STATE CLEARINGHOUSE

NEWSLETTER

July 16-31, 2008

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **July 16-31, 2008**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: February 13, 2007
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, Senior Planner
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner
916-445-0613
scott.morgan@opr.ca.gov

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2007**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

2006051070	City of Livingston 2025 General Plan Livingston, City of Livingston--Merced EIR of the General Plan Update for the City of Livingston.	EIR	08/29/2008
2008071081	Trailer Park Sewer Collection System, Torres Martinez Desert Cahuilla Indians Coachella Valley Water District --Riverside NOTE: Joint Document consists of Mitigated Negative Declaration and Environmental Assessment. The Trailer Park Sewer Collection System project proposes the installation of a 10-inch gravity sewer pipeline, Lift Station and sewer force main pipeline that will collect sewage from the Oasis Mobile Home Park (population approximately 2,000) and Duro Mobile Home Park (population up to 6,000) and transfer the sewage to the Coachella Valley Water District (CVWD) Water Reclamation Plant No. 4 (WRP-4). The proposed pipelines will be installed within the road rights-of-way along Avenue 70, Pierce Street and Avenue 66. The gravity sewer pipeline begins at the Oasis Mobile Home Park (located on both sides of Avenue 70) and extends approximately one-quarter mile east to Pierce Street, then continues northerly along Pierce Street connecting to the Duro Mobile Home Park at Avenue 68. The gravity sewer pipeline will connect to a proposed Lift Station on a half-acre site at the northeast quadrant of Pierce Street and Avenue 68. A sewer force main pipeline will extend from the Lift Station northerly along Pierce Street to Avenue 66 and then easterly along Avenue 66 and connect to an existing 10-inch sewer force main pipeline (located along the western dike of the Coachella Valley Storm Water Channel) which ultimately connects to WRP-4. A proposed alternative route would continue the sewer force main pipeline along Pierce Street north, past Avenue 66, and connect to the existing 10-inch sewer force main located along the western dike of the Coachella Valley Storm Water Channel. The purpose of this project is to replace the existing onsite wastewater systems at the Oasis and Duro Mobile Home Parks.	JD	08/14/2008
2008071078	Panziera (PLN070257) Monterey County Gonzales--Monterey Combined Development Permit consisting of: (1) Use Permit to allow construction of two wind energy electrical turbines, 600 cubic yards of grading for footings and trenching and the construction of appurtenant electrical facilities; (2) a Use Permit to allow development on slopes of 30% or greater; (3) Variance to increase both wind energy electrical turbines' height (system height) from 100 feet to 214 feet; and (4) Variance to allow installation of wind turbine systems without the required orange safety coloring on the wind turbine blades.	MND	08/14/2008
2008071079	Granite Construction (Reclamation Plan 08-0003 & Conditional Use Permit 08-0013) Imperial County --Imperial Granite Construction is applying for a Conditional Use Permit for a water well and Reclamation Plan for an approximately 45-acre site. On August 23, 2007 Granite was declared the successful bidder for a 10-year contract for 500,000 tons of	MND	08/14/2008

	material (spoil bank pile material), from the Bureau of Land Management (BLM case file application CACA 049294). Granite proposes to develop and reclaim the 45 acre area covered by approximately 2,000,000 tons of spoil bank pile material resulting from past gold mining operations at the Padre/Madre mine. If Granite receives approval from BLM for all 2,000,000 tons of material they propose to be on site for at least 20 years and are requesting that the permit be granted for that period.		
2008071080	Former Long Beach Naval Complex Installation Restoration Site 7 Dredging Project Long Beach, Port of Long Beach--Los Angeles The Port of Long Beach is proposing to dredge up to approximately 800,000 cubic yards of contaminated sediments from within 700 acres at Installation Restoration Site 7 in the West Basin and place that material in an approved fill site at Pier G within the Harbor District. In addition, an existing, abandoned sonar calibration pier and four sunken barges would be removed, abated, and dismantled.	MND	08/14/2008
2008071082	Santa Ysabel Wireless Telecommunications Facility San Diego County --San Diego The project is a Major Use Permit to construct and operate an unmanned wireless telecommunication facility.	MND	08/14/2008
2008071083	Mallory Way Bungalows Project Ojai, City of Ojai--Ventura Construction of 23 new condominium units and restoration of 7 existing units. Demolition of 15 1940s structures. Tree removal and replacement. Density bonus requested.	MND	08/14/2008
2008071084	Parcel Map No. 08-01 SR 33 and Bass Avenue Commercial Development Mendota, City of Mendota--Fresno The project proposes a tentative parcel map resulting in the division of approximately 16.89 acres into eight parcels, which could result in the construction of approximately 184,000 square feet of commercial space.	MND	08/14/2008
2008071086	Minor Modification No. MM07-008 to Conditional Use Permit No. CUP04-002 - Garcia Brothers Trucking Merced County --Merced Minor Modification No. MM07-008 to Conditional Use Permit No. CUP04-002 project proposes to expand an existing agricultural trucking business by storing an additional 20 vehicles (not road use registered) used as support vehicles for crop harvesting), construction of a 4,000 square foot storage building, planting drought-tolerant landscaping, and providing an all-weather permeable driveway access. The project site is located southeast of the unincorporated community of Planada, on the north side of Gerard Avenue, 650 feet west of its intersection with Ivett Road. It is designated as Agricultural in the General Plan and Zoned A-1 (General Agricultural) and 10 acres in size.	MND	08/14/2008

2008078213	<p>Emergency Permit for the San Mateo County Sheriff's Office Bomb Squad (SMCSOBS) to Burn Seized Illegal Fireworks Toxic Substances Control, Department of --San Mateo</p> <p>On July 11, 2008, DTSC received a request from the SMCSOBS for an emergency permit for the destruction of seized fireworks. The treatment and destruction of the seized fireworks will take place on San Mateo County property in rural, western San Mateo County.</p> <p>The fireworks will be disposed of by placing the fireworks into a designated steel burn container. The container is made of reinforced, quarter-inch steel, and was recently redone to assure that the reinforcements are sufficient for the stresses it will incur during the treatment events. The container measures 20 feet by 7 feet by 7 feet, with a solid top. The ends of the unit are covered with heavy mesh grating to allow air flow, but minimize the chance of any pieces of fireworks escaping from the container during treatment. The fireworks will be remotely ignited with an electric match. The fireworks will be burned until all of the material is reduced to ashes. Once the ashes are cooled, they will be inspected by the Bomb Squad. When deemed safe (no potential for an explosive reaction) they will be placed into 50-gallon plastic drums. The ashes will be transported by a private, registered hazardous waste transporter to an authorized hazardous waste treatment, storage or disposal facility. The transportation of the ash is being coordinated by San Mateo County's Household Hazardous Waste Collection Program; waste from the permanent household hazardous waste facility will be picked up by the same registered transporter.</p>	NOE

2008072059	Ordinance Amendment ORD08-003 Nevada County --Nevada Potential code amendments to establish a process for allowing second dwelling units beyond the dead end road limit without constructing secondary access.	CON	08/22/2008
2000111022	Termino Avenue Drain Los Angeles County Long Beach--Los Angeles The proposed project would involve the construction of a storm drain mainline, six lateral drains, low flow treatment pump station, catch basin screens, and an outlet to Marine Stadium in the City. The purpose of the proposed project is to construct a storm drain to alleviate flooding problems in the area and to accommodate water flows in a 50-year flood event. The proposed project would contain two key components; the storm drain to Marine Stadium; and the diversion system to the County Sanitation District sewer line.	FIN	
2006061096	New Century Plan Los Angeles, City of Los Angeles, City of--Los Angeles Westfield, LLC (the Applicant) proposes the New Century Plan within the Century City community of the City of Los Angeles. The proposed project would create an integrated center within the community by providing a broad array of shopping and dining choices, entertainment opportunities, residential uses, outdoor spaces and amenities. The project would remove two existing office buildings that together comprise approximately 360,964 square feet and would replace it with approximately 358,881 square feet of net new shopping center space, 106,523 square feet of office uses, and approximately 262 multi-family residential apartment or condominium units.	FIN

2008071089	Wasco Airport Master Plan Kern County Wasco--Kern Adoption of the Wasco Airport Master Plan by the Kern County Airports Department. The proposed project is a Master Plan for the future development and expansion of the Wasco Airport. The Master Plan provides for anticipated facility and land acquisition needs at Wasco Airport over a 20-year planning period to meet the growing demands of agricultural, flight training, business, and personal aviation needs in the greater Wasco area. The Master Plan encompasses approximately 161 acres. As proposed, the project is structured in three phases described as Phase 1 Improvements (2006-2010); Phase 2 Improvements (2011-2015); and Phase 3 Improvements (2016-2025). Some of these proposed projects are designed to accommodate future growth projections while others are proposed as a means to keep up with the State and federal standards or to improve safety conditions to existing operations and uses of the airport. The exact timing of each phase is unknown, as they will coincide with demand and funding.	MND	08/15/2008
2008071090	Lost Hills Airport Master Plan Kern County --Kern The proposed project is a Master Plan for the future development and expansion of the Lost Hills Airport. The Master Plan provides for anticipated facility and land acquisition needs at Lost Hills Airport over a 20-year planning period and encompasses approximately 387 acres. As proposed, the project is structured in three phases described as Phase 1 Improvements (2006-2010); Phase 2 Improvements (2011-2015); and Phase 3 Improvements (2016-2025).	MND	08/15/2008
2008071091	Santa Ynez Airport Improvements Santa Barbara County --Santa Barbara Proposed airport improvements would involve two separate groups of development. The Airport Authority is seeking the approval for the improvements identified in Groups 1 and 2 with this CUP and DP. Groups 1 and 2 would be developed in phases as required. The proposed project would not increase the frequency or intensity of aircraft activities or the size of the aircraft able to utilize the airport facilities. Group 1 development would total 81,015 square feet and include the construction of new hangars, additions to existing hangars, and fencing around the entire perimeter of the airport. Fencing (security and livestock) would be constructed in accordance with FAA regulations. All new hangars and hangar additions would be constructed to match the existing hangars onsite. To facilitate future utility planning, new hangars or hangar additions may include water consumption fixtures, including but not limited to sinks, showers, and/or toilets. The Airport has a successful record of septic percolation, including the most recent drywell performance test completed on September 7, 2004. However, the submittal of additional analysis and percolation testing may be required prior to the approval and issuance of applicable permits required by Environmental Health Services, P&D and/or any other responsible County agency. Group 2 development would total 45,400 square feet and include the construction of an apron to include six helicopter parking pads and two hangar rows, one for fixed-wing aircraft and one for County emergency helicopters. Relocation of SBC	MND	08/22/2008

	Aviation Unit's hangar and ramp area would provide for a more efficient and safe county emergency service. No hangar construction is proposed to be placed above existing landfill cells. Relocation of the gliderport office would make room for taxiing aircraft. To facilitate future utility planning, new hangars or hangar additions may include water consumption fixtures, including but not limited to sinks, showers, and/or toilets. The Airport has a successful record of septic percolation, including the most recent drywell performance test completed on September 7, 2004.		
2008072051	Waste Discharge Requirements, General Order for In-situ Groundwater Remediation Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento -- The Regional Board proposes to adopt General Waste Discharge Requirements (WDRs) for in-situ groundwater remediation at sites impacted by volatile organic compounds, nitrogen compounds, perchlorate, pesticides, semi-volatile organic compounds, hexavalent chromium, and/or petroleum hydrocarbons. These constituents pollute various sites throughout the Central Valley Region and cause, or threaten to cause, adverse impacts to existing and potential beneficial uses of the region's groundwater resources. In many cases, in-situ cleanup of groundwater at these sites includes the use and application of chemical, biological, and physical treatment processes, such chemical oxidation, chemical reduction, nutrient or chemical addition for enhanced biodegradation, or groundwater pump and treat technology with the return of treated groundwater back to the same aquifer zone. The adoption of general WDRs for in-situ groundwater remediation/cleanup would: (a) provide a level of protection of water quality comparable individual, site-specific WDRs; (b) simplify the application process for dischargers; (c) allow more efficient use of Regional Board staff time; (d) reduce Regional Board time by enabling the Executive Office to notify the discharger of the applicability of the general WDRs; and (e) enhance the protection of surface water quality by eliminating the discharge of wastewater to surface waters. In addition, each individual in-situ cleanup project will be required to have complied with CEQA on a site-specific basis prior to being allowed to be covered under the general WDRs.	MND	08/15/2008
2008072052	Randall and Suellen Messenger Tentative Parcel Map (TPM-08-01) Siskiyou County Mount Shasta--Siskiyou The applicants are requesting Tentative Parcel Map approval to subdivide 8.58 acres into three parcels: 2.50 acres, 2.53 acres, and 3.55 acres in size. The subject property is situated within the Rural Residential Agricultural, 2.5 acre minimum parcel size (RRB2.5) zone district. Sewage disposal services would be provided by individual on-site septic systems. Water services would be provided by individual on-site domestic wells. Loveta Lane, a privately maintained road, would provide access to the proposed parcels.	MND	08/15/2008
2008072053	Tentative Parcel Map #2787 - Rancheria Creek Amador County Amador City--Amador Tentative Parcel Map No. 2787 - Rancheria Creek proposes the division of 311.22 +/- acres into 7 parcels of approximately 47.84, 40.90, 40.35, 40.24, 40.01, 47.0, and 40.26 acres.	MND	08/15/2008

2008072054	Pleasant Hills Ranch Estates Drinking Water Treatment Plant Solano Irrigation District Vacaville--Solano A small (0.25 MGD) membrane filtration drinking water treatment, plant, and 2,000 feet of pipeline is proposed, bringing 39 existing rural residential parcels into compliance with state and federal drinking water regulations.	MND	08/15/2008
2008072055	Doctors Park Association Zone Change (Z-06-02) Siskiyou County Mount Shasta--Siskiyou The applicants request Zone Change approval to modify the existing Planned Development (PD) zone designation to develop an additional 20,000 square feet of commercial office space to be used for professional office uses and health care facilities. Ten thousand square feet of commercial office space is proposed to be developed in one structure located within Parcel 3. The other 10,000 square feet of commercial office space is proposed to be developed in two separate structures within the Remainder Parcel.	MND	08/15/2008
2008071092	Westside Specific Plan National City National City--San Diego The City of National City proposes a General Plan Amendment, Zone Change, and Specific Plan for the redesign of the Westside neighborhood (formerly referred to as Old Town) located within the incorporated limits of National City. Many existing land uses within the neighborhood are incompatible and a Specific Plan has been designed to address these conflicts.	NOP	08/15/2008
2008072050	Danco; Case Nos: FMS-06-11 - Beau Pre Height Proposed Final Map Subdivision Humboldt County --Humboldt The project includes a proposal for the construction of two 500,000 gallon, 50 foot diameter, 24 foot tall, off-site water tanks on approximately 0.5 acres. Water from the McKinleyville Community Services District (MCSD) would be conveyed to the tanks via a new pump station to be constructed at the existing MCSD water tanks on Norton Road, and a 2,600 foot long, 8" diameter water pipeline to be constructed from the Norton Road water tanks through the project site in proposed streets, and then eastward in Murray Road to the proposed tanks. Water would then be conveyed from the proposed tanks to the project site via a pump station to be constructed at the water tank site and a new 1,350 foot long, 8" diameter water pipeline to be constructed in Murray Road. The water system would pump water from the MCSD water tanks through the project site to the proposed water tanks, and then back to the project site, in order to provide the water pressure necessary to serve the project.	NOP	08/15/2008
2008072058	Water Rights Petitions Project Russian River County Water District --Sonoma The District has filed four petitions with Division of Water Rights. Two petitions were filed for changes to place of use of Permit 20985 and another requests an extension of time for the permit. A third petition was filed for a change in point of diversion, place of use and purpose of use of License 9393.	Neg	08/15/2008

2002022026	<p>Clos de la Tech Winery and Zoning Text Amendment San Mateo County --San Mateo</p> <p>The applicant is proposing to develop a winery on a portion of his 165.68-acre parcel. Most of the winery facilities would be constructed underground, within three recently excavated "caves." These facilities include winery operations (fermentation, barrel storage, and bottling), winery offices, and living quarters for up to six people. Additional surface facilities include a service building, storage shed, water tanks, and temporary housing for up to 15 laborers during harvest. The applicant is also proposing a Zoning Text Amendment that would modify the County's Zoning Regulations by expanding the definition of wineries to include a subcategory: Scenic Wineries. The third component of the project is a lot line adjustment between the subject parcel (078-230-010) and the parcel directly to the east (078-230-060).</p>	EIR	09/03/2008
2004081136	<p>2008 Regional Transportation Plan (RTP) Santa Barbara County Association of Governments --Santa Barbara</p> <p>State and federal laws require regional transportation planning agencies to prepare and adopt a Regional Transportation Plan (RTP) and to adopt RTP updates every 5 years. The RTP is a regional transportation planning document that includes a long-term (20 year) horizon that reflects regional needs, a twenty-year transportation improvement plan, and short-term improvements. Regional issues and problems are identified and alternative solutions incorporating all modes of travel are developed and evaluated. The physical and operational requirements of all modes of transportation are considered including automobile, truck, transit, bike, rail, pedestrian, plane, marine, and freight and passenger rail. Projects in the local option sales tax renewal, Measure A, are also evaluated. Finally, the RTP recommends a comprehensive solution that provides direction for programming decisions that meet identified regional transportation needs. The objective of the Santa Barbara County RTP is to provide for a comprehensive transportation system of facilities and services that meets the public's need for the movement of people and goods, and that is consistent with the social, economic, and environmental goals and policies of the region.</p>	EIR	09/02/2008
2008011121	<p>Soka University Performing Arts Center & Academic Facilities Aliso Viejo, City of --Orange</p> <p>The project consists of a proposed performing arts center and an academic support building within the existing Soka University campus (hereinafter "Soka") in Aliso Viejo. The proposed performing arts center will include a theater that can accommodate up to 1,200 seats (1,000 fixed seats). The tallest portion of the</p>	EIR	09/02/2008

	<p>building will be approximately 70 feet tall and is located on the lowest elevation of the property. The adjacent academic support building is four stories high (approximately 76 feet) and will include classrooms, faculty offices and a black box theater that can accommodate up to 200 seats. The performing arts theater (multipurpose hall) will have one full-time employee, and the academic facilities support building will have 11 full time employees.</p> <p>The proposed theater and associated academic facilities support building are planned by Soka as part of the master plan for the campus. The 1997 approval for the Soka campus identified that the building height for the proposed use would be 70 feet (55 feet building plus 15 feet architectural projections). The proposed project as designed exceeds the approved height limit. Additionally, the project proposes orientation (placement) of the buildings different than the previous approved plan and locating the performing arts theater (multipurpose hall) adjacent to the proposed academic facilities support building.</p>

	totaling 6,100 square feet are proposed on the western portion of the site and a future mini-mart with fuel dispensing facilities and a carwash is proposed on the northwest corner of the site.		
2008072057	Auburn Water Treatment Plant Raw Water Supply Pipeline Placer County Water Agency Auburn--Placer The proposed project would consist of the replacement of 24-inch diameter steel pipeline with a 36-inch diameter pipeline, which feeds the Auburn WTP. Two alternatives have been analyzed. Alternative 1 would consist of approximately 2,540-feet of 36-inch diameter pipeline; 130-feet of 48-inch pipeline for the tie-ins at the Sizzler box; 1,500-feet of 6-inch service lateral; and 70-feet of 3-inch service lateral. Alternative 2 would consist of approximately 2,690-feet of 36-inch diameter pipeline; 130-feet of 48-inch pipeline for the tie-ins at the Sizzler box; 1,500-feet of 6-inch service lateral; and 70-feet of 3-inch service lateral. At this time, Alternative 1 is the preferred alignment.	MND	08/18/2008
2008072062	G & C Auto Body Windsor, City of Windsor--Sonoma Use permit for an automobile body repair facility. The facility consists of a two-story building on the frontage that will house office space and a second-story caretaker unit and a 10,250 +/- square foot one-story shop building that will contain five repair bays and two preparation/paint bays. The business will operate Monday through Friday from 7:00 am to 7:30 pm and Saturday from 9:00 am to 3:00 pm.	MND	08/18/2008
2008072064	Lindquist Landing Marina Expansion Contra Costa County --Contra Costa The applicant requests approval of a land use permit to amend County File #LP952083, a previously approved land use permit for the Lindquist Landing Marina. The current request is to allow the following improvements: (1) one 750-foot long, 6-foot wide dock with four gangways, connected to 38 steel pilings driven in Rock Slough; (2) one 45-foot by 150-foot RV/boat storage building; (3) one 60-foot by 200-foot RV/boat storage building; (4) two 60-foot by 240-foot RV/boat storage buildings; (5) 22 outdoor RV/boat storage spaces; and (6) ancillary improvements associated with the project including repaving, new paving, and construction of vegetated self-retaining areas designed to treat storm water runoff. Implementation of the project would require minor grading and site preparation work. The project includes a request for approval of a variance to allow a front setback of 0 feet for the proposed gangways where a minimum setback of 25 feet is required. The project also includes a request to work within the drip lines of several code-protected trees for the purpose of installing the gangways. The proposed project previously included floating homes ("live-aboards"), new fuel tanks, a new sewer pump station, and a sewer line extension. The applicant no longer wishes to pursue these improvements and thus they are not analyzed in this Initial Study.	MND	08/18/2008

	prefabricated bridge approximately 80 feet in length across the existing Brea Creek Channel. Currently, Puente Street terminates on both sides of the Brea Creek Channel and the existing bike route is not continuous. The project would provide a Class I bike path to connect the existing Class III bike paths on Puente Street north of Bastanchury Road and on Puente Street south of Imperial Highway. The purpose of the project is to close the gap in this bikeway, which is designated on the City of Fullerton's General Plans, as well as the 2001 Orange County Transportation Authority (OCTA) Commuter Bikeways Strategic Plan. By completing this gap closure between two sections of Puente Street, bicyclists will be able to access businesses and commercial area along Imperial Highway with a more direct route. No right-of-way acquisition is necessary and limited ground disturbance would be required.		
2008078227	LS 64 Anomaly (KMAP) Dig JT 23250 Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento --Placer SFPP, L.P. (SFPP), an Operating Partnership of Kinder Morgan Energy Partners, L.P. (KMEP) proposes to conduct maintenance activities on an existing 8-inch petroleum products pipeline in Placer County, California. This pipeline alignment runs between the cities of Rocklin and Chico, CA and is designated Line Section 64 (LS 64). The work site is located on LS 64, about one mile north of the City of Sheridan, CA. The pipeline runs under an emergent freshwater wetland. An area 4-feet wide x 8-feet long x 5-feet deep (6cubic yards of soil) will be excavated, and side-cast until the work is complete. If remediation of the anomaly is required, the preferred repair is to weld a steel sleeve to the pipeline in lieu of a composite wrap. The excavation will be backfilled with native soil, and the site restored to pre-construction conditions.	NOE	
2008078228	Change Petition State Water Resources Control Board --Del Norte On September 3, 2003 Richard and Loraine Garvin filed a Petition for Change with the State Water Resources Control Board Division of Water Rights (Division), pursuant to the provisions of Water Code section 1700. The petition requests authorization to: (1) change the Point of Diversion from onstream diversion in the Smith River to two wells located in the subterranean stream; (2) delete parcel 105-260-005 (owned by the Department of Stockwatering and Domestic uses to the existing irrigation purpose of use on License 4720 (Application 14948). 2008079050	Mission Creek Investments Desert Hot Springs, City of Desert Hot Springs--Riverside The Department of issuing a Lake and Streambed Alteration Agreement for the project proponent who proposes to develop a 55-acre property into 107-single-family lots, lettered lots for park, open space/trail, flood control and retention, and public and private streets. This property is located adjacent to and north of the existing city limits Desert Hot Springs. Several Department-jurisdictional un-vegetated ephemeral drainages are located on the site. Permanent impacts to those drainages total 0.273 acres. The impacts for the 0.273 acres will be mitigated at a 2:1 ratio for a total of 0.546 acres. Of the 0.546 acres, 0.237 acres will be mitigated onsite through a conservation easement placed on this property. This conservation easement shall be provided in perpetuity, approved of by the Department, and will include a management endowment of \$2,370 (at \$10,000 per acre). The remanding 0.309 acres shall be	NOD

2008074002	Lower-American River Salmonid Spawning Gravel Augmentation & Side Channel Establishment Program U.S. Bureau of Reclamation --Sacramento The purpose of the action is to increase and improve salmon and steelhead spawning and rearing habitat by replenishing spawning gravel and establishing additional side-channel habitat at new restoration sites in the Lower American River between Nimbus Dam and Arden Rapids. Work would start in the summer of 2008 and continue yearly for up to five years as funding allows. About 10,000 to 15,000 cubic yards of gravel would be added per year. The total amount over five years would be up to about 75,000 cubic yards, depending on funding and the cost of buying, processing, and transporting the gravel.	EA	08/19/2008
2004012014	Rock Creek Ranch Specific Plan Mono County Paradise--Mono The project scope encompasses a proposed General Plan Amendment to change the designation of the 54.7-acre site from Estate Residential to Specific Plan, approval of the Specific Plan, approval of Tentative Tract Map 37-56, and site improvements including water and power and sanitation facilities. A total of 60 individual residential lots would be created. Fifty-five of the lots are proposed to be sold for custom development by lot owners, and five lots are to be developed by the applicant as workforce housing units that will be sold in tandem with the custom lots. All development on the site will be consistent with requirements of the Specific Plan.	EIR	09/05/2008
2007031032	Ashley Construction VTM 63567 Hidden Hills, City of Hidden Hills--Los Angeles NOTE: FYI - Final EIR The proposed project involves a series of actions that would allow for the development of 8 single-family residences (7 new plus 1 replacement) on an approximately 18-acre site. The project involves reconfiguration of 6 existing parcels (one of which is currently developed with a single family residence) into 8 new parcels. Of the 6 parcels, 5 are within the City of Hidden Hills, and have a General Plan Land Use designation of RA-1 and zoning designation of RA-S (Residential Agricultural Suburban). The other parcel, totaling about 7.8 acres, is currently within unincorporated Los Angeles County and would require annexation to the City of Hidden Hills. The 7.8 acres are surrounded by the City on three sides and are currently within City's Sphere of Influence.	FIN

2008052068	Solar Photovoltaic Project - Del Valle Water Treatment Plant Zone 7 Water Agency Livermore--Alameda The project is intended to provide cost saving and environmentally preferable solar energy for Zone 7's Del Valle Water Treatment Plant (DVWTP). At its peak output, the photovoltaic system will supply 300 kW (AC) at DVWTP (approximately 54% of the total energy need for this facility). Zone 7 would continue to purchase traditional energy from PG&E to supplement the solar power which is not available during non-daylight hours. Construction of this system would occur entirely within the DVWTP facility, on a currently unused 2-acre area.	FIN	
2008071102	TR 062370/RENV200500016 Los Angeles County --Los Angeles The proposed project is a request for a tract map to allow fourteen single-family lots (ranging in size from 10,000 to 13,502 gross square feet) and one 10,000 square foot lot for retention basin. Twenty thousand cubic yards of grading is proposed and will be balanced on site. Avenue M-12 will provide ingress and egress to the project site.	MND	08/19/2008
2008071104	Dacey Tract Map / Conditional Use Permit San Luis Obispo County --San Luis Obispo Request by Michael Dacey / M.C. Thomas Construction for a Conditional Use Permit and Vesting Tentative Tract Map (Tract 2984) to formalize the conversion of a former mobile home park and to allow the subdivision of a 14,000 square-foot site into a five-unit planned development. The project would formalize the conversion of the Oceano Trailer Park to single-family residential use. The Conditional Use Permit / Tract Map would also result in the subdivision of the 14,000 square-foot site into five residential lots varying in size from 2,130 square feet to 2,694 square feet, and a sixth unbuildable lot of 2,200 square feet to be held in common by the owners of the five residential lots. A two-story home is proposed on each of the five residential lots, varying in size from 1,374 square feet to 1,384 square feet with attached garages of approximately 429 square feet.	MND	08/19/2008

	Off-site road improvements are proposed to Beach Street and to the alley between Beach and Ocean Streets (Willie Way). The project will result in the disturbance of approximately 18,000 square feet to accommodate the residential development and off-site improvements. The project site is in the Residential Multi-Family land use category and is located on the north side of Beach Street (addressed as 2031 Beach Street), approximately 100 feet west of Twenty-First Street in the community of Oceano.		
2008071105	Tentative Parcel Map 18006 - Project No.: P200600930 San Bernardino County --San Bernardino Tentative Parcel Map 18006 to create 4 parcels with a major variance for the width to depth ratio on 5.00 acres.	MND	08/19/2008
2008071106	Sand Creek Flood Control Improvement Project San Bernardino Flood Control District San Bernardino--San Bernardino Two separate flood control improvements are proposed to be constructed on approximately 0.5-mile of Sand Creek between Lynwood Drive and the Patton Basin. The impacts of these flood control improvements, which are described in Section 4.0 of this Initial Study, have been studied as one project for the purposes of the California Environmental Quality Act (CEQA). The first project consists of extending the existing concrete double-box structure under Lynwood Avenue for 20 feet, followed by a concrete-lined transition section for 62 feet. At this point, the improvements to the existing channel would consist of a grouted rip-rap trapezoidal channel for approximately 260 feet. This project would be approximately 342 linear feet, immediately downstream of Lynwood Drive. The second project would consist of improvements to the remaining 1,100 linear feet of the existing earthen channel from the end of the first project to just north of the Patton Basin. This second project would be a trapezoidal section constructed of grouted rip rap.	MND	08/19/2008
2008072072	Jeff McMullin - Coastal Development Permit for a Storage Building - B30359C Del Norte County Crescent City--Del Norte The applicant proposes to construct a 40 foot wide by 96 foot long (3,840) by 16 feet 2 inches high single story storage building in order to store wood products. The proposed structure will be located adjacent to Standard Veneer Road. A wetland area is located south of the subject parcel. A portion of a 100 foot buffer from the wetland is located on the southwest portion of the parcel. The structure is 250 feet or more from the edge of the buffer.	MND	08/19/2008
2008072074	Fuels Management Plan San Mateo County --San Mateo The applicant proposes to implement the Wicklow Western Slope Fuels Management Action Plan (FMAP), which focuses on 91-acres of the 478-acre project site. The FMAP proposes to reduce fire hazards by entirely removing	MND	08/19/2008

	<p>eucalyptus trees and thinning the northern coastal scrub within 100-feet of the boundary shared with residential properties on Dolphine Avenue and El Granada Boulevard. Outside of the 100-foot buffer and along the perimeter access road (both sides) the eucalyptus trees will be thinned to a 35-foot spacing and shrubs will be cleared. In areas of 1,000 square feet or more where surface soils are exposed reseeding with native vegetation will occur to soften the visual impact and prevent erosion. In order to protect native trees, the FMAP proposes to remove all Eucalyptus trees within 50-feet of a Monterey Pine tree or Monterey Cypress tree. The plan also proposes mowing coastal scrub vegetation that borders the perimeter access road into islands and thereby providing safety zones for refuge for firefighters.</p>		
2008071100	<p>General Plan Update and Related Zoning Ordinance Amendments Rialto, City of Rialto--San Bernardino</p> <p>The General Plan update addresses the seven state-mandated general plan elements (land use, housing, circulation, safety, open space, conservation, and noise), as well as other issues that are important to the community, including air quality and community design. The updated General Plan establishes an overall development capacity for the City and surrounding areas, and serves as a policy guide for determining the appropriate physical development and character of the City. The General Plan applies to all properties within the City of Rialto. The current City of Rialto General Plan was adopted in 1992. Since then, several minor General Plan amendments have been adopted, including revisions to the Housing element generally in accordance with state mandates. The City has undertaken a comprehensive update of the General Plan to reflect a new vision for the community and to address issues relevant to Rialto today.</p>	NOP	08/19/2008
2008072073	<p>Transit Center District Plan and Transit Tower San Francisco, City and County of San Francisco--San Francisco</p> <p>The Transit Center District Plan (Plan or proposed project) is a comprehensive plan for the southern portion of the downtown Financial District, roughly bounded by Market Street, the Embarcadero, Folsom Street, and Third Street (Plan Area). The area includes both private properties and properties owned or to be acquired by the Transbay Joint Powers Authority (TJPA) in and around the adopted Transbay Redevelopment Project Area (a plan for which was adopted in 2005) and Transbay Terminal. The Plan Area includes all of Zone 2 of the Transbay Redevelopment Area, but no land use or height changes are envisioned within this area. The Transit Tower, a high-rise office tower (approximately 1,000 feet in height) would be located adjacent to a new Transbay Transit center. The Transit Tower would be located on the southeast corner of First Street and Mission Street, Assessor's Bock 3720 Lot 001, in the P (Public) zoning district and the 30-X/80-X height and bulk district.</p>	NOP	08/19/2008
2008062055	<p>AS- TTM 07-1000 Red Bluff, City of Red Bluff--Tehama</p> <p>The proposed project would subdivide one (1) existing lot, totaling +/- 11.31 acres (APN 035-510-15) into forty-nine (49) lots for single-family homes. The lots would range in size from 5,848 to 10,870 square feet. Improvements to existing infrastructure include construction of four (4) new residential roads (A, B, C, D)</p>	Neg	08/19/2008

2008071101	Zone Change 08-0472 Bakersfield, City of Bakersfield--Kern The project proposes a zone change from R-1 (One Family Dwelling) to C-2/PCD (Commercial/Planned Unit Development) on 8.41 acres.	Neg	08/19/2008
2008071103	Klis Conditional Certificate of Compliance San Luis Obispo County Arroyo Grande--San Luis Obispo Request for a (Conditional) Certificate of Compliance to legalize one five-acre parcel, for the purpose of sale and/or development. One 3,500-square foot building envelope and one access driveway is proposed. The proposed project would result in the disturbance of approximately 3,500 square feet of a five-acre parcel.	Neg	08/19/2008
2001061042	Tentative Tract Map 43766 Los Angeles County --Los Angeles The State of California Department of Fish and Game is entering into a Lake and Streambed Alteration Agreement (SAA #1600-2006-0103-R5 revision 1) with Crown Valley Investments, LLC, pursuant to Section 1602 of the Fish and Game Code. Crown Valley Investments, LLC intends to alter the streambed by filling the drainage for the housing development and the extension of a concrete box culvert for the development of Vesting Tract Map No. 43766-(5).	NOD	
2002022033	Route 1/17 Widening for Merge Lanes Caltrans #6 Santa Cruz--Santa Cruz The California Department of Transportation (Caltrans) proposes to remove the existing concrete channel bottom lining Carbonera Creek in Santa Cruz County at the juncture of State Route (SR) 1 and SR 17. This mitigation project is part of a larger transportation safety project. The original Streambed Alteration Agreement (#1600-2003-0503-3) (Agreement) was issued in July 10, 2003; construction ended in October of 2006. As part of the original Agreement, Caltrans was to remove the existing sack concrete and concrete cut-off walls from Branciforte and Carbonera Creeks. However, due to project delays, the concrete removal in Carbonera Creek did not occur before the Agreement expired on December 31, 2006. Accordingly, this Agreement covers the removal of the sack concrete and the concrete cut-off walls that line the Carbonera Creek bed. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2008-0165-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Karen Bewley, California Department of Transportation, District 5. 	to implement passenger rail service and a parallel bicycle/pedestrian pathway on the Northwestern Pacific (NWP) right-of-way within the Counties of Marin and Sonoma, and imposing 1/4 cent retail transaction and use tax (sales tax) to provide funding for the project.		
2002112033	Sonoma-Marín Area Rail Transit Project (SMART) Sonoma Marin Area Rail Transit Commission Cloverdale, Larkspur--Marín, Sonoma SMART is a 70-mile passenger rail project and adjacent bicycle-pedestrian pathway on the existing Northwestern Pacific right-of-way between Larkspur, Marin County, and Cloverdale, Sonoma County. Trains will run at approximately 30-minute intervals in the morning and evening commute hours, with four round-trips on Saturdays and Sundays.	NOD	
2003029021	TPM 20616; Log 92-14-013; Borysewicz San Diego County --San Diego The Applicant proposes to alter two unnamed tributaries to the West Branch of San Vicente Creek to accommodate the construction of the Borysewicz Subdivision Project (SAA #1600-2008-0182-R5). The Borysewicz Subdivision Project is located on a 67-acre site, currently supporting a single-family residence. The project consists of four additional residential housing pads (parcels) and construction of an access road and driveways. Approximately 40 percent of the site will remain undeveloped. The project impacts 489 square feet (0.01 acre) of streambed and includes grading and fill within two unnamed tributaries to the west branch of San Vicente Creek to accommodate the following activities: a) The first drainage is approximately 3-foot wide and 100-foot long, the second drainage is approximately 3-foot wide and 63-foot long. Both drainages will be graded and filled and 18-inch corrugated metal pipes (CMP) will be placed and headwalls will be constructed; b) Construction phase Best Management Practices (BMPS) include silt fencing, fiber rolls, gravel bags stabilized construction ingress and egress, bonded fiber matrix, straw blanket mats, area drain inlet protection and general site management; c) On-site creation of 914 square feet (0.02) acre of wetland habitat to satisfy Regional Water Quality Board (RWQB) water quality mitigation requirements.	NOD	
2004072050	John McKernon / Stephani Aranas Zone Change / TPM (Z-04-05/TPM-04-03) Siskiyou County Mount Shasta--Siskiyou Note: Tiered Project Zone Change for a 1-acre portion of an 11.0-acre parcel zoned AG-2 (Non-Prime Agricultural, 10-acre minimum parcel size) to R-R-B-2.5 (Rural Residential Agricultural, 2.5-acre minimum parcel size). Boundary Line Adjustment 07-26 is transferring the area to an existing 2.5-acre parcel. The project would not result in an increase in density or alter allowable use.	NOD	
2005112112	Cappy Dobbs - Minor Subdivision - MS0612C Del Norte County --Del Norte Minor Subdivision of an 80-acre parcel into three parcels and a remainder. The parcel sizes would be 7.1 acres, 5.2 acres and a 12.6 acres, with a 55 acre remainder parcel. The parcel is located on the east side of the Ocean View Drive and is bisected by the California Coastal Zone. Proposed parcels one through three are located within the boundary of the Coastal Zone and the remainder	NOD

	on an approx. 2-acre portion of the existing facility.		
2008052110	Infrastructure Improvements, Phase 2 University of California, Santa Cruz Santa Cruz--Santa Cruz The proposed project consists of implementation of storm water control improvements at about 33 locations in the Jordan Gulch and Moore Creek Drainages on the UCSC main campus. These natural drainages on the campus, used to convey both natural storm water runoff and runoff from development, are experiencing progressive erosion, and sinkholes within the drainages have become clogged with silt and debris. This has reduced the ability of drainages to infiltrate water. The project would install check dams and step pools, reinforce banks, and implement other measures to restore natural infiltration, reduce siltation and halt progressive erosion. The project is not designed to address any increases in runoff or increase the capacity of existing campus utilities; nor would it increase campus population; it simply would restore the ability of natural drainages to handle existing storm water flows. The project was analyzed in the UC Santa Cruz Infrastructure Improvements Project, Phase 2 Initial Study/Mitigation Negative Declaration, which was certified by the Chancellor of UC Santa Cruz on July 8, 2008.	NOD	
2008062014	Marin Country Day School Conditional Use Permit and Design Review Corte Madera, City of Corte Madera--Marin Marin County Day School is proposing to modify the streambed and banks of an unnamed stream channel tributary to San Francisco Bay in order to enhance and restore the stream channel back to its former alignment and increase habitat for biological resources. Implementation of the project will be conducted in two phases and will include the following: site grading and removal of concrete, widening and setback of stream bank slopes and flood plain area, installation of rock step pools and native boulders, and replanting of stabilized streambed and bank areas with native vegetation. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2008-0167-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Geoff Smick/WRA.	NOD	
2008062041	Ammon Parcel Map Subdivision Humboldt County --Humboldt A Minor Subdivision of an approximately 28 acre parcel into two parcels of 14 acres each. The parcels will be divided along the centerline of State Highway 96. Parcel 1 is currently developed with a single family residence and Parcel 2 is developed with a mobile home park. Both parcels are served with community water and on site sewage disposal systems. No further development is proposed.	NOD	
2008062042	Montano Extension Truckee Sanitary District Truckee--Nevada Installation of 200 feet of 6-inch sewer main and two manholes to extend sewer service to a property. The new pipeline will be connected to an existing sewer main located on West Reed Avenue.	NOD

2008079051	Agreement 2008-0058-R4; Albright Bridge Project San Luis Obispo County Morro Bay--San Luis Obispo The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code with the project applicant, Anne and Glen Albright, 968 Balboa Street, P.O. Box 942, Morro Bay, California 93442. The project consists of the installation of a span bridge, consisting of two parallel railroad flat cars, over an intermittent stream, as part of the construction of an access driveway to a home site. Silt fencing, fiber rolls, gravel bags and catch basins will be installed to prevent sedimentation of the stream. Disturbed areas will be restored and revegetated with native species following construction.	NOD	
2008079053	Lake or Streambed Alteration Agreement No. R1-07-0517/THP 2-07-105-SIS 'Marilyn Creek THP' Forestry and Fire Protection, Department of --Siskiyou 1 Encroachment for Timber Harvesting Activities.	NOD	
2008079054	Palm Desert Larkspur Hotel Palm Desert, City of Palm Desert--Riverside A three-story 106-room boutique hotel and two-story condominium unit including sixteen 3-bedroom lockout rooms (48 keys maximum) totaling a maximum of 154 units/keys. The project includes a two level underground parking lot with 203 spaces, a restaurant area, gift shop, conference and meeting rooms, spa, and amenities including a roof deck pool and service bar, roof deck garden and roof deck patios on 11 of the 16 condominium units.	NOD	
2008078243	Salvador Creek Bank Stabilization Fish & Game #3 Napa--Napa The proposed project involves bank stabilization and sediment removal along approximately 3600 linear feet of Salvador Creek, tributary to the Napa River, between Byway East Street and Jefferson Street in Napa, California (Napa 7.5 minute U.S. Geological Survey quadrangle). The project is intended to repair several areas of bank erosion caused by flooding in the Salvador Creek system. The Department of Fish and Game is issuing a Streambed Alteration Agreement Number 1600-2007-0525-3 pursuant to Fish and Game Code Section 1602.	NOE	
2008078244	Ledbetter Retaining Wall Project Fish & Game #3 Vacaville--Solano The Applicant was in the process of building a retaining wall in Pond Creek to save a large oak tree from falling over into the creek. Warden Jim Jones informed the Applicant that a 1600 Agreement was needed to conduct work in the creek and had the Applicant cease working until an Agreement was obtained. The Applicant proposes to complete the retaining wall to protect the tree from continued erosion. Rip rap will then be placed along the base of the wall in the creek bed to prevent undercutting of the wall. The creek is currently dry and no water will need to be diverted. Issuance of a Streambed Alteration Agreement Number 1600-2008-0276-3 is pursuant to Fish and Game Code Section 1602.	NOE

2008078245	Lease of Existing Office Space Public Utilities Commission Oakland--Alameda Leasing approximately 785 square feet to house the Deaf and Disabled Telecommunication program (DDTP) of the CA Public Utilities Commission in an existing office building in Oakland. DDTP Service center provides specialized telecommunication equipment and services for people the communication and hearing disabilities.	NOE	
2008078246	11351 Pyrites Way (U-Haul Sign) Use Permit and Variance Sacramento County --Sacramento The project consists of the following: -A Use Permit to legalize an existing 30 foot tall pole sign on approximately 6.9 plus or minus acres in the M-2 (Special Sign Corridor) zone. -A Variance to exceed the maximum 6 foot height allowed and maximum 24 square feet sign area for a free standing sign in the Special Sign Corridor.	NOE	
2008078247	Construction on Frazier Mountain Park Road (Contract No. 99018); Agreement 2006-0137-R4; Cuddy Creek Drop Structure Repair Fish & Game #4 --Kern Excavate the area to reconstruct the riprap-lined drop structure and erosion pad to prevent further erosion and degrading at the bridge.	NOE	
2008078248	County of Del Norte - CGP2008-46C - Leachfield Replacement Del Norte County --Del Norte The project consists of replacement of a sewer main and associated leachfield of the Klamath Community Services District that were damaged during the flood events of the Winter of 2005 to 2006.	NOE	
2008078249	Medea Creek Pathway Restoration Rancho Simi Recreation and Park District --Ventura The project involves the restoration of a paved path along Medea Creek. The path has been undercut by creek flows that have formed a large sink hole due to bank and creekbed erosion. The path will be repaired by filling the sink hole with an estimated 240 cubic yards of large boulders, and 660 cubic yards of gravel fill.	NOE	
2008078250	Grey Whale Cove Stabilization Fish & Game #3 --San Mateo The California Department of Transportation (Caltrans) proposes to repair a large slip-out that occurred in December, 2003 during excavation and rebuilding of a new fill slope. The slip-out filled approximately .017 acres (90 linear feet) of jurisdictional wetlands at the northern base of the embankment. The material deposited as a result of the 2003 slide has not been removed and has since become vegetated. Another slope failure occurred at the southern base of the embankment in February, 2005, eight months after completion of embankment improvement activities, and filled a portion of the channel area. This NOE addresses Caltrans' current proposal to stabilize the 2005 slide area and mitigate for wetland impacts associated with the two slides.	NOE

2008078258	Lyons Valley FFS - Water Storage Upgrade Forestry and Fire Protection, Department of --San Diego The California Department of Forestry and Fire Protection (CAL FIRE) will soon implement a project to upgrade the sub-standard existing potable water storage at the Lyons Valley Forest Fire Station located in Jamul, California. The project will consist of placing (2) 2500-gallon, high density polyethylene water tanks adjacent to the existing tank farm located on a hilltop near the apparatus building within CAL FIRE property. The project will require that the tanks be placed on gravel beds approximately 2.5" thick. These tanks will help add to the storage capacity of the station's potable water. Communication floats will need to be powered via conduit from an existing panel located 30' away in the pump house. The trench for power will only need to be 2'-3' deep. Since these tanks will become the direct outgoing source to the buildings, there will need to be some trenching between the tank farm and the existing buildings. This 2'-3' deep trench will approximately 200' run through the north slope of the hill which substantially altered during initial construction.	NOE	
2008078259	Right of Entry to Marin Municipal Water District Parks and Recreation, Department of --Marin Issue a Right of Entry (ROE) permit to Marin Municipal Water District to enter Samuel P. Taylor State Park for annual fish habitat and stream management structure maintenance at Lagunitas Creek. Permit valid from August 1, 2008 through December 31, 2008. All work conducted in association with the Right of Entry will comply with all State and Federal environmental laws, including but no limited to the Endangered Species Act, California Environmental Quality Act (CEQA), and Section 5024 of the Public Resources Code, DPR will advise MMWD if any new historical resources (including archaeological sites), special status species, Threatened/Endangered Species, or other resource issues are identified within the area. This Right of Entry will provide legal access and use of this property to MMWD while protecting natural resources.	NOE	
2008078261	California Real Estate Association (C.R.E.A.) Trail Bridge Replacement Parks and Recreation, Department of --Humboldt Replace falling 16' x 4' bridge at the trail head of the C.R.E.A. Trail with a new 16' x 4' bridge at Prairie Creek redwoods State Park to comply with health and safety standards. Work will build components of the new bridge in the park service yard; transport components to the project site; remove the existing bridge; and assemble the new bridge on site. Installation in the forest will require approximately 10 working days. Excavations for the new bridge footings above the watercourse will reach 10 feet in depth. The implementation of Best Management practices will prevent potential sedimentation or pollution. Work will take place outside of the breeding season for the northern spotted owl and marbled murrelet. In the event that previously undocumented cultural resources are encountered during project implementation, work will cease within 30' of the find and DPR cultural staff will be notified to	NOE

During early consultation a mobile home park subdivision was proposed. Since then it has been determined that the state (HCD) would still control such a park, hence the subdivision request is deleted. Each lot has a two-car garage and additional spaces for a total of four off-street parking spaces. Additional guest and RV parking is available. The park also includes a manager's residence, storage yard, clubhouse, and recreational/park facilities. Nematode Road, the accessing road form Johnstonville Road will be widened and dedicated as a public street. A larger cul-de-sac will be constructed at the entrance of the park. Underground utilities for water and sewer will also be installed.	MND	08/20/2008
2008022076	Light Brown Apple Moth Eradication Program Food and Agriculture, Department of --Alameda, Contra Costa, San Francisco, Marin, Solano, ... The California Department of Food and Agriculture (Department) is preparing a Programmatic EIR to evaluate effects of implementation of eradication strategies and methods for the light brown apple moth (LBAM) (<i>Epiphyas postvittana</i>) in portions of the state where infestations have been identified by trapping programs to date. The LBAM attacks at least 2,042 different species, including many agricultural, horticultural, and forest species of great economic and ecological value. The Department is working closely with the United States Department of Agriculture (USDA) and a Technical Working Group to deploy the most effective strategy and methods to achieve the overall goal of eradication of LBAM from California. Preliminary actions were undertaken as emergency actions in 2007 in the Monterey-Santa Cruz area. Subsequent eradication activities are scheduled for 2008-2009 in the currently infested counties and in any additional counties within the state where subsequent infestations are found. 2006062071	Feather River Levee Repair Project Three Rivers Levee Improvement Authority Marysville, Yuba City--Yuba The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2008-0170-R2 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Three Rivers Levee Improvement Authority. The Waterside Blanket Repair Project (WBRP) involves extending the currently planned waterside blanket being constructed as part of the larger Feather River Levee Repair Project an additional 40 feet to approximately 20 feet below the waterside toe of the levee. The proposed project involves installation of a 40 foot by 1,000 linear foot clay blanket along the existing Feather River levee from project engineering station (STA) 85+00 to STA 95+00. The distance between the stations is 1,000 linear feet. The blanket will extend across part of a maintenance road that runs along the waterside toe of the levee. In addition, the WBRP will require a 20 foot temporary construction easement, 10 feet of which extends below the proposed waterside blanket from STA-85+00 to STA 95+00 along the existing maintenance road for construction access and staging. The total project area, including the entire waterside blanket extension and temporary construction easement, is approximately 1.15 acres (1,000 linear feet by 50 feet). This is also the total impact area. To construct the waterside blanket extension, existing soil will be removed to a depth of approximately 5 feet below existing grade for an approximate total of 10,000 cubic yards to be excavated. The area will then be backfilled with approximately 10,000 cubic yards of imported clay fill material.	NOD	
2007042021	Richard Moore Use Permit and Reclamation Plan (UP-06-11 / RP-06-01) Siskiyou County --Siskiyou The project proposes to annually harvest 30,000 to 200,000 cubic yards of gravel from the Scott River, tributary to the Klamath River.	NOD	
2007102120	Fourth Amendment to the Shasta Dam Area Redevelopment Plan Shasta Lake, City of Shasta Lake--Shasta The purpose of the project is to amend the existing Redevelopment Plan for the Shasta Dam Area Redevelopment Project, adopted on July 11, 1989. The Original Area encompasses 2,458 acres; the Amendment adds 746 acres to the Project Area. In addition, the Amendment extends time limits and increases financial limits to ensure the Redevelopment Agency has sufficient time to continue its planned work for the Amended Project Area and enable the Agency to maximize its use of redevelopment funds. 2008078304	<p>Upgrade Sewage Grinder System Corrections and Rehabilitation, Department of San Diego--San Diego</p> <p>CDCR's Upgrade Sewage Grinder System project proposes the design and construction of upgrades to the wastewater system at RJD. The project consists of the installation of a new sewage grinding system (auger monsters), including a new concrete pit that will house this equipment. The auger monster grinds, screens and separates the solids from the waste stream. The scope of work includes installing two auger monsters, rerouting the existing sewer line to a new concrete pit, located 20 feet below, which will house this equipment. This project is necessary to bring the facility into compliance with the City of San Diego's industrial wastewater discharge requirements.</p>	NOE	
2008078305	<p>Mount Woodson COM - Hazardous Fuel Reduction Project Forestry and Fire Protection, Department of --San Diego</p> <p>This hazardous fuels reduction project involves clearing 200 feet around the tower site atop Mount Woodson near Ramona, in San Diego County, California. The total project area occupies approximately 4 acres of brush-covered wildlands surrounding the existing communications facility, on 30-40% slopes. Hazardous fuel removal will be achieved by CAL FIRE crews and will consist of thinning brush and limbing trees around the communication towers. Trees in the project area will be pruned to 8 feet in height or one-third of the healthy, live crown, whichever is less. Chainsaws will be used to cut brush, with stumps left in place. No grubbing will be done, so very little soil disturbance will result. Brush will be cut and piled. These piles will be chipped and chips will be dispersed in the project area. No burning will occur on this project.</p>	NOE	
2008078306	<p>Grading Permit G2004-59 Tuolumne County Sonora--Tuolumne</p> <p>Grading Permit G2004-59 to allow the placement of approximately 50 cubic yards of material to construct a commercial building and parking lot. 16) to enclose the existing concrete courtyard and connect the two existing dining rooms into a single dining hall. The existing dining hall is based on the original design of this building that was previously used by the US Army. The dining areas consist of two separate rooms of 1,533 Sq. Ft. each. The courtyard in-between the two rooms is approx, 912 SF of paved area. The combined space will provide a large, contiguous dining room or 3,970 SF that will enhance the capacity of the dining services that have outgrown its original capacity. It will also remodel the interior food serving areas into different food platform type areas. This project will improve services for student dining needs and significantly affect retention of students.

2008024004	Habitat Restoration of the Afton Unit, Tract 2 on Sacramento River National Wildlife Refuge U.S. Fish and Wildlife Service Willows, Colusa--Glenn, Colusa, Sutter This Draft Comprehensive Plan and Environmental Assessment describes management of Sacramento, Delevan, Colusa, and Sutter National Wildlife Refuges for the next 15 years. Establishes vision for Refuges, sets goals and management objectives, and identifies strategies for achieving refuge purposes.	EA	09/12/2008
2005091094	Ormond Beach Specific Plans Oxnard, City of --Ventura The City of Oxnard has received applications for two specific plans from separate applicants to guide development in a portion of the Ormond Beach area. The first, the SouthShore Specific Plan, calls for a variety of residential uses, a small amount of mixed-use commercial development, an elementary school, a high school, a manmade lake, and supporting park and open space uses. The second, the South Ormond Beach Specific Plan, calls for a mixture of light industrial and business park uses, as well as supporting open space.	EIR	09/08/2008
2007082092	City of Galt General Plan Update 2030 Galt, City of Galt, Elk Grove, Lodi--Sacramento The City is preparing the City of Galt General Plan Update: 2030 (Proposed Project) as an update to the City's existing General Plan. This EIR will provide an assessment of the upgraded General Plan. The Proposed Project will include a Policy Document, an updated land use diagram, an updated circulation plan, and a proposed expansion of the City's existing Sphere of Influence. The City is located on State Route 99 in southern Sacramento County between the cities of Elk Grove and Lodi. The Housing Element is not being updated as part of this project; its required update will follow in early 2009.	EIR	09/05/2008
2007101067	Hosking/SR 99 Commercial Development Bakersfield, City of --Kern The proposed project would develop a regional retail shopping center in southern Bakersfield with approximately 1 million square feet of leasable space and a	EIR	09/05/2008

	300-room hotel. A major retail site would be a Bass pro Sporting Good store. The proposed project site is approximately 109 gross acres, of which approximately 16 acres would be dedicated to public right-of-way street improvements associated with the proposed project along Berkshire Road, South 11 Street, and Hosking Avenue. The proposed commercial development's remaining 93 net acres would be dedicated to various structures and associated surface parking lots, internal street and pedestrian walkway improvements, and landscaped areas. The following Assessor's Parcels are affected APNs: 515-020-06-00-7, 515-020-07-00-0, 515-020-08-00-3, 515-020-09-00-6, 515-020-05-00-4, 515-020-10, 515-020-30&515-020-32.		
2007111070	Tijuana River Wetland Mitigation Project San Diego County Water Authority San Diego--San Diego The proposed project would establish a permanent surface connection to the Tijuana River, expand the functional floodplain to the south of the river and west of the Smuggler's Gulch Channel, and provide a system of multi-purpose trails connected to existing trail segments located throughout the Tijuana River Valley Regional Park, Tijuana Slough National Wildlife Refuge, and Border Field State Park.	EIR	09/05/2008
2007122069	Solano County 2008 Draft General Plan Solano County Vallejo, Benicia, Fairfield, Dixon, Suisun City, Vacaville, ...--Solano The proposed project is the 2008 update of the Solano County General Plan.	FIN	
2008041103	Palm Desert Sheriff Station Project Palm Desert, City of Palm Desert--Riverside The project is construction and operation of a new Sheriff Station of approximately 85,496 square feet with a 20-foot by 20-foot rooftop helipad, parking for 470 vehicles, a fleet fueling station, wash bay for oversize vehicles, and bioswales for stormwater pollution management. By 2025 staffing would consist of 350 sworn and 100 non-sworn personnel for a total of 450. The helipad would be used intermittently for emergency purposes. General Plan land use designation would change to Public/Quasi Public Facilities (PF) and zoning would change to Public Institution (P).	FIN	
2008051108	West Covina Park-And-Ride Foothill Transit West Covina--Los Angeles The proposed project includes a proposed multilevel Park-and-Ride (PNR) structure on the 2.92 acre project site that would provide parking for local and regional commuters. This would include: (1) provision of 520 net new parking spaces in a multilevel structure on the site at 100 South Vincent Avenue in the City of West Covina, for use by Foothill Transit bus patrons and other visitors; (2) relocation of the two existing drive-through automated teller machines (ATMs) and canopy; (3) provision of a new continuous right turn lane from northbound South Vincent Avenue to eastbound Lakes Drive; (4) minor alteration to the adjacent Interstate 10 ramp; and (5) the relocation of driveways along Lakes Drive.	FIN

2008071110	Proposed Site Plan, Conditional Use Permit & Tentative Parcel Map PLN08-00007 Victorville, City of Victorville--San Bernardino To allow for the development of a new commercial retail center including 90,978 square feet of buildings on 10.10 gross acres of vacant land. The proposal also includes a Conditional Use Permit for a master sign program and a Tentative Parcel Map for the creations of 8 parcels from 5 existing parcels. The project will be accessed from Highway 395 and Bear Valley Road.	MND	08/21/2008
2008072081	Vintage Oaks Affordable Apartments GPA/ ZC/ DRR 07-55 Windsor, City of Windsor--Sonoma Design Review, General Plan, and Zoning Ordinance amendment for a multi-family affordable rental project with 41 units on 1.66 +/- acres. The project contains a four story building located within the Town's Redevelopment Project Area. The project is currently zoned "Village Residential" and the proposed zoning is "Compact Residential."	MND	08/21/2008
2008072085	Cuneo Forest Restoration Project Parks and Recreation, Department of --Humboldt DPR proposes to promote historic species composition, encourage rapid tree growth and accelerate the development of late-seral forest characteristics by mechanically thinning (using chainsaws) approximately 1,900 acres of formerly harvested stands. Douglas-fir and tanoak trees that are restricting the growth of neighboring Douglas-firs will be thinned to more closely resemble historic stand densities and composition. This variable density thinning approach relies on the presence of existing conifers and promotes their vigor, stability, and competitive position. Felled trees will be left where felled, then lopped and scattered within 3 feet of ground.	MND	08/22/2008
2008072086	Garden Essentials Vacaville, City of Vacaville--Solano Garden Essentials is a garden pottery sales business that consists of an outdoor sales area with all merchandise visible outside on the 3.16-acre parcel. A small 373 square foot modular building will be on site for office needs. Laguna Creek borders the northeast boundary line, Interstate-80 borders the southwest boundary line, Cherry Glen Road borders the northwest boundary line, and to the southwest is a neighboring property of the same general commercial zoning. No utilities are on the site and thus will require a septic system to be built and a well to be dug for domestic use.	MND	08/22/2008
2008072084	New Hillview Middle School Project Menlo Park City School District Menlo Park--San Mateo Reconfiguration of existing middle school, located on 9.36-acre site to accommodate an increase in projected student attendance from about 670 to a maximum of 920 students. Present academic/administrative core would be relocated to current playfield area while the new playfield/hardcourt area would be placed within the existing academic/administrative core part of the campus. New buildings of one and two-stories would be constructed. Internal circulation would be revised with new drop-off pick-up loop and new parking spaces would be added.	NOP	08/21/2008

2008071109	Reclamation Plan 08-0001 & Conditional Use Permit 08-0001 Imperial County --Imperial The applicant, Pyramid Construction, is proposing to mine approximately 500,000 tons of construction aggregate over a ten year period. The applicant is proposing a Reclamation Plan #08-0001 for review and currently has a Plan of Operations being reviewed by the Bureau of Land Management for the mining of this aggregate material (sand and gravel). The applicant is also proposing a Conditional Use Permit #08-0001 for a water well that will provide water for dust suppression and mining operations as part of the project, but located on a separate parcel. Reclamation will be conducted concurrently with mining operations.	Neg	08/21/2008
2008072082	3441 Elkhorn Boulevard Grading Permit Sacramento County --Sacramento The proposed project consists of grading a 4.2 +/- acre site for the construction of a 260,000 square foot (0.60 +/- acre) building pad and associated paved parking for the remaining lot. The project also includes street frontage improvements for Elkhorn Boulevard and 34th Street. Three entrances will be constructed for the new facility, including two on 34th Street and one on Elkhorn Boulevard.	Neg	08/21/2008
2008072083	Aquatic Park Cleaning (Dredging) Project, Near 2821 W. Bolivar Drive Berkeley, City of Berkeley--Alameda The proposed project is the dredging of portions of Aquatic Park and cleaning of culverts connecting Aquatic Park to San Francisco Bay.	Neg	08/21/2008
2002011116	Inland Empire Utilities Agency Wastewater, Recycled Water and Organics Management Master Plan Inland Empire Utilities Agency Fontana--San Bernardino This project includes a short segment of the Jurupa Regional Recycled Water Pipeline and two alternative alignments of the Fontana-3 regional recycled water pipeline and laterals from this regional pipeline. The project also includes the installation of recycled water pipeline ranging between 6 inches and 48 inches in diameter and between 36,225 and 38,647 linear feet in length, which will occur within paved public roadways and curbs and gutters and within compacted dirt access road right of ways. The laterals would deliver recycled water for irrigating large landscaping areas of the publicly owned park and school properties in the southern portion of the City of Fontana that can use the recycled water for irrigation purposes.	NOD	
2004011026	Proposed Water Production Wells and Associated Facilities (Well Nos. 22 Replacement, 24 and Four Pardee Wells) Beaumont-Cherry Valley Water District Beaumont--Riverside Well 25 is one of six wells proposed by the Beaumont Cherry Valley Water District to serve various pressure zones within the District. Well 25 is part of the District's Master Plan and Urban Water Management Plan, which identifies potential water supply with anticipated water demands. The project includes the drilling, casing, testing, and development of Well 25 within the service area of the City of Beaumont. Well 25 has a desired yield of approximately 3,000 gallons per minute (gpm) and includes a sodium hypochlorite disinfection system.	NOD

2007021015	UPS Freight Facility Rialto, City of Rialto--San Bernardino The proposed project is the construction and operation of a freight office/cross-dock facility. The conceptual plan for development within the project limits includes four structures, collectively totaling 143,900 square feet. Building A (proposed crossdock) will encompass approximately 119,850 square feet, of which approximately 4,600 square feet will be devoted to office uses. Building A will provide 250 doors accommodating crossdock operations. Building B (fuel area) will total approximately 2,230 square feet. Vehicle and site maintenance operations will be housed in Building C, which is approximately sized at 19,200 square feet. A vehicle wash area will be supported from the approximately 3,300-square foot Building D.	NOD	
2008011117	Stumpfield Road and Watt Road Strategic Fuel Treatment Forestry and Fire Protection, Department of --Mariposa The proposed project involves the selective removal of hazardous fuels along seven miles of existing road, in order to create a shaded fuel break. Approximately 150 feet on either side of the road will be treated. The project will require the use of heavy equipment (masticator) and hand labor to remove vegetation.	NOD	
2008041103	Palm Desert Sheriff Station Project Palm Desert, City of Palm Desert--Riverside The project is construction and operation of a new Sheriff Station of approximately 85,496 square feet with a 20-foot by 20-foot rooftop helipad, parking for 470 vehicles, a fleet fueling station, wash bay for oversize vehicles, and bioswales for stormwater pollution management. By 2025 staffing would consist of 350 sworn and 100 non-sworn personnel for a total of 450. The helipad would be used intermittently for emergency purposes. General Plan land use designation would change to Public/Quasi Public Facilities (PF) and zoning would change to Public Institution (P).	NOD	
2008041147	Brawley Housing Element Update Brawley, City of Brawley--Imperial An update of the City of Brawley Housing Element addressing the existing and future needs covering a five-year period of June 2008 through June 2013. It provides an implementation strategy for effectively addressing the housing needs of Brawley residents during this period.	NOD	
2008051115	Miramonte Conservation Camp Replacement Project Forestry and Fire Protection, Department of --Fresno CAL FIRE is proposing to replace the existing Miramonte Conservation Camp in Fresno County, California. The replacement project would include the following facilities: - Construction of an administrative building - Two bachelors' office quarters - Inmate barracks - Mess Hall - Hobby building	NOD

	- Recreation building - Warehouse, welding shop, auto shop, carpenter shop, storage building, utility vehicle building, and other miscellaneous structures.		
2008052005	Nearby Lagoon Sedimentation Management Plan & Sediment Removal Project Santa Cruz, City of Santa Cruz--Santa Cruz The proposed project consists of three elements: (1) adoption of the Nearby Lagoon: Lagoon-Specific Sedimentation Management Plan (SMP); (2) dredging and removal of 1,200 cubic yards of sediment from the main open water channel of Nearby Lagoon; and (3) temporary removal of the center sections of the floating walkway for a one-month period in the winter to improve winter flows and flushing through the lagoon.	NOD	
2008062043	Prairie City SVRA Four-Wheel Drive Improvements Parks and Recreation, Department of Folsom--Sacramento This project is to improve the existing four-wheel drive area by providing a new advanced skills loop, new multi-level trail segments, improvements to the existing obstacle course, mud play, and hillside log jam areas, grading the four-wheel routes, and adding recovery winch points, picnic areas, and restrooms.	NOD	
2008062060	Fairmont Charter Elementary School Vacaville Unified School District Vacaville--Solano The proposed project consists of the construction of a new school building at the existing Fairmont Charter Elementary School campus. The new school building would comprise approximately 53,392 square feet and would provide 91 parking spaces. The project would increase student capacity from about 550 students to 617 students. Once the new school building is completed, the existing school building will be demolished.	NOD	
2008069023	Retrofit and Installation of Wells (Well Nos. 27 and 29) Beaumont-Cherry Valley Water District Beaumont--Riverside Beaumont Cherry Valley Water District (BCVWD) proposes to retrofit an existing well to serve the 2650 Pressure Zone within BCVWD. BCVWD will retrofit an existing functional well at the Sunny Cal Egg & Poultry Company (Well 29). The pump, electrical control panels, valves and pipes, and purge line already exist at this well. The well has a desired yield of 3,000 gallons per minute (gpm) and will include a sodium hypochlorite disinfection system.	NOD	
2008079055	Streambed Alteration Agreement 1600-2008-0275-3/ THP # 1-08-038 SCR Forestry and Fire Protection, Department of --Santa Cruz The applicant proposes to upgrade and maintain an existing seasonal road crossing over an unnamed Class II watercourse on Chase Mill Road. The unnamed Class II watercourse flows downstream approximately 1.4 miles where it empties into the San Lorenzo River. The project area is located approximately 5 miles north of the town of Boulder Creek. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2008-0275-3 pursuant to Section 1602 of the Fish and Game Code to the project applicant, James Hildreth/Hildreth Forestry Consulting. 2008071112	Mesa Grande Wireless Telecommunications Facility San Diego County --San Diego The project is a Major Use Permit to construct and operate an unmanned wireless telecommunication facility.	MND	08/22/2008
2008072087	Celebration Community Fellowship (PMPA T20070467) Placer County Auburn--Placer Project proposes approval of a Minor Use Permit to allow for the construction of a 17,900 square foot church on an undeveloped parcel.	MND	08/22/2008
2008072088	San Francisco Garter Snake Recovery Action Plan San Francisco, City and County of Millbrae, San Bruno--San Mateo San Francisco Airport (SFO) is proposing the San Francisco Garter Snake (SFGS) Recovery Action Plan whose purpose is to increase the population of the State and Federally endangered SFGS at the West-of-Bayshore property, located west of SFO and U.S. Highway 101, in San Mateo County. The primary habitat goals of the Plan are to: (1) expand open water habitat for the breeding of SFGS's primary prey species along Cupid Row and South Lomita canals; (2) deepen the existing shallow seasonal wetlands throughout the property to create additional open water habitat; and (3) enhance upland habitat for SFGS through removal of non-native plants and the creation of debris piles for upland cover. The Plan will also include the following elements: (1) flood control maintenance of the canals, (2) fuel abatement, and (3) access road restoration.	MND	08/22/2008
2008072089	Moye Winery Project; Conditional Use Permit (U 2007-12) and Design Review (DR 2007-14) Calistoga, City of Calistoga--Napa The project includes the development of a boutique winery with an annual production of up to 4,000 cases of wine. The proposed 2-story winery structure will be located behind the existing residence toward the southeast. The structure will be approximately 4,714 square feet in size and approximately 23 feet 6 inches in height, as measured from the average natural grade to the midpoint of the roof. The 2,072 square foot ground floor will consist of barrel storage and production facilities, bathrooms, lab/office and a kitchen. An approximately 1,367 square feet covered tank pad and/or crush pad will be developed off of the ground floor. The second story is approximately 1,275 square feet in size and contains office space and the tasting room. The structure will be built using conventional wood frame construction with siding and insulation for temperature control. The structure will be painted consistent with the residence. The crush pad will accommodate a crusher, press and fermentation tanks and other winery equipment as necessary.	MND	08/22/2008

2005102007	<p>Evergreen East Hills Development Policy San Jose, City of San Jose--Santa Clara</p> <p>The existing Evergreen Development Policy (the "Policy") sets forth transportation and flood control criteria that must be satisfied prior to development occurring within the Evergreen area of the City of San Jose. The project proposes a revision to the Policy to provide for traffic allocation for the future development of the following uses:</p> <ul style="list-style-type: none"> 500 detached residential dwelling units 500,000 square feet of commercial retail space 75,000 square feet of office space <p>The locations of this development within the Evergreen area have not been determined. However, for analytical purposes the above-mentioned development capacities have been distributed. The distribution is based on a review of infill parcels throughout the Evergreen area that are undeveloped, underutilized, or potential candidates for redevelopment.</p> <p>The revised Policy would limit the number of dwelling units to a maximum of 35 on any one site unless the development incorporates affordable housing, historic preservation, or mixed-use components.</p> <p>For purposes of the update, the revised Policy is proposed to be called the Evergreen - East Hills Development Policy.</p>	NOP	08/22/2008
1999011023	<p>Villages of La Costa - (EIR 98-07) Carlsbad, City of Carlsbad--San Diego</p> <p>Request for a determination that the project is within the scope of the previously certified Villages of La Costa Program EIR (EIR 98-07) and that the Program EIR adequately describes the activity for the purposes of CEQA; and approval of a Planned Development Permit Amendment for building floor plans, elevations and plotting for 43 detached single-family homes within the Villages of La Costa Oaks North Neighborhood 3.7 and the development of one recreational lot, within Local Facilities Management Zone 11.</p>	NOD	
2002101020	<p>Orange County Great Park Plan EIR Irvine, City of Irvine--Orange</p> <p>The City-initiated General Plan Amendment (File No. 00468566-PGA) and Zone Change (File No. 00468567-PZC) consists of amending the appropriate figures in the General Plan and the Zoning Ordinance to reflect the Bake Parkway/Marine Way intersection relocation and the Rockfield Boulevard reconfiguration in the southern portion of Planning Area 30. The General Plan Amendment relocates Marine Way approximately 900 feet to the north/east of the I-5 NB exit ramp. Due to the relocation of Marine Way, the extension of Rockfield Boulevard to Marine Way is also modified. The associated Zone Change reflects the modifications to the proposed street alignments and is reflected in a revision to the Zoning Map, Planning Area 30 Base Map, and Planning Area 30 Overlay Map.</p>	NOD

	<p>The project consists of a cut and fill grading operation to create three adult-league full size soccer fields in a developed community park within the 100 year flood plain of the Feather River. The graded area is intended to be used for athletic activities. Once each field is graded level it will be covered by a layer of topsoil and will be hydro-seeded with a Bermuda grass mix similar to existing grasses already present in the other public use areas of the park.</p>		
2003071160	<p>Lower Santa Ynez River Fish Management Plan and Cachuma Project Biological Opinion Cachuma Operation and Maintenance Board Solvang, Lompoc--Santa Barbara</p> <p>In 2004, the EIR/EIS for the Lower Santa Ynez River Fish Management Plan and Cachuma Project Biological Opinion for southern steelhead trout was recorded. The EIR/EIS was prepared by the Cachuma Operation and Maintenance Board and United States Bureau of Reclamation, Department of the Interior. An Addendum was prepared to add a third alternative fish passage barrier fix for the nine low flow road crossings on Quiota Creek, a tributary to the Santa Ynez River near the town of Santa Ynez. The new alternative is for a bottomless-arched culvert which has the same or less environmental impact as the two approved alternatives (bridge or rock riffle fishway) in the EIR/EIS. Pursuant to CEQA guidelines and since no greater environmental impact will be associated with this alternative, no public review is necessary.</p>	NOD

2008078344	Pleasanton Ridgelines Protection and Growth Control Initiative (City-sponsored ballot measure) Pleasanton, City of Pleasanton--Alameda A City-sponsored ballot measure for the November 2008 general municipal election which would reaffirm and readopt Land Use and Open Space & Conservation policies and programs from the 1996 General Plan, as well as set forth a process for the development of a hillside and ridgelines preservation ordinance/design guidelines, and clarify in the General Plan the existing City practice regarding growth control as relates to second units, extended stay hotels, and assisted living facilities. The stated purpose is to preserve and protect scenic hillsides and preserve views of ridges that surround Pleasanton, and clarify how all types of housing units are couted towards the voter-approved maximum buildout of 29,000 housing units.	NOE	
2008078345	NextG Huntington Beach Distributed Antennae System (DAS) project Public Utilities Commission Huntington Beach--Los Angeles Two segments of trenching. Involves the installation of approximately 2000 feet of underground conduit/fiber optic cable.	NOE	
2008078346	Install Taxiway Lighting/Install Access Control Merced County Atwater--Merced Replace old and failing airfield cables, replace taxiway lights, install new taxiway lights, install security/access control devices including; gates, card readers and cameras.	NOE	
2008078347	Gerber Park Improvement Project Tehama County --Tehama The project consists of the complete demolition of an old dilapidated swimming pool, equipment building, shower/storage facility, bathroom and decking. The site will be restored to accommodate an ADA parking area, restroom facility, basketball court, sand volleyball court, fencing and security lighting. The adjacent area will be upgraded to accommodate an ADA compliant picnic area with walkways, picnic tables, barbeques and drinking fountains. Additionally the current baseball field will be modified to become an all-purpose play field with soccer goals.	NOE	
2008078348	Sycamore Creek Bank Stabilization Project Resource Conservation District, Santa Cruz County Morgan Hill--Santa Clara The RCD and the Natural Resource Conservation Service (NRCS) propose to stabilize the channel, bank, and improve riparian habitat along a portion of Sycamore Creek in Santa Clara County, California. Sycamore Creek is a tributary to Uvas Creek, which is designated critical habitat for the South-Central California Coast (S-CCC) steelhead (<i>Oncorhynchus mykiss</i>) Distinct Population Segment (DPS). Streambank erosion along lower Sycamore Creek delivers fine sediment to Uvas Creek, which degrades salmonid spawning habitat. The proposed Sycamore Creek Bank Stabilization Project (Project) would stabilize and revegetate the channel and over-steepened banks along Sycamore Creek to reduce erosion, control the release of sediment and improve habitat for various species that may utilize the riparian corridor. The proposed Project would stabilize the streambanks by grading them to a slope	NOE

	of 2h:1v. Numerous large pieces of concrete riprap and other debris would be removed from the bed and banks. At the downstream end of the Project, about 50 feet upstream of an existing concrete weir, a sub-grade sheetpile wall and boulder weirs would be installed to prevent further incision of the channel. The sheetpile would be located downstream of the boulder weirs and would not be visible at the surface or active unless the existing concrete weir were to fail. A series (5) of rock vortex weirs would be constructed in the channel immediately upstream of the sheetpile wall. The rock weirs would act as local grade control features and create a series of step-pools. A 12-inch layer of native stream substrate (gravel/cobble) would be placed in the channel bed throughout the Project reach. The entire riparian area would be revegetated with the application of native seed and installation of woody shrub cuttings and container plants.

2008071123	Special Education/Child Development Facility Merced County Office of Education Support Services Los Banos--Merced The Merced County Office of Education is proposing to construct a Special Education/Child Development Facility serving a maximum of 45 students on a 4.05-acre site in Merced County.	MND	08/26/2008
2008071124	139-231 Pacific Avenue Coastal Bluff Stabilization Project Solana Beach, City of Solana Beach--San Diego The proposed project would maintain and stabilize two existing shoreline projects, in addition to, extending the stabilization of the coastal bluff further south. The proposed project spans an approximate 660-foot-long reach of coastal bluff and is located north of and into Fletcher Cove. The proposed project is required by the terms of prior permits issued by the City and the California Coastal Commission. Specifically, the proposed project would: (1) infill a 400-foot notch at the base of the bluffs located between 201-231 Pacific Avenue, (2) infill a 120-foot notch at the base of one of the City's largest sea caves and the continuation of the notch fill to the north terminate with the notch fill at 141-197 Pacific Avenue, and (3) stabilize approximately 140-foot notch infill extending to the south of 141 Pacific Avenue down to Fletcher Cove.	MND	08/26/2008
2008072091	Secret Special Permit to reduce a streamside management area Humboldt County --Humboldt A Special Permit to reduce the streamside management area to 75' to allow for the construction of a single family residence (approx. 3,000 square feet) A small unnamed tributary to the Van Duzen River bisects the parcels. The tributary has both ephemeral and perennial reaches on the parcel with prescribed setbacks of are 50 and 100 feet respectively. A voluntary notice of merger is also proposed to result in one approximately 2.08 acre parcel. Approximately 40 trees consisting of Douglas fir, tanoak and big leaf maple are proposed to be removed. The applicant will apply with CDF for a less than three acre conversion permit. Minimal grading is required. A workshop (approx. 1,800 square feet) is also proposed. The workshop will not encroach in the streamside management area and is principally permitted.	MND	08/25/2008
2008072092	TPM07-0024 and RA08-0003 (Quesada) Butte County Oroville--Butte Tentative Parcel Map to divide a 13,387 +/- square feet parcel into two parcels; one 7,500 +/- square feet parcel and one 8,249 +/- square feet parcel and a Road Abandonment to vacate a 10-foot wide frontage along 6th Street and Shasta Avenue, along the entire frontage of the proposed parcels.	MND	08/25/2008
2008072093	Tentative Subdivision Map 07-0010, Lamar Taylor, LLC Butte County Oroville--Butte Proposal to subdivide one parcel into seven lots, ranging in size from 8,993 - 10,687 square feet. There is an existing house, which will remain on parcel 1. Two accessory buildings are proposed to be removed from Parcel 2. Sewer and water are provided by Thermalito Irrigation District. Curb, gutter, sidewalk, and drainage inlets are proposed along the entire site frontage.	MND	08/25/2008

Approximately 25 by 18 linear feet of the north bank will be replaced with concrete and rip rap at the outfall structure. The total area of disturbance will total approximately 19.8 cubic yards.</p>	NOD	
1998031040	<p>EL GRANADA TRANSMISSION PIPELINE REPLACEMENT Coastside County Water District</p> <p>Coastside County Water District is proposing to replace a 10-inch ater service pipeline with a new 16-inch pipeline. The southern segment of the pipeline will start at the intersection of North Main Street and Highway 1. It will connect to the pipeline that was recently approved for Main Street/Highway 92. The pipeline will then cross under Highway 1 and extend north where it will connect with the southern end of the Phase 1 El Granada Pipeline at the road across Highway 1 from Grandview Boulevard. The northern segment of the Phase 3 pipeline will begin north of Wave Avenue and continue north on the west side of Highway 1. It will end near Mirada Road. It will be placed underneath existing streets, creeks and other facilities as well as crossing under Highway 1 again near Mirada Road. The pipeline will extend approximately another 1,300 feet in the Highway 1 right-of-way to Medio Avenue in Miramar. The pipeline will then be installed in existing streets through Miramar to the intersection of the Crossways and Magellan Avenue. The pipeline will then extend northeast to east of the intersection of Santiago and Moro Avenues in the community of El Granada. It will then cross a County parcel and follow Santiago Avenue to a connection with the existing pipeline system at the intersection of Santiago Avenue and Ventura Street. It will be placed under Frenchmans Creek by jack and bore. Project will occur on Frenchmans Creek approximately 300 feet north of Frenchmans Creek Road in the City of Half Moon Bay. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2007-0421-3 pursuant to Section 1602 of the Fish and Game Code to the project applicant, City of Watsonville Department of Public Works.</p>	NOD

2006071105	<p>Comprehensive Water System Master Plan Project (Water Master Plan) Mission Springs Water District Desert Hot Springs, Palm Springs, Unincorporated--Riverside</p> <p>The proposed project is the adoption of a Water Master Plan by MSWD. The Master Plan identifies the water system improvements that are forecast to be needed by MSWD to meet the anticipated demand for water over the planning period through the year 2025. The Master Plan identifies the type, location, and timing of water system improvements that are forecast to be needed over the Master Plan planning period. The Master Plan identifies the wells, reservoirs, booster pump stations, pipelines, and other appurtenant facilities that will be needed based on projected growth and growth patterns within the MSWD service area.</p> <p>The purpose of the Master Plan is to provide a comprehensive planning tool to allow MSWD to more logically and efficiently provide water service to its customers over both the short and long terms. The beneficiaries of this more efficient method of planning for and implementing the needed water system improvements will be the customers of MSWD in that this method of planning will provide a more reliable and efficient water supply.</p>	NOD	
2007042055	<p>Natural Terrain Renovations at Portola Road Woodside, City of Woodside--San Mateo</p> <p>The existing concrete bridge is proposed to be replaced by a prefabricated clear span bridge. The existing bridge is supported by a concrete arch and concrete footings. The upper portion of the bridge and the concrete arch will be removed, but the concrete footings would remain in place. The prefabricated clear span bridge will be lowered onto the footings. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2008-0139-3 pursuant to Section 1602 of the Fish and Game Code to the project applicant, 3000 Portola Road, LLC.</p>	NOD

2008041100	<p>Southbound Interstate 405 to the Westbound U.S. Highway-101 Connector Improvement Project Caltrans #7 Los Angeles, City of--Los Angeles NOTE: Notice of Availability filed w/ NOD for Joint Document comprised of Negative Declaration and Environmental Assessment.</p> <p>The California Department of Transportation (Caltrans) proposes various alternatives to improve the connector from the southbound San Diego Freeway (I-405) to the westbound Ventura Freeway (U.S. Highway-101). A new, upgraded 50 mph two-lane connector would replace the existing 20 mph single-lane connector. The proposed project would require right-of-way from the U.S. Army Corps of Engineers related to the operation of the Sepulveda Dam.</p>	FON	
2008071125	<p>CSA 70, Improvement Zone CG Water System Improvements San Bernardino County --San Bernardino The County of San Bernardino Special Districts Department (SDD) is proposing to implement improvements to the Cedar Glen area water system. Improvements consist of replacing an existing 0.25 MG water reservoir with a new 0.5 MG water reservoir, construction of a new water well, and installing approximately 14,000 linear feet of waterlines in various Cedar Glen streets.</p>	MND	08/26/2008
2008071126	<p>Sterling Gateway Industrial, Vesting Tentative Parcel Map No. 060030 Los Angeles County --Los Angeles Vesting Tentative Parcel Map No. 060030 is to create a 36-lot subdivision, with 31 industrial lots and 5 debris basin lots, over a parcel of land totaling 116.6 gross acres in the unincorporated community of Val Verde in Los Angeles County. The combined total of the net lot area will be 69.6 acres, with a total of 1,300,841 square feet of buildable area and 2,802 parking spaces. Grading for the site is proposed for a total of 2.4 million cubic yards of cut and fill. Access to the proposed site is to be through an extension of Witherspoon Parkway and through a newly proposed "A" Street to the south which will connect with Witherspoon Parkway through a proposed "B" Street on site. This proposed development will be an extension of the Valencia Commerce Center which abuts the site to the east. The application also includes a conditional use permit (CUP) request for development proposed in an industrial planned development zone, grading, development on a significant ridgeline in the Castaic Community Standards District area, and hillside management. No zone change or plan amendment is proposed. The proposed site for development overlays the previously approved, but unrecorded, TPM 20983.</p>	MND	08/26/2008
2008071127	<p>Osborne's Industrial Facility and Air Strip San Bernardino County Victorville--San Bernardino Conditional Use Permit pertaining to an existing facility for manufacturing and storage of industrial/air-craft tanks; construction parts and aircraft, with an existing 24,804 square foot building, a 9,600 square foot building and an 8,000 square foot building in Phase 1. (A non-permitted private landing air strip is also located on the subject site.) Phase 2 is to add three 9,600 square foot and one 9,950 square foot spec/industrial buildings and add a 3,680 square foot addition and 4,000 square foot canopy to an existing industrial building on 20 acres.</p>	MND	08/26/2008

2008071128	Ocean Science Education Building University of California, Santa Barbara Goleta, Santa Barbara--Santa Barbara NOAA and UC Santa Barbara are jointly proposing to establish an Ocean Science Education Building (OSEB) at the UC Santa Barbara Main Campus. The proposed two-story OSEB would total 15,284 gross square feet. One wing would accommodate the UC Santa Barbara Marine Science Institute's Outreach Center for Teaching Ocean Sciences and the other wing would serve as a headquarters for NOAA's Channel Islands National Marine Sanctuary (CINMS). The OSEB will provide interactive educational opportunities and will be CINMS administrative headquarters.	MND	08/26/2008
2008071130	Construction and Operation of Wells 36, 37 and 24A Palmdale Water District Palmdale--Los Angeles PWD plans to implement projects identified in its 2001 Water System Master Plan and evaluated in the 2001 Master Plan EIR. Of 10 wells identified in the EIR, three are now proposed for implementation. The project comprises the construction and operation in the City of Palmdale of the three wells, one of which is a replacement well, and pipelines in access roads connecting the wells to the existing PWD distribution system in streets.	MND	08/26/2008
2008071131	WRCRWA SunPower Solar Power Project Western Riverside County Regional Wastewater Authority Corona, Norco--Riverside SunPower will design-build-operate an approximately 1 megawatt power plant on approximately 9 acres at WRCRW Treatment Plant. Power generated from the new systems will supplement the power needs of the treatment plant.	MND	08/26/2008
2008072099	Portable Batch Plant Ordinance Revision Trinity County --Trinity Amendment of Trinity County Zoning Ordinance No. 315, Section 30.B to allow temporary operation of a portable concrete batch plant, rock screening unit or crusher in any zone subject to a Planning Director issued Use Permit, under certain conditions specified in the proposed ordinance. CEQA would be satisfied by this document for all operations that comply with the conditions and mitigation measures described in this ordinance, streamlining the issuance of County Use Permits for temporary plants. 	and Cascades.		
2007041085	Santa Margarita Area Annexation Temecula, City of Temecula--Riverside, San Diego The City of Temecula is proposing to apply to the Local Agency Formation Commission to annex the area known as the Santa Margarita Area Annexation (SMAA). The SMAA project site consists of approximately 4,997 acres of publicly-owned land, most of which is undisturbed natural open space within the Santa Margarita Ecological Reserve. The project area includes 718 acres of private property within which only four lots are currently developed with single-family homes.	NOP	08/26/2008
2008032043	San Francisco Bay to Stockton (John F. Baldwin and Stockton Ship Channels) Navigation Project Stockton, Port of Stockton--San Joaquin The proposed action is to alter the depth of the John F. Baldwin and Stockton Ship Channels based on the need for improved efficiency of the movement of goods.	NOP	08/26/2008
2008071129	Adelanto Gateway Industrial Project Adelanto, City of Adelanto--San Bernardino Project proposed is on approximately 417 acres located immediately south of Air Expressway Boulevard and west of the Federal Correctional Facility-Victorville in the northeastern portion of the City of Adelanto. The project proposes to develop the site with distribution facilities that would consist of approximately 6.78 million square feet of industrial warehouse space. Approximately, 6.6 million square feet would be dedicated to warehousing and the remaining 170,000 square feet dedicated to office uses. Other improvements include reservation of a 1.5-acre parcel for the construction of a new fire station, construction of storm drainage/detention areas, as well as the extension of electrical, natural gas, sewer, water, and telephone utilities throughout the site. A Los Angeles Department of Water and Power right-of-way easement and power lines transect the project in the southeastern portion of the site.	NOP	08/26/2008
2008071132	Agreement Between the Department of Water Resources and Westlands Water District for Wheeling Central Valley Project Water to Semitropic Water Storage District Westlands Water District Mendota, Wasco, Lemoore--Fresno, Kings, Kern Westlands Water District (WWD) proposes to divert up to 50,000 acre-feet of 2008-09 Central Valley Project (CVP) supplies for delivery to Semitropic Water Storage District's (SWSD) banking facilities prior to March 1, 2009. SWSD, a member unit of the Kern County Water Agency (KCWA), would return this water in a later year to meet crop demand in the next critically dry water year type.	Neg	08/27/2008

2008072102	<p>Proposed Incorporation of the Town of Alamo Contra Costa County Local Agency Formation Commission Alamo--Contra Costa</p> <p>The proposed project consists of the incorporation of approximately 9.87 square miles (6,295 acres) as a new municipal government, to be called the Town of Alamo. The Town of Alamo initially would be incorporated as a General Law city under the Constitution of the State of California. The proposed form of the new town would be the "Council/Manager" form common to small and mid-size towns throughout the State. Under the Council/Manager, a five-person town council, elected at large, would retain a City Manager who would be responsible for the day-to-day operations of the town with an appointed City Clerk. The new Town Council would be obligated by Government Code §57376(a) to adopt all County Ordinances for a period of 120 days or until the new city adopts its own ordinances, whichever comes first. No changes in existing land use designations, zoning designations, policies, guidelines, or development regulations are proposed as part of the incorporation. Initially, the County or other entities may be contracted to provide government services. Over time, these services may be provided directly by the Town. A variety of services, including structural fire protection, parks and recreation, public utilities, water and wastewater, solid waste, electricity, gas, cable television, public transportation, flood control, library, cemetery, public health, public education and environmental health would continue to be provided by existing service providers.</p>	Neg	08/27/2008
2008072104	<p>Storm Water Ordinance Chico, City of Chico--Butte</p> <p>The proposed project consists of the adoption of the City of Chico Storm Water Ordinance that will incorporate the Design Standards already set forth in Attachment 4 of the National Pollution Discharge Elimination System, Phase II (NPDES II) General Permit for the City of Chico into the Chico Municipal Code (CMC) as §15.50 (Storm Water Management and Discharge Controls). The ordinance will include an enforcement mechanism to ensure compliance with the applicable NPDES II permit standards and provide staff with the means to enforce storm water related standard mitigations already incorporated into development projects. The project includes amendments to CMC §18R.08.050 (Storm Drainage) to ensure the City's design criteria implement the NPDES II General Permit control measures. No development is proposed as part of the project.</p>	Neg	08/26/2008
2003021087	<p>Jaxon Enterprises Inc. Mine Expansion and Reclamation Plan Project Merced County Unincorporated--Merced</p> <p>Jaxon Enterprises, Inc. proposes to expand their existing aggregate mine in southeast Merced County from permitted reserves of 2.5 million tons (authorized for extraction under Conditional Use Permit [CUP] No. 3603) to 6 million tons of permitted material. The project expansion includes the following: (1) expanding an existing aggregate surface mine laterally from 90 +/- acres to approximately 357 +/- acres; (2) increasing the depth of the permitted mine by ten feet (to increase from 18 feet below ground surface to 28 feet below ground surface) at the southwest end of the site transitioning to 15 feet deeper (to increase from 18 feet below ground surface to 33 feet below ground surface) at the northeast end of the site, and mining the expanded lateral area to the new depth; (3) increasing the annual material to be mined from the current baseline of 260,000 tons/year mined, and 240,000 tons/year marketed to a maximum of 550,000 tons/year mined and</p>	NOD

	500,000 tons/year marketed; (4) modifying the reclamation phasing from five acre increments to 20 acre increments; (5) establishing an updated reclamation plan with dry land cattle grazing as the end use; and (6) clarifying the permit to recognize the Applicant's ability to operate the plant at night to serve public agency projects which require nighttime deliveries. The property is designated as Agricultural land use in the Merced County General Plan, and is zoned A-2 (Exclusive Agricultural).		
2003032098	West College Utilities Yard Master Plan Santa Rosa, City of Santa Rosa--Sonoma The project includes development of the City of Santa Rosa's former wastewater treatment plant to meet current and future needs of the City of Santa Rosa Utilities Department. The project will be developed in four phases. Phase 1 includes demolition of the wastewater treatment plant foundations, site clearing, bringing utilities to the site, stormwater improvements, and development of a transfer station (pavement, concrete bunkers and animal lockers). Phase 2 includes additional paving, heated and unheated covered parking site fencing, a vehicle wash station, relocation of the City's tree farm to a new area on-site. Phase 3 includes development of three buildings (operations, shops, and resource management) and associated landscaping. Phase 4 includes development of an administration building, renovation and expansion of parking, and additional landscaping.	NOD	
2004092032	Alameda County Partners in Restoration Permit Coordination Program Alameda County Resource Conservation District Livermore--Alameda As part of the Permit Coordination Program, the project will remove sediment from two livestock ponds and repair the spillways on two ponds. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2008-0301-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Diane Dugan.	NOD	
2005011064	Peaceful Valley Ranch; GPA 03-05, R03-015, TM 5341RPL^5, P04-048, Log No. 04-19-007 San Diego County Unincorporated--San Diego The proposed project is a major subdivision of 181.31 acres into 57 lots (residential, equestrian, open space, joint use, and roads) that would include private and public equestrian facilities. A General Plan Amendment and Rezone are proposed that would reclassify the eastern 152.6 acres of the site from a General Plan land use designation of (18) Multiple Rural Use (1 dwelling unit/4, 8, 20 acres) and A-72 Use Regulation (General Agriculture; 8 acre minimum lot size) to a General Plan land use designation of (17) Estate Residential (1 dwelling unit/2, 4 acres) and A72 Use Regulation (General Agriculture; 2 acre minimum lot size). Deletion of a planned portion of SC760 from Olive Vista Drive to State Route 94 is also proposed as part of the General Plan Amendment.	NOD	
2007011060	The 2006 Klamath River Restoration Grant Program in Humboldt and Siskiyou Counties Fish & Game #1 --Siskiyou The project proposes to improve fish passage and replacement of a flood damaged culvert with a new pre-cast concrete bridge over Horse Creek, Siskiyou.	NOD

2007061006	Las Flores Canyon Creek Restoration & Las Flores Creek Park Project Malibu, City of Malibu--Los Angeles This project will fund construction of approximately one half mile of trail and establish a creek side park including a small parking lot, pedestrian bridge access, and park amenities along Las Flores Creek in Malibu. The project will also restore Las Flores Creek through exotics removal and control, native plant re-vegetation, live stake plantings, and hydro seeding.	NOD	
2007122031	Rainbow Holding Company Bulk Water Sale (PCPC T20050661) Placer County Truckee--Placer The applicants are requesting approval of a Conditional Use Permit for an existing bulk water sales operation that has been in operation since 1988.	NOD	
2008041095	Kruse Minor Residential Subdivision (2 Lots) TPM 21031RPL^1; Log No. 06-09-020 San Diego County --San Diego The proposed project is to subdivide 4.67 gross acres into two residential parcels, ranging in size from 2.01 to 2.10 net acres. Parcel 1 contains an existing single-family residence. The property is located in the Ramona Community Plan Area, and is subject to the General Plan Category of 1.3 Estate Development Area (EDA) and Designation of (17) Estate Residential, which requires 1 du per 2 or 4 acres, depending upon slope. The property is zoned A70 with a minimum lot size of 2 acres. The project will be served by septic and water would be provided by the Ramona Municipal Water District. The applicant will be required to mitigate for impacts to 2.88 acres of interior live oak chaparral.	NOD	
2008042016	Vineyard Creek Improvement Project Marin County Novato--Marin The Vineyard Creek Channel Enhancement Project will be undertaken to meet the following objectives: improve fish passage and habitat restoration, increase and maintain flood conveyance, stabilize incised and eroding banks; improve water quality; and promote an ecologically healthy riparian corridor. The project will improve flood conveyance and fish habitat and passage within the project reach. Creek corridor modifications will include replacing the culverts at the Center Road crossing with a free span bridge or bottomless arch culvert, providing modifications to the bed and bank to eliminate erosion risks to adjacent properties and improve water quality, promoting active channel conveyance of both water and sediment and providing improved low- and high-flow fish passage, improved water flow channel from and enhanced in-stream habitat. The riparian corridor will be replanted to provide a low density native under-story, "soft" bank erosion protection (where possible) and increased canopy.	NOD	
2008042046	Novato Creek Flood Control Dredging Project Marin County Novato--Marin Novato Creek is located in the central portion of the City of Novato; it is the City's main stormwater conveyance facility. The project's goal is to restore 50-year frequency flood control capacity by removing accumulated silt. An estimated 70,000 cubic yards of accumulated silt will be removed from the creek beds of Novato Creek, Warner Creek, and Arroyo Avichi Creek. The dredged material will	NOD

	2011.		
2008078381	<p>Van Vleck Irrigation Project Use Permit Sacramento County --Sacramento</p> <p>The proposed project consists of a Use Permit to allow a joint irrigation project between the Rancho Murieta Community Services District (RMCS D) property on APN 073-0180-030 and the Van Vleck properties on APN's 128-0080-067 and 068 (irrigation of approximately 68 acres of a 1,120 acre site) in the AG-80 (F) and AG-80 (SM) zones. The purpose of the project is to provide spray irrigation of pasture land to sustain the existing herd of cattle at the Van Vleck Ranch, and to dispose of existing excess volume of treated wastewater.</p> <p>The project also includes a Zoning Ordinance Amendment to amend Resolution 84-737 to allow reclaimed wastewater to be discharged across Rancho Murieta boundaries.</p>	NOE	
2008078382	<p>Old Camp Nine Bridge Removal Project Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento Angels Camp--Calaveras</p> <p>The Old Camp Nine Bridge Removal Project consists of the removal of the Old Camp Nine Bridge. Currently, the bridge poses a significant safety concern to both recreationalists within the New Melones Recreation Area and trespassers. The bridge platform and abutments are damaged, disintegrating, or destroyed; concrete footings have been eroded by water; the bridge platform has been vandalized; and a portion of the bridge represents an extreme hazard due to the eroded abutments and compromised supports, gaping holes, missing deck, broken railings, and confirmed presence of lead based paint. The controlled demolition includes removing all steel structures, guard rails, and decking materials. The two concrete piers and six concrete footings will be removed to the bedrock level. In addition, the existing concrete abutment and wing walls associated with the east approach will be removed.</p>	NOE	
2008078383	<p>Assignment of Ground Restoration Credit to Placer County APN 83-263-13 (Talmont Resort Improvement District) Tahoe Conservancy --Placer</p> <p>Project consists of the sale and assignment of 102 square feet of Class 1, 2, 3 ground restoration credit from Conservancy-owned land, to a receiving parcel on which a replacement of an existing pump station to an existing water tank will be constructed. The assignment enables the receiving landowner to carry out the project without any net increase in the amount of existing land coverage in Bailey Class 3 areas within the Lake Tahoe Basin.</p>	NOE	
2008078384	<p>Transfer of coverage to El Dorado County APN 31-077-07 (Stiller Trust) Tahoe Conservancy South Lake Tahoe--El Dorado</p> <p>Project consists of the sale and transfer of 291 square feet of potential coverage rights from Conservancy-owned land to a receiving parcel on which a privatized residence will be constructed. The transfer enables the receiving landowner to carry out the project without any net increase in the amount of existing land coverage in the hydrologically-related area.</p>	NOE

2008078388	Ignacio to Mare Island Napa Tower Replacement Fish & Game #3 Vallejo--Solano PG&E proposes to replace two aging 246-foot tall towers in the Napa River, approximately 7 miles from Carquinez Strait. The Napa River is approximately 2,000 feet wide in the project area and the two towers to be repaired are approximately 150 feet from the east and west bank of the river. The replacement towers will be built in the same locations on the existing concrete foundations, which will be retrofitted to repair cracks and exposed rebar. The areas around the footings of towers 15/106 and 15/107 will be dewatered using cofferdams installed around each footing. The two cofferdams will both be approximately 165 feet by 80 feet, covering an area of approximately 26,400 square feet. After the footings have been dewatered, they will be excavated so that any necessary repairs to the foundation can be made. Clean, crushed rock will be permanently placed in the dewatered cofferdams and recovered with excavated sediment upon completion of the project. Issuance of a Streambed Alteration Agreement Number 1600-2008-0164-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2008078389	Zone 4 Line A Improvements from Line E to Cabot Boulevard Fish & Game #3 Hayward--Alameda The project includes restoration of the channel to its original flood flow design, restoration of eroded channel bed and banks, and improvement of riparian habitat within the existing right of way. Issuance of a Streambed Alteration Agreement Number 1600-2008-0214-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2008078390	Operation and permitting of replacement Well 20R for the Apple Valley Ranchos Water Company; Water System # 3610003 Health Services, Department of Apple Valley--San Bernardino New well (Well 20R) to replace existing Well 20. Well 20R will be located in an existing approved well site approximately 100 ft from existing well. Capacity of new well is 550 gpm. The existing well will be used as an observation well for the Company and the USGS.	NOE

<u>Documents Received on Tuesday, July 29, 2008</u>			
2005092011	Bicycle Master Plan Oakland, City of Oakland--Alameda The project is an ordinance to amend the Oakland Planning Code to incorporate standards and requirements for bicycle parking in certain types of development. The regulations address bicycle racks, lockers, cages and showers, and how these facilities would be included in future development. The requirements are specified by land use type and also apply to major remodels. In addition to the bicycle parking requirements in the Planning Code, the project includes amendments to Title 9, Chapter 9.52 (Special Event Permits), to include requirements for attended bicycle parking at special events with over 5,000 attendees. This project implements the 2007 Bicycle Master Plan.	NOD	
2005092011	Bicycle Master Plan Oakland, City of Oakland--Alameda Approximately 100 bicycle parking racks accommodating approximately 200 bicycles will be installed in the public right-of-way throughout Oakland. The racks will be located in response to merchant and resident requests and in response to the shortage of bicycle parking created by the removal of parking meters and the installation of "pay and display" parking kiosks. This project implements the 2007 Bicycle Master Plan.	NOD	
2005092011	Bicycle Master Plan Oakland, City of Oakland--Alameda The project will improve bicyclist access by modifying the Stanford Avenue median at King Street and modifying a traffic island at the junction of Stanford Avenue and Adeline Street. The project includes the widening of existing curb ramps, the creation of a new curb cut, and the installation of minor signage and striping. This project implements the 2007 Bicycle Master Plan.	NOD	
2006112077	New Crystal Springs Bypass Tunnel Project San Francisco, City and County of Hillsborough--San Mateo The New Crystal Springs Bypass Tunnel Project consists of the construction of a tunnel, about 4,200 feet long with a 96-inch diameter pipeline in the tunnel for conveyance of drinking water to the regional water delivery system in San Mateo County and San Francisco. This project would be located in the SFPUC right-of-way along and near Polhemus and Crystal Springs Roads in San Mateo County. The tunnel would replace an existing pipeline that is subject to geologic hazards from slope instability. Construction of the project is scheduled to begin toward the end of 2008 and work is anticipated to continue through 2011.	NOD	
2007031107	County Service Area 7 Wastewater System Upgrade San Luis Obispo County --San Luis Obispo A proposal by the County of San Luis Obispo to increase the capacity of the County Service Area 7A (Oak Shores) wastewater treatment plant to serve an additional 372 residential units, to a total of 1,197, and improve the treatment process to reduce nitrogen. Average daily flow capacity during the maximum month will increase from 100,000 gallons per day to 194,000 gallons per day. The peak daily flow will be 425,000 gallons per day.	NOD

2008078396	<p>and depositing it on the low side of the site, and resurface the site with imported decomposed granite of 1/4" aggregate. Install new ADA accessible picnic table and campfire ring. Install an ADA parking space adjacent to the Lower Restroom; relocate trash receptacles 20 feet to the East and level a 16' by 20' area by removing up to 1' of road base on the high eastern edge of the site and redepositing it on the low western edge of the site.</p> <p>Remedial Action Plan Amendment Area T - East Shore Areas Marina Bay Project Toxic Substances Control, Department of Richmond--Contra Costa</p> <p>The purpose of the project is to remove a liquid phase hydrocarbon residue floating on top of groundwater in at least one well at the site (less than 3/4 of a foot thick). The estimated volume of impacted ground water appears to be very limited and remediation is estimated to result in the removal of not more than 55 gallons of the hydrocarbon liquid. The Draft RAP Amendment proposes to remove the liquid hydrocarbon product and dispose of it, or recycle it at a licensed hazardous waste or recycling facility.</p> <p>The removal will consist of hand bailing, absorption, the use of a passive collection device or water truck pumping of the contaminant. The method used will depend on the amount of the contaminant found floating over the water every time monitoring wells are examined prior to contaminant removal for up to two years. Once removed, the contaminant and any other contaminated material (including rags, adsorbent, etc.) generated during removal will be stored in two 55-gallon drums until a sufficient quantity is accumulated to be sent offsite for disposal. Containers will be stored onsite inside a secured cabinet for not longer than 90 days.</p>	NOE	
2008078397	<p>Corrective Action Revised Remedy Selection, General Dynamics OTS (California) Inc. (formerly known as: Primex Technologies Tracy Test Facility) Toxic Substances Control, Department of Tracy--San Joaquin</p> <p>The corrective action process for this facility was approved in April of 2001, and has identified an area which requires further remediation due to the presence of Mineral Oil in the groundwater. The Mineral Oil is considered non-toxic, but must meet Drinking Water Health Advisory requirements for taste and odor threshold. The taste and odor threshold of 100 ppb for Total Petroleum Hydrocarbons (TPH) for Diesel-Range is recommended by the Central Valley Regional Water Quality Control Board.</p> <p>The source of the Mineral Oil came from an empty above-ground storage tank SWMU #21 which was previously closed and removed from the facility. The proposed corrective action revised remedy selection consists of the following activity: adding a 2% hydrogen peroxide solution to the contaminated groundwater via existing piping as an enhanced natural attenuation.</p> <p>A trial test will be performed in one of the Wells. After two weeks time, groundwater samples will be taken, to evaluate the effectiveness of the treatment. If results show that biodegradation is occurring, the following will take place. At the beginning of the month for a period of three months, 500 hundred gallons of hydrogen peroxide will be poured into three up-gradient monitoring wells in the area of the groundwater plume. Groundwater monitoring will be conducted quarterly for four quarters which is equivalent to one year of time. The effectiveness of the treatment and need for further monitoring will be evaluated by DTSC after a year of groundwater monitoring. This is the final step required in the corrective action process to clean the site to standards appropriate for residential</p>	NOE

	use of the property. At the conclusion of remediation period, DTSC will determine whether further corrective action will be required for the site.		
2008078398	Record of Decision/Remedial Action Plan for Installation Restoration Program Sites 1, 2, 4, 6, 8, 9, 20, and 24 Toxic Substances Control, Department of --Ventura The Navy is finalizing the remedial action decisions for eight locations (8 sites) at the base. The Department of Toxic Substances Control (DTSC), pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, as the lead regulatory agency and with support from California Department of Fish and Game, California Regional Water Quality Control Board, and California Integrated Waste Management Board; oversaw the investigation and characterization of the nature and extent of contaminations, and the associated assessments of human health and ecological concerns at these sites. The Navy evaluated different remedial alternatives for each site in feasibility studies and the preferred alternatives were reviewed and commented on by the public in a Proposal Plan between December 27, 2004, and January 25, 2005. A Record of Decision is the document the Navy uses to formalize the selection of these remedial alternatives which have been proposed for the best balance between cost effectiveness and adequateness to protect human health and the environment at these sites.	NOE	
2008078399	Post Closure Permit for ConocoPhillips Los Angeles Refinery Wilmington Plant Stormwater Holding Basin No. 2 Toxic Substances Control, Department of --Los Angeles The Department of Toxic Substances Control (DTSC) is issuing a post closure permit to ConocoPhillips Los Angeles Refinery Wilmington Plant (LARW), pursuant to authority granted under sections 25150, 25159 and 25159.5 of the California Health and Safety Code. The post closure permit is for the post closure care of a Stormwater Holding Basin No. 2 (SHB 2). SHB 2 is subject to post-closure because, required DTSC clean-up standards could not be met during closure activities. The post closure permit will require continued sampling and analyses of groundwater for a wide variety of components in 4 wells semiannually and Appendix IX sampling once every five years. The lining cover of the SHB2 shall also be inspected and maintained. No other remediation is required under this permit.	NOE	
2008078400	Riverside Drive Water Main Replacement Sweetwater Springs Water District --Sonoma Replace approximately 1,600 linear feet of existing 2-inch water main and appurtenances in Riverside Drive with a 6-inch main from Highway 116 to an existing 6-inch intertie serving Verba Lane. The existing main serves approximately 40 customers. The replacement main will ensure better service pressures in the service area and reduce water losses. All trenching occurs in roadways. It is anticipated that trenchless technologies will be use to cross Highway 116. Road surfaces will be restored consistent with encroachment permits.	NOE

	Eastside System's above ground storage tanks to the Westside System to maintain fire protection and emergency water supply.		
1995081007	STEPHENS' KANGAROO RAT IN WESTERN RIVERSIDE Riverside County Corona--RIVERSIDE The project consists of paving approximately 1,700 linear feet of existing dirt road within Metropolitan's right-of-way to the Temescal Power Plant to provide an all-weather access road. The existing unpaved road is steep and becomes impassable during inclement weather. The paved road would provide reliable access to the site for Metropolitan's operations and maintenance activities.	NOD	
2001021065	University of California Merced Campus University of California Merced--Merced The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the project applicant, University of California, Merced, represented by Robert Avalue. The applicant proposes to periodically remove sediment, emergent wetland vegetation, dead woody debris, and trim vegetation from two storm water storage reservoirs on the University campus.	NOD	
2004052085	2004 Master Plan for Humboldt State University California State University Trustees Arcata--Humboldt The project will construct a new apartment style student housing project located in the southwest corner of the campus, bounded by LK Wood Boulevard on the west, Harpst Street on the north, Rossow Street on the east, and 14th Street on the south. The project will provide 434 new beds, replacing 156 beds of student housing in functionally obsolete buildings (Redwood Manor and Mai Kai) programmed for demolition, for a net capacity of 278 beds. The project will construct four three-story housing buildings, a community center/convenience store, and a maintenance/support facility for a total of 136,585 GSF. The residence buildings will house 76 four-bedroom apartments with four beds, 21 four-bedroom apartments with six beds, and two two-bedroom apartments with two beds for a total of 99 apartments and 434 beds. This EIR Addendum #4 address proposed minor revisions to Master Plan map and additional project description information and provides related environmental impact assessment. The 2004 Master Plan EIR was certified on November 17, 2004. The specific project includes revision to the 2004 Master Plan map to reflect revised student housing building footprint and re-orientation of the soccer field for the College Creek Housing Project, installation of a retaining wall to support the new soccer field alignment, installation of a fire lane to provide required access to the site, and culvert replacement and headwall installation. The proposed changes do not alter the objectives, size, and scope of the Master Plan. The planned Student Housing square footage and beds and the number of parking spaces will not change. Since completion of Addendum #3, project elements have been developed as a result of the College Creek Housing Project moving from conceptual plan to final design; specifically including realignment of the soccer field, changes to the building footprint layout, and installation of a fire lane to provide required access to the site. To provide stability for the project site (fire lane), the aforementioned revised project elements will necessitate a culvert replacement, installation of a culvert headwall, and construction of a soccer field retaining wall, and portions of these projects will involve work in and adjacent to an open ditch that outlets to City	NOD

2008078431	<p>this area hand removal of periwinkle roots will be completed and erosion control installed by hired restoration crews. USDA NRCS Practice requirements (643, 342) will be followed in the implementation of this restoration project. The removal of invasive plants from the site and replanting with natives will improve habitat for a variety of birds and butterflies as well as other wildlife in the area.</p> <p>Temporary Emergency Permit to Detonate Unstable, Deteriorated Dynamite Found in an Abandoned Mine in the Inyo Wilderness Area, Inyo County Toxic Substances Control, Department of --Inyo</p> <p>A temporary emergency Hazardous Waste Treatment Permit has been granted to the United States Bureau of Land Management (BLM), to treat by open detonation less than one case of deteriorated nitroglycerin based dynamite found in an abandoned mine. The dynamite was found east of the Federal White Aggregate Mine area, approximately 2.5 miles north of Dolomite.</p> <p>The dynamite was discovered in late June 2008. Following consultation with the Explosive Ordinance Disposal (EOD) specialists from the Naval Air Weapons Station, China Lake, the BLM determined that the dynamite is deteriorated and unstable and, due to its shock sensitive properties, must be treated on site. The BLM has also determined that the dynamite must be treated soon to avoid the risk of injury to the general public who may be exploring the site. Although the site is remote, it is accessible to the public. The permit is effective form August 4, 2008 to August 8, 2008. The detonation will take place as personnel and weather conditions permit.</p> <p>The activity will take place where the dynamite was discovered. Treatment will be carried out by the Navy EOD, following standard Department of Defense procedures. The area will be secured during the treatment and local fire and emergency medical service agencies will be advised of the situation. Once activities have been completed, the area will be surveyed to determine that no hazardous waste residue remains.</p>	NOE	
2008078432	<p>Proposed Roosevelt II Elementary School Toxic Substances Control, Department of San Bernardino--San Bernardino</p> <p>Approval of a Removal Action Workplan (RAW) by the Department of Toxic Substances Control (DTSC) pursuant to Health & Safety Code, chapter 6.8 as submitted on June 27, 2008 by Converse Consultants. The RAW focuses on excavation and removal to mitigate soils impacted with excessive levels of lead and arsenic onsite. The purpose of the project is to mitigate impacted soils that exceed the project-specific human health and environmental risk criteria to minimize human exposure to the identified chemicals of concern (COCs). The estimated volume of impacted soils is 43 cubic yards or approximately 10 truckloads. The cleanup levels for these COCs are: the DTSC risk screening level of 12 parts per million (ppm) for arsenic and the soil screening level of 255 ppm for lead at school sites.</p> <p>Project activities will commence in January 9, 2009 and are expected to take approximately 10 days to complete the proposed excavation and 30 days to complete the site restoration.</p> <p>Specific environmental safeguards and monitoring procedures that are enforceable and made a condition of project approval to ensure that impacts to the environment will be less than significant are included in an approved Excavation Plan, Engineering Evaluation/Cost Analysis, Health and Safety Plan, Quality</p>	NOE

2001112085	LNWI Flushing Water Sacramento County Citrus Heights, Elk Grove, Folsom, Galt, Isleton, ...--Sacramento, Yolo NOTE: Document is an addendum to the Final EIR. The LNWI Flushing Water project requests 644 acre feet of permanent water from Natomas Central Mutual Water Company to flush an existing interceptor line. SWRCB must issue permits for change in place of use and industrial use of water.	ADM	
2008072114	Cold Creek Compost Containment Pond Mendocino County --Mendocino Cold Creek Compost wishes to add a containment pond. The primary purpose is to provide full leachate containment whilst simultaneously helping the facility to maintain adequate moisture content in the composting. The pond's proposed capacity is 2.7 acre feet which is equal to approximately 900,000 gallons of water.	CON	08/29/2008
2006092063	Recirculation of The Preserve Planned Development Project Stockton, City of Stockton--San Joaquin Development of "The Preserve" will include the master planning of +/- 359 acres of residential development, consisting of single family residential lots (653 units), small lots (278 units), cluster residential (129 units), alley-load lots (248 units) and condominiums (96 +/- units). The project site will contain approximately 52 acres of local park area including easement parks under WAPA power line easement. The public facilities within the project area will contain a 13-acre elementary school and a new fire station. A wetland feature is also planned within the power line easement that will serve to improve the water quality of project runoff and to provide flood control storage. A separate levee improvement project, administered by Reclamation District 2126, will surround the site on three sides providing 300-year flood protection. The project will develop a trails system on top of the levees, once the levee improvement project is complete. The project is located to the west of I-5 and south of Bear Creek within the City of Stockton jurisdictional boundaries. The project site is bounded on the north by Bear Creek, on the west and south by Mosher Slough, and on the east, by the existing Twin Creeks Estates, about 1,200 feet west of I-5. On November 26, 2007, the City of Stockton circulated the November 2007 Draft EIR document for public review initiating a 45-day public review period that ended on January 9, 2008. Several comments received by the City involved greenhouse gas (GHG) emissions generated by the project and the potential effects expected on global warming. The City of Stockton has re-examined the project's effects on global warming due to the contribution of GHG and determined to prepare the supplemental information and analyses presented in this revised Air Quality and Global Climate Change sections for recirculation. 2008071140	Rancho Nipomo HOA Major Grading Permit San Luis Obispo County --San Luis Obispo Request by the Rancho Nipomo Homeowners Association for a Major Grading Permit to stabilize and repair a portion of the south bank of the Los Berros Creek. The repairs are intended to address two slope failures that have occurred along this bank. Equipment will be staged along Sycamore Creek Lane, a paved roadway. The project will involve vegetation, repair work, and revegetation along 100 linear feet (approximately 2,500 square feet) of the creek bank, adjacent to Sycamore Creek Lane. Repair activities would include excavation of approximately 2-foot deep keyways and installation of approximately 100 cubic yards of riprap and 40 cubic yards of compacted earth fill. Additionally, 30 square feet of asphalt concrete pavement repair and 15 linear feet of asphalt curb repair are proposed to Sycamore Creek Lane, which runs parallel to Los Berros Creek at the top of its south bank.	MND	08/29/2008
2008071141	San Joaquin River Bank Repair Project Firebaugh, City of Firebaugh--Fresno Repair of a 300 +/- foot long portion of the west bank of the San Joaquin River that was damaged by flooding in 2006. Repair strategy consists of installation of a sheet pile/Reno Matress system.	MND	08/29/2008
2008071142	Huntington Harbour Bulkhead Repair Project Huntington Beach, City of Huntington Beach--Orange The project involves the bulkhead repair of 30 single-family properties with channel frontage located within Huntington Harbour and its man-made islands. Draft MND No. 08-010 analyzes the potential environmental impacts associated with repair of the bulkhead at 30 existing single-family residential properties within Huntington Harbour. The proposed project area includes homes on Davenport Island, Trinidad Island, Gilbert Island, Humboldt Island, Edgewater Lane and Morning Star Drive. The purpose of the project is to restore the foundation of the bulkhead and provide toe protection to inhibit any future scouring or erosion, which may jeopardize the bulkhead's structural integrity. The bulkheads in Huntington Harbour are made of reinforced cast-in-place concrete and untreated timber piles supporting the footings. Due to the time span of design and construction, there are slight differences in bulkhead design among the properties. Some sections of the bulkhead have a cutoff wall below the bulkhead and some do not have a cutoff wall. Over the years, erosion due to localized tidal currents, recreational boat use and periodic maintenance dredging activities in the area have undermined the bulkhead, damaged the support piles and threatened the overall structural integrity. Properties located on the main channel show the greatest erosion levels.	MND	08/29/2008
2008072113	Alpine Road Bridge Repair Project San Mateo County Unincorporated--San Mateo The applicant proposes to repair a damaged bridge on Alpine Road at Mindego Creek, near La Honda, in unincorporated San Mateo County. The County proposes to repair the bridge by removing approximately 25 cubic yards of soil to redirect the flow back to the center of the creek (away from the left bank), extend the left wingwall for a distance of approximately 15 feet upstream to protect the bank, cement slurry filling of void beneath existing wingwall and abutment, installation of a short section of a 12 inch diameter plastic pipe to direct roadway	MND	08/29/2008

2003031121	Riverside Corona Feeder Western Municipal Water District Colton, Corona, Grand Terrace, Highland, Riverside, ...--Riverside, San Bernardino NOTE: NOP of Draft Supplemental Program EIR. Western Municipal Water District (WMWD) was formed in 1954 in order to bring supplemental water to growing western Riverside County and currently serves wholesale customers and approximately 24,000 direct retail connections. WMWD's service area encompasses the cities of Riverside, Norco, Corona, and portions of Murrieta, Temecula and the communities of Jurupa, Rubidoux, and Elsinore Valley. The WMWD service area also includes the Lee Lake Water District, the Box Springs Mutual Water Company, and the Eagle Valley Mutual Company Water. WMWD's service area consists of 527-square miles and a population of more than 853,000 (WMWD).	NOP	09/02/2008
2008071143	Beach-Edinger Corridor Specific Plan and Joint Program/Project EIR Huntington Beach, City of Huntington Beach--Orange The proposed project consists of a Specific Plan for development of the Beach and Edinger Corridors. The vision for the Specific Plan area is to develop primarily residential and neighborhood retail uses in the southern portion of Beach Blvd. transitioning to commercial and retail uses in the middle segment of Beach Blvd., then to a more dense "town center" adjacent to and at the intersection of Beach Boulevard and Edinger Avenue. Along Edinger Avenue, mixed uses would be developed. Four individual project sites would also be analyzed; Spring Suites (7902 Edinger Ave.), Murdy Commons (7441 Edinger Ave.), Beach Blvd. at Warner Ave, and Beach Boulevard at Ellis Ave.	NOP	08/29/2008
2008072115	General Plan Update Rocklin, City of Rocklin--Placer The project consists of the adoption of the 2008 City of Rocklin General Plan Update. The proposed General Plan does not represent a major shift in proposed land uses (except for the revitalization envisioned in the Downtown Plan) and policy direction relative to the existing 1991 General Plan. Goals and policies proposed in the General Plan are primarily intended to codify existing land uses and development practices currently implemented by the City and to establish new land use and development related guidelines to more effectively manager future growth and protect the environment. Notable differences between the proposed 2008 General Plan Update and the existing 1991 General Plan include	NOP	08/29/2008

	modifications to land use designations, circulation diagram and features, LOS policy, creek setbacks, gated subdivisions and noise.		
2008072118	Land Development Code and General Plan Amendment Mount Shasta, City of Mount Shasta--Siskiyou Zoning Code Update to achieve consistency with General Plan. Project includes an amendment to limited number of General Plan Land Use Designations.	Neg	08/29/2008
2007071155	University Hills Specific Plan San Bernardino, City of San Bernardino--San Bernardino NOTE: Reference SCH# 1991012055	SBE	09/15/2008
	The project proposes 980 residential units on 169.3 acres within a site that encompasses 404.3 acres. Housing densities range from 3.1 up to 20 units per acre with a gross density of 2.4 units per acre and a net density of 5.8 units per acre. Compared to the previously approved project, Paradise Hills Specific Plan, the University Hills project proposes to concentrate units mainly below or south of the San Andreas Fault which traverses the site, and eliminates units in upper Badger Canyon. The project has 8.1 acres of developed parkland/trails and 235 acres of natural open space.		
2007072119	Phillipsville Community Services District Water Infrastructure Upgrade Project Phillipsville Community Services District --Humboldt To comply with safe drinking water regulations and meet expected demand, the project includes rehabilitation of existing well and springhead; installation of a new 5,000 gallon chlorine contact basin; construction of a new 100,000 gallon storage tank and replacement of existing pipelines; replacement of components of the transmission lines and water services along service area roadways.	NOD	
2008052102	Shellville Levee Relocation Project - Camp 2/Wingo Unit of the Napa-Sonoma Marshes Wildlife Area Fish & Game #3 --Sonoma During the winter of 2005-2006, high rainfall and high tides led to the breaching of a levee along Railroad Slough near Schellville, California. The resulting flooding in Camp 2 on the west side of an existing railroad right-of-way led to overtopping and erosion of the railroad embankment. This resulted in flooding of the area east of the embankment, which led to overtopping and severe breaching of the levee system at several points along Steamboat Slough. As a result, both areas were flooded and continuously subjected to daily tidal activity. The Department of Fish and Game recently conducted a temporary repair of the levee and de-watered the site. The North Coast Railroad Authority (NCRA), who owns a perpetual right-of-way across the site, will be repairing the railroad embankment in-kind, and then will reinforce the embankment to become the new levee. Rather than permanently repairing the existing levee, the Department of Fish and Game proposes to relocate the levee from its existing location to the railroad embankment, and allow the eastern part of the site to naturally return to tidal wetlands. 2008061042	Lakeview Disposal Site Clean Closure Riverside County --Riverside The project is a proposal to "clean close" the inactive Lakeview Disposal Site. Through clean closure, the buried waste within the site will be completed excavated and removed from the site. Once the excavation is completed, the excavated area will be filled with on-site and off-site native soils. The site will be re-graded to match the surrounding topography.	NOD	
2008079068	Davis Minor Subdivision; Tentative Parcel Map; TPM 21011RPL3; ER86-19-40A San Diego County Unincorporated--San Diego The project proposes to subdivide 2.03 acres into two residential parcels at 9821 Apple Street in the Spring Valley Community Planning Group, within unincorporated San Diego County. The site is subject to the General Plan Regional Category Current Urban Development Area (CUDA), Land Use Designation (4) Residential. Zoning for the site is RS3. The site contains an existing single family residence that would be retained. Access would be provided by tandem private driveway connecting to Apple Street. The project would be served by the Spring Valley Sanitation District for sewer and the Otay Water District for imported water. The project site is covered by previous environmental actions in connection with TM4623RPL2/S88-017/AD88-041.	NOD	
2008079069	Construction of Sierra Madre/The Metropolitan Water District of Southern California Service Connection (SGV-10) Sierra, City of Sierra Madre--Los Angeles The San Gabriel Valley Municipal Water District (SGVMWD) is proposing to construct a new 5.5-cfs service connection at station 2858+91, on The Metropolitan Water District of Southern California (Metropolitan) Upper Feeder, located in the City of Sierra Madre and bordering the City of Alameda. SGVMWD will design and construct the service connection from the tie-in to the delivery point and Metropolitan will perform design review and construction inspection of the service connection from the tie-in to the first flange past the meter structure. The new service connection will tie into the existing 12-inch diameter outlet diameter piping which is and will continue to be used as a blow-off structure. In order to continue with the blow-off capabilities, a valve will be installed within the existing blow-off piping.	NOD	
2008078446	Proposed Lincoln II South Elementary School, Removal Action Workplan Toxic Substances Control, Department of San Bernardino--San Bernardino Approval of a Removal Action Workplan (RAW) by the Department of Toxic Substances Control (DTSC) pursuant to Health & Safety Code, chapter 6.8 as submitted on March 17, 2008 by Converse Consultants. The RAW focuses on excavation and removal to mitigate soils impacted with excessive levels of lead onsite. The purpose of the project is to mitigate impacted soils that exceed the project-specific human health and environmental risk criteria to minimize human exposure to the identified chemical of concern (COC). The estimated volume of impacted soils is 84 cubic yards or approximately 10 truckloads. The cleanup level for the COC is: DTSC soil screening level of 255 parts per million (ppm) for lead at school sites. Project activities will commence in January 2009 and are expected to take approximately five (5) days to complete the excavation and 30 days to complete	NOE

	the site restoration.		
2008078447	<p>Remedial Action Plan for former Gibson Environmental, Inc. Site Toxic Substances Control, Department of Bakersfield--Kern</p> <p>The Department of Toxic Substances Control (DTSC) has determined that prior removal actions combined with recordation of a land use covenant restricting future uses of the former Gibson Environmental, Inc. Sites are protective of human health and the environment. Recordation of the land use covenant, restricting use of the property to industrial and commercial uses, is the final remedial action for the Site. The land use covenant restrictions will apply to the current owner and all future owners of the Site property.</p> <p>The Site consists of approximately 6.2 acres located in an unincorporated area of Kern County designated for industrial use. The Site is located near vacant lots and light to medium industrial and commercial activities. The Site was used for oil-related production activities as early as the 1940's. Gibson Oil purchased the northern part of the Site in 1978 and used it for oil refining and recycling operations intermittently until at least 1984. In 1987, Gibson Oil became Gibson Environmental and received interim status from DTSC to operate a hazardous waste storage and treatment facility for liquid waste. DTSC issued a hazardous waste facility permit to Gibson Environmental in June 1988. In 1989, Gibson Environmental purchased the southern portion of the Site. Gibson Environmental received Interim Status in 1990 to accept and treat contaminated soil. Gibson Environmental cease operations and abandoned the Site in 1995, leaving behind approximately 670,000 gallons of liquid and sludge in tanks and approximately 80,000 cubic yards of soil piles.</p>	NOE	
2008078448	<p>Leasing of New Office Space Consumer Affairs, Department of Riverside--Riverside</p> <p>Department of Consumer Affairs, Bureau of Automotive Repair Proposes to lease approximately 7,600 square feet of office space. The office will have approximately 34 employees performing general office duties.</p>	NOE	
2008078449	<p>Middle Feeder Blowoff Erosion Repair and Modification Metropolitan Water District of Southern California Rosemead--Los Angeles</p> <p>Metropolitan will repair two eroded hillsides adjacent to the Middle Feeder Blowoff Structure at station 961+54 in the City of Rosemead. The project will involve filling in erosion gullies, compacting the fill, and placing ungrouted boulders and riprap on top. A damaged 24" discharge pipe connected to the structure would also be replaced.</p>	NOE	
2008078450	<p>Hillside Stabilization Between Coulterville and Bear Valley Caltrans #10 --Mariposa</p> <p>The California Department of Transportation proposes a project to stabilize the hillside on northbound State Route 49 between the communities of Coulterville and Bear Valley in Mariposa County. The Bagby rock slide first occurred on May 31, 2008; it deposited hillside material onto State Route 49 and blocked the road. Construction would occur on the northbound side of State Route 49 within Caltrans and Bureau of Land Management (BLM) right of way. Repair work would be done as a state-only funded project under a Caltrans Director's Order. The proposed project will stabilize the hillside to prevent further sloughing of material</p>	NOE

	into the roadway, and it will prevent potential danger to highway travelers, damage to property, and impairment of essential public highway services.		
2008078451	Redwood City Parole Office Corrections and Rehabilitation, Department of Redwood City--San Mateo The California Department of Corrections and Rehabilitation, Division of Adult Parole Operations, proposes to lease approximately 12,000 square feet of existing office space to house 25 staff for the Redwood City Parole Office. There are sufficient electricity, water, gas, wastewater, and refuse removal services to adequately serve this property.	NOE	
2008078452	Culvert Liner Installation near Mariposa Caltrans #10 --Mariposa The California Department of Transportation proposes to install culvert liners on State Route 140 at post miles 16.07, 17.36, and 17.68 in Mariposa County. The area between the pipe liner and the existing pipe would be filled with grout; the installation of the liner does not require excavation and would include minimal surface disturbance. The purpose of the project is to prevent culvert failure, increase the life of the culverts, and reduce the existing run-off and/or flooding problems.	NOE	
2008078453	Removal Action Workplan - Livingston High School Expansion Toxic Substances Control, Department of Livingston--Merced Approval of a Removal Action Workplan (RAW) by the Department of Toxic Substances Control (DTSC) pursuant to Health & Safety Code chapter 6.8 as submitted on June 6, 2008 by URS Corporation. The RAW focuses on excavation and removal to mitigate soils impacted with excessive levels of total petroleum hydrocarbons as diesel (TPHd) and total petroleum hydrocarbons as oil (TPHo) onsite. The RAW focuses on excavation, removal, and off-site disposal of approximately 120 cubic yards (approximately 12 truckloads) of impacted soil. The goals of the project are to reduce or eliminate future exposure to the COCs. The cleanup levels for these COCs are: 800 parts per million (ppm) for TPHd and 800 ppm for TPHo. Site restoration may include backfilling the excavation areas with clean soil (from an offsite source or through grading operations using on-site soil) and returning any surface features or their current condition or in accordance with Site construction/grading plans approved for school construction of the Site. Project field activities are scheduled to commence in August 2008 and are expected to take approximately 15 days to complete.	NOE	
2008078454	Jack Creek Sedimentation Removal and Maintenance Project Fish & Game #5 Escondido--San Diego The applicant proposes to alter the streambed of Jack Creek by conducting the following activities: (a) annual removal of approximately 200 cubic feet of silt from culverts located in front of the Daley Ranch House, behind the Ranch House outbuildings, and under the vehicle bridge leading to the house; (b) during sedimentation removal, 20% of the willows may be trimmed; (c) equipment to be used includes a backhoe, and chainsaws; (d) the excavated material will be removed and disposed of legally off-site; and (e) removal of non-native plant species (e.g. Mexican fan palms) within the project area. SAA# 1600-2006-0471-R5	NOE

2008078455	Riverside Drive Water Main Replacement Sweetwater Springs Water District --Sonoma Replace approximately 1,600 linear feet of existing 2-inch water main and appurtenances in Riverside Drive with a 6-inch main from Highway 116 to an existing 6-inch intertie serving Verba Lane. The existing main serves approximately 40 customers. The replacement main will ensure better service pressures in the service area and reduce water losses. All trenching occurs in roadways. It is anticipated that trenchless technologies will be used to cross Highway 116. Road surfaces will be restored consistent with encroachment permits.	NOE	
2008078456	East GuerneWood Road Water Main Replacement Sweetwater Springs Water District --Sonoma Replace approximately 1,150 linear feet of existing 2-, 4-, and 6-inch water main and appurtenances in GuerneWood Road with a 6-inch main between Summer Xing and Neeley Road. The existing main serves approximately 30 customers. The replacement main will ensure better service pressures in the service area and reduce water losses. All trenching occurs in roadways. Road surfaces will be restored consistent with encroachment permits.	NOE	
2008078457	Monte Cristo Avenue Water Main Replacement Sweetwater Springs Water District --Sonoma Replace approximately 1,000 linear feet of 2.5-inch and 1-inch water main and appurtenances in Monte Cristo Avenue with 6-inch main and extend the main approximately 110 linear feet at the north end and approximately 40 feet at the south end to intertie with the existing 6-inch main in Highway 116 to complete a loop. The existing main serves approximately 16 customers. The replacement main and new loop main will ensure better service pressures in the service area, reduce water losses and eliminate an existing creek crossing. All trenching occurs in roadways. It is anticipated that trenchless technologies will be used to cross Highway 116. Road surfaces will be restored consistent with encroachment permits.	NOE	
2008088002	Caples Lake Dam Outlet Works Emergency Repairs and Water Salvage Project El Dorado Irrigation District --Alpine, El Dorado On July 1, 2008 the El Dorado Irrigation District (EID) Board of Directors declared an emergency after learning of severe degradation and other problems with the two slide gate valves that control water releases from Caples Lake. In their present condition, there is significant risk that they could fail without warning, causing either an uncontrolled reservoir draining or inability to make any controlled releases through the dam. The project involves the release of most or all of the active storage within Caples Lake (16,451 acre-feet as of July 29, 2008) as part of the emergency repair procedures. The water will be temporarily rediverted at the Kyburz Diversion Dam, routed through the Hazel Creek Tunnel, and rediverted and stored in Jenkinson Lake for beneficial use primarily in EID's Eastern Service Area.	NOE
