

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

December 1 – 15, 2017

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **December 1 – 15, 2017**.

STATE CLEARINGHOUSE CONTACTS

Please contact the State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
E-mail: state.clearinghouse@opr.ca.gov
Website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown via email**.

2015121080	<p>2040 Metropolitan Transportation Plan/Sustainable Strategy and Regional Transportation Plans Association of Monterey Bay Area Governments --Monterey, Santa Cruz, San Benito Note: Review per lead Note: The Draft 2040 MTP/SCS and Draft EIR can be downloaded from the AMBAG Website at: http://www.ambag.org/programs-services/planning/metro-transport-plan/2040-MTP-SCS.</p> <p>The proposed 2040 MTP/SCS will guide the development of the Regional and Federal Transportation Improvement Programs (RTIP and FTIP) as well as other transportation programming documents and plans throughout Monterey, Santa Cruz and San Benito Counties. Specifically the project is intended to implement Regional Transportation Planning Agency goals regarding future mobility needs and identify programs, actions and a plan of projects intended to address these needs consistent with adopted goals and policies. The 2040 MTP/SCS includes the Sustainable Communities Strategy (SCS) pursuant to the requirements of SB 375. Accordingly, the 2040 MTP/SCS identifies transportation improvement projects and a land use scenario that would effectively meet SB 375 greenhouse gas emission requirements.</p>	EIR	02/05/2018
2009031083	<p>Westside Subway Extension Project Los Angeles County Los Angeles, City of, Beverly Hills, Santa Monica, ...--Los Angeles The Westside Purple Line Extension Project is an approx 9-mi heavy rail transit subway that will operate as an extension of the Metro Purple Line from its current western terminus at Wilshire/Western Station to a new western terminus near the West LA Veterans Affairs Hospital. The project will have seven new stations (Wilshire/La Brea, Wilshire/fairfax, Wilshire/La Cienega, Wilshire/Rodeo, Century City Constellation, Westwood/UCLA and Westwood/VA Hospital). Section 2 is a 2.59-mi section from Wilshire/La Cienega to Century City with two new stations at Wilshire/Rodeo and Century City Constellation.</p>	FIN	
2016111044	<p>The Culver Studios Innovation Plan, Comprehensive Plan Amendment No. 7 Culver City Culver City--Los Angeles The Culver Studios Innovation Plan which is reflected in the proposed Comprehensive Plan Amendment No. 7 (CPA No. 7), proposes to technologically update and expand the facilities within the existing 14.3 acre Studio Campus, while retaining the Studio's unique ambiance and prominent place in the community. CPA No. 7 includes some, but not all, of the improvements approved as part of CPA No. 6 but not yet constructed, including new Building Y, the Van Buren Parking Structure near Van Buren Place, and the relocation of the historically significant bungalows to the area south of the Mansion. Discretionary entitlements, reviews, and approvals required or requested may include, but are not necessarily limited to: 1) an amendment to the existing Comprehensive Plan, superceding all previous amendments; 2) approval of a Development Agreement; 3) a Certificate of Appropriateness under the City's Historic Preservation Ordinance; and, 4) certification of the EIR.</p>	FIN

2017121001	La Habra Union Pacific Rail Line Bikeway Project La Habra, City of La Habra--Orange The La Habra Union Pacific Rail Line Bikeway Project will involve the installation of a bikeway and other related improvements within the city of La Habra. The La Habra Union Pacific Rail Line Bikeway entails the acquisition of 2.80 miles of the Union Pacific RR ROW, and the conversion of the northern portion of the ROW and public parks into a class I bike trail. The proposed project will be located parallel to the UPRR line ROW on its north side and into city parks. The bikeway will commence at the western boundary of the city of La Habra and will terminate at the eastern boundary of the city of La Habra. The bikeway will extend into two parks (Terraza Park and Guadalupe Park) and along one park (Portola Park) and will cross nine intersecting roadways (including Beach Blvd and Harbor Blvd).	MND	01/02/2018
2017122001	Yolo Bypass Wildlife Area Habitat and Drainage Improvements Project Fish & Wildlife #3 West Sacramento--Yolo The proposed project includes five major improvements, identified as project components, that are being proposed to enhance the CDFW ability to manage wetland resources and agricultural operations within the Yolo Bypass Wildlife Area. Specific improvements include installing new water control structures, expanding canals, installing box culverts and two con-span bridges, replacing existing culverts, raising road grades, separating dual function ditches, relocating an existing water pump, and installing two new pumps. 2017122002	Trower Avenue Roadway Widening Project Napa, City of Napa--Napa The city proposes to widen the south side of Trower Ave approx 300 ft to conform with the sidewalk and roadway to the east and west of the project site. The project site extends from 250 ft west of Linda Vista Ave to approx 300 ft westward. In order to construct the roadway improvements, acquisition of approx 22 ft of ROW across four privately owned parcels would be required. Traffic lanes would be reconfigured and overhead utilities would be undergrounded.	MND	01/02/2018
2017121003	Proposed Updates to the City of Clovis Water, Wastewater, and Recycled Water Master Plans Clovis, City of Clovis--Fresno The City is undertaking to update its master plans for water, recycled water, and wastewater. The purpose of the update is to synchronize these master plans with the growth projections and future service area envisioned in the Clovis General Plan (General Plan). The area encompassed by the updates is the city's General Plan's approx. 74- sq. mile planning area.	NOP	01/02/2018
2017121002	Storm Water Capture Project at the Puente Hills Materials Recovery Facility Los Angeles County Sanitation District Whittier--Los Angeles The LACSD proposes to implement a storm water capture system at the Puente Hills Materials Recovery Facility to meet the industrial general permit's industrial storm water requirements. The existing storm drain system at the PHMRF discharges to the San Gabriel River Reach 2. The proposed storm drain collection system would capture storm water flow to divert some of the flows to the sewer	Neg	01/02/2018

	work with proposed improvements. Specific tasks include: removing an existing water intake structure in the bed of the Carmel River; installing a new intake structure and screen in the bed of the Carmel River; piping and other improvements to deliver water from the river to the facility; and constructing a recirculating aquaculture system in the floodplain adjacent to the active channel of the Carmel River to provide water clarification and filtration.		
2017081023	Salinas Avenue Culvert Replacement Project; ED14-196 (245R12B632) San Luis Obispo County --San Luis Obispo The San Luis Obispo County Public Works Department proposes to replace the existing culvert crossings with two 66-inch culverts and an associated private driveway culvert to satisfy County standards and increase the capacity of the crossing. Project implementation will improve public safety and access, reduce the need for road closures and maintenance resulting from flooding at this location. All work, including staging, will occur within the existing County right-of-way and will be located along the same alignment. Construction is expected to take two to three weeks to complete and will take place during the dry season.	NOD	
2017102034	PA-1700199 (MS) San Joaquin County --San Joaquin A Minor Subdivision Application No. PA-1700199 of Randy C. & Arlene Saski Roget (c/o Quartaroli & Associates) to subdivide an existing 40-acre parcel into a 5-acre Homesite Parcel and a 35.6 acre Designated Remainder Parcel. The property is zoned AG-40 (General Agriculture, 40-acre minimum) and the General Plan designation is A/G General Agriculture, 40-acre minimum). The project site is located on the north side of East Dougherty Road, 1,000 feet east of Kennefick Road, Acampo (APN/Address: 017-140-47/6425 East Dougherty Road, Acampo) (Supervisory District 4).	NOD	
2015098080	San Joaquin River Parkway, Spano River Ranch Habitat Enhancement Fish & Wildlife Conservation Board Fresno--Fresno Funding augmentation to a grant to the San Joaquin River Parkway and Conservation Trust to improve and restore approximately 51 acres of upland, riparian, and wetland habitats on an approximately 100 acre site including the improved habitat and an approximately 50 acre pond. Land is owned by the San Joaquin River Conservancy. The project includes installation of native plants and plant establishment practices such as irrigation and weed management. Land is owned by the San Joaquin River Conservancy.	NOE	
2017018211	Backyard Waterline Replacement Project South Tahoe Public Utility District South Lake Tahoe--El Dorado The State Water Resources Control Board (SWRCB) is the responsible agency. The SWRCB's Safe Drinking Water State Revolving Fund (SDWSRF) Program is providing funds for the project. The South Tahoe Public Utility District will conduct a project that includes the installation of fire hydrants, pressure regulating valves, air release valves, water services, meters, valve clusters, paving, and appurtenances. All water lines would be placed within the right of way under existing roadway pavement. New hydrants would be added in the project area and would be spaced so that there is no more than 500 feet separating individual	NOE

	hydrants for fire protection purposes. All unmetered developed lots in the project area would be metered. New meters would be installed at the edge of the right-of-way. Any existing waterline connections that occur in residence back yards would be abandoned in place and moved to new water lines accessible from the roadway right-of-way. All paving would be limited to the replacement of existing pavement disturbed for waterline, meter or appurtenance installation purposes. The proposed water replacement Project in the Marlette, Aloha, and Ponderosa areas would increase the water supply for fire flow purposes. The installation and replacement of approximately 6,174 linear feet of new waterline would occur within the project area; 2,964 linear feet of waterline in the Ponderosa area; 1,810 linear feet of waterline in the Marlette area; 1,400 linear feet of waterline in the Aloha area. In the Ponderosa area, 1,560 linear feet of the 2,964 linear feet identified above will be new i.e. installed in a street that does not currently have a water line in it.		
2017128001	SR-150 Slurry Seal Project Caltrans #7 --Ventura The purpose of this project is to update the SR-150 infrastructure to existing standards and to maintain safety for drivers along the freeway.	NOE	
2017128002	Glenwood (Lake or Streambed Alteration Agreement No. 1600-2017-0310-R3) Fish & Wildlife #3 Scotts Valley--Santa Cruz The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement number 1600-2017-0310-R3, pursuant to Section 1602 of the Fish and Game Code to David H. Lynch. The project is limited to a year around diversion of water from Bean Creek to provide water to a single family residential home, for domestic purposes. Water is pumped from Bean Creek using an existing domestic pump embedded in the gravel of the streambed. Project activities are limited to the pumping of water through the existing facility into an above ground water storage tank via a pipe. Water is then pumped into an on-site water treatment system and then to the residential home .	NOE	
2017128003	1H390- Alignment Sign and Delineator Installation Caltrans #10 Lathrop--San Joaquin The California Department of Transportation (Caltrans) proposes a Traffic Safety project to install a missing Chevron Alignment sign, upgrade delineators, and install a Horizontal Alignment sign combined with an advisory speed limit and flashing beacon on the connector ramp from westbound State Route (SR) 120 to northbound Interstate (I-5), at post mile 15.0 on I-5 in San Joaquin County. All work will occur within Caltrans right of way. The purpose of this project is to warn motorists of an approaching curve on the connector ramp and to reduce their speed. The need for this project is to reduce the number and severity of hit object collisions.	NOE

2017122004	<p>General Plan Amendment & Vesting Tentative Subdivision Map - PLN2017-0013 - Gold Star Investments, LLC Stanislaus County Hughson--Stanislaus Request to maned a portion of the site's Community Plan from Commercial to Residential - Low Density and to subdivide the 9.54 +/- acre site into 26 residential lots, ranging in size from 5,100 +/- sq. ft. a storm water retention basin, and a 3.5 +/- acre remainder lot. The residential lot subdivision and storm water retention basin are located on the existing and proposed Low-Density portion parcel. The project will be served with water and sewer from the Keyes Community Services District.</p>	CON	12/04/2017
2017051041	<p>Doris Avenue/Patterson Road Educational Facilities Project Oxnard School District Oxnard--Ventura The proposed project includes joint-use facilities to support a district office, 700 elementary school students in grades K-5, and 1,200 middle school students in grades 6-8. The new school facilities are designed to meet the educational and recreational needs of K-8 students' onsite. The project site is located within unincorporated Ventura County and within the city of Oxnard SOI area. The project will include a proposed reorganization which will be comprised of an annexation into the city of Oxnard and the Calleguas Municipal Water District and a detachment from the Ventura County Fire Protection District, the Ventura County Resource Conservation District, and Ventura County Service Areas 32 and 33. The District will process a GPA, PZ and an Annexation through the city.</p>	EIR	01/17/2018
2016082073	<p>Lincoln40 Project Davis, City of Davis--Yolo Note: Per Lead, Draft EIR and Final are available through the City's website at: http://cityofdavis.org/city-hall/community-development-and-sustainability/test-development-projects/lincoln-40-apartments</p> <p>The proposed project is a residential in-fill project that would include the demolition of the existing apartment complex and 10 single-family homes and the construction of a 249,788-sf multi-family residential building for student oriented housing.</p> <p>The building would include three tiers, which would step-up in height from Olive Drive. The first tier would be three stories, the second would be four stories, and the third would be five stories tall, with a max height of 60 ft. The proposed project would include a total of 130 rental units designed specifically as off-campus student housing. Of the 473 total bedrooms; thus, the estimated total beds for the proposed project is 708. The project would also include a lobby, manager's facility and office, mail room, game/theater room, multiple lounges and study spaces, a fitness center, a bike shop, indoor bicycle storage, and three restroom facilities. Parking would be provided for both vehicles and bicycles, with 240 proposed parking stalls and 708 bicycle parking spaces. Vehicular access to the site would be provided at the location of the current Hickory Lane ROW, which is proposed for vacation, and by a second access on Olive Drive.</p>	FIN

2016101061	Southern California Edison Transmission Tower Replacement Project Long Beach, Port of Long Beach--Los Angeles Note: online at: www.polb.com/ceqa	FIN	
	<p>SCE is proposing to raise a segment of existing 66 kV subtransmission lines, a 12 kV distribution line, and a fiber wrap, and remove a 220 kV line in order to provide additional vertical conductor clearance across the Cerritos Channel. The potential environment effects of the proposed project are addressed in the Draft EIR. The environmental impacts anticipated to remain significant following mitigation include: 1) air emissions associated with construction, 2) cultural and historic resources associated with the removal of transmission line structures and associated components, 3) noise associated with construction due to use of helicopters.</p>		
2017121005	MND for Aliso Creek Trail Slope Repairs Orange County Laguna Hills--Orange The proposed Aliso Creek Trail Slope Repairs project would restore 2,000 lf of bike trail that has been damaged due to heavy rainstorms and erosion over several years. The project would provide protection of the creek banks as well as restoration of the bike path by replacing two 60" corrugated metal culverts with 60" reinforced concrete pipes and by providing bank stabilization with placement of rock rip rap buried between 7 and 10 along the stream.	MND	01/02/2018
2017121006	Great Valley Grasslands - Floodplain Restoration Parks and Recreation, Department of --Merced This IS/MND has been prepared by Parks and Rec to evaluate the potential environmental effects of the proposed project. The proposed project would restore floodplain habitat in the Great Valley Grasslands by removing parts of an existing levee near the boundary of the Park. Reconnection of the floodplain would help restore natural processes in the park, including establishment of native vegetation.	MND	01/02/2018
2017122003	Sandeep Dhama Tentative Parcel Map (TPM17-0001) Butte County Chico--Butte Subdivide 8.78 acres located in the VLDR zone district into four lots of 1.0 acre (parcel 1), 1.0 acre (parcel 2), 1.0 acre (parcel 3), and 6.38 acres (Parcel 4). Domestic water to the parcels will be provided by groundwater wells. Sewage disposal for the parcels will be provided by individual on-site wastewater disposal systems. Access to each parcel will be provided by a driveway off Justeson Rd.	MND	01/02/2018
2017122005	Use Permit 17-004 (Gill) Shasta County --Shasta Note: Review Per Lead	MND	01/04/2018
	<p>The project site is a 2.57 acre parcel. The project is proposed contractor's equipment storage yard, including a 7,352 sf building containing 2,552 sf of office space, 3,600 sf of warehouse space, and a 1,200 sf of covered space; an 1,800 sf shed and volumetric concrete mixer for the production of concrete septic tanks and horse troughs; outdoor storage of equipment, vehicles, or other materials commonly used in the contractor's type of business; outdoor storage of materials</p>

	used for repair and maintenance of contractor's own equipment; and outdoor storage and sales of septic tanks and horse troughs, and a storm water detention basin.		
2017122006	Beyer Ranch Winery Development Alameda County Livermore--Alameda The applicant proposes to subdivide the project site into 12 lots of which six would contain commercial wineries and permit winery related uses, while the remaining six lots would permit one single fam residence each. All 12 lots would be a min of 20.00 acres, ranging up to 21.66 acres in size. As permitted by the LPA designation in the ECAP and guidelines in the SLVAP within each residential lot would be limited to a 2-acre building envelope, inclusive of the area devoted to the driveway, or in the case of the commercial lots, 10% of each lots' net lot area. The six winery lots would have direct driveway access to Tesla Road, while the residential lots would access Tesla Rd via a common private driveway bordering the rear lot lines of the six commercial lots.	MND	01/02/2018
2017122007	Caswell Elementary School Classroom Building Project Ceres Unified School District Ceres--Stanislaus The District is proposing to construct two new classroom buildings and a bus lane on the Caswell ES campus. The project would involve the construction of two new single-story permanent buildings, building 300 at the northern portion of the campus and building 100 at the southern portion of the campus. Building 300 would be 4,320 sf and would contain three classrooms accommodating a total of 72 students. Building 100 would be 6,720 sf and contain six classrooms accommodating a total of 180 students. The two portable classroom buildings currently located on the site of proposed building 100 would be removed prior to project construction.	MND	01/02/2018
2006041029	Mancara Resident Project Santa Clarita, City of Santa Clarita--Los Angeles The proposed project is a large lot residential community that involves the development of 109 single-family graded residential lots and open space areas within 143 lots on approx. 179.2 acres of land. The site would accommodate approx. 69.7 acres of open space and 17.4 acres of streets. Approx. 92 acres of the site would consist of the 109 single family lots. The residential lots would range in size from approx. 0.5-acre to nearly two acres, with an average lot size of 0.83 acres (excluding open space lots).	NOP	01/02/2018
2017122008	Innovative Clean Transit Regulation Air Resources Board -- Note: Review Per Lead CARB is developing strategies to transition the heavy-duty mobile source sector to zero and near-zero technologies to meet air quality, climate, and public health protection goals. The innovative Clean Transit Regulation is the first step in a broader strategy to achieve a transformation to zero and near-zero technologies. This regulation will allow a smooth transition for public transit bus fleets to zero emission technologies over a 20-year period, while providing transit agencies the flexibility to continue to evolve to meet expanding needs for effective, efficient, and	NOP	01/13/2018

2013081079	Revisions to the Kern County Zoning Ordinance - 2015 C. Focused on Oil and Gas Local Permitting Kern County --Kern The originally approved project consists of an amendment to Title 19 Kern County Zoning Ordinance (July 2012), with focus on Ch. 19.98 (Oil and Gas Production), to include new site development standards for all oil and gas exploration, extraction, operations, and production activities in unincorporated Kern County. DOGGR, as the Responsible Agency, will be issuing a permit for the proposed project activity, which consists of the following: Aera Energy LLC (Aera) proposes to hydraulically fracture 4 wells. The process is expected to take 3 days, or less, per well, and will include placement of portable tanks and all ancillary equipment to support the closed loop system, as well as the well stimulation treatments. The wells are in a densely developed oilfield (South Belridge) and are scheduled to be drilled.	NOD	
2013082011	5th Street Bridge Replacement Project Yuba City Yuba City, Marysville--Sutter, Yuba The City of Yuba City, in cooperation with Caltrans, proposes to replace the existing 5th Street Bridge over the Feather River with a new four-lane structure. The purpose of the project is to 1) enhance safety, 2) improve the existing transportation facility, and 3) improve traffic operations and transportation capacity. CVIN, LLC proposes to relocate a conduit attached to the existing 5th Street Bridge to the proposed new 5th Street Bridge. The State Lands Commission action is an amendment of a 20-year General Lease - Right-of-way Use through Dec. 17, 2035.	NOD	
2013082011	5th Street Bridge Replacement Project Yuba City Yuba City, Marysville--Sutter, Yuba To relocate telecommunication wires and fiber optic line that is connected to the existing bridge. The project includes removal and relocation of two vaults to accommodate construction of the new bridge and placement of conduits serving AT&T facilities within the box girder cells of the new bridge and through the bridge approach roadways.	NOD	
2013082011	5th Street Bridge Replacement Project Yuba City Yuba City, Marysville--Sutter, Yuba To relocate the Comcast wires from poles attached to the adjacent railroad bridge into the new 5th Street Bridge. The project includes the placement of conduits serving Comcast facilities in the box girder cells of the new bridge and through the approach roadways. Comcast will connect to vaults in the approach roadways beyond the levees.	NOD	
2013082011	5th Street Bridge Replacement Project Yuba City Yuba City, Marysville--Sutter, Yuba To relocate the PG&E overhead electrical wires and poles in Riverfront Park and over the Feather River. The project includes removal of 3 poles in conflict with the new bridge construction and replacement with 4 poles to improve the alignment over the soccer fields and the location of guy wires in the park. 2013082011	5th Street Bridge Replacement Project Yuba City Yuba City, Marysville--Sutter, Yuba To relocate the CVIN, LLC dba Vast Networks fiber optic telecommunication line from the existing 5th Street Bridge to the new replacement bridge. The project includes removal and relocation of 2 vaults in conflict with the new bridge construction and replacement of conduits serving CVIN facilities in the new bridge and through the approach roadways.	NOD	
2013092047	UCSF Long Range Development Plan University of California, Regents of the San Francisco--San Francisco The proposed project is to construct streetscape improvements along Parnassus Avenue between Fifth Avenue and Medical Center Way. The purposes of the improvements are to make crossing the street safer and more convenient for pedestrians; increase bicycle safety; reorganize and improve transit and UCSF shuttle operations; create more usable outdoor pedestrian space; strengthen UCSF's identity; and enhance the public realm as called for in the UCSF Physical Design Framework. Improvements include new paving, street furniture, lighting and street trees, as well as sidewalk and crosswalk widening in certain locations and better defined campus gateways. These improvements are proposed to occur in phases starting on the south side of Parnassus Avenue, at the west end of Fifth Avenue, and extending to Medical Center Way.	NOD	
2014122040	Eel River Estuary and Centerville Slough Enhancement Project California State Coastal Conservancy Ferndale--Humboldt The proposed activities would enhance the project area by transitioning it from a landscape of mostly diked pasture land to a system of pastures and natural habitats including estuarine and tidal slough channels, freshwater streams, freshwater waterfowl ponds, and agricultural pastures. The State Lands Commission action is an approval of a 25-year General Lease - other through Nov. 28, 2042.	NOD	
2015052024	Pier 70 Mixed-Use District Project San Francisco, City and County of San Francisco--San Francisco The project would rezone and establish land use controls for the project site through adoption of the proposed Pier 70 Special Use District. The proposed project would involve the demolition of even buildings/structures and the rehabilitation of three buildings. The proposed project would accommodate residential units, commercial-office use, and retail-restaurant-arts/light industrial use. The proposed project would also include transportation and circulation improvements, new and upgraded utilities and infrastructure, geotechnical and shoreline improvements, and nine acres of public open space. The State Lands Commission action is land exchange of Public Trust lands within the project boundary.	NOD	
2016072028	Collecting Canal Maintenance Project Water Resources, Department of --Sutter CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0123-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, CA DWR.	NOD

2017128061	Lakeport Overlay Project (EA: 01-0H350) Caltrans #3 Lakeport--Lake Caltrans is developing a pavement overlay and guardrail replacement project on Route 175 in Lake County in and near Lakeport, from 1.2 miles west of Adobe Creek Road to 1.4 mile east of Matthews Road. The purpose of this project is as a form of capital maintenance for this section of roadway.	NOE	
2017128062	Small Communities Flood Risk Progrma FEasability Study Isleton, City of Isleton--Sacramento Project is a feasibility study grant funded by the Disaster Preparedness and Flood prevention Act of 2006 provided by the DWR to assess flood risk for the City pursuant of the Small Communities Flood Risk Reduction Program.	NOE	
2017128063	Upper County Road DD Hambright Creek Habitat Restoration (Lake or Streambed Alteration Agreement No. 1600-2017-0356-R2) Fish & Wildlife #2 --Glenn CDFW has executed Lake and Streambed Alteration Agreement no. 1600-2017-0356-R2, pursuant to section 1602 of the Fish and Game Code to Glenn County Health and Human Services Agency. Project is limited to removal of invasive, non-native vegetation, primarily giant cane, (Arundo) and tamarisk from the bed and banks of Hambright Creek east of the County Road DD crossing of the creek downstream to a point west of the County Road E crossing. The vegetation will be removed using power and manual hand tools and will be removed to a location outside of the streambed for disposal. An herbicide registered in the State of CA, appropriate for this use, will be applied to fresh cut stumps of tamarisk and cane to minimize the issue of resprouting. Additionally, any accumulated anthropogenic debris from the stream channel may be removed for proper disposal to allow the return of normal flows within the creek.	NOE	
2017128065	TMWA Donner Lake Outlet Emergency Cleanout Project Fish & Wildlife #2 Truckee--Nevada CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0324-R2, pursuant to Section 1602 of the Fish and Game Code to the Truckee Meadow Water Authority, Bill Hauck. The purpose of the project is to regain lost outlet channel capacity to its original capacity to minimize the risk of flood of Donner Lake and the lakefront properties. Since the lake is not draining adequately, the Permittee proposes to return Donner Lake outlet channel back to its original working capacity by removing the accumulated sediment and debris that is casing reduced outlet flows. An estimated 6,500 cubic yards of sediment and debris will be removed down to an elevation of 5,924 feet. Project will require dewatering of the channel above the dam, including the portion of the channel within Donner Lake. No in water will be conducted. A temporary inflatable coffer dam will be installed at the head of the channel to obstruct flows from Donner Lake. Dewatering will be accomplished b surface pumps and possibly dewatering wells. Water will be pumped below the dam through a temporary pipe. An additional bypass pipeline may be installed to divert water around the project and allow for continuous flow to Donner Creek, if water is flowing in the creek. Removal of the sediment will be accomplished by excavating	NOE

	the accumulated sediment using front-end loaders, excavators, dump trucks, and drag lines. Sediment and vegetation will then be loaded into a dump truck and transported offsite. Once the sediment removal is complete, the coffer dam will gradually be deflated and removed, restoring flows to the channel at a rate that will allow sediment to settle. Temporary impacts to Donner Lake and the channel total 1.5 acres for the temporary access ramp, construction, cofferdam, and pipeline installation, and 1 acre of impacts due to the maintenance dredging. Channel excavation is expected to take two weeks to complete, and the overall construction period will occur over 4 weeks surface.		
2017128066	Zero Emission Vehicle Charging Stations Caltrans #3 --Glenn, Nevada, Colusa Project proposes to install 6 ZEV Charging stations at three SRRAs, one in each direction of travel: Donner Pass SRRRA EB&WB, Willows SRRRA NB&SB, and Maxwell NB&SB. The project requires minimal ground disturbance and is in existing CT R/W. Work will be done within existing disturbed or paved areas.	NOE	
2017128067	Settlement Agreement: Kern Delta Water District/North Kern Water Storage District North Kern Water Storage District --Kern Settlement agreement allowing North Kern Storage District to maintain its historic diversion, conveyance and use of Kern River water for existing and long-established beneficial uses for the benefit of landowners and water users in North Kern Water Storage District and related activities.	NOE	
2017128068	Culverts on Right of Way Project (Lake or Streambed Alteration Agreement No. 1600-2017-0347-R2) Fish & Wildlife #2 --Lake CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0347-R2, pursuant to Section 1602 of the Fish and Game Code to Tamara Thorn. Project is limited to the removal of a non-functional culvert and the reconstruction of a road crossing at Hoffman Creek. the new road crossing consists of the installation of four 24 inch galvanized culverts, a 12-inch thick concrete retaining wall on both the upstream and downstream sides of the crossing, a 1 1/2 - inch crushed stone road base topped with 6 inch concrete. Crushed stone will also be installed along the roadway leading up to the crossing on either side.	NOE	
2017128069	Bidwell Cayon Boat Ramps and Parking Lot Expansion Project (Project) (Streambed Alteration Agreement No. 1600-2017-0294-R2) Fish & Wildlife #2 Oroville--Butte CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0294-R2, pursuant to Section 1602 of the Fish and Game Code to DWR. The proposed project will expand recreation facilities along the shore of Lake Oroville in the Bidwell Canyon Area. The project includes the expansion of two existing boat ramps and an existing gravel parking lot.	NOE

2017128073	Mendocino National Forest, Road 17N78 Restoration Parks and Recreation, Department of --Colusa An OHMVR Division grant will fund restoration of a previously closed OHV trail segment (~0.5 acres). The project will stabilize the hillside to as natural a condition as possible, including using native brush and mulch from the project area and installing straw wattles to add roughness, increase infiltration, reduce erosion, and help retain soil on the site. Drainage features will be maintained or enhanced to protect the slope until vegetation is established to provide long-term erosion control. Additional signs will be posted guiding visitors to legal OHV opportunities.	NOE	
2017128074	Stormwater Infrastructure Routine Maintenance - Prairie City State Vehicular Parks and Recreation, Department of Sacramento--Sacramento The purpose of this project is to maintain existing culverts, armored channels, armored roadside ditches, roadside ditches, and hard water crossings within the SVRA. This maintenance is anticipated to be reoccurring as needed. There are approximately 100 culverts, lengths range from 3 - 30', diameters include 12-36". Several of the culverts are part of the road infrastructure and provide drainage to roadside ditches. 56 of the culverts are within Water of the United States. In order to maintain the flows through the culverts, a water truck will be used to spray out debris. Additional permitting may be required and will be acquired if applicable prior to any maintenance activity.	NOE

2017128079	0513000021 - South Santa Cruz Co. Roadside Improvements Caltrans #5 -- Improve safety for safety for maintenance workers by making changes to approximately 69 locations along Route 1. The project will modify or relocate roadside facilities and improve safe access to reduce the need for maintenance workers and vehicles to be on the roadside, and to reduce life cycle cost. The project would relocate and cluster existing roadside facilities to safer work locations away from the traveled way. In addition, maintenance vehicle pullouts and access gates will be added. Project details are captured in mapping dated October 16, 2017.	NOE	
2017128080	Baker FFS (Fire Fighting Station) Erosion Control Project Forestry and Fire Protection, Department of Red Bluff--Tehama The Tehama-Glenn Unit of CAL FIRE is proposing an erosion control project necessary to mitigate mass wasting and erosion behind the apparatus bay at the Baker FFS along steep slopes adjacent to Long Gulch. Erosion has undercut these steep slopes exposing an abandoned wash rack pipe and potentially threatening active subsurface infrastructure critical to the station. Baker FFS is located 20 miles west of Red Bluff in Western Tehama County. Access is via State Route Highway 36W. Elevation is 600 ft. The vegetation type is best described as foothill pine and oak woodland habitat. The project as proposed will decrease slope angles at the upper 5 feet (vertical) of the slope to approximately 3;1 (horizontal to vertical), remove 40 linear feet of each rack drain pipe and emplace BMPs for erosion control. The excavation will impact an area of approximately 3,000 square feet. Equipment will include an excavator, dump truck, backhoe, and skid steer. Work will start in December and take two days. Start date is dependent on weather and BMP's will include waddles, straw mulch and/or control blankets and sand bags.	NOE

2017128146	Operation of California Water Service Company-Bakersfield, 1,2,3 Trichloropropane (TCP) Wellhead Treatment (Site BKNG-174-01) State Water Resources Control Board Bakersfield--Kern SWRCB as the lead agency will be issuing a water supply permit. CA Water Service Company - Bakersfield will pour a 462 foot (minimum 2-foot deep) pad, and install 2 12 foot diameter approx. 16.58 foot tall TCP treatment tanks, on the new pad at an existing well and tank site, (BKNG-174-01). A chlorine storage and feed equipment will also be installed and 12-inch diameter, approx. 105 foot long discharge line will be laid from the catch basin within the fenced site into Victor Street to connect up with the city sewer system. Approx. 67 feet of 8-12 inch diameter piping will connect the well to the treatment tanks and the rest of the water system. A hydro pneumatic tank's piping will be reconfigured to connect to the water system after the booster pumps. A 12-inch diameter polyvinyl chloride (pvc) water main will be replaced with 12 inch carbon steel piping. An old oximeter will be replaced with a flow meter. Construction will occur within a 6300 ft area of the fenced 13,939 ft total well and tank site and within an approx. 400 ft area of an existing roadway. The project will provide for the operation of the system.	NOE	
2017128147	Operation of California Water Service Company-Bakersfield, 1,2,3 trichloropropane (TCP) Wellhead Treatment (Site Bk-135-01) State Water Resources Control Board Bakersfield--Kern SWRCB as the lead agency will be issuing a water supply permit. CA Water Service Company- Bakersfield will install 4 12-foot diameter, 20 foot tall vessels (2 sets of vessels in series) to treat TCP. Approx. 187 foot of 8-inch piping will be installed to connect the treatment tanks to the system. Associated wiring will also be installed. Approx. 73 feet of 8-inch discharge piping and a concrete splash block with 6-inch curbs on 3 sides will also be installed. Discharge will drain to the city's storm water system. An existing chemical enclosure will be moved to allow for the installation of the new piping and an existing fence will be moved to the property line. The construction will occur on an existing 6,969 ft fenced well site surrounded by urban development. The project will provide for the operation of the system.	NOE

2017052068	150 Eureka Street Project San Francisco, City and County of San Francisco--San Francisco The project site is currently developed with a two-story approx 29-ft-tall wood-frame building constructed in approx 1922. The existing building most recently housed the Metropolitan Community Church of San Francisco, which consisted of a Lesbian, Gay, Bisexual, Transgender, Queer congregation from approx 1970 to 2015. The building is currently vacant. The building is considered individually eligible for listing on the CA Register of Historic Places due to its association with the city's LGBTQ community. The proposed 150 Eureka Street Project would result in the demolition of the existing two-story, wood-frame church building located at the site and construction of two four-story buildings, with two residential units in each building for a total of four residential units on the project site. The two buildings would total approx 13,174 gsf in size, and each building would include a four-car garage and indoor common areas. The proposed buildings would not exceed 40 ft in height.	EIR	01/19/2018

2017122018	<p>Alcatraz Ferry Embarkation Project San Francisco, City and County of San Francisco, Sausalito--San Francisco, Marin Alcatraz Island, a national historic landmark, is part of and managed by the Golden Gate National Recreation Area, a National Park Service unit that includes numerous park facilities within the SF Bay area, including Fort Mason, Fort Baker, Ocean Beach, and Crissy Field. Under the proposed project, the Park Service seeks to enter into a long-term agreement with the Port of San Francisco for the development and operation of an improved ferry embarkation site at Pier 31 1/2 to support Alcatraz Island visitors. The Port agreement would require the Park Service's selected concessioner to renovate the marginal wharf, the Pier 33 bulkhead buildings, and portions of the Pier 31 shed building. In addition, the Park Service's partner, the Golden Gate National Parks Conservancy, would renovate the Pier 31 bulkhead building and additional portions of the Pier 31 shed building. The proposed project would provide a combination of indoor and outdoor spaces to welcome, orient, and provide improved basic amenities for the public. The proposed project would also include other administrative and operational spaces, such as a new boarding ramps and floats to support the berthing of up to three ferry boats at a time. The Park Service also seeks to establish limited ferry service between Pier 31 1/2 and the existing Fort Baker pier in Sausalito. The proposed project would repair and upgrade the Fort Baker pier substructure, install a new gangway landing and float, and construct a new trail from the Bay Area Discovery Museum to the pier. Under the proposed project, the estimated number of ferry trips from the Pier 31 1/2 site would increase two ferry trips per day in the peak season.</p>	MND	01/04/2018
2017122019	<p>Feather River Mills General Plan Amendment GPA 16-06, Specific Plan Amendment SPA 16-04, Use Permit Yuba City Yuba City--Sutter GPA 16-06 proposes to re-designate the land use map for the approx 1.5 acre site from a business, technology, and light industrial land use designation to a community commercial LUD in order to bring the GP into conformance with the Central City specific plan and the zoning. SPA 16-04 proposes to amend both the text and LU map of the CCSP. The LU map amendment is to add the new community commercial designation to the LU map for an approx 1.5 acre area. The text amendment will allow C-2 uses with downtown characteristics; could allow up to 36 units/acre with commercial; and architecture consistent with Plumas St or Plumas Blvd. Use permit for additional height to be determined.</p>	MND	01/04/2018
1998092013	<p>El Dorado County River Management Plan Update El Dorado County Placerville--El Dorado The project is a proposed update to the El Dorado County River Management Plan. The RMP was adopted in 2001 by the El Dorado County Board of Supervisors. Since 2002 the county has continued implementation of the RMP w/o changes. The proposed RMP update is based on the county's understanding of what river management actions have been found to be logical, supportive of safe river use, effective in minimizing conflicts between river users and consistent with the county's environmental protection commitments. The RMP update addresses these current conditions by recognizing that some past RMP tasks and monitoring elements are now unnecessary, unresponsive to the county's stated river management goals or duplicative of work being done by other county</p>	Neg	01/04/2018

	Valley Groundwater Basin of Los Angeles County (Resolution No. R16-005).		
2016078177	Santa Rosa Water Reclamation Facility Rehabilitation Project; Rancho California Water District Project Nos. PG 180 & PG187 Santa Rosa, City of Murrieta--Riverside The preliminary treatment portion of the project would include replacement of the aerated grit removal system, which will be installed in a new location in the east dry pit of the influent pump station and replacement of the existing influent conveyance pipes and valves with vault access for valves. The secondary treatment portion would include the replacement of the Jet-Tech aeration system, mixing pumps, decant assembly, and solids handling pumps. The tertiary treatment portion would include the reconfiguration of equalization basins piping, replacement of the existing launders and sludge collection equipment, and reconfiguration of the sludge piping. The solids handling portion would include installation of the aerobic digester, solids pumps, and solids handling infrastructure adjacent to the new digester. Repairs and concrete coating would also be implemented where required. Construction equipment and work vehicles will access the SRWRF from existing public streets. Staging of all equipment and materials will occur within the existing facility footprint. There is also a change of ownership and organization of the existing SRWRF and the wastewater collection system facilities to a new joint powers authority created by Elsinore Valley Municipal Water District, Rancho California Water District, and Western Municipal Water District of Riverside County.	NOE	
2017128148	Replace the Existing Tower Rods at the SFOBB Eastern Span - 3K500 / 041700017 Caltrans #4 San Francisco--San Francisco This work will protect the anchor rods from corrosion due to saltwater intrusion.	NOE	
2017128149	Malibu Living Shoreline Project Coastal Conservancy, California State Malibu--Los Angeles The proposed project will develop plans and implement native dune restoration and education at Zuma Beach and Westward Point Dume Beach to result in ~3 acres of restored native dune habitat. The dunes will also serve as a living shoreline protecting existing infrastructure and habitat from the effects of sea-level rise.	NOE

2017128154	5GS15144; Logtown East Side Fuel Break (LT10) Montior Section Forestry and Fire Protection, Department of --El Dorado The Logtown East Side Fuel Break will be constructed as a linear feature 200 to 300 feet wide approx. 1.3 miles long parallel to and between Dolomite Dr. and Union Mind Rd. Logtown 10 shaded Fuel Break will be constructed using a combination of treatments. The objective of the treatment is to reduce surfae and ladder fuels, and to achieve canopy spacing to mitigate the threat of wildfire to private property. This project entails removing small trees and brush to create a Fuel Reduction Zone or shaded Fuel Break located on both improved and unimproved residential parcels. Permission has been granted from all the private landowners at this point. The general project area has been marked with pink flagging on the ground in some cases the flagging is only done along the top of the fuel break with the intent that the contractor will treat up to 300 feet below the flag line. Work will be odne outside the required defensible space of 100 feet around homes. Hardwood stands with a high percentage of oaks can provide excellent food and cover for wildlife. Retain live trees with cavities for squirrels, raccoons, and other cavity dwellers. Contractor may leave downed Oak limbs and decaying logs, when vegetation is lying in a position not to threaten ignition of adjacent trees or shrubs. Snags prove excellent wildlife habitat in their natural state. Leave dead standing trees (snags) to provide insects and nesting cavities for birds. Snags should not be taller than 30 feet in height, not capable of reaching a home or road. Treat adjacent trees so canopy cover is spaced at least 10 feet away. Snags that have fallen become decayed; consider when to leave for diversity.	NOE	
2017128155	Hayfork Community and Municipal Watershed Protection Project Forestry and Fire Protection, Department of --Trinity The Watershed Research and Training Center, in cooperation with several private landowners, is planning a 60 acre fuel reduction project in Hayfork, CA. This project is located on several vegetation types including; mixed conifer, oak woodland, and chaparral. Treatments associated with this project will focus on reducing fuel loading through a combination of practices. Project is located from 0 - 2 miles north of downtown Hayfork along Hwy 3, Brady Rd., and Demos Court. Fuel reduction treatments include utilizing hand crews to cut and limb understory trees and shrubs, pile and broadcast burning, chipping, and lop and scatter. Understory vegetation varies throughout the project area, from chaparral to mixed conifer and oak woodland. Understory within the conifer and oak woodlands generally consists of small trees (oak and conifer) (< 6' DBH) and shrubs (manzanita and buckbrush) 2 - 8' tall. As a result of fire exclusion, portions of the project include areas of conifer encroachment into oak woodlands. Encroaching conifers are approx. 50-60 years old.	NOE

2017128171	South Susanville Gateway Caltrans #2 Susanville--Lassen The City of Susanville, in cooperation with the California Department of Transportation, proposes to improve predestriam facilities from Postmile 26.2 to 26.5 on State Route 36 in the City of Susanville, Lassen County, CA. The purpose of the project is to improve the continuity of pedestrian access along this segment of SR-36.	NOE	
2017128172	Small Communities Flood Risk Program Feasability Study Isleton, City of Isleton--Sacramento Project is a deasibility study grant funded by the Disaster Preparedness and Floor prevention Act of 2006 provided by the Department of Water Resources to assess flood risk for the City pursuant of the Small Communities Flood Risk Reduction Program.	NOE	
2017128173	DN 101 Repair Slope and Repair Culvert Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Crescent City--Del Norte The purpose of the project was to implement emergency repairs in order to prevent the loss of the highway due to roadway fill displacement and associated culvert failure along the portion of State Route (SR) 101, at Post Mile (PM) 21.49, in Del Norte County. At the time of repair, Caltrans contacted state and federal agency personnel and submitted a Regional General Permit 5 (RGP 5) - Emergency Permit to the Army Corps of Engineers (USACE). The USACE determined that the project did not qualify for an RGP 5. Caltrans was required to submit an application for a Nationwide Permit No. 3, Maintenance, pursuant to section 404 of the Clean Water Act, which triggered the need for a 401 certification. This certification is being issued after the fact because all ground disturbing activities have been started and completed. The project involved attaching a shorter down drain, and the setting Rock Slope Protection (RSP) within the eroded area of the highway prism. The original 80' down drain was removed, and a 30' down drain was installed. Approximately 200cy of rock was placed in the eroded area below the down drain to stabilize the slope. A 100' long access road was installed adjacent to the culvert outlet and down drain for access. All temporarily disturbed areas was revegetated upon project completion.	NOE	
2017128174	Lost Hills Erosion Repair Water Resources, Department of --Kern The Department of Water Resources (DWR) San Joaquin Field Division (SJFD) performs routine maintenance along the primary road of the California Aqueduct in order to ensure the safety and performance of the aqueduct access roads. The SJFD will restore and compact eroded areas within and adjacent to the primary road with Class II base or local soil so that any cracks, fissures, or potentially hazardous deterioration in the road can be returned to a safe working roadway. 2017128175	<p>Cypress Channel Emergency Erosion Repair Corrections and Rehabilitation, Department of --San Bernardino</p> <p>The bank of the Cypress Channel (the main drainage channel), near the access road to CIM's easternmost facility (Facility C), eroded significantly during 2016/2017 winter storms. The erosion is within 13 feet of the prison facility's access road. Erosion is expected to continue this winter with each rain event, and the road could be in jeopardy of being completely washed out with another significant storm event. Until a permanent solution is implemented, CDCR will install rip rap at the eroded bank, using 30-inch median sized rock, to prevent future flows from creating the vortex that collapsed about 10-15 feet of earth in 2016-2017.</p> <p>To do work, CDCR is obtaining a Clean Water Act (Sect. 401) Water Quality Certification from the Santa Ana Reg. Water Quality Control Board and will; do the work under Army Corps of Engineers Nationwide Permit 3. CDCR talks with CA Dept. Fish and Wildlife who agreed a Streambed Alteration Agreement is not necessary for the work. However, CDCR will submit a Notification of Emergency Work to CDFW. CDCR consulting biologists confirmed the concrete lined channel does not provide any wildlife habitat.</p> <p>The work is necessary for continued and safe access to and operation of CIM to meet CDCR's mission of public safety and security.</p>	NOE

2014121010	Fontana Water Tanks Project Fontana, City of Fontana--San Bernardino The proposed project includes the demolition of an existing concrete water storage tank, the construction of two new water tanks on the southern portion of the site, and a change of zone from residential to commercial for the north of the site currently occupied by the water tank on an approx 10.1 acre property. Construction is expected to commerce in the first quarter of 2018 and will last through third quarter of 2019. As part of the project, a GPA and ZC is requested to allow development of retail or commercial use on the northern portion of the site. There would be an additional GPA and ZC to change the designation of the southern portion of the site to P-PF.	EIR	01/22/2018				
2017121020	Land Acquisition and Site Improvement Project at the Lamb Canyon Landfill Riverside County Beaumont--Riverside The proposed project involves the acquisition of two vacant parcels adjacent to the active Lamb Canyon Landfill through an eminent domain process or other means. Project activities proposed within the acquisition property include drainage improvements, dirt management, environmental monitoring, site security and access.	MND	01/08/2018				
2017121021	Emerald Ridge (T15-00009, D15-00021) Oceanside, City of Oceanside--San Diego The proposed project would allow for the development and operation of an 81 bed convalescent facility at a vacant 2.01 acre project site located at the northeast corner of Dixie St and Grace St. In addition to the adoption of a MND, the proposed project requires approval of ZA15-00007, to change the site's zoning from single fam res to public and semipublic, a TPM to subdivide the property into four parcels, a development plan to allow for the physical site improvements including four two story buildings totaling 63,350 sf, and a CUP to establish and operate a convalescent facility.	MND	01/08/2018				
2017121023	Berth 240 Transportation Vessels Manufacturing Facility Project Los Angeles, Port of Los Angeles, City of--Los Angeles The proposed project is the construction and operation of a facility to manufacturing large commercial transportation vessels on an approx 10-acre site, which includes portions of the former Southwest Marine site and entirely disturbed. Construction would take between 16 and 18 months and would involve the following: demolition of one existing structure, construction of foundations, installation of a prefabricated manufacturing building and ancillary tank farm, paving over existing dirt for parking and access driveways, and repairs to existing	MND	01/08/2018

	wharf.		
2017121024	Food Waste Receiving and Digestion Program at the Joint Water Pollution Control Plant Los Angeles County Sanitation District Carson--Los Angeles The County Sanitation District No. 2 of LA County is the project proponent of the Food Waste Receiving and Digestion Program at the Joint Water Pollution Control Plant. The proposed project would include the receipt of food wastes to be co-digested with biosolids in existing digesters to generate biogas, which would primarily be processed into renewable natural gas to be sold as vehicle fuel at an existing CNG fueling station located at JWPCP, or used for energy production. The proposed project would divert up to 610 tons per day of food waste from landfills. The new food waste station, which includes unloading stations, storage tanks, grit and plastic film removal equipment, pumps and associated piping and connections to the existing digesters, would receive 310 dry tpd of food waste in the form of liquid slurry. The existing Liquid Waste Disposal Station would receive an additional 300 dry tpd of food waste in the form of liquid slurry.	MND	01/08/2018
2017121025	Ravine Water Park Multi-use Trail & Overflow Parking Lot: PD 17-005 & CUP 17-009 Paso Robles, City of Paso Robles--San Luis Obispo PD17-005 & CUP 17-009: A request by the Ravine Waterpark to install a multi-use path to connect the water park located on the north side of SR 46E to a proposed overflow parking area on the south side of SR 46E, on the property located at 2981 Union Road.	MND	01/08/2018
2017122022	South Avenue Bridge Replacement Project Jackson, City of Jackson--Amador The city of Jackson proposes to replace the existing South Ave Bridge over the south fork of Jackson Creek, by removing the bridge and realigning the creek crossing along an extension of Gordon Place Rd. The proposed project would replace the bridge on an improved alignment, adjacent and downstream of the existing location. This project would require additional ROW, and would extend Gordon Place Rd to connect with SR 49. The existing bridge proceeds northeast from South Ave and becomes one lane over the south fork of Jackson Creek towards a parking lot, which leads to SR 49. This bridge would be removed and additional ROW would be acquired to extend the existing Gordon Place in the southbound direction to connect with SR 49.	MND	01/08/2018
2017122023	S17-0007/AT&T CAF 2 (Site 1 Sierra Springs) El Dorado County --El Dorado The CUP would allow for the construction and operation of five telecommunication towers throughout rural El Dorado County in the Sierra Springs, Meadow Brook, Tiger Lilly, Balderson Station and Pilot Hill areas. The telecommunication facilities would consist of five stealth broadleaf towers, with one 35kw standby propane generator, one equipment shelter and one 500 gallon propane tank located upon a 1,050 sf fenced leased area at each site. Up to 12 panel antennas would be installed on each tower. The towers would range in height from 115-160 ft.	MND	01/08/2018

	active modes of transportation. The need for this project is to address adequacy of the existing pedestrian and bike paths, improve connectivity and improve mobility access to everyday needs and services.		
2017128224	ATP-Hilmar Caltrans #10 --Merced Caltrans proposes to improve the pedestrian and bicycle facilities along SR 165 from Geer Ave. at PM 32.87 to August Avenue at PM 34.36 in Hilmar, Merced County. This project proposes to widen existing pavement to install class II bike lanes, construct new sidewalks and reconstruct existing curb ramps. the purpose of this project is to encourage increased use of active modes of transportation. The need for this project is to address adequacy of the existing pedestrian and bike paths, improve connectivity and improve mobility access to everyday needs and services.	NOE	
2017128225	Bridge Inspection Caltrans #10 --Madera, Stanislaus Caltrans proposes a highway maintenance project involving bridge maintenance at various locations along I-5 throughout Merced and Stanislaus County. A total of 20 bridge structures at 20 locations will be repaired by replacing joint seals, treating bridge deck with methacrylate and repairing unsound concrete, depending on each bridge condition. All proposed work will be performed within the limits of the bridge structures with the exception of construction area signs. The purpose of this project is to delay the future need for major rehabilitation of the bridges. The need for this project is to ensure the bridges remain safe for usage.	NOE	
2017128226	Water Delivery Improvements North Kern Water Storage District Wasco--Kern North Kern Water Storage would install Water Delivery Improvement control and monitoring instruments at 112 District-owned wells and water level sensing equipment at 14 remote terminal unit (RTU) locations within the District. The WDI equipment installation includes the following: magnetic flowmeters, water quality sensors, telemetry units, evapotranspiration stations (ET) stations and water level sensors. Construction activities associated with the installation of the WDI equipment would include the installation of conduit for field instrumentation and wiring, and a 4x4 foot concrete support pad. The trench for conduit would be approximately 36 inches deep, up to 12 inches in width, and extend up to 30 feet in length. Each RTU location would also include a 35 foot power pole, solar equipment, a SCADAPack controller to monitor the local water levels and a 900 MHz radio to communicate data back to the main office. The WDI project would be implemented over a 3 year period, starting in March of 2018.	NOE	
2017128227	Weott CSD Water Storage Tank Replacement Weott Community Services District --Humboldt For the benefit of District water users, replace existing concrete block water tank with new steel tank(s) on existing cut/fill pad. Project will increase District's water storage capacity to meet recommended 3 days max demand, but will not increase District's service area, water withdrawals, or customer water entitlements.	NOE

2014121041	Santa Monica Pier Bridge Replacement Project Santa Monica, City of Santa Monica--Los Angeles Note: Extended Review Per lead The Pier Bridge structure extends west on Colorado Avenue from the intersection of Ocean Avenue and Colorado Avenue and connects to the Santa Monica Pier. The Pier Bridge was built in 1939 and is near the end of its useful life, with a sufficiency rating lower than 25 out of 100. The bridge is considered to be structurally deficient and functionally obsolete. After an extensive conceptual design process, three alternatives were developed to address the reconstruction of the Pier Bridge: Alternatives 1, 2, and 3.	EIR	03/15/2018
1996032052	Pajaro Valley High School Athletic Field Project Pajaro Valley Unified School District South San Francisco--San Mateo The project would update existing athletic facilities by replacing existing grass turf with synthetic turf and adding a regulation track, bleachers, a ticket booth, an announcer's booth, a scorekeeper's booth, a concession building, and restrooms. The athletic fields would consist of two softball fields and a football field. The new athletic fields would be used for PVHS practices, football, soccer, and softball games, and track meets. The main entrance to the field would remain in its current configuration, from the high school access road.	FIN	
2017121026	San Joaquin River Restoration Program - Eastside Bypass Improvements Project Water Resources, Department of Merced, Los Banos--Merced Note: Extended Review per lead. The project is located 15-20 miles southwest of Merced in Merced County. The project will improve fish migration and restoration flow capacity in the Eastside Bypass by reinforcing about 2 miles of Eastside Bypass levees, modifying the Eastside Bypass Control Structure and Dan McNamara Road culvert, and removing two weirs and constructing a replacement well in the Merced National Wildlife Refuge.	MND	01/19/2018
2017121027	Environmental Review 2017-005 - Salinas Police Service Headquarters Salinas, City of Salinas--Monterey The city is proposing to construct a public safety facility consisting of a new primary two-story approx 44,352 sf Police Service HQ building with a new secondary one-story approx 24,878 sf support building, and a future one-story approx 5,000 sf support building all on a 277,486 sf site. Primary access to the site will from Murphy St with secondary access from Work St. The project proposes 268 off street spaces on-site. The project includes a lease agreement between the city and a non-profit organization.	MND	01/09/2018
2017121028	Wilson Creek Basins Water Recharge Project Yucaipa Valley Water District Yucaipa--San Bernardino Project would provide additional recharge of Yucaipa groundwater subbasin by surface application of highly treated recycled water from Wochholz Regional Water Recycling Facility at Wilson Creek Basins, as well as surface application of	MND	01/09/2018

	surplus water from SWP delivered via SWP East Branch Extension. The Basins are currently used to recharge SWP water and have 7,000 acre-feet per year recharge capacity. If SWP water is unavailable, additional diluent may be provided by applying potable water to basins from the YVRWFF, located adjacent to Basins. A new pipeline would be constructed to convey recycled water from District's existing recycled water distribution system to basins, as well as a new booster pump station and up to two monitoring wells.		
2017122029	Hatch Road Auxiliary Lane Caltrans #10 Modesto--Stanislaus Note: Review Per Lead	MND	01/18/2018
	Caltrans is proposing to construct a northbound auxiliary lane on SR 99 from the Hatch Rd/Joyce Ave on-ramp to the South 9th St off-ramp near the city of Modesto in Stanislaus County. The project would also widen outside shoulders to 10 ft wide and replace an existing soundwall. A new soundwall would be constructed a max of 13 ft from the new edge of travel way. Removal of the existing soundwall and construction of the new soundwall would require the existing frontage road to be shifted eastward. The total amount of new ROW required would be approx 0.23 acre or 10,000 sf. Estimated cost of the proposed project is \$3,499,000; the ROW cost is estimated to be \$1,270,000.		
2017122031	McCown Minor Land Division (PLN16-00036) Placer County Auburn--Placer	MND	01/09/2018
	The project proposes a minor land division in order to subdivide an approx 10.64 acre property into four parcels consisting of 2.76 acres, 2.53 acres, 2.59 acres and 2.76 acres.		
2017122032	Complete the Gap Trail San Mateo County Hillsborough--San Mateo	MND	01/09/2018
	The project would involve construction of an 800-ft long paved trail segment up to 10 ft wide on the western shoulder of Skyline Blvd. The trail segment would be bordered by a 54-in metal safety fence barrier on the east side, separating the trail from the roadway's travel lanes for motor vehicles, and a gravel shoulder and six-ft chain-link fence with barbed wire on top on the west side. The northern section of the trail segment would have a 250-ft long, two to five ft high retaining wall. The proposed project is intended to eliminate a trail gap and connect the existing Crystal Springs Dam Trail segment to the Crystal Springs Regional South of Dam Trail segment.		
2017122030	PA-1700276 (ER) EIR for Gallo Project San Joaquin County Lodi--San Joaquin	NOP	01/09/2018
	A use permit application no. PA-1700191 of E & J Gallo Winery to establish a large winery in 3 phases over 13 years. Phase 1, with building permits to be issued within 18 months of the effective date of approval, includes the construction of a 150 sf guard shack, a 150 wastewater treatment ponds, a stormwater retention pond, and tank farm with crush pad and fermentation area. Phase 2, with building permits to be issued within 8 years of the effective date of approval, includes the construction of wastewater treatment ponds, a stormwater retention pond, and a tank farm. Phase 3, with building permits to be issued within 13 years

2017122033	City of Sutter Creek General Plan Update and Zoning Map Amendment Sutter Creek, City of Sutter Creek--Amador Note: Review Per Lead	Neg	01/26/2018
	The GPU modifies the existing GP to: include current State GP requirements and changes to state and local regulations; streamline future updates and environmental documentation by reorganizing the GP into four volumes; and revise the GP by replacing completed or no longer relevant implementation measures with current measures, correcting redundancy in the plan, updating the growth and buildout projections, modifying land use designations with minor updates, adding GHG policies, updating the land use diagram to reflect GIS parcel based mapping data, and revising policies to ensure growth does not create impacts. This action also includes rezoning 8 parcels from C-2 commercial to R-4 multiple family dwellings, amending the zoning map.		
2010022070	Oyster Point Specific Plan Update and Details for Phases II, III and IV South San Francisco, City of South San Francisco--San Mateo Note: Extended Per Lead	SIR	02/01/2018
	A subsequent EIR has been prepared to analyze proposed updates to phases II, III, and IV of the Oyster Point Specific (OPSP), which analyzed these phases on a programmatic level. The original OSP envisioned a total of 1,750,000 sf of office/R&D. The current proposal for Phases III and IV would require modification to the OPSP and proposes changing the use to residential mixed-use including 1,191 residential units and 22,000 sf of flexible use retail/amenity space. Approval of each phase will require a precise plan and phases III and IV will additionally require amendments to the general plan and OPSP.		
1996032052	Pajaro Valley High School Athletic Field Project Pajaro Valley Unified School District Watsonville--Santa Cruz The project would update existing athletic facilities by replacing existing grass turf with synthetic turf and adding a regulation track. The athletic fields would consist of two softball fields and a football field. The area is currently used as athletic fields. Bleachers would be added on the north side of the new field into a low hill that separates the lower-level practice field area from the higher central campus area. The bleachers would rise approx. 15 feet from grade elevation. The project would require the relocation of portable classrooms that are currently located in the proposed bleacher location.	NOD	
2006111009	Armstrong Ranch Specific Plan Ontario, City of Ontario--San Bernardino The proposed Armstrong Ranch Specific Plan will establish land use, development and design standards for approx. 199 acres following up to 944 single-family detached and attached residential units at an overall density of 5.0 dwelling units per acre within six Planning Areas. An elementary school site on approx. 10 acres within the Mountain View school District is proposed. If the elementary school site	NOD

2015102005	Medical Marijuana Land Use Ordinance - Phase IV Humboldt County --Humboldt Project consists of four encroachment(s): One encroachment is for water diversion from an Unnamed Tributary to Eubanks Creek. Water is diverted for domestic use and irrigation. Work for the water diversion will include retrofit, use, and maintenance of the water diversion infrastructure. One encroachment is to extend an existing undersized culvert and restore the stream channel. Work for this encroachment will include extending the existing culvert, rock armoring as necessary to minimize erosion, recontouring the channel, and planting with native plants to stabilize the stream banks. Two other proposed encroachments are to decommission existing culverts. Work for these encroachments will include excavation, removal of culverts, recontouring of the channel to the native slope, and erosion control.	NOD	
2016121014	Riverpark Mitigation Bank Project Riverside County --Riverside CDFW has executed Streambed Alteration Agreement No. 1600-2016-0076-R6 (Revision 1), pursuant to section 1602 of the Fish and Game Code to the project applicant, Hillcrest Homes, Inc. The project includes the rehabilitation or reestablishing of 563 acres of floodplain, including vernal pool and alkali playa habitat, along an 11,500 linear-foot section of the San Jacinto River through the removal of berms on either side of the existing low-flow channel and filling portions of the ow-flow channel to allow for more consistent overbank flows.	NOD

2017122036	AT&T Monopine Antenna-Hidden Valley Lake/Wild Diamond Vineyards Lake County --Lake Note: Review Per Lead The applicant is requesting approval of a major use permit (UP17-08) to construct an unmanned 110 ft tall green monopine tower with foliage, within a leased area approx 900 (30'x30') sf in size. The proposed facility would be accessible from an existing 12-ft wide private road, owned by Wild Diamond Vineyard, LLC, off of Spruce Grove Rd (a county-maintained road). The road will be improved (graveled or paved) and up to 30 ft in width.	MND	01/17/2018
2017121035	Proposed Beach Cities Media Campus Project El Segundo, City of El Segundo--Los Angeles The project proposes the development of an approx five-story, 240,000 sf office building, a one-story, 66,000 sf studio and production facilities building, and 7,000 sf of retail uses in two, one-story structures. Parking for the project would be provided in a seven story parking structure with above grade and below grade parking containing 980 parking spaces, one level below grade parking in the office building containing 120 parking spaces, in addition to a limited amount of surface parking. Two separate site plan configurations are being proposed for the Beach Cities Media Campus project. Under either scenario, development of the project may include a bridge between the proposed office building on the southeast corner and an existing office building to the east.	NOP	01/10/2018
2017121036	Los Penasquitos Lagoon Enhancement Plan Parks and Recreation, Department of San Diego--San Diego Note: Review Per Lead The proposed project would enhance Los Penasquitos Lagoon through reconfiguration of the channel network in the lagoon to provide better freshwater management and enhanced tidal exchange/influence. The project would also identify vector and trails management opportunities. Beginning in 2013, an updated Lagoon Enhancement Plan was developed to provide guidance on restoring Los Penasquitos Lagoon habitats, protecting listed species, reducing threats to public health, and involving stakeholder groups with regard to coastal resource stewardship. Conceptual-level alternatives for restoring and enhancing the Lagoon's native habitats were developed as part of the process, and are identified in the updated Los Penasquitos Lagoon Enhancement Plan, which provides guidance over future design and implementation of lagoon improvements. In general, the conceptual-level alternatives focused on restoring salt marsh and transition habitats to allow for upslope migration of salt marsh in responses to sea level rise using various strategies.	NOP	01/22/2018
2017122035	Titlow Hill General Plan Amendment, Zone Reclassification, and Subdivision Application Humboldt County --Humboldt Amendment to the Humboldt County General Plan, zone reclassification, and subdivision application. 2017122037	PA-1600257 (Minor Subdivision) San Joaquin County Ripon--San Joaquin A minor subdivision application to subdivide an existing 40-acre parcel into two parcels. Parcel 1 to contain a 2.3 acre homesite parcel. Parcel 2 to contain 37.7 acres.	Neg	01/10/2018
2017124001	Westminster East Garden Grove Study U.S. Army Corps of Engineers Anaheim, Stanton, Cypress, Buena Park, Orange, Santa Ana, ...--Orange Note: Scoping Notice, Review per lead The purpose of this study is to evaluate residual flood risk within a portion of the Westminster watershed. The study area includes select non-Federal drainage channels within the watershed and the receiving waters of one of the channel systems within the Bolsa Chica Ecological Reserve area. Alternatives for analysis will look at reducing flood hazards and reducing flood impacts in the vicinity of Outer Bolsa Bay, including flooding along the Pacific Coast Highway. There are two main channel systems that collect runoff from portions of urbanized areas in the cities of Anaheim, Stanton, Cypress, Buena Park, Orange, Santa Ana, Garden Grove, Westminster, Fountain Valley, Los Alamitos, Seal Beach, and Huntington Beach. The East Garden Grove-Wintersburg channel [(EGGW) (CO5)], with its principal tributary, the Ocean View Channel [(OV) (CO6)], drains into Outer Bolsa Bay which drains into Huntington Harbour. One retarding basin (Haster) exists at the upstream reach of the EGGW channel. Outer Bolsa Bay is a portion of the Bolsa Bay State Marine Conservation Area (Bolsa Bay SMCA). The East Garden Grove-Wintersburg Channel is adjacent to the Bolsa Chica Basin SMCA which includes the Bolsa Chica Lowlands and Ecological Reserve, and is a major environmental resource in southern California. The Bolsa Bay SMCA's have been designated as an area of national significance; these wetlands host a wide assemblage of resident and migratory waterfowl and marine species, including over 30 state and federally listed sensitive species. 2017128286	Hungry Valley State Vehicular Recreation Area - Interpretive Center Parks and Recreation, Department of Gorman--Los Angeles Purpose of this project is to install three sea containers with a roof to create an interpretive center in Smith Forks Camground. The interior area will consist of picnic tables, straw bales, and a stage for interpretive activities for visitors. Ground disturbance will include moving approximately two feet of soil from the southwest corner of the project site to the northeast corner to level out the project area. The area will be capped off with approximately three inches of compacted decomposed granite to make the area stable for visitors to walk on. Two fences will be installed to control visitor access to the area. The first fence will be chain link and will control the access to the entrance to the facility. Four holes approximately three feet deep will be dug along the open side of the sea containers. Each hole will receive one metal pipe and cement to hold a swinging gate. A second fence will be placed to the southeast of the project site to control traffic flow. Approximately eight holes will be dug in the area three feet deep. These holes will be filled with a peeler core fence post and native soil. This will divert traffic from Hungry Valley Road entering the campground toward interpretive Center.	NOE	
2017128287	Mendocino Coast Recreation and Parks District Planning - New OHV Park Parks and Recreation, Department of Fort Bragg--Mendocino This project would fund an economic feasibility study and a CEQA environmental analysis to evaluate the potential for developing a new OHV park on a former timber harvest area, which has existing logging roads and skid trails.	NOE

2017128288	Placer County Sheriff Education & Safety Parks and Recreation, Department of --Placer This project comprises funding volunteer search and rescue personnel to support the Placer County OHV areas and purchase of safety equipment and supplies.	NOE	
2017128289	Plumas County Planning - New Trails Mount Hough Parks and Recreation, Department of Quincy--Plumas Plumas County in partnership with Plumas National Forest and Sierra Buttes Trail Stewardship will complete CEQA/NEPA environmental evaluations and decision documents for proposed construction of 18 miles of new OHV trails. This is a two-phased project. This approved phase solely compromises environmental study. The second phase, which is not part of the current approval, would involve surveying and flagging OHV routes that have been subject to CEQA/NEPA review and approved for construction.	NOE	
2017128290	Plumas County Mount Hough Trail System Ground Operations Parks and Recreation, Department of Quincy--Plumas The project comprises ongoing maintenance activities on 26 miles of existing OHV trails within Plumas National Forest including: 1) Removing excess vegetation within the existing trail corridor; 2) Filling small ruts in the trail tread and removing slough material; 3) Tread armoring where the grade is too steep or develops puddles; 4) Leading and coordinating volunteer work crews; and 5) Installing signs and rock and log barriers to prevent OHV off the trail systems.	NOE	
2017128291	Plumas County OHV Education Community Event Booths Parks and Recreation, Department of Quincy--Plumas The project provides funding to staff an information booth at several community events throughout the year including the Plumas-Sierra County Fair, the Plumas County Picnic, and the Quincy Sled Wars. Staff will distribute information regarding the current state of OHV opportunities throughout Plumas County as well as OHV/OSV route maps and information on safe and proper use of the forest.	NOE	
2017128292	Plumas County OHV Planning - High Lakes Trail Inventory Parks and Recreation, Department of --Plumas Plumas County Public Works, in coordination with Search & Rescue staff and the Sheriff's Office, proposes to complete a trail inventory and emergency response plan for the High Lakes OHV Area. Project activities involve compiling GIS data from existing public and private sources, GPS mapping and videotaping of all vehicle type, and difficulty rating. The project does not involve ground disturbance activity or any physical change to the environment.	NOE	
2017128293	Ground Operations - Plumas County Multi-Use Network Routine Maintenance Parks and Recreation, Department of --Plumas The project involves maintaining 90 miles of gravel roads damaged by springtime snowmelt by removing down trees, regarding the road surface, and repairing drainage systems. Field inspections will ensure the system is monitored and maintenance is targeted effectively.	NOE

	Development Plan for the proposed subdivision to permit clustering and create open space in compliance with the Bass Lake North Specific Plan; A Phased Tentative Subdivision Map creating 90 single family residential lots ranging in size from approx. 7,204 sq feet to 23,975 sq feet; four open space lots totaling approx. 11.37 acres; and two right-of-way lots totaling approx. 5.09 acres. Access gates may be constructed at "Sienna ridge Road/Road "A" and the point of Emergency Vehicular Access at the northerly terminus of Road "D"; Design Waivers to allow reduced ROW width from 50 feet to 40 feet and reduced roadway width from 36 feet to 29 feet for Road A, Road B and Road D; reduce ROW width for Road B and Courts C,E,F, and G from 50 to 34 and 40 feet,		
2017128312	United States Navy San Clemente Island Water System, Initial Full Permit and Installation of New Treatment Devices State Water Resources Control Board San Clemente--Orange The United States Navy - San Clemente Island has constructed new TTHM water treatment devices at multiple sites to include a 40,000 - gallon redundancy tank, recirculation pumps and 40 LF of 4" diameter pipeline. The State Water Resources Control Board (SWRCB) as lead agency issued a water supply permit on August 18, 2017.	NOE	
2017128313	Sustainable Shared Mobility - Bay Area Energy Commission Oakland, San Jose, San Francisco, Richmond, Milpitas, ...-- The grant recipient will install 15 level 2 Plug-In Electrical Vehicle (PEV) charging stations throughout multiple affordable housing projects in the Bay Area. The installation of new PEV chargers will benefit PEV drivers in the region by increasing their range confidence. The transportation sector is the biggest contributor to California's GHG emissions and accounts for approximately 40 percent of these emissions. As documented throughout numerous California policy and regulatory materials, increased use of zero-emission vehicles (ZEV) provide multiple benefits in addition to reducing GHG emissions, such as reducing conventional pollutants, operating quietly and cleanly, allowing home refueling, lowering operating, and fuel costs. As such, California Governor's Executive Order B-16-2012 orders that the California Air resources Board, the California Energy Commission, the Public Utilities Commission and other relevant agencies work with the Plug-in Electric Vehicle Collaborative and the California Fuel Cell Partnership to achieve, among other benchmarks. By 2015, the State's major metropolitan areas will be able to accommodate ZEVs, each with infrastructure plans and streamlined permitting; and By 2020, the State's infrastructure will be able to support up to one million ZEVs. With the increased range confidence in the region's PEV drivers, there will be an increase in PEV miles driven, displacing conventional gasoline miles driven. By decreasing the conventional gasoline miles driven, GHG emissions will decrease in the region and support the Governor's Executive Order B-16-2012.	NOE

2015121102	Slover Distribution Center San Bernardino County --San Bernardino Project would include the development of a 344,000 sq. ft. high cube warehouse facility. The project would also include associated truck and passenger vehicle parking, fences, gates, hardscape areas, as well as some ornamental trees and vegetation. The project would require a GPA to change the land use designation from Bloomington/Residential with a 20,000 acre min lot size, additional ag overlay, and Bloomington/Single res with a 1-acre min lot size, additional ag overlay and a CUP.	EIR	01/26/2018
2016081053	Fifth Avenue Landing Project and Port Master Plan Amendment San Diego Unified Port District San Diego--San Diego The proposed project would construct an approx. 850 room hotel tower, an approx. 565 bed lower cost visitor serving hotel, retail development along the promenade, approx. 1.96 acres of public access plaza space, approx. 263 onsite parking spaces, a connecting bridge from the hotel public access plaza to the San Diego Convention Center, and a marina expansion. In addition, the proposed project would maintain the existing public in-bay water transportation system, including the water transportation ferry and water taxi service. The proposed project also includes a Port Master Plan Amendment for Planning District 3, Centre City Embarcadero, to change the allowable land and water uses on the project site.	EIR	01/26/2018
2016091031	Godhino Dairy Expansion Merced County Los Banos--Merced CUP15-018 would expand the existing dairy so that the modified dairy would house 4,000 milk cows and 700 dry cows. This would represent an increase of 3,000 animals from existing numbers. The proposed project would include the construction of two new freestall barns and extension of an existing freestall barn; conversion of the existing milking parlor to a hospital barn with competition of the proposed milking parlor; and relocation of existing commodity barns. All proposed structures additions would be within the existing facility footprint.	EIR	01/26/2018
2016121016	AJ Borba Holsteins Expansion Project Merced County --Merced The project sponsor proposes to expand the existing dairy so that the modified dairy would house 2,000 milk cows and 400 dry cows. This would represent an increase of 2,200 animals from existing numbers. The proposed project would include the construction of supporting buildings and structures, including a new shade barn and associated corrals, an extension of an existing shade barn and associated corrals, and a new rotary milking parlor.	EIR	01/26/2018
2017032029	Quarry Row Subdivision Rocklin, City of Rocklin--Placer Project would redesignate the project site Medium High Density Residential, and rezone the site Planned Development Residential (MHDR), 9 dwelling units per acre (PD-9). The project would develop 64 single family dwelling units on the project site. No off-site improvements are anticipated beyond connecting to existing roads and utility lines adjacent to the project site.	EIR	01/29/2018

2013081079	<p>Revisions to the Kern County Zoning Ordinance - 2015 C. Focused on Oil and Gas Local Permitting Kern County --Kern</p> <p>The originally approved project consists of an amendment to Title 19 Kern County Zoning Ordinance (July 2012), with focus on Ch. 19.98 (Oil and Gas Production), to include new site development standards for all oil and gas exploration, extraction, operations, and production activities in unincorporated Kern County. DOGGR, as the Responsible Agency, will be issuing a permit for the proposed project activity, which consists of the following: The DOGGR has approved permits for Aera energy, LLC to hydraulically fracture 7 wells, listed below, in the South Belridge oilfield of Kern County.</p>	Oth	
2010122088	<p>The 2011 Fisheries Restoration Grant Program Fish & Game #2 Goleta--Del Norte, Humboldt, Madera, Mendocino, Napa, ...</p> <p>CDFW has executed Streambed Alteration Agreement No. 1600-2017-0173-R5, pursuant to section 1602 of the Fish and Game Code to the project Applicant, MAZ Properties, Inc. c/o Alicia Harrison.</p> <p>Project falls under the 2011 Fisheries Restoration Grant Program. Permittee previously completed the removal and subsequent stream restoration of five instream barriers to fish passage along Tajiguas Creek. A series of storm events in January and February of 2017 caused damage at two areas of restoration. Permittee proposes to make the following repairs to the damaged restoration areas: The damaged restoration areas along the streambanks at both sites will undergo minor excavation to allow for placement of rock slope protection (RSP), placement of backfill behind RSP, planting of live willow stakes, and placement of geotextile cloth. All remaining voids within the RSP will be filled with salvaged material less than three inches in diameter. Repairs include revegetation of streambanks with plants locally native to the area. In the event that water is present, a dewatering plan will be implemented.</p>	NOD	
2015052019	<p>Little Walker Shoulder Widening Caltrans #9 --Mono</p> <p>CDFW is executing Streambed Alteration Agreement No. 1600-2017-0156-R6, pursuant to section 1602 of the Fish and Game Code to the Permittee, the Caltrans District 9, represented by Ms. Angela Calloway. The Little Walker River Shoulder Widening Project includes the expansion of the existing shoulders from two to eight feet along 3.3 miles existing highway. This project will include the removal of riparian vegetation, installation of rock-slope-protection, grading and the installation of retaining walls within the CDFW-jurisdictional West Walker River streambed. The Streambed Alteration Agreement is being issued to address the removal of 295 mature coyote willow scrubs (<i>Salix exigua</i>) and 6 mature yellow willow trees (<i>Salix lutea</i>); permanent impacts to 0.38 acres of riparian habitat, 0.001 acres of wetland habitat, and 0.06 acres of streambed. Surface flows will be diverted around the project during construction activities. Equipment staging maintenance will be located in upland locations.</p>	NOD

2017031035	Poway Road Specific Plan Poway, City of Poway--San Diego The Poway Road Specific Plan encompasses 235 acres of properties along Poway Rd between Oak Knoll Rd and Garden Rd. The specific plan identifies the vision and objectives for private land use development and public improvements along a 2.65 mile extent of Poway Rd. Approx 260,000 sf of net new commercial/office development and 1,148 net new residential units could result from implementation of the specific plan. Proposed public improvements include a class 4 bicycle lane along Poway Rd, new pedestrian crossings, and traffic signal synchronization.	NOD	
2017091024	CSULB Technology Park Phase III Long Beach, City of Long Beach--Los Angeles Prologis plans to construct the proposed project on an approx 10-ac site on the north side of Pacific Coast Hwy, also known as SR 1, between Cota Ave and Hayes Ave in the city of Long Beach. The proposed project would include approx 205,060 sf of warehousing land use, including approx 20,000 sf of office space. The proposed project is intended to meet growing demand for warehouse space in West Long Beach. Up to 50% of the project's warehouse space could be refrigerated.	NOD	
2017101001	Interim Housing at Daniel Webster Elementary School Long Beach Unified School District Long Beach--Los Angeles Long Beach Unified School District is proposing the installation and use of interim housing at Webster ES, required to house 3rd, 4th, and 5th grade students during modernization of the following four schools over the next four years: Garfield ES, Webster ES, Muir K-8, and Birney ES. Additionally, Netherly Ave along the school frontage, which is owned and maintained by the District, would be converted from two-way to one-way southbound traffic; existing street parking on much of the east side of the street would be replaced by diagonal parking spaces.; and a new off-street drop-off/pick-up area would be designated in the northern campus. 2017101022	Point Pinos Coastal Trail Improvement Project Pacific Grove, City of Pacific Grove--Monterey The proposed project is development of a 5-ft wide decomposed granite surfaced coastal trail within a natural setting seaward of Ocean View Blvd, along approx. 0.8 mile of coastline, in the city of Pacific Grove. The coastal trail will connect from the existing curb side trail near Acropolis St west to the Great Tidepool site, a distance of approx. 0.8 mile. The project locates the trail outside the 30-year coastal retreat setback line, except where moving the trail beyond this line is constrained by Ocean View Blvd. In these cases, the trail will be along the north side of the road, such as along Crespi Pond. Constructing the trial beyond the setback line will require removal or relocation of many of the existing informal DG parking areas along the shoreline. Another project component is to move parking beyond the 30-year setback line, with a goal to avoid net loss of parking.	NOD

2017128321	<p>Holser Canyon Creek Long Term Maintenance (Lake or Streambed Alteration Agreement No. 1600-2017-0108-R5) Fish & Wildlife #5 --Ventura CDFW has executed Lake or Streambed Alteration Agreement No. 1600-2017-0108-R5, pursuant to section 1602 of the fish and game code to MidState Land Corporation. The applicant proposes to maintain and repairing three sections of Holser Canyon Rd, two which existing culverted crossing (no more than 15 ft wide) to create a smooth surface for vehicles to cross the creek. Additionally, approx 200 and 500 lf sections of the road shoulder will be reinforced with clean dirt. In an area where potential erosional damage can be done to the road. In this area only, a pilot channel may be excavated to guide the water through this section of the creek.</p>	NOE	
2017128322	<p>Conde Farms Dock Project (Lake or Streambed Alteration Agreement No. 1600-2017-0344-R2) Fish & Wildlife #2 --Calaveras CDFW has executed Lake or Streambed Alteration Agreement No. 1600-2017-0344-R2, pursuant to section 1602 of the fish and game code to Conde Farms LP. The project is limited to using an excavator to remove approx 60 cy of soil from the lakebed to lower the bed elevation and level the site for placement of a floating dock. The excavator will access the lakebed from residential lots #503 and #504 when Tri Dam draws down the water. Excavation will occur in dry conditions and excavated materials will be used to construct a retaining wall at the base of the residential structure. Straw waddles will be used around the retaining wall during construction to contain any loose soils, and will be removed along with any loose soils prior to water inundation. The floating dock will be installed outside of the lakebed and require no digging or installation of pipe supports into the lakebed.</p>	NOE	
2017128323	<p>Rappe Culvert Stabilization Project (Lake or Streambed Alteration Agreement No. 1600-2017-0281-R2) Fish & Wildlife #2 --Placer CDFW has executed Lake or Streambed Alteration Agreement No. 1600-2017-0281-R2, pursuant to section 1602 of the fish and game code to Tom Rappe. The project includes the stabilization of the inlet and out of a 60 ft long, 18 in diameter corrugated plastic culvert. The culvert conveys flow from upslope of the road and discharges into an existing pond. The inlet will be armored with approx 15 sf of native rock riprap. The outlet will be armored with approx 50 sf of native rock riprap. All work will be completed by hand. No water will be flowing in the stream during construction, and no trees will be removed as part of this project.</p>	NOE	
2017128324	<p>EA 03-4F640: Guardrail Upgrade Project Caltrans #3 Sacramento--Sacramento, Yolo The project proposes to upgrade existing guardrail to current Caltrans standards at various location along I-5, I-80, SR 99 in Sacramento County and I-80 in Yolo County. All work will be within the state ROW.</p>	NOE

2017128331	Compton CCD - Campus Public Safety Building Compton Community College District Compton--Los Angeles Compton CCD has approved a project to replace existing structures with one new structure at the campus with out increasing capacity. The project replaces 2 structures that have exceeded their useful life-cycle and do not conform to seismic safety, structural stability, accessibility and fire/life/safety code requirements.	NOE	
2017128332	Rose Float Laboratory California State University, Pomona Pomona--Los Angeles The Rose Float Laboratory is programmed to provide approx 5,700 sf of space consisting of labs, shops, decorations space, storage and restrooms. It will also be protected from the weather, better security for the equipment, electronics and tools, and space specifically designed to enhance student learning.	NOE	
2017128333	High Performance, Ultra-Tall, Low Cost Concrete Wind Turbine Towers Additively Manufactured On-Site Energy Commission Irvine--Orange The purpose of this agreement is to develop, demonstrate, and test a reinforced concrete additive manufacturing technology for building low cost ultra-tall wind turbine towers onsite at the wind plant. The proposed reinforced concrete additive manufacturing technology eliminates the transportation and logistics constraints by manufacturing structurally efficient large diameter towers within the wind plant using lights weight reinforcement methods. The towers are made with locally available cementitious materials supplied by standard concrete trucks or an existing concrete batch plant within the wind plant used for casting conventional tower foundations. The construction tech will reduce technological and economic barriers to upgrading, repowering, and expanding wind power generation in CA by enabling cost effective deployment of taller towers that capture more wind energy from faster winds aloft. 2016051042	<p>United Rock Quarry No. 3 Project Los Angeles County Flood Control District Irwindale--Los Angeles LACFCD manages a flood control system of dams, reservoirs, and debris basins that are designed to collect sediment from the hillsides and prevent it from damaging property downstream. The proposed project proposes to acquire and use United Rock Quarry No. 3 as a new sediment placement site (to be called Buena Vista SPS), which would allow the LACFCD to prolong its sediment management capabilities into the future. The Project would involve the use of Quarry No. 3 as a permanent placement location for sediment removed from the District's reservoirs, debris basins, spreading grounds, and other facilities. The Project would include a project construction phase and a project operations phase. Construction activities would include necessary improvements to the Quarry No. 3 site, the Buena Vista Spreading Basin site, and the surrounding vicinity to enable trucks to dispose of material in the new Buena Vista SPS. The District would begin project construction in 2019 and Project operation in 2020. Placement of sediment at Buena Vista SPS would last approx. 50 years; therefore, the anticipated end date of the Project's operation would be in the year 2070.</p>	EIR	01/29/2018
2017042071	<p>Bilby Ridge Sphere of Influence Amendment Sacramento County Local Agency Formation Commission Elk Grove--Sacramento Note: Review Per Lead</p> <p>There are no changes to land uses proposed as part of the project. The project does not include a land use plan or related pre-zoning entitlements requests. Annexation of the project site to the city of Elk Grove is no an action under consideration for this project. Similarly, the project does not include a timeline for an annexation request, development, or phasing for future development. However, LAFCo must make certain findings with respect to land use, proposed land use, and service needs within the SOIA area and within the current city limits. These findings include the need for urban services and orderly growth along with preservation of agricultural lands. LAFCo will assume certain time frames for development consistent with Sacramento Policies, Standards and Procedures and applicable state law.</p>	EIR	02/12/2018
2017051011	<p>Palm Nipomo Parking Structure Project San Luis Obispo, City of San Luis Obispo--San Luis Obispo The project involves the construction of an above-ground, five-story parking structures, 5,000 sf of commercial space, and a non-profit theater. The parking structure would provide 400-445 parking spaces. The theater would entail a three story structure with a gross floor area of 23,841 sf and up to 255 theater seats. The project would include a general plan amendment from office and medium high density residential to public and a zone change from office with a historic overlay and medium high density residential to public facility with a historic overlay. 	PF-H zone allows for development of a multi-level parking structure and non-profit theater, and deviations to otherwise applicable setback requirements and building height limits with planning commission approval. Commercial uses would be allowed as accessory uses of the parking and theater facilities. The project would also require a variance for the floor to area ratio to exceed 1.0 and max coverage to exceed 60%.		
2017121039	Walker Trails Santee, City of Santee--San Diego The proposed project consists of a Town Center Specific Plan Amendment (TCSPA2016-1), Tentative Map (TM2016-1), and Development Review Permit (DR2016-2). The proposed Town Center Specific Plan Amendment would change the 10-acre area of the project site currently designated as "Office/Professional" to "Residential (7-14 dwelling units per acre)." The Tentative Map would subdivide the 20.4 acre site into 80 lots with 67 residential lots and lots for private roads, a park, landscaped areas, storm water facilities, a floodway and fuel modification buffer, and a lot that covers a portion of the San Diego River. The Development Review Permit would provide for the proposed development's design, architecture, and amenities, including a trail along the San Diego River and an approx. 19,000 sq. ft. park.	MND	01/12/2018
2017122038	Croftwood Unit #2 Subdivision Rocklin, City of Rocklin--Placer The Croftwood Unit #2 Subdivision project proposes the construction of a low density residential development consisting of 60 single family units, 2 open space lots, one buffer lot, and one detention basin lot on a 25.5 +/- acre site in the City of Rocklin. This project will require the following entitlements from the City of Rocklin: A General Development Plan Amendment to modify the development standards of the zone district; a Tentative Subdivision Map to subdivide the one existing parcel into 60 single-family lots and associated roadways, landscape lots, two open space lots, one buffer lot, and one detention basin lot; and an Oak Tree Preservation Plan to address the preservation, removal and mitigation of oak trees on the project site.	MND	01/12/2018
2017122039	1696-1758 Villa Street Multi-Family Residential Project Mountain View, City of Mountain View--Santa Clara The project would consist of the demolition of existing single and multi-family residences at 1696-1758 Villa Street and the construction of a 226 unit apartment complex. The project would also include an approx 0.4 acre public park and open space at the frontage of the project along Villa St. A two-level subterranean parking garage, on-grade parking, and 226 bicycle parking stalls would also be included in the project. The proposed project would have a max height of approx. 117 ft, including rooftop amenities. The project site would include dedication for a potential future multi-use trail along the west side of the site, which may connect to neighborhoods north of Central Expressway via a tunnel under the Expressway and railroad tracks as well as other off-site improvements. 2015121012	Property Specific Requests General Plan Amendment San Diego County --San Diego Note: Review Per Lead The proposed project is a GPA to the current San Diego County General Plan, adopted on August 3, 2011. The proposed project GPA includes revisions to the General Plan land use map and zoning use regulations (when necessary for consistency with the proposed General Plan land use designation) for applicable CCPAs and Subregions. The Proposed Project would result in revisions to the adopted General Plan and use and zoning designations on private properties, identified in this document as PSRs. Most of the PSR Analysis Areas include a study area (also included in proposed changes) around the PSR properties to prevent an "island" of potentially incompatible land use and zoning designations adjacent to and in the vicinity of some PSRs.	SIR	02/12/2018
1997062089	General Plan Land Use and Transportation Element Oakland, City of Oakland--Alameda the project is the excavation and proper off-site disposal of soil impacted by heavy metals (lead, arsenic, antimony, and cobalt) and carcinogenic polycyclic aromatic hydrocarbons (PAHs). The project includes limited excavation of approx. 2,700 cubic yards of contaminated soil, filling with clean soil, capping, and implementation of institutional controls in the form of a land use covenant (LUC). The project is described in a Removal Action Workplan (RAW) submitted by Iris Environmental, dba RPS, on behalf of Lighthouse Community Public Schools on September 1, 2017. DTSC's approval of the RAW is undertaken pursuant to the regulatory authority granted under Ch. 6.8, Division 20 of the Health and Safety Code. The purpose of the RAW is to mitigate potential risk to human health and the environment by the contaminants of Concern in soil at the 701-735 105th Site (Site). The project applicant, Lighthouse Community Public Schools, is proposing to establish a kindergarten through 12th grade (K-12) charter school on a 3.9-acre parcel that is currently being used as a Bible College and theological seminary.	NOD	
2003091012	Village 2 Comprehensive SPA Plan Amendment Chula Vista, City of Chula Vista--San Diego The SDWQCB has approved Waste Discharge Requirements Order No. R9-2017-0179) authorizing the Project. The applicant proposes to develop 251.6 acres of land to include housing, industrial land, public facilities, and infrastructure improvements in the City of Chula Vista, CA. Compensatory mitigation for project impacts from the fill of waters of the State will be provided through re-establishment of stream channel/floodplain and a seasonal pond at the Otay River Restoration Project Site.	NOD	
2007072023	Modesto Master EIR Update and General Plan Amendment Modesto, City of Modesto--Stanislaus Rezone of a vacant 0.89 acre parcel within the Baseline Developed Area of the City's General Plan from Low Density Residential Zone to Planned Development Zone allowing for Professional Office (P-O) Zone uses with dialysis clinic as teh sole allowable medical use, to facilitate development of a new 11,500 sq. ft. office building with 38 spaces of off-street parking. 2017128341	I-110 Net Toll Caltrans #7 Los Angeles, City of--Los Angeles The purpose of this project is to enhance safety and efficiency of the I-110 managed lanes between SR 91 and Adams Blvd through installation of chevron pavement markings, overhead signs, flashing lights, and enhanced pavement delineation.	NOE	
2017128342	Cal Canal Pipeline Integrity Management Repairs Project (Major Amendment No. 1, California Endangered Species Act Incidental Take Permit No. 2081-2016-052-04) Fish & Wildlife #4 --Kern CDFW has issued Incidental Take Permit No. 2081-2016-052-04, pursuant to section 2081 subdivision (b) of the fish and game code to Chevron Pipe Line Company to incidentally take San Joaquin antelope squirrel and San Joaquin kit fox which are listed as threatened, and giant kangaroo rat which is listed as endangered under CESA. Project involves repairing anomalies identified along the Cal Canal Pipeline, an eight in natural gas pipeline. Repairs will occur at 5 locations within a 4.2 mi stretch of the pipeline. Repair activities will include trenching in 4 locations and jack and boring in one location, below hwy 33, to expose and repair the pipeline. The ITP major amendment no. 1 referenced above as issued and initiated by CDFW authorizes the change of condition of approval 6.8 for CDFW to determine the San Joaquin antelope squirrel release method based on the best available info and what is most appropriate for the project and to approve the method through the San Joaquin Antelope squirrel mortality reduction and relocation plan required by ITP condition of approval 5.4. The project proposes to reduce the sediment delivery potential to Rocky Creek and an unnamed tributary by replacing existing encroachments with improved crossings including a bridge. The project is a result of enforcement action by a regulatory agency. There would be no significant adverse impact on endangered, rare or threatened species or their habitat pursuant to section 15065. There are no hazardous materials at or around the project site that may be disturbed or removed. The project will not result in impact that are significant when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects. NOE	
2017128369	City of Davis's Local Ordinance 2512 Energy Commission Davis--Yolo Pursuant to PRC Section 25402.1(h)(2) and section 10-106 of title 24 of the code of regulations, Davis has applied to Energy Commission for a determination that its locally adopted energy efficiency standard, enacted in local ordinance 2512, will require buildings to be designed to consume no more energy than permitted by the energy commission's building energy standards are set forth in title 24, part 6 of code of regulations. The ordinance will require all new single fam res to be 30% more energy efficient and all new multifam dwellings to be 25% more energy efficient that required by the 2016 energy standards. These compliance margins correspond to meeting CALGreen Tier 2 for energy efficiency. The city will require that these targets be met by a combination of additional energy efficiency measures as well as installation of solar PV where solar PV size is determined by the amount which would offset 80% of estimated building electricity use for a combined fuel residence. Consistent with PRC Section 25402.1(h)(2), the energy commission found that the city will require the diminution of energy consumption levels permitted by the 2016 energy standards.	NOE

<u>Documents Received on Friday, December 15, 2017</u>			
2017122044	East Bay Watershed Master Plan Update East Bay Municipal Utility District Orinda--Alameda, Contra Costa Notes: Review Per Lead The EBWMP was first adopted by EBMUD Board of Directors (Board) in 1996. At that time, the board certified a Programmatic Environmental Impact Report that evaluated potential environmental impacts of the EBWMP in accordance with CEQA. EBMUD has prepared an Update to the EBWMP to reflect land management experience and actions taken since the EBWMP adoption, acknowledge changing management challenges, and address public concern regarding pesticide use on watershed lands. In addition, a change in policy is proposed to allow bicycle access to 7.5 miles of trails in Pinole Valley and above San Pablo Reservoir.	Neg	01/29/2018
2017122046	Incidental Take of Tricolored Blackbird During Candidacy Period Regulation Change Fish & Game Commission -- Pursuant to Fish and Game code section 02084, the proposed project would add a new regulation in order to allow take as defined by Fish and Game Code section 86, of tricolored blackbird under limited circumstances, subject to certain terms and conditions, during the species' candidacy under the Fish and Game code, section 2050. Three categories of activities for which incidental take of the tricolored blackbird would be authorized during candidacy are: 1) actions to protect, restore, conserve or enhance habitat; 2) actions to monitor tricolored blackbird breeding colonies; 3) harvest of grain crops under a harvest management program to protect colonies.	Neg	01/16/2018
2012021028	Tujunga Spreading Grounds Enhancement Project Los Angeles, City of Van Nuys--Los Angeles CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0038-R5, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Los Angeles County Flood Control District. Project is limited to the constructing two new sets of diversion gates (proposed as diversion gates Number (No.) 2 and 3 and corresponding intake structures at each gate within Tujunga Wash Channel. the purpose of the project is to increase the intake capacity of the Tujunga spreading grounds by increasing volume of surface water diverted by approx. 4,000 acre feet resulting in annual average amount diverted around 12,200 acre feet of surface water from Tujunga Wash and Pacoima Diversion Channel.	NOD	
2013121025	Royal Recycling and Transfer Facility Paramount, City of Paramount--Los Angeles The new permit will allow for the operation of a Large Volume Transfer/Processing Facility, receipt of pu to 2,450 TPD of mixed municipal solid waste and source-separated recyclable materials on 7.92 acres, receiving materials 7 days a week from 2:00 a.m. to 10:00 p.m., processing and transferring materials 7 days a week, 24 hours a day, and conducting ancillary activities 24 hours a day, 7 days a week.	NOD

2015062092	Sutter Creek Bridge Replacement Project Sutter Creek, City of Sutter Creek--Amador The Central Valley RWQCB is issuing a 401 Water Quality Certification for the subject Project. The project consists of the removal of the current structurally insufficient 3 span bridge and replacement with a 2 span bridge with improvements to bridge access. The project will permanently impact 0.0003 acre/75 linear feet and temporarily impact 0.475 acre/250 linear feet of waters of the U.S.	NOD	
2015102005	Medical Marijuana Land Use Ordinance - Phase IV Humboldt County --Humboldt Project is limited to one encroachment. The encroachment is for water diversion from an unnamed spring that is tributary to Blue Slide Creek. The spring has been impounded with rock and soil, forming a shallow pool approx. 10-12 feet in diameter. Water diverted from a metal pipe that has been inserted into the spring source and then diverted using with 3/4 inch poly pipe to storage as described in the notification. Water is diverted for domestic use. Work for the water diversion will include improvement, use and maintenance of the water diversion infrastructure.	NOD	
2015102005	Medical Marijuana Land Use Ordinance - Phase IV Humboldt County --Humboldt Project is limited to 3 encroachments for water diversion from two separate class 2 springs and one diversion is from an unnamed tributary to North Fork Mingo Creek. Water is diverted for irrigation. Work for the water diversion will include use and maintenance of the water diversion infrastructure.	NOD	
2016032040	Proposed Strategy for Achieving California's 2030 Greenhouse Gas Target Air Resources Board -- The 2017 Climate Change Scoping Plan Update (Update) describes the State's proposed strategy for achieving CA 2030 greenhouse gas target pursuant to Senate Bill 32, Assembly Bill 197, and Assembly Bill 398. The strategy includes extending the Cap-and-Trade program post-2020, implementation of the Short-Lived Climate Pollutant Plan and Mobile Source Strategy, and increasing renewable energy generation and improving energy efficiency end use. This is the last of three Board hearings on this item.	NOD	
2016061038	Lakewood Stormwater and Runoff Capture Project at Bolivar Park Lakewood, City of Lakewood--Los Angeles The City of Lakewood is one of several southeast Los Angeles cities located within the Los Cerritos Channel Watershed, which is a largely built-out, urbanized watershed of approximately 17,711 acres in the Los Cerritos and Alamitos Bay Watershed Management Area. As a permittee under the NPDES (National Pollutant Discharge Elimination System) Municipal Permit, the City must demonstrate that pollutant discharges from the watershed comply with applicable water quality goals, including Total Maximum Daily Loads, of the NPDES Permit. The proposed project located at Mayfair Park would result in the design and construction of a facility to divert water from one of two major flood control channels (Del Amo Channel) to fulfill its dual purpose of promoting water filtration	NOD

	and irrigation. This project is being implemented by the City of Lakewood to incrementally meet its TMDL compliance and augmenting its local water supplies by using non-potable runoff water for irrigation.		
2016072028	Collecting Canal Maintenance Project Water Resources, Department of --Sutter Bridge maintenance on collecting canal bridges CC-2 and CC-4 including sediment removal, bridge repair and maintenance, and placement of revetment.	NOD	
2016101041	Cowan Heights Residential Development Project Orange County --Orange The EIR analyzed the development of a 6.03 acre parcel with a planned (unit) development of single family detached dwellings, requiring a Zone Change (ZC 16-04) from AR-20000 "Agricultural Residential" District with a 10,000 sq. ft. minimum building site area with a Planned Development overlay with a 10,000 sq. ft. average building site area. The associated Use Permit (PA160051) and Vesting Tentative Tract Map 18602 to establish the proposed project's land use configuration and development standards for the planned development was assessed by the EIR but has not yet been approved by the County of Orange.	NOD	
2016112030	Maine Prairie Water District - Ulatis Creek Pump Stations Maine Prairie Water District Dixon--Solano The Central Valley RWQCB is issuing a 401 Water Quality Certification for the subject Project. The Project consists of the installation of a pump station at the northwest intersection of Hwy 113 and Fry Road. The pump station would have a footprint of 760 sq. ft. and 30 feet per second conveyance capacity. The project will permanently impact 0.0072 acre/25 linear feet and temporarily impact 0.02 acre/50 linear feet of waters of the United States.	NOD	
2017041077	North Norco Channel Line NB, Stage 3 Project Riverside County Flood Control and Water Conservation Norco--Riverside The District proposes to construct, operate and maintain the North Norco Channel Line NB, Stage 3 Project (Project). The Project will replace the previously constructed earthen channel with a concrete-lined trapezoidal and rectangular channel that would convey the 100-year flow rate capacity. The channel would continue to convey stormwater runoff from the existing upstream Line NB and outlet into the existing concrete-lined North Norco Channel. A previous concrete block system invert will be used for water quality purposes at the western end of the channel and just upstream of the North Norco Channel. In addition, existing concrete culverts will be reconstructed across Valley View Avenue and Sierra Avenue. Storm drain lines, inlets, and catch basins would also be constructed/reconstructed on Sierra Avenue, Fortuna Road, Valley View Avenue, and Gallop Lane. The project may involve the acquisition of a property easement and utility relocations.	NOD	
2017081036	Murrieta Senior Living Facility (Planning Case # DP-2017-1333 & CUP-201701334) Murrieta, City of Murrieta--Riverside Project consists of the construction of an approx. 97,275 sq. ft. assisted living facility on a currently undeveloped and vacant site. The project also includes the	NOD

<u>Documents Received on Friday, December 15, 2017</u>			
	construction of onsite parking, drainage, and all related appurtenances. Project site grading will result in a raw cut and raw fill of approx. 49.899 cubic yards. The entire 7.0 acre project site will be graded.		
2017101049	Laguna Beach Village Entrance Laguna Beach, City of Laguna Beach--Orange As a primary entryway and gateway into the city of Laguna Beach, the city proposes improvements at and surrounding Laguna Canyon Road, Forest Avenue, and city hall to beautify the project area, enhance pedestrian connectivity, and reconfigure parking. The project has been designed to be a pedestrian-oriented area that links the art festival activity areas to the downtown village and Main Beach. The proposed project can generally be categorized by the following primary components: 1) parking facilities; 2) landscape/aesthetic enhancements; 3) multi-purpose pathway; and 4) center median improvements along Laguna Canyon Road.	NOD	
2017102036	Tank 1 and Roseburg Water System Improvements Project Mount Shasta, City of Mount Shasta--Siskiyou Project includes replacement of a water tank (Tank 1) on Quail Hill with a larger tank; improvements to the Pressure Reducing Valve (PRV) station on McCloud Avenue; replacement of approx. 7,500 feet of water mains within the Roseburg water system; and installation of approx. 1,000 feet of 12-inch water main in a segment of McCloud Avenue. Tank 1, constructed in 1927, has far exceeded its useful life and requires replacement in order to mitigate public health risk. The City also has a storage deficit, and a larger tank is needed to meet current Waterworks Standards and provide maximum fire storage. Improvements to the PRV Station would give the City the ability to shut the supply line off remotely through their SCADA system. Periodically shutting off the supply line will force the Quail Hill Tanks to act as the sole supply to the City, which will cause water levels to drop and promote tank turnover to maintain water quality. Water main improvements are needed to resolve chronic low water pressure and provide adequate fire flows.	NOD	
2017102054	EA 2017-0011 (Hallwood Side Channel & Floodplain Restoration Project on the Lower Yuba River) Yuba County --Yuba The 165-acre Hallwood Side Channel and Floodplain Restoration Project will reclaim the currently disconnected floodplain, rehabilitate side channels through the floodplain, reduce channel confinement, restore riparian vegetation, place large woody debris in the channel to provide cover from high flow velocities and predators for juvenile salmonids, and enhance rearing habitat by removing approx. 3.1 million cubic yards of mining era sediment and placing approx. 122 thousand cubic yards of river rock and woody debris.	NOD	
2017112010	8th and R Street Parking Structure Capitol Area Development Authority --Sacramento The project would demolish the existing warehouse and surface parking and would construct a new seven-level, 265,000 sf parking structure, standing approx 75 ft tall. The double bay parking structure would face R St, providing an estimated 800-850 total spaces. The structure would span the entire length of the block	NOD

	between 8th and 9th St with the footprint extending to Quill Alley. The parking structure would primarily serve existing State office buildings in the downtown area. However, systems would be established for public parking during non-business hours and possibly during business hours. The project would include approx 13,000 sf of ground-level retail fronting R St.		
2016108144	Peabody Creek Restoration and Stormwater Management Project Grass Valley, City of Grass Valley--Nevada The Central Valley Regional Water Quality Control Board is issuing a 401 Water Quality Certification for the subject Project. The Project includes reconnecting Peabody Creek with its historic flood plain, installing two culverts, and restoring the floodplain to its historic condition.	NOE	
2017128064	GSWC Clear Lake Lakeshore Plant Pier Restoration (Lake or Streambed Alteration Agreement No. 1600-2017-0283-R2) Fish & Wildlife #2 Clearlake--Lake CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0283-R2, pursuant to Section 1602 of the Fish and Game Code to the Golden State Water Company, as represented by Thomas Whalen. Project is limited to the replacement of an existing dock on Clear Lake. the existing structure is approx. 6 feet wide and 160 feet long. The only project activity will impact the lake bed is installation of new piles. 28 new (12-inch diameter) hollow metal piles will be driven around the perimeter of the existing pier. New framing for the pier will then be installed above the water line, old framing and decking for the existing pier will be removed, and new decking for the pier will then be installed. The project will be constructed from a barge and pile driving equipment.	NOE	
2017128314	Sustainable Shared Mobility - Sacramento Energy Commission Sacramento--Sacramento The grant recipient will install 15 Level 2 Plug-in Electric Vehicle (PEV) charging stations throughout multiple affordable housing projects in the Sacramento Metro and North San Joaquin area. The installation of new PEV chargers will benefit PEV drivers in the region by increasing their range confidence. The transportation sector is the biggest contributor to California's GHG emissions and accounts for approximately 40 percent of these emissions. As documented throughout numerous California policy and regulatory materials, increased use of zero-emissions. As documented throughout numerous California policy and regulatory materials, increased use of zero-emission vehicles (ZEV) provide multiple benefits in addition to reducing GHG emissions, such as reducing conventional pollutants, operating quietly and cleanly, allowing home refueling and lowering operating fuel costs. As such, California Governor's Executive Order B-16-2012 orders that the California Air Resources Board, the California Energy Commission, the Public Utilities Commission and other relevant agencies work with the Plug-in Electric Vehicle Collaborative and the California Fuel Cell Partnership to achieve, among other benchmarks.
