**SUMMARY  
OF  
POSTINGS**

**June 1 – 15, 2014**

# STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **June 1 – 15, 2014**.

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov](http://www.opr.ca.gov)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Director

## CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

### USPS:

State Clearinghouse  
P.O. Box 3044  
Sacramento, CA 95812-3044

OR

### USPS/Courier Service / Hand Deliveries:

State Clearinghouse  
1400 Tenth Street, Room 113  
Sacramento, CA 95814

## INFORMATION AVAILABLE ON-LINE

The CEQA Statute and Guidelines are available through the Natural Resources Agency's website at:

<http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

## Environmental Document Filings with the State Clearinghouse 1999-2013

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at <http://www.ceqanet.ca.gov>

2013111075	Civic Center Wastewater Treatment Facility Project Malibu, City of Malibu--Los Angeles Note: 60 Day Review Period  The purpose of the proposed DEIR is to analyze the potential environmental impacts of the proposed development of the Civic Center Wastewater Treatment Facility Project. The City would develop the Project in response to the prohibition on onsite wastewater disposal systems (OWDSs, also known as onsite wastewater treatment systems, or OWTs) in the Civic Center area of the City of Malibu imposed by the State Water Resources Control Board and Los Angeles Regional Water Quality Control Board in 2010. The Project Area includes the entire area affected by the Prohibition, which consists of the Malibu Civic Center area as well as a small portion of unincorporated Los Angeles County. The Project would construct a new centralized wastewater treatment facility that would treat the wastewater flows from properties in the Prohibition Zone that will no longer be served by OWDSs.	<b>EIR</b>	07/28/2014
2014042025	San Pablo Avenue Specific Plan El Cerrito, City of Richmond, El Cerrito--Contra Costa The San Pablo Avenue Specific Plan represents a collaborative planning effort between the cities of El Cerrito and Richmond to identify a shared vision for the future of San Pablo Avenue, identify improvement needs, and adopt implementing regulations that can be applied consistently in planning area. A major goal of the planning effort is to achieve a coordinated, cohesive environment and character in the plan are through (1) a Form-Based Code; (2) multi-modal transportation goals and policies, recommended streetscape design improvements, and design standards as part of a Complete Streets chapter of the Specific Plan; (3) community facilities; and (4) infrastructure improvements.	<b>EIR</b>	07/17/2014
2014061001	Promontory Rock House Project (County Project No. 2007-02626) Los Angeles County Malibu--Los Angeles Proposed Single-Family Residence: 16,797 sf, 34-feet high (28 feet above existing grade) 3-level structure, including basement with a 1,849 sf, 6-car garage, swimming pool, landscaping, water well and septic system; grading for access driveway improvements amounts to 8,650 cubic yards (4,500 cy cut, 4,150 cy fill), about 10,000 sf ground development area.	<b>MND</b>	07/01/2014
2014061002	Canary Drive Stairway Costa Mesa, City of Costa Mesa--Orange Construction of a stairway leading from a neighborhood up a slope into Fairview Park.	<b>MND</b>	07/01/2014

2014061003	<p>ENV-2013-3835-MND / 1023 S. Beacon Avenue Los Angeles, City of Westlake Village--Los Angeles</p> <p>Construction of a hotel containing 151 guest rooms and 8,600 sf of restaurant, cafe, and banquet uses. The building would comprise approximately 151,250 gsf (including parking garage) of floor area on a 43,609.25 sf lot. The proposed building would be 81 feet in height, and four-stories with a partial fifth-story. The project will provide 113 parking spaces (75 for the guest rooms, and 37 for the restaurant, cafe and banquet, plus an additional space) within an at-grade level and subterranean parking garage that is accessed via Beacon Avenue with an exit-only driveway into the alley behind the site. The project will provide 24 bicycle parking spaces within the garage and also along the exterior port-cochere. The site currently consists of 11 separate lots. A church structure and associated surface parking lot are located on all 11 lots. The site is located within the Westlake Community Plan Area and has zone designations of R3-1 and C4-1, with General Plan Land Use Designations of Highway Oriented Commercial and Medium Residential.</p>	<b>MND</b>	07/01/2014
2014061005	<p>ENV-2013-3922-MND Los Angeles, City of --Los Angeles</p> <p>The project is the demolition of a one-story commercial building and a surface parking lot and the construction of a mixed-use building with 115 apartment units and 4,610 sf of commercial/retail space. The mixed-use building will be seven-stories, approximately 84 feet 10 inches in height and consist of 95,076 sf of floor area on a 21,619 sf site. The project will provide 101 residential parking spaces and 131 bicycle parking spaces (127 residential bike spaces and 4 commercial bike spaces) that are located at-grade and within two subterranean parking levels. Vehicular access to the parking area will be provided from the adjacent alley along the west property line. The residential and pedestrian access will be provided on Pico Boulevard and Grand Avenue. The project requests the following approvals: Site Plan Review and a haul route for the export of 14,250 cubic yards of dirt.</p>	<b>MND</b>	07/01/2014
2014061008	<p>Dickenson Ferry Road Bridge Replacement Project Merced County Merced--Merced</p> <p>The County of Merced (County) proposes to replace the existing Dickenson Ferry Road Bridge (Bridge No. 39C0095) that crosses Bear Creek, widen the bridge approaches, realign the intersection of Dickenson Ferry Road and Quinley Avenue, and relocate a small section of the O'Donnell Lateral Canal (proposed project). The primary objective is to replace the existing bridge structure to improve public safety. The existing bridge has reached the end of its lifespan and a bridge repair or rehabilitation is no longer feasible. The proposed project also serves to improve safety and increase sight distance by improving the roadway approaches to the bridge and realigning of the Dickenson Ferry Road/Quinley Avenue intersection. The current sufficiency rating of the bridge is 18.7 which is a significant drop from the previous rating of 36 in June of 2008 and is expected to continue to deteriorate at an increased rate.</p>	<b>MND</b>	07/01/2014

<b><u>Documents Received on Monday, June 02, 2014</u></b>			
2014061009	Line 96 Decommissioning Project Goleta, City of Goleta--Santa Barbara The proposed project consists of the decommissioning and/or removal of an oil production pipeline. The majority of the subsurface pipeline would be decommissioned in place while portions of the pipeline that traverse private properties owned by Goleta Union School District and the University of California Santa Barbara (UCSB) would be removed. Overall, a total of seven pipeline segments are proposed for decommissioning in place or removal. Segments 1, 2, 4, 6, and 7 would be decommissioned in place and segments 3 and 5 would be removed. Although the majority of the pipeline segments would be decommissioned in place, construction activity would occur within selected pipeline segments. Grouting would be used for segments decommissioned in place.	<b>MND</b>	07/01/2014
2014062001	Route 1/9 Intersection Improvement Project Caltrans #5 Santa Cruz--Santa Cruz Caltrans proposes to widen the intersection at Route 1 and Route 9 in the City of Santa Cruz, Santa Cruz County to accommodate additional vehicle turn lanes, bicycle lanes, and shoulders to improve traffic operations and better accommodate existing and projected traffic volumes. The primary improvements include: - On eastbound Route 1, add a left turn lane so two lanes turn onto northbound Route 9. - On northbound Route 9, add a concrete median, second traffic lane, shoulder, bike lane, and right-turn lane into the Tannery. - On southbound Route 9, add a shared through/left-turn lane and bike lane. - On northbound River Street, change the left-turn lane to a through/left-turn lane.	<b>MND</b>	07/01/2014
2014062002	California Trout Use Permit (UP-13-02) Siskiyou County Dunsmuir--Siskiyou Use permit to bring an existing unpermitted facility (i.e., private, seasonal fishing camp) into compliance with County Code. The project would entail minor additions and renovations to the existing facility. Improvements include: remodeling of existing structures to meet fire codes; grading of pathways for ADA accessibility; conversion of two existing double occupancy cabins to single occupancy cabins; conversion of an existing double occupancy cabin to a storage building; removal of the existing "outhouse" consisting of a chemical toilet; construction of two small restroom/shower facilities; installation of septic tank and leach field; construction of a double occupancy cabin; construction of a four-person cabin, and construction of a vented roof structure over the fire pit.	<b>MND</b>	07/01/2014
2014062003	Hayford #2 Replacement Project Placer County Water Agency Colfax--Placer The proposed project involves replacing the existing, elevated Hayford Flume #2 on the Boardman Canal system. The existing 175-foot-long flume would be removed and a new 435-foot-long conveyance pipeline system installed to provide a conveyance for the Boardman Canal flows. The proposed project also includes construction of a new 175-foot-long access road to facilitate access to the work area and provide better access for future maintenance activities. The pipeline will be installed in an engineered bench to traverse the nearby hillside. Hayford Flume #2 would be demolished and removed after the new conveyance system is	<b>MND</b>	07/01/2014

	operational.		
2014062004	Dinsmore Slipouts/Sinks Project (EA: 01-0B360) Caltrans #3 --Humboldt Caltrans proposes to reconstruct the roadway, remove and replace culverts and drainage inlets, remove and replace metal beam guardrail, install underdrains and horizontal drains, and place erosion control on SR 36 at post mile 35.90 in Humboldt County. Work will occur at one location both inside and outside of the Caltrans right of way.	<b>MND</b>	07/02/2014
2014061010	3121 Old Topanga Canyon Road Residential Project Calabasas, City of Calabasas--Los Angeles The project would consist of the construction of one single-family detached residence on a vacant, disturbed parcel located in the City of Calabasas, CA, at 3121 Old Topanga Canyon Road. The project will also involve selected vegetation removal, minor grading, slope stabilization, landscape installation, hardscape installation or other site work necessary to complete the home construction. The project will also include any off-site work required to extend infrastructure, such as potable water lines and electricity, to the site, any cleaning and repair of in-place drainage facilities, and any paving or re-paving of either the private driveway or Old Topanga Canyon Road required to either ensure adequate access or to repair a public or private street following installation of project-associated infrastructure.	<b>NOP</b>	07/01/2014
2014061004	Xerox Corporation Irvine CRC Former Jamboree Road Facility Toxic Substances Control, Department of Irvine--Orange DTSC is proposing to approve a Corrective Measures Proposal (CMP) pursuant to regulatory authority granted under Chapter 6.5, Division 20, California Health and Safety Code (H&SC) on the Xerox Corporation Irvine CRC Former Jamboree Road Facility site located at 18691 Jamboree Road, Irvine, CA in Orange County. The CMP will address impacts to sand, soils, soil gases, and groundwater from previous copy machine cleaning and refurbishing operations conducted on the Site. The impacted soils contain the chemicals of concern (COCs) tetrachloroethylene (PCE), trichloroethene (TCE), 1,1,1-trichloroethane (1,1,1-TCA), arsenic, and barium. The remedial activities will involve excavation and disposal of approximately 3,300 cubic yards or approximately 255 truckloads (approximately 510 round trips) of COC impacted soils at an off-site permitted facility. Approximately 4,800 yds <sup>3</sup> or approximately 465 truckloads (approximately 930 round trips) of non-impacted overburden soil will be excavated, tested, and segregated for usability as clean backfill on site or disposal at appropriate off-site permitted facility. Demolished concrete from the former building slab and footings will be stockpiled, segregated, tested, and disposed of according to their hazardous or waste category at an appropriate off-site location.	<b>Neg</b>	07/01/2014
2014061006	Well 59 Anaheim, City of Anaheim--Orange Replacement of an inactive water production well (Well 36) with a new high production water well, Well 59, that will have a horsepower of 350-400 hp, a pumping capacity of 2,000-3,000 gallons per minute, and an approximate depth of 1,400 feet. The new well will be located approximately 42 feet northeast of the	<b>Neg</b>	07/01/2014

	existing well and it will be enclosed within a roll-away enclosure. Project also includes the construction of a new block wall building for storage of two chlorine tanks and an ammonia tank (if needed, in the future). Up to six ornamental trees will be removed, but will be replaced in kind following construction. Well 36 will be destroyed per State and local regulations.		
2014052010	Electronic Freeway Sign Folsom, City of Folsom--Sacramento Note: Response To Comments	<b>Oth</b>	
	The applicant, Elliot Homes, is requesting approval of a Planned Development Permit Modification and CUP for installation of an electronic freeway sign adjacent to U.S. Highway 50 and East Bidwell Street within the Broadstone Pointe Commercial Center. The proposed 80-foot-tall freeway sign contains approximately 1,122 sf of total sign area including a 672-sf high definition electronic reader board, 450 sf of fixed sign area for major tenants of the Palladio at Broadstone Shopping Center, 150 sf of sign area for a Palladio at Broadstone Shopping Center sign, and 74 sf of sign area for a City of Folsom sign. The project site is zoned C-3 PD and the GPD for the project site is RCC.		
2014064001	Draft Final Environmental Assessment East Housing Area Solar Energy Project, Vandenberg AFB, CA U.S. Air Force Lompoc, Santa Maria--Santa Barbara Note: Review per lead	<b>Oth</b>	06/30/2014
	The Proposed Action hereinafter "Project" includes leasing land to and entering into a Power Purchase Agreement with a private developer who would design, construct, operate and maintain an unmanned photovoltaic solar energy facility at the former East Housing Area (EHA) on and for the benefit of Vandenberg Air Force Base (VAFB). The portion of the EHA selected for the Proposed Action is approximately 182 acres in size, was cleared of buildings and structures, is mostly graded, and has few environmental constraints. The EHA exhibits topographic and other locational characteristics needed for cost-effective renewable energy generation, including existing on-site presence of key infrastructure (e.g., roads, power lines, water). The Project is projected to provide almost 25 percent of VAFB's electrical energy and is not expected to export energy to PG&E's distribution system. The Project is designed to have a useful life of 20 to 30 years, although the life span could be extended by upgrades and refurbishments. The Project is expected to be operational in 2016.		
1991102012	ANNEXATION #26 Wasco, City of WASCO--KERN The Project consists of constructing a new road named University Ave beginning north of Sunset Boulevard, crossing through William Jessup University site, and extending north to Whitney Ranch Parkway.	<b>NOD</b>

1997081087	Boron Sanitary Landfill Permit Revision Project Kern County BORON--KERN 1. Increase the permitted facility boundary to 120.21 acres to include adjacent property acquired as a buffer to the active landfill. Also for use as a source of cover soil and ultimately converted to a drainage basin. 2. Adjust the disposal footprint by 0.10 acres as a result of a waste study, which determined the actual disposal footprint to be 14.1 acres rather than the currently permitted 14 acres; 3. Increase the maximum days and hours of operation of seven days per week, from no earlier than 6:00 a.m. (currently 7:00 a.m.) to no later than 5:00 p.m. (excluding county holidays); 4. Increase in the permitted disposal capacity from 1,002,819 to 1,057,000 cubic yards; and, 5. Changes in estimated closure date from 2037 to 2048	<b>NOD</b>	
1999102012	Northwest Rocklin Annexation/Sunset Ranchos Rocklin, City of Rocklin--Placer The project consists of constructing a new road named University Ave beginning north of Sunset Boulevard, crossing through the William Jessup University site, and extending north to Whitney Ranch Parkway.	<b>NOD</b>	
2009081063	Highway 246 Passing Lanes Project Caltrans #5 Lompoc--Santa Barbara Permittees proposed Project is to construct two sets of passing lanes (one eastbound set and one westbound set) along 5.3-mile section of SR-246, between the cities of Lompoc and Buelton. The two 1.7-mile sets of passing lanes will be constructed between Cabeda Canyon Road and Hapgood Road (west) and Cabeda Canyon Road to Tularosa Road (east). Both passing lanes would end near the apex of the grade near Tularosa Road. Left turn channelization at Tularosa Road and Hapgood Road (west) would be constructed to improve traffic flow and reduce potential turning movement conflicts at four locations within the Project limits. SR-246 would be widened, and extensions and/or replacements to existing culverts would be built throughout the Project, to accommodate the highway widening. The Project would also correct the road profile and realign the highway at Tularosa Road. No water diversion or work in wetted channels will be required. Six culvert undercrossing would be constructed to facilitate passage of sensitive wildlife under the highway. The existing Class III bicycle lane would be included throughout the Project limits.	<b>NOD</b>	
2009091048	Lost Hills Interchange Improvement Caltrans #7 Calabasas--Los Angeles The City of Calabasas in conjunction with Caltrans proposes to widen the Lost Hills Road overcrossing and construct a new cloverleaf on- and off-ramps east of the existing interchange. The proposed project area includes the bridge and the on- and off- ramps located at U.S. Highway 101 and Lost Hills Road Interchange.	<b>NOD</b>

2011032042	Sierra Vista Open Space Preserve - Proposed Vehicle/Equestrian Staging Areas and Multi-Use Trail Project Santa Clara County San Jose--Santa Clara Construction of a parking/staging area including 21 parking spaces for standard vehicles and two for vehicles with single-horse trailers on the south side of the summit of Sierra Road. A 0.3-mile segment of the Bay Area Ridge Trail will be built extending south from the parking/staging area to the existing Ridge Trail/Sierra Vista Trail.	<b>NOD</b>	
2013092055	PG&E Gas Transmission Line 123 Pipeline Replacement Project Roseville, City of Roseville--Placer The project consists of replacing 0.38 mile of a 12-inch diameter natural gas pipeline.	<b>NOD</b>	
2014011044	Vanderlip Grading Permit San Luis Obispo County Paso Robles--San Luis Obispo Request by Vince Vanderlip for a major grading permit to allow grading for an access road and building pad which will result in the disturbance of approximately 12,000 sf, including 875 cubic yards of cut and 875 sf of fill on a one acre parcel to build a single family residence (2,400 sf) with an attached garage (735 sf) and a 433 sf covered porch. The project will result in the permanent disturbance of 0.22 acres of kit fox habitat. The proposed project is within the Agriculture land use category and is located on the north side of Reindeer Place (5539 Reindeer Place), approximately 800 feet east of Groundsquirrel Hollow Road, east of the City of Paso Robles.	<b>NOD</b>	
2014032063	Wavecrest Coastal Trail Half Moon Bay, City of Half Moon Bay--San Mateo The Project includes a 1,698 linear-foot segment of the CA Coastal Trail and 342 linear feet of spur trails to coastal overlooks and through a Monterey cypress grove. The proposed trail would provide formal public access through the Project Area, directing users to a safe route that respects coastal resources. The proposed trail segment alignment respects coastal resources by directing foot and bicycle traffic away from wetlands and other sensitive areas, reducing multiple informal footpaths, and reducing erosion caused by informal recreation. Other Project components consist of vegetation consist of vegetation enhancement, wetland protection, and incorporation of construction measures to minimize wildlife and soil disturbance through construction methods and timing.	<b>NOD</b>	
2014069001	Lake or Streambed Alteration Agreement No. 1600-2014-0081-R1 for Nonindustrial Timber Management Plan (NTMP) 1-02NTMP-027 HUM Forestry and Fire Protection, Department of --Humboldt The Department of Fish and Wildlife (CDFW) is issuing an agreement for Project Description.	<b>NOD</b>

2014068020	Sonoma County Department of Transportation and Public Works Bodega Highway Culvert Replacement Project on Tributary to Salmon Creek Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Sonoma Project involves removing a partially collapsed and separated 36-inch metal culvert in sections, working within a trench. The culvert would be replaced with a new 48-inch plastic culvert that will accommodate the 100-year flow and resist deterioration. The inlet and outlet of the new culvert would be armored with rock slope protection (RSP). A minor amount of vegetation will be removed or trimmed around both culvert ends. No equipment will enter the channel. The channel is expected to be dry during construction, but if water is present, the site will be dewatered with a small cofferdam and the water will be discharged in an upland location, or cleanly bypass the project to maintain any flow.	<b>NOE</b>

<b><u>Documents Received on Monday, June 02, 2014</u></b>			
2014068021	Medical Office - Site Development Plan No. 1489 El Cajon, City of El Cajon--San Diego The project includes converting a single family residence to a medical office use with 5 parking spaces consistent with the El Cajon Zoning Code.	<b>NOE</b>	
2014068022	Crow Creek Vegetation and Erosion Maintenance Fish & Wildlife #4 --Stanislaus CDFW is executing a Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code. The project involves activities related to erosion control and the removal of overgrown vegetation and debris over an area approximately 1.6 acres in size and along approximately 800 linear feet of stream, within and adjacent to Crow Creek, to maintain channel capacity and prevent flooding. Activities may occur annually on an as-needed basis.	<b>NOE</b>	
2014068023	Johnson Canyon Restoration Project (1600-2014-0036-R2) Fish & Wildlife #2 Truckee--Nevada Project is limited to the restoration of erosion sites within the Gregory Creek watershed, a tributary to Donner Lake in the Truckee River Watershed. The watershed is steep, and underlain by fine volcanic soils which are highly erosive. Past land uses have caused significant drainage alterations and during storm events, erosion from the watershed is severe. Several headcuts have developed in the creek and tributaries, leading to even more erosion. The first phase of restoration work will take place in the eastern half of the watershed. The restoration generally consists of treating isolated drainage erosion "hot spots", decommissioning abandoned roads/trails, and replacing eroding trail segments with a sustainable alignment.	<b>NOE</b>	
2014068024	Sewer and Storm Drain Repair and Replacement 2013 - PW3448/Bid Number 004-14 El Cajon, City of El Cajon--San Diego This project will repair and replace selected storm drain and sanitary sewer pipes to correct maintenance concerns and aging infrastructure. The work includes the installation of new sewer pipe, new manholes, sinkhole repair, rehabilitation and lining of existing sewer and storm drain pipes and manholes, and spot repairs.	<b>NOE</b>	
2014068025	Pescadero Creek 2014 Emergency Action Fish & Wildlife #3 --San Mateo CDFW working jointly with the National Oceanic and Atmospheric Administration (NOAA) Fisheries are implementing an emergency action to open the Pescadero Creek sandbar in June 2014 to provide passage to the ocean for steelhead and to reduce water level in the lagoon to avoid or reduce the development of lethal water quality parameters. A shallow breach channel will be excavated across the sandbar at the mouth of Pescadero Creek. If the shallow breach is insufficient to provide fish passage or to reduce inundation to upper Butano Marsh, a slightly deeper breach would be excavated. The unusually early season closure of Pescadero Creek in 2014 due to drought conditions has trapped steelhead in the lagoon preventing them from entering the ocean and has led to early inundation of portions of Butano Marsh. Extremely poor (lethal) water quality is expected to develop unusually early in the summer, which would result in a fish kill that could	<b>NOE</b>

	affect both adults and smolts. Thus, this year's low water in-flow and early lagoon closure trapping adult steelhead are expected to result in substantially more extensive adverse effects than when lagoon closure typically occurs in late fall. Immediate implementation of this action is necessary to prevent or mitigate an imminent danger of trapped adult steelhead and lethal water quality parameters and is consistent with actions to be taken to CDFW to protect fish and wildlife resources described in the Governor's April 25, 2014 Drought Proclamation.		
2014068026	Bay Area Regional Advance Mitigation California State Coastal Conservancy --Marin, Sonoma, Napa, Solano, Contra Costa, Alameda, ... Project will fund The Nature Conservancy (TNC) to work with the Metropolitan Transportation Commission (MTC) to conduct technical analyses, perform information gathering and develop program guidelines for a pilot Bay Area Regional Advance Mitigation Program.	<b>NOE</b>	
2014068027	San Francisco Bay Ecosystems Climate Adaption Assessment California State Coastal Conservancy --Marin, Sonoma, Napa, Solano, Alameda, San Francisco, ... Project will fund the development of climate change adaption practices and pilot projects for the Bay Area Ecosystems Climate Change Consortium. This authorization pertains to funding to complete the Baylands Ecosystem Habitat Goals Technical Update for Climate Change.	<b>NOE</b>	
2014068028	Swimming Pool Repair Parks and Recreation, Department of --Monterey Perform repairs to the swimming pool at Asilomar State Beach and Conference Grounds to fix leaks and cracks. Work will: Drain pool. Remove Plaster. Saw cut beam down 24" and remove 180' of existing tile and coping. Perform plumbing repairs as necessary. Install pegs and dowels and new steel frame. Re-gunite pool surface. Re-plaster pool and install tile.	<b>NOE</b>	
2014068029	Dunsmuir Fuel REduction Connection 2013-RCD Forestry and Fire Protection, Department of --Siskiyou Project will involve vegetation removal within four separate units as a means to provide defensible space around homes, facilitate safe escape routes and develop shaded fuel breaks near the city of Dunsmuir. Treatment units will be established within the Shasta Retreat Area (19 acres), the South Hobo Camp area (16 acres), the Prospect Connector area (2 acres), and the North Power line area (21 acres) for a total of a total of 58 acres. The vegetation within the project area consist of dense to moderately dense stands for mature Douglas fir, Ponderosa pine, white fir, incense cedar, and black oak with moderate to dense amounts of brush species in the understory.	<b>NOE</b>

<b><u>Documents Received on Monday, June 02, 2014</u></b>			
2014068030	<p>El Cariso Village- Fuel Break Community Protection Forestry and Fire Protection, Department of --Riverside</p> <p>The intent of the project is to create a defensible fuel brake around the community of El Cariso Village, providing greater defensible space and increased protection for the community at the event of catastrophic wildfire. The community is located SW of Lake Elsinore, and has been identified by CALFIRE as being at risk to wildfire due to its terrain, high fuel loads and previous fire activity. The project is a continuation of a vegetation treatment project done in 2009. This new project is approximately 15 acre, providing protection for 58 structures. Vegetation is represented by mostly chaparral intermingled with scattered oaks and riparian vegetation. Elevation varies between ~2400 and 2750 ft. The project consists of hand cutting, removal and treatment (piling &amp; burning and/or chipping) of living and dead vegetation creating a 100 50 ft. wide belt around the community. Treatment is planned on various aspects within with predominantly moderate slopes. Tree pruning shall be performed inside the treatment zone as needed, dead, dying or diseased trees will be removed. No commercial operations are planned. These types of treatments will create fire safe conditions for the community and ease further fuel reduction work. No treatment of grass or herbaceous perennials is planned. Under direct supervision of CALFIRE captain, inmate crews will cut/prune and drag by hand the downed material to an accessible location to be piled, burned and/or chipped and broadcast onto the ground.</p>	<b>NOE</b>	
2014068031	<p>Sonoma M.A.D. Training Burn Forestry and Fire Protection, Department of --Marin</p> <p>Two prescribed burns are proposed within the Sonoma M.A.D. project area. The first is a Multi-Agency Drill (M.A.D.), consisting of broadcast burning of grasslands in order to train firefighting personnel in the proper procedures of firing techniques, mobile attack, and hand tool usage to control wildland fires. The goal of the Multi-Agency Drill is improved communication, response, and incident management by area-wide emergency partners. The training will be led by the Sonoma County Fire Chiefs, with cooperators including the CAL FIRE, Marin County Fire Department, Novato Fire District, Wilmar Volunteer Fire Department, San Antonio Volunteer Fire Department, Petaluma Fire Department, Lakeville Volunteer Fire Department, Rancho Adobe Fire Protection District, and Goldridge Fire Protection District. This training will treat approximately nine acres annually. The second prescribed burn proposed within the Sonoma M.A.D. project area is the FI-210 Wildland Fire Cause and Determination class. In the class, students work as a team to investigate and document a wildland fire, including determining the fire origin, collecting evidence, conducting interviews, and documenting the case. Eight grasslands plots, each up to a quarter acre in size (approximately 2 acres annually), will be burned during the class in order to allow the students to practice determining the origin and cause of wildfires.</p>	<b>NOE</b>	
2014068032	<p>Geotechnical Work for American River Bridge Project Caltrans #2 --El Dorado</p> <p>Analyze the existing under ground material at the bridge replacement/retrofit site, in order to prepare a foundation report. Geotechnical plans to drill approximately 5 borings. All work will be within CT r/w and vegetation removal is proposed.</p>	<b>NOE</b>

The existing building on-site will be demolished. Pursuant to LAMC Section 12.22-A, 25(c), the project includes a 35% density bonus request to provide 18 additional units, of which 6 units will be set aside for Very Low Income Households; and the utilization of Parking Option Number One which allows one parking space for each unit with 0-1 bedroom and two parking spaces for each unit with 2-3 bedrooms. The applicant is requesting two On-Menu Affordable Housing Incentives: 1) a 35% increase of the FAR for a total of 86,057 sf (2.25:1) in lieu of the maximum 1.75:1 FAR of 63,746 sf; and 2) a 11-foot height increase resulting in 66 feet in lieu of the 55-foot height limit.	<b>MND</b>	07/02/2014
2014061013	Conditional Use Permit 13-1531, Coastal Development Permit 13-1529, and Planning Commission Design Review Laguna Beach, City of Laguna Beach--Orange The applicant proposes the development and operation of a 2 unit artists' live/work structure that consists of 3,727 sf of live/work space and 2,142 sf of garage/parking area. The project site/parcel is ~10,925 sf in area.	<b>MND</b>	07/02/2014
2014062005	Sutter Maintenance Yard Expansion Project Water Resources, Department of --Sutter DWR's Division of Flood Management proposes to expand the existing Sutter Maintenance Yard (SMY) facility by 9.8 acres (in a location adjacent to the SMY) for storage of equipment and materials needed for flood maintenance and emergency response. An immature walnut orchard on the project site would be uprooted and chipped into mulch on-site.	<b>MND</b>	07/02/2014
2014062006	Exchange of Recycled Water / Application to Appropriate Water from San Joaquin River Turlock, City of Patterson--Stanislaus The City of Turlock and Del Puerto Water District (DPWD) propose to transfer up to 13,400 acre-feet per year (AFY) of water from Turlock to DPWD. The transfer would include 10,000 AFY of existing flows, which are currently discharged to the San Joaquin River, plus future flows up to a total of 13,400 AFY. The transfer would require implementation of the following actions: appropriation of San Joaquin River flows under Section 1485 of the Water Code, in an amount equal to quantities discharged by Turlock to the river; transfer of the appropriated flows to the DPWD; conveyance of the flows through the Patterson Irrigation District intake facility and Main Canal to the Delta-Mendota Canal (DMC); and conveyance of flows to DPWD through the DMC, pursuant to a Warrant Act Contract with the U.S. Bureau of Reclamation.	<b>Neg</b>	07/02/2014
2014062007	Pulga Maintenance Station Caltrans #2 --Butte Caltrans proposes to construct a covered material storage bin. cover an existing wash pad, and install an oil/water separator in the stormdrain system at the Pulga	<b>Neg</b>	07/02/2014

	Maintenance Station. The storage bin would be 64 feet wide, 23 feet deep and 15 feet high. It would store cinder and de-icing agents used in wintertime snow and ice removal operations. The bins would be located inside the maintenance station yard next to a paved outdoor storage area. An existing vehicle wash pad would have a metal roof built over it, and the existing stormdrain system would have an oil/water separator installed to treat stormwater leaving the property. All work would take place inside the maintenance yard, and would take approximately 20 days to complete.		
2001062119	Communications Hill 2 KB Home Residential/Village Center Commercial Project San Jose, City of San Jose--Santa Clara Construction of approximately 2,200 residential units of varying density, up to 67,500 sf of commercial/retail uses, parks, open space, trails, streets, stormwater facilities, and other associated supporting infrastructure on an approximately 320 acre site. Development of up to 1.44 million sf of industrial park uses. Project requires General Plan Amendments, pre-zoning, annexation, and PD zonings to allow the proposed development on Communications Hill in Central San Jose.	<b>SIR</b>	07/17/2014
2005072016	Northwest Unit 1 (EG-04-751) Elk Grove, City of Elk Grove--Sacramento The project involves a Rezone from a zoning designation of Agricultural Residential AR-5 to a zoning designation of RD-5 and a Tentative Parcel Map to split a 8.33 acre (gross) parcel into 32 single family lots. All parcels will be served by public streets.	<b>NOD</b>	
2011022039	Vallejo Ferry Maintenance Facility Vallejo, City of Vallejo--Solano Project involves ferry facility improvements to provide overnight ferry mooring, daily fueling shore power sewage disposal and light maintenance, A total of five ferry berths will be constructed using concrete floating docks with steel pipe guide piles and fenders, along approximately 400 lineal feet of waterfront, The project will result in impacts to 0.0015 acres of Longfin smelt ( <i>Sprinchus thaleichthys</i> ) and Delta smelt ( <i>Hypomesus transpacificus</i> ) habitat including permanent removal of 0.0048 acres of Longfin and Delta smelt habitat, The project is expected to result in incidental take of Longfin and Delta smelt which are designed as a threatened species and endangered species respectively, under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.	<b>NOD</b>	
2011122029	2013 Minor Modifications to the Zero Emission Vehicle Regulation Air Resources Board -- Minor amendments to the existing Zero Emission Vehicle (ZEV) Regulation will effectuate an agreement between the Section 177 states and regulated manufacturers, add provisions to ensure ZEVs are delivered for sale in CA every year, modify the fast refueling definition, add conforming and clarifying language where needed, and correct grammatical and CA Code of Regulation (CCR) reference errors.	<b>NOD</b>

2012011029	Beacon Photovoltaic Project (PP12213); CUP 11, Map 152 (EIR 13-11 JLB) Kern County Mojave, California City--Kern The Beacon Solar Project is a 250-MW solar photovoltaic facility that will be constructed on approximately 2,302 acres, included the 2,298-acre plant site, a 3.3-acre transmission line, and a 0.78-acre acceleration lane on southbound State Highway 14. The plant site will include a 5-acre collection station, electrical distribution and transmission lines, access roads and solar panels situated in five independent sites.	<b>NOD</b>	
2012092007	South San Francisco Anaerobic Digestion Facility with CNG Production South San Francisco, City of South San Francisco--San Mateo The proposed permit will allow for the continued operation of a large volume transfer station with the addition of an anaerobic digester in the city of South San Francisco. The facility currently operates under a full Solid Waste Facilities Permit issued in 2007.	<b>NOD</b>	
2013012074	Mare Island Strait Outfall Project Vallejo Sanitation and Flood Control District Vallejo--Solano This proposed project involves wastewater facility improvements to reduce energy expenditures associated with wastewater treatment operations. Approximately 30 million gallons per day of treated effluent discharges will be moved from the existing Carquinez Strait outfall to discharge into a new Mare Island Strait Outfall that will be connected to an existing outfall. The existing outfall located in Mare Island Strait directly north of the new outfall alignment will be removed following construction of the new outfall. The Project will result in impacts to 0.3 acres of Longfin smelt ( <i>Spirinchus thaleichthys</i> ) and Delta smelt ( <i>Hypomesus transpacificus</i> ) habitat including temporary impacts to 0.2 acres; the Project will permanently remove 0.1 acres of Longfin smelt and Delta smelt habitat. The project is expected to result in incidental take of Longfin smelt and Delta smelt, which are designated as a threatened species and endangered species, respectively, under CSEA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.	<b>NOD</b>	
2013062006	Certification & Test Procedures for Vapor Recovery Systems at GDFs & Cargo Tanks Air Resources Board -- The amendments to the certification and test procedures were adopted to: (1) Improve two test procedures used by ARB staff during certification of vapor recovery equipment designed for use with aboveground storage tanks (ASTs). The amendments to these test procedures address technical deficiencies that staff encountered during field testing and allow staff to use improved test equipment now available. The minor reorganization of an amendment to these test procedures also improve their clarity and readability; and (2) Revise the certification procedure and three test procedures for equipment used on cargo tanks to control gasoline vapor emissions. The revised certification procedures no longer require cargo tank vapor recovery components to be certified by ARB. Owners/operators are still required to have their cargo tanks certified annually. These test procedures were revised to be more consistent with federal Department of Transportation requirements.	<b>NOD</b>

2011124003	Linac Coherent Light Source-II U.S. Department of Energy Menlo Park--San Mateo The Linac Coherent Light Source-II Project (LCLS-II) is a proposed expansion of the existing facility at the SLAC National Accelerator Laboratory (SLAC). The proposed LCLS-II project would consist of an upgrade to the existing LCLS to enhance its experimental capabilities and perform new types of experiments. These upgrades will require dismantling and removing existing equipment and utilities within Sectors 0 through 10 of the existing accelerator housing and klystron gallery and installing new superconducting accelerator equipment. It would also require upgrades to existing LCLS equipment and utilities. It would also require upgrades to existing LCLS equipment and utilities including those contained in the Beam Transport Hall (BTH), Undulator Hall (UH), Near Experimental Hall (NEH), and Far Experimental Hall (FEH). One of the upgrades would be the installation of a second beamline, which would accommodate additional researchers and allow completion of more experiments. To provide new capabilities, SLAC may construct up to two cryogenic plants to produce extremely cold liquid helium and circulate it through the superconducting accelerator equipment via new utility connections. The primary cryogenic plant would be located near Sector 4 of the existing klystron gallery and would consist of a steel-frame building to house compressors and control rooms.	<b>EA</b>	07/03/2014

2014062010	Rohner Creek Flood Control, Habitat and Seismic Improvement Project Fortuna, City of Fortuna--Humboldt The project consists of in-stream channel improvements to Rohner Creek and Hillside Creek, the replacement of five bridges, a Rohner Creek field bypass swale and channel improvements through existing undeveloped agricultural pastures, and retrofitting of the 12th Street culvert. In-stream improvements would achieve a 10-year flood capacity for Rohner Creek and 100-year flood capacity for Hillside Creek and the Rohner field bypass swale.	<b>MND</b>	07/03/2014
2014062011	Tahoe Valley Area Plan South Lake Tahoe, City of South Lake Tahoe--El Dorado The proposed project is an Area Plan for the Tahoe Valley area. The Tahoe Valley Area Plan (Area Plan) would establish new development standards for a 335-acre area in the southwest corner of the City of South Lake Tahoe centered on the US 50 and SR 89 "Y" intersection. The Area Plan would establish land use and zoning standards and guidelines that would replace the Tahoe Regional Planning Agency's Planning Area Statement #110, South Y. The new plan will served as a mutual plan for TRPA and the City by providing direction for how the area should be regulated to achieve regional environmental and land use objectives. The Area Plan would help achieve the vision of the community in the region by implementing its guiding principles through revisions to land use regulations, development standards, and community design standards. It would encourage specific types of new development through incentives to help revitalize the community's economy, improve its aging infrastructure, diversify its local tax base, and ultimately protect the community's quality of life.	<b>NOP</b>	07/03/2014
2014062009	PA-1400085 San Joaquin County --San Joaquin Minor subdivision application to divide one 93.5 acre parcel into one 2.0-acre parcel, one 40-acre parcel, and one 51.5 acre designated remainder.	<b>Neg</b>	07/03/2014

	to minimize erosion. All work will occur in isolation of stream flow.		
2004071039	Shea / Baker Ranch Lake Forest, City of Lake Forest--Orange Changed Plan 05-14-4498 is a request to a request to modify the conditions of approval of Site Development Permit (SDP) 3-13-3198, as approved by the Director of Development Services on July 29, 2013. Specifically, Changed Plan 05-14-4498 revises the criteria regulating the plotting of homes based on the previously approved palette of the floor plan, elevations and color schemes. The new criteria shall apply in lieu of the fixed plotting represented by the Plotting Plan approved in conjunction with SDP 3-13-3198 and serves as a means of ensuring architectural variety within Tract 17632.	<b>NOD</b>	
2005031022	Vesting Tentative Map No. 6244 Taft, City of Taft--Kern This proposed Project involves the construction of a residential development project. The Project as authorized in the ITP will result in permanent impacts to San Joaquin kit fox (SJKF) ( <i>Vulpes macrotis mutica</i> ), and San Joaquin antelope squirrel (SJAS) ( <i>Ammospermophilus nelsoni</i> ) habitat. The Project is expected to result in incidental take of SJKF and SJAS which are designated threatened under the CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project Description consistent with Project reconfiguration incorporating tract and concomitant infrastructure revisions and acreage adjustments; enhances Project buildout flexibility by incorporating discrete construction, security fund, and compensatory mitigation phasing and the tracking and reporting of these elements; amends the configuration and locations of the designated remainders "A", "B", and "C" within the Project parcel that comprise the Conservation Easement site; removes the requirement to conduct a study to monitor relocated San Joaquin antelope squirrels; increases the routine and ongoing reporting requirement from 90-day reporting to monthly compliance reporting; and revises the endowment fund language to be consistent with changes in Government Code that have occurred since the issuance of the ITP. As amended, development of the Project site will result in the permanent loss of 90.33 acres (6.53 acres less than originally planned 96.86 acreS) of habitat for the Covered Species. The Amendment will result in a decrease of ground-disturbing impacts without a decrease of compensatory mitigation.	<b>NOD</b>	
2010051087	Town of Apple Valley Wastewater Reclamation Plant, City of Hesperia Wastewater Reclamation Plant, and Related Victor Valley Wastewater Reclamation Authority Apple Valley, Hesperia--San Bernardino The Project will consist of constructing the Hesperia Sub regional WRP with a mechanical 1.0 Million gallon per day treatment capacity, constructing percolation ponds, constructing a new Hesperia Raw Sewage lift station surrounded by a 6-foot high block wall, constructing approximately 730 feet of 18-inch gravity interceptor pipeline from the new Hesperia Raw Sewage lift station to the connection with an existing 12-inch sanitary sewer pipeline, constructing approximately 2,265 feet of 12-inch force main from the Hesperia Raw Sewage lift station to the Hesperia WRP, and constructing a recycled water pump station.	<b>NOD</b>

2012022015	Route 20/29 Intersection Safety Project Caltrans #3 --Lake The project is located at the intersection of State Route 20 (SR) and SR 29, west of the two of Upper Lake. The project involves construction of a roundabout, with a raised central island, which will provide connections for SR 20 and SR 29. The project also includes construction of new sidewalks and crosswalks, as well as drainage improvements. The project will permanently and temporarily impact waters of the United States.	<b>NOD</b>	
2012111083	San Joaquin River Restoration Program - SCARF and Related Management Actions Project Fish & Game #4 --Butte, Contra Costa, Fresno, Madera, Mariposa, Merced, Napa, ... The primary purpose of the Salmon Conservation and Research Facility (SCARF) is to produce Chinook salmon for reintroduction to the San Joaquin River. The SCARF also would serve as a research facility for studies related to Chinook salmon in the San Joaquin River Restoration Program Restoration Area. The SCARF would provide CDFW with the ability to use relatively small numbers of Chinook salmon eggs and juveniles collected from various donor populations to develop a broodstock. This broodstock would enable CDFW to produce a conservation stock that is genetically diverse, while minimizing impacts to source populations. The SCARF would include structures, a parking area, water supply and wastewater systems, drainage and stormwater management, an access road, up to two staff residences, and other ancillary improvements.	<b>NOD</b>	
2012121037	Hillside Estates Residential Subdivisions Project Taft, City of Taft--Kern This proposed Project involves the construction of a residential development project. The Project as authorized in the ITP will result in permanent impacts to San Joaquin kit fox (SJKF) ( <i>vulpes macrotis mutica</i> ), and San Joaquin antelope squirrel (SJAS) ( <i>Ammospermophilus nelsoni</i> ) habitat. The Project is expected to result in incidental take of SJKF and SJAS which are designated threatened under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CSEA that may occur as a result of Project implementation. Major Amendment No. 1 (Amendment) contains administrative changes including an expiration date extension; removal of the "rails-to-trails" parkway construction as a covered activity; makes changes to the Project Description consistent with Project reconfiguration incorporating tract and concomitant infrastructure revisions and acreage adjustments; enhances project buildout flexibility by incorporating discrete construction, security fund, and compensatory mitigation phasing and the tracking and reporting of these elements; amends the configuration and locations of the designated remainders "A", "B", and "C" within the Project parcel that comprise the Conservation Easement site; removes the requirement to conduct a study to monitor relocated San Joaquin antelope squirrels; increases the routine and ongoing reporting requirement from 90-day reporting to monthly compliance reporting; and revises the endowment fund language to be consistent with changes in Government Code that have occurred since the issuance of the ITP. As amended, development of the Project site will result in permanent loss of 90.33 acres (6.43 acres less than the originally ground-disturbing impacts without a decrease of compensatory mitigation.	<b>NOD</b>

2013062011	<p>PD12-0003/Green Valley Convenience Center El Dorado County --El Dorado The California Department of Fish and Wildlife is executing Lake or Streambed Alteration Agreement Number 1600-2014-0006-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Cameron Park Petroleum.</p> <p>The project is limited to the following activities:</p> <p>1) Installation of approximately 22 feet of 12-inch diameter storm water drainage pipe with construction of an associated concrete headwall type outfall into the tributary. A rocked flow dissipater to slow exit flows or storm water runoff and minimize risk of erosion will be installed at the mouth of the outfall. The outer edge of the flow dissipater will end approximately 10 feet from the ordinary high water mark associated with the tributary.</p> <p>2) Construction of a contoured retaining wall along the southern edge of the natural area. The purpose of the wall is to isolate the structures on site from the wetland/tributary natural area. The retaining wall will follow the topography of the site and will range to a height of 12 feet.</p> <p>3) Removal of nine trees temporary disturbance of some associated riparian habitat to allow for construction onsite. This project activity will be mitigated through implementation of a revegetation plan for the wetland/tributary area using local native plant species, including Fremont cottonwoods, valley oaks, sandbar willow, arroyo willow, Gooding's black willow, and various shrub plants from the following genera: Heteromeles; Ceanothus, and Fremontodendron.</p>	<b>NOD</b>	
2014021042	<p>Tehachapi East Afterbay Turnout Pump Station Project Antelope Valley-East Kern Water Agency Gorman--Los Angeles Construction of a new pump station off the California Aqueduct to include a single vertical turbine pump with provisions for a total of 4 with an ultimate flow capacity of 4,500 gpm. Also including installation of 12 and 24-inch piping, valves, meter, appurtenances, electrical and controls equipment.</p>	<b>NOD</b>	
2014042039	<p>San Jose / Santa Clara Regional Wastewater Facility Cogeneration Project San Jose, City of San Jose--Santa Clara The Project would include the installation of up to four 3.125 MW natural gas/biogas fired reciprocating engines (up to 12.5 MW total). The proposed engines would meet Achieved in Practice emissions standards maintained by the Bay Area Air Quality Management District (BAAQMD). The proposed engines would be housed in a new, 36,300 square foot (330 feet x 110 feet) Cogeneration Building that would be constructed within the Project area near Zanker Road. The Cogeneration Building would be constructed as a high-bay concrete design, with a height similar to the existing Blower Generation Building. The proposed Cogeneration Building would also include a new stack for air emissions.</p>	<b>NOD</b>

2014062013	Napa River Restoration: Oakville to Oak Knoll Project Napa County Yountville--Napa The Proposed Project would replace the existing 23 feet wide by 92 feet long bridge with a new approximately 33 feet wide by 120 feet long bridge. The new bridge would be a 2-span, cast in place conventionally reinforced concrete box girder bridge structure, with two abutments with retaining walls, and one pier in the river channel. The new structure would carry two lanes of traffic on approximately the same horizontal alignment. The bridge would pass over the Napa River at a higher elevation (approximately 3 feet higher) to meet current hydraulic design standards. The road approaches on either side of the bridge would be widened and raised. The west road approach would be about 293 feet long and the east approach would be about 261 feet long. Once the bridge portion of the Proposed Project is complete the river channel and banks would be re-graded to accommodate fish passage during low flows and rock slope protection would be installed on both channel banks to protect the bridge abutments from scour and erosion. Other Project elements include modification to an existing culvert and two private driveways, and traffic safety features such as bridge rails and guardrails.	<b>MND</b>	07/07/2014
2014062014	Use Permit #14-01, American Solar Utility LLC Tehama County Red Bluff--Tehama American Solar Utility is proposing to establish a 1.5 MW Wholesale Photovoltaic Solar - Sheep Grazing farm on a 10 acre portion of a 142 acre project parcel in an AG-2; Agriculture/Valley District. The project is location in an area identified in the General Plan as Valley Floor Agricultural. The proposed use is allowed upon securing a use permit. Landowner, Rick Stemple, is leading the property to American Solar. The property is currently within the Williamson Act Contract and managed as an orchard. The project will utilize a total of 10 acres; 3.2 acres of the proposed project will be covered by the solar panels; the remaining 10.8 acres will be designated for sheep grazing. The project area is less than 10% of the total parcel.	<b>MND</b>	07/07/2014

	discharges resulting from mandatory system-development and system-maintenance activities conducted to fulfill statutory requirements under the federal Safe Drinking Water Act of the California Health and Safety Code. The exceptions are for discharges from existing drinking water systems that have been occurring and will continue to occur, and for discharges of new future drinking water systems that result in the same type of discharge. The exception applies to mandated drinking water systems discharges into all waters of the U.S. statewide. The exceptions are not to Total Maximum Daily Loads of either state or federal regulations.		
2010051075	The Shops at Capistrano San Juan Capistrano, City of San Juan Capistrano--Orange The applicant is proposing the development of a 3.18-acre parcel at the northeast corner of Ortega Highway and El Camino Real in the City of San Juan Capistrano. The proposed project consists of a retail commercial development that consists of approximately 45,000 sf of commercial services, retail and restaurant uses, professional office and a specialty market within four single-story, free-standing buildings and one two-story building located on the west side of the property, along El Camino Real. The building heights range from 22 feet to 41 feet. The project includes approximately 207 parking spaces, and vehicular access will be provided via three driveways located at Spring Street, El Camino Real, and Ortega Highway. The buildings will be constructed in a Spanish Electric architectural style. This project will provide pedestrian access through a plaza to encourage public use between The Shops at Capistrano and the Historic Town Center. The project will require approximately 15,000 cubic yards of fill in order to prepare the site for development. The applicant is requesting approval of the following applications: General Plan Amendment; Rezone; Tentative Parcel Map; Architectural Control; Grading Plan Modification, Sign Program; Tree Removal Permit; and Floodplain Land Use Permit.	<b>NOP</b>	07/07/2014
2014061015	Key Site 3 Santa Barbara County --Santa Barbara The proposed project is a request by John Franklin, as agent for the owners, for approval of a Vesting Tentative Tract Map (VTTM), General Plan Amendment, Rezone, and Development Plan entitlements for the 138.6-acre Key Site 3 (the VTTM request includes the 8-acre portion that was rezoned to MR-O as part of the Focused Rezone Program). The project proposes to develop 125 single-family units in a variety of product (small lot, detached cluster homes, and larger single family residences) on the northern portion of the site. In addition, approximately 106 acres (76%) of the site is proposed as open space. The open space area includes the upper mesa bluff area, Orcutt Creek, private parks and trails, public multi-use and hiking trails, landscaped basins, and natural and restored habitat on hillsides and along the creek.	<b>NOP</b>	07/07/2014
2014061016	Change of Zone No. 07544, EIR No. 500 and Tentative Tract Map No. 36030 Riverside County --Riverside The proposed project being considered by the County consists of a single family residential subdivision with a total of 345 lots, including 314 residential lots on 242 acres located southerly of the community of Nuevo, Riverside County. The existing General Plan designations are Low Density Residential (0.4 to 2.0 Dwelling Units (DU) per acre) and Rural Mountainous (p/1 DU/Acre). Tentative	<b>NOP</b>	07/07/2014

2010082063	Altamont Pass Wind Resource Area Repowering; Golden Hills Project; Patterson Pass Project Alameda County Livermore, Tracy, Unincorporated--Alameda The program is the anticipated approval by Alameda County of new CUPs to allow new windfarm uses in the APWRA, as permitted by both the East County Area Plan (ECAP) and the County Zoning Ordinance. Windfarm uses are conditionally permitted in the "A" (Agriculture) zone district, which encompasses the entire program area, and in areas designated under the ECAP as Large Parcel Agriculture (LPA), which applies to almost all of the program area.	<b>EIR</b>	07/21/2014
2013071058	Marian Catholic Property Residential Project San Diego, City of San Diego--San Diego The proposed Marian Catholic Property Residential Project involves the construction of a 175-unit single family residential development, landscaping, parkways, and supporting infrastructure on an 18-acre site located on APN 624-301-16, 624-301-17, 627-301-18, and 627-301-19. In order to implement the project, the existing buildings on the project site associated with the site's previous use as a private Catholic high school, would be demolished to allow the construction of the new residential development.	<b>EIR</b>	07/21/2014
2013121089	Spieker Senior Development Project San Juan Capistrano, City of San Juan Capistrano--Orange The proposed project includes the development of a self-contained CCRC designed for residents over the age of 60. The project proposes to change the General Plan land use designation of the approximately 35-acre project site from Agri-Business to Specific Plan/Precise plan, and to rezone the entire project site from Agri-Business to SP/PP District. The CCRC would include two main components: independent living units, for residents capable of residing in the community without daily assistance; and a Health Care Center, for residents requiring daily assistance or daily medical attention. Amenities include a clubhouse with two dining venues, various recreation and art rooms, a beauty salon, a community pool, a recreation center containing an exercise and fitness center, and outdoor recreation areas, including a putting green, tennis court, and open space areas.	<b>EIR</b>	07/21/2014
2013092048	The Landing at Walnut Creek Apartments Walnut Creek, City of Walnut Creek--Contra Costa The proposed project would involve construction of 178 market-rate rental apartment units in one building. The project would demolish the existing residential buildings & remove all existing vegetation. Project requires a General Plan Amendments to change in the designation from MFVH (Multifamily Very High, 30.1-50 dwelling units per acre) to MFSH (Multifamily Special High, 50.1-100 du/ac) and General Plan 2025 Height Map change from 50 feet to 60 feet, consistent with the Measure A height limit of 89 feet. Project requires a Zoning Ordinance Amendment from Multi-Family Residential (M-1) to Planned Development (PO) to accommodate the higher density.	<b>FIN</b>

2014061021	Morningstar Christian Chapel Conditional Use Permit No. 12-014 [M-1] and Development Review Application No. 14-042 Whittier, City of Whittier--Los Angeles Conditional Use Permit No. 12-014 [M-1] will permit the modification to an approved site layout for the Morningstar Christian Chapel complex and to allow for an increase to the overall occupancy capacity of the church facility. Development Review Application No. 14-042 will permit the expansion of the single-story sanctuary building and allow for the construction of a new four-level parking garage located at 16205 Leffingwell Road.	<b>MND</b>	07/07/2014
2014061022	Village Park Recycled Water Project Olivenhain Municipal Water District Encinitas--San Diego OMWD proposes to construct and operate approximately 34,860 feet (6.6 miles) of 6-, 8-, and 12-inch-diameter underground recycled water pipelines, and a pump station within existing roads and utility easements to improve connectivity and provide multiple sources of recycled water to the Village Park area within OMWD's existing service area. The use of recycled water for irrigation to HOA common areas, schools, parks, streetscapes, and golf courses within the Village Park area and vicinity would help offset the increasing demand for potable water. Construction activities are expected to begin in late 2014 and would require approximately 18 months to complete.	<b>MND</b>	07/07/2014
2014061023	Specific Plan Amendment Case No. 69, Map No. 230; (b) Amendment of Zoning Map No. 230, Zone Change Case No. 119; Rosamond 40th Street, LLP by Cornerstone Engine Kern County --Kern The applicant is requesting: (a) An amendment to the Rosamond Specific Plan from Map Code(s) 5.3/2.5 (Residential - Maximum 10 Units/Net Acre - Flood Hazard) to Map Code(s) 6.2/2.5 (General Commercial - Flood Hazard); and, (b) A change in zone classification from R-1 FPS H (Low-density Residential - Floodplain Secondary Combining - Airport Approach Height Combining) to C-2 PD FPS H (General Commercial - Precise Development Combining - Floodplain Secondary Combining - Airport Approach Height Combining). The request is to facilitate future general retail commercial development of the project site. While, no development is currently being proposed, the project proponent has provided a conceptual site plan of how future commercial development may occur. As proposed, water supply and sewage disposal would be provided by the Rosamond Community Services District. Access to the site would be provided by Rosamond Boulevard and 40th Street West, both of which are designated as arterial alignments, by the Circulation Element of the Rosamond Specific Plan.	<b>MND</b>	07/07/2014
2014061024	Water Supply and Distribution Improvement Project Pixley Public Utility District --Tulare The project proposes to improve the potable water system which includes two new wells, installing new larger distribution pipes, and constructing a storage tank site connecting to the existing distribution system. The project also included modifying two existing wells to meet the MCL requirements, and abandoning the existing tank and two existing wells.	<b>MND</b>	07/07/2014

2014062020	385 Sherman Avenue Palo Alto, City of Palo Alto--Santa Clara The project would demolish an existing 21,600 sf office building and construct a new three-story mixed-use building with two levels of underground parking. A total of four residential units and 51,020 sf of office space would be constructed.	<b>MND</b>	07/07/2014
2014062018	Russell Ranch Project Folsom, City of Folsom--Sacramento The proposed project site is located within the FPASP in the City of Folsom. The proposed project requires the following entitlements: General Plan Amendment, Specific Plan Amendment, Development Agreement, Vesting Tentative Large-Lot and Small-Lot Subdivision Maps, Planned Development Permit, and Affordable Housing Agreement. The proposed land use changes would result in a decrease in Single Family to 281 units, the addition of 480 new Single-Family High Density units, a decrease in Multi-Family Low Density to 114 units, the elimination of Multi-Family Medium Density, the elimination of General Commercial, and an increase in Parks to 8.9 acres, Open Space to 176.4 acres, and Public/Quasi-Public to 14.3 acres from the land uses approved in the FPASP.	<b>NOP</b>	07/07/2014
2014062021	2015-2023 Housing Element Update Orinda, City of Orinda--Contra Costa The proposed project is an update of the City's General Plan Housing Element for the 2015-2023 planning period. A Government Code Section 65302(c) mandates that each city shall include a housing element in its general plan. The housing element is required to identify and analyze existing and projected housing needs, and include statements of the city's goals, policies, quantified objectives, and scheduled programs for the preservation, improvement, and development of housing.	<b>NOP</b>	07/07/2014
2014062019	Osborn Thalweg Gold Prospecting/Mining Project Fish & Wildlife #1 --Siskiyou Mr. Phillip Osborn proposes to excavate underwater riverbed material along or near the thalweg (the line of lowest elevation) of the Klamath River for the exploration and recovery of gold between July 1 and September 30 of each calendar year. River bottom material will be hand excavated using a pick, shovel and pry bar to assess riverbed material for gold content on a floating work platform. Excavated riverbed material will be sampled and assessed on the floating platform using gold pans and sluice box. If the samples yield gold, paydirt will be processed on shore using a sluice box. At no time will the riverbed material be collected by the use of a suction dredge hose and nozzle, nor will the use of any motorized vacuum or suction device be used as part of the instream mining operation.	<b>Neg</b>	07/07/2014

	succeeding year for the purpose of fish and wildlife enhancement.		
2007102135	Vargas Plateau Regional Park Land Use Plan East Bay Regional Parks District Fremont--Alameda The District's Board of Directors adopted the Mitigated Negative Declaration (2008 MND) and approved the Vargas Plateau Regional Park Land Use Plan on April 1, 2008 to open then, 1,030-acre land banked property in the Fremont hills. The 2008 MND evaluated the impacts of implementing the Land Use Plan for Vargas Plateau Regional Park, which includes the development of staging areas, trails, facility development, campgrounds, infrastructure improvements, resource management, and restoration activities. The 2008 MND did not identify any potentially significant environmental impacts associated with the construction, operation, use, or maintenance of these project elements that cannot be mitigated to a less-than-significant level. A Mitigation Monitoring and Reporting Program was adopted as part of the 2008 MND and includes mitigation measures associated with the protection of listed species and their habitats. The District filed a Notice of Determination for the 2008 MND on April 2008. In preparation of developing the Phase I project for implementation, District staff became aware of new information relative to protected species that required updating the 2008 MND.  The Addendum has been prepared in order to identify and analyze minor changes that result from new information relating to the 2008 MND: (1) the listing of California tiger salamander ( <i>Ambystoma californiense</i> ) as a State Threatened species in 2010; 2) the potential for callpipe silverspot butterfly ( <i>Speyeria callippe</i> ) in the project area; and 3) the adoption of Avoidance and Mitigation Measures included in the 2010 East Alameda County Conservation Strategy (EACCS), and the Minimization Measures included in the 2012 EACCS Biological Opinion for these species.	<b>NOD</b>	
2008072060	Natomas Levee Improvement Program, Phase 3 Landslide Improvements Project Sacramento Area Flood Control Agency Sacramento--Sacramento, Sutter To remove and replace the Pritchard Lake Pumping Plant (PLPP) and tie-into the existing 72-inch diameter discharge piping through the levee on the left (east) bank of the Sacramento River.	<b>NOD</b>	
2012051060	E.A.R. 11-36 Precise Plan of Design No. 2207 Rialto, City of Rialto--San Bernardino The California Department of Public Health (Department), as the responsible agency, will be issuing a water supply permit. The Fontana Water Company proposed project includes the operation of well F-10D.	<b>NOD</b>	
2013042029	Wastewater Treatment Plant Enhancement Project Biggs, City of Biggs--Butte City filed Wastewater Change Petition WW0073 with the State Water Resources Control Board to change the purpose of use and place of use of 0.46 cubic feet per second of treated wastewater. The treated wastewater currently discharged to Lateral K which discharges to Butte Creek, thence the Sacramento River would be discounted. The proposed project will involve the construction of an effluent pump station at the existing WWTP, an underground transmission pipeline from the existing WWTP to the irrigation water delivery system, and an irrigation tailwater	<b>NOD</b>

	collection system.		
2013042067	Capital Conservation Bank Yolo County Davis--Yolo To create approximately 130 acres of perennial marsh and and upland habitat inside of the Yolo Bypass.	<b>NOD</b>	
2013091002	UNFI Warehouse and Distribution Facility EIR Gilroy, City of Gilroy--San Benito General Plan Amendment (GPA) to end Camino Arroyo at Venture Way and re-align future extension of Cameron Blvd. and Venture Way. Planned Unit Development (PUD) Rezoning (of APNs 841-17-100, 841-17-101, 841-17-104 through 112, 841-17-115, and 841-84-001 through -009) to recognize the GPA changes and modify flooding, lighting, and sign criteria. Architectural and Site Permit for construction of a ~800,000 s.f. warehouse and distribution facility, a ~10,000 s.f. truck maintenance building and associated fueling, parking, landscaping and storm-water treatment facilities on a ~53-acre site (APNs 841-17-111, -112, and -115).	<b>NOD</b>	
2013122050	The 2014 Fisheries Restoration Grant Program Fish & Wildlife #2 --Mendocino The purposed of the project is to restore anadromous fisheries habitat in non-tidal reaches of rivers and streams, improve watershed conditions impacting salmonid streams, and improve the survival, growth, migration, and reproduction of anadromous fish. The CDFW, through FRGP, uses funds mandated to restore degraded anadromous fish habitat in coastal streams for a variety of salmonid habitat restoration projects. Restoration projects must be consistent with procedures found in CDFW's "California Salmonid Stream Habitat Restoration Manual".	<b>NOD</b>	
2014021050	Rancho Guejito Farm Road Restoration and Revegetation Plan San Diego County Escondido--San Diego CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2014-0006-R5) to the project applicant, Ranch Guejito Corporation. Prior to submitting the Notification of Lake or Streambed Alteration to CDFW, applicant graded a road approximately 6,040 linear feet in length, crossing five unnamed tributaries to Guejito creek, with loose fill materials being pushed into the channels. Project activities include the removal of this fill, and restoration of the stream beds, banks, and channels to as near their pre-grading condition as possible. The project also includes remedial grading along one portion of the fill slopes from prior grading activities, with rock to be placed at the base of the fill slopes outside the stream bed to help stabilize the base of the slope. Pursuant to Regional Water Quality Control Board Cleanup and Abatement Order No. R9-2013-009, habitat restoration and establishment will be conducted within a degraded portion of the Cloverdale Creek (restoration site).	<b>NOD</b>

	collect fisheries independent data on a variety of species including blue, mako and thresher shark, swordfish; albacore; and coastal pelagic species (Pacific mackerel, jack mackerel, Pacific sardine, northern anchovy). The SWFSC will use monofilament. The long line and troll gears will be deployed in deeper waters, and the midwater trawl and hook-and-line gears will be deployed at the surface.		
2014068117	Biennial Pacific Hake, Merluccius productus, Integrated Acoustic and Trawl Survey Fish & Wildlife, Eastern Sierra-Inland Deserts Region -- The Section 2081(a) permit authorizes NWFSC to take white shark during the course of its survey subject to terms and conditions set forth in the permit. The purpose of this survey is to continue a coastwide time series of estimates of abundance and age composition to be used in the Pacific hake stock assessment which estimates stock abundance. The NWFSC will use a combination of acoustic sampling using a Simrad EK60 echo sounder system at depths of 100-4920 feet (30-1500 meters) while traveling at 8-10 knots (15-19 kilometers per hour). After receiving an acoustic signal, a trawl net will be deployed to verify species composition.	<b>NOE</b>	
2014068118	Well Replacement and Radionuclide Contamination Feasibility Study Public Health, Department of --Madera The Department of Public Health (Department) is the lead agency. The Department's Safe Drinking Water State Revolving Fund Program is providing state funds for the Project. The Cascadel Mutual Water Company proposes a feasibility study to determine the best option for providing water to its residents that does not exceed the State's MCL in uranium.	<b>NOE</b>	
2014068119	Drought Emergency Grant Funding Request for Le Grand Community Services District Public Health, Department of --Merced The California Department of Public Health (Department) is a responsible agency for this project. The Department's Public Water System Drought Emergency Funding Program is providing state funds for the project. Le Grand CSD proposes test and develop a well owned by a nearby developer which could replace Well 2. The District also plans to install equipment in Well 4. The repairs to Well 4 will include the pulling of the pump, motor, column and examining the equipment to replace worn bearings, replace the bowls, re-wire the motor and provide a new foot valve. The District will also repair Well 1A. The repairs will include the installation of a new foot valve and replacement of the bearings in the column.	<b>NOE</b>	
2014068120	California Water Service Company - Lakeland, New Well No. 7 Public Health, Department of --Kern The California Department of Public Health (Department) as the lead agency will be issuing a water supply permit. 	form of riprap along the embankment to reduce depths of excavation.		
2011101024	115 kV South Transmission Line and Substation Project Merced Irrigation District Merced, Madera--Merced MID plans to build approximately 14 miles of 115 kV transmission lines, a new 230/115 kV substation, and 0.7 miles of 230 kV transmission lines to connect existing MID 115 kV lines on SR 99 west of the City of Merced to the PG&E Wilson Substation on the southeastern side of the city. The proposed route would follow Franklin Road south to Rice Road, turn east and follow Reilly Road, cross SR 99, follow McHenry Road, turn north, and run along Tower Road to the substation site at Tower Road and Gerard Ave. The 230 kV lines would continue on the west side of Tower Road to the Wilson Substation on Childs Ave. As a result of the project, PG&E would expand the Wilson Substation in Merced, expand the Borden Substation southeast of the City of Madera, and reconductor the 6-mile 230 kV Borden Gregg transmission line in Madera County. MID is also considering locating the new 115 kV lines along Gurr Road or the Thorton Alignment, instead of the Franklin Alignment, and these routes will also be considered in the EIR.	<b>NOP</b>	07/08/2014
2014061027	Highgate Estates Thousand Oaks, City of Thousand Oaks--Ventura A Tract Map application has been submitted by Jemstreet Properties to allow the construction of four single family homes on 23.77 acres of undeveloped land on the border between Thousand Oaks and Westlake Village. Parcel areas range from a minimum of 1.31 ac to 2.6 ac. Also associated with the proposal are oak tree and landmark tree permits to allow removal and/or encroachments within the protected zones of an, as yet, unknown number of oak and landmark trees. Access is to be provided through the City of Thousand Oaks via an extension of Highgate Road. The project site is vacant and is bounded by natural open space owned by the Conejo Open Space Conservation Agency to the north, west and a portion of the east side and land developed with single family homes south of the site.	<b>NOP</b>	07/08/2014
2014061029	Regional Transportation Plan and Mono County General Plan Mono County Mammoth Lakes--Mono In 2000, the County comprehensively updated its General Plan Land Use Element. The revisions focused on three key goals: to integrate the zoning & development code into the General Plan, to amend the Land Use Plan accordingly, and to upgrade Land Use maps to provide greater detail for all areas of the county. As part of these revisions, the County prepared a new EIR (showing the same impacts and mitigations as identified in the 1993 EIR) and also updated its MEA. The 2001 MEA contained reformatted text and extensive updates to the environmental baseline data.	<b>NOP</b>	07/08/2014

	M2-2 Zone. The project includes the construction of four industrial buildings consisting of Building 1: 115,973 sf and 124 parking spaces, Building 2: 133, 68042, 366 sf and 72 parking spaces, Building 3: 116, 663882 sf and 97 parking spaces, and Building 4: 144, 39722, 025 sf and 106 75 parking spaces. The applicant is requesting the merger of the right-of-way of 40th Place and the two alleys north and south of 40th Place.		
2014061031	Centerpointe 78 Commercial Center Escondido, City of Escondido--San Diego The project proposes to demolish the existing automotive dealership and construct a market and a restaurant pad. The market building would be approximately 43,500 sf, 30 feet tall, and located in teh western portion of the site. The 3,200 sf restaurant pad would be in the eastern portion of the site with no building plans proposed at this time. The market uses would consists of a local grocery store, and the proposed restaurant would be a quick-service restaurant with a drive-thru.	<b>NOP</b>	07/08/2014
2014062023	Draft Climate Action Plan Pacifica, City of Pacifica--San Mateo The project is a Draft Climate Action Plan (CAP or Plan) for the City of Pacifica (City). The Plan is proposed for adoption by the City Council following the required public comment period. The proposed plan provides an inventory of Green House Gas (GHG) emissions from within the community, a forecast of future emissions, and strategies for reducing emissions to 1990 levels by the year 2020, as required by the Global Warming Solutions Act of 2006 (AB32). The purpose of the Plan is to guide the development, enhancement, and implementation of actions and strategies to reduce GHGE in Pacifica, using the variety of strategies described within the Plan.	<b>Neg</b>	07/08/2014
2014062028	Neary Lagoon Vegetation Management and Sediment Removal Project Santa Cruz, City of Santa Cruz--Santa Cruz The proposed project is to conduct annual marsh vegetation removal and sediment dredging in Neary Lagoon to reduce sedimentation and increase lagoon depths in order to: 1) improve water circulation and flow rates; 2) improve water quality; 3) reduce the proliferation of vegetative (tule) growth; 4) improve habitat; 5) provide access for the tule removal equipment and to prevent the lagoon from "filling" up. Vegetation removal will be done to achieve a 1:1 ratio of open water to marsh with locations and extent of work to vary annually, based on vegetation conditions and growth rates. Depending upon the accumulation of sediment over the winter months and resulting lagoon depths, up to 3,600 cubic yards of sediment may be removed each year that dredging is conducted.	<b>Neg</b>	07/08/2014
2001031137	Tonner Hills Planned Community Orange County Brea--Orange The California Department of Public Health (Department), as the responsible agency, will be issuing a water supply permit. The City of Brea proposed project was for the construction of a 2-million gallon reservoir, Tonner Hills Reservoir, and appurtenant facilities.	<b>NOD</b>

<b><u>Documents Received on Monday, June 09, 2014</u></b>			
2014021010	Location and Development Plan 13-05 and Conditional Use Permit 13-04 Adelanto, City of Adelanto--San Bernardino The proposed project is for the construction and operation of a 27 megawatt photovoltaic power generation facility on 206 acres of land in two phases. Phase one consists of 155 acres and produces 20 megawatts, phase two consists of 51 acres and produces 7 megawatts.	<b>NOD</b>	
2014022070	Bringhurst Planned District (PLN2013-00103) Fremont, City of Fremont--Alameda The proposed project includes a rezoning to a Planned District (P-2013-103), Vesting Tentative Tract Map 8158, Private Street and Preliminary Grading Plan to facilitate development of a residential subdivision of 24 single family homes (23 new homes and one relocated eligible historic home) on an approximately 4.7 acre. The project would include construction of a paved multipurpose trail at the top of the northern bank of Mission Creek, and would implement a riparian restoration project (a stream bank restoration and stabilization plan) along the creek bank adjacent to the project site.	<b>NOD</b>	
2014031047	Location and Development Plan 13-06 and Conditional Use Permit 13-05 Adelanto, City of Adelanto--San Bernardino The proposed project is for the construction and operation of a three megawatt photovoltaic power generation facility on 20 acres of a 40 acre property.	<b>NOD</b>	
2014041062	Vineland Avenue Widening Project Kerman, City of Kerman--Fresno The proposed project consists of the widening of Vineland Avenue, from Kearney Boulevard to 700 feet north, to the ultimate width for a City of Kerman standard collector street (84 foot right-of-way; 64 feet from curb to curb). The widening will consist of the construction of an 8 foot parking lane and 5 foot bike lane in each direction. The proposed project will also include the construction of concrete curb & gutter, concrete sidewalk, and concrete improvements at the intersection of Vineland Avenue and Kearney Boulevard. Storm drain facilities will be installed to serve the widened roadway. Right of way acquisition will be required from the property along the west side of Vineland Avenue within the project limits.	<b>NOD</b>	
2014041100	California Aqueduct 2014 Pump Back Program Dudley Ridge Water District Hanford, Bakersfield--Kings, Kern The project proposes to install pumps at two Check Structures along the California Aqueduct. This will allow the District, along with the Participating Districts (Belridge Water Storage District, Berrenda Mesa Water District, Lost Hills Water District, and Semitropic Water Storage District) to transport, via reverse flow when necessary, previously stored water into the Aqueduct from May 2014 through April 2015, where it would then be accessible upstream to the District as well as the Participating Districts. Project implementation will allow the District, along with Participating Districts to mitigate water shortage impacts resulting from both the 2013-2014 drought and the currently projected zero percent State Water Project (SWP) water allocation.	<b>NOD</b>

	include pruning of trees as appropriate to remove mistletoe and dead or hazardous limbs using a chainsaw and a crane. Pruned limbs will be removed and hauled off-site. Issuance of a Streambed Alteration Agreement No. 1600-2014-0057-R3 is pursuant to Fish and Game Code Section 1602.		
2014068132	Sixth Street Pedestrian Facilities Project Hanford, City of Hanford--Kings The Sixth Street Pedestrian Facilities Project will include the installation of curb, gutter, and sidewalk, electrical conduit for future decorative street lights, and transitional paving along Sixth Street from the Douty Street to White Street. This project will improve drainage and provide pedestrian accessibility along Sixth Street.	<b>NOE</b>	
2014068133	Eastside Berryessa Training Burn Forestry and Fire Protection, Department of --Napa Proposed project consists of 80 acres of broadcast burning in grass/oak woodland along the northeastern side of Lake Berryessa. The project is within the Lake Berryessa Wildlife Area on Bureau of Reclamation (BOR) land, 18 miles west of the town of Winters, CA. The burn activities will be led by the CAL FIRE, with the Napa County Fire Department participating as a partner. The burn will be ignited in the grassland portions of the project area. Low-intensity fire will be allowed to creep through the oak understory if fuel loading is minimal and project managers deem appropriate. Fire control lines will be created by removing vegetation down to bare mineral soil along the perimeter of the prescribed burn to protect private property, lakeshore habitat, and other sensitive areas. Control lines will be created at least 50-100 feet away from the lake. Vegetation will be retained between control lines and the lake, which will act as a buffer strip to filter water and trap any sediment that may result from project activities before it reaches the water. Trees will be limbed to provide eight feet of clearance from the ground and hand lines will be created around downed trees and young trees to protect them from the fire. An existing gravel road will act as the eastern control line for the project area. control lines will be created by the CDCR crews utilizing hand tools and by a CAL FIRE Type II Bulldozer.	<b>NOE</b>

<p>authority to require land use restrictions in the form of covenants, and the exceptions for properties that have contamination left in place. The regulations require DTSC to set forth and define land use restrictions in a remedy selection document, such as the Corrective Measures Proposal, when contamination is left in place. The purpose of the covenant is to protect public health and safety, and the environment from contaminated land when contamination will remain at the property at levels which are not suitable for unrestricted use of the land.</p> <p>The activity involves administrative preparation and development of a Land Use Covenant (LUC) document to restrict the property to industrial use only. The LUC will be recorded in the County of San Diego. The LUC will specify certain activities that will not be allowed at the site such as no drilling, and disturbance of the concrete floor, and the facility cannot be used for residence, hospital or day care center. The epoxy coating on the exterior block wall will also be maintained.</p>	<b>NOE</b>			
2014068137	<p>Replace Septic System Parks and Recreation, Department of --Los Angeles</p> <p>Project is to repair the Yucca Cottage septic system. Roots from the tree of heaven on the west side of Yucca Cottage have broken into the septic line and blocked it. This is causing sewage to back up into the toilet and sinks in Yucca Cottage. This project involves replacing the broken septic pipes between the kitchen and bathroom in Yucca Cottage and the cesspit located under the gravel driveway on the west side of the building. The contractor will saw cut and remove a 4-foot by 6-foot piece of the concrete at the northeast corner of Yucca Cottage in order to access the connection where the kitchen and bathroom sinks join the main septic line. The contractor will excavate at this location and replace the 4-inch by 2-inch connection and cast iron manifold. The contractor will also excavate the gravel driveway at the northwest corner of Yucca Cottage to access the place where the septic line changes direction from west/east to north/south. The contractor will also excavate the gravel driveway approximately 50 feet south of the direction change to access the cesspool. The septic pipes between the excavations will be replaced using trenchless technology. the contractor will backfill all the excavation holes. State Parks staff will replace the concrete with in-kind materials.</p>	<b>NOE</b>		
2014068138	<p>Increase in Hours of Operation for the Visalia Landfill Tulare County Visalia--Tulare</p> <p>Pursuant to Tulare County Ordinance Code Section 4-03-1135, the County of Tulare has the authority to determine and set hours and days of operation for landfills owned/operated by the County of Tulare. Beginning July 1, 2014, or as soon thereafter when its Solid Waste Facility Permit is modified, the County intends to increase Visalia Landfill operating hours from 7:00 a.m. - 4:00 p.m. Monday through Friday, to 6:00 a.m. - 5:00 p.m.; Saturday operating hours will remain from 8:00 a.m. - 4:00 p.m. The landfill is primarily utilized by the Cities of Tulare and Visalia and Solid Waste Haulers licensed by the County of Tulare; which deliver the majority of their solid waste on weekdays, while a majority of the general public uses the site on Saturdays.</p>	<b>NOE</b>

2014068148	Temporary Emergency Permit for Treatment by Detonation, Naval Air Station (NAS) North Island Toxic Substances Control, Department of El Centro--Imperial DTSC has issued an Emergency Permit to NAS North Island located in San Diego, CA to treat hazardous waste by open detonation. The items to be treated are one (1) 40mm, eight (8) 20mm, two-hundred (200) 7.62 mm, six (6) 0.50 caliber projectiles, four (4) MK1 grenades, four (4) projectile fuses, and six (6) sub munitions. The items were discovered and recovered from an abandoned room at Naval Weapons Station, Seal Beach and are currently being stored at NAS North Island in an Explosive Ordnance and Disposal (EOD) safe holding area. The items will be transported to the NAF Bombing Range in El Centro, CA where they are tentatively scheduled on June 11, 2014 to be treated by open detonation. Both transport and open detonation will be done following military protocols. All of the items are old and severely corroded and NAS North Island EOD personnel have determined that the items are unstable and considered unsafe for continued storage. The NAF Bombing Range in El Centro has been chosen as the closest, safest, and most appropriate location for disposal. The Emergency Permit is effective June 11, 2014 through September 8, 2014. Treatment is scheduled to occur on June 11th or within that timeframe. The treatment activities will be conducted by military EOD personnel. The detonation will be performed at the NAF in El Centro on an active EOD training day. As NAS North Island does not have a permit for treatment of hazardous waste at this location, DTSC has determined that an emergency permit should be issued. The items are a potential safety hazard and present an unacceptable risk for continued storage. There is no alternative treatment available.	<b>NOE</b>	
2014068149	DC Fast Charging Installation Project Santa Monica, City of Santa Monica--Los Angeles The project consists of the installation of a stationary electric vehicle charger in the parking garage and 16kwh lithium ion battery bank in the electrical room of the existing Shore Hotel in Santa Monica.	<b>NOE</b>	
2014068150	DC Fast Charging Installation Project Santa Clara, City of Santa Clara--Santa Clara Installation of stationary electric vehicle charger and 16kwh lithium ion battery bank at an existing public garage.	<b>NOE</b>

2014068152	Adoption of Revised Regulations on Waste Tire Storage, Permit and Penalty Criteria Resources Recycling and Recovery, Department of -- The proposed regulations make minor revisions and clarifications to the state minimum standards for waste tire (WT) facilities, establish definitions and operational requirements for exempt and excluded WT facilities, and streamline the permitting process for permitted WT facilities in a manner consistent with statute. The proposed regulations are needed to provide consistency with the CA Fire Code and to provide clarity and consistency regarding Department's enforcement of the storage and hauling of WT. The proposed regulations will specify waste and used tire manifesting requirements for exempt common carrier or a registered tire hauler delivering waste tires to a port terminal and will authorize these persons to provide a waste tire generator with a copy of the completed Manifest Form and other load-specific documents.  These regulations are for the purpose of improving the protection of public health, safety and the environment. Businesses with WTs will have: more equitable WT business competition within CA, reduced regulatory duplication, and reorganized WT facility penalty criteria. Permitted WT businesses will have a simplified permit renewal process. Registered WT haulers with ten or more vehicles will have teh option to request more than one temporary registration certificate. Exempt common carriers and registered WT haulers delivering WTs to a port terminal will have manifest system requirements that are easier to follow.	<b>NOE</b>

2014032088	Brentwood Capital Improvement Program 2014/15-2018/19 Brentwood, City of Brentwood--Contra Costa The proposed project is the City's Capital Improvement Program (CIP) budget for fiscal years 2014/15-2018/19, which identifies proposed capital improvements and preliminary budgets for projects throughout the City over a five-year period. Capital improvements include a range of public works and infrastructure projects to improve the quality of life for local residents and visitors. Proposed projects include: roadways, parks and trails, water, wastewater, drainage and community facility improvements, plus development funded improvements through the City of Brentwood.	<b>NOD</b>	
2014018249	Inland Empire Brine Line Reach 5 Rehabilitation and Improvement Project Santa Ana Watershed Project Authority Corona, Lake Elsinore--Riverside, Orange The Inland Empire Brine Line (Brine Line) is an important infrastructure link moving non-reclaimable waste water and sewage from their sources to a treatment facility in Orange County. The existing brine line is structurally deficient and presents a significant risk for failure and a resulting Sanitary Sewer Overflow. To protect the brine line, a Cured-in-Place-Pipe (CIPP) liner will be installed using trenchless technology. The project includes the construction of approximately 35 temporary access pits (10 feet by 20 feet) to install the CIPP liner. All work will take place over the existing brine alignment. During construction, Traffic Control will be coordinated with the City of Corona, City of Lake Elsinore, and the County of Riverside.	<b>NOE</b>	
2014068155	Emergency Permit for Treatment of Hazardous Waste, Tessera Global Services, INC. Toxic Substances Control, Department of San Jose--Santa Clara DTSC has issued an emergency permit to Tessera Global Service, Inc. to treat hazardous waste by chemical stabilization. The hazardous waste to be treated consists of the following: Tetrahydrofuran, 1, 4 Dioxane, Benzoyl Peroxide.	<b>NOE</b>	

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
---------------	---	------------------	----------------

**Documents Received on Wednesday, June 11, 2014**

It has been determined that these items are or may be highly reactive and must be stabilized prior to being transported offsite. The chemicals are expired and are currently being stored inside a storage area at the Tessera facility located at 3025 Orchard Parkway in San Jose. The treatment of these items will be carried out by Clean Harbor Environmental Services (CHES) and involves the addition of a solvent to the container to reduce the reactive characteristics of the chemicals. The treatment is anticipated to occur on June 16, 2014 in an exclusion zone at the facility.

The emergency permit is effective beginning June 16th and shall expire on June 30, 2014. The treatment activities will be conducted by qualified reactive material technicians from CHES.

As TEssera does not have permit for treatment of hazardous waste, DTSC has determined that an emergency permit should be issued. The expired chemicals are a potential safety hazard and present an unacceptable risk for continued storage. There is no alternative treatment available. The emergency permit is a temporary measure, which allows Tessera to have CHES personnel treat the expired chemicals so they can be safely transported offsite for proper disposal.

2014068156 Manchester Grand Hyatt Improvements - Top of Hyatt, Lael's, 32nd Floor Meeting Space **NOE**

Space

San Diego Unified Port District

San Diego--San Diego

The proposed project is improvements to the existing Manchester Grand Hyatt (Hyatt) hotel. The improvements consists of three components: Top of the Hyatt renovation, Lael's Restaurant minor renovation, and 32nd floor meeting space.

The top of the Hyatt and Lael's Restaurant are located in the original tower ("Harbor Tower") of the hotel. The 32nd floor meeting space is located in the newer tower ("Seaport Tower").

The proposed project would expand the building by approximately 1,100 sf (Lael's restaurant). The use of the building would increase by a total of 77 restaurant seats (Top of the Hyatt and Lael's restaurant) and approximately 4,834 sf of meeting space. The coastal development permits (CDPs), for which the Hyatt was constructed, permit 1,621 hotel rooms; 149,783 sf of meeting, exhibit and ballroom space; 9,840 sf of retail, 955 restaurant seats; 4,432 sf of retail; and recreational facilities. Thus approximately 25,415 sf of meeting, exhibit and ballroom space; 92 restaurant seats; and 5,408 sf of retail space were not built out. However, the mitigation measures required pursuant to the Mitigation Monitoring and Reporting Program for the South Embarcadero Redevelopment Program 1 Environmental Impact Report have been implemented to mitigate the full build-out of the hotel. As noted above, the proposed project would not exceed that maximum capacity of the CDP.

Due to its nature and limited scope, construction of the proposed project will generate a minor amount of vehicle trips, and in turn, will not result in any impacts related to traffic, air quality, or greenhouse gas emissions (GHG). The Bay Area Air Quality Management District's (BAAQMD) GHG guidelines identify that for residential, commercial, industrial, and public land use projects, emissions of more than 1,100 metric tons of carbon dioxide equivalent per year (MT of CO<sub>2</sub>e/yr) are considered to have significant effects. Ongoing operational emissions associated with the proposed 1,100 sf of new exterior restaurant space would be approximately 5.8% of the allowable 19,000-sq ft. screening criteria for

## CEQA Daily Log

<b><u>Documents Received on Wednesday, June 11, 2014</u></b>			
2014068157	<p>retail/shopping centers established per the BAAQMD's guidance. Also, ongoing operational emissions associated with the 4,834 sf of new meeting space would be approximately 9.1% of the allowable 53,000 sf screening criteria for office building established per the BAAQMD's guidance. Finally, the 77 new restaurant seats would not generate additional vehicle trips, and therefore no additional GHG emissions, above those already associated with the convention hotel facility. Cumulatively, the proposed project would generate approximately 164 MT of cO2e/yr. Therefore, the proposed project would not exceed other agencies' established BGH thresholds, such as the BAAQMD.</p> <p>Kona Kai Resort Laundry Room Installation San Diego Unified Port District San Diego--San Diego</p> <p>The proposed project involves the renovation of two existing storage rooms to create a limited laundry facility at the Kona Kai Resort (hotel) in San Diego. The hotel does not currently have an on-site laundry facility. A temporary laundry trailer facility was previously located at the hotel from December 2012 to March 2013. Since that temporary laundry facility was removed, the hotel has been contracting with a third party vendor to launder its linen. The proposed project will create a new limited laundry facility designed to service the hotel's terry. Linen, however, will continue to be laundered through a third party vendor. The new limited laundry facility will be built in two rooms currently utilized for storage. The first storage room measures approximately 123 sf, and the second storage room measures approximately 74 sf. These two storage rooms will be modified, as further detailed below, to create an approximately 197-sf. limited laundry facility designed to serve the hotel's existing laundry needs. The displaced storage area will be replaced within other existing storage areas at the hotel.</p>	<b>NOE</b>	
2014068158	<p>Agreement with Tetra Tech, Inc. for Litigation Support and Environmental Services Related to the Chula Vista Bayfront Project San Diego Unified Port District Chula Vista--San Diego</p> <p>The proposed project is an agreement for litigation support and environmental services related to the Chula Vista Bayfront Project. Both the South Campus Site and South Bay Power Plant Site (Sites) located within the Chula Vista Bayfront project area contain contamination resulting from the previous operations at the Sites and are in process of being remediated by third parties. In addition to the South Bay Power Plant and South Campus Sites, other areas of the Chula Vista Bayfront are being redeveloped by the District, such as the Sweetwater parcel, which may require environmental analysis.</p> <p>As a result, the District requires the services of an expert environmental consultant firm in order to ensure that the District's contamination concerns at the Sites are properly addressed through the permitting process, and that the Sites are remediated to appropriate standards. Specifically, the District requires an expert environmental consultant to provide litigation support services to the Office of the Port Attorney, including the provision of peer-review services and oversight related to environmental, demolition, remediation, and redevelopment activities regarding contamination on the Sites.</p> <p>The agreement will allow for investigations and remedial approaches that include the preparation and third party review of 1) sampling and analysis plans, 2) health and safety plans, 3) quality assurance project plans, 4) phase I and Phase II environmental site assessments, 5) storm water pollution prevention plans, 6) human health and ecological risk assessments, 7) spill prevention, control, and</p>	<b>NOE</b>

	databases, consultation and coordination with applicable agencies and individuals, and field surveys of the Project limits.		
2014068174	<p>Subtenant Improvement for the San Pasqual Winery at Seaport Village San Diego Unified Port District San Diego--San Diego</p> <p>The proposed project are improvements to an existing unoccupied space in Seaport Village, located at 805 West Harbor Drive, Suite C, Building E2-C in San Diego, CA. The improvements consist of the creation of a wine tasting room to occupy 607 sf. interior space and 150 sf. exterior deck space. The interior area was converted from a restroom in 2013, and is currently functioning as shell space. Interior improvements will include vineyard decor with wine barrels, new drywalls, a new ceiling, track lighting and five recessed lights. The project also involves installation of a sink and non-load bearing walls to separate the back room from the customer area. Exterior improvements will include demolishing approximately 50 sf of concrete steps and a ramp and replacing them with a new wooden deck on the west side of the building. The new western deck would connect with the existing deck on the south side of the building and include 2-inch by 6-inch wooden planks and handrails, both of which would be stained to match the existing deck material. Americans with Disabilities Act access will be made available through the west door entrance. The improvements will be designed for 50 persons or less.</p> <p>According to the Port of San Diego Parking Guidelines for Seaport Village, the recommended parking supply for a retail use is 2.8 spaces per 1,000 sf. As such, the proposed project (approximately 757 sf.), will generate the need for approximately two additional parking lot areas. Occupancy rates range in these lots between 35 and 100 percent, depending on the lot, the time of day and the day of week. Therefore, additional parking demand generated by the proposed project will be accommodated by the existing self-parking, valet, and staked parking.</p>	<b>NOE</b>	
2014068175	<p>Salinas Valley Irrigation and Nutrient Management Program State Water Resources Control Board --Monterey</p> <p>Provide technical assistance to growers to implement pollution prevention and reduction strategies for irrigation and nutrient management in the Salinas Valley.</p>	<b>NOE</b>	
2014068176	<p>Special Repair/Deferred Maintenance: Wells 402 and 403; Admin Building Roof Repair; Replace Air Handling Units Corrections and Rehabilitation, Department of Chowchilla--Madera</p> <p>CDCR will be implementing a number of ongoing repair and maintenance projects at CCWF.</p> <ol style="list-style-type: none"> <li>1. At Wells 402 and 403, outdated electrical equipment will be replaced so that the wells function more efficiently.</li> <li>2. At the Administration Building (304), emergency roof repairs will be done.</li> <li>3. At Buildings 701, 702, and 802, the air handling units will be replaced with new units.</li> </ol> <p>These projects are necessary to maintain the buildings and other structures at CCWF to ensure unimpeded operation of the facility and its public safety mission. All work will be performed within the prison property in developed/disturbed areas. These projects are no in environmentally sensitive areas, and none of the exceptions to this exemption are applicable.</p>	<b>NOE</b>

<b><u>Documents Received on Wednesday, June 11, 2014</u></b>			
2014068177	<p>Special Repair/Deferred Maintenance: SQSP Building 18 Roof Repair Corrections and Rehabilitation, Department of --Alameda</p> <p>CDCR is going to replace the roof on a portion of Building 18 (also called the Records Building). The work to be performed includes demolition and disposal of the existing roof membrane and associated assemblies, and the installation of a new roofing membrane and associated assemblies. The records building is an eligible historic building, however, the existing roof material is not historic but vinyl membrane that was installed approximately 20 years ago.</p> <p>The entire roof of Building 18 needs to be replaced (the building is comprised of six different roofs), but for budgetary reasons only a portion of the building will be re-roofed at this time. Building 18 houses a number of mission critical functions: records storage; offices for custody and associates wardens; hearing room for Board of Parole; visiting room (including condemned legal visits); and offices for counselors, and ADA staff. This project is necessary to maintain this important state asset and to ensure unimpeded operation of the facility and its public safety mission.</p>	<b>NOE</b>	
2014068178	<p>Special Repair/Deferred Maintenance: Boiler Replacement Corrections and Rehabilitation, Department of Tracy--San Joaquin</p> <p>The DVI boiler plant is comprised of three boilers that currently operate at emission levels that exceed the emission reduction requirements of the San Joaquin Valley Air Pollution Control District (SJVAPCD) Rule 4320 Advanced Emission Reduction Options for Boilers, Steam Generators and Process Heaters. To allow the boiler plant to maintain annual permitting requirements and provide critical steam and hot water throughout the facility, CDCR will replace the three existing central boilers with one new 50,000 lb/hr 120 psi Babcock &amp; Wilcox BPS &lt;5 ppm Boiler that meets SJVAPCD Rule 4320.</p> <p>The project includes constructing a prefabricated metal building (approximately 1,800 sf.) to house the new boiler and related piping. The new boiler building will be located immediately south of the existing boiler house. The existing boiler house does not have sufficient capacity to house the new boiler, so it and the existing boiler will remain as emergency back-up only.</p> <p>The operation of the boiler is required to provide building comfort, heat, and hot water for inmate showers, food preparation, and many other essential functions. This project will resolve permit deficiencies and allow DVI to provide many years of continual boiler operation. This project is necessary to ensure unimpeded operation of the facility and its public safety mission.</p>	<b>NOE</b>	
2014068179	<p>Special Repair/Deferred Maintenance: Roof Repair and Chiller Replacement Corrections and Rehabilitation, Department of Vacaville--Solano</p> <p>The roof at B-wing housing unit will be repaired and the chiller for the HVAC system at the A and B wing housing units will be replaced. As part of the chiller replacement project, the chilled water buffer tank, to increase efficiency of the chiller system and ensure temperature stability, will be located on the roof of the Administration Building.</p> <p>These projects are necessary to maintain the buildings at CMF and to ensure unimpeded operation of the facility and its public safety mission.</p>	<b>NOE</b>

2014068180	<p>Special Repair/Deferred Maintenance: COR Cell Conversion Corrections and Rehabilitation, Department of Corcoran--Kings</p> <p>CDCR will convert ten cells in the administration segregation unit (Building 3A04) to anti-suicide cells. All modifications will be on the interior of the building. This project is necessary to ensure unimpeded operation of COR and its public safety mission.</p>	<b>NOE</b>	
2014068181	<p>Special Repair/Deferred Maintenance: CIM Reservoir Renovation and Leak Repair Corrections and Rehabilitation, Department of Chino--San Bernardino</p> <p>The reservoir at CIM provides treated domestic water to CIM, California Institution for Women (CIW), and Prado Conservation Camp (Camp Prado). The project is to repair the existing reservoir by patching interior cracks and epoxy coating the interior surfaces. The project also includes replacing some interior support columns and installing a clear well and leach lines to remove excess leakage from the reservoir into the surrounding soil.</p> <p>This project is necessary to maintain the reservoir to ensure unimpeded operation of CIM, CIW, and Camp Prado, and CDCR's public safety mission. The project complies with the Governor's Emergency Drought Declaration ordering state agencies to take action to conserve water.</p>	<b>NOE</b>	
2014068182	<p>Ramona Expressway Lift Station Abandonment Eastern Municipal Water District San Jacinto--Riverside</p> <p>Eastern Municipal Water District (EMWD) proposes the abandonment of the Ramona Expressway Lift Station. The project includes demolition of the existing lift station facilities, conversion of the existing wet well to a manhole in the North San Jacinto Interceptor Sewer located on the northeast side of Ramona Expressway.</p>	<b>NOE</b>	
2014068183	<p>Well 28 Replacement Eastern Municipal Water District San Jacinto--Riverside</p> <p>Existing Well No. 28 (Peacock and Radaker) is within the San Jacinto Upper Pressure Groundwater Management Zone and is located at 1930 East Mountain Avenue between Esplanade and Hemet Street in the City of San Jacinto. The proposed potable water Well No. 38 is the replacement for this well and is planned to be situated within the existing well site (approximately 3.5 acres). With recent collapse of this existing well, a replacement well is needed as soon as possible to provide critical local water supply and drought tolerance to the surrounding communities in the east valley area of the District.</p> <p>The existing well was designed as a deep well, approximately 1,500 feet, and at design capacity of 2,600 gallons per minute (gpm). The existing well (initially installed in December 1993) was equipped with a 9-stage, oil-lubricated Peerless 8LB vertical turbine pump drive by a 500-hp (initially 350-hp) electric motor. The wellhead and motor were housed inside a masonry building. The well operated at a discharge pressure ranging from 70-90 pounds per square inch (psi) into the adjacent 1,807-ft pressure zone. Over the past several years, the well production has declined from the intimal design capacity to approximately 1,000 gpm due to various reasons including declining water levels (Initial operation: 311-ft below ground surface (bgs) and prior to collapse: 534-ft bgs). In February 2012, the well collapsed and could not be recovered. Since, staff has removed the pump motor</p>	<b>NOE</b>

2014042011	<p>Hammer Diversion on South Fork Cottonwood Creek Fish Passage Improvement Project Regional Water Quality Control Board, Region 5 (Central Valley), Redding --Tehama</p> <p>The U.S. Fish and Wildlife Service (USFWS) has proposed a fish passage improvement project on the South Fork of Cottonwood Creek at a site known as the Hammer Diversion. The project includes removal of the existing diversion dam and implementing improvements to meet the landowner's water and power needs. Improving fish passage at this site will restore anadromous fish access to an additional five miles of historic spawning, rearing and holding stream habitat. The project is being funded by the USFWS through the Anadromous Fish Restoration Program (AFRP). The CDFW is providing equipment, supplies and agency personnel to implement the dam demolition portion of the project. The Central Valley Regional Water Control Board is the lead agency for the project under CEQA.</p>	<b>FIN</b>	
2014061041	<p>City Trunk Line South - Unit 3 Los Angeles, City of --Los Angeles</p> <p>The Los Angeles Department of Water and Power (LADWP) is proposing to construct the City Trunk Line South - Unit 3 (CTLS-3) from south of the intersection of Vanowen Street and Whitsett Avenue to north of the intersection of Magnolia Blvd and Whitsett Avenue (proposed project). The proposed project would involve the installation of approximately 10,251 linear feet (approximately 1.94 miles) of new 60-inch welded steel pipe to serve as a potable water line in an urban portion of the North Hollywood - Valley Village area, within the City of Los Angeles.</p>	<b>MND</b>	07/11/2014
2014061042	<p>Western Christian Schools Claremont Campus Improvements Project Claremont, City of Claremont--Los Angeles</p> <p>The proposed project involves a number of site improvements and upgrades to the Western Christian Schools Claremont Campus, which currently consists of a number of buildings, structures, and other site improvements. The proposed project involves the construction of a new multipurpose building; construction of a new pool restroom and storage building; improvements to the western portion of the campus to expand and upgrade the playfields and hardcourts; parking area and circulation improvements to the northeastern portion of the campus; and other miscellaneous site improvements (e.g., landscaping, perimeter fencing, upgrades to walkways) along the eastern boundary and public right-of-way. Development of the proposed project requires demolition of existing buildings, structures, parking areas and drive aisles, playfields and hardcourts, and other site improvements, and removal of a number of mature and immature trees.</p>	<b>MND</b>	07/11/2014
2014061044	<p>Jensen Ranch Huller Project Merced County Gustine--Merced</p> <p>The project applicant proposes to construct a new 33,185 sf huller/dryer to replace an existing huller, and up to six new 20,152 sf warehouse buildings. The storage buildings would be constructed in phases as needed. The approximate 154,097 sf of new structures would be located on a 17.69-acre portion of the project site at full buildout.</p>	<b>MND</b>	07/11/2014

	On-Project Plan Area (OPPA), which is subject to potential limitations on water availability from Upper Klamath Lake and the Klamath River. Implementation and administration of the proposed OPP will be in compliance with the Klamath Project Operations, the Biological Opinion on Klamath Project Operations, and all applicable federal, state, and local laws, regulations, and agreements.		
2012091034	Proposed Operational Changes to the Virginia Robinson Gardens Los Angeles County La Canada-Flintridge, Beverly Hills--Los Angeles Note: Recirculated	<b>SIR</b>	07/28/2014
	The proposed project would not include any demolition or construction on the property, but rather a change in the hours and days of operation of the facility previously allowed by the EIR prepared when the Los Angeles County Board of Supervisors assumed ownership and operation of the property in approximately 1980, in accordance with the Robinson Will.		
2011071049	EIR MDH 08-11; Rising Tree Wind Energy Project by Rising Tree Wind Farm LLC Kern County Mojave--Kern The project involves the development of a wind energy production facility on an ~1,600 acre site. Project activities would occur on a smaller area within the 1,600 acre site and would include clearing, grubbing, and grading for roads, a laydown area, wind turbine pads, a substation, meteorological towers, and underground and overhead transmission and collection lines. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.	<b>NOD</b>	
2012071061	La Entrada Specific Plan Coachella, City of Coachella--Riverside The La Entrada Development Agreement outlines the project's obligations and improvements, phasing and timing of improvements, fee credits and reimbursements, vesting and other City and Applicant responsibilities. The Development Agreement was signed on June 11, 2014, and the provisions of the Development Agreement are consistent with the project description of the La Entrada Program Environment Impact Report, certified by the City on November 13, 2013 (State Clearinghouse No. 2012071061). The Development Agreement was contemplated by the Program Environment Impact Report. Parties to the Development Agreement are the City and PSAV LLC/New West Communities.	<b>NOD</b>	
2012122042	The 2013 Fisheries Restoration Grant Program Fish & Game #2 Goleta--Mendocino The CA Dept. of Fish and Wildlife is executing a Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the Project applicant, Monterey Peninsula Water Management District. To provide for gravel augmentation for steelhead spawning habitat, 1,500 tons of clean, river-run, 1.5 to 4.0 inch gravel will be deposited in the Carmel River at three locations immediately downstream of Los Padres Dam. Work will be done in the summer and fall during low flows and after the spawning season when no redds are active.	<b>NOD</b>

2013091022	EIR PFS 02-13; Addison Energy Wind Project by Addison Energy Resources, LLC Kern County Mojave--Kern The project involves the development of a wind energy production facility on an ~1,600 acre site. Project activities would occur on a smaller area within the 1,600 acre site and would include clearing, grubbing, and grading for roads, a laydown area, wind turbine pads, a substation, meteorological towers, and underground and overhead transmission and collection lines. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.	<b>NOD</b>	
2014042011	Hammer Diversion on South Fork Cottonwood Creek Fish Passage Improvement Project Regional Water Quality Control Board, Region 5 (Central Valley), Redding --Tehama The U.S. Fish and Wildlife Service (USFWS) has proposed a fish passage improvement project on the South Fork of Cottonwood Creek at a site known as the Hammer Diversion. The project includes removal of the existing diversion dam and implementing improvements to meet the landowner's water and power needs. Improving fish passage at this site will restore anadromous fish access to an additional five miles of historic spawning, rearing and holding stream habitat. The project is being funded by the USFWS through the Anadromous Fish Restoration Program (AFRP). The CDFW is providing equipment, supplies and agency personnel to implement the dam demolition portion of the project. The Central Valley Regional Water Control Board is the lead agency for the project under CEQA.	<b>NOD</b>	
2014068194	Delano Roundabout Caltrans #6 Delano--Kern Construction of a single-lane roundabout at the intersection of SR 155 and Browning Road, including utility relocation, sidewalks extended to the north along Browning Road to connect to the existing sidewalks and the need for additional right-of-way.	<b>NOE</b>	
2014068195	Antelope High School Five Modular Classrooms Roseville Joint Union High School District --Sacramento This project was previously considered and an EIR SCH # 2000072012 was prepared for the project, including this minor expansion. 2014062039	Initial Study/Use Permit #2014-014, Honey Lake Power, Green Leaf Holdings Lassen County --Lassen Proposal to allow a 5 megawatt solar generation facility consisting of 12,768 solar modules placed on 24 single-axis trackers and a switching station. The proposed project is to be located within a 28 acre fenced area adjacent to an existing 38.5 megawatt Co-Generation facility. If approved, the existing Co-Generation facility will produce approximately 43.5 megawatts, using existing transmission infrastructure. The project site is zoned E-A-G (Exclusive Agriculture Geothermal Combining District). The project site is located at 732-025 Wendel Road and is approximately 2.5 miles south east of Highway 395 North in Wendel.	<b>CON</b>	07/16/2014
2013101093	Falloncrest at the Preserve Master Plan Chino, City of Chino--San Bernardino The Falloncrest at The Preserve Master Plan Project proposes a mix of commercial, residential, and open space uses on approximately 125 acres located in the southeast portion of the City of Chino. The Project site is located southerly of the 60 Freeway (SR-60), north of the 91 Freeway, west of I-15, and east of Euclid Avenue (CA-83). Specifically, the site is bounded by Pine Avenue to the south and West Preserve Loop to the west.	<b>EIR</b>	07/28/2014
2013121019	General Plan Land Use and Circulation Elements Update San Luis Obispo, City of San Luis Obispo--San Luis Obispo The Proposed project is an update to the City's Land Use and Circulation Elements. The Land use Element designates the general location and intensity of housing, business, industry, open space, education, public buildings and facilities, and other land uses. It helps guide neighborhood preservation, revitalization, and enhancement and protects environmental resources. The Circulation Element includes goals and policies relating to how residents, products and visitors move around San Luis Obispo. This element addresses cars, bicycles, pedestrians, air, rail, and public transportation. As part of the update, small changes in the definition of the zoning designations are expected and specific sites will be evaluated for changes to the current designations.	<b>EIR</b>	07/28/2014
2014021068	Indian Springs High School Athletic Facilities Improvements San Bernardino City Unified School District San Bernardino--San Bernardino The proposed project is the development and operation of a 3,500 seat grandstand, competition-level field lights, a PA system, and a concession/restroom building at the track and field, as well as an aquatic center with competition-lighting and a 12-lane swimming pool. Construction would occur in one general phase and begin October 2014 and end April 2015.	<b>EIR</b>	07/28/2014
2014061047	Infrastructure Improvements Project for the San Cristobal/Los Vinedos Project Coachella Valley Water District --Riverside CVWD proposes the extension of domestic water, sanitary sewer, and agricultural drainage infrastructure in the right-of-way of Hammond Road and Johnson Street, southeast of the unincorporated community of Mecca, CA. The improvements will directly serve the San Cristobal Labor Housing and Los Vinedos Mobile Home Park project that has been approved by Riverside County for development at the	<b>MND</b>	07/14/2014

2014061049	Aera Energy LLC T11-Block 12 Development Project Fish & Wildlife #4 --Kern Note: Extended Per Lead	<b>MND</b>	07/28/2014
	The proposed Project consists of an extension of the existing DOGGR Designated South Belridge Oil Field which would include the development of 67 wells (43 oil producers and 24 stream injectors) which are considered generally shallow in nature. The wells and associated access roads, pipeways and associated supporting infrastructure will result in approximately 32 acres of disturbance on privately owned surface and privately owned mineral land. The Project site is located within the unincorporated portion of western Kern County and 8 miles north of McKittrick within Sections 11 and 12, T29S, R21E (MDB&M). The Project's well pad areas will be grubbed and graded or compacted, but remain unpaved, and will disturb a total of 21 acres, while the unpaved access roads and pipeway corridors will disturb an additional 6 acres and 5 acres respectively.		
2014061051	Big Tujunga Canyon Restoration Project Antelope Valley Resource Conservation District La Canada-Flintridge--Los Angeles The National Forest Foundation (NFF) has partnered with the U.S. Forest Service (Forest Service) to assist with ecosystem recovery efforts on the Angeles National Forest needed primarily as a result of the Station Fire of 2009. The Project will be implemented throughout the Big Tujunga Canyon watershed, but primarily in riparian areas where non-native invasive plants can spread rapidly and degrade native plant communities and habitat for special status plants, fish, and wildlife.	<b>MND</b>	07/14/2014
2014062037	Community Wildfire Protection Plan Sacramento Metropolitan Fire Distirct Citrus Heights, Rancho Cordova--Sacramento, Placer This MND, supported by the attached IS, evaluates the environmental effects of the proposed Sacramento Metropolitan Fire District (Metro Fire) Community Wildfire Protection Plan (CWPP) which would occur in Sacramento County, CA. The applicant, Metro Fire, is proposing to implement wildfire preparedness, prevention, and response activates at selected sites throughout the county.	<b>MND</b>	07/14/2014
2014062038	Harvest Crew Facilities Project Sacramento Regional Sanitation District Elk Grove--Sacramento The District proposes to construct a new, permanent facility to replace the temporary trailers currently serving harvest crew activities. The new facilities would be constructed on a currently undeveloped 3.4-acre site within the SRWTP footprint and would include a 3,100 sf harvest crew building, two covered equipment storage structures, a metal storage building, paved parking area, landscaping, and lighting. Building design would be similar to other buildings at the SRWTP, would have a concrete-mortar exterior with a flat roof, and would be approximately 20 feet tall. The facilities would connect to existing electrical, water, storm drainage, and wastewater collection infrastructure adjacent to the project site.	<b>MND</b>	07/14/2014

2014062041	Eureka Hill Road - Garcia River Bridge Seismic Retrofit Project Mendocino County Point Arena--Mendocino The project includes seismic retrofits of the Eureka Hill Rd Bridge (10C-0034) over the Garcia River in Mendocino County. The improvements would strengthen the structural components to resist seismic loads on the structure & loads imposed by the soil movement. The retrofit work would involve the following activities within or adjacent to the Garcia River: 1) constructing a temporary clear water crossing (temporary work pad) beneath the bridge with temporary culverts to maintain flow & fish passage through the site as well as providing construction access to piers; 2) excavating, driving piles, and constructing top mats to reinforce the bent foundations around piers 2, 3, & 4; & 3) revegetating temporarily disturbed riparian areas.	<b>MND</b>	07/14/2014
2014062042	Brighton Subdivision Rocklin, City of Rocklin--Placer The project is generally described as a request for approval of a General Plan Amendment, a General Development Plan/Rezone, a Tentative Subdivision Map, a Design Review and an Oak Tree Preservation Plan Permit entitlements to allow the development of a 75 lot single family residential subdivision with lots less than 6,000 sf in area, on approximately 13.7 acres. The site would be subdivided into 79 lots, including 75 single family dwelling lots, 3 landscape/public utility easement (PUE) lots, and 1 open space and conservation easement lot approximately 2.7 acres in size.	<b>MND</b>	07/14/2014
2014062043	Granite and Dominguez Subdivision Rocklin, City of Rocklin--Placer The project is generally described as a request for approval of a General Plan Amendment, a General Development Plan/ Rezone, a Tentative Subdivision Map and an Oak Tree Preservation Plan Permit entitlements to allow the development of a 71 lot single family residential subdivision on 16.8 acres. The site would be subdivided into 77 lots, including 71 single family dwelling lots, two landscape/public utility easement (PUE) lots, one lot for private streets, a retail commercial lot and one open space and conservation easement lot 5.29 acres in size. The residential lots would have a minimum lot size of 3,600 sf, a maximum lot size of 7,126 sf and an average lot size of 3,981 sf.	<b>MND</b>	07/14/2014
2014062044	Tahoe Hills Erosion Control Project El Dorado County --El Dorado The Project site is an existing residential development on the west shore of Lake Tahoe bordered by SR 89 on the north, Lake Tahoe on the east, and Lakeview Drive on the South. The overall goal of the Project is to design and implement erosion control and water quality improvements measures that will reduce the discharge of sediment and pollutants to Lake Tahoe from County administered rights-of-way (ROW). The Project will not change the use of the site or surrounding area. The Project will benefit the natural environment with the implementation of the proposed improvements. After Project completion, less sediment will enter Lake Tahoe from the Project area, improving water quality in Lake Tahoe.	<b>MND</b>	07/14/2014

<b><u>Documents Received on Friday, June 13, 2014</u></b>			
2014061030	4051 South Alameda Street Project Los Angeles, City of Los Angeles, City of--Los Angeles Revised / Recirculated  Parcel Map No. AA-2012-919-PMLA and a Site Plan Review to permit the subdivision of one 556, 39965, 798 nsf parcel into four lots (Lot 1: 3.14 net acres, Lot 2: 3.1435 net acres, Lot 3: 3.14 net acres, and Lot 4: 3.36 net acres) in the M2-2 Zone. The project includes the construction of four industrial buildings consisting of Building 1: 115,973 sf and 124 parking spaces, Building 2: 133, 68042, 366 sf and 72 parking spaces, Building 3: 116, 663882 sf and 97 parking spaces, and Building 4: 144, 39722, 025 sf and 106 75 parking spaces. The applicant is requesting the merger of the right-of-way of 40th Place and the two alleys north and south of 40th Place.	<b>NOP</b>	07/14/2014
2014061050	Increase to Number of Displacement Events (Rose Bowl Music Festival) Pasadena, City of Pasadena--Los Angeles Note: Extended Review per lead  The project is an amendment to the Arroyo Seco Public Lands Ordinance (Pasadena Municipal Code Chapter 3.32). Chapter 3.32 currently permits up to 12 displacement events without additional review required by the City Council, and 13 National Football League (NFL) events to occur at the Rose Bowl Stadium. The proposed project would increase the 12 displacement events by 9 (with an attendance cap of 75,000 for these additional events) in any year in which the NFL events do not occur, and expand the allowed uses at the Brookside Golf Course. The changes proposed at the golf course are consistent with ongoing historical use of the course during displacement events, and would allow the Rose Bowl Operating Company to potentially host, among other events, a three-day music festival in the Arroyo Seco. The project would provide the flexibility for the City to choose either the 9 new additional events, or the 13 NFL events to occur in any one year. The 9 additional events will not occur in the same year as the NFL events. There is no new construction or addition proposed to Stadium.	<b>NOP</b>	08/15/2014
2014062045	Yuba Goldfields 200-Year Flood Protection Project Three Rivers Levee Improvement Authority Marysville--Yuba TRLIA is proposing to either construct an embankment within the Goldfields or construct a levee just south of the Goldfields to reduce the 200-year flood risk associated with floodwaters flowing through the Goldfields and entering urban areas in the RD 784 service area (southwest Yuba County). Four alternative flood protection alignments have been identified. Three alternatives involving constructing an embankment using dredge tailings within the Goldfields. The fourth alternative involves constructing an engineered levee south of the Goldfields. All alternatives would be capable of meeting USACE and DWR urban levee design criteria for 200-year flood protection, and all will be evaluated at an equal level of detail in the EIR. TRLIA is using the EIR to provide input into its selection of the best alternative for implementation.	<b>NOP</b>	07/14/2014

2014061048	U.S. Navy Commissary Building Demolition Project Los Angeles, Port of --Los Angeles The proposed Project would demolish and remove an existing structure at 390 Navy Way on Terminal Island. The building is out of compliance with fire/life safety code requirements and must either be retrofitted or demolished. Because there are no current land uses or future plans associated with the structure, it is more cost-effective to demolish the building. The building is 51,000 sf and will be removed along with perimeter sidewalks and planters for a total of 78,000 sf. No new structure will be built as a result of the project. The site is not identified on the Cortese List (Government Code Section 65962.5). Demolition would begin fall 2014 and take approximately six weeks.	<b>Neg</b>	07/14/2014
2014062040	PA-1400102(ENT) San Joaquin County Stockton--San Joaquin An Entertainment Permit application for an existing bar and restaurant to include live entertainment (Windmill Cove Bar and Grill). No new structures or buildings are being proposed with this application.	<b>Neg</b>	07/14/2014
2014062046	Single-Use Carry-Out Bag Reduction Ordinance Santa Clara, City of --Santa Clara The Proposed Ordinance would prohibit the free distribution of single-use plastic and paper carry-out bags at the point of sale within the City of Santa Clara. An exception is made for recycled paper bags containing at least 40% post-consumer recycled content, which can be provided to customers at the point of sale for a minimum ten cents (\$0.10) charge. Retail establishments located and operating within the City that would be subject to the Proposed Ordinance include any commercial establishment that sells perishable or nonperishable goods including, but not limited to, clothing, food, and personal items directly related to the customer. Restaurants, other food providers, and non-profit charitable reuse retailers would be exempt from the Proposed Ordinance. The Proposed Ordinance would not include development of any physical structures or involve any construction.	<b>Neg</b>	07/14/2014
2011062042	Chevron Refinery Modernization Project Richmond, City of Richmond--Contra Costa Note: Response to Comment The Modernization project would complete construction and begin operation of a replacement Hydrogen Plant and a collection of new sulfur removal equipment improvements that remove naturally occurring sulfur contained in feedstocks processed at the Facility. The Project also includes related infrastructure improvements to Facility piping, utility lines, and electrical systems. The Modernization Project includes several integral equipment components that would reduce air emissions from Facility operations (the Emission Reduction Project Components) and further Project Design Features proposed to avoid or minimize environmental impacts. The Project also includes a new Reliability Program, including new safety programs and several physical modifications including the replacement of 17 piping circuits in the Crude Unit.	<b>Oth</b>

2006072012	<p>Big River Watershed Restoration - Proposition 40 River Parkways Grant Project Parks and Recreation, Department of --Mendocino</p> <p>Supplement 02 incorporates the remediation of an approximate 1.46 miles of eroding road and seven failing channel crossings along the M-2 road outside the original project scope. In support of the original nature of the proposed work, this supplement to the MND proposes work that will remove outside (downslope-side) berms along the road; deposit removed berm and other fill material against upslope road edges to create outsloped road surfaces; eliminate inboard ditches and itch-relief culverts that service corresponding sections of inboard ditches; remove existing culverts, road fill, and any upslope excess sediment within the stream channels; apply appropriate erosion control materials and methods; monitor and maintain erosion controls and remove invasive plant species; revegetate, as necessary, with native plants salvaged from the site.</p>	<b>SIR</b>	07/30/2014
1994072048	<p>Mojave River Pipeline Project Mojave Water Agency Adelanto, Barstow--San Bernardino</p> <p>CDFW is issuing a Streambed Alteration Agreement for the construction of a 528-foot pipeline adjacent to and within the Mojave River channel and the installation of 200 cubic meters of ½ ton class rip-rap along the Mojave River levee (project). The project is part of the Mojave River Pipeline, which delivers State Water Project water to the Mojave River Basin. The project will result in 0.11 acres of permanent impacts and 0.07 acres of temporary impacts to CDFW jurisdictional streambed.</p>	<b>NOD</b>	
2002011116	<p>Addendum to the Inland Empire Utilities Agency's Facilities Master Plans PEIR for the 930 Zone Recycled Water Projects Inland Empire Utilities Agency Chino Hills--San Bernardino</p> <p>The Agency's Project for the Central Project Area includes the Jurupa (Wineville) Extension Recycled Water Pipeline, which is part of the Agency's Regional Recycled Water Distribution System. The Project will design and construct a pipeline segment of 5,200 linear feet (LF) OF 24-inch recycled water pipeline along the Day Creek Channel between Airport Drive and Jurupa Street and a segment of 28,500 LF of 36-inch recycled water pipeline adjacent to the Wineville Flood Control Basin between Jurupa Street and East Francis Street within the City of Ontario. The 24-inch pipeline will parallel an existing 24-inch recycled water pipeline along Day Creek Channel. The 36-inch pipeline will extend from East Francis Street, which becomes Marlay Avenue, and continue along Cherry Avenue, Live Oak Avenue, and Village Drive to the Declez Channel and will terminate at RP-3 within the City of Fontana. The pipeline will include two large turnout facilities, which are located along the Declez Channel and RP-3 to supply recycled water for groundwater recharge, and a smaller turnout that will provide irrigation to one of the cells within the RP-3 recharge site. The Project will also serve recycled water customers within the Cities of Ontario and Fontana. The estimated connected demand is approximately 275 acre-feet per year (AFY) for direct usage and 1000 AFY for groundwater recharge.</p> <p>The Project will also include retrofits of public sites, such as, schools, parks, and streetscapes. Customer retrofits will require an evaluation of the existing piping at each site, design plans to modify the piping at the site from potable to recycled water, an engineering report approved by the California Department of Public</p>	<b>NOD</b>

	Health, and construction of the site retrofits and cross connection testing once the site is retrofitted.		
2011051014	San Joaquin Hatchery Public Access and Trail Project Fish & Game #4 --Fresno The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the Project applicant, California Department of Fish and Wildlife. The applicant proposes to install a pre-fabricated footbridge over an unnamed tributary to the San Joaquin River. Installation of the crossing will include the construction of abutments on both sides of the bank, without intermediate piers. The banks will be excavated to install the abutments. The approach sections of the trail will be graded to match the elevation of the bridge abutments so that the trail is level. In order for access to be created for heavy equipment, some trees will be trimmed or removed.	<b>NOD</b>	
2011101048	Chevron USA, Inc. - Thermally Enhanced Oil Recovery (TEOR) Well Operation - Project No. S-1102789 San Joaquin Valley Air Pollution Control District Bakersfield--Kern To drill one production well (KCL-10 Well 85R) within the Kern River Designated Floodway.	<b>NOD</b>	
2012071077	SBT-25 Curve Realignment Caltrans #5 --San Benito The project involves realigning the 0.4 mile section of SR 25 to current design standards by replacing the nonstandard curve with a 2,000 foot radius curve. This will require cutting into the hillside to a maximum depth of 44 feet. The new section of SR 25 would be 900 feet long and 40 feet wide, with two 12-foot lanes, 2-foot paved shoulders and 6 to 8 feet of unpaved surface on either side of which includes a rock catchment area. The slopes on either side would be 0.25:1 or flatter. The width of these slopes will be a maximum of 16 feet on each side. In addition to the new section of road improvements two new driveways exits for the landowners on either side of SR 25 will be installed as well as access to a stockpile area in the current turn-out.  The project may result in incidental take of California tiger salamander, which is designated as a threatened species under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project Implementation.	<b>NOD</b>	
2012082015	Sacramento River Flood Control System Evaluation, Phase III, Mid-Valley, Contract Area 3 Central Valley Flood Protection Board --Yolo Note: Reference SCH# 2011028193  The levee repair project will construct improvements on ~3.5 miles of levee along the left (east) bank of the levee including: 18,035 feet of levee crown, landside slope remediation; levee crown patrol road; relocation of a drainage ditch; access ramps and ditch crossings for private use; demolition of three existing drainage discharge pipes through the levee; construction of an access road on the landside	<b>NOD</b>

	by ruderal vegetation. It has been determined that the sale of this excess property will have no significant impacts to environment resources.		
2014068218	City of Hesperia Reclaimed Water Distribution System Project Hesperia, City of Hesperia--San Bernardino The City of Hesperia proposes to install approximately nine miles of reclaimed water distribution system within existing disturbed road rights-of-way and a 2.5 million gallon reclaimed water storage reservoir on a highly disturbed City parcel of land. The proposed reclaimed distribution system will range between 8" to 12" in diameter and will typically be installed between five and seven feet below the existing ground surface. Once installed the reservoir will store reclaimed water and the distribution system will transport reclaimed water to existing institutional and recreational landscape areas.	<b>NOE</b>	
2014068219	Slip Wall Caltrans #3 --Mendocino The California Department of Transportation (Caltrans) proposes to construct a retaining wall, install metal beam guardrail (MBGR), and widen the shoulders on State Route (SR) 253 between post miles (PM) 6.80 to 6.95.	<b>NOE</b>	
2014068220	Exploratory Test Hole Drilling Project Glenn-Colusa Irrigation District (GCID) Willows--Glenn The Project will involve the drilling of up to five 500-foot deep test holes for Glenn-Colusa Irrigation District. The wells will be drilled using a large truck-mounted direct rotary drilling rig equipped with a mud pump, pipe rack, and drilling fluid holding tank/shaker system. Drilling, construction and testing will occur between spring 2014 and summer 2014. Well drilling at each site would occur 24 hours a day, seven days per week for approximately one week. Additional support vehicles including a water tender, front-end loader, pipe truck, and pickup trucks will be parked on-site. The drilling rig and associated equipment will occupy an area of approximately 50 feet by 100 feet. Access for these vehicles will be directly off the adjacent canal bank maintenance road. No improvements for site access will be required. No off-site discharge of drill cuttings or fluids will occur during drilling. Drill cuttings and inert bentonite clay, produced during drilling operations, will be contained in an on-site settling pond and spread on site in an approved location upon well completion. Potential site impacts include minor disturbance of the ground surface within and adjacent to the drill location, and a temporary increase in noise levels during drilling and installation of the well.	<b>NOE</b>	
2014068221	Conaway Preservation Group, LLC Central Valley Flood Protection Board Davis--Yolo To install a well; well platform; controller and service pole; and ancillary flatwork within the Yolo County Bypass.	<b>NOE</b>	
2014068222	Ryan Johnson Central Valley Flood Protection Board Marysville--Yuba To construct a house, a detached garage, a water well pump house and install a propane tank.	<b>NOE</b>

2014068223	Balvir Kaur Central Valley Flood Protection Board --Sacramento To expand an existing convenience store landward by adding 619 square feet; place approximately 800 cubic yards of fill for an expanded parking area; place approximately 300 cubic yards of fill for landscaping; construct retaining walls for a parking area and landscape.	<b>NOE</b>	
2014068224	Concurrence with the Issuance of a Modified Solid Waste Facility Permit (SWFP) for Desert Center Sanitary Landfill, Facility No. 33-AA-0016, Riverside County Resources Recycling and Recovery, Department of --Riverside The modified SWFP will extend the estimated closure date from 2011 to 2087 and update the refuse design capacity from 117,032 cubic yards to 115,341 cubic yards. There will be no increase in maximum elevation, no increase in maximum daily tonnage and no change in the days or hours of operation.	<b>NOE</b>	
2014068225	Gravel Bar Scotch Broom Removal Parks and Recreation, Department of --Del Norte The purpose of this project is to remove exotic plants, mainly Scotch broom (Cytisus scoparius, from 5 gravel bars along the Smith River in Jedediah Smith Redwoods State Park that are infested with exotic plant species. An area of approximately 17 acres of Scotch broom will be treated. When other invasive non-native plants are encountered within the project area during Scotch broom removal efforts these plants will be mapped and removed. Exotic vegetation will be removed using hand tools (e.g. shovel, weed, wrenches, Pulaski). Excavation will not exceed 24 inches. Care will be taken to minimize damage to the roots of native vegetation. Initial treatment and retreatment efforts will be performed by Park staff, volunteers, and contracted crews. All removed vegetation will be piled and burned or transported to an appropriate dumping area to be composted or burned at a later date.	<b>NOE</b>	
2014068226	Drury-Chaney Trail Bench Parks and Recreation, Department of --Humboldt Project consists of installing a six foot wood with metal frame bench along the entrance trail to Drury-Chaney at Humboldt Redwoods SP, to enhance the visitor experience. The bench will be installed parallel to the existing trail. Installation will involve digging two holes two feet deep and six inches in diameter. The legs of the bench will be set in cement with the extra dirt being dispersed in the area.	<b>NOE</b>	
2014068227	Emergency Permit for Treatment of Hazardous Waste, Hewlett-Packard Company Toxic Substances Control, Department of Palo Alto--Santa Clara DTSC has issued an emergency permit to Hewlett-Packard Company (HP) to treat hazardous waste by chemical stabilization. It has been determined that these items are or may be highly reactive and must be stabilized prior to being transported offsite. The chemicals are expired and are currently being stored inside a laboratory at the HP facility located at 1501 Page Mill Road in Palo Alto. The treatment of these items will be carried out by Clean Harbor Environmental Services (CHES) and involves the addition of a solvent to the container to reduce the reactive characteristics of the chemicals. The treatment is anticipated to occur outside of normal business hours in an exclusion zone at the HP facility.	<b>NOE</b>

2014068238	Pit 1 Hydroelectric Project, Federal Energy Regulatory Commission (FERC) Project No. 2687 - 401 Water Quality Certification, Condition 13 State Water Resources Control Board --Shasta Pacific Gas and Electric Company (PG&E) operates the Project, FERC No. 2687, for which FERC issued a new operating license on March 19, 2003. The FERC license for the Project includes the State Water Resources Control Board's 401 water quality certification that requires PG&E to release flushing flows from the Pit 1 Forebay Dam to control nuisance aquatic vegetation and mosquito production in Fall River Pond. This Project is for the temporary suspension of flushing flows required under Condition 13 of the Project's water quality certification in order to protect the Shasta crayfish, which was listed as endangered under both the California and Federal Endangered Species Acts in 1988. The Project impounds water to feed the Pit 1 powerhouse, which operates as a parking plant to help PG&E meet daily load swings. The Pit 1 forebay is a 222-acre impoundment immediately above the 0.7 mile long Fall River Pond.	<b>NOE</b>	
2014068239	Issuance of Streambed Alteration Agreement No. 1600-2014-0040-R1, Grant Earthen Dam Fish & Wildlife #1 --Shasta Project is limited to the diversion of water pursuant to a legal water right and any routine maintenance or repairs that may be necessary to an unauthorized existing dam.	<b>NOE</b>	
2014068240	Science Building - Laboratories Renovation University of California, San Francisco San Francisco--San Francisco The project will repair and replace existing lab benches, fume hoods, and equipment in the six lower-division labs and stockroom in the Science Building - Rooms 102, 103, 104, 105, 106, 108, and 145. The number of stations and fume hoods will remain the same while their replacements will be improved to meet current code and ADA requirements.	<b>NOE</b>	
2014068250	Spanish Broom Removal Parks and Recreation, Department of --Humboldt Remove two patches encompassing 1873 sf., of non-native, invasive white Spanish broom near the campground at Gold Bluffs Beach. Excavation will not exceed 24 inches. Initial treatment and retreatment efforts will be performed by Park staff and volunteers. All removed vegetation will be piled and transported to an appropriate dumping area to be composted or burned at a later date. No native plants will be disturbed during the removal effort.	<b>NOE</b>
