STATE CLEARINGHOUSE

NEWSLETTER

June 1-15, 2009

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **June 1-15, 2009**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: February 13, 2007
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, Senior Planner
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner
916-445-0613
scott.morgan@opr.ca.gov

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
2000 through 2008**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

2007082014	Sunol Valley Water Treatment Plant (SVWTP) Expansion and Treated Water Reservoir San Francisco, City and County of San Francisco--San Francisco NOTE: Review Per Lead The project involves the expansion of the treatment plant, which is located in the Sunol Valley in an unincorporated portion of Alameda County on the west side of Alameda Creek ~3.4 miles north of Calaveras Reservoir. The proposed project involves the construction and operation of a new 17.5 MG treated water reservoir, 3.5 MG chlorine contact tank, flocculation and sedimentation basin, construction of new effluent pipelines within the SVWTP, and a new 78 inch pipeline connecting the new treated water reservoir to the existing 78 inch plant discharge pipeline, which transports water from the plant to the existing Alameda Siphons. The proposed project would improve treatment reliability by increasing the plant's sustainable capacity to 160 million gallons per day and bring the SVWTP in compliance with CDPH.	EIR	07/17/2009
2008071028	South Gate General Plan Update South Gate, City of South Gate--Los Angeles The General Plan Update is a comprehensive update of the 1986 General Plan. The City is ~98% built out, and as such, the Update will focus on preserving residential neighborhoods, guiding the remaining development and redevelopment opportunities, and encouraging the revitalization of selected areas. The update includes an update and reorganization of existing elements, resulting in the following State mandated and optional elements: Community Design, Mobility, Economics, Green City (includes Air Quality), Public Facilities and Services, Healthy Community (includes Safety), Noise, and Housing.	EIR	07/15/2009
2009031086	Conditional Use Permit, Development/Affordable Housing Agreement 2009-019 Big Bear Lake, City of Big Bear Lake--San Bernardino NOTE: Extended Review Per Lead The project is the construction of 42 new apartment units and associated carports and uncovered parking spaces, a 3,720 sf recreation/multi-purpose building and tot lot playground. Development/Affordabke Housing Agreements will be entered into between the City of Big Bear Lake Improvement Agency and developer to gurantee affordacbility of all of the units for a 55 yr time period.	EIR	07/17/2009
2009061001	State Route 99/Avenue 12 Interchange Project Caltrans #6 Madera--Madera NOTE: Review Per Lead Caltrans proposes to make improvements to the existing State Route 99/Avenue 12 overcrossing, ramps and surrounding local road network between post mile R7.1 and R7.9 Madera County. 2009061002	ENV-2008-3057-MND - 535 South Gramercy Place Los Angeles, City of --Los Angeles Conditional Use Permit the installation, use, and maintenance of an unmanned rooftop wireless telecommunications facility, consisting of 4 sections of 2 panel antennas each, mounted behind new 10 ft height screen walls (~97 ft above ground level), and an associated 228 sf lease area containing associated equipment cabinets, also concealed behind new screen walls, all on an existing 8 story multi-family residential building, on an ~8,408 sf parcel in the R4-2 Zone.	MND	06/30/2009
2009061003	ENV-2009-814-MND - 1146 South Stanley Avenue Los Angeles, City of --Los Angeles Zone Variance to allow: (1) the conversion of a guest unit into a third dwelling unit; (2) one existing parking space in lieu of the required three. A Zoning Administrator's Adjustment to allow: (1) reduced rear yard setback of 3.3 ft in lieu of the required 15 ft; (2) a side yard setback of 2 ft in lieu of the required 5 ft, all in conjunction with an existing legal non-conforming duplex located in the R1-1-O Zone.	MND	06/30/2009
2009061004	ENV-2009-990-MND - 7701 S. Central Avenue Los Angeles, City of Los Angeles, City of--Los Angeles Conditional Use Permit to allow the installation, operation, and maintenance of an unmanned wireless telecommunications facility disguised as a palm tree with 12 antennas and 6 equipment cabinets, constructed at a maximum height of 50 ft. The facility will be located on 9,506.3 sf, vacant lot, operating as a storage facility and parking lot and located in the CZ-1VL Zone.	MND	06/30/2009
2009061006	RENV IS 03-174 & 03-175 / RCUP 03-174 & 03-175 / PM 60046 & 60047 Los Angeles County Los Angeles, City of--Los Angeles NOTE: Review Per Lead The proposed project is a request for 2 Tentative Parcel Maps each creating 4 single family residential lots on 2 contiguous parcels of land. One private cul-de-sac will be constructed to serve the 8 single family residential lots. Two Conditional Use Permits have been requested for hillside grading on both project sites. The 8 proposed parcels range in size from 5.06 to 6.06 acres. Septic systems and new water wells are proposed to serve the new residential lots.	MND	07/01/2009
2009061007	Bennett Minor Use Permit San Luis Obispo County Paso Robles--San Luis Obispo NOTE: Review Per Lead A Minor Use Permit to allow: 1) One farm support mobile home (~700 sf), that is currently on the site. Temporary events (22 total per year including weddings, fundraisers, and agricultural events) allowing: 200 guests 12 times per year, 150 guests 8 times per year, and 100 guests 2 times per year. 3) Incidental camping consisting of 10 primitive camping sites to be used only during horse related events. a permitted three room bed and breakfast to increase to a four room bed and breakfast. 2009061008	Carbon Canyon Vegetation Reduction Project Chino Valley Fire District Chino Hills--San Bernardino Under the Proposed Action, the Fire District would conduct vegetation management activities in strategic locations around Carbon Canyon over a 3 yr period, with about 1/3 of the work completed each year. The Proposed Action is designed to mitigate the risk of fires moving into the Chino Valley area from the southwest, thereby protecting lives, homes, and infrastructure in the area from fire loss or damage. Vegetation reduction would involve the thinning of fuel load in the identified Vegetation Reduction Zone. The project area encompasses ~158.5 acres to be thinned by a combination of hand treatment and mastication. 33.3 acres would be treated using a masticator (a masticator is a piece of machinery that mows or flails woody vegetation). The remaining 125.2 acres would be thinned using hand treatment.	MND	06/30/2009
2009062003	County File# LP09-2002, U.S. Coast Guard Rescue 21 Project - Wireless Communication Facility Contra Costa County Pittsburg--Contra Costa SBA Towers, Inc. proposes to install a wireless communication facility on the north side of the subject 2 acre parcel located at 5755 Nortonville Road in Pittsburg. The project includes construction of a: 118 ft tall non-guided tower with 4 antennas and one lightning rod, equipment shelter, and emergency back-up diesel powered generator and extension of utilities to the site (~125 ft). The project also includes the installation of a 6 ft tall chain link security fence, widening of the existing unpaved dirt access road by 12 inches at 2 locations (due to sharp turns) and removal of several abandoned telecommunication facilities. The proposed United States Coast Guard's "Rescue 21" project will improve the ability of the U.S. Coast Guard to assist mariners in distress, save lives, as well as enhance Homeland Security.	MND	06/30/2009
2009062006	Rezone #09-02, Dennis and Sharon Querantes Tehama County Corning--Tehama NOTE: Review Per Lead To rezone ~8.46 acres from E-A; Exclusive Agricultural District to M1; Light industrial District.	MND	07/01/2009
2009062007	Molino Way Steps and Wainwright Steps Project Mill Valley, City of Mill Valley--Marin NOTE: Review Per Lead The City of Mill Valley is proposing to construct 2 new stairway projects and reconstruct 4 existing stairways as part of its overall program to increase pedestrian access throughout the city. The 2 projects that are the subject of this IS/MND consist of the Wainwright Place Steps project and the Molino Way Steps project. Both are subject to discretionary approval by the City Council. The four stairway reconstruction projects are considered "Categorically Exempt" from CEQA.	MND	07/01/2009

	Community Development by August 20, 2009. The Housing Element is one of seven mandatory elements to the General Plan and is required to be updated every 5 years. The Housing Element is considered the primary policy document to guide the development, rehabilitation, and preservation of housing for all economic segments of the City's population. Informed by a comprehensive public outreach effort, an updated Housing Element has been prepared. The updated Housing Element contains an assessment of housing needs and an inventory of resources and constraints relevant to the meeting of these needs, and a 5 yr program of actions the City intends to implement or is implementing to meet identified housing needs. The updated Housing Element is available on th City's General Plan website: www.chicogeneralplan.com		
2009062005	U.P. #09-02, Angelo Ferro (Angelo M. Ferro Jr. et al Trust, Owner) Tehama County --Tehama NOTE: Review Per Lead	Neg	07/01/2009
	To establish seasonal farm labor housing on ~1/2 acre, consisting of 10 portable dormitories to house up to 140 people, dining building, showers and restroom facilities that use self contained holding tanks for wastewater and sewage to be pumped periodically and disposed of off-site at an approved disposal site. The project site is zoned EA-AP;Exclusive Agricultural-Agricultural Preserve Zoning District. This is the first phase of a proposed 2 phase project. Only Phase 1 is being evaluated in this study. The site is located southwest of Woodson Bridge, on the west side of Wisconsin Ave, ~4,650' north of the Wisconsin Ave/Merrill Road intersection.		
2002121014	Westside Parkway Project Bakersfield, City of Bakersfield--Kern The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code for the Westside Parkway Phase 4 Bridge Geological Investigation portion of the Westside Parkway Project. The project will drill up to twenty (20) small-diameter (4-inch ID) geotechnical soil borings using either a rubber-tired or track mounted all-terrain drill rig with hollow-stem and/or mud-rotary drills as the subsurface conditions dictate. Borings are expected to be drilled to a depth of approximately 70 to 80 feet below the existing grade into the alluvium to examine and sample the prevailing soil conditions. Each boring hole will be backfilled with a 50/50 mixture of the original soil/drilling fluid (if used) and neat cement grout in accordance with Kern County Health Department permit requirements. Any drilling fluid which is left after the grouting operations will be drummed and disposed of at a licensed hazardous waste facility. Temporary impacts are expected to be not more than 0.00004 acres of land.	NOD	
2007072023	Modesto Master EIR Update and General Plan Amendment Modesto, City of Modesto--Stanislaus The applicant is proposing to demolish the existing Mallards building located at the southeast corner of McHenry and Briggsmore Avenues. In its place, a new 13,013-sf building with a drive through and associated parking will be constructed for a CVS Pharmacy.	NOD

2009012079	Hearn Avenue Widening Phase 2 Santa Rosa, City of Santa Rosa--Sonoma The City of Santa Rosa proposes roadway improvements along an approximately 620-foot long segment of Hearn Avenue to improve circulation along the eastern Hearn Avenue corridor and to provide additional capacity for vehicle stacking at traffic signals. An approximately 150-foot long segment of Hearn Avenue would be widened. Specifically, the proposed road widening would include the following elements: 1) addition of a west travel lane along the entire project length; 2) addition of bike lanes to the east of the Colgan Creek box culvert; 3) installation of new curbs and gutters on both sides of the roadway; 4) widening of the existing box culvert by approximately 47 feet to accommodate the proposed roadway improvements; 5) upgrade of two pedestrian ramps at Whitewood Drive and the sidewalk and driveway at 637 Hearn Avenue to meet current ADA standards; 6) reconstruction of the existing railroad signal and crossing arm foundations; 7) addition of raised median islands on either side of the railroad crossing; and 8) replacement of approximately 170 feet of SMART track and other minor improvements to an additional approximately 380 feet of railroad track. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2009-0075-03 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Lori Urbanek, City of Santa Rosa Public Works.	NOD	
2009032066	Brentwood Capital Improvement Program Budget 2009/10-2013/14 Brentwood, City of --Contra Costa The proposed project is the City's Capital Improvement Program (CIP) Budget for fiscal years 2009/10-2013/14, which identifies proposed capital improvements and preliminary budgets for projects throughout the City over a five-year period. Capital improvements include a range of public works and infrastructure projects to improve the quality of life for local residents and visitors. Proposed projects include roadways, parks and trails, water, wastewater, drainage and community facility improvements, plus development-funded improvements throughout the City of Brentwood.	NOD	
2009041012	University of California, Los Angeles Wind Tunnel Remediation Project University of California, Los Angeles El Segundo--Los Angeles UCLA proposes to demolish existing structures and remediate known contamination of the former Trisonic Wind Tunnel Facility located in the City of El Segundo. The facility was donated to The Regents of the University of California, on behalf of the Los Angeles campus, pursuant to a donation agreement that became effective September 1998. Under this agreement, Rockwell is responsible for decommissioning, demolition, and clean-up of the site, with oversight from the California Department of Toxic Substances Control (DTSC).	NOD	
2009068001	Install Photovoltaic Array at he SDSU Aquaplex California State University, San Diego --San Diego The Associated Students at SDSU will be overseeing a project, to be completed in three phases, to install a textured 828 photovoltaic panel system engineered to capture sunlight on a south-facing bank at the Aquaplex. The captured sunlight will b eharnessed to provide electricity to heat the Aquaplex pool.	NOE

2007081151	Oakmont II Perris, City of Perris--Riverside Development Plan Review 07-07-0029 to develop a 1,608,322 sf industrial complex comprised of 5 buildings on 93.2 acres located at the southeasterly corner of Markham Street and Brennan Avenue. To facilitate the proposal Tentative Parcel Map 36010 (TPM 08-08-0002) is proposing to restructure lot lines and vacate streets to create 5 individual parcels for each of the buildings. Parking spaces are placed throughout the site with 2 access points from Markham Street and 2 access points from Indian Avenue. The buildings range in size from 92,000 sf to 1,100,000 sf, with building height varying from 41 ft to 44 ft. All truck doors will be screened from public right-of-way through the use of block walls and landscape screening.	EIR	07/16/2009		
2009012030	Waterfowl, Coot, Moorhen, and Common Snipe Hunting Fish & Game Commission -- The State's wildlife conservation policy contains, among other things, an objective of providing sport hunting use of selected species where such use is consistent with sustainable wildlife populations. The project being considered is a proposal to modify the current hunting regulations as an element of waterfowl, coot, moorhen, and common snipe management. The objectives of the proposal are to maintain viable waterfowl, coot, moorhen, and common snipe populations and to provide public sport hunting opportunities through regulated harvest.	EIR	07/16/2009		
2009061009	Major Subdivision No. 2006-154 (Don Pedro View Subdivision)/Lot Line Adjustment No. 2008-100 Mariposa County --Mariposa The project proposes to adjust the property line between APNs 021-060-017 and 021-340-002. APN 021-060-017 is 43.36 acres before the adjustment and would be 50.99 after. APN 021-340-002 is 32.92 acres before the adjustment and would be 25.29 after. APN 021-060-017 would then be subdivided into 9 lots ranging in size from 5.01 acres to 9.81 acres.	MND	07/01/2009

2009061010	Barstow Bear Valley Reservoirs - New Bear Valley Reservoirs and Demolition of Existing Reservoirs Health Services, Department of Barstow--San Bernardino Golden State Water Company (GSWC) proposes to install 2 new welded-steel reservoirs, with foundations, on an existing GSWC reservoirs site to provide drinking water storage for the Barstow system. The smaller of the 2 proposed reservoirs will have a capacity of 0.75 MG with a height of 24 ft and a diameter of 76 ft (replacing a recently [December 2007] demolished 1.0 MG reservoir). The larger reservoir will have a capacity of 1.0 MG concrete reservoir and foundation will be demolished. The new reservoirs will be located in the same location as the existing and previously demolished reservoirs on the existing Bear Valley Reservoir site.	MND	07/01/2009
2009061013	Alvarado Trunk Sewer Improvements Project La Mesa, City of La Mesa--San Diego The Alvarado Trunk Sewer Improvement Project proposes to install ~1,794 linear ft of sewer trunk main to replace the existing sewer trunk main located in the Alvarado Creek channel south of Fletcher Parkway near SR-125. The existing main is a 12 inch vitrified clay pipe that runs in the Alvarado Creek channel. The project proposes to install an 18 inch high density polyethylene pipe that would be located in the northern slope of the channel, offset from the existing alignment.	MND	07/01/2009

2009062014	Eureka Broadcasting Company Conditional Use Permit Humboldt County Eureka--Humboldt A Conditional Use Permit for the replacement of two 245 ft tall radio broadcasting antennae and appurtenant facilities for the Eureka Broadcasting Company. The existing towers were installed in 1955. The project also includes structural reinforcement of the existing foundations and associated guy wires. Antenna radials and coaxial cables will also be replaced. Repairs will also be made to an existing catwalk that is used for access to the towers. The foundation improvement will require the temporary removal of soil around the existing structures. Each 2 ft by 2 ft foundation will be reinforced with 34.6 sf of concrete, 15.9 sf of which will be below grade. Once completed, the area around the site will be backfilled with the previously removed material and revegetated. A new coaxial cable will be installed and run from both towers to the radio station, located on APN 014-271-04. No change in height is proposed. Although the project appears to be entirely in the State Coastal Commission jurisdiction, a request for consolidation of Coastal Permits has been approved by the Coastal Commission. The staff report to be presented to the Humboldt County Planning Commission will be available on the Humboldt County website approximately one week prior to the scheduled hearing. Project is scheduled to be heard on July 2, 2009.	MND	07/01/2009
2009062015	Tabooma Business Park (APN 179-280-02) Tentative Subdivision Map Initial Study No: IS009-07 Stockton, City of Stockton--San Joaquin The project consists of the subdivision of an existing 12.74 acre parcel with 13 buildings into 13 new +/- 1 acre lots with one located on each new lot.	MND	07/01/2009
2009061011	Lyons Avenue At-Grade Rail Crossing/Extension Santa Clarita, City of Santa Clarita--Los Angeles The Lyons Avenue At-Grade Rail Crossing/Extension project is the first component of a two-component project (the North Newhall Specific Plan project) that focuses specifically on the at-grade rail crossing proposed at Lyons Avenue. This proposal includes a request to create a new at-grade roadway crossing of the Southern Pacific Railroad tracks at Lyons Avenue. As part of the new rail crossing request, the City proposes to close the existing 13th Street crossing, located approximately 1/4-mile to the north of Lyons Avenue. The Lyons Avenue/Dockweiler Drive extension/connection is identified in the City's General Plan Circulation Element and would create a four-way intersection at Railroad Avenue and provide vehicular and pedestrian connectivity between Downtown Newhall and the North Newhall area. As part of the Lyons Avenue At-Grade Rail Crossing/Extension component of the project, the City of Santa Clarita will be preparing an application to the California Public Utilities Commission (CPUC) for approval of the proposed Lyons Avenue crossing and 13th Street closure. Requirements of the CPUC application include detailed design and analysis of the proposed crossing, lane configuration, signal timing, gate design, traffic study/analysis, and certification of the EIR. Approval of the at-grade crossing by the CPUC is a central component in the development of a Specific Plan for the project area. If an at-grade crossing is not approved at Lyons Avenue and an alternative is adopted, the General Plan Circulation Element would need to be reconsidered and possibly amended. Once the City ascertains the ultimate location of the rail crossing into North Newhall, a detailed land use plan with specific use types, internal roadway networks,	NOP	07/01/2009

	pedestrian/trail networks, etc. would be prepared around the ultimate roadway configuration and rail crossing.		
2009061012	La Canada Flintridge General Plan Update Program EIR La Canada Flintridge, City of La Canada-Flintridge--Los Angeles The proposed project is the first comprehensive update since the General Plan was adopted in 1980 following the City's incorporation although individual elements have been updated periodically over the past 27 years. The City is largely built out and new development opportunities are limited; however, initial implementation through 2030 buildout of the Project would include changes to some land use designations, additional traffic, and redevelopment based on new or revised goals, objectives, and policies. Thus, the EIR will analyze all impacts related to the implementation of the proposed Project, including implementation of all eight elements: Land Use, Open Space and Recreation; Conservation; Safety; Circulation; Noise; Air Quality; and Housing.	NOP	07/06/2009
2009032080	Lower Russian River Bank Stabilization Project Sotoyome Resource Conservation District --Sonoma The Lower Russian River Bank Stabilization Project at Odd Fellows Recreation Club will stabilize and revegetate five sites, broken into smaller subsidies with distinct prescriptions, along 2115 ft. of the Lower Russian River which has been destabilized due to severe flooding in the recent past. On-going erosion at all sites directly threatens the remaining riparian habitat as well as the primary access road for residents and buried utilities, including a septic system serving the 500 residents in the community. The project will feature a combination of bioengineering techniques to both stabilize eroding streambanks and immediately create a pioneer riparian community that will be able, on its own, to evolve into a stable climax riparian community. Techniques will include grading and rocking with river run gravel, and installation of live siltation willow baffles, live willow brush mattresses, live women willow walls, live woven willow wall terraces, and deep planted live willow clusters. A log and boulder fish habitat structure will also be installed at one site. It is widely recognized that this project will be a valuable demonstration of bioengineering techniques that can be applied elsewhere along the Lower Russian River.	Oth	
2005011089	Delano Marketplace Delano, City of Delano--Kern The Delano Marketplace project would include two large anchor stores, retail shops, and restaurants (sit down and fast food) for a total of approximately 456,022 square feet. The large anchor stores would include a 228,751 square foot Wal-Mart Supercenter and a 172,463 square foot home improvement store. The Wal-Mart Supercenter store will include general merchandise sales; a garden center; tire and lube express; grocery sales and support space; stockroom/receiving area; ancillary areas; tenant areas (e.g. a fast food restaurant and a vision center); a 14 position gas station on a separate pad; drive-thru pharmacy; and a bagged goods pickup area. The Wal-Mart Supercenter will operate 24 hours per day. The proposed home improvement store will include general merchandise sales and a garden center. The proposed project includes nine other parcels for food and retail uses with proposed building sizes ranging from 2,500 to 14,410 square feet, for a total project size of 456,022 square feet. The order of Project Lateral implementation has been estimated based on existing customer information and current funding.		
2009061019	Water Year 2010 Interim Flows - San Joaquin River Resoration Program Water Resources, Department of Fresno, Firebaugh--Fresno, Madera, Merced NOTE: Extended review per lead to end on 7/20/09.	JD	07/20/2009
	Reclamation is proposing to temporarily change Friant Dam operation in WY 2010 (October 1, 2009 through September 30, 2010) to release WY 2010 Interim Flows from Friant Dam in the San Joaquin River and potentially downstream (potentially through the use of the Eastside Bypass) as far as the Delta, as specified in the Stipulation of Settlement in NRDC, et. al. v. Kirk Rodgers, et. al., and as part of the SJRRP. Consistent with a Memorandum of Understanding with the Settling Parties and the State, the California Natural Resources Agency will play a major role in funding and implementing actions called for in the Settlement and in the Act. DWR, along with several other State organizations, will implement actions needed to route WY 2010 Interim Flows through the Restoration Area including the potential use of the Eastside Bypass. The WY 2010 Interim Flows would be recaptured by existing water diversion facilities along the San Joaquin River or in the Delta for agricultural, municipal and industrial, or fish and wildlife uses. The project would not involve construction activities. The purpose of the Proposed Action is to implement the provisions of the Settlement pertaining to WY 2010 and collect relevant data to guide future releases of Interim Flows and Restoration Flows under the SJRRP.		
2009061014	Corte Bella, Mission Hills (Case No. ENV-2008-4727-MND) Los Angeles, City of Los Angeles, City of--Los Angeles Construction of a gated, 176 unit condominiums development (Lot 2) including a 2,164 sf leasing office/recreation building and 7,376 sf of commercial retail space (Lot 1). Requested entitlement include: (1) A two-lots subdivision pursuant to LAMC Section 17.03 with 364 parking spaces on a 6.7 net acre site; (2) Pursuant Section 11.5.6 of the Municipal Code, a General Plan Amendment to the Mission Hills-Panorama City-North Hills Community Plan from Low Residential and Low Medium I Residential to Neighborhood Commercial for the 2 lots (APN 2649013029 & 2649012004); (3) Pursuant Section 12.32 F of the Municipal Code, a Zone Change and Height District Change from [Q]C2-1VL (Commercial Zone), [Q]R4-1VL (Multiple Dwelling Zone), RD5-1 (Residential Density Multiple Dwelling Zone), and RS-1 (Suburban Zone) to (T)(Q)C2-1VL (Commercial Zone); and, (4) Pursuant to Section 16.05 of the Municipal Code, Site Plan Review for a project which results in an increase of 50 or more dwelling units.	MND	07/02/2009
2009061016	Holman Ranch Monterey County --Monterey The project consists of a Combined District Development Permit including a: 1) A Use Permit for a 3,330sf Agricultural Processing Plant for a winery producing up to 5,000 cases per year, and a 240 sf equipment storage building; 2) A Use Permit for the removal of 9 protected oak trees; 3) A Use Permit for Development on	MND	07/02/2009

	slopes in excess of 30%; 4) An Administrative Permit for Development in a Site Plan District; and 5) Design Approval. Also included is a 3,050 sf wine storage cave. Grading for site improvements and the wine cave is ~1,980 cubic yards cut and 1,980 cubic yards fill, to be balanced on-site.		
2009061017	5498MDH; (a) GPA 20, Map 124; (b) ZCC 74, Map 124; (c) Tentative Tract 6942 (Al Graves by Wiley Hughes) Kern County Lamont--Kern Subdivide a 30 acre site into 44 residential lots ranging in size from 11,013 to 17,778 sf, 3 residential lots ranging in size from 33,580 to 35,944 sf, and an 11.73 acre sump lot. Development of the lots would entail construction or extension of ancillary facilities, such as roads, lighting, sewer and domestic water lines. Access to the site is proposed via Reynolds Avenue from State Route 184 (Weedpatch Highway) and Man-O-War Avenue via Whirlaway Street off of Mountain View Road. Domestic water and sewer are proposed from the Lamont Public Utility District.	MND	07/02/2009
2009061021	Emerald Bay Community Association Safety Improvement Project Orange County Laguna Beach--Orange The project proposes safety improvements to the Emerald Bay Community entrance at Pacific Coast Highway and Shamrock Road. A traffic signal, raised median and street striping and signange will be constructed within the Caltrans right-of-way on Pacific Coast Highway. Additional improvements consist of widening Shamrock Road, the relocation and reconstruction of the existing guardhouse, which will extend ~40 ft north of the current location, grading and landscaping. The paved entrance area will be widened ~24 ft to accommodate the proposed improvements. A sidewalk will continue to be provided on the south side of Shamrock Road.	MND	07/02/2009
2009062018	Fairfield Inn & Suites Capitola, City of Capitola--Santa Cruz The proposed project consists of demolition of 3 existing structures and construction of an 82 unit hotel that requires approval of a Coastal Permit, Conditional Use Permit and Architectural and Site Review.	MND	07/02/2009
2009061018	Downtown Vista Specific Plan Update Vista, City of Vista--San Diego The proposed DVSP Upate would update and expand the boundaries of the existing Downtown Specific Plan No. 26. The primary goal of the DVSP Update is to stimulate reinvestment in older and underutilized properties to provide housing and commercial uses that would result in the recreation of a dynamic downtown area. The DVSP Update would be used as a tool to guide and direct new redevelopment, economic development, streetscape and traffic improvements, parking, pedestrian amenities, and mixed land uses in the SPA.	NOP	07/02/2009
2009061020	City of Lake Forest Sports Park and Community Center Lake Forest, City of --Orange The project involves the phased development of a sports park with athletic fields, hard courts, play grounds, trail connections, and a community center.	NOP	07/02/2009

2009062016	Edgewood Hotel and Golf Course Realignment Project EIS Tahoe Regional Planning Agency -- The proposed project includes construction of a new approximately 230-unit full service hotel complex and accessory uses, such as a spa and wellness center, a restaurant and bar, and banquet and meeting space, on high capability lands previously improved for golf play (Fairway No. 9) on the Edgewood Golf Course property. The proposed hotel complex would be concentrated on approximately 10 acres of land within Special Area #1 of the Edgewood Plan Area Statement (PAS) 070A. The project would involve transfers of development rights from offsite properties; new covered parking and changes to existing surface parking, onsite roads and pathways; improvements to the Stateline Stormwater Treatment System; restoration of wetlands and stream environment zones; LEED certification; scenic improvements including the removal of two lakefront single family residences and lakefront surface parking; lot line adjustments; tree removal and changes to landscaping, irrigation and lighting; new public beach access; and, in one alternative, buildings that require additional height beyond the base allowable.	NOP	07/02/2009
2009062023	River District Specific Plan Sacramento, City of --Sacramento The River District Specific Plan will be a policy document that will provide direction and support to guide future development to the specific plan area. The Specific Plan will address zoning, infrastructure, circulation, parks and open space, urban design, and the treatment of cultural resources. Also included will be financing plan for the proposed public infrastructure.	NOP	07/02/2009
2009061015	Application No. 2009-06, Rojas-Pierce Park, Phase II Mendota, City of Mendota--Fresno Rojas-Pierce Park is an existing City park facility located in the northwestern area of town. The City Council adopted a Master Plan for development and improvements to the park in 2006. Phase I of the construction was completed in January 2009. The Project consists of Phase II of the development, which would complete the master-planned facility by way of adding 2 soccer fields, a baseball diamond, new restrooms, a second concession area, and substantial additional onsite parking. Most of the existing park is in the City; most of the project site is in the County, adjacent to the existing park site. The entire park site will be landscaped with a combination of turf and trees. Smoot Street, which runs along the southern boundary of the park, will be extended west to provide adequate vehicular access to the entire facility.	Neg	07/02/2009
2009062019	Update Housing Element of the Sebastopol General Plan Sebastopol, City of Sebastopol--Sonoma NOTE: Review Per Lead The project is the updated Housing Element of the Sebastopol General Plan. This new element would replace the City's Housing Element adopted in 2003. Completion of this update is required by State law. The Housing Element is intended to show how the City plans to meet existing and projected housing needs including its share of the regional housing needs, as determined by the Association of Bay Area Governments (ABAG) in its Regional Housing Needs	Neg	07/07/2009

	Allocation (RHNA). Sebastopol's allocation under the RHNA as determined by ABAG, is a total of 176 units, including 32 units for very low income, 28 units for low-income, 29 units for moderate-income, and 87 units for above moderate-income households. The planning period for this proposed Housing Element update is 2009-2014.		
2007071157	Fairway Business Park Initial Study/Mitigated Negative Declaration, General Plan Amendment No. 2007-03 Lake Elsinore, City of Lake Elsinore--Riverside CDFG is executing a Lake or Streambed Alteration Agreement (SAA # 1600-2009-0024-R6) pursuant to Section 1602 of the Fish and Game Code to the project Applicant, ARI Chaney LLC, C/O Fairway Commercial Partners, represented by Mr. Rod Oshita. The Applicant is proposing to construct a business park composed of 24 office buildings with associated parking, landscaping and drainage features. Grading of the project site will result in the permanent filling of Unnamed Seasonal Pondered Drainage. Two storm drain outlet structures will be constructed within the Lake Elsinore Outlet Channel to convey storm flows from the project site and prevent flooding. An Unnamed Tributary Drainage to the Lake Elsinore Outlet Channel will be modified to resolve existing drainage problems on 3rd Street.	NOD	
2008081066	Acquistapace Elementary School Project Santa Maria-Bonita School District Santa Maria--Santa Barbara The proposed project consists of constructing an elementary school that would serve up to a maximum of 700 students attending kindergarten through sixth grade and would employ 42 full time staff and 24 part-time staff (teachers and administration). The school will include 27 classrooms and administrative and multi-purpose buildings. Various ball courts and play areas would also be built. The school would relieve overcrowding at Liberty, Adams, and Battles Elementary Schools.	NOD	
2008122080	Liberty Island Conservation Bank Reclamation District 2093 --Yolo The project will create and preserve a mosaic of habitats including perennial marsh, riparian, tidal channels, seasonally inundated floodplain, and upland to benefit native Delta fish including delta smelt and salmonids.	NOD	
2009012026	Flood Control District Multi-Objective Flood Management Program Within The South Alameda County --Alameda The proposed project would involve the removal of ~44,000 cubic yards of sediment from Old Alameda Creek at 2 locations between I-880 freeway and the 20 tide-gates structure ~3/4 mile southwest of Hesperian Avenue flood management. The purposes of the project are to increase flood protection of adjacent communities to meet FEMA flood protection standards and to function as a component to make the South Bay Salt Pond Restoration Project plans for shoreline habitat restoration feasible, reduce the amount of excessive sediment deposition by designing the levee system to take advantage of the effects of tidal scour and encouraging San Francisco Bay Trail use of the levees. 2009068058	MEU Academy Training Ridgewood Ranch Forestry and Fire Protection, Department of --Mendocino This project is intended as skills training for MEU Firefighter Academy participants. The specific training activities include mobile attack using fire engines, progressive hoselays with lengths between 600 feet to 800 feet maximum, fuse and drip torch techniques, and handline construction. The extent of soil disturbance is limited to handline construction using hand tools. The handline widths proposed will be primarily one-foot wide. There will be a limited construction of four-foot wide handlines. No live fire will be used during this training. The environmental setting is grass and brushland on gentle terrain. The training area will cover an approximately one-acre area.	NOE	
2009068059	Corralitos Forest Fire Station - Sewere System Repair Project Forestry and Fire Protection, Department of Watsonville--Santa Cruz CalFire proposes to repair the septic system at the Corralitos Forrest Fire Station. The septic system is malfunctioning and can be repaired with the addition of a 1,000-gallon tank on the end of the existing tank. The system has been in place for over 30 years and it contained in an earthen fill (40" wide X 30' long X 6' high) constructed during station construction. A 7' deep hole approximately 6' X 8' in size will be dug in the fill to connect this new tank to the existing tank. This repair will extend the list of the current system but will not increase the capacity or staffing of the fire station.	NOE	
2009068060	Near intersection of Maple Avenue and Foothill Blvd, Morgan Hill, Santa Clara County Health Services, Department of Morgan Hill--Santa Clara The project includes the installation and operation of a new deep well to avoid nitrate contamination, which would be constructed with a deep concrete seal to protect the water supply from high-nitrate groundwater. The project would supplement existing facilities by providing sufficient source reliability and redundancy.	NOE

2008032110	Channel Rehabilitation and Sediment Management for Remaining Phase 1 and Phase 2 Sites Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Trinity The construction activities described in the Draft Master EIR would create additional fish and wildlife habitat at a number of discrete locations; over time, additional increases in habitat are anticipated as riverine processes are restored. Work to be performed includes removal and replanting of vegetation, earthwork in the floodplain including re-contouring bank and floodplain features, as well as conducting in-river work such as gravel placement and grade control removal. In addition to various construction activities, the Draft Master EIR-EA/Draft EIR provides the analysis necessary to authorize ongoing activities such as gravel addition during high spring flows and control of line sediment on an annual basis. 2009061026	Pier at Perret Park Riverside County Economic Development Agency Wildomar--Riverside Upgrades to existing park including a 270 ft long wooden pier extending from Perret Park into Lake Elsinore.	MND	07/06/2009
2009061027	Tuscany Recycled Water Project Elsinore Valley Municipal Water District Lake Elsinore--Riverside NOTE: Review extended to 7/16/09. The Master Plan describes the components of a recycled water system to serve end users located throughout their Wildomar service area. To be cost-effective, the Master Plan proposed implementation of the system in 4 separate phases to provide the appropriate level of supply to match demand as it increases over time; this project addresses the Tuscany phase. The proposed Tuscany Recycle Water Project would deliver 832 acre ft per year (AFY) of recycled water (in lieu of potable water) to converted landscape irrigation users including a park, school fields, medians, slopes and greenbelts. In addition, larger master planned communities (North Tuscany Hills, Ramsgate, Spyglass, and Porto Romano) will connect to the Tuscany system at a later date with projected usage of 1,672 AFY. The total project recycled water usage for this phase is ~2,505 AFY. System facilities will consist of the following: ~38,000 linear ft of 6 inch to 18 inch diameter pipeline; 4,500 gallons per minute pump station (6.48 MGD); 0.8 million gallon reservoir; Turnout facility, which entails a 18 inch diameter high performance butterfly valve at the point of connection to the existing 54 inch effluent pipeline.	MND	07/16/2009
2009062025	Sutter Jensen Community Park Sacramento County --Sacramento The proposed project is a request for the development of a new community park in the Carmichael community. The project includes 2 alternatives: 1) Develop 14.4 +/- acres with park amenities including: parking areas, nature paths, tot play areas, picnic areas, botanical and community gardens, and sell a portion (4.4 +/- acres) of surplus land to private developers. 2) Develop 12.1 +/- acres with park amenities including: parking areas, nature paths, tot play areas, picnic areas, botanical and community gardens, and sell a portion (6.7 +/- acres) of surplus land to private developers.	MND	07/06/2009
2009062026	Meade Street By-Pass Road Richmond, City of --Contra Costa The project consists of the construction of a 2 lane by-pass road in an east and west direction that would extend from the intersection of Regatta Boulevard and Erland Street to Meade Street. The proposed roadway would reroute vehicular traffic to the south to avoid current delays along Marina Bay Parkway.	MND	07/06/2009

2009062028	Queen of the Valley North Building (08-0069) Napa, City of Napa--Napa Request to construct a 3 story, 71,273 sf building on the Queen of the Valley Hospital campus to be used for intensive care unit, surgery and laboratory. Project approvals include: 1) a General Plan Amendment to increase the allowable floor area ratio (FAR) of General Plan POD PS-814 from 0.40 to 0.44; 2) a Use Permit to allow the hospital facility improvements; and 3) a Design Review Permit for the proposed building and site improvements. The project will be located in the northwest corner of the 21 acre hospital campus in an area that currently contains surface parking and 3 one-story buildings which will be removed.	MND	07/06/2009
2009062030	Parcel Map 06-074 (TBS Ranch) Shasta County --Shasta The applicant has requested approval of a Parcel Map for the division of a 23.8 acre property into 2 parcels being 18.8 acres and 5.0 acres in size. Access to both parcels would be from Maynard Road, a County-maintained roadway. Water will be provided by an individual shared well. On-site septic tank/leach field systems will be used to dispose of sewage.	MND	07/06/2009
2009062031	Parcel Map 07-029 (Woolery) Shasta County --Shasta The request is for a 2 parcel residential division. The project would create two 5 acre parcels. One parcel would contain an existing residence which would continue to be served by an existing on-site septic system and drilled well. The proposed undeveloped second parcel would be served by a public water and sewer system. Improvements would include an encroachment to Locust Street, a driveway crossing of Anderson-Cottonwood Irrigation District irrigation ditches, construction of lateral water and sewer connections, and installation of improvements consistent with fire protection water standards, including at a minimum, a fire hydrant.	MND	07/06/2009
2009062032	Parcel Map 08-022 (Bean) Shasta County --Shasta The applicant has requested approval of a Parcel Map for the division of a 20.0 acres property into 3 parcels being 5.4 acres, 7.2 acres, and 7.4 acres in size. Access to each of the parcels would be from Charolais Way, a private roadway. Water will be provided by individual wells. On-site septic tank/leach field systems will be used to dispose of sewage.	MND	07/06/2009
2009062033	Tract Map 1981 (Jewell) Shasta County Redding--Shasta The applicants have requested approval of a land division of a 37.7 acre parcel into 10 lots ranging in size from 3.00 acres to 5.31 acres.	MND	07/06/2009
2009062034	Tract 1987 (Jewell) Shasta County Redding--Shasta The request is for approval of a land division of 151.3 acres into 3 parcels of 3.6 acres, 4.8 acres, and 3.3 acres, with a 139.6 acre remainder parcel.	MND	07/06/2009

2009062035	Parcel Map 08-031 (Sukosky) Shasta County Cloverdale--Shasta The project is a 2 parcel residential land division. The division would create a 2.05 acre parcel and a 2.45 acres parcel. An existing home site, including a single family residence, shop building and swimming pool, would be located on the larger parcel. An existing gravel driveway would be paved with a chip seal or asphalt surface. A fire hydrant would need to be located within 750 ft of the building site.	MND	07/06/2009
2009062036	McIntyre Ranch Master Plan Greater Vallejo Recreation District Vallejo--Solano U.S. Geological Survey Wester Ecological Research Center, repair existing bayn, tack house, and cabin, stable builising, covered equestrian area, greenhouse, gardens and agricultural outbuildings, portable toilets, demolish existing uninhabitable house, Nature/Conference/Activity Center, 18 tent cabins, three restroom/shower buildings, terrace area with picnic tables, staff/caretaker residence, fire rings, ropes course, improve St. Johns Mine Road (trim vegetation, grade embankment, striping), two septic tanks with disposal fields, improve existing well water supply or connect to City water supply, fire hydrants, improve existing driveway for emergency vehicle access, remove non-native trees, landscape renovation, internal access roads, ~100 parking spaces in three locations on site, and carpool parking at St. Johns Mine Road/Columbus Parkway.	MND	07/06/2009
2009061025	CenterStone at Woodbridge Trails Project Highland, City of Highland--San Bernardino The Proposed Project consists of 133 detached single-family residential subdivision on a vacant parcel of land in the City of Highland. The project site is located on a rectangular parcel consisting of 22.92 gross acres. The project also includes dedications, street, community trail, Tot Lot and Bio Swale, at the southeast corner of Greenspot Road and Orange Street. The project would provide state-of-art green building technology focused on aesthetics, energy-efficient design, and cost-effective materials and equipment that help offset energy costs for the future homeowners to lessen the impact on th eenvironment. Woodbridge Trails in its effort to encourage "green paractices" will lead by example in source reduction, recycling, and composing through its construction practices and building options. As an infill project, Woodbridge Trails makes efficient use of existing land. It incorporates ecologically sound building materials including recycled content and low Volatile Organic Compound products. During site grading and building construction, to the extent possible, protects the topsoil in order to reduce dust and runoff impacts.	NOI	07/06/2009
2009062029	Coldstream Specific Plan Truckee, City of --Nevada The Coldstream Specific Plan includes 54.4 acres of residential uses, 8.6 acres of commercial uses, 7.0 acres of recreational uses and 108.6 acres open space on approximately 178.6 acres. The plan also includes an internal circulatiojn network, a trail system and Restoration and management Plan.	NOP	07/06/2009

2009068063	Ayala High School Athletic Rack and Field Modernization Project Chino Valley Unified School District Chino--San Bernardino Renovation and minor alteration of existing school athletic track and field facilities including replacement of turf material. The project will include minor disabled access improvements. The project will occur upon the existing school premises and will not involve the acquisition of real property.	NOE	
2009068064	Interplant Gas Line Rehabilitation, Job No. J-106 Orange County Sanitation District Fountain Valley, Huntington Beach--Orange The project will involve repair of the Sanitation District's Interplant Gas Pipeline to ensure the structural integrity of the pipeline (e.g. pipe corrosion and potential gas leaks) and to comply with the Department of Transportation Office of Pipeline Safety regulations and Public Utility Commission requirements. The high pressure gas line conveys digester methane gas between the Sanitation District's two wastewater facilities (Plants 1 and 2) allowing for optimal use of the digester gas for power production and gas storage. The pipeline will be sip-lined with High Density Polyethylene (HDPE).	NOE	
2009068065	Circle Oaks Shaded Fuel Break Forestry and Fire Protection, Department of Napa--Napa Creation of shaded fuel break behind homes within the Circle Oaks residential community off State Hwy 121 (Monticello Road). The project is designed to protect homes by reduce the fuel hazard behind them. Shaded fuel break activities include pruning existing trees 10-12 feet up to the base to remove fuel ladders, thinning pole-sized trees (less than 6 inch DBH), and manual removal of flammable shrubs, such as chemise, manzanita and broom. Ornamentals and special landscaping features will be preserved as requested by individual landowners. Selective thinning and vegetation removal is restricted to a corridor approximately 100 to 200 feet around three sides of the community. The ground will not be disturbed. Slash from the project will be piled and burned during the off fire season and after it has dried for a minimum of 30 days to reduce the smoke production.	NOE	
2009068066	Madera-Mariposa-Merced Unit Headquarters - Road Construction and Landscaping Project Forestry and Fire Protection, Department of --Mariposa The California Department of Forestry and Fire Protection (CalFire) is proposing construct a short segment of new road within an existing access easement behind the Unit Headquarters facility. This road segment would be approximately 60 feet long and 25 feet wide. It will be used to provide improved bulldozer transport egress into the facility. Following grading and road construction, the area would be landscaped along a strip of land adjacent to the egress including installation of a drip irrigation system. This project is located along the southeast corner of the Madera-Mariposa-Merced Unit Headquarters, 5366 Highway 49 North, Mariposa CA 95338.	NOE	
2009068067	Application No. 2009-09, Conditional Use Permit, APN 017-272-008 Dinuba, City of Dinuba--Tulare The Conditional Use Permit would allow a convenience stor. With the Conditional Use Permit, the use is consistent with General Plan designation and zoning	NOE

2009068070	U.S. Bureau of Reclamation - Maintenance Dredging Above the Imperial Dam Project Regional Water Quality Control Board, Region 7 (Colorado River Basin), Palm Desert --Imperial Maintenance Dredging Above the Imperial Dam	NOE	
2009068071	Point of diversion into canal at Dry Creek in the NE 1/4 of USGS Quad Rackerby, Section 3, T 18N, R6E, MDB&M Fish & Game #2 --Yuba The North Yuba Water district (NYWD) will install a low water crossing through Dry Creek each spring and remove it each fall. The low water crossing involves deposition approximately 10-15 cubic yards of material across the stream within the historical roadway. This work is done after seasonal high flows have ceased (usually May or June). The material is commercially purchased clean crushed aggregate or drain rock between 3 and 4 inches in size stockpiled on sit. At the end of each irrigation season in October, the clean aggregate and inadvertent amounts of natural washed stream materials are removed from the crossing and stockpiled above the stream zone. During the installation of the low water crossing, the creek flow is passively diverted around the work area by opening the gate that leads the water into an adjacent canal. In addition to the low water crossing, the NYWD proposes to install and remove a protective berm across the front of the canal intake structure to protect it from deposition of streambed materials and debris during flood-stage flows. The protective berm is installed at the end of the irrigation season in October each year and moved to an immediately adjacent area at the beginning of each irrigation season in April.	NOE	
2009068072	Squaw Valley Ski Corporation Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe Olympic Valley--Placer Repair/Replacement of existing night light, communication line, snowmaking lines, sedimentation ponds, & general maintenance, installation of new power line & bypass waterline under sensitive roads. Removed sediment will be used to reinforce the northerly stream bank/levee to improve stability, and prevent flooding and loss of property. A man-made agricultural drainage channel, located between the river levee and adjacent developed farmland will be filled in the course of reinforcing the levee. Remove fallen trees, dead tree limbs, and/or dead woody debris from within the river. Clear trash and other debris from the river bed and bank. Work will occur in dry conditions, and disturbed bank areas will be revegetated and restored to prevent erosion.</p>	NOE	
2009068074	<p>Fox Hollow Trail Culvert Installation Fish & Game #3 Fairfax--Marin</p> <p>A 45-foot long by 60-inch diameter corrugated high-density polyethylene culvert will be installed where the Fox Hollow Trail crosses an unnamed tributary. Rip-rap will be installed at the inlet and outlet to prevent scouring. Class 2 aggregate base materials will be placed over the culvert to create a 12-foot wide passage across the drainage. The upstream and downstream slopes of the fill embankment will be sloped at 2:1 and erosion control blankets will be installed. Issuance of a Streambed Alteration Agreement Number 1600-2008-0375-3 is pursuant to Fish and Game Code Section 1602.</p>	NOE	
2009068075	<p>Annual Routine Levee Maintenance Fish & Game #3 Stockton--San Joaquin</p> <p>Annual routine levee maintenance repairs to maintain levee safety and structural integrity of the levee. Issuance of a Streambed Alteration Agreement Number 1600-2009-0093-3 is pursuant to Fish and Game Code Section 1602.</p>	NOE	
2009068076	<p>Lower Alameda Creek Fish Passage/Rubber Dam No. 1 Foundation Evaluation Fish & Game #3 Fremont--Alameda</p> <p>The project includes boring in two locations at the foundation of Rubber Dam 1 to address the liquefaction concerns raised by the Division of Dam Safety prior to construction of the fish passage elements. Issuance of a Streambed Alteration Agreement Number 1600-2009-0041-3 is pursuant to Fish and Game Code Section 1602.</p>	NOE	
2009068077	<p>UNEX-2505 Augustine University of California, Planning, Design & Construction --Santa Clara</p> <p>The proposed project consists of leasing the first two floors, approximately 41,855 square feet (sf), of an existing three-story, 60,000 sf building, for use by the UCSC Extension Program. Project construction will be limited to internal modifications of the building; no modifications to the lands around the building are proposed. The proposed extension facility will replace and consolidate the ICSC Extension Program currently located in Cupertino, Santa Cruz, and Sunnyvale.</p>	NOE

2008072044	Fourth High School Campus Liberty Union High School District Oakley--Contra Costa TBased on the projected population for Eastern Contra Costa County, particularly for the Cities of Brentwood and Oakley, the LUHSD estimated that by the year 2020 the demand for high school education in the area will be ~9,000. To meet current and expected demand for high school education services the LUHSD would construct and operate the FHSC on a 76 acre site located southwest of the intersection of Sellers Avenue and Delta Road. Implementation of the FHSC would serve the current and projected demand for high school educational services in the area aerved by the LUHSD. Currently, the Site contains fallow and active cropland, including a 10 acre apple orchard. Building structures at the Site, including 2 houses, a cottage, a garage, a pump house and a drying shed were demolished in July 2008.	EIR	07/22/2009
2008072095	PUD-87-19-03M Pleasanton, City of Pleasanton--Alameda The proposal will reduce the site's density from 14 custom lots of the previous approval to 6 custom lots. Habitable structures and private yards will be confined to the designated building envelopes of each lot totaling ~4.97 acres of potentially developable area with the remaining 24.82 acres set aside as permanent open	MND	07/07/2009

2009062038	<p>Canby Geothermal Development Project Modoc County --Modoc</p> <p>The proposed project involves the drilling and casing a 4,000 ft geothermal production well (ISO-2) to intersect a local fault and flow testing it into an existing production well (ISO-1). The second phase of the proposed project is converting the existing ISO-1 geothermal well to an injection well that will dispose of wastewater fluids ISO-2 well by returning those fluids to the geothermal reservoir. A 2900 ft, 4 inch underground pipeline will connect the ISO-1 and ISO-2 wells. A drilling pad will be constructed for the ISO-2 well with a drilling sump to meet regulatory standards. A successful ISO-2 well and subsequent injection of wastewaters into the ISO-1 well will mitigate environmental issue with the existing district heating system by ending geothermal discharge to the Pit River. The establishment of the ISO-2 well and conversion of the ISO-1 well to an injection well will also increase the capacity of a district heating system, allow additional cascaded uses and further the understanding of Canby's geothermal resource for continued development to evaluate the potential for use in tandem for long-term power production. The immediate purpose is to utilize the geothermal resources as an alternative energy source to provide heat to residential, commercial and public use buildings, and produce private electricity for the I'SOT community of Canby.</p>	MND	07/07/2009
1990011055	<p>Warner Center Specific Plan Update Los Angeles, City of Los Angeles, City of--Los Angeles</p> <p>In the mid-1980s a community-based effort was initiated to create a Master Development Plan to balance commercial and residential growth, thus reducing traffic impacts in the region and providing design and aesthetic standards for the Warner Center area. That effort culminated in the adoption the Warner Center Specific Plan (WCSP - Ordinance Nos. 168873 and 168984) by the City Council in June 1993. Changes and amendments to the plan were adopted in 1997, 2000 and 2001. An Environmental Impact Report (EIR) for the Warner Center Specific Plan was certified in 1993 (State Clearinghouse House No. 1990011055). The EIR analyzed 21.5 million square feet of commercial space and 3,000 residential units in Phase I (2010). The Specific Plan required that further environmental review be conducted in 2011 prior to implementation of Phase II. When the Specific Plan was adopted in 1993, commercial growth in Warner Center was higher than residential growth. In order to encourage residential growth and create more balanced development, transportation fees and other restrictions were not required on residential projects as they were on commercial and industrial development. The 1993 WCSP limited Phase I commercial development to 21.5 million sf, however, there was no limit on the residential units allowed - except that the EIR only analyzed 3,000 units and therefore development in excess of the 3,000 units was required to conduct additional environmental analysis.</p>	NOP	07/08/2009
2009061030	<p>Arroyo Grande Creek Channel Waterway Management Program San Luis Obispo County --San Luis Obispo</p> <p>The WMP is currently being prepared, and the information below reflects the most recent information available at the time this NOP was published. The project description may be refined somewhat for use in the CEQA and NEPA analyses; however, no significant changes are anticipated. Implementation of the WMP would include three distinctive components:</p>	NOP	07/07/2009

	<ol style="list-style-type: none"> 1. Vegetation Management 2. Sediment Management 3. Levee Raising (Alternatives 3a and 3c) <p>In addition there are a number of known secondary components resulting from implementation of the levee raising components of the project. These include raising of the railroad bridge, raising and/or relocating a portion of Halcyon Road, making improvements to the 22nd Street Bridge, and potentially the relocation of structures located within the Arroyo Grande Channel maintenance easement that encroach on proposed improvements.</p>		
2009061028	<p>Letteau Avenue & Flower Street Water System Improvements Delhi County Water District --Merced</p> <p>The project includes: installation of ~2,300 lineal ft of 10" water line; 5 fire hydrants with valves; 2 connections to existing water mains; various water main fittings and valves; and removal and replacement of existing asphalt pavement.</p>	Neg	07/07/2009
2008042112	<p>Amendment to the Sonoma Countywide Integrated Waste Management Plan Sonoma County --Sonoma</p> <p>The Sonoma County Waste Management Agency (SCWMA) is proposing an Amendment to the Sonoma Countywide Integrated Waste Management Plan (CoIWMP). The proposed project includes amendments to the CoIWMP Household Hazards Waste Element (HHWE) and the Siting Element. Revisions to the Siting Element would reflect that all landfilling of solid waste at the County's Central Disposal Site has been suspended and that no waste is currently disposed of or proposed to be disposed of within Sonoma County. The revisions to the siting element also include the option of divestiture of the County Disposal System to a private owner. Strategies for disposal include truck and/or train hauling the refuse to out-of-County disposal sites. The HHWE would be modified to allow for additional household hazardous waste collection facilities to be established in Sonoma County.</p>	SIR	07/22/2009
2008121074	<p>Owens Lake Revised Moat and Row Dust Control Measures Los Angeles County --Inyo</p> <p>Los Angeles Department of Water and Power (LADWP) proposes to reduce dust emissions in the historic Owens Lake bed in order to eliminate exceedances of the federal particulate matter (PM10) standard, through construction of a landform feature called moat and row. The moat and row dust control measure, as initially configured, is a method of dust control that does not require the addition of supplemental water to reduce dust emissions from the lake bed. A moat and row element is up to an 89-foot wide disturbed linear corridor that consists of an earthen berm (row) approximately 5 feet high with 1.5:1 (horizontal to vertical) sloping sides and a base of up to 19 feet wide, flanked on the otherside by ditches (moats) approximately 4 to 5.5 feet deep and up to 20 feet wide at the widest point. Rows serve as windbreaks and the primary function of the moats is to capture sand.</p>	SIR	07/22/2009

1997092079	<p>Contra Costa Pumping Plant Mitigation Program Water Resources, Department of Oakley--Contra Costa</p> <p>On April 5, 2009 the Secretary of the Interior announced that \$20 million of American Recovery & Reinvestment Act funding is being allocated to build the Contra Costa Canal fish screens. The Contra Costa Canal fish screens will mitigate fishery impacts resulting from operation of the Contra Costa Canal Pumping Plant No. 1 as well as support compliance with the Los Vaqueros Biological Opinion and the Central Valley Project Improvement Act. On October 20, 1997, the California Dept. of Water Resources adopted a CEQA Negative Declaration in support of the United States Bureau of Reclamation design of the Project. The Project was designed by Reclamation and ready for construction bids in 2000. However, the Project was delayed due to limited funding and complications associated with land acquisition.</p>	NOD	
2007042086	<p>Feather River Inn General Plan Amendment, Rezone and Planned Development Permit Plumas County --Plumas</p> <p>Project consists of restoration of the Feather River Inn, an existing recreational facility, within a master planned recreation-oriented residential development of up to 114 condominium/town home residences, along with open space, an events center, outdoor ceremony facilities, golf course, wastewater treatment facility, maintenance and parking.</p>	NOD	
2007062006	<p>Rio Dell Wastewater Reuse Project Rio Dell, City of Rio Dell--Humboldt</p> <p>The City is now pursuing American Recovery and Reinvestment Act funding through the State Water Resources Control Board Clean Water State Revolving Fund Program to temporarily install some of the equipment approved for the new treatment facility at the existing Wastewater Treatment Plant (WWTP), until the new treatment facility is constructed. The new treatment facility is expected to be constructed by 2011. The improvements to be constructed and operated at the existing WWTP would include the following: Installation and operation of a skid-mounted mechanical biosolids dewatering device and covered biosolids storage building; and Installation and operation of a skid-mounted sodium dioxide generator with a 500 gallon brine tank and 2,500 gallon sodium hypochlorite storage tank to replace the existing gaseous chlorine disinfection system. The equipment would be installed in such a manner as to avoid the adjacent tree. Each piece of equipment would be installed with a containment system sized to hold all the material stored therein, in case of a leak.</p> <p>An Addendum to the EIR was prepared to analyze changes to the adopted project that are required to temporarily install and operate this equipment. This June 2009 Addendum concludes that the changes to the adopted project being proposed do not cause substantial changes in impacts analyzed for the proposed project in the 2008 Certified EIR and do not result in new significant impacts.</p>	NOD

2007031114	The Neptune Marina Apartments and Anchorage/Woodfin Suite Hotel and Timeshare Resort Project Los Angeles County --Los Angeles The proposed project is the Neptune Marina Apartments and Anchorage/Woodfin Suite Hotel Timeshare Resort Project on Parcels 10R, FF, and 9U as well as adjacent Marina Basins. The proposed project consists of five components requiring five Coastal Development Permits, three Conditional Use Permits, three Variances, one Parking Permit, two Plan Amendments, and a Tract Map. Component 1 (Parcel 10R) consists of demolishing an existing 136-unit apartment complex to build a total of 400 apartment units and adjacent waterfront public pedestrian promenades. This component also includes the demolition of an existing 198-slip anchorage to construct a new 174-slip anchorage within the Marina Del Rey Basin B. Component 2 (Parcel FF) consists of demolishing an existing 201 space parking lot to build a total of 126 apartment units and adjacent waterfront public pedestrian promenades. Component 3 is for the development of the northerly portion of Parcel 9U to construct a 19 story building with 288 hotel and timshare suite units and accessory uses. The proposed building will include a 6 level parking garage structure, with one level below grade, for a total of 360 parking spaces. Component 4 consists of a 1.46 acre public wetlan and upland park on the souther portion of Parcel 9U. Component 5 is to construct a public-serving boat anchorage that would be situated proximal to parcel 9U within the Marina Del Rey Basin B. This public anchorage would contain approximately 2,923 square foot of dock area and would provide approximately 542 linear feet of transient boat docking space. Approximately 180,000 cubic yards of grading will be required with excess cut material to be exported to the La Puente Landfill.	EIR	07/23/2009

	bank of the American River near Glenbrook River Access Park.		
2009012007	Cameron Hills Subdivision El Dorado County --El Dorado The project request includes a Rezone, Planned Development, and Tentative Subdivision Map. The zone change request would add the Planned Development overlay zone. The Tentative Map and Development Plan would create 41 residential lots ranging in soze from 6,000 sf to 20,317 sf, and 5 lettered open space lots ranging in size from 0.08 acres to 4.91 acres, totaling 8.16 acres. The project requires annexation into the Cameron Park Community Services District and Fire Department Boundaries. A Design Waiver has been proposed to allow sidewalk widths to be modified from 6 ft to 4ft. Water and sewer would be provided by the El Dorado Irrigation District. Access would be provided via an internal roadway system with points of access at Kimberly Road and Harvey Road. All lots designated for open space shall be rezoned Open Space-Planned Development.	MND	07/08/2009
2009061034	803 North Milpas Street Santa Barbara, City of Santa Barbara--Santa Barbara The project consists of a mixed use development containing 5 mixed use residential/commercial condominiums, one live/work unit, 2 residential units and one commercial condominium. The development would be split among 3 buildings totaling 19,886 net sf on a lot of ~1/2 acre. The overall height of the proposed development would be between 37 ft and 38 ft, 6 inches. Parking would be located within 8 two car garages and on the interior of the lot for a total of 26 parking spaces. Access to the garages and parking lot would be via a driveway from East De la Guerra Street, located between 2 of the buildings. Pedestrian access to the site would be provided in the northwest corner of the site, behind the open parking. An area along the northern property line has been reserved for the location of secured remediation equipment, if required.	MND	07/08/2009
2009061035	Hi-Desert Water District Water Reclamation Facility, Wastewater Treatment Plant and Sewer Collection System Project Hi-Desert Water District Yucca Valley--San Bernardino NOTE: Review Per Lead This project consists of the construction and installaiton of the following components: The district intends to initially sewer the central portion of the Town of Yucca Valley to convey an annual average flow of 2 MGS of wastewater to the WRF currently discharged to septic tanks. In the future, Phase 1 facilities do not adequatley protect groundwater quality, or if the RWQB requires more areas to be sewerred, or if additional capacity is needed, the collection, treatment and disposal facilities will be expanded to collect an additional 1 MGD of sewage. The additional facilities are referred to as Phase 2 facilities. Phase 3 facilities will b designed to collect an additional 1 MGD of wastewater flow for a total system capacity of 4 MGD. Ultimate build-out in the District's Yucca Valley service area could be as high as 6 MGD, but due to the area's slow rate of growth, this is not forecast to occur until the distant future. The wastewater will be treated to meet Title 22 recycled water standards/requirements and will be delivered to recharge basins operated by the District to percolate the treated effluent into the Warren Valley Groundwater Basin. 2009062039	<p>Jefferies CDP and Use Permit to Construct Two Single-Family Residences, Street & Vehicle Turnaround Half Moon Bay, City of Half Moon Bay--San Mateo</p> <p>The City of Half moon Bay received an application (PDP-062-05 and PDP-057-06) to construct 2 single-family residential structures. The .25 acre project area is within a Commercial-Downtown zoning designations, and it encompasses 2 separate sites, 307 Church Street (PDP-062-05) and 311 Church Street (PDP-057-06). The Project requires City approval of a Coastal Development Permit and Use Permit to allow the residential use and structures on the sites, the extension of Church Street with vehicle turnaround and related infrastructure.</p>	MND	07/08/2009
2009061032	<p>Santa Monica High School Science and Technology Building and Site Improvements Project Santa Monica-Malibu Unified School District Santa Monica--Los Angeles</p> <p>A reconfiguration of the northern portion of the existing Santa Monica High School campus would occur. The project would demolish the existing Science and Technology Buildings, parking lot, and softball field in a reconfigured site layout. A formal perimeter would be created along 7th Court Alley and Olympic Boulevard. All vehicle access would be on 6th Street, with enhanced pedestrian entrance along Michigan Avenue. A drop-off and pick-up lane would be provided along Olympic Boulevard. Campus-wide updates to the fire alarm and electrical systems would be included, and dependent on funding: synthetic turf installed on the football field, the south gymnasium ceiling and campus ventilation systems would be improved.</p>	NOP	07/08/2009

	<p>Ford Ranch near the community of Blue Lake. All four quarries are existing sites that have been mined over the last several decades. Quarry Site Nos. 2 and 4 have been essentially depleted and are currently undergoing reclamation activities. A very limited amount of material has been removed from Quarry Site No. 3. The original approval permitted a maximum yearly extraction volume total of 35,000 cubic yards for all four quarries. The current project proposes Modification of the boundary and volume of rock material to be mined at Quarry Site No.1. The surface are of the expansion is approximately one acre, from 2.3 to 3.3 acres. The additional 50,000 cubic yards of material available at Quarry Site No. 1 result not only from expanding the perimeter but also from increasing its depth. No change to the maximum annual extraction volume total is proposed. Expansion of the operation requires tree and vegetation removal under a Non-Industrial Timber Management Plan. No other changes to the approved project are proposed. The Modification does not affect the termination date of October 6, 2010.</p>		
2003081092	<p>850-4 Reservoir Otay Water District --San Diego</p> <p>The proposed project includes the grading and developing of open space in order to construct the Otay Water district 850-4 Reservoir. The reservoir will have a capacity of 2.5 million gallons and will require grading, fencing, paving and equipment connections. This facility will be located southeast of, and adjacent to, the existing 850-2 reservoir. The existing access road will also be used for the proposed project.</p>	NOD	
2005042052	<p>2005-2008 State Water Project Delta Facility Increased Diversion to Recover Reduced Exports Taken to Benefit Fish Resources Water Resources, Department of Byron--Contra Costa</p> <p>In 2009 through 2012, the maximum allowable daily diversion rate into Clifton Court Forebay during July, August, and September would be increased from 13,870 acre-feet to 14,860 acre-feet. The water would also be diverted at the Bureau of Reclamation's Tracy Pumping Plant. The water diverted will offset taken for the benefit of fisheries resources.</p>	NOD	
2007091096	<p>University High School Stadium Irvine Unified School District Irvine--Orange</p> <p>The project involves the development of a new 2,940 seat athletic stadium. The stadium would be constructed on the north side of the campus in an area presently developed with the school's football field and athletic track. 	new building, which will feature lifeguard and staff space, locker rooms, and restrooms, as well as a new building for maintenance, mechanical systems, and storage.		
2009011064	I-805 HOV Extension/Carroll Canyon Road Extension Caltrans #11 San Diego--San Diego The proposed project consists of extending Carroll Canyon Road between Scranton Road and Sorrento Valley Road, and construction of Direct Access Ramps to the High Occupancy Vehicle lanes on Interstate 805. The project will impact approximately 0.18 acre of riparian habitats associated with Carroll Canyon Creek. Compensatory mitigation for the impacts consists of restoration on site for temporary impacts, and purchase, restoration and long-term conservation of riparian habitats in the vicinity of the project for permanent impacts.	NOD	
2009032087	Stonewood 3 Subdivision 9183 Oakley, City of Oakley--Contra Costa The proposed project includes the subdivision of 11.29 acres into 31 lots for the development of 31 new single-family units.	NOD	
2009042096	ZPE08-0121 Sonoma County --Sonoma The project includes bank stabilization, habitat restoration, and activities to address the existing degraded conditions. The project area is a 200-foot long section of the right bank of Sonoma Creek within the property. The property will restore important habitat elements lost during the 2005-2006 flood events and stabilize the bank against future flood damage and sediment delivery to Sonoma Creek. The project will remove the existing cause of the degraded habitat conditions (i.e. damaged pipe and wire fence) and lay back the right bank at slopes varying from 1:1 to 2:1 (H:V). The 1:1 graded slopes will be protected with vegetated boulders; flatter slopes will receive biotechnical treatments (e.g., brush mattresses and heavy coir fabric planted through with willow poles). At the downstream end of the site, heavy coir fabric and brush mattresses will provide stability. Rocked slopes will have river run gravel placed in the interstitial spaces to facilitate plant establishment. Existing vegetation, including a 24" dbh alder at the downstream end of the project, will be protected to the extent possible. An existing root wad will be left in place and protected during construction. Four more root wads will be placed along the toe of the repair to provide enhanced wildlife habitat values. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2008-0117-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Mr. Doug Wilson.	NOD	
2009051003	Madison Water Well and Tank/Kaiser Water Well and Tank Greenfield County Water District Bakersfield--Kern The GCWD currently owns the Kaiser site and is in the process of obtaining the Madison site (a lot in a future residential Subdivison) to construct well and tank systems that would eventually be necessary to augment their present production and storage system. The timing of construction would be phased as dictated by demand from future growth in the surrounding area. The proposed sites would be completely enclosed within security fencing and would each consist of: 1 water	NOD

2009068153	State Water Project - Spillway Repairs at Oroville Dam, Antelope Dam, Frenchman Dam and Grizzly Valley Dam Water Resources, Department of Oroville, Quincy--Butte, Plumas Perform various repairs to the concrete surfaces of various State Water Project-owned dams within the Oroville Field Division to restore them to original design condition. Existing spillway surfaces have numerous minor cracks, voids, and spalls that have developed over time through normal wear and tear. The work will include sawcutting concrete, removing damaged existing concrete, waterblasting, air/ sandblasting, concrete and steel reinforcing work, repairing subdrains, and repairing expansion and contraction joints. All work will be done when the spillways are dry and all concrete repair materials will be contained out of waterways.	NOE	
2009068154	Banti Clean and Bank Stabilization Fish & Game #3 --Sonoma The applicant proposes to stabilize approximately 30 feet of failing stream bank using vegetated rock rip-rap along the banks of Tobacco Creek. The applicant proposes to use a backhoe to place 12"+ rock rip-rap approximately 4 feet high along 30 linear feet of bank. The applicant will plant willow cuttings amongst the rip-rap for long term bank stability while providing habitat for fish and wildlife.	NOE	
2009068155	Culvert Repair Project - NEV-20 Caltrans #3 --Nevada The scope of work includes: install culvert lines, replace CSP sections, drainage inlets and headwalls as needed, install water pollution control BMP's including rock slope protection as needed.	NOE	
2009068156	Caltrans, Highway 101 Storm Damage (Reeves Canyon Culverts) Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Willits--Mendocino The purposes and objectives of the project are to repair and upgrade the culverts and downdrains to protect the roadway from erosion related structural failures. The proposed construction activities will consist of: installing new corrugated steel pipes; installing a high-density polypropylene culvert liner; replacing headwalls; installing culvert aprons and downdrains; replacing asphalt and road base; installing rock slope protection; conducting slope revegetation and erosion control. The proposed project may result in soil disturbances up to approximately 2.6-acres, including 0.033-acres of impacts to the jurisdictional drainages within the Russian River HU and 0.068-acres of impacts to drainages and wetlands within the Eel River HU.	NOE	
2009068157	Doyle Park Pedestrian Bridge Repair Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Santa Rosa--Sonoma The purpose of the project is to make necessary repairs to the Doyle Park Pedestrian Bridge northern abutment due to damage caused by the New Years Day flood of 2006. The project will involve excavation of a 4' wide by 2' deep keyway into firm soil. Approximately 60 cubic yards of riprap will be used to reconstruct and reinforce the slope. The riprap will have an 18" cap of grout with a maximum slope of 1:1. The riprap will be applied only to the upper bank and will cover approximately 320 square feet.	NOE

	existing sediment placement site. The proposed project would remove ~500,000 cubic yards of sediment from the reservoir. At completion of the proposed project, no operation changes would occur at any of the areas that are out to future sediment placement activities after the project.		
	The proposed project includes improvements to the Santa Anita Dam, which would involve modifications to the dam's inlet/outlet works, including the construction of a new riser. The modifications are necessary to comply with seismic stability requirements determined by the CA Department of Water Resources, Division of Safety of Dams (DSOD). The riser modification would be done concurrently with the sediment removal project. The dam outlet modification component consists of constructing a concrete riser on the lowest outlet gate of the dam. The new riser would allow water above 1,230 ft to freely pass through the dam, thus meeting DSOD's seismic safety requirements. Furthermore, the existing trash rack in front of this gate would be moved to the outside of the new riser and the existing gate would be removed. Additional gates would be instilled on the outside of the new riser and the existing risers to allow for operations below the restricted level of elevation 1,231 ft.

2007081005	6th Street Viaduct Improvement Project Los Angeles, City of Los Angeles, City of--Los Angeles NOTE: Review Per Lead	EIR	08/15/2009
------------	--	-----	------------

The City of Los Angeles, in cooperation with Caltrans, is proposing to make improvements to the 6th Street Viaduct to improve this critical Los Angeles River crossing to an acceptable standard during a seismic event by either retrofitting the existing structure or replacing it entirely. The 3,500 ft long 6th Street Viaduct was built in 1932. Over the past 75 years, the concrete elements of the viaduct have been degraded by an ongoing chemical reaction, known as Alkali Silica Reaction, which has led to significant deterioration of the structure and loss of its seismic integrity, despite continuing efforts to arrest or limit its effect.

2008082042	<p>Atkinson Lane Specific Plan and Planned Unit Development Santa Cruz County Watsonville--Santa Cruz</p> <p>The County of Santa Cruz and the City of Watsonville are preparing a joint Specific Plan (City) and Planned Unit Development (County) for the Atkinson Lane future growth area (project site). The project site falls within the City's Urban Limit Line. The total gross acreage of the project site is 65.8 acres, which includes 16 acres of land to be re-zoned by the County prior to annexation by the City to meet County's affordable housing goals. Land uses and densities for the plan would be determined as part of the Specific Plan and Planned Unit Development process. Although the City of Watsonville General Plan identifies that up to 600 residential units may be allowed within the planning area, 450 units are proposed. A Planned Unit Development as allowed by Santa Cruz County Code has been prepared that incorporated conditions of approval for the 16 acres of land to be re-zoned by the County of Santa Cruz. The proposed project would also require a General Plan Amendment and LAFCo action.</p>	FIN	
2009022095	<p>Alviso Adobe Renovation, Project Number 5055 Milpitas, City of Milpitas--Santa Clara</p> <p>The project proponent, the City of Milpitas, proposes phased improvements to the Alviso Adobe ranch complex. The proposed improvements would (1) renovate and preserve the Alviso Adobe and its associated outbuildings and grounds; and, (2) convert the buildings and surrounding lands into a historic park and museum. All improvements would be conducted in accordance with the "Secretary of Interior's Standards for Rehabilitation & Illustrated Guidelines for Applying the Standards." Phase I would result in structural and seismic upgrades to the Adobe. It would also renovate the complete exterior of the Adobe. Phase II involves public access and site improvements, including vehicular access, a new parking lot (and its associate drainage improvements), a picnic area, restrooms, new landscaping and lighting, and an apricot orchard and herb garden. Phase III would renovate the interior of the Adobe, including electrical and plumbing upgrades, replacement of its interior wooden flooring, and renovation of the 1920s kitchen. Phase IV consists of the complete renovation of the interior and exterior of various outbuildings and the construction of a small new catering kitchen in a renovated outbuilding. Due to the uncertainty of the availability of funding for the project, the City is contemplating four different site access, circulation, and parking options for Phase II. Depending on the amount of funds the City ultimately has access to, any one of the four site access, circulation, and parking options could be constructed during Phase II.</p>	FIN	
2009061047	<p>Island Park Six-Lane Caltrans #6 Fresno, Madera--Fresno, Madera</p> <p>Caltrans proposes to widen a 2.9 mile segment of SR-99 by constructing 2 additional lanes in the median to convert the existing 4 lane freeway to a 6 lane freeway from south of the Grantland Avenue undercrossing in Fresno County, to north of the Avenue 7 overcrossing in Madera County. The work also includes replacing and widening the San Joaquin River Bridge. Three detention basins are proposed to be constructed on the west side of the highway: 2 basins would be located adjacent to the San Joaquin River and 1 basin would be located just north of the Avenue 7 overcrossing. an existing basin located east of the highway south of the Avenue 7 overcrossing would be deepened.</p>	MND	07/13/2009

1998052052	Pacific Herring Commercial Fishing Regulations Fish & Game Commission -- NOTE: Draft Supplemental The proposed project is a body of regulations governing the commercial harvest of Pacific herring for roe products, bait, pet food, as fresh fish, and the harvest of herring eggs-on-kelp. The proposed project takes the form of recommendations for continuation, amendment, or change to an existing body or regulations in effect since November 22, 2008, (Sections 163, and 164, Title 14, CCR). It also includes regulations from Section 163.1 (herring permit transfers) and 163.5 (penalties in lieu of suspension or revocation-herring permittees), Title 14, CCR that were adopted by the Commission on March 2006 and October 2002, respectively.	SIR	07/27/2009
2006071097	Rainbow Reservoir Improvement Program Rainbow Municipal Water District Fallbrook--San Diego Project is comprised of site modifications and improvements including the installation of a floating cover and liner, inlet/outlet piping, security fencing and all associated facilities with the North & Northside Rehabilitation Project.	NOD	
2007072022	Demolition of Student Union & Construction of Student Union, Administration/Student Services/Theater, & Academic Buildings Redwoods Community College District Eureka--Humboldt The project proposes to replace a 24-inch corrugated metal pipe (CMP) with a new 24-inch CMP, place rock slope protection (RSP) within the stream channel at two locations, construct a detention basin adjacent to the stream channel, and place one log deflector structure on an Unnamed Tributary to Humboldt Bay, Humboldt County.	NOD	
2008042018	Winters Putah Creek Nature Park / Floodplain Restoration and Recreational Access Project Winters, City of Winters--Yolo, Solano The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2009-0088-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Solano County Water Agency. This project will remove a percolation dam and use processed waste concrete to help fill margins of the channel in the pool immediately below the percolation dam. The south bank abutment and first segment of the dam on the south side may optionally remain if the budget does not allow for complete removal. The dam will be removed completed or to a depth of 15 feet below summer water surface elevation. Access will occur from an existing ramp on the south bank off of Putah Creek Road that leads to a three-acre staging area formerly used for water treatment aeration ponds (Putah Creek Flats). The former pond sites will be cleared and excavated to create fill to restore 210 linear feet of floodplain on the south bank of sufficient width to access the percolation dam as needed for heavy equipment and to provide continuity of the south bank floodplain from the Winters Car Bridge to Putah Creek Flats. The staging area will be used to store imported fill for subsequent channel realignment projects throughout Winters Putah Creek Park. The derelict percolation dam foundation will be demolished, processed to remove exposed rebar and the waste concrete will be placed along the toe of the banks in the pool below the percolation dam and capped with a minimum of three	NOD

2007082071	Alviso Slough Restoration Project-Recirculated DEIR Section 3.2 (Water and Sediment Quality) Santa Clara Valley Water District San Jose--Santa Clara NOTE: Review Per Lead	EIR	07/30/2009
------------	---	------------	------------

Recirculation of a portion of the Alviso Slough Restoration Project DEIR (Section 3.2 Water and Sediment Quality) pursuant to CEQA Guidelines, Section 15088.5.

In June 2008, the District issued the DEIR for public review of its evaluation of the environmental impacts of proposed project alternatives. the project seeks to restore the historic channel width and depth of the Alviso Slough between the Gold Street Bridge and the Alviso County Marina. Comments received from regulatory agencies and the public provided additional information that would indicate a substantial increase in the severity of environmental impacts to water and sediment quality resulting from the project that would require that new mitigation measures to be proposed, and for which, in the instance of methylmercury, may not be mitigated.

2007082154	Miraflores Housing Development Plan Richmond, City of Richmond--Contra Costa A Draft EIR to assess the potential environmental impacts related to the adoption of the Miraflores Housing Development Plan, which proposes to redevelop an ~14 acre area in the Park Plaza neighborhood of Richmond with up to 336 units of affordable and market-rate housing. The project Draft EIR informs the City of Richmond decision makers, other responsible agencies, and the public of the nature of the project and its potential effect on the environment, as well as identifies mitigation measures that would reduce or avoid potentially significant impacts.	EIR	07/29/2009

2008011082	Valley-Ivyglen Subtransmission Line and Fogarty Substation Project Public Utilities Commission Lake Elsinore--Riverside NOTE: Review Per Lead	EIR	07/30/2009
------------	--	------------	------------

The project would primarily consist of the construction, operation and maintenance of a new, 25 mile 115 Kv subtransmission line to connect the existing Valley and Ivyglen Substations and the construction of the new Gogarty Substation to provide supplementary electrical services to the City of Lake Elsinore area. The project would also involve improvements to the Valley and Ivyglen Substations, tie-ins between the new Fogarty Substations and existing subtransmission and telecommunications lines and the installation of a new telecommunications line alongside the proposed subtransmission line.

2009022087	800 Magnolia Avenue General Plan Amendment and Rezoning Larkspur, City of Larkspur--Marin NOTE: Review Per Lead The applicant is requesting that the Larkspur General Plan be amended to re-designate the above referenced site form Administrative & Professional Offices to Restricted Commercial and that it be rezoned from Administrative Professional (A-P) to Restricted Commercial (C-1) to permit conversion of an existing office building to a retail store use. The subject parcel consists of. The proposed project includes a request for a 490 square-foot addition to the existing building, resulting in a total of 6,802 square feet of floor area to accommodate a proposed hardware store. Other proposed alterations to the site and structure include a new rooftop mechanical equipment and enclosure, elimination of the drive-thru facility, reconfiguration of planter areas and walkways, striping of five (5) new parking spaces, ADA access improvements, creation of a new loading access areas, and two accessory outdoor storage/utility yards. One heritage-size Redwood Tree is proposed to remain and one heritage-size Pine tree is proposed to be removed. The applicants are proposing that all truck traffic will enter the site off Bon Air Road and unload at the westerly corner of the building.	EIR	07/30/2009
2008091157	Clovis Community Medical Center Healthcare Campus Expansion Project Clovis, City of Clovis--Fresno Clovis Community Medical Center is planning a major expansion to its Healthcare Campus at Herndon and Temperance Avenues. The need for the expansion is due to the accelerating bed demand in Clovis as a result of the high rate of population growth in the area. The expansion is divided into two major phases: (1) a ten-year expansion plan for the additional facilities and improvements that will be constructed by 2018; and (2) a long range site development master plan for 25-30 years in the future. The improvements during the 10-year time span will be the subject of an amended CUP. The long range expansion plan is more conceptual in nature and is intended for use in addressing long term planning and environmental issues. Future development entitlements will be required to implement the long term plan.	FIN	
2007071091	Peyton Drive Widening Project Chino Hills, City of Chino Hills--San Bernardino The project will include widening Peyton Drive to 6 lanes from Eucalyptus Avenue north to Grand Avenue and to 4 lanes from Eucalyptus Ave south to Chino Hills Parkway/SR-142. The project will also include storm drain improvements along Peyton Dr and a crossing of the English Canyon Channel near the intersection of Eucalyptus Ave and Peyton Drive. Additionally, the project includes the extension of Eucalyptus Ave from its current T-terminus at Peyton Dr to its existing terminus ~160 meters (530 ft) to the west. These improvements to Eucalyptus Ave are proposed to be a 2 lane road matching the cross section that exists today east of Peyton Dr. These improvements to Eucalyptus Ave and related impacetes were addressed in an EIR certified by the City, are consistent with the City's General Plan Ciruclation Element, and would reduce neighborhood impacts by reducing or eliminating through traffic. This project is proposed to relive future (year 2030) traffic conditions within the limits of the improvements and provide overall circulation enhancement within the City og Chino Hills. 2009061051	Crane Valley Dam Seismic Upgrade Project Water Resources, Department of --Madera NOTE: Review per lead To seismically upgrade Crane Valley Dam to meet current Department of Water Resources Division of Safety of Dams seismic safety standards. Crane Valley Dam is owned by PG&E and is located on the north fork of Willow Creek, approximately 40 miles northeast of Fresno.	NOP	07/17/2009
2009061059	I-110 High Occupancy Toll Lanes Caltrans #7 Los Angeles, City of, Carson, Gardena--Los Angeles Project proposes to convert existing high-occupancy vehicle (HOV) lanes to high-occupancy toll (HOT) lanes on Interstate 110 from 190th Street to Adams Boulevard. Improvements to Adams Blvd. may also be constructed. The purpose of the project is better utilization of a freeway's capacity and reduced congestion. The HOT lanes achieve this through encouragement of carpooling and permitting a controlled number of additional vehicles on the freeway to use the HOT lane to the point that capacity is available and overall performance of the lane is not adversely impacted. The HOT lanes will be actively managed to maintain a level of Service of C or better.	NOP	07/15/2009
2009061060	I-10 HOT Lanes Caltrans #7 Los Angeles, City of, Alhambra, San Gabriel, Rosemead--Los Angeles Project proposes to convert an existing High Occupancy Vehicle lane to a High Occupancy Toll lane (HOT) on Interstate 10 (I-10) from Alameda Street to Interstate 605. I-10 will also be re-stripped to provide an additional HOT lane. In addition, the I-10 will also be restriped to provide one additional HOT lane for approximately 7.3 miles. The existing facility experiences travel performance problems. The project aims to maximize the efficiency of the HOV lane. The purpose of the project is better utilization of a freeway's capacity and reduced congestion. The HOT lanes achieve this through encouragement of carpooling and permitting a controlled number of additional vehicles on the freeway to use the HOT lane to the point that capacity is available and overall performance of the lane is not adversely impacted. The HOT lanes will be actively managed to maintain a level of Service of C or better.	NOP	07/15/2009
