energy efficiency through a variety of means, including efficiency standards for appliances based on the provisions in Public Resources Code Section 25402.	NOD

	The Commission is proposing changes to the appliance efficiency standards as an action to support its mandate. The proposed amendments considered in the 2008 Appliances Rulemaking include provisions for revised efficiency requirements for metal halide luminaries and residential pool pumps, clarifications to the standardized testing of portable spas, and a voluntary test procedure for battery charger systems to determine their efficiency. Additionally, the proposed amendments will update and revise language in the current regulations so that all language is aligned with recent federal appliance regulations.		
2008111025	Landfill Gas Renewable Energy Project at FRB Landfill Orange County Irvine--Orange The proposed project would allow for the development of a landfill gas renewable energy project at the FRB Landfill.	NOD	
2008129005	Negative Declaration for Eco Energy Bio-Diesel Production Plant Adelanto, City of Adelanto--San Bernardino Eco Energy Bio-Diesel Inc. as applied for a conditional use permit to allow installation and operation of a bio-diesel production plant at 16350 Beaver Rd. Located within the Cit. of Adelanto's Industrial Park III, the fuel production equipment would be installed within an existing 21,500-sf. industrial building. A spill containment area will be constructed on the west side of the building. The plant will produce approx. 12,000 gals. of bio-diesel fuel per day.	NOD	
2008129006	Dry Creek Improvement Project, Agreement No. 2008-0139-R4 Clovis, City of Clovis--Fresno CA Dept. of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Sec. 1602 of the Fish and Game Code to the Project applicant the City of Clovis, represented by Steve White, for its Dry Creek Improvement Project. The applicant proposes to replace and extend a culvert under the intersection of Shepherd and Fowler Avenues to accommodate the widening of these city streets, and realign the Dry Creek Channel extending for a distance of 0.25 mi. west of the intersection of Shepherd and Fowler Avenues.	NOD	
2008129007	General Lease - Protective Structure Use Coastal Commission Solana Beach--San Diego Authorize issuance of a General Lease - Protective Structure Use to James A. and Kimberly J. Caccavo, beginning Dec. 3, 2008, for a term of 10-years, for the retention, use and maintenance of a 68-ft. long, 35-ft. high seawall and a portion of a seacave/notch fill and the construction, use and maintenance of a 40-ft. long by 35-ft. high seawall. 2007011008	<p>Wallis Annenberg Center for the Performing Arts Beverly Hills Beverly Hills, City of Beverly Hills--Los Angeles</p> <p>The project calls for the rehabilitation and reuse of the City's former main post office as the Wallis Annenberg Center for the Performing Arts. The Center would include the following components: a new 500-seat auditorium building (to be sited on the post office property south of the existing post office building); a new City subterranean parking structure at 455 North Crescent Drive that would be placed under Crescent Drive (between the post office building and city hall); and the rehabilitation of the post office in accordance with the Secretary of the Interior's Standards in order to accommodate a 150-seat multi-purpose performance/rehearsal/lecture space; three classrooms; basement-level dressing rooms and mechanical equipment rooms; donors lounge; restoration of the building's existing lobby area; educational and administrative offices; and an incidental food concession with outdoor seating. Ancillary features proposed on the property would include new landscaping, sculpture gardens, walkways, elevator/escalator and/or stair access to the parking garage, surface parking, garage access driveways, and loading zones for van and truck deliveries. The City parking facility is being proposed with options as either a two-level garage or three-level garage. The two-level garage is proposed to provide between 270 and 300 parking spaces with points of access at Santa Monica Boulevard South. The parking garage is addressed as the main impact discussion in the EIR. The three-level option would provide between 400 and 430 parking spaces. As it has much in common with the two-level option most of the environmental issues associated with this option are covered in the discussion of the two-level option in the Alternatives section of the EIR.</p>	EIR	01/08/2009
2007091096	<p>University High School Stadium Irvine Unified School District Irvine--Orange</p> <p>The project entails the construction of a new stadium at University High School, an existing facility. The project would be constructed on the north side of the campus in an area presently developed with the school's football field and athletic track. Stadium features would include home and visiting team bleacher structures, elevated field lighting, a public address system, support building (concession stands, restrooms, and ticket booths), and other associated amenities. Both University and Woodbridge high school would play varsity home games, including football games, soccer games, and track meets, at the new stadium. As scheduling permits, the facility would also accommodate a variety of organized community-sponsored events.</p>	EIR	01/23/2009

	<p>requirements of both the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA). The document addresses the environmental consequences of the Dodgers Dream Field, proposed for development at Anthony C. Beilenson Park, within the central sector of the Sepulveda Basin in Los Angeles, California. The proposed Project would include development of a National Wheelchair-Softball Association (NWSA) softball field for ages six (T-ball) to adult. The Proposed Project would encompass approximately one-acre within the Sepulveda Basin. The land proposed for development is owned by the Corps and operated by the DRP.</p> <p>The maximum length of the field would be 150 feet and the center depth would be approximately 220 feet. Anticipated elevations of the proposed structures (fencing) would be less than the height limitation of 20 feet. The spectator seating would be portable; no permanent seating would be constructed. Upon operation, the field would be utilized during the weekdays only and typically in the later morning or early afternoon hours. The patrons would be bused to the site, dropped off during playtime, and picked up after the game has completed. The bus would not park at the parking facility, but instead would park off-site along Balboa Boulevard. The origin of the patron would primarily be nearby schools (the exact origin is based on the need of the NWSA field, which would fluctuate year to year). There would be a maximum of two games per day and no games would occur during the evening hours.</p>		
2008121046	<p>Interstate 10/Cherry Avenue Interchange Caltrans #8 Fontana--San Bernardino California Department of Transportation District 8, proposes capacity, operational, and safety improvements to the existing Interstate 10(I-10)/Cherry Ave. Interchange in the City of Fontana, San Bernardino County. Project improvements include replacing the existing I-10/Cherry Ave. Overcrossing, widening the existing Union Pacific Railroad/Cherry Ave. Overhead and Cherry Ave. to the west, and modifications to the existing on- and off-ramps to increase storage capacity. The project limits on Cherry Ave. are from Valley Blvd. to 1,000 feet (ft) south of Slover Ave. and on I-10 from 4,251 ft west to 4,850 ft east of the Cherry Ave. centerline, including auxiliary lanes for the on-and off-ramps. In addition, Slover Ave. will be improved approx. 1y 1,000 ft. east and west of Cherry Ave. Project requires acquisition of right-of-way within all four quadrants of interchange.</p>	MND	01/13/2009

2008121045	2919-2923 Wilshire Boulevard Mixed Use Project Santa Monica, City of Santa Monica--Los Angeles The 22,119 square foot (SF) project site consists of two existing parcels (2919 and 2923 Wilshire Blvd) situated at the west corner of the intersection of Wilshire Boulevard and Stanford Street within the City of Santa Monica. The project site is currently developed with a single-story 5,270 SF commercial structure that contains a liquor store and a pet shop (2919 Wilshire) and an adjacent surface parking lot (2923 Wilshire) containing 29 parking spaces. The proposed project involves the demolition of the existing one-story brick structure, as well as the paved surface parking lot, to construct a mixed-use development with 11,595 sf of commercial retail on the ground floor to be used as a specialty grocery store and 26 apartment units on the second through fourth floors (25,782 sf of residential use). Apartment units would be a mix of one-bedroom (6 total), two-bedroom (13 total), and three-bedroom (7 total) units. The project would also involve excavation to construct two-levels of subterranean parking with 100 parking spaces. The project proposes to take access from Stanford Street to both the parking garage and a loading area for delivery trucks. The applicant has applied for a Development Review permit for a development project exceeding 22,500 SF of floor area. In addition, the project applicant has applied for a Variance request to allow a modification of the City's driveway requirements in order to locate a driveway within a required yard setback. The project will be constructed with techniques consistent with Leadership in Energy and Environmental Design (LEED) certification pursuant to the requirements of Santa Monica Municipal Code. 	12,000 gallon tank at the top of the hill with water from the existing water system at the residence area near the light station. A backhoe will excavate an approximately 30" deep by several feet wide trench for approximately 2,465' (~0.5 miles) and an additional section of approximately 185' will be directionally drilled under a small perennial watercourse as well as a 100' section from the tank to the south side of the entrance road. An extra conduit for high-speed internet cable will be included in the trench for use at a future time. Additionally, install on Frolic Cove history panel and low-profile frame, ~ 48 in. wide x 24 in. tall, along the trailside at Frolic Cove. Two metal stanchion posts (~4" x 4") will be buried 2ft deep, and overall height after installation is ~4 ft.		
2004071075	PRC-3904.1 Ellwood Marine Terminal Lease Renewal California State Lands Commission Goleta--Santa Barbara The project is the renewal of a lease of state land for operation of the Ellwood Marine Terminal (EMT), a crude oil marine loading terminal and storage facility. Crude oil is first stored in two onshore tanks and then pumped into a pipeline for loading into a dedicated barge. The EMT has an average barge loading rate of 4,200 barrels (bbls) per hour with a maximum barge capacity of a total of 56,000 bbls. Typically, a dedicated barge is loaded two to three times per month with 55,000 bbls of crude oil per load. The oil is then transported to refineries in the Port of Los Angeles area. The offshore facilities consist of an irregular six-point mooring system located 2,600 feet from shore, two additional buoys, a 10-inch-diameter marine loading pipeline that extends from the beach to the mooring area, and 240-foot long rubber hose to the offshore end of the pipeline. 	<p>space, parkway corridors, trail areas, and buffer areas. The majority of the proposed project area, approx. 359 acres, lies within the existing Plumas Lake SP area. The remaining 218 acres of the proposed project site lies outside of the Plumas Lake SP area along the southwestern boundary. The project would require several land use entitlements from Yuba Co. including a General Plan Amendment/Change of Zone, Plumas Lake SP Amendment, a developing agreement, and a Tentative Subdivision Tract Map. The proposed project would also require approval from LAFCO to address amending the Olivehurst Public Utility Dist. (OPUD) and Co. Service Area 66 service area boundaries to accommodate the project site.</p>		
2008102098	<p>Arboga Elementary School Modernization and Expansion Marysville Unified School District Marysville--Yuba Renovation and modernization of existing school facilities including but not limited to the construction of new classrooms, library, administration/multipurpose building and general site improvements.</p>	NOD	
2008102107	<p>North Coast Partners, Inc. Minor Subdivision Humboldt County Eureka--Humboldt The project includes a minor subdivision to create two (2) parcels of 24,386sf. and 7,162sf. Each proposed parcel is currently developed with commercial operations, both of which are conditionally permitted in the Commercial General (CG) zoning district. Proposed parcel 1 is developed with an approx. 6,161sf. commercial structure occupied by Design Air Heating and Sheet Metal. Proposed parcel 2 is developed with an approx. 2,641sf. commercial structure occupied by the Crystal Springs Bottled Water Company, a pre-manufactured office and an approx. 350ft. deep artesian well and well house. Both commercial structures were constructed in 1961, prior to building permit or setback requirements. The office was permitted in 1988 and the bottling company was permitted in 1993. A variance is requested to allow for an exception to the rear yard setback for proposed parcel 2. The existing structure on proposed parcel 2 was constructed with a zero side yard setback in 1961. The parcel reconfiguration proposed with this subdivision will change the existing side yard to the rear yard where a 15ft. rear yard setback is required. The existing structure on proposed parcel 1 was also constructed with a zero side yard setback, a portion of which is adjacent to a residentially zoned trailer park. The portion of the side yard shared with the residentially zoned parcel requires a 20ft. setback by today's standards. The proposed subdivision will not increase the existing legal nonconformity to this requirement. The Special Permit is requested to waive the requirement of a loading space, per 313-109.1.5.2 of the Humboldt Co. Code on proposed parcel 2. Although there are no wetlands on the site, wetlands are present across Eich Rd. to the south and on an adjacent parcel fronting S. Broadway to the northeast. The project has been conditioned to require the construction of a storm water filtration system. Curb, gutter and sidewalk have already been developed along the frontage of the parcel in anticipation of this project. No trees are proposed to be removed for this project. No new development is proposed.</p>	NOD

Central Plant and four multi-level Parking Structures. In addition to construction of these facilities, the HMNMH master plan proposes to: 1. Add nine new beds to the Nursing Pavilion Building; 2. Demolish the existing 8,000sf. Foundation Building; 3. Reconfigure surface parking to provide a total of 308 on-site spaces; 4. Provide helipads on the rooftop of both Parking Structure I and the Inpatient Building; 5. Provide right-turn pockets and modify traffic signals along the McBean Parkway project frontage; 6. Reconfigure 9,770sf. of current administration space in the existing hospital building to accommodate 18 additional new ICD beds; 7. Export up to 93,293 cubic yards of dirt associated with subsurface excavation for the Inpatient Building and Parking Structures 1, 2, 3 and 4; 8. Dedicate a minimum of 58ft. of public right-of-way dedication on-site to accommodate a new right-turn lane from eastbound McBean Parkway to southbound Orchard Village Rd. to address future traffic conditions beyond the scope of this project.	NOD	
2007071040	HCG Irvine Irvine, City of Irvine--Orange The proposed project consists of a zone change for reduced setbacks, development agreement, Master Plan to develop 785,000 sf. of office space and 15,500 sf. of retail/restaurant space and conditional use permit for restaurant use and a parcel map to subdivide the property. Implementation of the proposed project would require the demolition and removal of the existing 169,555 sf. one-story office and industrial building. Three parking structures will be provided (above ground and sublevel). A large open space area, approx. two acres, between, and accessible from, the proposed five to seven buildings will be provided.	NOD

2008129009	Forks Timber Harvesting Plan - Streambed Alteration Agreement Forestry and Fire Protection, Department of --Butte Streambed Alteration Agreement 1600-2008-0021-R2. This project involves the replacement of a failed Humboldt crossing with a 48 in. diameter or larger corrugated metal pipe (CMP) on a Class II watercourse, and the replacement of 2 failed undersized CMPs with 36 in. diameter or larger corrugated metal pipe (CMP) on 2 Class II watercourses, and the use and renovation of 3 existing waterholes.	NOD	
2008128145	Issuance of Streambed Alteration Agreement No. R1-08-0203, Old Oregon Trail Culvert Replacement and Flood Protection Project Fish & Game #1 Redding--Shasta The project is limited to the replacement of the two existing 42-inch by 28-inch by 55-foot long culverts under Old Oregon Trail with four 42-inch by 175 feet long metal culverts to allow for the anticipated future widening of the existing road surface. A 42-inch standpipe shall be incorporated in the southernmost culvert to provide additional capacity during storm events. Downstream of the culvert a 20-foot by 50-foot long scour apron will be installed to prevent erosion.	NOE	
2008128146	Issuance of Streambed Alteration Agreement No. R1-08-0442, Routine Creek Maintenance for Clty of Yreka Fish & Game #1 Yreka--Siskiyou The project proposes routine maintenance activities to clear stream channels, culverts, and a storm drain conveyance system.	NOE	
2008128147	Issuance of Streambed Alteration Agreement No. R1-08-0339 Fish & Game #1 --Lassen The project is limited to the placement of a quarter ton of rock stop protection along 50-linear feet of road embankment.	NOE	
2008128148	Kono Tayee Homeowners Association Dredging canal on Clear Lake Fish & Game #2 --Lake This project will remove approximately 300 cubic yards of mud, sand and gravel that has built up near the mouth of the entrance to an artificial canal that connects to Clear Lake. The dredging will not go deeper than the canal's original design depth. The dredged material will be placed against the existing retaining wall and will need to be dredged again every few years. The dredging will be performed by an aquamog dredger on a floating barge in the canal. No equipment will be operated in the channel. Work will not affect the banks and no vegetation will be removed.	NOE	
2008128149	Issuance of Streambed Alteration Agreement No. R1-08-0553, Trinity River, Tributary to the Klamath River Fish & Game #1 --Trinity The project proposes the replacement of an existing seep well adjacent to the existing non-functional seep well location. Work will include excavation of the stream bank to install one seep well, pump, water supply lines and electrical conduits to divert water pursuant to the Responsible Party's legal water rights.	NOE

	APN: 102-730-01 also known as Dunroven property. Development plans for this site include a 20,000 square foot tribal government center; a 20,000 sf retail building with identified potential uses including a grocery store, restaurant, and general retail; and, approximately 200 parking spaces. Two driveways will provide access to the development, one on Ocean View Drive and the existing one at Mouth of Smith River Road. No direct access to Highway 101 would be developed.		
2005081055	Castmill Crossing North Regional Commercial Center (North Tulare No. 27, Annexation 2005-04) Tulare, City of Tulare--Tulare The project includes approximately 1,170,000 square feet of regional shopping center development. The shopping center is planned to include a range of retail outlets and services, including such uses as discount warehouse, general merchandise, retail, as well as a variety of medium and small size retailers, service providers, and restaurants. It will also include a 16-screen movie theatre.	EIR	01/29/2009
2008012114	Draft Environmental Impact Report San Andreas Pipeline No. 3 Installation Project San Francisco, City and County of San Francisco, Daly City--San Francisco, San Mateo The project includes installation of approximately 23,400 feet (4.4 miles) of new pipeline to extend the existing San Andreas Pipeline No. 3 (SAPL3) from the San Pedro Valve Lot (SPVL) in Daily City to Merced Manor Reservoir (MMR) in San Francisco. For approximately half its length the pipeline would follow the alignment of the Baden Merced Pipeline (BMPL), which has been taken out of service because of its deteriorated condition. For other sections of the pipeline, the San Francisco Public Utilities Commission (SFPUC) has chosen alternative routes to minimize impacts. MMR is a terminal reservoir in San Francisco and is supplied by San Andreas Pipeline No. 2 via temporary connections.	EIR	01/26/2009
2008011079	Temporary Ocean Water Desalination Demonstration Project West Basin Municipal Water District Redondo Beach--Los Angeles The Temporary Ocean Water Desalination Demonstration Project is proposed to utilize approximately 580,000 gallons per day of ocean water in order to evaluate various alternative technologies and processes, sustainable operation, water quality monitoring, and study the impacts of desalination on the environment. The project includes improvements to the AES pumphouse, the use of an adjacent 40100 area for equipment, and other minor improvements.	FIN	
2008121057	Palm No. 3 Reservoir Project San Bernardino, City of San Bernardino--San Bernardino The U.S Environmental Protection Agency (EPA) is considering authorizing the expenditure of funds awarded to the City of San Bernardino Municipal Water Department (CSBMWD). The project generally consists of constructing a 4 million gallon (MG) water storage reservoir on the existing SBMWD 4.29-acre Palm Plant site. The site contains an existing 5.0 MG and a 325,000 gallon above grade water storage reservoirs, hydro-generation station, which produces electricity from the energy in water delivered to the site from higher elevations, and other water supply equipment. The Palm Reservoir provides the floating storage of water necessary to supply water to the CSBMWD's 1720 College-Palm Pressure Zone. Presently, the College-Palm Pressure Zone has about a 3.2 MG water storage deficiency	MND	01/12/2009

	necessary to protect health and safety of the general public for portable domestic use, emergency and fire flow purposes. Furthermore, the storage deficiency results in more frequent pumps and motors operation cycles during peak electricity usage periods to maintain an adequate supply of water to the system and its customers. This project is being proposed by CSBMWD to correct this deficiency and provide more reliable, efficient, and cost effective water system that is consistent with industry standards for water storage capacity.		
2008122049	EmeryStation Greenway Project Emeryville, City of Emeryville--Alameda The project applicant is proposing to demolish a one-story 8,572-square foot office and warehouse building and its associated asphalt-paved yard and to construct a new four-story research and development building on the project site. The new building would provide approximately 139,232 gross square feet of interior space for office, laboratory, and parking and some ground level commercial retail use. Of the total square footage in the proposed building, approximately 89,678 square feet would be available for office, laboratory and commercial retail use and 49,554 square feet would be used for parking. Parking for 120 vehicles would be provided on the ground floor and on a below-grade level.	MND	01/12/2009
2004111054	Vista Del Mar Elementary School San Ysidro School District --San Diego Project development would occur on the southernmost 17.2 acres of the project site and includes two components: 1) the extension of Del Sol Boulevard from its current terminus near surf Crest Drive to the western boundary of the project site, and 2) the construction and operation of the proposed Vista Del Mar Elementary School (former Elementary School No. 8). The proposed school would provide academic seats for 850 students in grades Kindergarten through six and would include approximately 88 faculty/staff members. The proposed school would serve mainly students generated from the California Terraces Precise Place and would also draw students currently attending Ocean View Hills K-8 School.	NOP	01/12/2009
2008082071	Tolay Lake Regional Park - Interim Plan Sonoma County Petaluma--Sonoma The Tolay Lake Regional Park Interim Public Access & Resources Management Plan (Interim Plan) will provide public access through a Day-Use Permit program, by which park users must attend an orientation to receive a permit. Access to permit holders will be limited to two-three days a week, depending on the season. Under the Interim Plan, Regional Parks will expand the existing Guided Tour program, continue to operate an educational program, and the Annual Tolay Fall Festival during month of October. Development will be limited. Regional Parks will install signage, interim parking areas, trailheads, portable restrooms, and a small water treatment system to provide potable water, an entry kiosk - all of which are temporary in nature and can be removed. Approx. nine miles of former ranch roads will be utilized for Interim Plan trails. Existing building will be used for a park office, ranger residences, and equipment maintenance and storage. The only permanent development are the safety improvements to Cannon Lane, which will add pavement along two separate stretches, each approx. 400 linear ft., to provide a total road width of 22 ft. in these sections. Total road width will include two 9 ft. paved lanes and 2 ft. gravel shoulders along both sides. The safety improvements also include painting a double yellow centerline strip and installing park	NOP

	constructed at this time but will be required when development occurs. The above mentioned Tentative Parcel Map and General Plan Amendment do not involve an development or ground disturbance.		
2008121056	Nogales Street Grade Separation and Gale Avenue/Walnut Drive Widening Project Alameda Corridor-East Construction Authority Industry--Los Angeles The Nogales Street grade separation portion of the Proposed Project includes lowering a currently at-grade segment of Nogales Street, an existing six-lane roadway, under the UPRR Los Angeles Subdivision right-of-way (ROW). A railroad bridge would be constructed to accommodate the two existing tracks plus additional abutment width to allow for a future widening to accommodate a third track. Additional roadway improvements include street construction and widening, off-site modifications, retaining walls, storm drains, a pump station, sewer utility relocations, traffic signals, street lighting, and landscaping. The temporary at-grade crossing of the UPRR tracks. A temporary two-track shoofly, approximately 3,000 feet in length, will be constructed to maintain rail operations during construction. The Gale Avenue/Walnut Drive widening portion of the Proposed Project would widen 0.83-mile segment of Gale Avenue/Walnut Drive (a 0.36-mile segment of Gale Avenue and a 0.47-mile segment of Walnut Drive) by 16 to 18 feet (8 to 9 feet on either side), from its intersection with Nogales Street, creating a four lane road (two lanes in each direction).	Neg	01/12/2009
2007031092	111 Calexico Place Specific Plan Calexico, City of Calexico--Imperial The proposed project is the development of Commercial Highway (CH) land uses, including a Casino and an entertainment facility within an approximately 232-acre project site in the City of Calexico. The proposed project requires the following discretionary actions by the Calexico Planning Commission and City Council, approval of a Specific Plan, General Plan Amendment, Tentative Tract Map, and approval of a Development and Site Plan process from the City of Calexico.	Oth	
1993101036	Lancaster Landfill and Recycling Center (CUP 03-170) Los Angeles County Lancaster--Los Angeles Request for a CUP to allow an increase in the allowable daily intake volume for the existing Class III non-hazardous solid waste landfill and recycling center from the current permitted rate of 1,700 tons per day (tpd) to 3,000 tpd, excluding the additional material that would be used for alternative daily cover at the landfill.	SIR	02/04/2009
1999101037	Rosamond Community Services District, Wastewater Treatment Plant Expansion Rosamond Community Services District Rosamond--Kern The proposed project will expand the capacity of the Dist. treatment plant from 1.3 million gal./day (mgd) to 1.8 mgd by adding a new 0.5 mgd extended aeration facility. The new extended aeration facility will include: grit removal, flow splitting, an extended aeration earthen-lined reactor basin, one secondary clarifier, a return and waste-activated sludge pumping station, chemical feed facility, filter, ultraviolet disinfection, sludge drying beds and a control building. The proposed effluent disposal facilities include a new 22-acre storage pond. Existing treatment plant evaporation ponds will also be used for disposal. The District plans to construct distribution lines in a future project to dispose of the tertiary effluent by irrigation.	NOD

2008091053	Operable Unit 1 Remedial Action Plan, Proposed South Region High School #9 & Middle School #4 Site Toxic Substances Control, Department of South Gate--Los Angeles The project is a Remedial Action Plan (RAP) by for the proposed South Region High School Site #9 (Site) pursuant to Health and Safety Code chapter 6.8. The RAP focuses on excavation and off-site disposal of approx. 29,920 cubic yards (CY) of soils impacted with metals (antimony, arsenic, barium, cadmium, lead and mercury), polychlorinated biphenyls (PCBs), volatile organic compounds (VOCs), polynuclear aromatic hydrocarbons (PAHs), and total petroleum hydrocarbons (TPH). After completion of the planned excavations, cleanup confirmation sampling and site restoration will be conducted. If necessary, additional soil volume will be excavated, to ensure all impacted soils containing the identified chemical of concerns (COCs) at concentrations of the corresponding cleanup levels or above have been properly removed.	NOD	
2008092102	South Wright Elementary School Wright Elementary School District Santa Rosa--Sonoma The proposed project includes development of a new elementary school at a 9.5 acre site at 950 S. Wright Rd. in Santa Rosa, Ca. The new school would have approx. 500 students in grades K-6. The project involves demolition of existing structures, construction of new buildings, re-use of existing structures, and offsite improvements to sidewalks, storm drains and streets fronting the property.	NOD	
2008101018	San Diego River Gorge Trail and Trailhead Improvements San Diego River Conservancy --San Diego SDRC is providing grant funds to the United States Forest Service to construct as much as 2.27 miles of trail descending the west San Diego River Gorge at the end of Thornbush Rd. near San Diego Co. Estates and the San Diego River, closing and restoring user defined trails and providing parking, a restroom, picnic area and other amenities at trailhead.	NOD	
2008102093	District-Wide FEMA 2006 Storm Damage Repair Projects East Bay Regional Parks District --Alameda, Contra Costa The project proposes eight site-specific projects located in Alameda and Contra Costa counties to require landslides on existing roads and trails on District parklands or property under its operational jurisdiction. This document addresses proposed activities that would result in physical changes to the existing environmental conditions of the site. Construction activities will include excavation, grading and clearing, soil placement and compaction, installing retaining walls and potential cut and fill activities to assist with slope stabilization.	NOD	
2008111018	Oakhurst Elementary School Addition Bass Lake Joint Union Elementary School District --Madera The addition of .71 acres to the existing Oakhurst Elementary School.	NOD

2008121067	ENV-2008-3265-MND Los Angeles, City of --Los Angeles Zone Change from [T][Q]C2-1 and P-1 to RAS4-1; Zoning Administrator's Adjustment to allow: (1) a front yard of 0-feet in lieu of the 5-feet required per RAS4-1 zone; and (2) a 10% reduction in the total required open space (5,175 square-feet in lieu of 5,750 square-feet); in conjunction with the new construction of a 5-story (68-feet) over subterranean parking, mixed-use building with 48 residential apartments (4 studios, 6 one-bedroom, 38 two-bedroom) and 1,500 square-feet of commercial office space, providing 92 parking spaces (98 residential, 3 commercial); on 19,607.2 square-foot site, within the [T][Q]c2-1 and P-1 Zones.	MND	01/13/2009
2008121068	Expanded Gage Exchange Project Riverside, City of Riverside--Riverside The Project would construct a pump station on public land and 12,405-ft transmission main in existing roadways and utility easements to allow the exchange of non-portable irrigation water from the City system for portable water from the Gage Canal Company.	MND	01/13/2009
2008121070	Leo Carrillo State Beach North Beach Cabins - Alternative Camping Parks and Recreation, Department of Malibu--Los Angeles The project proposes to install 11 overnight cabins (up to 300 square feet each, 3,300 square feet total) on precast concrete blocks near and along the North Beach parking lot at Leo Carrillo State Beach. The cabins are proposed to provide an alternative camping experience and each would accommodate up to 4 people. The cabins will lack individual plumbing but will have electricity and outdoor amenities including a picnic and cooking area. Two of the cabins would be ADA compliant. The project also will require minor grading and clean up of debris, possible removal of an abandoned septic tank, and minor grading and removal of primarily non-native vegetation. To the greatest extent possible, the cabins will be constructed of materials that will blend well with the surrounding landscape and topography. The project may result in the loss of up to 26 parking spaces currently available for day use activities.	MND	01/13/2009
2008122051	EA 06-03 Live Oak Boat Ramp Improvements Sutter County Live Oak--Sutter To replace the existing 26x160 boat ramp (which is considered inadequate for the recreational vehicles which use the boat ramp) with a new boat launch facility. The new facility will consists of a 39x220 v-grooved two lane launching ramp and a boarding float system which will consist of eight 8x20 pile guided floats with a gangway which will act as a boat dock for launching and loading boats.	MND	01/13/2009

2008122053	Use Permit for Kirkwood Mountain Resort / Mountain Utilities Clean - burning Amador County --Amador Request for a Use Permit to install a 1.1 MW Clean-Burning Micro-Turbine and Heat Recovery Electrical Generation Facility, and 3,200 square foot building to house the turbines at the existing Mountain Utilities Loop Road Propane Storage and Distribution area (APN 026-270-024-000).	MND	01/13/2009
2008122054	Dry Creek Wastewater Treatment Plant Levee Relocation Roseville, City of Roseville--Placer The proposed project consists of the following components: Removing portions of the existing WWTP storage pond levee adjacent to Dry Creek and constructing a new levee that is set back approximately 157 feet from the existing levee (increasing the distance between the Dry Creek channel and the levee); relocation and reconstruction of levees on the east and west sides of the existing storage ponds; removal of interior pond levees and reconfiguration of the existing four ponds into two ponds; pond grading and pond drainage piping; placement of lining in the reconfigured ponds; large pond inlet relocation; construction of slurry walls within the new levee; relocation of an existing 12-inch water line; relocation of existing utility poles and overhead utility lines; installation of monitoring wells, and landscaping and habitat restoration along the recreated 157 foot wide floodplain.	MND	01/13/2009
2008121065	Central Park Village Mixed use Brea, City of Brea--Orange The project includes demolition of five existing medical office buildings totaling 89,000 sf and the removal of the former Brea Community Hospital pad onsite. The hospital was closed in April 2005 and demolished in March 2006. The project proposes 31,000 sf of commercial uses, 45,000 sf of medical offices and 540 dwelling units. The residential component includes 96 single-family attached townhomes (condominiums) and 444 multi-family rental apartments. The apartments will be converted to condominiums at a later date.	NOP	01/13/2009
2008121071	California Ethanol and Power Plant Imperial County --Imperial The proposed project is intended to construct an ethanol plant producing approximately 60 million gallons a year of fuel-grade ethanol and approximately 180,000 tons of industrial-grade carbon-dioxide, from sugarcane to be grown on surrounding farmland, per year. The facility will also combust bagasse (the shredded sugarcane stalks left over once the juice has been extracted) to produce potentially up to 45 megawatts (MW) of electricity, 23 MW of which will be used to power the facility, with the remaining 22 MW sold wholesale into the California power grid as renewable energy. Each facility will produce about 825 million gallons per year of vinasse, the dilute still bottoms from the ethanol fermentation process, which will be anaerobically digested to produce approximately 760,000 million cubic feet of biomethane per year and concentrated to produce 24,000 tons of fertilize per year. 2003062025	<p>Saggio Hills Project Healdsburg, City of Healdsburg--Sonoma</p> <p>The applicant proposes to develop approx. 258.5 acres within unincorporated Sonoma Co., adjacent to the northern boundary of the City of Healdsburg. The project at full build-out would entail a combination of land uses including 130 keyed-unit resort hotel with assoc. uses, 70 resort residences, open space, community park, public and private trails, pump station, City fire substation and assoc. infrastructure and roadway improvements to support the Project. The project also includes dedication of land for future construction by the City of up to 150 affordable housing units. The California Dept. of Fish and Game (DFG) is executing a Lake and Streambed Alteration Agreement No. 1600-2007-0031-3 pursuant to Sec. 1602 of the Fish and Game Code.</p>	NOD	
2004111149	<p>Henry Mayo Newhall Memorial Hospital Master Plan Santa Clarita, City of Santa Clarita--Los Angeles</p> <p>The approved HMNMH Master Plan includes the construction of an Inpatient Building, three Medical Office Buildings, a Central Plant, and four Parking Structures over a 15-yr. period. The 15-yr. term of Development Agreement includes the following:</p> <ol style="list-style-type: none"> 1. Allows the development of 120 additional acute care hospital beds plus new, needed medical services in cardiac care, neonatal and high risk pregnancy care, intensive care and surgical care; 2. Creates new long-term employment opportunities in a range of professional and non-professional health care positions; 3. Improves the community's emergency services and disaster readiness by the inclusion of helipad operations; 4. Secures a \$250,000 payment for a future Transitional Care Unit; 5. Provides sufficient right-of-way dedication and street frontage improvements along McBean Parkway to accommodate future widening and realignment of McBean Parkway; and 6. Requires additional payment of \$500,000 in five years to be used for future McBean Realignment improvements. 	NOD	
2006041096	<p>Yucaipa Freeway Corridor Specific Plan Yucaipa, City of Yucaipa--San Bernardino</p> <p>Specific Plan for residential, commercial, institutional and open space uses, with a General Plan amendment to adopt the SP Land Use Plan and the SP Overlay Dist. for the 1, 242 acre project area.</p>	NOD	
2007011017	<p>Balboa Marina Dock Replacement Newport Beach, City of Newport Beach--Orange</p> <p>The project proposes to replace an existing 132 slip, 27,550 sq. ft. dock with a 20,931 sq. ft. dock to accommodate 102 slips ranging from 22 to 58 feet in length. The addendum outlines refinements to the project including the installation of an earth anchor system to the seawall to further enhance stability and safety, the addition of 3 boat slips to the 102 analyzed in the MND for a total of 105 boat slips and the reduction of dredged sediment from 36,000 cubic yards. The refinements do not change the conclusions in the MND and no new impacts will result from the inclusion of the refinements to the proposed project.</p>	NOD

2007041105	Downtown Specific Plan Santa Maria, City of Santa Maria--Santa Barbara Adoption of the Downtown SP, and amendment to the General Plan Land Use Element amending GP designations within the SP area to CD-1 (Central Dist. I) or CD-II (Central Dist. II), and amendment to the GP Circulation Element amending various existing GP policies and objectives and a zone change to include an SP Zoning Dist. An amendment to the Entrada SP project boundaries and the Westside Revitalization Project Design Guidelines project area map is included. Various Assessors' Parcel Numbers are assoc. with this project.	NOD	
2007082167	El Dorado 89 Segment 1- Luther Pass to Meyers Water Quality Improvement Project Caltrans #3 South Lake Tahoe--El Dorado The project would implement the following water quality improvements along SR89 Segment 1: Construct new infiltration basins to treat runoff within the state right-of-way. The infiltration basins typically consist of unlined (earthen) excavated shallow basins where rainfall and snowmelt runoff will be temporarily collected, helping to remove particles and pollutants before the runoff drains into downstream receiving waters, including Lake Tahoe. Modify cut and fill slopes to accommodate proposed facilities. Construct retaining walls or other rock slope protection to stabilize slopes and provide additional shoulder space to meet roadway design standards and/or allow room for the proposed drainage features. Pave or restore existing and new roadside pullouts and maintenance areas to reduce erosion. Install ditches, dikes, culverts and other drainage facilities to collect and direct runoff to roadside treatment facilities. Most of the improvements can be installed within the existing state right-of-way. Some proposed facilities, such as the new infiltration basins, might require minor acquisition of property or easements to construct and maintain. Construction work will be completed seasonally. The project may require three to four seasons to complete. Following construction, and between seasons of construction, erosion control and slope stability measures will be applied. Utility relocations may be required for construction of the proposed facilities. This may include relocation of above-or-below-ground utilities of a widened roadway of right-of-way.	NOD	
2007121154	Mountain View Avenue Extension and Widening Project Inland Valley Development Agency San Bernardino, Redlands--San Bernardino The project being proposed for implementation consists of removing the existing abandoned railroad bridge across the Santa Ana River, constructing a new bridge over the Santa Ana River, replacing the bridge over Mission Creek, partial acquisition of selected properties within the right-of-way, expansion of Mountain View Avenue north of I-10 to the proposed Santa Ana River bridge, and connecting the new road to Central Avenue.	NOD	
2008022111	WCCUSD Construction and Renovation of Castro Elementary School to Replace Portola Middle School West Contra Costa Unified School District El Cerrito--Contra Costa The proposed project is the Construction and Renovation of Castro Elem. School to Replace Portola Middle School Project. The project would construct, modernize, and renovate an approx. 4.9 acre middle school campus on a portion of a single parcel owned by WCCUSD. The project also involves the relocation/reassignment	NOD

	of Castro Elem. Students to other Dist. sites, and the closure of Portola Middle School buildings and campus from active use.		
2008031020	South Region High School No. 15 Los Angeles Unified School District --Los Angeles The proposed project would be an approx. 107,627 sf. High School that would include 30 classrooms, administration areas, a multipurpose room, and a library. These facilities would be contained in two or three-story building that would be approx. 52 ft. in height. Also included, is an outdoor amphitheatre with an approx. 600-seat capacity for school programs.	NOD	
2008032058	Valadao Final Map Subdivision, FMS-07-06/PUD-07-03/CUP-07-17 Humboldt County --Humboldt The subdivision of a 1.15-acre parcel into seven parcels ranging in size from 3,307 square feet to 16,740 square feet. The subdivision is planned to occur in three phases. The largest parcel will be developed with a 3,600 square foot professional office building which requires the approval of a Conditional Use Permit. The remaining six parcels will be developed with multi-family residences (apartments). The site is currently developed with a duplex that will remain and two single family residences that will be removed. The project will utilize a Planned Unit Development which allows flexibility in lot sizes and required setbacks. The project includes a solar shading exception request to allow for attached multifamily dwelling units necessary to meet the mid-point density per §322.5-8 of the Subdivision Regulations. The project will be served with community water and sewer by the McKinleyville Community Services District.	NOD	
2008082034	Kings Beach Water Quality and Stream Environment Zone Improvement Project Placer County --Placer The project proposes to improve the quality of stormwater discharging into Lake Tahoe from the Kings Beach community by stabilizing exposed soils with vegetation and/or mulch; improving the existing drainage system with new curbs, gutters, earthen berms and underground pipes, and treating runoff with a variety of methods including fill removal, sediment traps and vaults, swales, infiltration and/or detention basins, and media filters. In addition, the Project proposes to improve fish passage and habitat in Griff Creek by replacing culverts, constructing in-channel habitat features, excavating portions of channel, constructing new channel, and installing rock channel bed stabilization (grade control) structures.	NOD	
2008082050	Bay Division Pipelines 3 and 4 Crossover Facilities Project San Francisco, City and County of Santa Clara, Palo Alto, Atherton--Santa Clara, San Mateo The San Francisco Public Utilities Commission (SFPUC) proposes to construct 3 crossover facilities: 1. Interconnect the SFPUC's Bay Division Pipelines 3 and 4; 2. Improve the reliability of the regional water system; and 3. Reduce vulnerability of the regional water system to damage in the event of a major earthquake. At each of the three proposed sites, the SFPUC would construct a concrete vault, pipes and valves, an emergency generator, a control panel, and assoc. utility connections. Crossover valves and connections would be constructed within concrete-lined vaults that would be approx. 61 by 35 ft. in area and 20 ft. deep. The vaults would be mostly subsurface but would extend approx. 4 ft. above the surface. An emergency generator, with an assoc. propane fuel tank, and	NOD

	communication equipment would be installed on two concrete pads adjacent to each vault. All three proposed sites are located in the SFPUC's right-of-way.		
2008091120	Allen Residence San Diego, City of --San Diego Coastal Development Permit to demolish the existing 2-story residence and garage, and construction of two-story, 7,547 sq ft single family residence and 2-car garage/gym on a 22,500 sq ft site.	NOD	
2008092013	Special Education and Alternative Education School Stanislaus County Patterson--Stanislaus The Stanislaus County Office of Education is proposing to construct Special Education and Alternative Education School serving a maximum of 225 students in grades K-12 on a 7.61-acre site in Stanislaus County.	NOD	
2008092066	New Heart Church General Plan Amendment, Zone Reclassification, Coastal Permit Humboldt County --Humboldt An application to change the general plan and zoning designations from Commercial Recreation to Public Facility (Urban) to enable construction of a church. Also, a Coastal Development Permit for future construction of the church is requested, contingent on the plan and zone change. The public interest requirement for the plan and zone change is proposed to be satisfied by granting an easement for construction of the last segment of the Hammond Trail, a public multi-use trail. The church will be constructed in phases. The first phase is the construction of the Hammond Trail along the east side of the property, which was completed under a separate coastal development permit in 2007. The other phases will be construction of a main auditorium, offices, meeting rooms, a kitchen, and a lobby. The building will total approx. 42,000 sf. in size and it will be up to 35' in height. There are 248 proposed parking spaces. The parcel is served by public water and sewer, and a public road (Murray Rd.), which is paved to a width of 30' in front of the property.	NOD	
2008101018	San Diego River Gorge Trail and Trailhead Improvements San Diego River Conservancy --San Diego SDRC is providing grant funds to the United States Forest Service to construct as much as 2.27 miles of trail descending the west San Diego River Gorge at the end of Thornbush Rd. near San Diego Co. Estates and the San Diego River, closing and restoring user defined trails and providing parking, a restroom, picnic area and other amenities at trailhead.	NOD	
2008101078	Skyline Ranch Recycled Water Project Regional Water Quality Control Board, Region 9 (San Diego), San Diego --San Diego Skyline Ranch Country Club (SRCC), which is a private mobile park community in Valley Center has upgraded its MBR wastewater treatment plant to a tertiary treatment plant by adding disinfection to the treatment process. The treated effluent will be used to irrigate the SRCC golf course. Other upgrades at the SRCC plant include; isolation of pipelines designated for effluent water transfer of potable water supplied by the Valley Center Municipal Water Dist. to the Golf Course Lake. CUP-007-2561 - A request by the AGK Group, LLC to operate a higher educational facility within a 177,863 sf., five-story office building with 106,718 sf. of the space designated for educational classrooms/educational support offices and 71,145 sf. designated for general office leasing, and a 17,150 sf. single-story ancillary commercial building.	NOD	
2008101094	Recycled Water Reservoirs R-41, R-42, and R-43 Chino Hills, City of Chino Hills--San Bernardino The proposed project will construct three steel recycled water reservoirs. R-41 is proposed as a 0.5 MG reservoir adjacent to existing R-11 (domestic water). Work would include installation of approx. 500 lineal ft. of 8 in. recycled water pipeline and approx. 2,000 lf of paved access road as well as related appurtenances. R-42 is proposed as a 2.0 MG reservoir adjacent to existing R-4 and R-17 (domestic water). Work would include installation of approx. 500 lineal ft. of 16 in. recycled water pipeline and related appurtenances. R-43 is proposed as a 2.0 MG reservoir on an already graded pad. Work would include installation of approx. 16 in. recycled water pipeline to connect to the existing recycled water system and related appurtenances.	NOD	
2008101128	Citrus Continuation High School Fontana Unified School District --San Bernardino Construct and operate a new continuation high school and career technical center housing approx. 909 total students and approx. 50 staff members. The facilities would include two one and two-story classroom buildings and other supporting facilities. Approx. 760 students would be assigned to the school and approx. 150 students from Jurupa Hills HS and the Fontana Adult School may also attend for specific career technical and Regional Occupational Program (ROP) classes not able to be housed at either of those sites. Due to the close proximity of these schools, these students would walk to the career technical/vocational wing at CCHS. All included, the school would provide a total of 35 classrooms, including 27 regular teaching stations, 3 labs, 3 shops, and 2 severe special education stations and the on-site buildings would total approx. 77,696 sf. Access would be provided by Cypress Ave. via two driveways and the playfields are anticipated to be shared between FUSD and the City of Fontana through a joint-use agreement. The proposed school is scheduled to open for the 2011-2012 school year.	NOD
