

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

January 1 – 15, 2018

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also serves as the state's Single Point of Contact for the review of federal assistance applications pursuant to Presidential Executive Order No. 12372. This Summary of Postings summarizes the environmental documents and federal assistance applications received by the Clearinghouse during the period **January 1 – 15, 2018**.

STATE CLEARINGHOUSE CONTACTS

Please contact the State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
E-mail: state.clearinghouse@opr.ca.gov
Website: www.opr.ca.gov
Fax: (916) 558-3164

Questions regarding federal assistance applications should be directed to **Sheila Brown via email**.

STATE CLEARINGHOUSE MAILING ADDRESS

USPS:

State Clearinghouse
P.O. Box 3044

<u>Documents Received on Tuesday, January 02, 2018</u>			
2013111050	CV Link Coachella Valley Association of Governments Coachella--Riverside The project is located in the Coachella Valley and extends 49+/- miles across 8 municipalities, unincorporated county lands, and reservation land of 3 Native American tribes. All alignments analyzed total 64.34+/- miles in length. The estimated cost of the project is \$100 million. Currently the project area lacks multi-modal connectivity throughout the valley and access between such uses as home, school, recreation, employment, and commercial services. The purpose of the project is to address this lack of integrated multi-modal access throughout the valley and enhance the active transportation network from the city of Palm Springs to the city of Coachella. Generally, it will feature a broad paved path for LSEVs and bicycles, and softer-surface narrower paths for pedestrians. The path is primarily atop the levees of the region's principal watercourses.	EA	01/31/2018
2001101166	Grand Avenue and Environs Project Los Angeles County Los Angeles, City of--Los Angeles The proposed refinements to the Music Center Plaza include leveling and refinishing the Music Center Plaza surface to align with the Dorothy Chandler Pavilion and Mark Taper Forum, reconstructing the existing Grand Avenue staircase with a more narrow staircase flanked on both sides by donor panels and escalators, moving the approx. 50-foot tall "Peace on Earth" Lipchitz sculpture in the center of the Music Center Plaza towards Hope Street, reorganizing the existing food, beverage, and information facilities around the Plaza by creating four new, permanent structures, and adding new public restrooms to replace the existing restroom trailer.	NOD	
2002072046	Incremental Recycled Water Program - Discharge Compliance Project Santa Rosa, City of Rohnert Park, Sebastopol, Windsor, Healdsburg, Cotati, ...--Lake, Sonoma The originally approved project consists of the City of Santa Rosa's Incremental Recycled Water Program (IRWP) to provide for reliable treatment, recycling, and disposal of the wastewater volume from growth anticipated in the General Plans of the communities making up the Sub regional System (Santa Rosa, Rohnert Park, Cotati, and Sebastopol). The IRWP defined and evaluated seven alternatives that include a range of components to achieve the Program's objectives. One of those alternatives included the Geysers Expansion (Alternative 5) located in both Sonoma and Lake counties. The environmental effects of the Geysers Expansion Alternative analyzed up to 25 mgd. The improvements needed for the Geysers Expansion Project included an additional pump at the Llano Pump Station and utilization of an existing redundant fifth pump at the Bear Canyon, Mayacams, and the Pine Flat Pump Stations. Steamfield operations included an additional 3.5 miles of new above-ground pipeline and six new wells to accommodate the additional recycled water flows. The EIR was certified on March 4, 2004. A Subsequent Negative Declaration, under the same title, was later adopted in April 2006, based on the above mentioned certified EIR, for a Use Permit to re-develop existing well pads, drilling up to 58 geothermal wells for steam and injection, constructing up to 29,000 feet of access corridors for steam pipelines, roads, and associated electrical distribution (21kv) at The Geysers.	NOD

<u>Documents Received on Tuesday, January 02, 2018</u>			
	<p>Another Subsequent ND was later adopted in 2007 based on the Geysers expansion Alternative, covered in the IRWP Certified Program EIR.</p> <p>The proposed activity consists of permitting a new geothermal injection well on an existing well pad at The Geysers Geothermal Field in Sonoma County, which is within the scope of the original project(s) described above. This entails minor alteration of land that will not remove any vegetation, nor will it create any new roads, buildings or other infrastructure. Additionally, the proposed well site will be a minor alteration of the existing facilities at Calpine's geothermal facility, to assist with production of electric power.</p>		
2008041070	<p>24th Street Improvement Project Bakersfield, City of Bakersfield--Kern</p> <p>Construction of a new pedestrian crossing of 24th Street at Pine Street, 700 feet to the west of A Street, as part of the 24th Street Widening Project.</p>	NOD	
2015102093	<p>CVS/Pharmacy & Wireless Communication Facility Relocation Project Pinole, City of Pinole--Contra Costa</p> <p>The proposed project includes the demolition of an existing three-story office building and two single-story accessory buildings totaling approx. 13,340 sq. ft., relocation of two existing wireless communication facilities within the project site, and development of a new CVS/Pharmacy building totaling approx. 14,806 sf (13,013 sf floor area and a 1,793 sf mezzanine area), a pharmacy drive-through, a 68-foot high faux clock tower structure with cellular antenna facilities for two carriers, site access, parking, and utility improvements on an approx. 1.9-acre site.</p>	NOD	
2017102025	<p>Red Bluff Joint Union High School Athletic Lighting Project Red Bluff Joint Union High School District Red Bluff--Tehama</p> <p>The proposed project includes the installation of stadium lighting at existing soccer fields in the northwest portion of the Red Bluff Union High School. The proposed lighting project includes eight 80-foot tall poles and four 70-foot tall poles, containing a total of 68 1150-watt TLC-LED light bulbs.</p>	NOD	
2018019001	<p>Lake or Streambed Alteration Agreement No. 1600-2017-0304-R1 for THP 1-17-050 MEN "Case Yellow" Forestry and Fire Protection, Department of --Mendocino</p> <p>CDFW is issuing an agreement to upgrade culverts, install rock armored crossings, install temporary crossings.</p>	NOD	
2018019002	<p>Streambed Alteration Agreement No. 1600-2017-0581-R1 for Timber Harvesting Plan (THP) 1-17-088-HUM Forestry and Fire Protection, Department of Rio Dell--Humboldt</p> <p>CDFW is issuing an agreement for Class III temporary tractor crossing.</p>	NOD	
2018019003	<p>I-17-071 SCR A&B Forestry and Fire Protection, Department of Scotts Valley--Santa Cruz</p> <p>The project is limited to modification of watercourse crossings X7, X8, X11, X14, and X37, and modification of the Confluence/Trespass Area (X17, X19, and X22).</p>	NOD

<u>Documents Received on Tuesday, January 02, 2018</u>			
2018019004	I-17-017 SON Fox Meadows Forestry and Fire Protection, Department of Healdsburg--Sonoma The project is limited to replace undersized culverts at MP# and MP4 and armor the inlets and outlets; culvert installation at MP6 and armor the inlet and outlet; remove 2 concrete culverts, concrete debris, headwall and flumer at MP2, replace with 1 culvert and return watercourse to natural grade with rock armored banks; remove 2 culverts at MP5 and replace with a bridge and armor banks; install rocked fords at MPB and MPD; remove abandoned vehicle, freezer, wheels with metal frame, and debris from MPJ in a Class II-S WLPZ.	NOD	
2018019005	Streambed Alteration Agreement No. 1600-2017-0376-R2 "Airperson" THP (4-16-007-ELD) Forestry and Fire Protection, Department of --El Dorado CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0376-R2, pursuant to section 1602 of the Fish and Game Code to Sierra Pacific Industries, as represented by Robert Fecko. Project is limited to: the maintenance, removal and upgrade of two CMP culvert pipes, the construction and use of three new off-channel waterholes, the use and maintenance of an existing skid trail crossing, and the maintenance and use of two existing waterholes, the installation and maintenance of two rock fords, as well as the replacement of one undersized crossing with armored overflow channel.	NOD	
2018019006	Lake or Streambed Alteration Agreement No. 1600-2017-0816-R1 "Table Rock NTMP" 2-00NTMP-009-SIS Forestry and Fire Protection, Department of --Siskiyou Project is limited to one vented ford crossing. The existing ford may be excavated upstream approx. 10 feet to install one 24" Corrugated Metal Pipe (CMP) with 12" minimum cover on road surface. CMP shall be embedded in dip of adequate size to prevent diversion. Minimal amount of fines shall be used and shall only be placed in crossing as necessary to stabilize pipe. All other fill shall be angular, competent rock. Minimize upstream excavation to amount necessary to restore ambient grade and direct flow through culvert.	NOD	
2018018001	Cole Lakebed Encroachment Permit; CE 17-43 Lake County --Lake Replace 5 failed pilings with 6 new 8" metal pilings and a new pier and dock.	NOE

2018018015	Anderson Creek RSP Caltrans #2 Redding--Shasta Stabilize slopes under bridge abutments and protect from transient encampments by placing rock slope protection on slopes. This will reduce stormwater pollution and eliminate hazardous waste originating from transient occupancy.	NOE	
2018018016	Operation of Eastside and Benson Granular Activated Carbon (GAC) Treatment Systems State Water Resources Control Board Chino--San Bernardino SWRCB, as responsible agency, will be issuing a water supply permit. The city of Chino proposed project is for two treatment systems that include 8 GAC treatment vessels and piping. Vessels will be installed on proposed 80ft x 35ft concrete pads. 2 influent filters, approx 3ft x 8ft, will be installed on proposed 4ft x 9ft concrete pads. New 18 in distribution piping will be installed for GAC treatment system influent and effluent for the Benson and Eastside. The GAC Treatment system will utilize GAC material that will need to be removed from the vessels every 1-3 years and transported to an off site location to be reactivated for reuse. The project proposes shallow excavations to install the proposed outside project and any areas disturbed during construction will be restored to its original condition. Total disturbed area is estimated to be approx 5,200 sf, which includes 4,000 sf for the concrete pad and approx 1,200 sf for the underground piping installed using open trench construction. Project adds minimal amount of impervious area.	NOE	
2018018017	California State Railroad Museum Vehicle Charging Station Installation Parks and Recreation, Department of --Sacramento Install 2 electric vehicle charging stations at California State Railroad Museum to provide additional charging capabilities for fleet and staff vehicles. Work will: saw cut asphalt to excavate an existing utility trench; install approx 200 ft of electrical conduit in trench; pull new electrical wire through the conduit and install a pull box to accommodate change in direction; excavate 2 each of 2'x2'x18' holes to install 2 240-volt smart level 2 EVCS charging unit pedestals; pour cement at base of pedestal to provide stability; excavate 2 12"x24" deep holes in front of each charging unit to install bollards; pour cement around the base of the bollards to provide stability; backfill trench and pour new cement to cover; excavate 2 6"x24" holes and install reserved parking signs; pour cement around base of signs to provide stability; and repaint stall striping for both EVCS stations.	NOE	
2018018018	Agreement among the Department of Water Resources of the State of California, San Luis Obispo County Flood Control and Water Conservation District and Central Water Resources, Department of --San Luis Obispo DWR, on May 16, 2013, executed an agreement (SWPAO #12602) with SLOFCWCD and the Central Coast Water Authority governing the construction, operation and maintenance of the Shandon Turnout. This agreement (SWPAO #17602) corrects some minor mistakes in, and supersedes, the May 16, 2013 agreement (SWPAO #12602) of the same title.	NOE

2018018019	Antelope Creek Fish Passage Improvement Project Geotechnical Investigation Tehama County, Resource Conservation District of --Tehama The proposed action is necessary to develop recommendations related to the design criteria for new fish screen and a retrofit to existing diversion dam. Results of the proposed action will include written recommendations for foundation support, retaining wall design, pipe trenching and backfill and other construction activities related to constructing the new fish screen, concrete headwall structures and siphon pipeline. It is anticipated that the proposed action will require construction of approx 4-6 boreholes, 10-40 ft deep using a truck mounted drill rig with a 6-8 in diameter hollow stem auger bit and/or a coring bit, depending on site conditions. The auger and sampling tube within it will be driven into the ground using a weighted dead-fall type hammer to collect subsurface geologic materials. The approx locations in which the borehole excavation locations include a 20-ft wide buffer from the dripline of existing elderberry and oak trees within the project area. Borehole excavations will be completed by Dec 31, 2017. Once drilled, the boreholes will be filled with either grout or the original excavated cuttings. If the boreholes are filled with grout, the cuttings will be transported offsite. Once filled, the boreholes will be smooth graded to the original grade.	NOE

2018018038	<p>Lot 29 Rake & Scrape Project (Lake or Streambed Alteration Agreement No. 1600-2017-0367-R2) Fish & Wildlife #2 --Calaveras</p> <p>CDFW has executed Lake or Streambed Alteration Agreement No. 1600-2017-0367-R2, pursuant to section 1602 of the fish and game code to Bruce and Catherine Shaw.</p> <p>The project is limited to using an excavator to remove approx 20 cy of built up silt in the center of the cove in addition to scraping the sharp slate outcroppings along the lake perimeter to form a safe swimming area. The excavator will access the lakebed from lot #29 when Tri Dam draws down the water. The exactor will be used to dig and contour the cove to maintain a gentle slope 10:1, jagged slate outcroppings will be scrapped and placed above the 515-ft elevation mark on the property where it will not re-enter the lake or watercourse. Some of the large slate outcroppings that are greater than 1-ft and very dense will remain in place to ensure authentic characteristics of the shoreline.</p>	NOE	
2018018039	<p>Bianchina Dock Excavation Project (Lake or Streambed Alteration Agreement No. 1600-2017-0345-R2) Fish & Wildlife #2 --Calaveras</p> <p>CDFW has executed Lake or Streambed Alteration Agreement No. 1600-2017-0345-R2, pursuant to section 1602 of the fish and game code to Richard Bianchina.</p> <p>Phase 1 of the project is limited to using an excavator to remove approx 1000 cy of soil from the lakebed to lower the bed elevation and level the site for placement of a floating dock. The excavator will access the lakebed in dry conditions when Tri Dam draws down the water. The excavated soil will be placed in a dump truck and deposited onsite where it will not re-enter the lake or watercourse. Phase 2 of the project will occur once the lake level has risen. Phase 2 is limited to using a barge with a pile driver to install (4) 8" support piles under the footprint of the floating dock to support an un-attended dock during extraordinary low lake levels.</p>	NOE	
2018018040	<p>Penn Gulch Culvert Replacement Project (Lake or Streambed Alteration Agreement No. 1600-2017-0369-R2) Fish & Wildlife #2 Murphys--Calaveras</p> <p>CDFW has executed Lake or Streambed Alteration Agreement No. 1600-2017-0369-R2, pursuant to section 1602 of the fish and game code to Calaveras County department of public works.</p> <p>The project includes the removal of a damaged culvert and replacement with a 48" smooth walled high density HDPE. Approx 40 tons of 6" x 18" rip rap will be placed at both the inlet and outlet of the culvert pipe as well as an additional 20 tons of 6" x 18" riprap at the outflow for energy dissipation. The culvert pipe will have a slurry backfill and be paved over when complete.</p>	NOE	
2018018041	<p>Modoc County Zoning Code Amendment Housing Element Update Provisions Modoc County --Modoc</p> <p>Various amendments to Chp 18 of the Modoc County Code, zoning ordinance, to address State of CA Housing Law to accommodate objectives of the Modoc County General Plan Housing Element.</p>	NOE

2018018042	Hettervik Private Dock Project (Lake or Streambed Alteration Agreement No. 1600-2017-0383-R2) Fish & Wildlife #2 --Calaveras CDFW has executed Lake or Streambed Alteration Agreement No. 1600-2017-0383-R2, pursuant to section 1602 of the fish and game code to Bruce and Catherine Shaw. The project is limited to excavation of approx 400 cy of soil from the lakebed and bank to relocate an existing dock structure, which includes leveling the lakebed under the dock and reinstalling the 4 8-in pipe dock support piers. Equipment will access the lake via lot #29. Project activities will occur during lake draw down and in dry conditions.	NOE	
2018018043	Cornell Water Diversion (Lake or Streambed Alteration Agreement No. 1600-2017-022-R2) Fish & Wildlife #2 --Lake CDFW has executed Lake or Streambed Alteration Agreement No. 1600-2017-022-R2, pursuant to section 1602 of the fish and game code to Noah Cornell. The project is limited to the diversion of water from an existing spring box for domestic uses including household, dust suppression, fire prevention, and irrigation. The spring box is approx 18 in long by 24in wide by 12 in deep. It collects water and diverts it to a storage tank via a 1 1/4 in water line. The spring box also has a 1 1/2 in overflow opening allowing water to flow into a class II stream around 30 ft below. All openings on the spring box are screened with 1/32 in screen.	NOE

2018012003	<p>Boca Dam Safety of Dams Modification Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe Truckee--Nevada</p> <p>The Bureau of Reclamation proposes to implement the Boca Dam Safety of Dams Modification Project to correct features of Boca Dam to reduce the risk of structural failure during an earthquake event. There is liquefiable alluvium within the dam's foundation, which could cause embankment deformation, cracking, or immediate dam overtopping during a significant earthquake. Boca Dam and Boca Reservoir are located on the Little Truckee River, east of the Town of Truckee and north of I-80 in Nevada County, CA.</p>	MND	02/01/2018
2017101034	<p>Division 20 portal Widening/Turnback Facility Los Angeles County Metropolitan Transportation Authority --Los Angeles Notes: Revised</p> <p>Metro Issued an NOP for the Proposed Project on Oct. 18, 2017. Subsequent to the end of the scoping period, the Proposed Project footprint has been expanded to include the property at 100-120 North Santa Fe Avenue. Metro's acquisition of the 100-120 North Santa Fe Avenue property would provide a new location for existing Maintenance of Way (MOW) functions that would be displaced by the new storage tracks. The existing building would be renovated and repurposed for use by Metro and no major demolition or construction activities are planned at this location.</p>	NOP	02/01/2018
2018011001	<p>Wellness Center Project Santa Monica, City of Santa Monica--Los Angeles</p> <p>The project would involve the adaptive reuse of approx 7,965 sf of the existing funeral home and chapel building along with the construction of a new addition building for use as a Wellness Center. As part of the project, approx 1,313 sf of the ancillary portion of the existing funeral home/chapel building, composing mainly of the rear alley facing garage section of the building, and both of the vacant residential structures would be demolished. The project would include the construction of a new 3-story, 45 ft tall addition building on-site, comprising approx 59,548 sf. With the adaptive reuse of existing floor area and new construction, the project would be approx 67,513 sf comprising of 53,091 sf of research & development uses, 17,702 sf of clinic/office uses, and 8,239 sf of ancillary meeting/conference room space.</p>	NOP	02/01/2018
2018012001	<p>McCloud Artesian Spring Water Bottling Facility Project McCloud Community Services District --Siskiyou</p> <p>The proposed project would consist of the operation of a water bottling facility on a 22.11 acre parcel (Parcel 1) for the production of artesian spring water at the gravity fed source within the proposed project site. The proposed bottling facility would be approx. 105,000 sq. ft. and consist of two primary components: Finished Product Warehouse (45,000 sf) and Production Area (60,000 sf). The project would include associated on and off-site infrastructure improvements to support the proposed development, such as provision of domestic water, fire flow water, and waste water service.</p>	NOP	02/01/2018

2018018046	NorthRidge Trail Walnut Woodland Restoration (17/18-IE-7) Parks and Recreation, Department of Chino Hills--Orange A community of California walnut woodland within Chino Hills SP, a habitat type identified as sensitive by the California department of Fish and Wildlife, is being impacted by road known as North Ridge Trail. Poor road placement and its required maintenance are causing excessive erosion, resulting in the loss of trees as well as impacting the overall health and value of the walnut woodland in this area of the park. State Parks is proposing walnut woodland restoration as well as reducing the footprint of the road by converting a section of it from a road to a trail. This will reestablish proper drainage and reduce the degradation of the slope. The entire project footprint is approximately 3.50 acres in size; of that, approximately 1.43 acres are currently service road. The project will reduce the road to a multi-use trail, a reduction of approximately 0.71 acres. The area of the walnut been incorporated into this project.	NOE

Fish and Game Code to Twin Lakes Estates, represented by Ms. Linda Heape
The project is limited to sediment removal in two locations and bank protection within a man-made impoundment, or pond, for purpose of flood protection by increasing channel capacity. A perched gravel bar that has an area of approximately 50 feet x 45 feet will be excavated a depth of 3 feet at the head of the pond where sediment has deposited below the culvert outlet. Additionally, an area approx. 50 feet x 75 feet surrounding the island downstream of the perched gravel bar will be excavated approx. 2 feet in depth to reestablish the original creek bed depth.

2016081071	Making Downtown Bakersfield Vision Plan EIR Bakersfield, City of Bakersfield--Kern The plan was establish a strategic vision of the future development of the high speed rail station and the surrounding areas. The plan will address key factors affecting future development within the plan area, including but not limited to: land use patterns in the context of the metropolitan Bakersfield general plan, architecture and urban design, infrastructure, multi-modal transportation services and circulation, parking, pedestrian and bicycle access, open space and recreation, arts and culture, and other principal factors. The plan envisions a phased approach to future physical development, including a long term (30 year) development projection which envisions the following development statistics: up to 2,005,000 sf of office; up to 8,570 residential units; up to 906,988 sf of retail; and up to 2,413 hotel rooms.	EIR	02/20/2018
2017051070	Desert Land Ventures Specific Plan Desert Hot Springs, City of Desert Hot Springs--Riverside The project applicant, Desert Land Ventures III, proposes adoption of a SPA01-16 to develop a 123.4-acre area with approx 1,897,799 sf of mixed use industrial and commercial development. In addition to adoption of the DLVSP, the proposed project includes a GPA01-16, ZMA01-16, VTTM 37185 and development agreement. Approx 62.9 acres of the project site would accommodate a mix of industrial and commercial land uses and up to 150 hotel rooms/keys. Approx 38.7 acres of the site would be set aside for Open space/conservation within the CVMSHCP Willow Hole Conservation Area, and only 10 % would be developed with water or energy facilities, consistent with the CVMSHCP.	EIR	02/20/2018
2017061039	MiraCosta Community College District Oceanside Campus Facilities Master Plan Miracosta Community College District Oceanside--San Diego The Miracosta Community College District Oceanside Campus Facilities Master Plan is necessary to address the identified space deficiencies and functionality issues currently present on campus, as well as support the projected student, faculty, and staff growth for this campus. In order to accommodate this growth and the changing needs of the student body, faculty and staff, new facilities would be	EIR	02/20/2018

2016011056	Draft Environmental Assessment for the Fortification of Security Gates at the Jet Propulsion Laboratory National Aeronautics and Space Administration Pasadena--Los Angeles This Draft Environmental Assessment (EA) evaluates environmental impacts associated with a suite of outdoor scientific development and testing activities at NASA Jet Propulsion Lab on-site and within other appropriate landscapes in close proximity to NASA JPL, including the adjacent Arroyo Seco.	EA	02/07/2018
2018011010	Mecca II Landfill Closure and Post-Closure Maintenance Project Riverside County --Riverside The Mecca II Landfill is open only two days per year. As the landfill is nearing its disposal capacity, the RCDWR is preparing for the closure and post-closure maintenance of the Mecca II facility. The proposed project involves two phases: phase 1 involves activities associated with the closure of the landfill; excavation and grading for the construction of the final cover, placement of erosion control materials, and construction of drainage structures. Phase 2 involves the post-closure maintenance, monitoring, and enhancements of the landfill's environmental systems.	MND	02/07/2018
2018012012	500 Pittsburg Avenue, Richmond, Warehouse Distribution Facility, County File #DP14-3041 Contra Costa County Richmond--Contra Costa The applicant is requesting approval of a development plan for the purposes of constructing and operating a new 482,055 sf warehouse distribution facility. The project includes: 1) off-street parking, 2) frontage improvements, 3) removal of 21 trees, 4) drainage improvements and 5) 244,238 cy of grading (4,932 net import). An approx 1.3-acre "future retail pad" will be reserved at the northwest corner of the site. The project also includes off site roadway improvements aimed at reducing cut through semi truck traffic in the residential portion of North Richmond, a county GPA request to change the site's current multiple-family designation to business park, and levee improvements along the southern edge of the property.	MND	02/07/2018

2018018125	Jackson Demonstration State Forest - Arrants Land Exchange Forestry and Fire Protection, Department of Fort Bragg--Mendocino The project consists of exchanging land with adjacent land owner (Arrants) within the Jackson Demonstration State Forest and adjusting the property lines. In 2007, a boundary survey conducted by CAL FIRE Surveyors, determined that Arrants has encroached on 2.01+/- acres of State land, and survey maps and legal descriptions were prepared. This encroachment consists of a relatively flat portion of land that contains outbuildings and has been used for parking and storage of personal property. A small portion of the driveway also straddles the property line onto State land. In order to resolve the encroachment issue and to avoid any potential litigation, Cal Fire will convey 2.02+/- acres to the Arrants consisting of 1.98 acres along the western boundary property line and a small 0.04acre triangular square at the northeast corner of the property. Arrants will transfer 2.01 acres to the state, consisting of 0.67 acres at the northwest corner, 0.46 acres at the northeast corner, and 0.88 acres at the southeast corner of the parcel. All lot lines will be moved accordingly. No other activities would take place on the parcels.	NOE	
2018018126	Jackson Demonstration State Forest - McCracken/Chamberlin Property Boundary Adjustment Forestry and Fire Protection, Department of Fort Bragg--Mendocino The project consists of accepting new survey boundaries, granting an access easement to adjacent landowners (McCracken and Chamberlin), removal of a barbed wire fence, and placement of a rock barrier. The property is located on, and adjacent to, the Jackson Demonstration State Forest. A legal dispute between two adjacent landowners brought forth boundary issues on record for the property lines of the JDSC and adjacent property owners. The original boundaries were surveyed in 1867 and were used to determine several subsequent land divisions until 1979 when Peter J. Joos re-surveyed. The lawsuit over property boundaries ended in a determination by the Superior Court of Mendocino County was found in favor of the newer survey boundaries necessitating CAL FIRE to accept these boundaries and revise parcel lines accordingly, grant an access easement to the adjacent landowners, and make minor modifications through removal of a barbed wire fence and install a rock barrier. 	Reservoir site. The District will construct new secondary treatment facilities, and continue discharging under the TUD waste discharge permit. In addition, a tertiary treatment and disinfection facility for a sidestream of approx. 30% of the design flow would be included. Tertiary treated water will be available to the public at an onsite recycled water fill station for on-site pick-up and off-site use at currently undefined locations. The existing Wood's Creek WWTP would continue to operate to a limited extent as a support facility for the Quartz facility. Administration offices would relocate to the Quartz site.		
2016111044	The Culver Studios Innovation Plan, Comprehensive Plan Amendment No. 7 Culver City Culver City--Los Angeles Project, which is reflected in the proposed Comprehensive Plan Amendment No. 7 would technologically update and expand the facilities within the Project Site. No major exterior changes are proposed to the Mansion or adjacent Buildings D, E, H, and I. The project would modernize and expand the Central Area of the Project Site for a net new sq. footage of approx. 345,007 sf. The Project would also include two new parking structures, the Central Parking Structure (836 spaces) and the Van Buren Parking Structure (1,109 spaces). Construction is anticipated to start in the first quarter of 2018 and is anticipated to be completed mid 2020.	NOD	
2017092065	Fair Oaks Boulevard Complete Streets Master Plan Sacramento County Sacramento--Sacramento The purpose of the proposed project is to improve bicycle and pedestrian mobility within the Fair Oaks Blvd corridor. Fair Oaks Blvd currently serves as a 6-lane thoroughfare between Howe Ave. and Munroe St., and is paralleled by two 2-lane frontage streets from University Avenue to Fulton Ave. The frontage roads will remain in their existing capacity as two-way streets after this project. The Master Plan creates a "complete street vision for the section of Fair Oaks Blvd., from Howe Ave. to Munroe St and Fulton Ave. from Fair Oaks Blvd to Munroe St., incorporating concepts to improve pedestrian, bicycle, public transit and motorist mobility. Although the Fair Oaks Complete Streets Master Plan is a master plan document, it is analyzed on the project level due to the small size of the project and the narrow scope of the document. Improvements to the corridor are planned in multiple phases, with funding currently allocated for Phase One improvements. Phase One includes the planning, design, and construction of the two signalized pedestrian crossings on Fair Oaks Blvd. Phase One is fully funded by the Sacramento Area Council of Governments 2014 Bicycle and Pedestrian Funding Program. Future phases of the project will construct the improvements developed in the Master Plan.	NOD	
2017101055	De Anza Sewer Force Main Project Eastern Municipal Water District San Jacinto--Riverside EMWD proposes to implement the De Anza Sewer Force Main Project to construct 7,500 linear feet of a new 15-in diameter sewer force main entirely within the paved portion of N. Sanderson Ave and within paved entrance driveways from the De Anza Lift Station to the headworks of the San Jacinto Valley Regional Water Reclamation Facility, in San Jacinto, Riverside County, CA. 	California Aqueduct. In exchange, LTRID will receive from TLBWSD a comparable amount of TLBWSD's local surface water supplies.		
2018018152	Solar Electric Vehicle Charging Station Parks and Recreation, Department of -- Install one (1) solar powered electric vehicle charging station at Natural Bridges State Beach to provide charging capabilities for fleet, staff, and public vehicles. The charging unit is self-sufficient and can be install and/or relocated without ground disruption. Work will involve selecting a level parking space in the main parking lot and placing the unit in the chosen parking space.	NOE	
2018018153	Zephyr Debris Removal Pilot Project San Diego Unified Port District -- The proposed pilot project involves the operation of a trash-skimming vessel in San Diego Bay for debris removal for a total of one (1) year. The project is intended to analyze the effectiveness and scalability of the trash skimming vessel and would develop a database for key variables influencing marine debris accumulation in San Diego Bay such as seasons, weather events, and tidal swings.	NOE	
2018018154	Replacement of Water Fountain Tiles at Cancer Survivors Park San Diego Unified Port District -- The proposed project involves the replacement of the water fountain tiles at Cancer Survivors Park in San Diego, California. The proposed project would repair deterioration of existing ceramic tiles on an existing water fountain, consequently extending their useful life. The existing tiles would be replaced with glazed cobalt blue tiles. Specific work to complete the proposed project includes the following: - Removal and replacement of the existing blue tiles; and - Waterproofing of the newly installed tiles It is anticipated that construction would commence in late 2017 and would take approximately two months to complete. Due to its nature and limited scope, construction of the proposed project would generate a minor amount of vehicle trips and would require limited use of construction equipment. Finally, the applicant would be responsible for complying with all applicable federal, state, and local laws regarding construction demolition debris recycling, hazards and hazardous materials, and storm water.	NOE	
2018018155	Lease of Searles Valley Minerals Inc San Diego Unified Port District -- The proposed project is a short-term lease to Searles Valley Minerals, INC. (Tenant) for their continued use of approximately 145,635 square feet of tideland area of approximately 15.282 square feet of conveyor air space area located at 1090 Water Street at the Tenth Avenue Marine Terminal (TAMT) located in the city of San Diego, CA. The area proposed for use under this short term lease is currently and is proposed to be used only and exclusively for the purpose of importation, storing, and export of dry bulk commodities including soda ash, potash, sodium bicarbonate, borates, salt cakes, and other similar nontoxic, nonhazardous dry bulk products for no other purpose whatsoever. The Tenant would be responsible for compliance with all laws and regulations associated with the activates on or in connection with the above-described premises.	NOE

2018018157	1F840: Radar Feedback Signs and ADA Curb Ramps Caltrans #10 --Tuolumne Caltrans proposes a safety project to install radar feedback signs, relocate two existing crosswalks, and install ADA curb ramps. Right of way may be required to install the ADA curb ramps. The purpose of this project is to alert motorists of crossing pedestrians and to reduce their speed. The need for this project is to reduce the number of collisions between motorists and pedestrians crossing SR 120.	NOE	
2018018158	Monitoring Wells for Amargosa Conservancy Inyo County --Inyo The applicant will install six ground monitoring wells in the vicinity of Shoshone/Tecopa, CA. The well installation will be conducted through sonic drillings so no spoils ponds will be required and the project site is already disturbed. All access to the well sites will be via Bureau of Land Management designated routes.	NOE	
2018018159	Spring Creek Road Crossing Removal Project (Streambed Alteration Agreement No. 1600-2017-0139-R4) Fish & Wildlife #4 --Mariposa CDFW has executed Streambed Alteration Agreement No. 1600-2017-0139-R4, pursuant to Section 1602 of the Fish and Game Code to Louie Edwards. Project includes activities related to the removal of a 32-foot long 8-foot wide road crossing and associated structures from Spring Creek.	NOE	
2018018160	2018 Annual Coastal Cathodic Protection Survey Water Resources, Department of --Kern Annual testing at vault test stations along the DWR San Joaquin Field Division right-of-way. Access via established paved roads and dirt farm roads in a standard truck. Surveys will take approx. 2 days to complete. Beneficiaries include all recipients of the State Water Project.	NOE	
2018018161	Iron Canyon Emergency Protective Measures (Streambed Alteration Agreement No. 1600-2017-0132-R5) Fish & Wildlife #5 --Los Angeles CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0132-R5, pursuant to Section 1602 of the Fish and Game Code to Los Angeles County Flood Control District. Project is limited and involves routine maintenance and repair activities to maintain the post-Sand Fire emergency measures created in the debris basin in Iron Canyon, such as protection of functions and capacities for the unexpected duration of watershed recovery (estimated 5 years). The Project will primarily involve maintenance of debris barriers and removal of deposited debris that results from storm events. The debris deposition produces various loads of force against the barriers, and debris removal will prevent excessive force from building up and exceeding debris barriers design strength. As-needed repairs to the debris structures or repair and/or replacement of damaged/worn structural elements are expected.	NOE

The KWBA is a public agency that includes several water districts, a water agency, and a mutual water company as its members. The KWBA filed a water right application (Application 31676) in September 2007 with the State Water Resources Board to appropriate additional water from the Kern River when available. The appropriation of water from the Kern River would supplement the water received by the KWBA Participating Members from the SWP via the CA Aqueduct, the CVP via the Friant-Kern Canal, and directly from the Kern River through purchases and transfers.	EIR	02/26/2018
2016042039	City of Livermore Isabel Neighborhood Plan Livermore, City of Livermore--Alameda The City of Livermore is preparing the Isabel Neighborhood Plan (INTP), which is a specific plan that guides development of the area surrounding the proposed SF BART extension to Isabel Ave in Livermore. The project proposes development of up to 4,095 new multi-family housing units, a neighborhood commercial center that may include a grocery store and other neighborhood serving retail uses, approx 2.1 million sf of new non-residential development, and a pedestrian and bicycle trail plan. The proposed plan is both a policy document and an implementation tool for the GP. It contains strategies, regulations, goals, and policies to guide future development within the Isabel Neighborhood or planning area. The SP details the proposed land uses and their development standards, transportation, infrastructure improvements, environmental resources, design standards and guidelines, a financing strategy, and implementation tools. 2009081079	Pier B On-Dock Rail Support Facility Long Beach, Port of Long Beach--Los Angeles The proposed project would be the expansion of an existing rail support facility located at Pier B in the Port of Long Beach. The project would result in additional railcar storage and staging capacity, including additional rail tracks for locomotive refueling, railcar repair, and to accommodate the assembly of cargo trains up to 10,000 ft long. The project would require realignment of Pier B St and closure of an existing grade crossing at 9th St. The full build out alternative of the project would require removal of existing ramps to and from the Shoemaker Bridge. The environmental effects anticipated to remain significant following mitigation include: 1) Air emissions associated with construction and operations; and 2) GHG associated with operations.	FIN	
2016031029	Sapphire Project Los Angeles, City of Los Angeles, City of--Los Angeles The project includes the demolition of the existing structures on-site, and the development of a residential and commercial mixed-use project consisting of 369 residential apartments and approx. 22,000 sf of ground-floor commercial space. The project would consist of the construction of two buildings (North Building and South Building) that would be connected by a footbridge spanning above the adjacent alleyway. The North Building would include 142 apartments within 7 levels and would front 5th St. The South Building would include 22,000 sf of ground-floor retail space and 227 apartments within 6 levels above the ground-floor retail and would front both 6th St. and Bixel St. The project would contain approximately 348,431 sf of developed floor area.	FIN	
2017092051	Cupertino Pedestrian Transportation Plan Cupertino, City of Cupertino--Santa Clara The project proposes to implement the city's Pedestrian Transportation Plan, a plan to construct pedestrian network facilities and improvements to existing facilities throughout the city of Cupertino. New facilities would be constructed in existing ROW. Larger project components (i.e. pedestrian/bicycle bridges), would be subject to further environmental review.	MND	02/12/2018
2018011017	Permanent Supportive Housing Ordinance (CPC-2017-3136-CA) Los Angeles, City of Los Angeles, City of--Los Angeles An ordinance amending sections 12.03, 12.04.09, 14.00 and 16.05 of the LA Municipal code establishing regulations to facilitate the production of permanent supportive housing, including adopting regulations that define PSH & Project eligibility criteria, establish unique development standards for PSH, and facilities administrative review & approval, as well as modify certain provisions related to height & density, consistent with state density bonus law. The PSH Ordinance would allow for projects to select concessions with respect to zoning code, including up to 20% increase in required setbacks, up to 20% reduction in required open space, up to a 35% increase in height or one additional story. Additional design requirements include that when adjacent to or across an alley.	MND	02/12/2018

2018011018	CHC Lompoc, City of Lompoc--Santa Barbara A request by Community Health Centers of the Central Coast, Inc. to construct a 28,000 sf Health Center consisting of medical offices, development plan, GPA, Zone Change, and lot line adjustment.	MND	02/12/2018
2018012015	Willow Creek Bridge on Carbondale Road Bridge Replacement Project Amador County --Amador The proposed project would replace the existing bridge with a new structure accommodating two 11-ft wide lanes, 2-ft wide shoulders and bridge railings, resulting in an approx bridge width of 29 ft. The new bridge would consist of an 80-ft long two-span, cast in place, reinforced concrete slab supported on spread footings. The roadway alignment would remain unchanged. Along with a longer bridge, the roadway profile would be raised by approx 4 ft to provide required hydraulic capacity. The western roadway approach would begin approx 145 ft east of the Forest Home Rd/Carbondale Rd intersection, approx 400 ft west of the proposed bridge. The eastern approach would begin approx 560 ft east of the new bridge. Silver ROW acquisition would be required on south side of the road.	MND	02/12/2018
2018012017	Humboldt Boutique Gardens, MBC, Conditional Use Permit Application Number 11304 Humboldt County Fortuna--Humboldt A CUP for phase 1 of a two-phase project involving the development cannabis cultivation, processing, and nursery facilities on a 2.7 acre parcel. Phase 1 consists of constructing the first warehouse and establishing and operating cannabis cultivation and processing within it. Specifically, 8,560 sf new indoor cannabis cultivation within a 13,000 sf building that would be 28 ft in height, served by an on-site septic system and well. This building's interior would consist of six 24 ft x 40 ft flowering rooms, a 240 sf propagation room for developing clones, a 240 sf mother room, and a 2,080 sf vegetative room for the tending of plants before they are placed in the flowering rooms. Processing and packaging operations are also proposed. The remaining space in the warehouse would consist of a processing room, a drying room, and a packaging room in addition to general storage, a truck bay, office, and bathroom facilities.	MND	02/12/2018
2018012018	Town of Fort Jones Wastewater Improvement Project Fort Jones, City of Fort Jones--Siskiyou Existing wastewater treatment facility upgrades to modernize equipment and processes, including the land acquisition of approx 1.0 acres for facility improvements.	MND	02/12/2018
2018011019	River Street Project San Juan Capistrano, City of San Juan Capistrano--Orange The River Street Project includes the development of just under 65,000 sq. ft. of commercial and office space in five buildings designed with an "Agrarian" themed architecture, ranging in height between 25 and 35 feet. Project implementation requires City Council approval of a Code Amendment (CA 16-003) to the Los Rios Specific Plan (SP 78-01), Architectural Control (AC 16-029), Grading Plan Modification (GPM 16-014), Flood Plain Land Use Permit FP 16-003, Tree	NOP	02/12/2018

	Removal Permit (TRP 16-047), Site Plan Review (SPR 16-007), Sign Program (SP 16-037), and Development Agreement.		
2018012016	Habor View Point Redwood City Redwood City--San Mateo Project is a high tech office campus with four 7-story (100-foot tall) office buildings, one 4-story and one 6-story parking structure, and a one-story employee amenities building. The office campus is centered with an approx. four-acre green space, and 10% of the site is reserved for public access. The proposed project will develop 1,179,747 sq. ft. of commercial office use, in addition to 35,000 sq. ft. of amenities use. The four proposed office buildings are each approx. 286,000 sq. ft. The proposed project includes up to 3,855 on-site parking spaces. The project applicant proposes to implement a Transportation Demand Management Program (TDM) to reduce vehicle trips by 30%. Project proposes a General Plan Amendment and Rezoning from light industrial to commercial classifications.	NOP	02/12/2018
2005051059	The District at South Bay Carson, City of Carson--Los Angeles Notes: Response to Comments The City of Carson will considering an amendment to the Boulevards at South Bay Specific Plan adopted by the City (to be renamed "The District at South Bay Specific Plan") and related improvements. Specifically, the revised project would modify or otherwise reduce the scope of the original project to ultimately consist of approx. 1,601,500 sq. ft. of regional commercial, general commercial and related uses, including outlet and entertainment uses, no more than 1,250 residential units, and 350 rooms total in two hotels. The 2006 EIR previously assessed proposed remediation of the project site. The proposed revised project retains the phased remediation of the project site and the subsequent development of urban uses, although clarifications are provided as to how development will be proposed to take place in phases.	Oth	
2003021141	Addendum to FEIR 584 and FEIR 589, Trampas Canyon Dam and Reservoir Project Orange County --Orange Project would provide seasonal and operational storage of 5,000 acre feet of recycled water to meet demands for nondomestic water in South Orange County within the Applicant's service area. The project would reconstruct and raise the earth fill dam, construct an emergency outlet, and replace the spillway.	NOD	
2013021017	Livingston Median Widening Caltrans #6 Livingston--Merced CDFW has executed Streambed Alteration Agreement No. 1600-2017-0169-R4, pursuant to section 1602 of the Fish and Game Code to the project applicant, Caltrans. The project involves widening the existing 2-lane northbound span of the SR 99 Bridge over the Merced River, and the establishment of mitigation plantings near the Project site.	NOD
