

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

July 1 – 15, 2015

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **July 1 – 15, 2015**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

<u>Documents Received on Wednesday, July 01, 2015</u>			
2014112001	915 DeGuigne Residential Project Sunnyvale, City of Sunnyvale--Santa Clara The project would demolish all the existing industrial buildings on the project site to allow for construction of up to 450 attached townhouses (18.5 dwelling units per acre) and a public park. The townhouses would be located on Parcel 1 and the park would be located on Parcel 2. The townhouses would range from two to four bedrooms. The two bedroom units would have a one-car attached garage, and the three and four bedroom units would have an attached two-car garage. Additional resident and visitor parking (313 spaces) would be provided along the internal access roads. The buildings would all be three stories with building heights of 35 to 40 feet as measured from the top of the nearest public curb.	EIR	08/14/2015
2015021016	Del Sur Solar (CUP 14-15, CUP 14-16, GPA 14-03, ZC 14-03) Lancaster, City of Lancaster--Los Angeles The proposed project consists of the construction and operation of an 100 megawatt solar electricity generating facility and associated generation-tie lines. The proposed project will be constructed in phases and operated for a period of at least 35 years. The proposed project will consist of the following elements: photovoltaic modules, module mounting system, balance of system and electrical boxes, electrical inverters and transformers, electric AC collection system including switchgear, data monitoring equipment, transmission and generation-tie lines, access roads and security fencing.	EIR	08/14/2015
2015021018	Azusa TOD Specific Plan Azusa, City of Azusa--Los Angeles The project area is approximately 308 acres in size, with approximately 170 acres potentially receiving new development opportunities, and approximately 138 acres of no-change areas. The intent of the project is to create a regulatory document to establish the framework for transit-oriented, livable, economically vibrant, and pedestrian-friendly areas within the specific plan boundaries. Based upon market demand and individual property owner decisions, existing land uses may change and transition slowly or quickly over time. Those current land uses inconsistent with the Azusa TOD Specific Plan would become non-conforming and remain in place until the property owner(s) decide to sell and/or redevelop their properties.	EIR	08/14/2015
2013112046	Analysis of Oil and Gas Well Stimulation Treatments in California Conservation, Department of -- Notes: FYI Final As noted in Section ES.1 (Introduction), well stimulation treatments include, but are not limited to, hydraulic fracturing treatments and acid well stimulation treatments and do not include steam flooding, water flooding, or cycling steaming. Additionally, such treatments do not include routine well cleanout work, routine well maintenance, routine removal of formation damage due to drilling, bottom hole pressure surveys, or routine activities that do not affect the integrity of a well or formation. For the purposes of this EIR, well stimulation treatments include hydraulic fracturing, acid fracturing, and acid matrix stimulation. This EIR does not	FIN

	evaluate high rate gravel packing when it is used to control sand within a well; however, gravel packing treatments that are performed for well stimulation with the intent of fracturing a geologic formation are considered.		
2013112014	Novato Disposal Recycling Center Use Permit Modification Sonoma County Petaluma--Sonoma Request for modification of a previously approved Use Permit (PLP02-0072) for a recycling center to eliminate the previously permitted public recycling buy-back/drop off business, portable toilet rental business, and used tire recycling operation, and a reduction in the maximum allowed 500 tons per day (TPD) of light processing recycling to 130 TPD of non hazardous construction debris inert, and 140 TPD of single stream recycling materials, and 25 TPD of cardboard recycling (for a total reduction of 500 TPD down to 395 TPD arriving on site), all within an existing building on site, and minor design changes to the previously approved canopy's over existing concrete work areas on the south and north side of the maintenance/mechanic building, and change hours of operation to 24 hours per day.	MND	07/30/2015
2014051063	Avenue 66 Grade Separation Project Riverside County --Riverside The County proposes to construct a new grade separation and roadway to cross the Union Pacific Railroad and Highway 111 from Avenue 66 to Lincoln Street in the community of Mecca. The total length of the project is approximately 1.5 miles. Currently, the only UPRR crossing in the area is at 4th Street; because the 4th Street crossing is at-grade, east-west travel is delayed when trains cross.	MND	07/30/2015
2015071003	Heber Geothermal Company (HGC)/ORMAT Nevada, Inc. CUP #15-0013 Imperial County --Imperial The proposal is to expand the existing geothermal dual-flash and binary facility by adding one additional Ormat Energy Converter (OEC 14) adding a gross 16 megawatts to the existing facility and modify one of the existing Gould 1 Ormat Energy Converters (OEC 12). Construction will take approximately eight weeks with an estimated 50-60 workers for excavation and pouring of the slab foundation for the new OEC that will utilize brine from the existing facilities via existing pipelines, except for piping modifications to connect the new OEC 14 to the Gould 1 OEC 12.	MND	07/30/2015
2015072001	Main Gate Road and "C" Street Project Novato, City of Novato--Marin The project includes a total of 31 residential units in 8 three-story buildings and 1 two-story building. The unit mix include 21 three-bedroom and 10 four-bedroom townhomes. The project includes a large central common park space and small pavilion and parklet along the sidewalk on Main Gate Road. Additional front yards, upper-story balconies, and landscaped areas are provided. There are two vehicular entry points on "C" Street and one on Main Gate Road. Each unit is provided with two tuck-under parking spaces. There are 17 additional parking spaces along the internal alleyways.	MND	07/30/2015

2015072002	<p>Clarksburg Area Community Plan Update (Amendment to the Yolo County 2030 Countywide General Plan) Yolo County --Yolo</p> <p>The project is an amendment to the 2030 Countywide General Plan through an update to the 2001 Clarksburg Area General Plan. The 2015 Clarksburg Area Community Plan satisfies Community Character Policies in the Countywide General Plan that require all Area General Plans to be updated in the form of new Area Community Plans. The project also includes a land use designation change from Industrial to Commercial General at the Old Sugar Mill site. This land use change was not previously considered in the Countywide General Plan EIR, but more accurately reflects ongoing and prospective new uses at the site.</p>	MND	07/30/2015
2015072004	<p>Bullock Bend Mitigation Bank Project Yolo County --Yolo</p> <p>The project is a Use Permit, a Flood Hazard Development Permit, grading permit, and a Williamson Act Open Space Agreement, to construct a mitigation bank for juvenile salmonid (salmon) and Swainson's hawk nesting habitat. The project site is an oxbow of the Sacramento River and is bordered by the Sacramento River on three sides. The interior 88 acres of the oxbow is a cultivated field. Agricultural land surrounds the project site on the west side in Yolo County and across. The project would breach the existing farm berm along the Sacramento River and excavate back-water channels to restore floodplain function and create seasonal aquatic habitat on approximately 96 acres that would be newly inundated during Sacramento River flood events.</p>	MND	07/31/2015
2015071001	<p>Mission Place Project South Pasadena Unified School District South Pasadena--Los Angeles</p> <p>The proposed project consists of developing a 1.27-acre surface parking lot owned by the SPUSD with a three-story, 85,775-sf mixed-use project comprising two new buildings. In total, the project proposes 91 multi-family residential units (8 two-bedroom units and 83 one-bedroom units), 7,000 sf of ground-floor commercial space fronting Mission Street, and 228 parking spaces in three levels of underground parking. Vehicular access would be provided via two full-access driveways into the proposed three-level subterranean parking garage: a resident parking driveway on Diamond Avenue and a commercial and District parking driveway on Fairview Avenue.</p>	NOP	07/30/2015
2015071002	<p>San Jacinto Valley Enhanced Recharge and Recovery Program Eastern Municipal Water District San Jacinto--Riverside</p> <p>Eastern Municipal Water District is proposing to construct and operate the San Jacinto Valley Enhanced Recharge and Recovery Program. The Proposed Project would aid in supplementing current and future water supplies by recharging imported water and local supplies (such as storm water) in the local groundwater basin. Supplies would be used for extraction seasonally and during dry periods, such as a prolonged drought and for conjunctive use. Water supplies from the bank would be for use within the District's service area. Water from the bank could also made available to the District's sub-agencies or other regional water agencies through an exchange, with no physical export of local supplies.</p>	NOP	07/30/2015

<u>Documents Received on Wednesday, July 01, 2015</u>			
2015071004	AAT Solana 101 Solana Beach, City of Solana Beach--San Diego The proposed project is the construction of a new mixed use development. The proposed development would include commercial office space, retail and restaurant space, 31 multi-family residential units, and two floors of underground parking. Vehicle access to the project site would be provided via one full movement driveway from Dahlia Drive. Existing structures on site would be demolished.	NOP	07/30/2015
2015072003	Cordilleras Mental Health Center Replacement Project San Mateo County Redwood City--San Mateo The Cordilleras Mental Health Center was originally built in 1952 as a tuberculosis hospital and was converted to a psychiatric facility in 1968. The County proposes replacing the 3-story CMHC building with five 16-bed residential buildings and a campus center building with up to 55 beds on its upper floor. The project would be designed with LEED measures including solar panels on the buildings. The residential capacity of the CHMC would be expanded from 117 to 135 beds. Facility staffing would be increased from 86 to 145 full-time equivalents. Parking would be expanded from 65 to 85 spaces. The project is proposed to address building safety standards, provide current treatment practices and support services, and meet requirements for federal reimbursement.	NOP	07/30/2015
2014042032	Sacramento Commons (P14-012) Sacramento, City of Sacramento--Sacramento Notes: Response to Comments. The proposed project provides for two development options (or scenarios). The Hotel / Condo / Retail Scenario would construct a 300-room hotel, up to 1,171 new dwelling units (increasing the total within project site to 1,374), and up to 70,000 sf of neighborhood support/retail space. The Condo / Retail Scenario would construct up to 1,267 new dwelling units (increasing the total within the project site to 1,470) and up to 52,000 sf of neighborhood support/retail space. Both scenarios would remove 206 existing garden apartments and retain the existing Capitol Towers building (which contains 203 apartments). The project site is approximately 10.13 net acres in land area.	Oth	
1990010859	Desalination Project Santa Barbara, City of SANTA BARBARA--SANTA BARBARA The City proposes to reactivate the previously constructed and operated Charles E. Meyer Desalination Plant. The State Lands Commission action is a termination of the existing lease and an approval of a new 25-year General Lease - Public Agency Use through June 29, 2040, for the discharge of brine mixed with treated wastewater effluent through an existing 48-inch diameter pipeline on sovereign land. 1999121065	Lake Mathews Underdrain Reconstruction and Weed Abatement Program Metropolitan Water District of Southern California Riverside--Riverside The California Department of Fish and Wildlife (CDFW) has executed Streambed Alteration Agreement number 1600-2014-0014-R6 [Revision 2], pursuant to section 1602 of the Fish and Game Code to the project Applicant, Metropolitan Water District of Southern California. The Lake Mathews and Cajalco Creek Dam and Detention Basins Long-term Routine Maintenance project includes the long-term, ongoing routine maintenance of ten (10) existing facilities at Lake Mathews, including: the Cajalco Creek Dam and Detention Basin, Lake Mathews Sediment Basins 1-4, underdrain, North and South spillways, and two weirs (Weirs 1 and 2).	NOD	
2008071003	Sunset Time Project West Hollywood, City of West Hollywood--Los Angeles The applicant, Sunset Subsidiary LLC, proposes minor modifications, as described on Exhibit A, to the Sunset Time project previously approved by the West Hollywood City Council on September 20, 2010, to construct up to 149 hotel rooms and ancillary commercial and support areas, 40 residential condominium units, and five low-income affordable housing units. On September 7, 2010, the City Council certified the Final EIR for the project, adopted a mitigation monitoring and reporting plan, and adopted a statement of overriding consideration finding that the Project's economic and social benefits would outweigh the project's significant and unavoidable environmental impacts in the areas of construction related air quality, construction noise and vibration, and operation traffic. An Addendum to the Final EIR was prepared to analyze whether the proposed minor modifications to the project would result in any new significant impacts which were not identified in the previously certified EIR or would cause previously identified significant impacts to be substantially greater. The Addendum and the technical studies and analyses in the City's administrative record demonstrate that the minor	NOD

The proposed facility will increase the existing Administration Building by approximately 4,600 sq ft of new field laboratory, multipurpose meeting space, restrooms and support space and will remove approximately 1,600 square feet of space.	NOE	
2015078003	Walnut Canyon Reservoir - Long Term Maintenance Agreement Fish & Wildlife #5 Anaheim--Orange The proposed Project consists of a 20 year maintenance agreement for the routine landscaping maintenance at Walnut Canyon Reservoir (Reservoir). The 920 million gallon reservoir supplies Colorado River water to the Anaheim area. The Reservoir has no direct link to the Santa Ana River except under emergency situation; the water could be diverted to the Santa Ana River via the Walnut Canyon Diversion Channel. No work is to occur in the Walnut Canyon Diversion Channel. In addition to the Reservoir a small drainage that collects local run-off is located just east of the Reservoir. The proposed activity includes the trimming of vegetation around the reservoir and the drainage. For the purpose of this Agreement, only the vegetation associated with the drainage is jurisdictional.	NOE	
2015078004	Infrastructure Repairs General Services, Department of Los Angeles, City of--Los Angeles The project consists of: Replacement of four Thermal Energy Storage (TES) Tanks Liners with a coating product and replace all the TES pipes, valves, controllers and appurtenances. In addition, the project will replace approximately 30,000 LF of the building's Fire Sprinkler and Domestic Water System's pipes, the fire jockey pumps, pressures gauges, valves, water softener system, and brine tank.	NOE	
2015078005	Rubberized Hot Mix Asphalt (HMA) Overlay Project Caltrans #3 Willows--Glenn The project proposes to remove existing pavement and replace with Rubberized HMA on the mainline. Work includes repairing/replacing bridge approach slabs, reset/upgrade metal Beam guardrail, replace loop connectors and shoulder rumblestrips. ADA requirements will be implemented at curb ramps.	NOE	
2015078006	Permission to Enter State Sovereign Lands for sand collection, Bolsa Chica Lowlands Restoration Project, Orange County-W025306A California State Lands Commission --Orange Permission to Enter State Sovereign Lands for sand collection, Bolsa Chica Lowlands Restoration Project, Orange County. 2013122046	Addendum to the Final (CEQA-Plus) EIR Regional San/SPA/City of Sacramento Water Recycling Pipeline Project Sacramento Regional Sanitation District --Sacramento Note Addendum An Addendum was prepared to the Final CEQA-Plus EIR for the above referenced project. Regional San prepared the addendum to address the minor addition of the Sidestream Effluent (SSE) pipeline and slight changes in the Project alignment. On 4/8/2015, the addendum and Final EIR were presented to Regional San's Board of Directors where they adopted a Resolution that approved the modified project at their public meeting. The NOD was filed with the SCH on 4/16/2015.	ADM	07/16/2015
2015-11	Blue Lake Rancheria, California - APN# 400-041-051-000 Bureau of Indian Affairs Blue Lake--Humboldt The subject property is one parcel of land in Humboldt County, California, commonly referred to as the Tribal Property, APN 400-041-051-000, containing 1.37 acres, more or less. The tribe has no change in land use for parcel. The Tribal Property parcel contains two residences and vacant land. The subject parcel is located 13 miles from the Blue Lake Rancheria.	BIA	07/31/2015
2014041041	Live Oak Lanes Buellton, City of Buellton--Santa Barbara The proposed project consists of a Final Development Plan (13-FDP-03) for a 30,630 sf Family Entertainment Center, a 14,500 sf storage facility, and parking and landscaping in support of those facilities. The Family Entertainment Center includes a bowling alley, arcade, sports bar and lounge, party and meeting rooms, toddler area and office space. A Conditional Use Permit (13-CUP-02) is required for the proposed outdoor batting cages and outdoor deck for the proposed sports bar. The 5.08 acre property is located at the south end of Industrial Way, and includes two parcels (APN No. 099-690-045 and 099-690-046). The property is currently vacant.	MND	07/31/2015
2015071005	MD-6 and MD-7 Water System Improvement Madera County --Madera The project consists of the installation of approximately 20,000 linear feet of water transmission pipeline along the east shore of Bass Lake within the County Road 274 right-of-way. A new booster pump station would be developed on existing Bass Lake Water Company Lands, at the Pines Tank Site. A new well would be developed at MD-6, Lakeshore and wellhead treatment facility at this site including a 52' x 26' metal treatment building, wash water tank, hydro pneumatic tank, 15' x 15' sludge dewatering shelter, miscellaneous yard piping, clearing and grading and gravel surfacing over an approximate 1/4 acre site. 2015071006	500 South Douglas Street and 2330 Utah Avenue Project El Segundo, City of El Segundo--Los Angeles The Project involves demolition of two industrial buildings (approximately 51,936 gsf) and construction of a two-story commercial office building with a ground floor parking level containing 276 parking spaces and an approximately 80,517 gsf second floor office level. The proposed two-story commercial office building would be a maximum of 55 feet in height, and would include a ground floor parking level, a second floor office level, and an open deck. The project also proposes a Lot Line Adjustment to merge three parcels: APN 4138-009-001 Lots 6 and 7; and APN 4138-009-900 Lot B.	MND	07/31/2015
2015071007	Ebb Tide Residential Project Newport Beach, City of Newport Beach--Orange The proposed Project consists of demolition of 73 existing mobile home spaces, three fixed structures (a central business office with laundry room, a resident club room with adjacent swimming pool, and a small residence), and related surface improvements to accommodate the development of 81 single-family detached condominium dwelling units. The Project site is located at 1560 Placentia Avenue within the West Newport Mesa area of Newport Beach. The project requires City of Newport Beach approval of a Planned Development Permit, Traffic Study, Tentative Tract Map 17772 Demolition Permit, Grading Permit, and Building Permit(s).	MND	07/31/2015
2015071010	Port Arthur Conservation, Department of --Kern Construction of a well pad site and drill, test, and produce three exploratory oil and gas wells for a possible disturbance of 1.3 acres. Located in the Buttonwillow Gas field. 4 power poles, if well goes into production no well stimulation	MND	08/03/2015
2015072005	Calaveras County Regional Bicycle, Pedestrian and Safe Routes to School Plan Calaveras County Council of Governments --Calaveras The proposed project is the adoption and implementation of the Calaveras Council of Governments (CCOG) Regional Bicycle, Pedestrian and Safe Routes to School Plan. The CCOG, which serves as the Regional Transportation Planning Agency (RTPA) for the County of Calaveras and the City of Angels Camp, has developed the Regional Bicycle, Pedestrian and Safe Routes to School Plan. The Project will serve as the guide to planning active transportation investments in Calaveras County involving federal, state and local funding. The development of the Project has been a cooperative effort between the Calaveras Council of Governments, Calaveras County, City of Angels Camp, Caltrans, and the residents of Calaveras County. 	<p>is requesting a Special Permit to allow the proposed tower to exceed the 45 foot height limit specified in the Commercial General (CG) zoning district. The property is currently host to a mixture of residential and commercial development. The tower is proposed to be located near the center of the approximately 1-acre property, in an area currently developed with an existing storage building. This will require partial demolition and removal of a portion of this existing structure to enable siting and development of the tower and associated lease area. The tower will be of a monopole design capable of supporting occupancy by multiple carriers. Six panel antennas are currently expected to be installed near the top of the proposed tower.</p>		
2011072053	<p>WesPac Pittsburg Energy Infrastructure Project Pittsburg, City of Pittsburg--Contra Costa</p> <p>The proposed project consists of a CUP application requesting approval to modernize and reactivate the existing oil storage and transfer facilities on site of the NRG Energy Pittsburg Generating Station. The facilities (marine terminal, storage tanks, pipelines and ancillary equipment) were formerly used to store and supply fuel oil to the generating station; however, they have not been used for that purpose in over 19 years. The proposal is to modernize and upgrade these facilities in order to transport and store virgin and partially refined crude oil, and diesel.</p>	NOP	07/31/2015
2015012062	<p>Davis Woodland Water Supply Project (DWWSP): Aquifer Storage and Recovery Project Supplemental EIR Woodland Davis Clean Water Agency Woodland, Davis--Yolo Ref SCH# 2006042175</p> <p>The WDWCA, the City of Woodland and, potentially, the City of Davis would construct and operate ASR wells that would be used for injecting surface water diverted from the Sacramento River through the DWWSP intake and treated at the DWWSP regional water treatment facility (currently under construction). Proposed facilities in the City of Woodland would consist of up to seven ASR wells, including one existing ASR well, and up to six new wells constructed as replacement wells at the sites of existing municipal wells, or at new well sites, and necessary appurtenances. Proposed facilities in the City of Davis would consist of up to five ASR wells constructed as replacement wells at the sites of existing municipal wells, or at new well sites, and necessary appurtenances. The proposed wells would tie into the Cities' existing water distribution pipelines.</p>	SIR	08/17/2015
2003101062	<p>Whisler Monterey County Carmel--Monterey</p> <p>Combined Development Permit consisting of a coastal development permit for a new single family dwelling with a main floor (3,369 sq. ft.), a partial second floor (897 sq. ft.), a partial basement (632 sq. ft.), and an attached three-car garage (709 sq. ft); a Coastal Administrative Permit for a detached 425 sf guest house with attached carport and grading (approx 900 cu yds cut and 250 cu yds fill); a Coastal Development Permit to allow the removal of 21 Monterey pines exceeding 12 inches in diameter and approximately 24 Coast live oaks less than six inches in diameter; a Coastal Development Permit for development within 100 feet of environmentally sensitive habitat; and Design Review.</p>	NOD

2007011107	Glendale Boulevard-Hyperion Avenue Viaduct Improvement Project Los Angeles, City of Los Angeles, City of--Los Angeles The project would modify the Glendale Boulevard-Hyperion Avenue complex of bridges to correct safety and operational deficiencies, meet current seismic performance standards, and restore original design details to bridge railings. The project would also construct a detention/infiltration basin and a new pedestrian crossing over the Los Angeles River.	NOD	
2013122009	San Ramon Faria Preserve Community Project San Ramon, City of San Ramon--Contra Costa The Project involves a mixed use development of 201 acres of non-native grassland to include a 141-acre residential subdivision including the construction of 740 mixed density dwelling units, 1.5-acre place of worship, 2.6-acre education facility, 12.9-acre community park, 0.7-acre rose garden and the construction of the necessary infrastructure and roads to accommodate the new subdivision. In addition, the installation of a 1,380-linear-foot storm drain system will be required. The remaining 255 acres will be dedicated as open space. The Project will result in impacts to 201 acres of Alameda whipsnake (<i>Masticophis lateralis euryxanthus</i>), habitat including temporary impacts to 55 acres and permanent removal of 146 acres of habitat, as well as the permanent loss of 2,360 linear feet of San Ramon Creek and its related tributaries on the Project site. The project is expected to result in incidental take of Alameda whipsnake, designated as a threatened species under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.	NOD	
2014112034	Napa Valley Vine Trail Project - Oak Knoll District Napa County Napa, Yountville--Napa The larger project will construct a new 6-mile section of the Napa Valley Vine Trail along a public right-of-way adjacent to Highway 29 from Napa to Yountville. The Napa Valley Vine Trail will require 6 new pedestrian stream crossings located in three separate watersheds between Hinman Creek near Yountville (north) and Trower Avenue in Napa (south). The linear project will construct two crossings over Hinman Creek, two crossings over Salvador Creek, and one crossing over Dry Creek, all three are tributaries to the Napa River in Napa County, State of California. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2014-0340-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Herb Fredrickson, Napa County Planning and Transportation Agency.	NOD	
2015044003	Humboldt Bay National Wildlife Refuge Sea-Level Rise Adaptation Demonstration Project U.S. Fish and Wildlife Service Arcata--Humboldt Remove European beachgrass / iceplant from 4 acres of foredune at the Bair parcel, Humboldt Bay National Wildlife Refuge, followed by revegetation with native species. Beachgrass would be removed with shovels to detach rhizomes while the top of the plant is pulled and burned in piles or taken to an off-site composting area. Iceplant would be removed by hand-pulling, bagged and transported to a composting facility. Resprouts would be pulled weekly/every	NOD

	<p>other week for one or more growing seasons. Following initial beachgrass and iceplant removal but prior to the next rainy season, native dune mat plants (cuttings, root divisions and seeds) would be planted in six of eight experimental areas to compare changes in dune morphology and sediment dynamics (deposition, deflation) with that of the two control areas.</p>		
2015051026	<p>Interim Remedial Measures Work Plan for Cherry Aerospace Toxic Substances Control, Department of Santa Ana--Orange</p> <p>The California Department of Toxic Substances Control (DTSC) has approved an Interim Remedial Measures Work Plan (IRMWP) submitted by CDM Smith on behalf of Cherry Aerospace. The proposed project consists of a total of 32 wells and an aboveground treatment system to treat extracted groundwater via advanced oxidation processes and air stripper followed by discharge to publicly owned treatment works (POTW) via existing sanitary lines. Off-gas created during the treatment and the extracted soil vapor from the soil vapor extraction system will be treated via vapor-phase granular activated carbon system to contain and adsorb volatile organic compounds (VOCs) and zeolite impregnated with potassium permanganate to oxidize contaminants prior to discharge to atmosphere in accordance with local air quality permit requirements. Upon completion of construction activities, remediation systems operations and maintenance and groundwater monitoring will occur. As a future potential contingency, three injection wells may be installed in upgradient locations northeast of the Main Building and focused Dual Phase Extraction wells could be installed at select locations containing significant COPC mass in the shallow groundwater in order to enhance mass removal at the Solvent Storage Area and Chemical Warehouse.</p>	NOD	
2015078080	<p>Orinda Country Club 2015 Golf Course Renovation Project Orinda, City of Orinda--Contra Costa</p> <p>The project is renovation of the existing golf course, including reconstruction of the sand bunkers, tee boxes, greens and drains, irrigation lines, tree removal, and cart path relocation. The project addresses long-term wear from heavy annual usage that has resulted in soil compaction and related drainage issues. There will be no expansion of the golf course.</p>	NOE	
2015078081	<p>Wheeler Crest Fuels Reduction, 2015/2016 Forestry and Fire Protection, Department of --Tuolumne</p> <p>Objective 1, Enhance fuel breaks along existing roads within the community of Swall Meadows. Shrubs will be removed using a mechanical "plucker" (brush grubber) to minimize ground disturbance and erosion potential. This is a relatively small "skid steer" machine with low ground impact. Where terrain limits machine access, and off existing roads, unwanted shrubs will be hand-thinned using chainsaws. The fuel breaks will be "feathered" by removing unwanted vegetation in progressively less aggressive increments (ca. 15 feet) with increasing distance from the road edge.</p> <p>Objective 2, Assist homeowners in ongoing fuel-reduction efforts.</p>	NOE

<u>Documents Received on Thursday, July 02, 2015</u>			
2015078082	Milpost (MP) 120 87R Westlands Water District Pipeline Repair Water Resources, Department of Firebaugh--Fresno WWD will repair a pipeline located at MP 120 87R. A 2 ft. deep, by 6 ft. long, and 3 ft. wide area will be excavated to locate and weld a leak. Another hole, 10 ft. deep, by 10 ft. long, b 5 ft. wide, will be dug to install a shut-off valve. The holes will be backfilled and compacted after repairs are done. WWD contractors will benefit.	NOE	
2015078083	The Ahwahnee Water Principles Guidebook (AWPG) Update State Water Resources Control Board -- Project consists of updating the AWPG and develop a Fact Sheet to address new opportunities to manage stormwater at the neighborhood and/or district scale through the use of green infrastructure.	NOE	
2015078084	Gate Relocation Parks and Recreation, Department of --El Dorado Remove an underutilized gate located parallel to East Bakersfield Drive at Washoe Meadows State Park and relocate the gate to the end of Chilcothe Road to replace an exisitng, damaged gate.	NOE	
2015078085	Experanza FFS Water Tank Installation Project Forestry and Fire Protection, Department of --Calaveras The capacity of the existing water tank is insufficient and the Esperanza Fire Station has run out of water the past few seasons. An additional 5,000 gallon cement tank will be constructed immediately adjacent to the existing tank. The tank will be approximately 16 feet in diameter by 8 feet tall. The project will consist of preparing a pad for the tank using a backhoe for approximately one half day. The tank form will then be placed with a backhoe and cement trucks will be used to pour the tank. A trench approximately 2 feet wide and 3 feet deep for approximately 250 feet will be necessary to connect the tank to the existing system.	NOE	
2015078086	Tulare County Chipping Project Forestry and Fire Protection, Department of --Tulare The project scope is the chipping of brush with hand crews. The brushy material to be chipped (estimated at ~3 tons/month) is created by the Posey, Sequoia Crest, Scicon, Ponderosa, Plne Flat, Silver City, Doyle Springs Johnsondale and Badger community members performing their own hazardous fuel reduction activities on their properties. The resulted material is then dropped off by community members to a centralized location to be chipped or in other cases the property owners will bring the material to the road and it will be chipped there. After being cut, the brush is either collected, transported and dropped off by community members to a central appropriate location or it will be chipped in front of the landowner's property.	NOE

2015078087	Bennett Valley Roadside Fire Break and Shaded Fuel Break Forestry and Fire Protection, Department of --Sonoma Maintenance of an existing fire break along Bennett Valley and Old Bennett Ridge Roads to the southeast of the city of Santa Rosa. The Bennett Ridge Community Association has maintained the fire break since 2004 for the improved protection of Bennett Ridge homes. The fire break consists of a strip paralleling the road, approximately six feet wide, where all vegetation has been removed down to bare mineral soil. The purpose of the fire break is to stop or slow a fire that starts near the road, thereby increasing the fire protection of adjacent homes and the uphill Bennett Ridge community.	NOE	
2015078088	Horse of the Sun Ranch Handline Construction Training Site Forestry and Fire Protection, Department of --San Diego The proposed training project includes approximately 1,500 feet of trail construction on lands owned by Horse of the Sun Ranch in the vicinity of Pine Valley, CA. Horse of the Sun Ranch serves as a non-profit organization principally focused on providing equestrian and nature-based programs to military families and underserved youth. Project activities will be completed entirely by CALFIRE hand crews and will include the cutting and removal of brush by hand up to a width of 8 feet along the designated hand line location as well as a 2-4 foot wide scrape in the center where all combustible material will be removed.	NOE	
2015078089	Banks Pumping Plant Secondary Side Erosion Repair Water Resources, Department of Byron--Contra Costa DFD staff will repair erosion damage at five locations along the secondary side of the intake channel between Byron Highway Bridge and BAPP. Equipment will be staged at the DFD headquarters equipment yard. Site 1 required the removal of silt slumping onto Bench Drains 1 through 3. Site 2 through 4 require erosion repair between the access road and the embankment towards the channel. Site 5 requires fill, compaction, and grading of the access road. The proposed project utilizes an existing spoil site just north of the shooting range at O&M.	NOE	
2015078090	CAAQ 11.87 Weir Replacement Water Resources, Department of Tracy--San Joaquin DFD staff will remove all vegetation from around an existing monitoring weir located on the secondary side of the CAAQ at M.M. 11.87 in order to replace the current monitoring weir to measure the volume of the leak from the aqueduct. Staff will remove a 10 foot diameter swath around the leak removing mostly upland vegetation (tumbleweed) using hand tools and weed whackers. The area of vegetation removal is approximately 80 square feet. The monitoring weir will be re-constructed with sandbags placed in a ring around the leak and reach a height of at least one foot, and five feet in diameter. Approximately ten cubic yards sand will be used to construct the sandbags and a drain pipe will be placed to measure the flow of water.	NOE	
2015078091	Inclusion of Hexavalent Chromium Removal at the existing WS 6806 IXTP and WS 7802 IXTP Facilities State Water Resources Control Board -- The State Water Resources Control Board (SWRCB), as responsible agency, will	NOE

2015042047	Ashland Cherryland Business District Specific Plan Update Alameda County --Alameda The Specific Plan Update is composed of two major components: (1) a long term vision and policy component and (2) a regulatory component. The vision and policy component provides goals and policies related to land use, circulation, infrastructure, and design, and recommends implementing programs and financing options to achieve these goals. The regulatory component would enact zoning for the Plan Area; establishing zones, uses, and development standards. Together, these two components would serve as a comprehensive document for development within the Plan Area. Buildout of the Specific Plan Update would accommodate development of up to 167 single-family units, 771 multi-family units, and 570,000 sf of non-residential development.	EIR	08/17/2015
2015041032	US-395 Widen Median and Shoulder and Install Rumble Strips Project Caltrans #8 --San Bernardino Note: Notice of Availability of FONSI. Caltrans is proposing to widen the existing roadbed to provide a 4-foot median buffer and 8-foot shoulders, and install rumble strips on the centerline and shoulders, on a portion of the United States Highway 395, from 2.5 miles north of Kramer Hills to just south of the SR-58 intersection (PM 39.0 to PM 45.9), in a portion of unincorporated San Bernardino County, CA. Additionally, the proposed project would restore the passing lanes on northbound and southbound portions of US-395 between PM 39.0 and 42.7 that were removed in conjunction with completion of an interim project in 2014.	FON	
2015071008	Panoche Road Bridge (No. 43C0027) Replacement at Tres Pinos Creek San Benito County Hollister--San Benito The existing roadway and bridge alignment does not meet current American Association of State Highway and Transportation Officials (AASHTO) standards for design speed or road/bridge width. Therefore a new bridge and roadway approach work would occur as part of the proposed Project. Actions associated with the proposed project would include: existing bridge demolition; channel rock	MND	08/03/2015

	funds going to support Annadel-specific improvements, primarily trail work.		
2010021064	Yorba Linda Town Center Specific Plan Yorba Linda, City of Yorba Linda--Orange Note: Shortened Review	SIR	08/03/2015
	The Project will consist of 1- and 2-story structures organized around a central open space ("commons") and a strong distributed pedestrian network. Proposed uses include retail, restaurants, cinema, and supermarket totaling approximately 125,345 to 149,295 sf (maximum) of gross leasable area (GLA). The existing 2-story office building within the Project area will remain. Parking will be provided by a combination of a public parking structure located to the north of the commons area and surface parking distributed across the site, achieving a ratio of approximately 5.7-4.8 stalls per 1,000 sf of GLA.		
2004041130	Terra Bella Expressway 06-TUL-0.0/29.0 (PM0.0/18.0) Caltrans #6 Porterville--Tulare The California Department of Fish and Wildlife (CDFW) has executed Streambed Alteration Agreement number 1600-2015-0048-R4, pursuant to section 1602 of the Fish and Game Code to the project Applicant, California Department of Transportation.	NOD	
	The Project includes activities related to extending the box culvert at Poplar Ditch to accommodate the widening of SR 65 from the current two lanes to a four-lane expressway for Segment 1.		
2007032016	Use Permit Applications UP-4-03 and UP-7-04, Los Robles Estates, Phase II, by Gary Larsen, RMP, LLC Redding, City of Redding--Shasta As part of a larger project to develop infrastructure for 90 manufactured homes on 23.73 acres, the Permittee will impact a total of 550-linear feet of stream channel. 365-linear feet will be filled during grading activities. Flow from this stream segments will be discharged via a 36-inch diameter CMP culvert into a 110-linear foot reinforced vegetated bioswale, which will discharge below the project site upstream of the unnamed tributaries confluence with Boulder Creek.	NOD	
2013072057	Talmage Road/Southbound U.S. 101 On-Off Ramps Realignment Project Ukiah, City of Ukiah--Mendocino The original project described in the DEIR was termed the "Loop Design," which involved removing the southbound off-ramp, widening the existing loop underneath the overpass and installing a traffic signal where the loop intersects with Talmage Road. However, the City Council approved the environmentally superior design favored by the Caltrans (Alternative 2 in the EIR) that retains the southbound Highway 101 off-ramp to westbound Talmage Road. It would be widened to include two right-turn lanes as it approaches the Talmage Road intersection. This southbound off-ramp intersection with westbound Talmage Road would be signalized and realigned to the west to increase sight distance. The southbound Highway 101 off-ramp to eastbound Talmage Road would be realigned slightly controlling right turns if queues begin accumulating on either southbound off-ramps or along the left-turn lane onto the southbound Highway 101 on-ramp.	NOD

2015079003	Lake or Streambed Alteration Agreement No. 1600-2012-0013-R1 "Burney Gardens" THP Forestry and Fire Protection, Department of --Shasta The project is described in THP 2-12-001-SHA for bank stabilization/riffle augmentation.	NOD	
2015078103	Thornhill Broome Fence Replacement (14/15-A-35) Parks and Recreation, Department of --Ventura The objective is to re-establish and replace the pre-existing right-of-way chain link fence line along the northwestern boundary of the Thornhill Broome subunit of Point Mugu SP, adjacent to the La Jolla Creek (box culvert) crossing. This section of fence line was destroyed as a direct result of the recent storms which caused mudslides and debris flows along La Jolla Creek and across Pacific Coast Highway into the western campsites at Thornhill Broome. The footprint and scope of this project is to replace two sections of fence line totaling approximately 600' linear feet in overall length.	NOE	
2015078104	Programmatic Non-native Tree Removal and Vegetation/Fuel Management (14/15-A-11) Parks and Recreation, Department of --Los Angeles Project Goal is fuel reduction in developed and community interface zones of Topanga State Park. Primary objective is to remove non-native trees (pine, eucalyptus and California pepper) invading native chapparal that interfaces state park facilities, roads, and the community of Topanga. Non-native trees not in wild land interface would be evaluated as part of the Cultural Landscape. Trees that are determined to be part of cultural landscape will be thinned to reduce fuel component of trees. Secondary objective is thinning out native vegetation dead biomass and "limbing" tree branches up to six (6) feet off the ground within hundred (100) feet of park facilities and fifty (50) feet of roadways.	NOE	
2015078105	Juice Crafters Concession (14/15-A-36) Parks and Recreation, Department of --Los Angeles This project is for a new concession and associated facility improvements at the Baldwin Hills Scenic Overlook. The proposed concession will serve fresh juice and fruit bowls and solely occupy the food prep and storage area as outlined on the site plan. The Multi-purpose room/pavillion will be shared space with California State Parks and used for casual seating for customers and park visitors.	NOE	
2015078106	Low Water Crossing on Edison Property (Lake or Streambed Alteration Agreement No. 1600-2015-0068-R2) Fish & Wildlife #2 --Yuba The project is limited to the construction of a low water crossing on the unnamed tributary to Dry Creek. The existing 6-foot wide foot path will be widened to 10-feet by grubbing and re-grading and then armored with 6-inches of base 4 to 6-inch course rock and in-filled with finer rock (1 1/2 to 2-inch) aggregate. Approximately 18-cubic yards of base rock will be used and 7-cubic yards of the finer rock. No rock will be placed below the ordinary high water mark. The re-graded cut banks will be at a slope of 1.5:1 and will be seeded with native grasses.	NOE

2015078107	Buck Island Dam Weir Replacement (Lake or Streambed Alteration Agreement No. 1600-2015-0063-R2) Fish & Wildlife #2 --El Dorado The project is limited to removal of an existing deteriorated gauging weir using hand tools and subsequently construction of a new gauging weir with a low flow measuring box in the same location. This project is necessary under FERC re-licensing for the Upper American River Project. The new weir will be constructed of approximately 6 cubic yards of concrete. The area will be dewatered during demolition of the existing weir and construction of the new weir. A pipe will be placed at the discharge point on the Buck Island Dam and water will be routed around the project site.	NOE	
2015078108	Rubicon Dam Outlet Works Modification Project (Lake or Streambed Alteration Agreement No. 1600-2015-0064-R2) Fish & Wildlife #2 --El Dorado The project is limited to replacement of a discharge valve structure on the downstream face of the Rubicon Dam and necessary temporary dewatering of riverbed beginning at the downstream face of the dam and extending downstream for approximately 25 linear feet. All required discharges to maintain and support downstream fisheries will be piped around the construction site and a temporary coffer dam will be constructed immediately upstream of the water discharge point to prevent backflow of discharged water into the work area. Following construction of the coffer dam any residual water in the work area will be pumped downstream with a small submersible electric pump.	NOE	
2015078109	Issuance of Streambed Alteration Agreement No. 1600-2015-0098-R1, McIntyre Gulch Road and Channel Improvements Fish & Wildlife #1 --Trinity The project is limited to rebuilding existing stream crossings that have partially failed on a private road that follows McIntyre Gulch and are contributing excessive sediment into the Trinity River.	NOE	
2015078110	Issuance of Streambed Alteration Agreement No. 1600-2015-0170-R1, Ash Creek Wildlife Area Restoration Project - Phase III Fish & Wildlife #1 --Lassen The Project will involve reconnecting Ash Creek with its floodplain by eliminating ditched and entrenched channels, and redirecting flow to historic remnant channels. At the most upstream portion of the project reach, a channelized section of Ash Creek will be "plugged" with locally harvested earthen fill and flow will be directed into historic remnant channel. The "pond and plug" technique of excavating interconnected ponds and using the cut material as fill will be used to fill the existing incised flow path of Ash Creek from this point downstream for distance of approximately one mile.	NOE	
2015078111	North Brown Avenue Improvements Calipatria, City of Calipatria--Imperial The proposed project involves the widening and rehabilitation of Walnut Avenue including the installation of curb, gutter and sidewalk within the existing right-of-way. The purpose of the project is to improve roadway and pedestrian	NOE

	Tujunga Wash as needed to restore it to its pre-storm flow, pre-storm season, or pre-discharge of waters from Big Tujunga Dam., (i.e., under bridge, through culverts, or over Arizona Crossing). There will be no new stream channelization or relocation.		
2015071013	Carson Regional Water Recycling Facility Expansion Project 2015 West Basin Municipal Water District Carson--Los Angeles West Basin proposes to expand the CRWRF to meet additional recycled water demand from the Tesoro Carson Refinery in Carson. The project includes the construction of an additional 2,779 acre-feet per year (AFY) of microfiltration treatment capacity. The existing MF system (nine units) will be expanded by four (N+1) MF units, each containing 70 modules. One new 500 kW stand-by generator will be installed to provide back-up power for the existing reverse osmosis product pumps. An additional 2,239 AFY membrane bioreactor (t-MBR) nitrification system will consists of two aeration basin tanks followed by four membrane tanks. Additionally, two new NaOH storage tanks (350 gallon bulk tote and 250 gallon delivery tote); a sodium bi-sulfite (NaHSO3) dosing system; one new NaHSO3 storage tank (100 gallons); and two new citric acid storage tanks (350 gallon bulk tote and 250 gallon delivery tote) will be required.	Neg	08/04/2015
2015072008	Liberty Island Ecological Reserve Land Management Plan Fish & Wildlife #3 Rio Vista--Solano The Liberty Island Ecological Reserve (LIER) Land Management Plan (LMP) will guide the adaptive management of habitats, species, and programs on the 5,303-acre partially inundated island and intends to protect and enhance fish and wildlife values: serve as a guide for appropriate public uses of LIER; serve as a descriptive inventory of fish, wildlife, and native and nonnative plants and vegetation communities that occur within LIER; and provide an overview of the property's planned operation and maintenance activities and of the personnel requirements to implement management goals.	Neg	08/04/2015
2015072009	PA-1500057 (SA) San Joaquin County Lodi--San Joaquin A Site Approval application for a chicken ranch to raise 1,500 roosters, hens, and chicks per year for live sale in two phases over 5 years. Phase 1 includes the construction of one 384 sf coop, eight coops each to contain 24 sf, and six coops each to contain 120 sf for a maximum of 100 roosters and 400 hens and chicks. Phase 2 includes the construction of twelve coops each to contain 120 sf and two feed storage tanks, each to contain 72 sf, for a maximum of 200 roosters and 800 hens and chicks.	Neg	08/04/2015
1988050303	Acme Landfill North Parcel - Closure Health Services, Department of Martinez--Contra Costa The DTSC issued a new Resource Conservation and Recovery Act (RCRA) Hazardous Waste Post Closure Facility Permit ("Permit or "the project") (EPA #CAD 041835695) pursuant to CA Health and Safety Code section 25200 to the Acme Fill Corporation (Acme) for the Acme Landfill North Parcel (North Parcel). The Permit will be in effect for 10 years and subjects the Hazardous Waste Facility (HWF) to the terms and conditions set forth in the Permit and in the Postclosure Permit Application dated February 2013, which is incorporated by reference into	NOD

	<p>the Permit.</p> <p>The Permit authorizes the administrative transition of Acme's North Parcel Landfill from an Interim Status Facility to a Post Closure Permitted Facility. With the exception of the addition of 11 monitoring wells, the Permit includes no physical changes to the site. Acme's North Parcel is a closed Class I Landfill that occupies 135 acres (including 10 ancillary acres).</p> <p>DTSC acknowledged closure of the North Parcel Landfill on June 23, 1999 and since closure, the North Parcel has operated under Interim Status. State and federal regulations require that the facility owners develop and implement a Post Closure plan covering a 30-year period. The Permit outlines the procedures to fulfill these regulatory requirements, which consist of three primary functions: a) maintenance of the closure cover; b) environmental monitoring; and c) maintenance of financial mechanisms, via a compliance schedule, to fund the Postclosure activities.</p>		
2001112092	<p>Central Larkspur Specific Plan Larkspur, City of Larkspur--Marin</p> <p>The current modification to the Project consist of amendments to Sections 10 and 15 of the Development Standards of the Rose Garden Precise Development Plan (Ordinance No. 972 Exhibits B and C) in order to adjust the 50-foot building and impervious surfaces setback from the top of bank of Larkspur Creek solely with regard to Lot 27 of the Rose Garden subdivision (the "current amendments"). The current amendments reconcile an existing structure with the Precise Development Plan by adjusting the above-referenced setback, such that a minimum setback of 48.8 feet is required for the rear wall of the home and a minimum setback of 45 feet is required for a 13.5 foot wide bay projection as shown on Attachment (a); "Creek Setback Diagram No. 2" of Ordinance No. 1004. The City prepared a June 2015 Addendum to address the amended setbacks.</p>	NOD

2015051048	Kraemer Ranch (GPA 1132; CZ 7816; TR 36475; AG 1044) Riverside County Riverside--Riverside The project proposes a Schedule "A" subdivision of 168.33 acres into 171 residential lots, 2 water quality basins, 4 recreational parks, and 22 open spaced lettered lots. The project will also amend the General Plan Land Use Designation from Rural Community-Very Low Density Residential (RC:VLDR) and Rural Community-Estate Density Residential (RC:EDR) to Rural Community-Low Density Residential (RC:LDR) (1/2 Acre minimum and to change the project zoning designation from Light Agriculture-10 Acre Minimum (A-1-10) to One-Family Dwellings (R-1). Agricultural Preserve Diminishment No. 1044 proposes to remove the Project site from the El Sobrante No. 1 Agricultural Preserve, and diminish the preserve.	NOD	
2015052015	PA-1500048 (MS) San Joaquin County Galt--San Joaquin A Minor Subdivision application of Aberle Acres, Inc. (c/o Quartaroli & Associates, Inc.) to subdivide two parcels into nine parcels and a designated remainder parcel. Each parcel to contain a minimum of 20 acres. These parcels are under a Williamson Act contract. The Property is zoned AG-20 (General Agriculture, 20-acre minimum) and the General Plan designation is A/G (General Agriculture).	NOD	
2015079004	Amendments to the Water Quality Control Plans for the Sacramento River and San Joaquin River Basins and for the Tulare Lake Basin to add Policies for Variances Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento -- The project consists of amendments to both Central Valley Basin Plans to add policies for variances from surface water quality standards for point source dischargers, a multiple discharger variance program for salinity, and an exception from implementation of water quality objectives for salinity. The Variance Policy allows the Central Valley Water Board the authority to grant short-term variances from meeting water quality based effluent limitations to dischargers subject to National Pollutant Discharge Elimination System (NPDES) permits. The Variance Policy applies to non-priority pollutants. The Salinity Variance Program is a multiple discharger variance that allows the Central Valley Water Board the authority to grant variances from meeting water quality based effluent limitations for salinity constituents (electrical conductivity, total dissolved solids, chloride, sulfate and sodium) to publicly owned treatment works in NPDES permits. The Salinity Exception Program establishes procedures for dischargers that are subject to waste discharge requirements and conditional waivers to obtain a short-term exception from meeting effluent or groundwater limitations for salinity constituents (electrical conductivity, total dissolved solids, chloride, sulfate and sodium). The proposed event program would include 40 events annually with no more than 250 guests per event. No permanent alteration of the 544 acre site is proposed, and the project will utilize portions of the existing driveways and infrastructure.	MND	08/05/2015
2015071016	234 West Hyde Park Boulevard Warehouse/Manufacturing Project Inglewood, City of Inglewood--Los Angeles The project site used to be an active oil and gas production facility from around 1944 through 1994. As many as 15 oil/gas wells were located in the middle portion of the project site. There is one well site in the northern portion. The southern portion of the project site included the clay pit associated with the off-site brick works, two oil/gas wells, and four aboveground storage tanks inside a containment structure. All wells have been capped. The former clay pit was previously backfilled with mud, concrete and bricks, vegetation, and other debris. The project site was also used to store clean topsoil for the City; the northern portion of the site is covered by several feet of unconsolidated fill material.	MND	08/05/2015
2015072011	Use Permit #14-013 (Peltier) Shasta County Redding--Shasta The applicant has requested a use permit for the construction and operation of a wireless communications facility consisting of a 106-foot-tall lattice-type structure with the appearance of a water tower containing 12 antennas and 2 microwave dishes, a 11.5-foot by 16.9-foot equipment shelter, one 30 kW standby diesel generator with a 132 gallon fuel tank; all of which would be enclosed by a 6-foot tall chain-link fence. The proposed improvements would be located within a 33-foot by 45-foot lease area on an 80.7-acre property. Access to the site would be from Zogg Mine Road through a proposed 417 foot-long driveway to be constructed on the property.	MND	08/05/2015

2015-03	<p>Kashia Band of Pomo Indians of the Stewarts Point Rancheria - APNs: 123-160-005-000 Bureau of Indian Affairs --Sonoma</p> <p>The subject property consists of two parcels of land, encompassing ~480.00 acres more or less, commonly referred to as APNs: 123-160-005-000 (portion). The parcels are contiguous to the eastern boundary of the Stewarts Point Rancheria. The property was not being actively used by its prior owners and is not currently being used by the Tribe for any purpose other than analysis and protection of natural resources. It has not habitable buildings and is uninhabited. Kashia is in the process of considering results of an expert evaluation, documentation and preservation studies for the means of using the newly acquired property. Until the necessary studies are done, the land will be used only for three purposes:</p> <ol style="list-style-type: none"> 1. Identify and inventory all sites and objects of environmental and cultural significance to the Tribe; 2. Enable Kashia to take all necessary steps to ensure that those sites and objects are protected; and 3. Provide to Kashia and its members access to the property for traditional uses, and for restoration of the property to its best possible condition both culturally and environmentally. 	BIA	08/06/2015
2013041079	<p>Buena Vista Lagoon Enhancement Project San Diego Association of Governments Carlsbad, Oceanside--San Diego</p> <p>The proposed project would enhance Buena Vista Lagoon through implementation of one of four alternatives: freshwater, saltwater, and two hybrid. Increasing sedimentation and urbanization upstream of the lagoon have decreased water depth and increased nutrient levels in the lagoon. Encroachment of vegetation into the open water basins of the lagoon has led to adverse water quality and vector problems as circulation decreases. Without enhancement, the lagoon is expected to become a vegetated freshwater marsh or riparian woodland-meadow within the next 30 to 50 years. Enhancement would increase biological and hydrological functions within the lagoon to address sedimentation and invasive vegetation encroachment, as well as declining coastal biodiversity, degrading water quality, water circulation restriction, and increasing vector concerns.</p>	EIR	08/21/2015
2014101070	<p>Slover Avenue Distribution Center Fontana, City of Fontana--San Bernardino</p> <p>The Project includes an amendment to the Fontana Gateway Specific Plan (SPA 14-000003) and a Design Review Project 14-000020 (DRP 14-000020). These applications are collectively referred to as Master Case Number 14-000052 (MCN 14-000052), and would allow for the construction and operation of one high cube distribution warehouse building that would contain 671,324 sf of total floor space, as well as surface parking areas and drive aisles, utility infrastructure, landscaping, and other site improvements on the subject property.</p>	EIR	08/21/2015

	does not involve any changes to the existing structures at 180 Grandview Road, Twin Peaks, CA 92391.		
2015078190	Relocation of an Estimated 200 Students from Grandview Elementary School to the Lake Arrowhead Elementary School Site and Addition of Three Portable Rim of The World Unified School District --San Bernardino Classrooms to the Lake Arrowhead Elementary School Site	NOE	
	Rim of the World Unified School District proposes to relocate an estimated 200 students from the District's Grandview Elementary School from its current location, at 180 Grandview Road, Twinpeaks, CA 92391 to District property located at 1300 Golden Rule Lane, Lake Arrowhead, CA 92352. The District also proposes to add three portable classrooms to property located at 21300 Golden Rule Lane, Lake Arrowhead, CA 92352. The Project will not increase original student capacity by more than 25% or by ten classrooms.		
2015078191	Relocation of an Estimated 200 Students from Grandview Elementary School to the Valley of Enchantment Elementary School Site and the Addition of Rim of The World Unified School District --San Bernardino One Portable Classroom to the Valley of Enchantment Elementary School Site	NOE	
	Rim of the World Unified School District proposes to relocate an estimated two-hundred students from the District's Grandview Elementary School from its current location, at 180 Grandview Road, Twin Peaks, CA 92391 to District Property located at 22836 Fir Lane, Crestline, CA 92325. The District also proposes to add one portable classroom to property located at 22836 Fir Lane Crestline, CA 92325. The Project will not increase original student capacity by more than 25% or ten classrooms.		
2015078192	San JHoaquin County Detention and Program Facility San Joaquin County --San Joaquin The proposed project consists of designing and building up to six housing pods containing multiple occupancy sleeping rooms and minimum support space needed to operate a facility of this size. At the conclusion of the project, all inmates will be moved from the existing Honor Farm Facility barracks and housed in the newly designed facility. The specialized healthcare Treatment unit will house inmates which will benefit from services currently not being offered in the main public safety facility due to capacity challenges. The existing 124 Housing Unit will be utilized as re-entry facility, providing case management services to inmates who are 30-60 days from release as they prepare for reintegration back into the community.	NOE	
2015078193	La Costa 49 Preserve Rehabilitation Regional Water Quality Control Board, Region 9 (San Diego), San Diego Carlsbad--San Diego The proposed project consists of the restoration of an ephemeral drainage that is tributary to Encinitas Creek. The project is located in the Fair Oaks Valley Mitigation Site Property which is upland preservation mitigation for the La Costa 49 development located west of the Project site. Approx. 61.04 cubic yards of dirt and rock were deposited within the drainage following a failure of a pressurized water line maintained by Olivenhain Municipal Water District in late Dec. 2013. 2015011047	<p>Visalia Median Barriers Caltrans #6 Visalia--Tulare</p> <p>Caltrans proposes to construct median barriers at two locations on SR 198 in the City of Visalia in Tulare County. A concrete median barrier would be installed at Location 1 for a distance of 0.7 mile from 0.6 mile west of Road 80 to Road 80 (Plaza Drive), (PM R4.2 to R4.9). High tension cable median barrier would be installed in the freeway median for 2.5 miles at Location 2, from Akers Street 0.2 mile east of County Center Drive (post mile 6.8 to post mile 8.3).</p>	FIN	
2015022020	<p>Menlo-Atherton High School Campus Master Plan Sequoia Union High School District Atherton, Menlo Park--San Mateo FYI Final</p> <p>The Menlo-Atherton High School Campus Facilities Master Plan outlines the structural facilities needed to accommodate the growth in student enrollment forecast to occur at MAHS by 2020 and would guide development at MAHS over the near - to intermediate-term (approximately the next five to 10 years). In general, the MAHS FMP calls for the potential addition of up to approximately 22 new classrooms at the MAHS Campus and improvements to other student and administrative services facilities (e.g., athletic facilities, food preparation facilities, staff offices), as well as minor capital repair projects.</p>	FIN	
2015071023	<p>Elkhorn Slough Tidal Marsh Restoration Fish & Wildlife #4 --Monterey</p> <p>This IS/MND evaluates the environmental effects of a tidal marsh restoration project through sediment addition in the Elkhorn Slough Ecological Reserve. It includes the restoration of 147 acres of vegetated tidal salt marsh, ecotone, and native grasslands. The project site includes 104 acres of former tidal marsh that have experienced approximately two feet of subsidence and no longer support extensive areas of vegetated marsh. It also includes up to 43 acres of ecotone and ruderal grassland. The overall approach would use imported and onsite sediments to raise marsh and mudflat elevations and restore tidal marsh habitats in these areas. The elevation of the new marsh would be just over Mean Higher Water and the ecotone and grassland would be planted with native ecotone and grassland plants.</p>	MND	08/24/2015

	removing chromium-6 from affected drinking water wells. Ion exchange is a water treatment method where one or more undesirable constituents are removed from the water by exchange with another constituent. Two types of IXTPs will be used for the chromium-6 project: Strong Base Anion Exchange (SBA) and Weak Base Anion Exchange (WBA). SBA treatment would be installed at 23 existing well sites located throughout the CVWD service area, and a new Central Resin Regeneration Facility would be constructed for processing the SBA resin collected from each of these sites. WBA treatment is proposed for five wells that occur in two distinct clusters within the CVWD service area. For each of the clusters, raw water would be pumped from each well and conveyed via new pipelines to a new WBA treatment facility.		
2015071025	Kimball Business Park Project Chino, City of Chino--San Bernardino The Kimball Business Park Project proposes construction and operation of approximately 1,203,050 sf of warehouse and light industrial/business park uses on approximately 70 acres located in the southeasterly portion of the City of Chino. The Project development concept allows for development of multiple buildings of varied sizes and configurations that would accommodate a variety of warehouse and light industrial/business park tenants.	NOP	08/10/2015
2015072020	Eliot Facility (SMP-23) Reclamation Plan Amendment Alameda County Pleasanton, Livermore--Alameda CEMEX Construction Materials Pacific, LLC (Applicant), operates the Eliot facility. Changes in circumstances at the site and in applicable regulatory requirements have necessitated the preparation of an amended reclamation plan that addresses these changes and provides reclamation objectives that can be feasibly accomplished and permitted by regulatory agencies. The Applicant has therefore applied to the County for a reclamation plan amendment.	NOP	08/10/2015
2015072019	Winery Ordinance Update-Zoning Text Amendments (PCPJ 20130151) Placer County --Placer The project proposes a County-initiated Zoning Text Amendment to Placer County Code Chapter 17 (Zoning Ordinance) to revise Section 17.56.300(B)(1)(b) related to a Temporary Outdoor Event Permit, Section 17.56.330 related to Wineries and Section 17.58.030(F) related to Application Contents Requirements. 	Endangered Species Act. The ITP referenced above as reissued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.		
2012122068	State Route 193 Curve Improvement Caltrans #3 Lincoln--Placer The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2015-0107-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, California Department of Transportation. Caltrans proposes to remove two undersized 24" by 25.5' culverts and replace them with four 36" by 46' culverts. This project will also armor the inlet and outlet ends with rock slope protection and the driveway will be graded to create a high water crossing.	NOD	
2014062071	Galt Firing Range Project Galt, City of Galt--Sacramento The proposed project is a police firing range, which, at full buildout, will include the following components: five firing ranges, one multi-use firing range, training building, storage building, restroom facility, access road and parking lot, bus turnouts, sidewalk, security fencing and signage, lighting, grading and drainage, and sanitary sewer and potable water connections.	NOD	
2015021091	Porter Estates (Trio Petroleum) Production Testing Project Monterey County --Monterey The project includes production testing (exploration) for oil and gas using an existing oil well. The project does not include the drilling of new wells, and does not include long-term production. The proposed project is an exploratory effort to assist in determining whether oil is available in commercial quantities at the project location.	NOD	
2015051040	Aliso Canyon Community Park (ACCP) Dog Park Project Aliso Viejo, City of --Orange The project evaluated consists of a conditional use permit, site development permit and coastal development permit to develop a maximum of 5.47 acres for a dog park at Aliso Canyon Community Park. The proposed dog park includes five areas: 72,300 square foot of fenced dog activity areas; 13,400 square foot parking lot with 29 parking spaces; 31,600 of hydroseed area; 97,600 square feet of open space area; and 23,400square feet of perimeter landscaping. Construction of the dog park includes grading, preparation of dog run areas, parking lot, landscaping and walkways. The dog park will not have building structures or lighting but will include shade structures, gates and fencing, concrete flatwork, water fountain, outdoor seating and landscaping. Grading activities include 5,610 cubic yards of cut, 1,250 cubic yards of over-excavation and 6,860 cubic yards of fill to be balanced onsite. The project does not include import or export of soil. On July 1, 2015, the City of Aliso Viejo approved the following actions related to the Project: 1) Approve and adopt an initial study, mitigated negative declaration and mitigation monitoring and reporting program prepared in accordance with the	NOD

	California Environmental Quality Act for a dog park at Aliso Canyon Community Park and 2) Planning Application PA13-010 (CUP/SDP) which includes a conditional use permit and site development permit to develop a dog park at Aliso Canyon Community Park.		
2015058110	Consolidation Incentive Application for Test Wells and Treatment Colusa, City of --Colusa The City of Colusa owns and operates a municipal water system, consisting of five "operating" groundwater wells, two elevated tanks, a distribution and transport system. In addition, there are two private wells within the Walnut Ranch Subdivision (within the City) that have failed due to age and contamination. The City supplies water to the Walnut Ranch subdivision via an emergency inner-tie which was set up years prior. Three of the City's five "operating" wells are experiencing contamination, thus the City is exploring two options: 1) Provide treatment for the wells; 2) Locate an additional groundwater source supply. The latter proposal is contemplated being explored with this project by drilling test wells at locations in the City where the City already owns the land. This could lead to the consolidation of the Walnut Ranch System fully into the City's water system, subject to further environmental review in compliance with CEQA.	NOE	
2015078195	Geotechnical Investigation for the Gale Avenue Rubber Dam Project Water Resources, Department of Huron--Fresno A hand auger will make 6 borings near the dam fence to collect soil samples. borings will be sampled and will be backfilled with soil cuttings. A concrete coring rig will create 9 holes through the concrete dam apron. Soils will be sampled and the holes backfilled with concrete. The State Water Project Contractors will benefit.	NOE	
2015078196	RD 1004 Emergency Ground Water Acquisition Program Reclamation District No. 1004 --Colusa District will acquire well water from willing landowners within its service area to provide irrigation water to landowners.	NOE	
2015078197	Issuance of Streambed Alteration Agreement No. 1600-2015-0138-R1, Maintain Existing Water Diversion on Woodman Creek, Tributary to the Middle Fork Eel River Fish & Wildlife #1 --Mendocino Project involves on encroachment activity: the seasonal direct diversion of surface streamflow from Woodman Creek using a gasoline-powered portable pump. The project proposes to continue an on-going water diversion of up to 6.9 gallons per minute. Stored water will be used during low streamflow streamflow periods. Proposed storage will include water tank(s) that will be acquired in the future. Storage tank(s) will be located in areas above the 100 year flood flow of Woodman Creek. Diversion will be made under Small Domestic Use Registration Appropriation. Water diverted under this Agreement is limited to existing purposes and places of use, including irrigation and domestic supply. No riparian vegetation or mature trees are proposed to be removed or cleared, and no excavation activities will be conducted within the stream channel.	NOE

	management practices. In order to ensure that any potential significant adverse environmental impacts are identified and evaluated and that feasible methods to reduce or avoid any potential significant adverse environmental impacts associated with the proposed project are identified and evaluated, an environmental impact analysis was conducted based on one of the larger facilities that would be subject to the rule as a basis to estimated maximum foreseeable environmental impacts. The estimated construction/operation scenario analyzed was based on information provided by the facility of future construction activities/upgrades to current infrastructure and operation of control equipment/BMPs in order to comply with the proposed rule.		
2013081071	SR-94 Improvement Project Project EA: 407700 Caltrans #11 --San Diego Caltrans is proposing five build alternatives and one no-build alternative to be studied in the EIR. Each build alternative includes an access road improvement to the Jamul Reservation (which includes improvements to the SR 94, SR 94/Melody Road intersection and the Reservation access intersection), as well as improvements to the following off site intersections: (1) SR-94/Jamacha Boulevard, (2) SR-94 Jamacha Road, (3) SR-94/Steele Canyon Road, (4) SR-94/Lyons Valley Road and (5) SR-94/Maxfield Road.	EIR	08/26/2015
2014052020	Dry Creek Habitat Enhancement Project Miles 2-6 Sonoma County Water Agency --Sonoma The National Marine Fisheries Service's Russian River BO requires the Water Agency to implement habitat enhancement of Dry Creek so that releases from Warm Springs Dam for water supply and flood control are mitigated and that at least six miles of Dry Creek contains excellent quality habitat for rearing coho salmon. The proposed project includes the creation or enhancement of off-channel backwaters, alcoves, and side channel habitat features adjacent to Dry Creek, and the creation or enhancement of pools, riffles, instream habitat features, and bank stabilization within Dry Creek.	EIR	08/26/2015
2011041082	Kern River Water Allocation Plan Kern Delta Water District Bakersfield--Kern KDWD is authorized by its enabling legislation to adopt a plan for water allocation "...in accordance with equitable criteria providing for the economical and efficient distribution and use of water within the district or available for use upon the lands within the district" (California Water Code 35526).	FYI	
2015071034	Reconstruct Road Segment to Improve Safety (PMIS 187464) State Water Resources Control Board --San Bernardino Note: EA & FONSI Project will construct five highway realignment sections, an intersection improvement, two low water crossings, and associated road repair activities at eight sites within the Mojave National Preserve, for a total of approximately 10,610 linear feet of affected roadway. Project will also conduct bank stabilization at one site affecting approximately 0.087 acres of dry wash channel, affecting approximately 935 linear feet.	JD	08/12/2015

2015071027	1541 Wilcox Hotel Los Angeles, City of Los Angeles, City of--Los Angeles Demolition of the existing structures on the project site and the construction of a hotel with four levels of subterranean parking for a total of 144 parking spaces. Project components include a ten-story plus penthouse structure containing approximately 200 hotel rooms with a ground floor comprised of a lobby reception, a 1,862 sf hotel lobby bar, a 4,595 sf restaurant, a 2,315 sf kitchen and a 1,085 sf outdoor eating area; a second floor comprised of guest rooms, 3,020 sf of meeting rooms and terraces accessible to hotel guests only; a 3,924 sf pool deck on the roof of the 10th floor; and a 1,430 sf penthouse restaurant.	MND	08/11/2015
2015071028	Public Storage #08207 La Habra, City of La Habra--Orange The project will consist of a new 3-story building that will have a total floor area of 133,512 sf. Each of the three floors will have a total floor area of 44,504 sf. The office and lobby area will be located on the first floor along the west-facing elevation. Vehicular access will be provided along the north side of Lambert Road. An internal roadway will be located around the proposed building. In addition, the proposed project will include the installation of 25 parking stalls. The parking stalls will be provided along the new building's west and south elevations. Finally, landscape areas will consist of 23,080 sf and will include new parkway landscaping along Lambert Road, internal landscaping, and a large landscaped area in the northern portion of the site that will be used for storm water retention.	MND	08/11/2015
2015071029	South Garfield Specific Plan Project Monterey Park, City of Monterey Park--Los Angeles The South Garfield Village Specific Plan serves as a planning and regulatory link between the City of Monterey Park General Plan and individual, project level development within the proposed project area. The South Garfield Village Specific Plan provides area-specific land use districts unique to the project area, along with permitted uses and development standards, such as building heights, setbacks, and floor area ratios for each commercial district. The proposed project would allow a maximum of approximately 330,000 sf of neighborhood shopping and commercial services uses within the project area. The estimated development potential is based upon the permitted uses and maximum intensities that would be allowed by the proposed project. When compared to existing conditions, the proposed project would allow for a potential net increase of approximately 110,000 sf of neighborhood shopping and commercial services uses within the project area.	MND	08/11/2015
2015071032	Valley Center Cemetery Expansion - PDS2014-MUP-14-029; PDS2014-ER-14-08-010 San Diego County --San Diego The project site measures approximately 1.8 acres and contains an existing historic and nonconforming use known as the Valley Center Cemetery. The proposed application is a Major Use Permit to expand the cemetery boundaries and land use to the north on an approximately one-acre parcel (total proposed acreage of approximately 2.8 acres). The expanded cemetery use includes a proposed 800 sf office building in addition to proposed cemetery plots and leach fields. The existing structures on the current cemetery land are a 534 sf office	MND	08/11/2015

	SEIR is presumed valid in accordance with Public Resources section 21167.2. The proposed project is consistent with scope of the approved Area Plan and Tentative Tract Map 16466. Therefore, the certified Supplemental Environmental Impact Report serves as the environmental documentation for the project and the project is in compliance with the requirements of CEQA.		
2009092086	Wildwood Road Realignment and Widening Project Trinity County --Trinity The selected Alternative Project consists of reconstruction, widening and realignment of three segments of Wildwood Road: Segment 1 from Post Mile (PM) 11.6 to PM 9.7; Segment 2 from PM 9.7 to PM 7.0; and Segment 3 from PM 7.0 to 5.0. The County will: Widen to two travel lanes with shoulders and curve widening; realign tight radius curves; and place retaining walls and guardrails at appropriate locations. The design will meet the American Association of State Highway and Transportation Officials (AASHTO) Guidelines for Geometric Design of Very Low Volume Local Roads. Periodic, extensive daytime road closures will occur during construction.	NOD	
2013051059	Love's Travel Center in the City of Hesperia Hesperia, City of Hesperia--San Bernardino The Love's Travel Center Project proposes to develop a travel center on approximately 10.6 gross acres with 12,271 square feet of commercial uses including a country store, two fast food restaurants, and a vehicle service/tire care center. It will have 9 "single-loaded diesel fuel islands" for trucks (9 total diesel fueling stations) and 8 "double-loaded" islands (16 total fueling stations) for light-duty and passenger vehicles that will dispense both gasoline and diesel fuel plus a scale to weigh semi-trucks and trailers. The project will operate 24 hours per day and 365 days per year, and is expected to employ 35-40 full-time employees.	NOD	
2014042068	North Valley Regional Recycled Water Program Modesto, City of Modesto, Turlock, Patterson--Stanislaus Cities of Modesto will deliver up to 30,600 acre-feet per year of recycled water to the Del Puerto Water District (DPWD). Water will be conveyed through a pipeline, located primarily in public right-of-way, crossing the San Joaquin River to the Delta-Mendota Canal for conveyance to DPWD customers. Water could also be made available to wildlife refuges. New facilities constructed for the project would be located at the Jennings Plant at 7007 Jennings Road, Modesto, and on Lemon Avenue and Zacharias Road in Stanislaus County.	NOD	
2014072002	North Coast System Rehabilitation Project - Phase 3 Coast Segment Santa Cruz, City of Santa Cruz--Santa Cruz The project is limited to removal and replacement of a section of the 22-inch diameter north coast water delivery pipeline owned and operated by the City of Santa Cruz Water Department with new 24-inch diameter pipeline. The section of pipeline to be replaced consists primarily of 16- to 22-inch welded steel pipe that runs along Highway 1. The alignment of new pipeline will generally follow the alignment of the existing water main. The new alignment will be approximately 19,800 linear feet long with 18,500 linear feet of replaced pipeline. Approximately 90 percent of the proposed pipeline will be constructed employing standard open	NOD

	Kern-Tulare Water District's (Kern-Tulare) and Delano-Earlimart Irrigation District's (DEID) Central Valley Project (CVP) water supplies previously stored in KCWA's service area. In exchange, KCWA will retain a like amount of Kern-Tulare's and DEID previously stored CVP water for use in KCWA's service area. Kern-Tulare and DEID will then receive a like amount of San Joaquin River water, normally delivered to the SJR Exchange Contractors, which will instead be released by Reclamation from Millerton Lake into the Friant-Kern Canal.		
2015078229	<p>Junipero Serra #512 - Access Barrier Removal Project General Services, Department of Los Angeles, City of--Los Angeles</p> <p>Project is to improve access to persons with disabilities in the Junipero Serra Building for compliance with the 2010 Americans with Disabilities Act (ADA) and 2013 CA Building Code (CBC). The Junipero Serra Building Access Barrier Removal Project includes restriping of basement and sub-basement parking stalls; additional bollards, truncated domes, parking signage, adding curbs and railings and raising an overhead pipe. Throughout the building: ramps will be adjusted and handrails will be extended; new hardware will be installed on doors and gates; a touchless actuator will be installed to the main West 4th Street entrance; elevators will be equipped with new call buttons, signage and aluminum bars at the floor level to reduce gap in elevator opening; and wall signs will be replaced located near stairs, exits and restrooms.</p>	NOE	
2015078230	<p>App. No. 2015-06 - Variance - APN: 016-092-021 Dinuba, City of Dinuba--Tulare</p> <p>Proposal to allow construction of an 6 foot tall wrought iron fence in the front yard setback of the project site.</p>	NOE	
2015078231	<p>SIE-49 Guardrail Replacement Caltrans #3 --Sierra</p> <p>The purpose of this project is to preserve the integrity of the highway by replacing the non-standard guardrail with new/standard guardrail in Sierra County from Post Mile 11.3 to 12.4.</p>	NOE	
2015078232	<p>Discharge Permit Reissuance for City of Novato, Novato Sanitary District Wastewater Treatment Plant Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland Novato--Marin</p> <p>Reissuance of waste discharge requirements.</p>	NOE	
2015078233	<p>Bunker and Willis Street Storm Drain Improvement Project, J.O. #2453-20 (ED-10-15) Redding, City of Redding--Shasta</p> <p>At the Bunker Street site, the City of Redding proposes to replace approx. 270 feet of storm drain ditch with a buried 7x3 ft box culvert and 48-inch pipes constructed in the roadway and a paved driveway. The existing ditch will be backfilled and sidewalk placed along Bunker Street. Work at the Willis Street site consists of enclosing 32 ft of an open, concrete storm drain channel. Curb and gutter will be placed along Willis Street Work will be conducted within City Right-of-Way and within storm drain easements. Traffic control will be necessary during construction at Bunker Street.</p>	NOE

2008081130	Tra Vigne Subdivision Madera County Madera--Madera The applicant is requesting approval of the Tra Vigne project and associated actions for the entitlements necessary to develop the approximately 161-acre project site. The major actions needed to develop the property include approval of: 1) General Plan Amendment; 2) Zone Change; 3) Tentative Subdivision Map, and 4) Infrastructure Master Plan (also referred to as the Master Development Plan). The Tra Vigne project proposes subdividing the project site into residential lots that would provide for future residential uses, and locations for a future community shopping center, a future community center, and onsite wastewater treatment plant. Seven development phases are proposed. The site plan includes a community park that would also serve as the onsite storm water retention basin.	EIR	08/27/2015

	The southern perimeter of the site would remain undeveloped, providing open space and retaining existing habitat. A pedestrian trail would be developed leading from the eastern portion of the project property to the San Joaquin River.		
2015071033	IS Application No. 6973 (Vita-Pakt Citrus Products Company) Fresno County --Fresno Allow the expansion of an existing commercial dehydrator facility involving drying, processing, and packaging of fruits and vegetables with the addition of 27,813 sf of new warehousing and processing buildings on a 4.42 acre portion of a 10.51 acre (net) parcel in the AE-20 Zone District. The subject property is located on the northwest corner of S. Highland and E. Central Avenues approximately 1.9 miles northwest of the unincorporated community of Del Rey (8898 E. Central Avenue, Del Rey) (Sup. Dist.: 4) (APN: 331-040-47, 331-040-78).	MND	08/12/2015
2015071035	IS 6481 and CUP 3348 (Elias Saliba obo Sarabjit Kaur) Fresno County Fresno--Fresno The applicant proposes to add two gas pumps (four fueling positions), a 760 sf canopy, two 10,000 gallon above-ground storage tanks, and convert 800 sf of the existing convenience store to a barber shop on a 2.32-acre parcel in the C-1 (Neighborhood Shopping Center) Zone District.	MND	08/12/2015
2015071036	SR-94 / SR-125 Interchange Project (EA-14665) Caltrans #11 La Mesa--San Diego Caltrans proposes to construct a direct freeway-to-freeway connection from southbound SR 125 to eastbound SR 94 in the City of La Mesa. The proposed project extends from Lemon Avenue On-ramp to the eastbound Kenwood Drive Off-ramp. The proposed project would result in the construction of freeway-to-freeway connector to allow direct SR-125 south to SR 94 east movements.	MND	08/12/2015
2015071038	Vista Chino Low Water Crossing Bridge Replacement at Whitewater River Project Palm Springs, City of Palm Springs, Cathedral City--Riverside Replacement of the existing low water crossing on Vista Chino at the Whitewater River with a newly constructed bridge. The total project limits would approximately 4,950 feet. The purpose of the proposed project is to improve traffic circulation and emergency access within Palm Springs and Cathedral City during storm events.	MND	08/12/2015
2015071039	East Side Canal Pump Station Project East Side Union High School District --Merced The proposed Project is located in the alignment of the East Side Canal in Merced County within the San Joaquin Valley near the confluence of the San Joaquin and Merced rivers. The Project's surroundings consist primarily of agricultural land. The proposed Project consists of construction of a pump station to be located in the existing prism of the East Side Canal at the point where water from the canal is conveyed into a siphon under the Mariposa Bypass and discharge into the East Side Conveyance Canal. <u>Documents Received on Tuesday, July 14, 2015</u>			
2015072027	<p>El Granada Pipeline Replacement Final Phase Project Coastside County Water District Half Moon Bay--San Mateo</p> <p>The project will replace the District's existing 10-inch welded steel pipeline mounted underneath the western walkway on the City of Half Moon Bay's (City's) Main Street Bridge, which crosses Pilarcitos Creek. The existing pipeline is the principal supply to the southern side of the District's distribution system and was constructed in 1948. With the exception of the section mounted on the bridge, the District has replaced the original pipeline with 16-inch ductile iron pipe. Consequently, the District has decided to replace and realign the original 10-inch welded steel water main section with a new 16-inch (nominal inner diameter) pipeline that will cross under Pilarcitos Creek.</p>	MND	08/12/2015
2015072028	<p>Sir Francis Drake Boulevard Improvement Project Marin County --Marin</p> <p>The proposed project includes improvements to approximately 12 miles of Sir Francis Drake Boulevard from the intersection with Pierce Point Road to the intersection with Chimney Rock Road. The proposed Improvements primarily consist of resurfacing, restoring, and rehabilitating the 12-mile segment of SFDB in a manner that will closely follow the existing roadway in order to minimize impacts to the natural terrain. In general, the roadway would be widened 1 to 6 feet to maintain a consistent 24-foot width with two 11-foot travel lanes and 1-foot shoulders.</p>	MND	08/12/2015
2015072029	<p>Twitchell and Mandeville Island Dredged Material Placement Sites (this section is for the Twitchell sites) Stockton, Port of --Sacramento</p> <p>The Port of Stockton proposes to construct two new placement sites on Twitchell Island (35 and 18 acres) and one new placement site on Mandeville Island (17 acres) for accepting maintenance dredged sediment from the Stockton Deep Water Ship Channel. The proposed project involves construction activities to prepare the new site for use, placing dredge slurry in the sites as part of federal operations and maintenance activities, and maintaining the sites between dredging episodes in the future as needed. Containment berms would be constructed around the perimeter of each proposed placement area using existing on-site soil, and there would be no impacts to wetlands or jurisdictional waters. Berm construction activities would occur over 6 weeks for each site and are expected to begin in August 2015 and be complete by summer of 2016.</p>	MND	08/13/2015
2015071037	<p>Clarendon Street Apartments Los Angeles, City of Los Angeles, City of--Los Angeles</p> <p>The Proposed Project would involve demolition of an existing post office and office building and development of a multi-family housing project consisting of a five-story residential building with 335 residential units, clubhouse, leasing office, 4 surface parking spaces, and a parking structure with space for 572 vehicles, for a total of 576 parking spaces. The proposed residential and parking structures would be located adjacent to US-101, on the site's northern boundary. Primary vehicular access to the project site would be provided by an entrance located on along Clarendon Street between Farralone Avenue and Glade Avenue, with secondary access provided along Clarendon Street east of Glade Avenue.</p>	NOP	08/12/2015

2015071041	Tentative Tract Map No. 250, Kingston Subdivision Bishop, City of Bishop--Inyo This Initial Study / MND evaluate the potential environmental impacts anticipated to result from implementation and construction of Tentative and Final Tract Map No. 250 that is proposed by Bob Kingston. The proposed project would include removal of the existing Bishop Nursery and associated improvements and construction of 15 graded sites to accommodate single family dwellings, construction of a main access roadway, drainage improvements, and extension of utilities to serve the individual parcels. Proposed parcels would generally be rectangular in shape and would range in size between 5,104 sf to 8,232 sf.	MND	08/13/2015
2015071040	Peafowl Management Plan Rancho Palos Verdes, City of Rancho Palos Verdes--Los Angeles A City initiated plan to humanely manage the Peafowl population within the boundary limits of the City of Rancho Palos Verdes. This will be achieved with the adoption and implementation of a Peafowl Management Plan that intends to reduce and maintain the Peafowl population within the City to the levels identified in the 2000 Peafowl Census Report. The PMP will support the coexistence of peafowl within the semi-rural character of the City by using the following methods.	Neg	08/13/2015
2015072030	Kiefer Landfill Stormwater Improvements Sacramento County --Sacramento The project consists of the construction of new stormwater improvements at the Kiefer Landfill. Project construction will involve the placement of a 24-inch diameter corrugated polyethylene (CPE) pipe with a minimum grade of -0.5 percent. The gravity flow line would extend southeast from the existing manhole at the public entrance along Kiefer Boulevard for approximately 1,200 feet to an existing manhole upstream of the concrete lined stormwater channel discharging to Sedimentation Basin A. The alignment of the pipe will be adjacent to Kiefer Boulevard and after the contractor entrance will veer eastward around the native tree plantings. One new stormdrain inlet will be installed near the main entrance. Three new manholes will be constructed, one on each side of the contractor entrance, and one at the terminus of the existing stormwater pipe north of the native tree plantings. Construction methods will use a box trench design to achieve proper pipe depth when below grade. The limits of work will be limited to a 14-foot wide area along the alignment adjacent to Kiefer Boulevard and a 30-foot wide area along the overland alignment. An unnecessary drainage inlet and an asphalt ramp will be removed and a 110-foot section of chain link fence will be removed and replaced.	Neg	08/13/2015
2014011069	Lincoln Specific Plan Whittier, City of Whittier--Los Angeles The Project involves a Specific Plan with the following primary components: demolition approximately 400,156 sf of existing on-site buildings; construction of up to 750 du. approx. 208,350 sf of commercial land uses (including adaptive reuse of two vacant structures on-site), and 4.6 ac. of open space; and offsite infrastructure improvements including roadway improvements to Whittier Blvd, Sorensen Ave., and the extension of Elmer Ave., onto the site. This is to advise that the City of Whittier approved the following resolutions on June 25, 2015 and	NOD

	July 14, 2015 respectively: Resolution 8704 approving Tentative Parcel Map 72953; Ordinance 3037 adopting the Lincoln Specific Plan SPN13-001 and amending the zoning map, and Ordinance 3038 approving Development Agreement A15-001.		
2014031053	Former Kast Property Tank Farm Site Remediation Project Regional Water Quality Control Board, Region 4 (Los Angeles) Carson--Los Angeles The project is the Los Angeles Water Board's approval of a Remedial Action Plan for the cleanup of the site. The RAP proposes to remediate the site to achieve site-specific clean up goals established by the Los Angeles Water Board. The RAP consists of the following multi-media components to remediate the site: excavation of soils at impacted properties to a depth of 5 feet and targeted at some properties to 10 feet below ground surface; soil vapor extraction (SVE)/bioventing; sub-slab vapor mitigation at a subset of properties; LNAPL recovery from groundwater; and groundwater source reduction and monitored natural attenuation. Implementation of remediation activities would potentially commence in Fall 2015. Excavation actions would take approximately 6 years and other remedies may take 30 to 40 years.	NOD	
2014042032	Sacramento Commons (P14-012) Sacramento, City of Sacramento--Sacramento The project includes demolition of the structures on the site with the exception of the Capitol Tower high-rise and the Overhoff sculptural wall. The project consists of entitlements for master planning and redevelopment that includes two build-out scenarios: a) 300 room hotel and 1,374 dwelling units and 74,122 s.f. of commercial; or b) 1,470 dwelling units and 56,122 s.f. of commercial. Both scenarios include four new parking structures totaling between 1,635 to 1,701 spaces.	NOD	
2014122048	The 2015 Fisheries Restoration Grant Program Fish & Wildlife #2 --Sacramento CDFW allocates grant funds through the Fisheries Restoration Grant Program (FRGP) to restore degraded anadromous fish habitat in coastal streams. Restoration projects must be consistent with procedures found in CDFW's "California Salmonid Habitat Restoration Manual" http://www.dfg.ca.gov/fish/Resources/HabitatManual.asp . The FRGP manages an annual grant cycle initiated in the spring of each year.	NOD	
2015021070	Alvarez Ace Hardware Monterey County --Monterey Use Permit and General Development Plan to allow the construction of a two-story 10,047 s.f. commercial structure including an 8,760 s.f. first story leasable retail space and 1,287 s.f. mezzanine area to be used as storage. The building will be used for commercial purposes consistent with the Light Commercial Zoning District. The property is located at 8123 North Prunedale Road, Salinas (APN 127-013-007-000), North County Area Plan.	NOD

2015041072	<p>Corrective Action Remedy for Former Industrial Light Metals Facility Toxic Substances Control, Department of Los Angeles, City of, Torrance--Los Angeles</p> <p>The proposed project is to clean up groundwater at the ILM site, located in the City of Los Angeles (adjacent to the City of Torrance) in Los Angeles County, California. The proposed cleanup includes active treatment on-site of areas where concentrated contaminant mass is present in unsaturated zone soils and the water table aquifer present beneath the site. Active treatment includes installing remediation wells, constructing and permitting vapor and/or groundwater treatment systems, and associated pumps, piping, and other infrastructure. Active treatment would continue until performance-based goals are achieved. Residual groundwater impacts would then be addressed by Monitored Natural Attenuation.</p>	NOD	
2015051088	<p>General Plan Update EIR Sierra Madre, City of Sierra Madre--Los Angeles</p> <p>The proposed project is the update of the Sierra Madre General Plan. The General Plan Update is an opportunity to take a comprehensive look at the city as a system and in a regional context, to address contemporary conditions and laws, and to reflect the latest aspirations for the future of the community. As with the existing Sierra Madre General Plan, the General Plan Update will continue to serve as a long-range policy document that defines the framework by which the city's physical, natural, cultural, social and economic resource are to be managed over time. Consistent with the adopted Vision and Guiding Principles, the updated General Plan will focus on preserving and sustaining the City's distinctive character as a historic small-town; ensuring that adequate City services that match the needs of the community are provided; ensuring the City's natural resources (e.g., San Gabriel Mountain foothills, wildlife, forest, open space, watershed, etc.) are adequately protected; promoting and developing a strong, diversified local economy; and ensuring that new development is harmonious with existing neighborhoods, maintains the small-town character of the city, and does not unduly burden existing City services and infrastructure or impact the environment.</p> <p>The General Plan Update will guide the growth and development (e.g., infill development, redevelopment, and revitalization/restoration) of the city 20 years or more into the future. The General Plan Update involves a revision to the current land use map and all elements except Housing. It will guide growth and development within the city by designating land uses in the proposed land use map and through implementation of the goals and policies of the General Plan Update. Assuming a theoretical buildout (post-2035 scenario) of the General Plan Update, the city is projected to accommodate approximately 5,244 residential dwelling units (5,123 existing plus 121 new) and 1,100,228 s.f. of non-residential square footage (1,012,836 existing plus 87,392 new), which includes commercial, manufacturing and institutional land uses.</p> <p>The General Plan Update consists of the following elements: Land Use, Resource Management, Hazard Prevention, and Community Services, which are included as individual chapters in the General Plan Update. The Land Use chapter covers topics such as distribution and intensity of land use development, urban form, historic preservation, and economic development. The Resource Management chapter covers topics such as hillside preservation, dark sky, co-existence with wildlife, trees preservation, water resources, waste management and recycling,</p>	NOD

	existing tenants for the purposes of providing parking for tideland activities and will create an opportunity for incremental revenue to the District. No new development, construction, or increase in the size of the property is proposed or authorized as part of the proposed project.		
2015078280	B Street Pier West-End Fender System Upgrade San Diego Unified Port District San Diego--San Diego	NOE	
	The proposed project involves replacing the fender system serving the western portion of B Street Pier, located in the City of San Diego. The existing fender system at the B Street Pier is deteriorated and does not provide a reliable and safe accommodation for District vessels. Additionally, many of the timber piles are in poor condition and have rotted below the low water line. The proposed project will upgrade the fender system on the west end and each corner of the B Street Pier and will provide a more reliable energy absorbing system with increased protection against damage to both vessels and the B Street Pier. The proposed project will remove and replace the existing timber and plastic fender piles, timber walers and chocks, steel hardware with fiberglass materials.		
2015078281	Chula Vista Challenge (CVC) Olympic Distance Triathlon & Duathlon San Diego Unified Port District Chula Vista--San Diego	NOE	
	The proposed project is the Chula Vista Challenge (CVC) Olympic Distance Triathlon & Duathlon, which will take place at the Chula Vista Bayside Park in Chula Vista on Saturday July 18, 2015 and Sunday July 19, 2015. The District will provide sponsorship in the form of District services for the event, which includes a choice of a Duathlon (bicycle and run), Triathlon (swim, bicycle and run) or Kids Race of varying distances based on age. Event setup will occur at the Chula Vista Bayside Park on Friday July 17, 2015 at 3:00 pm and will end on Sunday July 19, 2015 at 11:00am. On Saturday July 18th, the South Bay Sprint Duathlon will include cycling from Bayside Park inland to south Chula Vista and back, and a 5 km run along Chula Vista Bayfront. The Sprint Triathlon will also include a 500 meter swim in San Diego Bay from Bayside Park. On Sunday July 19, 2015, the Olympic Duathlon consists of a 5 km run through Bayside & Bayfront parks, a 40 km cycle from Bayside Park to Eastlake, and other 10 km run in East Chula Vista. The Olympic Triathlon also includes a 1,500 meter swim. The event has an anticipated attendance of approx. 1,000 people. Public parking will be available at the Bayside Park parking lot and along the streets in the vicinity. Approx. 40 parking spaces will be reserved for event organizers at the District's dirt parking lot located north of Plover and on the west side of Quay Avenue.		
2015078282	Lease with State of California, Department of Transportation for Use of Land Located at 3405 Pacific Highway in San Diego for Surface Parking San Diego Unified Port District San Diego--San Diego	NOE	
	The proposed project involves the acceptance of an 8-year lease from the State of California, Department of Transportation for the use of approx. 20,100 sq. ft. of land located at 3405 Pacific Highway in the City of San Diego, California for surface parking. The existing parking lot which is currently operated as an attended surface parking lot by an existing District tenant, is contiguous with District premises and is only accessible through the existing District tenant's premises. The proposed lease will allow the District to enter into subleases with existing tenants for the purposes of providing parking for tideland activities and will create an opportunity for incremental revenue to the District. No new development
