

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

February 16 – 28, 2017

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **February 16 – 28, 2017**.

STATE CLEARINGHOUSE CONTACTS

Please contact the State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
E-mail: state.clearinghouse@opr.ca.gov
Website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown via email**.

STATE CLEARINGHOUSE MAILING ADDRESS

USPS: State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries: State Clearinghouse
1400 Tenth Street, Room 113

<u>Documents Received on Thursday, February 16, 2017</u>			
2017022049	Use Permit Application No. PLN2017-0015 - Verizon Wireless - Orchard Road Stanislaus County Oakdale--Stanislaus Request to install a wireless communication facility within a 900 sf lease area on a 31.92+/- acre parcel, in the A-2-40 (Gen ag) zoning district. The gated facility will include an 84 ft tall monopole as well as accompanying wireless equipment. The applicant will also install a 15 ft gravel driveway to access the site from Brady Road.	CON	03/08/2017
2016021025	Jurupa Valley 2017 General Plan Programmatic Environmental Impact Report Jurupa Valley, City of Jurupa Valley--Riverside Programmatic EIR developed to support adoption of city of Jurupa Valley 2017 GP prepared for the following GP Elements: Land use, mobility, conservation and open space, housing, air quality, noise, community safety, facilities, and services, environmental justice, healthy communities, and economic sustainability. The GP is supported by technical studies on traffic and circulation, demographics and housing, noise and vibration, land use, air quality, and GHG. The GP EIR addresses the key environmental issues as noted above.	EIR	04/03/2017
2016082067	Washington District Sustainable Community Infrastructure Project West Sacramento, City of West Sacramento--Yolo The objective of this project is to add or improve the pedestrian, bicycle, and streetscape amenities/associated street furniture along several of the key roadways within the Washington District of the City of West Sacramento. The above ground utilities along these roadways would be placed underground, and new street lighting would be installed to improve the aesthetics and safety of the neighborhood. Sidewalks improvements, new bike lanes, and mid-block pedestrian crossings would be added. Care would be taken that the new sidewalks, curb ramps, and crosswalks are ADA compliant. New sewer lines would be placed alongside existing sewer lines. Storm drain pipelines would be placed along existing pipelines. Water main rehabilitation and upgrades would be placed alongside existing water mains.	FIN	
2017021037	Oppenheimer Pavilion and Agricultural Event Center Project California State Polytechnic University, San Luis Obispo San Luis Obispo--San Luis Obispo The project proposes improvements to the equine center, environmental horticultural sciences, beef unit, and crops unit areas on campus through a phased project approach. Proposed project components include demolition of existing structures, upgrades to existing structures, as well as the development of new facilities, including a new agricultural event center. The project also includes associated improvements such as utilities, detention basins for surface water control, landscaping, and access roads for circulation. The project consists of four project phases: phase 1 (equestrian pavilion, foaling barn, stallion barn), phase 2 (equestrian pavilion, animal health center, new storage building), phase 3 (ag event center), and phase 4 (crop sciences). <u>Documents Received on Thursday, February 16, 2017</u>			
2017021054	Tractor Supply, Valley Center San Diego County --San Diego The project is a major use permit for open enclosure in the C36 general commercial use regulations, as required by section 6816 of the county of San Diego zoning ordinance. The project consists of an 18,825 sf building that will provide supplies to commercial businesses and the general public with agriculturally related products, such as animal feed, tools, etc.	MND	03/17/2017
2017021055	General Plan Amendment - Land Use Change for 12199 15th Street Yucaipa, City of Yucaipa--San Bernardino An amendment to the city of Yucaipa General Plan to change the land use designation of a single 1.12 acre property at 12199 15th Street from the city's general commercial land use designation to multiple residential.	MND	03/17/2017
2017021056	Puente Hills Mall Expansion Project Industry, City of Industry--Los Angeles The proposed project involves the expansion and renovation of the existing Puente Hills Mall, consisting of a net increase of approx. 80,000 sf of commercial building space, increasing the center's total building size to 1,415,210 sf. The proposed expansion would result in the addition of approx. 32,538 sf to the west side of the mall by way of four new buildings titled Pad 1, Pad 2, Mall 1A, and Mall 1B, and approx 47,452 sf to the east side of the mall by way of four new buildings, titled Major 1, Shops 1, Shops 2, and Shops 3, all provided in gross leasable area and focused on retail, entry point, and restaurant space. The proposed project would add approx. 32,000 sf of retail space (40% of the new floor area) and 48,000 sf of restaurant/market space (60 % of proposed floor area).	MND	03/17/2017
2017021057	3311 East Willow Street Adult Day Care Long Beach, City of Long Beach--Los Angeles The project includes remodeling of the existing building located at 3311 East Willow St and reorganization of the parking lot. The building was previously used as a physical therapy center and is proposed to be utilized as an adult day care facility. The proposed project would remodel the exterior and interior of the building while leaving the exterior structure intact. Building square footage would remain 3,960 sf. The existing lot would be repaved and restriped to allow for fourteen parking spaces, including one van accessible parking space. The applicant plans to install new parking lot lighting and upgrade current electrical panels.	MND	03/17/2017
2017022053	967 Warburton Avenue Residential Project Santa Clara, City of Santa Clara--Santa Clara The project proposes to construct four, two-story single family residences with attached garages. An additional detached garage would be constructed to provide covered parking for the existing single-family residence on that site, which would remain. The site would be rezoned to a planned development zoning district and subdivided into six lots (five residential lots and one common lot for a shared driveway) as part of the project. Landscaping, fencing, paving, and other associated improvements would also be constructed.	MND	03/17/2017

2017022050	Downtown Recovery Plan Amendments Santa Cruz, City of Santa Cruz--Santa Cruz The project application consists of a series of amendments to the city's DRP, the GP 2030, and the LCP that include revisions to plan text, modifications to guidelines and standards, and changes to coastal policies. The proposed DRP amendment would expand the location in which the Additional Height Zones are applied and revisions to the chapter 4 development standards of the DRP. The primary proposed modification would increase allowable building heights in the lower Pacific Ave and lower Front St areas and along the San Lorenzo River, between Cathcart and Laurel St, that could lead to increased upper floor residential development.	NOP	03/17/2017
2017022052	Commercial Cannabis Regulations and Licensing Program for Cultivation and Manufacturing Santa Cruz County --Santa Cruz The project involves adoption of regulations and policies that license and regulate cannabis and manufacturing within select zoning districts county wide. The regulations include a licensing ordinance and zoning ordinance amendments, as well as possible general plan/local coastal program amendments. Under the proposed project, the regulations would specify that cultivation may occur in commercial ag, ag, commercial, industrial, timber production, residential ag and special use zoning districts, subject to control on the size of parcel, amount of cannabis grown, and setbacks to various features.	NOP	03/17/2017
2017022054	2017 Update to the Contra Costa Countywide Comprehensive Transportation Plan Contra Costa Transportation Authority --Contra Costa The 2017 CTP will be the fourth major CTP update. Similar to the 2009 CTP, the 2017 CTP will update the demographic, economic, and transportation trends in the project area, and refine the vision, goals and strategies of the Authority regarding transportation and growth management. The 2017 CTP will also include recommended updates to the five sub-regional Actions Plans, including changes to designated routes of regional significance, and new or revised MTSOs. The 2017 CTP will incorporate an updated CTPL, as well as financially-constrained list of projects.	NOP	03/17/2017
2017022051	USFS GPA/Rezone (PLN16-0084; GPA16-0001; RZN16-0001; EIS16-0003) Nevada County Truckee, Nevada City--Nevada Proposed general plan land use map amendments and zoning district map amendments for 19 US Forest Service owned parcels that are part of the Tahoe National Forest and located in various areas throughout unincorporated Nevada County. The project is a proposal to change the existing primary land use designation and corresponding zoning of 18 specific parcels currently zoned AG, and one parcel currently zoned RA, to the FR base zone district for all 19 project parcels. The project is a GPA/Rezone only and does not include any new construction activity or development proposal.	Neg	03/17/2017

2007052073	Emerson Property Project Oakley, City of Oakley--Contra Costa Design Review approval of one neighborhood, known as "Laurel", within the Emerson Ranch Subdivision. The Applicant has resubmitted house plans for the Laurel neighborhood, which is made up of 117 lots of approx. 5,000 sf. The newly proposed homes will result in slightly larger floor plans than what was previously approved for the neighborhood. The four home plans will range from 2,228 sf. to 3,595 sf. of livable area, and include on single-story and three two-story homes. The project is zoned P-1 (Planned Development).	NOD	
2010102018	Village 1 Specific Plan Lincoln, City of Lincoln--Placer CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0130-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, City of Lincoln. Project is limited to the extension of the existing culvert, placement of a new culvert, installation of two utility pipes (for water and sewer), widening of the road (Oak Tree Lane), removal of riparian trees, and replanting of native trees on North Ingram Slough. The project will remove all vegetation within the limit of work around the existing crossing. The existing 48-inch culvert will be extended to the new limits of the widened Oak Tree Lane. The total new length of the existing 48-inch culvert will be approx. 112 feet after construction. A new 12'x5' arch pipe culvert will be installed and backfilled with structural fill. The upstream and downstream end of the new culvert, as well as existing 48-inch extended culvert will be provided with a concrete headwall and rip-rap to prevent scour. Two trenches will be excavated in the location of the rip rap to accommodate the installation of two pipes, one for a waterline and the other for a sewer line. Both utility lines will be backfilled and compacted with engineered soil and topped with rip rap to ensure that they are not exposed in the future. Once construction of the new Oak Tree Lane is completed, revegetation and bank stabilization will occur. All work is anticipated to be completed while the drainage is dry and stabilization and revegetation will occur before the drainage becomes inundated.	NOD	
2014011069	Lincoln Specific Plan Whittier, City of Whittier--Los Angeles On June 25, 2015, the City Council adopted Resolution No. 8702 which certified the FEIR for the Lincoln Specific Plan and its associated entitlements (Tentative Tract Map and Development Agreement) for the development of 750 residential units, construction of roads and infrastructure, up to 208,300 sq. ft. of commercial uses. The FEIR fully analyzed the impacts of the project and the City Council made findings and approved a statement of overriding consideration. In implementing the Lincoln Specific Plan, on Jan. 24, 2017, the Whittier City Council adopted Resolution No. 8840, approving Development Review No. DRP15-120 which included a landscape framework plan; signage program; residential style and features of the 750 residential units; a commercial development package consisting of a range of approx. 158,213 to 158,913 sq. ft. of commercial uses; and on-site infrastructure of the Lincoln Specific Plan. 2017028382	Storm Drain Improvements Project FY16-17 Rancho Palos Verdes, City of Rancho Palos Verdes--Los Angeles The general items of work include the reconstruction or upgrade of existing storm drains. The work to be done shall include furnishing all material, equipment, tools, labor, and incidentals as required by the Plans, Specifications, and Contract Documents, in the City of RPV, CA.	NOE	
2017028383	Update of Waste Discharge Requirements for the Keller Canyon Landfill Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland Pittsburg--Contra Costa Adoption of Waste Discharge Requirements.	NOE	
2017028384	Issuance of Streambed Alteration Agreement No. 1600-2016-0384-R1, East Side Calpella Road Culvert Replacement Project Fish & Wildlife #1E --Mendocino The project includes one encroachment and is limited to replacement of an existing 30-in diameter corrugated metal culvert (CMP), with a new corrugated metal pipe arch design with dimensions 29"x42"x40'. No trees are proposed to be removed as part of the project and work will occur when the affected stream channel sections are dry.	NOE	
2017028385	Maissen/Kellar Water Diversion Project (Lake or Streambed Alteration Agreement No. 1600-2016-0353-R1) Fish & Wildlife #1E --Humboldt CDFW has executed lake and streambed alteration agreement no. 1600-2016-0353-R1, pursuant to section 1602 of the fish and game code to Mr. Sean Maissen and Ms. Rachel Kellar. The project is limited to one encroachment for water diversion. A class II stream is diverted for domestic use and irrigation. Work for the project includes removal of the current diversion structure, re-installation of a less intrusive structure, use, and maintenance.	NOE	
2017028386	Neill Water Diversion, Stream Crossings, and Stream Remediation Project (Lake or Streambed Alteration Agreement No. 1600-2016-0531-R1) Fish & Wildlife #1E --Humboldt CDFW has executed lake and streambed alteration agreement no. 1600-2016-0531-R1, pursuant to section 1602 of the fish and game code to Mr. John Neill. The project is limited to five encroachments. One encroachment is for water diversion form unnamed tributary to Tank Gulch and Redwood Creek. Water is diverted for domestic use and irrigation. Work for the water diversion will include installation, use, and maintenance of the water diversion infrastructure. The four other proposed encroachments are to improve road/stream crossings, to abandon an unused road, and to remediate a channel disturbed by illegal grading. Work for these encroachments will include excavation including a remediated channel, removal of a failing culvert, replacement with a new properly sized culvert, backfilling and compaction of fill, rock armoring as necessary to minimize erosion, and revegetation. <u>Documents Received on Friday, February 17, 2017</u>			
2016041051	<p>Addendum No. 1 to the Fontana Water Company Recycled Water Improvement Project Inland Empire Utilities Agency Fontana--San Bernardino</p> <p>San Gabriel Valley Water Company is a privately owned water company that provides water service to customers located within its Fontana Water Company division service area, which includes the City of Fontana and some unincorporated areas in the immediate vicinity. The FWC provides this water service pursuant to the regulatory jurisdiction of the Public Utilities Commission of the State of CA (CPUC). As a public utility water company, FWC is mandated to provide its customers a reliable supply of water that complies with state and federal safe drinking water standards. As a non-governmental entity SFVWC is not subject to CEQA unless its actions involve governmental participation, financing, discretionary permitting or approval. IEUA has agreed to serve as the CEQA lead agency for this project as it will deliver IEUA recycled water to FWC that will be used to offset existing potable water demand within FWC's service area.</p> <p>The proposed project includes the expanded delivery of recycled water produced by IEUA Water Reclamation Facilities to FWC at its Regional Plant No. 3 recharge basin location. FWC proposes to install a reservoir, pump station, and recycled water delivery pipelines; most of the proposed pipelines have already been installed, though some yard piping is needed. The purpose of the proposed RP-3 improvements is to increase the Agency's program to max the beneficial reuse of recycled water to reduce dependence on imported water to replace use of potable water for landscape irrigation by using recycled water.</p> <p>Prior to adopting the MND for the FWC Recycled Water Improvement Project, FWC notified IEUA that it was making minor modifications to the project. Specifically, a second reservoir (0.53 million gallons of storage), possible 4,000 gallon hydropneumatic tank and additional piping have been added to the project. Based on this project modification, a decision was made to recirculate the Initial Study to address this site modification at IEUA's RP-3 location.</p> <p>This addendum is being prepared in response to FWC's need to revise the location of the facilities planned within RP-3. Additionally, FWC seeks to reduce the number of reservoirs from two reservoirs to one 0.53 MG reservoir, and will enclose the booster pump station to attenuate noise. The proposed project modifications are in response to IEUA's plans to utilize the land upon which the project facilities were originally planned to be constructed. The reduction in reservoirs from two reservoirs to one is a response to the lack of need for an additional reservoir at this time, and the addition of the booster pump system enclosure is due to the need to attenuate noise because of the closer proximity to the habitat conservation basin and adjacent residences.</p>	ADM	03/03/2017
2014061017	<p>San Joaquin River Conservancy River West Fresno, Eaton Trail Extension Project San Joaquin River Conservancy Fresno--Fresno Note: Review Per Lead</p> <p>The Conservancy proposes to extend the existing Lewis S. Eaton Trail by constructing a multipurpose trail with ancillary recreation support features. The trail would be extended approx. 2.4 miles, from the Perrin Ave alignment near SR 41 on the east to Spano Park on the west. The proposed trail would be about 22 feet</p>	EIR	04/17/2017

	wide, with a 12-ft wide paved surface, a parallel 8-ft wide hard natural surface for equestrian use, and a 2-ft shoulder (opposite the natural surface area) and generally would proceed from SR 41 to a point below the Spano Park overlook. A parking lot (Perrin Ave parking lot) for 50 vehicles with a controlled vehicle entrance would be constructed adjacent to SR 41. Vehicle access to the parking lot would be at the Perrin Ave undercrossing of SR 41.		
2015101075	Southeast Area Specific Plan Long Beach, City of Long Beach--Los Angeles Note: Recirculated	EIR	04/03/2017
	The project consists of a specific plan, general plan amendment, zoning ordinance amendment, and local coastal program amendment to shape the land use and development on 1,481 acres. The project consists of two components: 1) the Southeast Area specific plan covering 1,472 acres and 2) the conventional zoning area covering 9 acres. Both of these areas constitute the project for purposes of CEQA.		
2016062046	2017 Clean Air Plan/Regional Climate Protection Strategy Bay Area Air Quality Management District --Contra Costa, Alameda, Marin, San Francisco, San Mateo, ... The 2017 Clean Air Plan/Regional Climate Protection Strategy will be a roadmap for the Air District's efforts over the next few years to reduce air pollution and protect public health and the global climate. The 2017 Plan is required by the California Clean Air Act to identify potential rules, control measures, and strategies for the Bay Area to implement in order to meet state standards for ozone. The CAP update will include the Bay Area's first comprehensive Regional Climate Protection Strategy, which will identify potential rules, control measures, and strategies that the Air District can pursue to reduce greenhouse gases in the Bay Area. The proposed 2017 Plan provides a strategy for reducing emissions of ozone precursors, greenhouse gases, particulate matter, and/or toxic air contaminants in the Bay Area.	EIR	04/03/2017
2005081071	Chiquita Canyon Landfill Los Angeles County --Los Angeles Note: Review Per Lead	FIN	
	The project is an existing previously permitted landfill requesting continued operation and expansion. The project includes the following elements: development of a new entrance and support facilities; better utilization of the landfill's potential disposal capacity through a lateral extension of the existing waste footprint and increased maximum elevation; increased daily disposal limits; acceptance of all nonhazardous waste permitted at a Class III solid waste disposal landfill, exclusive of sludge; continued operation of the landfill; new design features; environmental monitoring; development of a Household Hazardous Waste Facility; mixed organics processing/composting operation; and set aside of land for potential future conversion technology. In addition, the proposed project includes the relocation of a portion of Southern California Edison's existing Saugus-Elizabeth Lake-Fillmore 66 kV Subtransmission Line in order to accommodate landfill improvements.

<u>Documents Received on Friday, February 17, 2017</u>			
	<p>available for the new W-7 and W-8 wastewater treatment tanks, it is necessary to remove and replace an operating filter press (FP-#2) with a new, similarly designed filter press, designated FP-#2A. Design details for tanks W-7 and W-8, the new tank containment area, container pumping station, and filter press FP-#2A were included in the Class 2 Permit Modification submittal. When tanks W-7 and W-8 become operational, tanks W-1 and W-2 will be simultaneously shut down so that there will be no change in operational capacity.</p> <p>For the proposed replacement of waste water treatment tanks W-3 and W-4 with J-6 and J-7, the new tanks J-6 and J-7 will be constructed and Tanks W-3 and W-4 will be closed. Tanks W-3 and W-4 and the Filter Press FP-#2 currently operate under a 1988 variance issued from the Dept. of Health Services (DTSC's predecessor). They are located adjacent to the Pond 1 containment area. The former Pond 1 area is currently used for W-1 and W-2. When Pond 1 closure commences, soil will be excavated up to about 12 feet below the base of tanks W-3 and W-4. Removing these tanks prior to the excavation associated with Pond 1 closure will increase safety during excavation and associated closure activities. Prior to removal of Tanks W-3 and W-4, new tanks J-6 and J-7, each with the same capacity (12,500 gallons) as tanks W-3 and W-4, will be installed in a new J containment area. Design details for Tanks J-6 and J-7 and the containment area are provided as part of the Class 2 permit modification request. Once Tanks J-6 and J-7 become tanks W-7 and W-8, are operational, the Facility will be able to initiate Pond 1 closure. When tanks J-6 and J-7 become operational, tanks W-3 and W-4 will be simultaneously shut down so that there will be no change in operational capacity.</p> <p>Modifications are also requested for increasing the physical size of two existing container storage areas, CS-1 and CS-2, without changing the currently authorized storage capacity in Permit No. 91-3-TS-002. PTI submitted this Class 2 Permit modification request to provide a minimum of 30-inch aisle space, rather than the current 24 inches. In addition, the expanded CS-1 area is adjacent to the new J-area, and it would be preferable to modify CS-1 concurrently with the new J-area construction for replacing Tanks W-3 and W-4. As the closure of Pond 1 is a priority, work to expand the surface area of the containment areas will be scheduled so as not to delay the implementation of installing new tanks and associated tank containment areas for W-7, W-8, J-6, and J-7 and for initiating Pond 1 closure.</p>		
2001032053	<p>Occidental CSD Water Project Occidental County Sanitation District --Sonoma</p> <p>CDFW has executed Lake and Streambed Alteration Agreement NO. 1600-2016-0223-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Resource Conservation District of Sonoma County.</p> <p>The proposed project includes the diversion of water from a Point of Diversion (POD) near the confluence of Dutch Bill Creek and the mainstream Russian River at Monte Rio in Sonoma County. The water is intended to supply the community of Occidental which is located at the intersection of Bohemian Road and Graton Road in the Upper Dutch Bill Creek watershed. Occidental Community Services District (OCS D) will obtain its supply of water from the underflow of the Russian River under its water right (Application #31257, Permit #21214).</p>	NOD

2003021141	Addendum to FEIR 584 and FEIR 589, Trampas Canyon Dam and Reservoir Project Orange County --Orange SMWD is proposing to reconstruct a recycled water storage reservoir, an earth fill dam, a new pump station; relocate the emergency spillway; and to construct access roads. The SMWD proposes to acquire and reconstruct the Trampas Canyon Dam and Reservoir to increase the available recycled water storage capacity. The Project would involve reconstruction of the existing dam and additional grading activities to allow for 5,000 acre feet of recycled water storage. The proposed reservoir is intended to provide seasonal and operational storage for recycled water to meet demands for nondomestic water in South Orange County within SMWD's service area.	NOD	
2006061140	South Subregion Natural Community Conservation Plan / Master Streambed Alteration Agreement / Habitat Conservation Plan Orange County --Orange SMWD is proposing to reconstruct a recycled water storage reservoir, an earth fill dam, a new pump station; relocate the emergency spillway; and to construct access roads. The SMWD proposes to acquire and reconstruct the Trampas Canyon Dam and Reservoir to increase the available recycled water storage capacity. The Project would involve reconstruction of the existing dam and additional grading activities to allow for 5,000 acre feet of recycled water storage. The proposed reservoir is intended to provide seasonal and operational storage for recycled water to meet demands for nondomestic water in South Orange County within SMWD's service area.	NOD	
2007052146	Water Recycling Expansion Program Petaluma, City of Petaluma--Sonoma The City of Petaluma filed wastewater change petition WW0094 to implement components of its Water Recycling Expansion Program. The petition requests authorization to reduce the amount of wastewater discharged from Ellis Creek Recycling Facility in Sonoma County from Oct. 21 to April 30 of the succeeding year. The proposed change would decrease discharge to the Petaluma River by 98.9 acre-feet per year for landscaping irrigation use within 9,292 acres of the City of Petaluma.	NOD	
2014091072	Bernardo Shores Imperial Beach, City of Imperial Beach--San Diego San Diego RWQCB is issuing a Clean Water Act Section 401 water quality certification (Cert. No. R9-2016-0073) to the project applicant. The applicant proposes to construct a Class I bike path that is 1,330 linear-foot by 8 foot wide with a 1 foot shoulder on each side to connect SR 75 to the San Diego Bayshore Bikeway.	NOD	
2015061085	Valley Corridor Specific Plan San Bernardino County Fontana, Rialto--San Bernardino General Plan Amendment to add the Valley Corridor Specific Plan to the Land Use Element. The plan provides the foundation for a move vibrant corridor that offers employment and retail opportunities surrounded by a more walkable, safe, and	NOD

	attractive environment. The Plan introduces changes to approx. 294 acres of parcelized land and a little over 60 acres of ROW. Buildout of the Plan could ultimately support a total of 1,093 residential units, 4,073 residents, 1,882,428 sf of nonresidential building space and 1,890 jobs in the plan area. This would represent an additional 568 dwelling units, 1,857 new residents, 907,319 sq. ft. of additional nonresidential building space, and approx. 1,413 new jobs in the plan area compared to existing conditions.		
2016111015	Hemet-Ryan Airport Land Use Compatibility Plan (Hemet ALUCP) Riverside County Airport Land Use Commission Hemet--Riverside The proposed project is the RCALUC's adoption of an ALUCP that would be applicable to the environs of Hemet-Ryan Airport. The proposed ALUCP includes "Additional Compatibility Policies" tailored specifically to the Airport's land use environs and reflects the Commission's efforts to develop an ALUCP that fully satisfies the objectives of the State Aeronautics Act and addresses local concerns. The ALUCP establishes policies for determining the consistency of future, proposed development projects within the Hemet-Ryan Airport Influence Area with the objective of protecting public health, safety, and welfare, as set forth in the State Aeronautics Act.	NOD	
2016078177	Santa Rosa Water Reclamation Facility Rehabilitation Project; Rancho California Water District Project Nos. PG 180 & PG187 Santa Rosa, City of Murrieta--Riverside To meet current and future demands for wastewater treatment, and to ensure the operational viability of the Santa Rosa Water Reclamation Facility, the project proposes to rehabilitate and replace components in four different unit process areas; preliminary treatment, secondary treatment, tertiary treatment, and solids handling. The proposed rehabilitation and replacement efforts were developed based on meeting the design criteria as it relates to flow and influent characteristics, operational efficiency of existing treatment processes, effluent quality, and hydraulics.	NOE	
2017028398	Source Capacity and Treatment Project Lower Lake County Waterworks District Number 1 --Lake Lower Lake County Waterworks District No. 1 is applying to the State Water Resources Control Board under its Drinking Water State Revolving Fund to obtain a grant for planning services to conduct a water source capacity and water treatment study and CEQA Review of the project once defined.	NOE	
2017028399	Central Plant Recycled Water Conversion University of California, Irvine Orange--Orange The proposed project would connect the UCI Central Plant to an existing Irvine Ranch Water District recycled water pipeline located in the University Drive by trenching and installing a 12-inch pipeline within California Avenue, Academy Drive, and West Peltason. Improvements would be installed in the UCI Central Plant cooling towers to accommodate the use of recycled water.	NOE

2017028410	LH Erosion Repair Reach 12D to 12E Water Resources, Department of --Kern The work requires filling of minor erosion sites along the primary and secondary roads of California Aqueduct. The purpose is to maintain the integrity and safety of aqueduct access roads to support regular maintenance of the aqueduct as a fully functioning public resource. The work is considered part of annual maintenance. Beneficiaries of the project are DWR and the general public.	NOE	
2017028411	Repair Culvert under Paved Bike Path Parks and Recreation, Department of --Sacramento Repair a 72" culvert in Hinkle Creek located under a section of a paved trail/service road at Negro Bar within Folsom Lake State Recreation Area to provide improved recreational opportunities to park visitors. Work will: Install a 2-ft tall temporary cofferdam in front of the culvert inlet and pump the resultant water to the downstream section of creek to dewater the work area. Saw cut and remove asphalt pavement and road base above the culvert. Excavate 400 cy of slumped soil and other native material from the lower half of the culvert. Remove damaged segment of culvert and detached segment located downstream in channel. Re-grade and stabilize the creek bed and banks with 500 cy of riprap. Install a 63-in x 72-ft long high density polyethylene culvert pipe liner into existing undamaged steel culvert. Use 2-in PVC pipe to pump concrete grout into voids between steel culvert and pipe liner. Fill and compact area above the culvert with 350 cy of re-used native soil and 200 cy of imported soil, to reestablish grade with trail/road. Install asphalt pavement over the section of saw cut paved trail.	NOE	
2017028412	Replace Food Lockers Parks and Recreation, Department of --Shasta Replace 50 food lockers with new, larger bear-proof metal food lockers along the main road campsites #20-38, Upper Loops campsites #39-64 and all Riverside and Environmental Camps at Castle Crags State Park to create a safer environment for park visitors and reduce wildlife dependency on human food. Work will: Remove 50 existing food lockers. Remove 50 existing 40"x28" concrete pads supporting the existing food lockers. Excavate one 22" deep x 12" wide hole for each new food locker. Install a 3" diameter steel pipe in each hole and set and fill with concrete. Use U bolts to attach the 41" tall x 4' wide x 37" deep food locker to the pipe.	NOE

2015-11	Blue Lake Rancheria, California - APN# 400-041-051-000 Bureau of Indian Affairs Blue Lake--Humboldt The subject property is one parcel of land in Humboldt County, California, commonly referred to as the Tribal Property, APN 400-041-051-000, containing 1.37 acres, more or less. The tribe has no change in land use for parcel. The Tribal Property parcel contains two residences and vacant land. The subject parcel is located 13 miles from the Blue Lake Rancheria.	BIA	03/22/2017
2015081034	Avila Ranch Development Project San Luis Obispo, City of San Luis Obispo--San Luis Obispo Note: Recirculation The project involves the adoption of the Avila Ranch development plan, including an amendment to the Airport Area specific plan, a rezone, and related actions to permit a mix of residential uses (68.23 acres), neighborhood commercial (3.34 acres), and open space/park uses (71.30 acres). The project would result in construction of approximately 720 residential units. The project would also include 15,000 sf of leasable neighborhood commercial space concentrated in the eastern portion of the project site in a proposed town center. It is anticipated that the town center would provide small offices, retail shops, and service uses.	EIR	04/06/2017
2015081064	Menifee Valley Campus Master Plan Mt. San Jacinto Community College District Menifee--Riverside The District is proposing to expand the existing Community College facilities. The proposed project would add ~4,398 full time equivalent students. Enrollment is assumed to be balanced at full build-out between daytime and nighttime students (50/50). At full buildout, the MVC would contain 591,161 sf of building area and 3,451 parking spaces. New construction includes math and science, student svcs, performing arts, gym & support facilities, allied health, campus police, student center, and multi-disciplinary instruction buildings, two parking structures, 7,000 seat stadium and field house, practice field, tennis courts, and various related utility improvements including an emergency generator.	EIR	04/06/2017
2016051073	Cypress Ridge Project EIR Temecula, City of Temecula--Riverside Note: Extended Per Lead The applicant proposes to develop a gated for sale residential project, including common areas with recreational facilities and associated infrastructure. The project would require a GPA to change the land use designation from PO to M; and a zoning change from PA to a PDO. The project would consist of a total of 245 residential units on 20.18 net acres. The project's common use areas would include a clubhouse with a spa and a pool, a bocce court, four tot lots, and five picnic areas. Planned storm drainage improvements include converting the concrete lined channel to a more natural infiltration swale. Improvements would also be made to Pala Community Park to be inclusive for children with special needs. Off site landscape improvements north of the project site along Pechanga Parkway will also be included.	EIR	04/17/2017

2009112071	Fort Bragg Coastal Trail Phase I - Glass Beach Stairs Replacement Fort Bragg, City of Fort Bragg--Mendocino Coastal development permit to replace previously removed cable stair access to the Glass Beach of Noyo Headlands Park with a concrete stair set elevated on four sets of pilings. The project will also include construction of a concrete stair with seven sets of pilings at the western terminus of the stairs on the beach.	MND	03/22/2017
2017021065	Coastal Planned Development Permit for Crown Pointe Estates at Malibu Case No. PL16-0004 Ventura County --Ventura The applicant is requesting approval of a coastal planned development permit to grade a 27,900 sf building pad and to construct a six foot high wall, a 725-ft long x 15-ft wide asphalt driveway, and a bio-swale infiltration area. The project is intended to accommodate the construction of a future principal single family dwelling, which will be subject to a separate coastal PD Permit modification. The building pad will be constructed at an elevation of approximately 190 feet. The proposed driveway will be an extension of the existing driveway and will traverse the southwestern portion of the lot. Proposed grading to construct the driveway and the building pad will entail an approx. 50 ft cut slope and a max 60-ft high fill slope. Estimated earthwork includes 18,000 cy of grading (9,000 cy of cut and 9,000 cy of fill). No material will be exported from the site. The project also includes the installation of underground utilities (electrical, telephone and cable) beneath the proposed driveway.	MND	03/22/2017
2017021068	Annexation 2016-02, GPA 2016-10, TSM No. 5557 (Lowery West Annexation) Visalia, City of Visalia--Tulare The project proponents are requesting to annex and subdivide 66.2 acres, and to amend the general plan land use map to include the annexation site in the Tier 1 urban growth boundary, and to remove an adjacent 58-acre site from the Tier 1 growth boundary, herein referred to as the project. The project area is located in the county of Tulare.	MND	03/23/2017
2017022061	Leen Tentative Subdivision Map TSM16-0002 Butte County Chico--Butte The applicant is requesting the approval of a tentative subdivision map to subdivide an approx. 18.5-acre property into 15 parcels each with a min area of at least one acre. Lots will be served by Stanley Ave and a new on site cul-de-sac with full urban improvements. Future residences will dispose of wastewater via individual septic systems on each parcel. Each parcel would be served by domestic water by CA Water Service Company. The project will incorporate buffers to protect adjacent resources including agricultural operations and riparian habitat. A 150 foot buffer will protect an existing ag operation to the south. A buffer of 80 ft, or 50 ft with approved vegetation screen will protect an existing orchard to the north, and a 50 ft buffer will protect riparian vegetation along Comanche Creek.	MND	03/22/2017

2017021062	6AM Los Angeles, City of Los Angeles, City of--Los Angeles Sixth and Alameda, LLC proposes the 6AM Project, which involves the removal of existing uses and the development of an integrated mix of residential, community-serving commercial, hospitality, educational, office and cultural uses within seven new buildings dispersed across the project site. Specifically, the project would provide 412 hotel guest rooms with related conference and hotel amenities, 1,305 residential apartments, 431 residential for-sale condo units, approx. 253,514 sf of office space, an approx. 29,316 sf school, approx. 127,609 sf of community-serving commercial space, and approx. 22,429 sf of art space. The project would also provide 3,441 parking spaces to accommodate the proposed uses.	NOP	03/22/2017
2017021064	Pilot Flying J Travel Center (MA16186) Jurupa Valley, City of Jurupa Valley--Riverside Notes: Extended Per Lead The proposed Travel Center includes: gasoline and diesel vehicle fueling facilities, truck scale, truck and passenger vehicle parking spaces, a 16,742-square foot building with a driver's lounge, game room, public laundry, restroom facilities, convenience store, and food services including Wendy's restaurant, a Cinnabon kiosk, and a PJ Fresh Marketplace Deli.	NOP	04/21/2017
2017021063	Design Review Permit DRB16-047 and Coastal Development Permit CDP16-029220 Del Mar, City of Del Mar--San Diego The project consists of the demolition of an existing residence and the construction of a new, 2,797 sf, two story, single family residence with attached basement. Site grading and landscaping are also proposed. Project implementation requires approval of design review permit to ensure the proposed development is compatible with the neighborhood character and does not diminish the historic values of the older existing residences in the area. Approval of coastal development permit is required for proposed demolition of an existing residence and the construction of a new residence on land located within the city's coastal overlay and appeals jurisdiction of the CA Coastal Commission.	Neg	03/22/2017
2017021066	Palos Verdes Reef Restoration Project California State Lands Commission Rancho Palos Verdes--Los Angeles The project would result in the creation 40 acres of submerged rocky-reef habitat on the Palos Verdes Shelf for the purposes of enhancing marine ecological resources and creating a productive rocky-reef ecosystem in an area with limited hard substrate. The project involves the placement of 70,300 tons of quarried rock on 40 acres of sandy ocean bottom within a 69-acre project site. The quarry rock would be transported to the site via tugboat and barge from existing quarrels on Catalina Island. This project would compensate for lost ecosystem benefits associated with the loss of rocky-reef habitat in the area due to contaminated sediments from the Palos Verdes Shelf Superfund Site, as identified by the Montrose Settlements Restoration Program, and reef burial due to sedimentation from nearby landslides, irrigation practices, and sewage effluent. 2017022063	PA-1600154 (SA) San Joaquin County Lodi--San Joaquin A site approval application to expand an existing recreational vehicle sales business from a max of 50 recreational vehicles to a max of 182 recreational vehicles in three phases over eight years. Phase one includes the construction of a 5,000 sf metal building for light repairs of recreational vehicles. Phase two, to be completed in five years, includes the addition of 132 recreation vehicle storage and sales spaces for a total of 182 recreational vehicle spaces. Phase three, to be completed in eight years, includes the construction of a 2,893 sf addition to connect the existing sales office and repair buildings and provide an area for parts display and storage.	Neg	03/22/2017
2015032089	Lagoons Slip and Slide (EA: 01-0B420) Caltrans #3 --Humboldt Applicant is seeking a Coastal Development Permit for repair and restoration of State Hwy 101 at two locations in the Big Lagoon area that were damaged by storm events in March 2011. Also a Special Permit for Design Review of the proposed improvements. At Location 1, PM 110.58, the applicant proposes replacing an existing 90-foot long, 18-inch diameter corrugated steel pipe, a damaged 18-inch downdrain and removal of invasive plants. The facilities will be replaced with a 24-inch diameter CSP culvert of a similar length and a 24-inch downdrain. Staging and storage will occur on previously disturbed graveled pullouts adjacent to roadway. At Location 2, PM 113.76, the applicant proposes to install approx. 600 linear feet of 42-inch culvert and a downdrain. Installation of new culvert and downdrain will use both trenchless cut and fill techniques. The downdrain will extend beyond the State right-of-way and discharge at a 241.5 sq. ft. energy dissipater that will extend to the edge of McDonald Creek Road on State Park property (APN 518-061-001). Also the installation of a radial array of 11 horizontal drains totaling approx. 1,755 linear feet that will dewater and stabilize the fill slope. The existing culvert and downdrain will be abandoned in place, and the existing drainage inlet will be removed. To install the proposed drainage facilities at Location 2 requires the excavation of a 1,600 sq. ft. jacking pit adjacent the existing culvert. Staging and storage will occur within the Truttman Sink Maintenance Yard, McDonald Creek Road and an existing unnamed access road. If any excess fill is generated by the project at either location, the contractor will be responsible for disposal at an approved location. During construction, temporary one-way traffic control restrictions will be used and construction warning signage will be installed. Construction is estimated to take between 40 to 60 working days and may span two construction seasons. The applicant will mitigate permanent	NOD

	and temporal impacts to wetlands and Other Waters of the US on-site and of-site. Off-site mitigation will occur at two locations: the Big Lagoon bog at Big Lagoon County Park and Strawberry Creek in Redwood National Park. Permanent impacts to wetland function will be mitigated by undertaking off-site vegetation enhancement at Big Lagoon bog. For the vegetation enhancement at Big Lagoon bog, the applicant has applied for a separate Coastal Development Permit and CUP (Application NO. 11253).		
2015102010	UCSF Research Building and City Parking Garage Expansion at the San Francisco General Hospital Campus University of California, Regents of the San Francisco--San Francisco The proposed project is for the City and County of SF to grant the University of California, SF to ground lease approx. 51,500 sq. ft. property at the Priscilla Chan and Mark Zuckerberg San Francisco General Hospital and Trauma Center (ZSFG) campus owned by the City and County of San Francisco. The site is proposed location for a new 175,000 gross sq. ft. (gsf) Research Building. At a future date, UCSF will request Regents' approval of budget, external financing, and design for the Research Building. The FEIR for the proposed UCSF Research Building and City Parking Garage Expansion at the Priscilla Chan and Mark Zuckerberg SF General Hospital and Trauma Center evaluates the proposed ground lease, the proposed Research Building, and City Parking Garage Expansion. ZSFG is owned and operated by the City, which has partnered with UCSF in public health since 1873. ZSFG is staffed with UCSF clinicians/researchers and San Francisco Dept. of Public Health employees and serves as a teaching hospital for UCSF's Schools of Medicine, Dentistry, Nursing, and Pharmacy.	NOD	
2016111058	Las Positas/Modoc Multiuse Path Project Santa Barbara, City of Santa Barbara--Santa Barbara The Project involves design and construction of a 2.6 mile long separated multiuse pathway for bicyclists and pedestrians in the City right-of-way along Modoc Road from Calle de Los Amigos to Las Positas Road and along Las Positas Road from Modoc Road to Cliff Drive. The Project would provide key connections among Santa Barbara's regional cross-town and Coastal Bike Routes, the neighborhoods adjacent to the path, Elings Park, Arroyo Burro Beach County Park, and the Douglas Family Preserve.	NOD	
2015108305	Water Treatment Plant Modification & Distribution Pipeline Replacement Planning Project Callahan Water District --Siskiyou The SWRCB is the responsible agency. The SWRCB's Safe Drinking Water State Revolving Fund Program is providing funds for the project. The Callahan Water District proposes to collect information to either upgrade or replace their existing water treatment plant and distribution pipeline as both have met their useful service life. Plans and specifications and environmental documents will also be developed.	NOE

2017028434	Continuation of Goat Grazing in State Responsibility Area East Bay Regional Parks District Martinez, San Ramon--Contra Costa The purpose of the project is to continue targeted goat grazing as a vegetation treatment in high fire danger locations in Contra Costa County consistent with the goals of East Bay Regional Park District 2010 Wildfire Hazard Reduction and Resource Management Plan.	NOE	
2017028435	Continuation of Goat Grazing in the State Responsibility Area East Bay Regional Parks District --Contra Costa The purpose of the project is to continue targeted goat grazing as a vegetation treatment in high fire danger locations in Alameda and Contra Costa Counties consistent with the goals of the East Bay Regional Park District 2010 Wildfire Hazard Reduction and Resource Management Plan. Goat herds of 200 to 300 animals will be used to browse on woody vegetation up to 6 feet above the ground. Goat grazing as a vegetation treatment focuses on selectively removing understory trees and brush to reduce fire hazards, improve tree growth, and increase forest health and resilience. It is an ideal treatment method on steep terrain and creates a desirable vertical separation between the canopy and ground cover.	NOE	
2017028436	Reservoir Replacement and Source Improvement Project State Water Resources Control Board --Yuba The SWRCB is the lead agency. The SWRCB's Safe Drinking Water State Revolving Fund Program is providing funds for the project. The Loma Rica Water company proposes to demolish an existing 40,000 galloon redwood water storage tank and replace it with a new 36,500 galloon bolted steel tank. The new tank will be in the same location as the existing tank.	NOE

2017028451	Elk Grove Landing (EG-14-023) Elk Grove, City of Elk Grove--Sacramento The project consists of a Tentative Subdivision Map and concurrent design review for subdivision layout to subdivide three parcels totaling 11.38-acres into 85 lots for medium density residential single-family use.	NOE	
2017028452	5GS15160; Shingletown Ridge Fuelbreak Phase Two Western Shasta Resource Conservation District --Shasta The proposed project will widen and extend an existing fuel break in Shingletown, CA. The treatment will thin small diameter trees to approximately 20' spacing, eliminate ladder fuels to over story trees, eliminate fuels overhanging roads, and remove the large decadent brush throughout the area.	NOE	
2017028453	An Interim Urgency Ordinance of the City Council of the City of Stanton, California, in Accordance with Government Code Section 36937, a Moratorium to Temporari Stanton, City of --Orange This ordinance proposes a moratorium for the establishment of new permit parking areas so that staff may study and propose new permit parking areas so that staff may study and propose new regulatory standards. The City needs to evaluate permit parking due to immediate health, safety, and welfare issues. Requests for permit parking are often prompted by residents' complaints of overflow parking, which allegedly results in excessive litter, vehicle break-ins, thefts, and other crime. The proposed moratorium would also allow staff time to study the implications of the opinion and draft new regulations and guidelines to be in compliance with the opinion.	NOE	
2017028454	Review of Conceptual Design and Cost Estimates for the ENhancement of the City Hall Plaza, Facade, and Landscaping Stanton, City of Stanton--Orange The City Council has previously expressed concerns about the condition of the plaza adjacent to City Hall. The area has not been modified since the construction of City Hall in 1993 and the concrete has been significantly damaged by the trees within the plaza. The damage to the concrete has created displacements to the concrete that can no longer be addressed through grinding and patching. Staff submitted and has been awarded a CDBG grant in the amount of \$212,167 to address the accessibility issues in the Plaza area. It would seem appropriate to also include landscaping and building facade enhancements to complement the concrete work. The alignment of the roadway and island in front of City Hall on Cedar would also be reviewed for potential modifications. Staff has engaged David Volz Architects to prepare a preliminary plan for the Council's review and direction.	NOE

	<p>now be severed in place on each side of five river channel crossings, for a total of ten severing sites. This project element involves severing the abandoned SARI pipeline on the river side of each old manhole location at each crossing w/o entering the active river channel and w/o removing any of the abandoned pipeline. Construction access to the severing locations would utilize existing access/maintenance roads; and (2) manhole protection element - this project element involves the installation of manhole protection that will be constructed as part of the Corps' Lower Santa Ana River, Reach 9 phase 5B bank improvement project along the river side of La Palma Ave in the city of Yorba Linda, Orange County. The Manhole Protection Element of the proposed action consists of installing foundation protection (24 in of grouted stone over 9 in of bedding material) around two manhole structures and a short segment of the Yorba Linda Spur wastewater pipeline (an 18 in diameter vitrified clay pipe with concrete encasement). The proposed protection for the manholes and the adjacent section of the YLS sewer line would tie in to the Corps' planned bank revetment.</p>		
2016111068	<p>CSUCI Specific Reuse Plan Amendment and Phase 2 Development of East Campus Residential Neighborhood California State University Trustees Camarillo--Ventura</p> <p>The proposed project is an update to the CSUCI Specific reuse Plan, adopted by the CSUCI Site Authority in 2000. The specific reuse plan is one of the documents governing land development for the nonacademic portions of the CSUCI complex, including the West and East Campuses. Since its adoption, extensive development has occurred on the East Campus, resulting in a sizeable residential community and a mixed-use town center located at the pivot of the East Campus and the academic core, east of the Broome Library. The proposed specific Reuse Plan Update includes a revision to the northernmost residential area of the East Campus. Up to 600 residential units are proposed on 32 acres of vacant land that is currently entitled for 242 single-family residential units.</p>	EIR	04/07/2017
2015091023	<p>Concordia University CUP Modification for Master Campus Build-Out Plan Update and Zone Change Irvine, City of Irvine--Orange</p> <p>The proposed project involves (1) a Major Modification to the existing CUP for Concordia University Irvine to reflect the proposed Campus Master Build-Out Plan Update; and (2) a Zone Change to revise Special Development Requirements. Of the 16 existing institutional (non-residential) buildings on campus (approximately 243,571 sf), 7 buildings would be demolished (approximately 71,231 sf). New construction (new buildings and additions to existing buildings) allowed would involve up to 148,880 sf of institutional sf. New residence halls would be constructed (74 units/296 beds), resulting in a total of 330 units/1,320 beds. New, relocated, and/or improved athletic facilities; a lap/recreational pool; vehicular, parking, and pedestrian access improvements; utility infrastructure and landscaping would also be implemented.</p>	FIN

	channelization improvements.		
2017021069	ENV-2016-273-MND Los Angeles, City of Los Angeles, City of--Los Angeles The project involves the demolition of an 86,712 sf warehouse building, a 4,033 sf metal building, and portions of a 24,018 sf building and 3,521 sf building (constructed circa 1977, 1948, 1967 and 1929, respectively), and the construction of a mixed use development with 372 residential dwelling units and 40,000 sf of commercial floor area (comprised of 30,000 sf of creative office and 10,000 sf of retail space). The project would renovate a portion of the existing floor area for creative office space. The project would also serve 11% of its base density (approx. 31 dwelling units) as very low income housing and include a ministerial density bonus. The development would include five buildings spanning the property, with approx. 524,600 sf of floor area and a floor area ratio of 2,6:1, below the max FAR of 3:1. The proposed buildings would range in height from one to five stories, with a max building height of approx. 67 ft above grade, or 75 ft as measured by the LAMC. The project would provide a total of 467 on site parking spaces within one level of subterranean parking and at grade, and a total of 428 on site bicycle parking stalls. All 39 on site trees will be removed; a total of 241 trees are proposed, including roof areas and street trees. No fireplaces or wood stoves are proposed.	MND	03/23/2017
2017021070	Westlake Blvd. Sidewalks Project Thousand Oaks, City of Thousand Oaks--Ventura The proposed project addresses pedestrian and bicycle safety issues by providing new continuous sidewalks, improved cross-walks and bicycle lane striping along Westlake Blvd. from Thousand Oaks Blvd. south to Triunfo Canyon Rd.	MND	03/23/2017
2017022065	Lake Tahoe Airport Master Plan South Lake Tahoe, City of South Lake Tahoe--El Dorado The city of South Lake Tahoe proposed a new Airport Master Plan for Lake Tahoe Airport that would involve airside and landside improvements over an approx. 20-year period. Project elements include pavement marking and signage improvements, pavement reconstruction and rehabilitation, taxiway modifications, delineation of helicopter parking, removal of vegetation and other airspace obstructions, improvements to a drainage ditch, construction and/or expansion of new hangar and fixed base operator facilities, demolition and removal of an existing air traffic control tower, installation of improved navigational instruments, and installation of a self-serve fueling station, aircraft wash rack, and electric vehicle charging stations.	MND	03/23/2017
1999072038	2015 Nevada County Regional Transportation Plan Update Nevada County Transportation Commission Nevada City--Nevada The proposed project is the adoption and implementation of the 2015 Nevada County Regional Transportation Plan (RTP). The RTP has been prepared to fulfill the state requirements of AB 402 using specific guidance from the CA Transportation Commission Regional Transportation Plan Guidelines. More specifically, the RTP is a twenty year, comprehensive transportation plan for all modes of transportation. NCTC is required to adopt and submit an updated RTP to the CTC and Caltrans every five years. In addition, the RTP is used to documents	NOP	03/24/2017

	NCTC's priorities for transportation funding in the region.		
2017022066	Gateway Crossings Santa Clara, City of San Jose--Santa Clara General Plan Amendment to change the land use designation on the project site to allow residential development at 51 to 100 dwelling units per acre in conjunction with a minimum commercial floor area ratio of 0.20; an amendment to the General Plan Land Use map for the Santa Clara Station Focus Area to reflect the General Plan change; are zoning of the project site; and a zoning code text amendment to add a new zoning designation to facilitate the development of the land uses and building types contemplated for the project site.	NOP	03/23/2017
2017022067	450-474 O'Farrell Street/532 Jones Street San Francisco, City and County of San Francisco--San Francisco The proposed project would construct 237,353 sf of development, consisting of 187,640 sf of residential space (176 dwelling units), 6,200 sf of retail/restaurant space (on floors 1 and 2), 13,595 sf of religious institutional space (on floors 1-3), and 21,070 sf of below-grade parking (41 parking spaces). The 13-story, 130-ft tall, mixed use building would include 8,398 sf of common open space, 125 class 1 (secured) bicycle parking spaces (in the basement level and on floor 1), and 21 class 2 bicycle parking spaces (16 on O'Farrell St and five on Jones St). The religious institutional space would be a replacement for the existing church on the project site.	NOP	03/23/2017
2006121082	06-KER-14 KP 73.9/100.2 (PM 45.9/62.3) Freeman Gulch Four-Lane Project Caltrans #6 Ridgecrest--Kern This proposed project involves converting the existing 2-lane conventional highway into a 4-lane, divided, controlled-access expressway including placing an asphalt concrete overlay, flattening cut slopes, widening fill slopes, overpass intersections and widening paved shoulders to 5-ft inside and 10-ft outside. The project will result in permanent impacts to 889.8 acres of Mohave ground squirrel and desert tortoise habitat. The project may result in incidental take of Mohave ground squirrel and desert tortoise, both of which are designated as threatened species under the California Endangered Species Act. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of project implementation.	NOD	
2009091126	California High-Speed Train Project Fresno to Bakersfield Section High Speed Rail Authority, California Madera, Fresno--Fresno, Madera Project approved by CDFW consists of the ITP and Major Amendment No. 1, which addresses construction and operation of the Merced to Fresno segment of the HST, as approved by the lead agency, affecting or generally related to fish and wildlife resource subject to the regulatory authority of CDFW, including natural resources subject to the CESA. The ITP authorizes incidental take of the threatened CA tiger salamander (<i>Ambystoma californiense</i>), San Joaquin antelope squirrel (<i>Ammospermophilus nelsoni</i>), Swainson's hawk (<i>Buteo swainsoni</i>), and San Joaquin kit fox (<i>Vulpus macrotis mutica</i>) and the endangered Tipton kangaroo rat (<i>Dipodomys nitratoideus nitratoideus</i>), (collectively, the Covered Species), species designated as threatened and endangered under CESA. 	Major Amendment No. 1 makes seventeen changes to the ITP. 1) Increase the size of the entire Project Construction Footprint by 102.58 acres; 2) revise the Project Description by adding eight new road improvement locations; 3) add demolition activities to eight properties; 4) add a geotechnical test embankment and associated burrow site activities; 5) increase the Covered Species impacts for Tipton kangaroo rat and San Joaquin antelope squirrel as a result of an increase in Construction Footprint and correction for an acreage calculation error in the original ITP; 6) modify the Conditions of Approval to include the addition of a "Small Mammal Trapper" Biological Monitor designation; 7) modify the Conditions of Approval to clarify habitat tracking, reporting, when preconstruction surveys must occur, and where species specific Conditions of Approval should be implemented; 8) require the permanent protection of additional habitat mitigation lands (HM lands) and accompanying management costs to compensate for Covered Species impacts associated with both an increase in Construction Footprint and correction of an acreage calculation error in the original ITP; and 9) Increase the Performance Security amount required in order to proceed with Covered Activities.		
2011111013	San Elijo Lagoon Restoration Project (SELRP) San Diego County San Diego--San Diego CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2016-0166-R5). This proposed project involves restoration of the coastal lagoon as described under Alternative 1B in the EIR., including dredging, filling, creation of nesting habitat and disposal of sand from the central basin and refilling the basin with fine sediments and capping those materials with a layer of sand. The Project will result in temporary impacts to 28.1 acres of coastal marsh, 1.5 acres of salt pan, 5.1 acres of southern willow scrub, and 39.6 acres of open water.	NOD	
2016092072	Hayes 4 - Phase Two Subdivision Development Agreement Riverbank, City of Riverbank--Stanislaus The proposed project consists of the City's approval of a development agreement between the city and the developers of the Hayes 4, phase 2 subdivision. The land covered by this DA has been previously approved by the City of Riverbank as tentative map no. 07-2004 on April 25, 2005 (resolution no. 2005-046). City council adopted resolution no. 2006-127 on November 27, 2006, approved the phase 2 vesting tentative subdivision map for tentative map no. 07-2004. The DA will extend the duration of the tentative map and is proposed to expire 5 years from the date of approval. In addition to extending the duration of the tentative map, the purpose of the DA is to clarify the number of lots, storm drainage concepts, and the conditions of approval for the tentative map.	NOD	
2017012002	Use Permit Amendment 24-94 A2 Shasta County --Shasta Project site is located in the Palo Cedro area on a 7-acre parcel on the west side of Deschutes Road, about 0.2 miles south of the intersection of Deschutes Road and Brundage Road (8502 Deschutes Road). The request is for approval of an amendment to Use Permit 27-94. This amendment would change the facility from a covered horse riding arena and boarding stable for up to 32 horses to primarily an equestrian training facility with up to two or three competition "dressage" style events per year, with as many as 40 people and 20 horses on site during these	NOD

2017028479	Roadway Paving Project Caltrans #4 --Alameda Milling and replacing pavement with rubberized hot mix asphalt and replacing an existing ditch. All work will be limited to existing State Right of Way.	NOE	
2017028480	Horton Creek Weir Replacement Project Regional Water Quality Control Board, Region 6 (Lahontan), Victorville Bishop--Inyo The purpose of the project is in-kind replacement of the existing weir structure within Horton Creek. The structure will be cast in-place concrete and new operating gates will be installed. A surface water diversion plan will be implemented during construction and will remain in place until a new concrete has cured and all other work in the channel is complete.	NOE	
2017028481	Goat Rock Residence Specific and Leach Field Replacement Parks and Recreation, Department of --Sonoma Replace the existing septic tank and cesspool at the Goat Rock Residence at Sonoma Coast State Park with a leach field to provide improved services to the residence. Project will: - Excavate an ~18"x30"x60' trench and install sewer line between the residence and existing tanks; - Excavate ~36"x30"x75' for two infiltrator leach lines; - Install a new septic tank adjacent to the existing tank and use material excavate for new tank to fill in the old septic and cesspool tanks; and - Place seed and mulch (including native vegetation grubbed during excavation) over distributed soil to reduce erosion and propagate native vegetation. No natural or cultural resources will be negatively impacted by this project.	NOE	
2017028482	East Indian Fuels Reduction Project Forestry and Fire Protection, Department of --Siskiyou The project area is characterized by a sparse to moderately dense, mixed conifer stand consisting of Douglas Fir, Ponderosa pine, incense cedar, madrone and black oak 20-80 years of age. The understory is composed of moderate to dense occurrences of conifer and hardwood species, blackberries and other brush species with moderate amounts of fine wood debris. Elevation ranges from 1,380 feet to 1,800 feet with slopes ranging from 10% to 50%. Hand crews will be utilized to remove all brush species, thin understory trees 8" DBH or less, prune leave trees to a height of 6 to 8 feet and remove existing ground fuels between 1 and 5 inches in diameter. All the woody material generated by treatment activities will be placed in manageable piles, which are no larger than 6 feet in height and 8 feet in diameter, and burned during safe climatic conditions. Piles will be established as far as possible from residual trees.	NOE

	approx. 140 linear foot area. The project is located on the north bank of Napa River, approx. 1,000 feet south of 611 Washington Street, east of Eddy Street and west of Earl Street, in the City of Calistoga, County of Napa, State of CA.		
2016061031	Santa Margarita Ecological Reserve Solar Project California State University Trustees Temecula--Riverside The project proposes construction and operation of a solar energy generation facility on approximately 15 acres of land located within the SMER. The project would be installed over an approximately six-month construction phase. Operation is planned for a period of approximately 20 years, and then the facilities would be removed and the site would be restored with native habitat when the center is decommissioned and removed. The proposed project is anticipated to generate 6,900,000 kWh of power per year. The proposed project would use conventional polycrystalline photovoltaic modules with an anti-reflective surface. Generated electricity would be connected to the energy grid via an existing Southern California Edison distribution line that runs along the eastern site boundary.	NOD	
2016082059	Manzanita Drive Residence Oakland, City of Oakland--Alameda Construction of a new single family dwelling on a vacant lot requiring Regular Design Review to construct a new single family dwelling on a vacant lot; Minor Variance to allow the building to exceed the 18-foot height-limit above the edge of pavement height for down-sloping lots; and Minor CUP to allow a maximum building height of 34 feet 9 inches from the City of Oakland and an Incidental Take Permit (ITP) from the CDFW for approval of potential pruning of the roots of two pallid manzanita plants and pruning of one branch on one of the two plants.	NOD	
2016101071	California State Prison, Los Angeles County Wind Energy Generation Project General Services, Department of Lancaster--Los Angeles DGS proposes to construct and operate a 1.85 MW electricity-generating wind turbine at the California State Prison, Los Angeles County with the purpose of offsetting electricity usage required by prison facility.	NOD	
2016114001	Headwaters Elk River Corridor Recreation Improvements Bureau of Land Management Eureka--Humboldt The project proposes to improve recreation facilities at the Headwaters Forest Reserve Elk River recreation site at the end of Elk River Road, Eureka, CA. This project includes the construction of 1.5 miles of new recreation trail and modifications to the existing Elk River Trailhead parking lot. The new trail would parallel and connect with the existing (and increasingly popular) Elk River Trail, providing new loop hiking and trail running opportunities. It would include interpretive signs. The new trail would be closed to dogs and bicycles, but the main Elk River Trail would remain open to those uses. Parking lot modifications would include addition of parking spaces and changes to reduce congestion.	NOD

2017028493	Issuance of Lake or Streambed Alteration Agreement No. 1600-2016-0520-R1, Maple Creek Bridge Scour Repair Project Fish & Wildlife #1 --Mendocino The project involves on encroachment; removing concreted rock slope protection from behind bridge piers and replacing it with "RSP-light" to reduce the load on bridge piers. Existing RSP along the creek bank will be left in place for bank stabilization. Project work will occur when no water is present in the stream.	NOE	
2017028494	Gilman Drive Sewer Improvements University of California, San Diego La Jolla--San Diego The project proposes to upgrade the existing City of San Diego sewer main to address deficiencies in the existing sewer capacity. The Gilman Drive sewer project would privatize the portion of City of San Diego sewer main that runs under the Veteran's Administration hospital parcel, as well as UC San Diego Property, and construct a new parallel private sewer main on-campus. The project would also extend a new parallel 24-inch public sewer main south of La Jolla Village Drive in Gilman Drive. The new public main would continue to south for approximately 3,300-feet where it would connect to the existing 24-inch City of San Diego sewer main which is south of Via Alcante. South of the proposed connection point, the City of San Diego has concluded the existing public sewer main has sufficient capacity to handle the existing and horizon year flows anticipated for the sewer basin and UC San Diego. The target completion for this project is September 2017.	NOE	
2017028495	Digouts Project Caltrans #4 --Yolo The project proposes to repair asphalt concrete digouts at various locations to preserve the driveability and serviceability of this section of Yolo 45. All work will be within the state right of way.	NOE

2014111012	Clean Water Factory San Bernardino, City of San Bernardino--San Bernardino Note: 1 CD SBMWD is proposing the Project to reduce its dependence on imported water and to establish a reliable, sustainable source of clean water. The proposed Project will treat effluent from the San Bernardino Water Reclamation Plant to a quality approved for recharge as set by the California Department of Public Health and the Santa Ana Regional Water Quality Control Board. The treated effluent will be conveyed to the Waterman Basins and the East Twin Creek Spreading Grounds. Recycled water spread at these facilities will artificially recharge the Bunker Hill Groundwater Basin and, more specifically, the Bunker Hill a Management Zone, as described in the Water Quality Control Plan for the SAR Watershed (Basin Plan). The Project will also treat a side stream of SBWRP effluent to a quality approved for direct use and convey the tertiary treated recycled water to customers that can benefit from a non-potable water supply, and would also involve various improvements at the RIX facility and a future connection of the RIX facility to the Chino Basin and the Inland Empire Utilities Agency's non-potable system. The project's use of treated wastewater for direct reuse and recharge would result in a reduction in the volume of treated effluent that is presently discharged to the Santa	FIN

	Rd and Heritage Rd/Entertainment Circle North. The purpose of the project is to eliminate the bridge's Functionally Obsolete designation and raise its sufficiency rating to above 80 by providing water adequacy and standard approaches. The project site is between Main St and Entertainment Circle in the city of Chula Vista and requires city's approval of a Habitat Loss Incidental Take Permit.		
2017021080	Villa Verona Apartment Community Perris, City of Perris--Riverside The Villa Verona Apartment Community would be a multi family residential development consisting of 376 units at the proposed project site. There would be three different building types including type 1, 2, and 3. Type 1 buildings are two story buildings with one bedroom units. Type 2 buildings would consist of two and three story combo buildings with two bedroom units. Type 3 buildings are two story buildings that would consist of three and four bedroom units. A clubhouse would also be constructed on the site as well as tot-lots, pool with spa, basketball court, and volleyball court. A detention basin would be located in the northwest corner of the property. A total of 522 parking spaces would be provided as part of the proposed project includes 372 covered parking places and 132 open parking spaces. The proposed project would also include 261,336 sf of streets/side walks and 347,278 sf of landscaping and open space.	MND	03/27/2017
2017021081	Southern Highlands (PRD) Tentative Subdivision Map No. 5555, and Conditional Use Permit No. 2016-24 Visalia, City of Visalia--Tulare The project proponents are requesting to develop 14.3 acres for a mix of single family res and multi family res homes. The project site is located in the city of Visalia, county of Tulare.	MND	03/27/2017
2017021082	Flower Street Apartments Project Los Angeles, City of Los Angeles, City of--Los Angeles The construction of a seven story mixed use building including 147 residential apartment units and either 5 joint live work units and 1,184 sf of retail/restaurant or no joint live work units and 6,741 sf of retail/restaurant. The project will have two levels of subterranean parking with 160 covered parking spaces.	MND	03/27/2017
2017022070	Cherryland Elementary School Reconstruction Project Hayward Unified School District Hayward--Alameda HUSD is proposing to relocate Cherryland ES from its existing location at 585 Willow Ave to existing sports field on the eastern portion of the Sunset School site, located 0.1 miles south of the Willow site, at 456 Laurel Ave. The structures on the Willow site would not be altered as a part of the proposed project. Future use of the Willow site beyond 2019 is not known at this time.	MND	03/27/2017
2017022071	88 Sunnyside Lane 4-Lot Residential Subdivision Orinda, City of Orinda--Contra Costa The project would subdivide the existing 24.02 acre lot into four parcels and develop three new single family residences and all associated improvements. Most of the site is undeveloped and vegetated, with one existing residence on the property. One parcel would contain the existing residence, which would not be renovated or demolished as part of this project. Sunnyside Lane would be widened	MND	03/27/2017

2009041034	<p>Highway 86 Domestic Water Transmission Main Phase 2 Coachella Valley Water District --Riverside Note: Addendum No. 1</p> <p>The proposed Highway 86 Domestic Water Transmission Main Phase 2 project will supply the communities of Salton Sea Beach, Desert Shores, and Salton City with domestic water from a more reliable groundwater source located ~16 miles to the north in the Thermal area. This project will consolidate the Coachella Valley Water District (CVWD) Improvement District No. 11 public water system with CVWD's Thermal public water system. The proposed route of the pipeline parallels Highway 86 in the west shoulder within the existing highway right-of-way and will be installed within private property until Avenue 86. The CVWD is in the process of obtaining a 20 ft strip easement for the pipeline from property owners south of Avenue 81. The 30 inch diameter pipe will connect to an existing 30 inch diameter line located on the west side of Highway 86 at Avenue 74. From Avenue 74 south to Avenue 81, the pipe will be aligned ~110 ft from the centerline (10 ft from the edge of the existing highway ROW). The pipeline follows this alignment from Avenue 81 south to Avenue 86, for a total distance of ~7 miles. At Avenue 86, the pipeline connects to an existing 16 inch diameter pipe that currently supplies CVWD Improvement District No. 11 with groundwater from a small well field located near Avenue 86.</p> <p>The pipeline will be installed with a minimum of 3 ft of earth cover. Vertical deflections and restrained joints will be installed where the proposed pipe crosses other utilities including irrigation mains, agricultural drain lines, storm drain culverts, and buried telephone lines. In-line valves will be installed at half mile intervals and crosses for future connections will be installed at ~6 locations. The pipeline will be placed in polyethylene wrap to protect the pipe from mildly corrosive soils. The primary purpose of this project is to provide reliable domestic water supplies to communities in CVWD's Imperial County service area, including Salton Sea Beach, Desert Shores, and Salton City.</p>	ADM	
2017-03	<p>Tolowa Dee-ni' Nation - APNs: 102-140-05, 102-750-01, 102-080-56 Bureau of Indian Affairs --Del Norte</p> <p>The Tribe seeks to transfer 5.64 acres of land into federal trust for construction of a health clinic, safe house and elder housing. The specific intended uses are as follows:</p> <p>The Ray and Ironwood Properties would be used to access adjacent trust land (Lopez Property) which has 6 dwelling units (2 single family homes and 2 duplexes) for elders. The existing single-family home located on the Ray property will be retained. Future build out for the Ray and Ironwood properties would also include 8-12 dwelling units (single-family and duplexes).</p> <p>The North 40 Property will be used to develop a tribal health clinic. Approximately 10,000 sf of space would be provided for the Tribe's existing and expanding health care program (Howonquet Health Center). A 2,500 sf safe house for the Tribes Family Violence Prevention Services would be developed adjacent to the existing</p>	BIA	03/28/2017

2017028543	Davis Tower Room 1835A Pediatric Fluoroscopy University of California, Davis Sacramento--Sacramento The project renovates room 1835A in order to make was for a new pediatric fluoroscopy unit. Work will upgrade the lighting and electrical infrastructure; improve the nearby patient restroom and corridors to meet current code; and upgrade the finishes in the waiting area.	NOE	
2017028544	Main Hospital East 2 and 3 Pulmonary and GI Remodel University of California, Davis Sacramento--Sacramento The project renovates approximately 20,000 gross square feet of space on the 2nd and 3rd floors of the East Wing in order to make way for the relocation of Pulmonary and Gastroenterology located within the seismically-deficient N/S wing. Procedure rooms, testing rooms, scope washing & support space is planned for.	NOE	
2017028545	Lease -- Existing Parole Office Space Corrections and Rehabilitation, Department of Ventura--Ventura CDCR is going to renew its lease at the Oxnard parole office location. The office will continue to be used for parole office operations. The location is zoned for office use and there will be no increase in occupancy or parking beyond the existing levels. The use is consistent with local zoning requirements.	NOE	
2017028546	Annual Spillway Vegetation Management, Chorro Reservoir Corrections and Rehabilitation, Department of --San Luis Obispo CMC personnel will oversee the vegetation removal operation. The site will be accessed on foot via the spillway/shoreline or via boat/small barge, and removed vegetation will be hand-carried to one or more metal dumpsters for hauling and disposal offsite. All staging and access will occur on previous disturbed areas (paved and/or graveled roads and existing equipment storage areas). The work crew will use primarily non-motorized hand tools to cut, pull, and remove vegetation from the site. If necessary, hand-held mechanical equipment may be used in specific areas to cut thick vegetation. All vegetation above the waterline will be hand pulled out of the ground if possible. Where it is not possible, vegetation will be cut at ground or water height/level. This will occur above the waterline in the dry portion of the silted in or rip-rap protected area adjacent to the spillway to minimize potential for disturbance to the stream zone. Below the waterline and just adjacent to the dry area, vegetation may be cut at the water level, but will not be pulled out to avoid disturbance to the stream zone.	NOE	
2017028547	Special Repair/Deferred Maintenance (Allocation #05, FY 16/17) Corrections and Rehabilitation, Department of -- Repair and maintenance projects will be conducted at California Department of Corrections and Rehabilitation (CDCR) prison facilities statewide as shown in the enclosed list. Repair projects may include roof repair/replacement, inmate housing shower repair, replacement/repair of flooring, replacement of chillers, and effluent pond lining replacement. These projects are necessary to maintain the buildings and infrastructure and to	NOE

2016031011	<p>Big Canyon Habitat Restoration & Water Quality Improvement Project Newport Beach, City of Newport Beach--Orange</p> <p>CDFw has executed Lake and Streambed Alteration Agreement No. 1600-2016-0029-R5, pursuant to section 1602 of the Fish and Game Code to the project Applicant, City of Newport Beach. Within big Canyon Nature Park, an existing culvert underneath Jamboree Road will be extended to accommodate an access road on the culvert extension. Downstream of the new culvert outlet structure, 200 linear feet of stream will be realigned. The banks of the low-flow portion of realigned stream channel will be reconstructed using vegetated soil lifts. Riparian areas adjacent to the reconstructed channel will be graded to restore floodplain benches and will be replanted with native riparian vegetation. A water quality treatment basin will also be constructed within the project area. riparian habitat enhancement will also occur which will consist of removing non-native vegetation. Native riparian vegetation may be temporarily impacted to create access routes to remove non-native root systems. Following non-native vegetation removal, the areas will be restored with native riparian vegetation. The Project will permanently impact up to 0.44 acre of southern riparian forest and temporarily impact an undetermined acreage of habitat within a 2.03 acre area of southern willow forest with scattered non-natives for access to non-native vegetation. The project will create 0.25 acre of southern riparian forest, enhance 1.07 acres of southern riparian forest, and restore all temporary impacts to southern riparian forest.</p>	NOD	
2016062007	<p>Building 59 Upgrade & Installation and Operation of NERSC-9 University of California, Berkeley Berkeley--Alameda</p> <p>The proposed project would install and operate a new high-performance computing (HPC) system called NERSC-9 within the existing "Building 59" at Berkeley Lab; some building mechanical systems would also be upgraded. No</p>	NOD
