

Jerry Brown, Governor

STATE CLEARINGHOUSE

SUMMARY OF POSTINGS

June 1 – 15, 2017

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **June 1 – 15, 2017**.

STATE CLEARINGHOUSE CONTACTS

Please contact the State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
E-mail: state.clearinghouse@opr.ca.gov
Website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown via email**.

STATE CLEARINGHOUSE MAILING ADDRESS

USPS: State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries: State Clearinghouse
1400 Tenth Street, Room 113
Sacramento, CA 95814

INFORMATION AVAILABLE ON-LINE

<u>Documents Received on Thursday, June 01, 2017</u>			
2011102043	Yolo Habitat Conservation Plan/Natural Community Conservation Plan Draft EIS/EIR Yolo County --Yolo The Yolo County Habitat Conservation Plan/Natural Community Conservation Plan Joint Powers Agency (JPA) and the U.S. Fish and Wildlife Service plan to prepare an environmental impact statement/EIR on the Yolo County Natural Heritage Program Habitat Conservation Plan/NCCP for Yolo County. This is a comprehensive, county-wide plan designed to provide long-term conservation and management of natural communities, sensitive species, and the habitats upon which those species depend, while accommodating other important uses of the land. The Plan area encompasses the entire area of Yolo County - approximately 653,549 acres plus additional conservation on up to 1,174 acres along Putah Creek in Solano County.	EIR	07/17/2017
2016052053	237 Industrial Center San Jose, City of San Jose--Santa Clara Proposes to rezoning the site to light industrial with two development options: option 1 - development of approx 1.2M sf of light industrial uses, consistent with all requirements of the light industrial zoning district. Option 2 - construction of a 436,880 sf data center with a PG&E substation as phase 1 and 728,000 sf of light industrial development (no additional data center uses) on the remaining 40 acres of the site as phase 2. Development of phase 2 will be consistent with all requirements of the light industrial zoning.	EIR	07/17/2017
2016092060	Sac 50 Phase 2 High Occupancy Vehicle Lanes Project Caltrans #3 Sacramento--Sacramento Note: Notice of Availability Caltrans, in partnership with the federal highway administration, is proposing to add approximately 8 miles of HOV lanes in both directions on US 50 in Sacramento County, from the existing HOV lanes at the Watt Ave interchange to the eastern approach of the Sacramento River Viaduct in downtown Sacramento. Four alternatives are being presented in the Draft Initial Study/EA; Alternative 1, Alternative 2, Alternative 3, and Alternative 4.	FON	
2017061001	Padres Trail Desilting Basin La Canada Flintridge, City of La Canada-Flintridge--Los Angeles The city of La Canada Flintridge is seeking to construct an earthen desilting basin and concrete spillway within the 29,300-sf project site. The area of the proposed desilting basin would be approx 20,000 sf and would have a total storage capacity of 850 cy. Currently, water and sediment flows along a natural course, through the project site continuing across residential properties through underground pipes and at-grade channels and released onto Padres Trail to the north. The basin would serve to reduce flows and trap sediment before delivery to Padres Trail. The project would include installation of a concrete access apron, and a five-ft high gate and chain link fencing around the parameter of the basin.	MND	06/30/2017

2017062002	General Plan Amendment 16-001, Zone Amendment 16-002, Parcel Map 14-005 (Highmark Land Co.) Shasta County --Shasta Request for approval of 1) GPA to change the existing land use designation from suburban residential to commercial on a 13.86 acre portion of a 378.85 acre property; 2) a zone amendment from TL to Community commercial, design review combining district proposed on the same 13.86 acres of the property; and 3) a parcel map to divide the 378.85-acre property into four commercial parcels being 1.27 acres, 1.38 acres, 7.75 acres, and 6.03 acres; and a 362.42-acre remainder parcel.	MND	06/30/2017
2017062001	Diablo Country Club Satellite Water Recycling Facility Central Contra Costa Sanitary District --Contra Costa The project consists of a wastewater diversion pump station, wastewater conveyance pipeline, SWRC, a waste return pipeline to the regional wastewater collection system, and expansion of DCC's existing ponds for storage of recycled water. Implementation of the project would allow DCC to divert wastewater flow from the Central San's nearby wastewater pipeline, treat it onsite to produce Title 22 recycled water for irrigating the golf course, and return the process solids back to the Central San wastewater collection system located on DCC property. Additionally, DCC's intends to replace its current irrigation system for fairways, approaches and roughs, as part of its ongoing maintenance program to comply with CA Water Code Title 17 and Title 22.	NOP	06/30/2017
2017042055	Las Positas College 2012 Facilities Master Plan Chabot-Las Positas Community College District Livermore--Alameda Notes: Response to Comments The 2012 Facilities Master Plan would construct five new buildings, with four of the new buildings constructed on the sites of existing buildings which would be demolished; campus entries, roads and parking lots would be improved; a new sports recreational area would be constructed; and improvements made to existing athletic facilities. Estimated FMP buildout would occur over the next ten years with construction starting in 2017 and ending in 2027.	Oth	
2017042081	Guadalupe River Trail Master Plan San Jose, City of San Jose--Santa Clara Notes: Response to Comments The project is a master plan that would construct an approx 4.9 mi reach that would provide a continuous trail connection between the northern terminus of the Guadalupe River Trail in Alviso to its southern terminus at Gleman Rd. The majority of the trail would consist of 16-ft wide trail sections with limited landscaping, and trail and gateway plazas.	Oth

2006042009	Dutch Slough Tidal Marsh Restoration Project Water Resources, Department of Oakley--Contra Costa Project involves conversion and restoration of tidal marsh, riparian habitat enhancement and preservation, levee maintenance, infrastructure development, and protection for public access. The project site is within the range of the Covered Species and is known to support individuals of the species. Development of the Project site will result in the permanent loss of 20 known and potential nesting trees and the loss of foraging habitat for Swainson's hawk. The Project will create 560 acres of tidal marsh, including 10 acres of tidal channel, 26 acres of riparian forest, 76 acres of managed non-tidal marsh, 97 acres of subtidal open water habitat, and 4 acres of native grassland. The project will also maintain and enhance 173 acres of irrigated pasture land as foraging habitat for Swainson's hawks. The project is expected to result in incidental take of giant garter snake, which is designated as a threatened species, Swainson's hawk, which is designated as a threatened species, Delta Smelt, which is designated as an endangered species, Longfin Smelt, which is designated as a threatened species, Spring-run Chinook Salmon, which is designated as a threatened species, and Winter-run Chinook Salmon, which is designated as an endangered species listed under CESA that may occur as a result of project implementation.	NOD	
2016092060	Sac 50 Phase 2 High Occupancy Vehicle Lanes Project Caltrans #3 Sacramento--Sacramento Caltrans, in partnership with the federal highway administration, is proposing to add approximately 8 miles of HOV lanes in both directions on US 50 in Sacramento County, from the existing HOV lanes at the Watt Ave interchange to the eastern approach of the Sacramento River Viaduct in downtown Sacramento. Four alternatives are being presented in the Draft Initial Study/EA; Alternative 1, Alternative 2, Alternative 3, and Alternative 4 (No Build).	NOD	
2017032025	CSA 17 Wastewater Collection and Treatment Improvement Project Shasta County --Shasta The proposed project entails sewer system improvements in the unincorporated community of Cottonwood, including improvements to the existing wastewater treatment plant, Black Lane Lift Station, Quail Lane Lift Station, and Cottonwood Lift Station; repair of approx eight manholes; installation of parallel or replacement collection lines in approx seven locations; and spot repairs of the collection lines at approx 16 locations.	NOD	
2017069001	Zoura Minor Grading Plan, PDS2016-LDGRMN-20103 San Diego County --San Diego Project is for the fill of 4,800 cubic yards and the import of 4,800 cubic yards of material to create a non-buildable pad to correct drainage issues on the property.	NOD

2017058307	FY 2016/17 Gravity Rehabilitation Project Ross Valley Sanitary District --Marin Rehabilitation of approx. 44,011 linear feet (LF) of sanitary sewer pipelines by open cut removal and replacement (~5,900 LF), pipe bursting (~10,185 LF), cured in place methods (~27,380 LF) and horizontal directional drilling (~546 LF).	NOE	
2017068001	Brooklyn College - Behavioral and Neurobiological Studies of Vocal Marine Fishes Fish & Wildlife #5 --Marin, Monterey The Department of Fish and Wildlife is issuing a permit to Brooklyn College pursuant to Fish and Game Code Section 2081(a) for research in California state waters. The Section 2081(a) permit authorizes Brooklyn College to incidentally take Longfin Smelt, Coho Salmon, and Chinook Salmon during the course of its research surveys subject to terms and conditions set forth in the permit. The purpose of this research is to collect Plainfin Midshipman (<i>Porichthus notatus</i>) for ongoing behavioral and neurobiological studies of acoustic communication in vocal marine fishes. These projects are conducted at UC Davis Bodega Marine Laboratory, Moss Landing Marine Labs, City University of New York at Brooklyn College, and the University of Washington. These projects have been or are currently funded by the National Institutes of Health and National Science Foundation. Fish will be collected using bottom trawl and beach seine equipment. Although not targeted by either survey, there is the potential for trawl gear to incidentally capture state listed species.	NOE	
2017068002	Campus Parking Relocation Project, California State University, Monterey Bay California State University, Monterey Bay Monterey--Monterey Alterations to existing 7th Ave lot to accommodate 639 relocated stalls and related pedestrian enhancements. See attached Project Description; Biological Study, DD&A, 5/30/17; and Traffic Evaluation, Higgins, 5/30/17.	NOE	
2017068003	Bidwell Canyon Stage 1 Parking Lot Expansion Water Resources, Department of Oroville--Butte The CA Department of Water Resources is implementing several recreation improvements at sites around Lake Oroville during Summer 2017. This project will expand the Bidwell Canyon Stage 1 parking lot to provide additional parking spaces for recreation users.	NOE	
2017068004	Newberry Springs Waterline Replacement Project Regional Water Quality Control Board, Region 6 (Lahontan), Victorville --San Bernardino The Project is to replace an existing waterline that crosses an ephemeral stream. The new pipeline will be in the same location as the pipeline being replaced and will be buried approximately four feet below the channel bottom. The Project area will be restored (recontoured and revegetated) following construction.	NOE	
2017068005	Fuels Reduction Project Parks and Recreation, Department of --Tuolumne Conduct fuel reduction in three (3) areas of Columbia State Historic Park to reduce flammable fuel loads and improve overall safety for park residents, staff, and visitors. In the Springfield, Eighty-Acres, and Historic Area of the park work will: - Remove subordinate tree species under the dripline of mature trees;	NOE

2017068304	TC17-005 Tuolumne County --Tuolumne Italian Bar Road from the Columbia/west side is a narrow, mostly one-lane-wide gravel road, cut on the steep slope of the ravine above the South Fork of the Stanislaus River, providing roadway access to the Jupiter area. Five locations, totaling 304 lineal feet of the roadway fill, which stabilizes the roadway, has slipped. The stabilization and structural repair to the road is needed, including the embankment. Italian Bar Road from the Twain Harte/east side traverses the edge of a ravine above the South Fork of the Stanislaus River. One landslide, 100 feet in length, has slipped and is partially blocking the roadway. The roadway embankment, and portions of the road itself, requires stabilization with an engineered wall system, and reconstruction of roadway.	NOE

2017061002	<p>Canyon Country Community Center Project Santa Clarita, City of Santa Clarita--Los Angeles</p> <p>The proposed Canyon Country Community Center Project consists of developing a new 20,000 to 24,000 sf community center and outdoor recreational facilities on a 16.5-acre project site in the Canyon Country community of Santa Clarita in LA County. The proposed project includes indoor and outdoor amenities that would be open to the public for recreational activities, community programs, classes, community events, and private functions. Proposed outdoor improvements include open play areas, water features, an outdoor market/mercado, an event stage area, a basketball half-court, a lot, an events garden, shade structures, and a perimeter trail. Indoor spaces in the proposed community center include a multipurpose room, a gym, classrooms, a catering and teaching kitchen, a fitness room, staff offices, a reception lobby, and supporting uses such as restrooms and storage areas. In addition to the amenities listed above, the proposed project includes improvements to the Mint Canyon Channel, drainage improvements, an underground stormwater infiltration system, on site parking and circular improvements, adjacent street improvements, a pedestrian bridge over Soledad Canyon Rd, and landscape improvements. To make way for the proposed improvements, the proposed project includes the demolition of 3 existing commercial buildings, with Casa Vieja and Toppers Pizza remaining on the site and unaltered.</p>	MND	07/03/2017
2017061003	<p>Scripps Institution of Oceanography (SIO) Marine Conservation Facility University of California, San Diego</p> <p>--</p> <p>The proposed project would renovate an existing four-story, 26,967 gsf shell of a building to provide laboratories, offices, and classrooms for the CMBC on the SIO campus. In addition, a portion of the project site would include a two-story addition totaling approx 15,147 gsf. This addition would include a lecture room/event space, conference room, visualization center, and a catering kitchen. A cafe with an outdoor shaded terrace and seating would also be included on the second floor. Additional improvements to the project site would include the provision of approx 62 parking spaces, an open space terrace on the western side of the buildings, landscaping, and improvements to the Coastal Trail network.</p>	MND	07/03/2017
2017062003	<p>Western Placer Creeks Routine Maintenance Agreement (RMA) Project Placer County Roseville, Rocklin, Loomis, Lincoln--Placer</p> <p>Placer County has an annual stream channel maintenance program and performs routine maintenance work to maintain functional and structural integrity of their facilities with the ultimate goal of flood protection for Placer County. The routine maintenance work is divided into seven categories: debris and obstruction removal silt/sand/sediment removal, vegetation control in channels, repair of previous erosion control work, minor erosion control work, restoration plantings within the riparian corridor, and installation of scientific measurement devices. Other routine maintenance may also include washing and painting bridges; repairing culverts; conducting minor geotechnical sampling; and other work necessary to maintain the functional and structural integrity of Placer facilities.</p>	MND	07/03/2017

2017062004	201 Mountain Wood Lane - Land Division Woodside, City of Woodside--San Mateo The 201 Mountain Wood Lane Land Division project proposes to divide one existing legal parcel of record into two legal parcels. The existing property is 8.63 acres gross, and 7.97 acres net. Parcel 1 would consist of 5.26 acres, and parcel 2 would consist of 3.37 acres. Both parcels would meet the 3-acre min lot size in the RR district. This applicant's purpose in applying for the subdivision is to create two parcels that can both support a single family residence and accessory structures. No development is proposed as part of this application.	MND	07/03/2017
2017062005	Maidu Bike Park Project Auburn Area Recreation and Park District Auburn--Placer The proposed project includes construction and operation of a recreational bike park on a +/-9 acre site on Maidu Drive. The bike park would provide a variety of trails and tracks for various skill levels and activities. The project would also include a disabled accessible picnic area, restrooms, and observation area adjacent to the existing Canyon View Community Center parking lot and includes maintenance on existing trails in the vicinity.	MND	07/03/2017
2013092016	PA-1200133 (TE, SA) One-year Time Extension for Religious Facility San Joaquin County Tracy--San Joaquin A one year time extension application for a previously approved site approval application to construct a religious facility for a max capacity of 99 people in three phases over ten years and a sign height modification request. Phase 1, with building permits to be issued within 18 months, is the construction of a 4,500 sf religious assembly and multi-purpose building and a sign modification request for a monument sign from the permitted height of four feet to ten feet. Phase 2, with building permits to be issued within 5 years, is the construction of a 3,420 sf storage building. Phase 3, with building permits to be issued within 10 years, is the construction of an 8,190 sf religious facility and conversion of the existing religious facility to a multi-purpose building. No school or day care facility is proposed with this project.	Neg	07/03/2017
2017062006	PA-1600297 (SU) San Joaquin County --San Joaquin A major subdivision application to subdivide two existing parcels into 6 parcels. Parcel one to contain 8,067 sf. Parcel two to contain 8,156 sf. Parcel three to contain 8,014 sf, parcel four to contain 8,000 sf. Parcel five to contain 8,003 sf, and parcel six to contain 8,000 sf.	Neg	07/03/2017
2014032066	Capri Creek Flood Reduction and Habitat Restoration Petaluma, City of Petaluma--Sonoma CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0037-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, City of Petaluma. Project will realign, re-contour and enhance approx. 1,400 lineal feet of channel within an area covering 1.9 acres at Sunrise Parkway. The area downstream of the culvert entrance will be widened into an Urban Debris Basin to facilitate the removal of deposited sediment, urban debris, and problematic vegetation. Approx.	NOD

2017068034	<p>Hedge 5 Feeder Tie/Pocket 4 Reconductor Sacramento Municipal Utility District Sacramento--Sacramento</p> <p>The Hedge 5 Feeder Tie/Pocket 4 Reconductor Project (Project) consists of the following:</p> <ol style="list-style-type: none"> 1. Reconstructing approximately 1.3 miles of the existing Hedge Line 5 12 kilovolt (kV) overhead line located along the south side of Geneva Point Drive/Calvine Road between Power Inn Road and the Southern Pacific Railroad tracks. The existing line is a single-circuit 12kV line. The Project will replace the existing poles with taller poles (10 to 15 feet higher) to allow for sufficient space to add a single-circuit 69kV line above the 12kV line. With the exception of a few poles that may be relocated for realignment near the intersection of Calvine Road and Cliffcrest Drive, all pole replacement will occur at same existing pole location. 2. Reconductoring (replacing) approximately 2 miles of 69kV lines associated with the existing Pocket Line 4 69kV overhead line with 12kV under build located along the west side of Stockton Boulevard between Requa Way and Wyndham Drive. Certain existing poles on a case-by-case basis may be replaced with new poles pending on the pole condition. With the exception of a few poles that may be moved 1 to 2 feet from an existing pole location, any other pole requiring replacement will occur at the same existing pole location. No work will occur on the existing 12kV under build lines. <p>The purpose of this Project is to provide sufficient line capacity and feeder ties to utilize existing transformer capacity and to serve 2018 forecasted summer loads under normal and emergency scenarios.</p>	NOE

2017061004	<p>Templeton Hills LLC / Tract Map and Conditional Use Permit / SUB2015-00066 San Luis Obispo County --San Luis Obispo</p> <p>A request by Templeton Hills Group, LLC for a vesting tentative tract map and concurrent CUP to subdivide two parcels totaling 23.53 gross acres into 22 lots consisting of: 21 residential parcels of 10,000 to 15,000 sf in size for sale and/or development, one non-buildable open space parcel of 9.42 acres; and a remainder parcel. The proposal includes a density bonus in accordance with land use ordinance section 22.22.140. Bennett Way will be extended to the south to terminate in a cul-de-sac immediately north of Toad Creek. Site disturbance will be approx 9.0 acres and will include approx 8,000 cy of cut and 8,000 cy of fill. The project includes a request to modify the street improvement standards as allowed by LUO Section 21.03.020(c)(d) to allow a private access easement to serve more than 5 parcels and request to become a receiving site for the voluntary transfer of development credits in accordance with LUO Chapter 22.24.</p>	MND	07/05/2017
2017061005	<p>Belridge Water Storage District Solar Project Belridge Water Storage District --Kern</p> <p>The proposed project is a fenced and gated 8.5 mw solar pv energy generation facility, consisting of approx 26,000 pv panels, and is intended to offset about 95% of the cost of the current electrical energy demand of BWSD's Pumping Plant A and Pumping Plant B facilities. The solar panels would occupy approx 47 acres of the 55-acre site and would be mounted on a single axis tracking system in order to maximize sunlight capture. The solar panels would have a max height of eight ft at max tilt. The facility would also interconnect Belridge Water Storage District's two existing meters, one at the Pumping Plant A facility and the second at the pumping plant B facility, via an underground conduit installation approx 9,600 ft in length. The conduit would be constructed within existing disturbed dirt road between the two facilities. Further, the project would include construction of a maintenance and fire access road, roughly 13,000 ft long and 20 ft wide, between and around the perimeter of the arrays. This road would be covered with crushed rock and constructed to be at matching grade with the surrounding ground surface. Project construction is expected to begin in January 2018 and be completed in June 2018, for a total duration of approx six months. After completion, the site would be remotely monitored.</p>	MND	07/05/2017

2017062010	Tentative Parcel Map & Exception Application No. PLN2017-0053 - Adam & Diane Schwartz Stanislaus County Oakdale--Stanislaus Request to create four 5 acre parcels, and a 10.13 acre remainder from a 30.13 acre parcel in the A-2-5 zoning district. An Exception is included to allow the parcels to take access from a 60 foot access easement from Orange Blossom Rd. Each parcel is proposed to be served by a private well and septic systems.	CON	06/26/2017
2017062011	Use Permit Application No. PLN2017-0059 - Ag-Air Inc. Stanislaus County Oakdale--Stanislaus This is a request to establish an agricultural aerial application (crop dusting) business and private heliport on a 49.97 acre parcel in the A-2-40 zoning district. A max of two helicopters are proposed to be stored in an existing 6434 sf ag storage building. A 5,445 sf landing helipad is attached to the west side of the ag storage building. The property also includes a 2,400 sf covered parking structure. Pesticides are delivered to each jobsite or will be delivered to the site in sealed containers and will be located onto nurse trucks and delivered to job sites. Equipment associated with the business, stored on-site, includes two helicopters, two nurse trucks (California "C" 2000 gallon water tender mix trucks, classified as agricultural support vehicles), a small 400 gallon mix trailer, a pick-up truck, and two forklifts. General maintenance and minor repairs on equipment associated with the business will be conducted in the ag storage building. The operation includes a total of two pilots and one seasonal loader. The operation serves farms in Stanislaus, San Joaquin, Merced, Calaveras, Tuolumne, and Sacramento Counties. On average the business operates 100-150 days per year.	CON	06/26/2017

2017062012	Use Permit Application No. PLN2016-0132 - Robert Gioletti & Sons Dairy, Inc. Stanislaus County Turlock--Stanislaus This is a request to expand an existing dairy operation, located on three parcels (56.2, 28.16, and 28.62 acres in size), currently permitted through the Central Valley RWQCB to house a max of 2,760 mature cows and 250 support stock, to a max of 3,800 mature cows and 640 support stock. The request includes the addition of corrals, and two freestall barns (94,500 sf, and 60,000 sf in size), two 9,000 sf special needs barns, a 2,880 sf addition to an existing special needs barn, and a calf hutch with flush lanes. The nutrients produced by the herd will be utilized to fertilize approx 700 acres of irrigated cropland farmed by the applicants, located on APN 022-041-010, 022-041-011, 022-041-013. A Nutrient Management Plan and Waste Management Plan are attached. The project site has a private well and septic leach system.	CON	07/06/2017
2015062072	San Francisco Public Utilities Commission Alameda Creek Recapture Project San Francisco, City and County of --Alameda SFPUC proposes to implement the Alameda Creek Recapture Project (ACRP or proposed project) to recapture water that the SFPUC will release from the Calaveras Reservoir and bypass around the Alameda Creek Diversion Dam when the SFPUC implements the instream flow schedule required as part of the regulatory permits for future operations of Calaveras Reservoir. The project is located in Alameda county, within the Sunol Valley on watershed lands owned by the city and county of San Francisco and managed by the SFPUC. The ACRP is one component of the SFPUCs water system improvement program, which has the overall objective of improving the reliability of the regional water system that serves drinking water to 2.6 million people in the bay area.	FIN	
2016101056	Leonard Avenue Bridge Replacement Project Clovis, City of Clovis--Fresno The proposed new bridge will be approx 115 ft long; and, including project related improvements, the new bridge will be approx 150 ft wide. Construction will include: removal of the existing bridge; clearing and grubbing; construction of the new bridge including grading; asphalt concrete paving; construction of wing walls; construction of barriers with tubular railing; canal channel lining; construction of concrete curbs and gutters and sidewalks; relocation and undergrounding of existing utilities; pavement striping and signage; installation of street lighting; modifications to existing residential drive approaches; new drive approaches for canal access; and additional paving on Leonard Ave to accommodate two traffic lanes in both directions on the south side of the bridge.	MND	07/06/2017
2017061009	North Fork Ranch Frost Ponds Santa Barbara County --Santa Barbara A request of Brian Tetley, agent for Brodiaea, Inc, owner, to consider Case No. 16CUP-00000-00005. The North Fork Ranch Frost Pond project is a request to construct and operate three frost ponds that would store water to be used for frost protection at the North Fork Ranch Vineyards. The project also includes the construction of new underground pipelines that would extend between each of the proposed reservoirs and the existing vineyard irrigation system.	MND	07/06/2017

2017061010	<p>Olanche Creek Diversion Project Los Angeles Department of Water and Power --Inyo</p> <p>LADWP proposes to divert a portion of the flow from Olancha Creek into the Los Angeles Aqueduct for municipal use in accordance with pre-1914 appropriations and a 1925 Court Decree. The remaining, non-diverted portion of Olancha Creek flow would continue east of the LAA to irrigate existing vegetation. A weir, wingwall, control gate, and pipe would be installed where Olancha Creek meets LAA at the Overhead 73 structure. The proposed project involves the excavation of a settling basin (50 ft long by 50 ft wide and approx 2 ft deep) that would extend west from the westerly edge of the LAA to allow for sediments to settle out of the creek flow before it enters the LAA.</p>	MND	07/06/2017
2017061011	<p>Conditional Use Permit No. 2017-023, Kellenberg Mariposa County --Mariposa</p> <p>CUP No. 2017-023 proposes a program of primitive, wilderness camping on a 314 acre parcel portion of the 524 acre Trabucco Ranch Preserve. The proposed project proposes low-impact camping activities with education and exposure of the public to the foothill ranchland culture, which will be in collaboration with the Sierra Foothill Conservancy. The proposed use is similar but much less intensive than a guest ranch, which is listed as a CU in the Mountain General Zone. The project parcel is 314 acres and located at 7040 Highway 49N, Mariposa. The project proposes the following: 8-12 campsites for canvas tents for 10-24 customers.</p>	MND	07/06/2017
2017061012	<p>Heers Open Space Vacation Encinitas, City of Encinitas--San Diego</p> <p>The project proposes to vacate an open space easement located on a 5.0-acre parce. No development is proposed as part of this proposal.</p>	MND	07/06/2017
2017061013	<p>State Route 138 (5th Street East to 10th Street East) Improvements Project Caltrans #7 Palmdale--Los Angeles</p> <p>Caltrans district 7, in cooperation with Palmdale as a project sponsor, proposes to widen SR 138 between 5th St East and 10th St East from two lanes to three lanes in each direction, a distance of approx 0.5 mi. Additionally, the project proposes to widen Sierra Hwy from two lanes to three lanes in each direction between Avenue R and a point 500 ft south of Avenue Q, a distance of approx 0.9 mi.</p>	MND	07/06/2017
2017062009	<p>Terminal 3 Log Storage and Shipping Facility Richmond, City of Richmond--Contra Costa</p> <p>RJJ International is proposing to develop and operate a log storage and shipping facility at Terminal 3 of the Port of Richmond. The proposed project would be located at an already developed site. The proposed project would not require new construction; however, minor repairs to the existing Terminal 3 building and facility improvements are proposed. The existing truck scales adjacent to the administration building would also be repaired. The proposed facility would receive harvested timber from CA forests that would be prepared for shipment, then loaded onto ocean-going ships that would berth at terminal 3. The trees would be harvested in accordance with a Timber Harvest Plan approved by CALFIRE.</p>	MND	07/06/2017

2017062014	Wildwood Commons Condominium Project South Lake Tahoe, City of South Lake Tahoe--El Dorado The proposed project is a condo project located on a formerly developed parcel. The applicant proposed to demolish the existing structures and build 23 condo units. The project site is 5 acres and is zoned for high density residential uses. The project will consist of 23 detached units ranging in size from 2,100 sf to 2,450 sf. Each unit will have a two car garage. Additional parking is provided on spaces located off the internal access road.	MND	07/06/2017
2017062015	McKinley WAtEr Vault Project (MWV) Sacramento, City of Sacramento--Sacramento The proposed Project consists of the construction of a below ground combined sewer system water vault and necessary appurtenant facilities. The underground MWV storage facility includes a 1,000,000 cubic feet storage structure approx. 300 ft. wide by 270 ft. long, or 270 ft. in diameter with a depth of approx. 40 ft. The above-ground appurtenant facilities would be located adjacent to the storage facility and contain odor control equipment and electrical and control equipment cabinets. The MWV would be connected, by inlet and outlet pipes, to the existing combined sewer system that surrounds McKinley Park. The 42-inch combined sewer system pipe under the jogging path along 33rd Street would be the closest to the proposed project and is anticipated to be the location of one inlet and outlet pipe.	NOP	07/06/2017
2017062013	PA-1700101 (SA) San Joaquin County Stockton--San Joaquin A site approval application to convert an existing 1,340 sf storage building to an 1,100 sf retail store with 240 sf office.	Neg	07/06/2017
2012102034	Folsom Dam Modification Project - Water Control Manual Update Central Valley Flood Protection Board Folsom--Sacramento A draft SEA/EIR has been prepared for the Folsom Dam Modification Project - Water Control Manual Update. The purpose of the proposed action is to reduce flood risk and improve dam safety in the Sac Metro Area by implementing operational changes of the new auxiliary spillway. The new operations will meet goal associated with dam safety and flood damage reduction benefits including: 1) passing the Probably Max Flood with three ft of free board; 2) controlling a 1/100 annual chance event, 3) control a 1/200 annual change event; 4) reducing variable space storage from 400,000-670,000 acre ft to the National Weather Service. Environmental effects evaluated in detail include hydrology, water supply and deliveries, biological resources, recreation, hydropower, and cultural resources. Cultural resources impacts could be potentially significant and unavoidable.	SIR	07/21/2017
1996082016	Tuolumne County General Plan Update Tuolumne County Vesting Tentative Parcel Map T16-030 to divide a 9.7 +/- acre parcel into three parcels as follows: Parcel 1 3.1 +/- acres, Parcel 2 3.5 +/- acres, and Parcel 3 3.1 +/- acres. The project site is zoned RE-3:MX:AIR (Residential Estate, Three Acre Minimum:Mobilehome Exclusion Combining) under Title 17 of the Tuolumne County Ordinance Code.	NOD

2017062016	<p>Relief Reach-Kennedy Meadows Riparian Restoration and Streambank Stabilization Project State Water Resources Control Board --Tuolumne</p> <p>The project proposes streambank stabilization and enhancement of riparian and aquatic habitats within the Project Reach. The streambank stabilization and riparian restoration measures are proposed along a 3,000 lf reach along the Middle Fork Stanislaus River. The proposed measures include a combination of various bioengineering techniques, including streambank grading, wood and rock placement, and native vegetation planting. Toe rock addition and root wad placement are proposed in areas with more recent and severe active streambank erosion, and where flow velocities are higher during high flows compared to the other treatment areas. Split rail fencing will also be installed in two segments at the downstream end of the Project Reach to protect the restored vegetation and banks. A river access area used by recreationists and cattle will remain open to focus access to the river.</p>	Neg	07/07/2017
2001061086	<p>Modification of an Existing Solid Waste Transfer Station, ER 2000-36 Escondido, City of Escondido--San Diego</p> <p>Change operator name for Escondido Resource Recovery to SANCO Services. Combine the Escondido Resource Recovery (37-AA-0906) and SANCO Recycling (37-AA-0965) Solid Waste Facility Permits (SWFP) into one full SWFP. Expand the facility design capacity from 5,249 tons per day to 8,743 tons per day; Increase the permitted daily tonnage from 2,500 tons per day to 3,223 tons per day (which is the existing Escondido Resource Recovery (2,500 TPD) and SANCO (723 TPD) combined permitted tonnage. Identify the Anaerobic Digester (AD) as a future operation to the first page of the SWFP (a modification or revision to the SWFP will be required prior to the AD implementation and use per LEA Condition 16i on the issued SWFP). Expand the current permitted boundary from 5.97 acres to 11.1 acres, including expansion of the existing facilities at 1044 W. Washington Ave., (APN 228-250-16, 17, 77) into the new parcel that is being added as part of the permitted boundary located at 1021 W. Mission Ave. (APN 228-250-78). Incorporate the existing SANCO Recycling operations and include the self-haul construction and inert debris and mixed waste processing activities. Renovate a warehouse into bale storage, demolish a warehouse and rebuild a single stream material recovery facility (MRF)/self-haul/construction and demolition (C&D) area, construct a new maintenance canopy, and revise internal traffic flow. Renovate the existing transfer station and the existing MRF. Add a new visitor entry. Update the Transfer Processing Report. Update/revise the SWFP LEA findings and conditions.</p>	NOD	
2010121044	<p>2015 South Gate Educational Center Master Plan (Formerly titled 2015 Firestone Education Center Master Plan) Los Angeles Community College District South Gate--Los Angeles</p> <p>Project is the approval by the DTSC of a Removal Action Workplan (RAW) East Los Angeles College - South Gate Educational Project (Site), dated March 2017, pursuant to Chapter 6.5, Division 20, Section 25355(a)(1) of the Health and Safety Code. The 18.5 acre Site is located at 2525 Firestone Blvd., at the northwest corner of the Firestone Blvd/Santa Fe Ave. intersection, in the City environmental cleanup of the Site based on an amended Voluntary Cleanup Agreement (VCA) [Docket No. HSA-VCA12/13-055] executed between the DTSC and LACCD dated</p>	NOD

	Jan 03, 2017. The RAW for the Site serves to remove total petroleum hydrocarbon (TPH)-impacted soil in three areas (Area B19, B22 and B39) beneath Building 1. The three areas were identified during previous environmental investigations at the Site. The contamination consists of TPH in the diesel and motor oil hydrocarbon chain ranges. The proposed scope of work proposes cutting out sections of the floor slab, excavating contaminated soil, and disposing of the soil at an off-site facility. The TPH-contaminated soil will also be re-compacted to a depth of 20 feet below ground surface (bgs) within the building footprint to address potential liquefaction concerns.		
2015122055	2016 Fisheries Restoration Grant Program, the Steelhead Report Fish & Wildlife #2 --Mendocino Project is limited to the placement of approx. 105 pieces of large wood at 38 sites along a 5,951-foot stream reach of Olds Creek. Instream structure will be provided by falling select riparian trees or by bringing salvaged logs and rootwads to the stream bank. Either a rubber-tired tractor or hand crews will be used to position, and when necessary, anchor, the logs and rootwads in site specific positions in the channel according to plans. Work will be not required in the wetted portion of the channel.	NOD	
2016059007	CDP_2014-0039 Mendocino County --Mendocino CDFW is issuing an Agreement for 2 encroachments: installing a bridge and boardwalk across one Unnamed Tributary to the Pacific Ocean.	NOD	
2017032035	River Avenue Subdivision - Rezone, Design Review, Tentative Parcel Map, Vesting Tentative Sub. Map 2016-12 Oakdale, City of Oakdale--Stanislaus The proposed project consists of a rezone to Planned Development, Tentative Parcel Map, Vesting Tentative Subdivision Map, and Design Review to allow for the development of twenty-one single family residential units on 5.4 acre site. Other project components include on-site improvements including streets and utilities, common lots, and entry/exit gates.	NOD	
2017042003	Black Butte Bank Erosion Repair Project Santa Clara, City of Orland--Glenn The project proposes to place rock rip-rap revetment along the basin slopes for erosion protection. Approx. 320 feet of new rip-rap would be placed on the north bank and approx. 350 feet of new rip-rap on the south bank. The project would permanently impact approx. 0.213 acre of Great Valley riparian scrub and freshwater marsh. Impacts will be mitigated at a 2:1 ratio at the National Fish and Wildlife Foundation in-lieu fee program.	NOD	
2017042026	Rehabilitation of El Portal / Trousdale Channel and Nine Flap Gates on Sanchez Lagoon Project Burlingame, City of Burlingame--San Mateo The City proposes two stormwater maintenance projects; the Rehabilitation of the El Portal / Trousdale Channels and Nine Flap Gates on Sanchez Lagoon. These projects are combined because they are both involve maintenance on the City of	NOD

	Burlingame stormwater infrastructure that have similar work requirements which could be bundled together into one construction contract. The Rehabilitation of El Portal/Trousdale Channel will consist of multiple concrete repairs in the trapezoidal flood control channel, totaling 15,000 sq. ft. The Nine Flap Gates to be installed on existing stormwater culverts around Sanchez Lagoon, Flap gates would improve the current operational problems plaguing the lagoon like sedimentation and flow reversal.		
2017069005	Robison Ranch DBA NTMP (Lake or Streambed Alteration Agreement No. 1600-2017-0212-R3) Forestry and Fire Protection, Department of --Santa Cruz CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0212-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Matt Greene, Registered Professional Forester. Project is limited to the installation of a low water crooked ford crossing at watercourse crossing "d" within the approved 1-16NTMP-010 SCR Nonindustrial Timber Management Plan.	NOD	
2017068114	Weather Shelter Jack Greaves' Site (ABDSP 173) Parks and Recreation, Department of --San Diego Construct a weather shelter ramada over the historic Jack Graves' site mortar and adobe ruins in Carrizo Marsh. The ramada will have a roof made of corrugated metal with dimensions of 23' x 18' and approx. 8' high. Six concrete footings will be installed at 3' deep and 2' in diameter with a Simpson CB66 post base mounted at the top of the footing. After concrete footings dry for 24 hours, HELIX will construct the rest of the structure using untreated timber and hurricane brackets as shown in the attached design drawing. The exact height of the structure will be determined in the field under the supervision of State Parks to provide improved coverage from the elements. The roof will angle slightly towards the back of the structure to allow rainwater to run off the back and prevent puddling around the perimeter of the structure. Some minor trimming of vegetation may be required.	NOE	
2017068115	Jack a Culvert, REpair Sinkhole and Embankment - 4K930 / 0417000366 Caltrans #4 Los Gatos--Santa Clara Repairs to embankment, jack and replace a failed culvert, injection grouting. this project will make the transportation corridor safer.	NOE	
2017068120	CNG Hybrid Power System for Mobile Vehicles Energy Commission --Madera, El Dorado Terzo Power LLC will develop an integrated CNG powered hybrid power unit for installation onto an agricultural vehicle. The project will involve applied research and development consisting of software modeling, experimental testing, and pilot demonstrations to optimize the system and quantify benefits. Two vehicles, a leased diesel vehicle for baseline comparisons and the CNG hybrid pilot vehicle, will be tested and demonstrated in an orchard over the course of a harvest season. Additional vehicle testing will occur in a laboratory setting for a total of 6 month of vehicle testing time.	NOE

2017068127	Reynolds Water Division (Lake or Streambed Alteration Agreement No. 1600-2017-0109-R1) Fish & Wildlife #1E Rio Dell--Humboldt The project is limited to one encroachment, water diversion from an existing 30-foot deep well hydrologically connected to Eel River. Water is diverted for irrigation and domestic use. Work for the water diversion will include use and maintenance of the water diversion infrastructure (well).	NOE	
2017068128	Cabeen Water Diversion, Stream Crossings, and Remediation Project (Lake or Streambed Alteration Agreement No. 1600-2017-0039-R1) Fish & Wildlife #1E --Humboldt The project is limited to 7 encroachments. One encroachment is for water diversion from an Unnamed Tributary to Squaw Creek. Water is diverted for domestic use. Work for the water diversion will include replacement of existing structure, use, and maintenance of the new water diversion infrastructure. The six other proposed encroachments are to upgrade or decommission stream crossings. Work for these encroachments will include some or all of the following; excavation, culvert removal, installation of properly sized culvert, backfilling and compaction of fill, and rock armoring as necessary to minimize erosion.	NOE	
2017068129	Hessier Water Diversion, Pond, and Stream Project (Lake or Streambed Alteration Agreement No. 1600-2016-0487-R1) Fish & Wildlife #1 --Humboldt The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement number 1600-2016-0487-R1, pursuant to Section 1602 of the Fish and Game Code to Ms. Karen Hessler and Mr. Nya Hessler. The project is limited to ten encroachments (Table 1). Two encroachments are for water diversion from unnamed tributaries to the East Fork Honeydew Creek. Water is diverted for domestic use and irrigation. In addition, water will be diverted to an off stream pond for irrigation use. Work for the water diversion projects will include use and maintenance of the water diversion infrastructure. The seven other proposed encroachments are to upgrade unpermitted crossings and replace failing and undersized culverts. Work for these encroachments will include excavation, removal of the failing culverts, replacement with a new properly sized culverts, backfilling and compaction of fill, and rock armoring as necessary to minimize erosion.	NOE

2017068131	Gaffney Water Diversion and Stream Crossings Remediation Project (Lake or Streambed Alteration Agreement No. 1600-2015-0378-R1) Fish & Wildlife #1 --Mendocino The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement number 1600-2015-0378-R1, pursuant to Section 1602 of the Fish and Game Code to Mr. Justin Gaffney. The project includes a total 14 encroachments. One encroachment is for water diversion from an unnamed tributary to Cinch Creek. Water is diverted for domestic use. Work for the water diversion will include use and maintenance of the water diversion infrastructure. Two ponds with associated outlets are proposed to be modified. Spillways will be lowered and armored to ensure stability and minimize erosion. In addition, eleven crossings are proposed to be upgraded to be compliant with FGC. Work for these encroachments will include excavation, removal of the failing culverts, replacement with a new properly sized culvert, backfilling and compaction of fill, and rock armoring as necessary to minimize erosion.	NOE	
2017068132	Rigden Water Diversion Project (Lake or Streambed Alteration Agreement No. 1600-2015-0437-R1) Fish & Wildlife #1 --Humboldt The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement number 1600-2015-0437-R1, pursuant to Section 1602 of the Fish and Game Code to Mr. Peter Rigden. The project is limited to one encroachment for water diversion. Work for the project will include use and maintenance of the water diversion infrastructure.	NOE	
2017068133	Issuance of Streambed Alteration Agreement No. 1600-2016-0147-R1, Water Diversion Project Fish & Wildlife #1 --Mendocino The project is limited to the following activities: 1) installation and maintenance of water system infrastructure within the channel of Iron Creek and two unnamed tributaries to Iron Creek, and 2) diversion of water from a total of three points of diversion, (PODs 1-3). Water will be diverted under State Water Resource Control Board (SWRCB) Division of Water Rights initial statement of water diversion and use and/or registration for Small Domestic Use (SDU) appropriation. The project proposes to divert up to one acre-foot of water per year, at a maximum rate of 10 gallons per minute (gpm).	NOE	
2017068134	Issuance of Streambed Alteration Agreement No. 1600-2016-0347-R1, Gallagher Ford Crossing Project Fish & Wildlife #1 Willits--Mendocino The project is limited to seasonal maintenance and use of an existing low water crossing within Outlet Creek. Maintenance will include re-location of up to 40 cubic yards of dry gravel materials annually using heavy equipment. Heavy equipment will cross the wetted channel twice per year (one pass each direction) and vehicle crossings will be limited to a total of 20 crossings per year.	NOE

2017061019	Avion Burbank Burbank, City of Burbank--Los Angeles Project applicant has filed an application to permit the development of a mixed-use project in the northern City of Burbank with multiple components including transit connectivity, parking and street improvements, industrial, offices, retail buildings, and a hotel to be located immediately west of the Burbank Bob Hope Airport, west of North Hollywood Way and south of San Fernando Road. The project site includes approx. 60 acres and is currently graded and partially developed with surface parking lots. The proposed project would include a General Plan Amendment to change the General Plan land use designation from Airport to Golden State Commercial/Industrial for the 18-acre portion of the total 60 acre project site as well as other planning entitlements and reviews.	NOP	07/10/2017
2017062019	Kaiser Permanente: 1650 Los Gamos Drive Medical Office Building San Rafael, City of San Rafael--Marin The proposed project includes an amendment to the current Planned Development (PD) zoning to add medical office use as an allowable use in the PD and allow the existing 148,000 gross sq. ft. office building, located at 1650 Los Gamos Drive in San Rafael, it to be utilized as a medical office building. The construction of an up-to 511-space parking structure on the existing surface parking lot located to the west of 1650 Los Gamos Drive that will primarily serve the Kaiser Permanente employees working at the medical office building (parking structure). Continued use of the 42 existing parking spaces located adjacent to the 1650 Los Gamos Drive, on the 1600 Los Gamos Drive property. Kaiser Permanente has legal access to the use of those parking spaces Potential mitigation measures include signalization and upgrades to an unsignalized intersection.	NOP	07/10/2017
2011011010	Long-Term North to South Water Transfer Program San Luis and Delta Mendota Water Authority --Yuba The Long-Term Water Transfers EIS/EIR was certified in 2015. Additional agencies not previously identified in the EIS/EIR have since indicated that they may be interested in water transfers, and three agencies that were already identified in the EIS/EIR indicated an interest in increasing their amount of potential water transfers. These water transfers refine the range of potential transfers specifically acknowledged in the Long-Term Water Transfers EIS/EIR. While individual agencies may be able to transfer additional water, the overall water transfers in total for all agencies would not exceed the 511,094 acre-feet analyzed in the EIS/EIS. SLDMWA prepared an Addendum to evaluate the potential differences between the impacts analyzed in the EIS/EIR and those associated with project refinements. SLDMWA determined that the refinements to the range of potential water transfers would not result in new or substantially more severe environmental effects and do not require further environmental review. 2016071058	<p>Manufacturing/Mixed Use to Retail Commercial; 2) Planning Commission approval of a site development permit to allow construction of up to a 148,000 sq. ft. Costco store, 20-pump fueling station, up to 607 parking stalls, landscaping and associated site improvements on a 15.33 acres parcel; 3) City approval of a consolidation and reconfiguration of parcels to create the Costco parcel; and, 4) Implementation of Agreement ("Agreement") between the City of Ukiah and Costco Wholesale Corporation to effectuate the conveyance of real property and related matters.</p> <p>Manhattan Beach Gelson's Market Manhattan Beach, City of Manhattan--Los Angeles</p> <p>A 27,900 sq. ft. specialty grocery store with on-sale and off-sale alcohol sales, prepared food offerings, and incidental seating areas of 145 sq. ft. (indoor) and 503 sq. ft. (outdoor); a 6,684-sq. ft. bank building; and two surface parking lots with a total of 136 spaces. On the primary site, the project will involve complete demolition of the existing showroom/service depot and partial demolition of the existing collision repair facility, a remodel of the remaining portion, and reconstruction of 7,369 sq. ft. for the specialty grocery store. The new bank building will be constructed on the southern portion of the primary site. On the auxiliary parking site, the existing building will be demolished and the site redeveloped as an auxiliary surface parking lot.</p>	NOD	
2016122059	<p>Old Town Elk Grove Streetscape Phase 2 Project Elk Grove, City of Elk Grove--Sacramento</p> <p>The City of Elk Grove is proposing streetscape and infrastructure improvements to an approx. 2,400 foot long segment of Elk Grove Blvd. between School Street to the west and Waterman Road to the east. The existing alignment extends east-west and serves as one of the main travel corridors in the City. Project will make the site more pedestrian-friendly by providing continuous sidewalks on both the north and south sides of the road, along with crosswalks across Elk Grove Blvd. and the various side streets. A Rectangular Rapid Flash Beacon (RRFB) will be added at the intersection of Porto Rosa Drive and Elk Grove Blvd. to enhance pedestrian crossing safety. The RRFB contains four pedestrian signs, each with 2 small yellow rectangular sources of light which flash when a pedestrian triggers the crosswalk. The light is produced in a direction parallel to Elk Grove Blvd. to warn vehicles of crossing pedestrian. A RRFB will also be placed at the intersection of Kent Street and Elk Grove Blvd. Existing street lighting will be improved with more decorative streetlights consistent with the streetlights in the existing section of Old Town Elk Grove. A few trees along the roadway may be removed to construct improvements, but improvements to landscaping throughout the project site will also include tree and shrub planting along sidewalks. The project will provide one through traffic lane in each direction with bike lanes, as well as a center two-way left-turn lane. The proposed project would realign driveways in the project area to conform to the new sidewalks and streetscape design.</p> <p>Existing overhead utilities are proposed to be placed underground in a new joint trench. Existing utility manholes and vaults, as well as City storm drain inlets and manholes, will need to be adjusted/relocated to match the revised surface grade. Low impact stormwater improvements will be included to improve water quality before discharging runoff to the City storm drain system.</p> <p>A welcome sign has been designed as an option for the proposed project. 2016092066	America Center Phase III Project San Jose, City of San Jose--Santa Clara The project also proposes construction of a six story office building, amenities, and an expanded parking garage within the commercial/office/R&D area of the America Center development. The building would be up to 83 ft tall at the top of roof, and would contain approx 192,350 sf of floor space. Overall, the project would allow for construction of up to 216,000 sf of office/R&D uses and associated amenity space and expansion of the parking garage approved for the eastern portion of the site.	EIR	07/26/2017
2016112007	Eco-Energy Liquid Bulk Receiving Terminal Stockton, Port of Stockton--San Joaquin Eco-Energy is proposing to construct and operate a 10-acre liquid bulk receiving terminal at the Port of Stockton. The Project involves the construction of new rail leads and switches, a rail offload yard to temporarily store up to 108 railcars, the pipeline to connect the terminal to nearby NuStar facility tanks, a single story support building, and a cast-in-place concrete pump station. With construction of the proposed receiving terminal, liquid bulk petroleum products would be transferred from the Eco-Energy terminal to the adjacent NuStar bulk petroleum terminal through a closed-loop pipeline system. A maximum total of 60 unit trains per year would be received at the proposed facility. Construction of the project is expected to occur in the fall of winter of 2017, or as soon as permits are received and would last approx. 10 to 12 months.	EIR	07/26/2017
2017061023	La Mirada Recycled Water Pipeline Expansion Project Central Basin Municipal Water District Santa Fe Springs, La Mirada--Los Angeles The district is proposing to construct the La Mirada Recycled Water Pipeline Expansion Project to expand the existing RWDS in south Santa Fe Springs into the city of La Mirada. The proposed project's objective is to provide recycled water to potential customers in Springs in the city of La Mirada that are currently irrigating landscaped areas with potable water. The proposed pipeline system would consist of a total of approx 39,100 ft of pipelines originating at Bonavista Ave south of Gannet St in the adjacent city of Santa Fe Springs. From there, the new pipeline would continue east within Gannet St, north on Biola Ave, and would generally travel north and east through the city of La Mirada with several branch lines extending to customer sites at various locations along the locations along the main truck lines. The proposed project would require a pump station and reservoir, which would be located on the southern portion of a property owned by the city of La Mirada located to the south of the intersection of Biola Ave and Stage Rd. 2017068233	<p>Replace a Failed Culvert and Fill a Sinkhole - 4K370 / 0417000303 Caltrans #4 --Marin</p> <p>Replace a failed culvert and backfill void on the roadway. This project will make the transportation corridor safer.</p>	NOE	
2017068234	<p>Spring Canyon Defensible Space Access Path Sweetwater Authority --San Diego</p> <p>Consistent with the San Diego County Fire Authority requirements, fuel reduction activities are conducted at the interface of residential areas and the undeveloped lands of the Sweetwater Reservoir property, owned and managed by Sweetwater Authority. The goal of this project is to improve access for field crews conducting fuel reduction activities by adding an unimproved 8-ft wide by 250-ft long access path on the south side of the Spring Canyon HOA property boundary, adjacent to the fenced area. This access path will only be accessed by walking and an all-terrain vehicle.</p> <p>Standard BMPs would be incorporated to the project, including installing and maintaining exclusionary fence and permanent erosion prevention and sediment control measures, as necessary. As a fuel reduction measure, Eucalyptus detritus within the access path would be either converted in mulch on site or removed from site. To avoid impacts to sensitive species and other biological resources, 18 San Diego barrel cactus within the proposed access path area would be translocated to an adjacent area and thus will be unaffected by the proposed access path. Work would occur outside of the nesting season or after a nesting bird survey is conducted.</p> <p>The project will facilitate access to a fire break located in a steep slope, thus aiding in complying with fuel reduction requirements and increasing safety for working crews.</p>	NOE

2016092024	State Route (SR) 242 / Clayton Road Ramps Project Caltrans #4 Concord--Contra Costa Note: Notice of Availability The SR 242/Clayton Rd Ramps project would modify the existing partial interchanges at Clayton Rd and Concord Ave. The SR 242/Clayton Rd interchange would be reconfigured from a partial interchange to provide new northbound and southbound SR 242 on and off ramps. Proposed local roadway improvements include a combination of additional travel lanes and the extension of left turn pockets on Willow Pass Rd, Concord Ave, Franquette Ave, Clayton Rd, Market St, and Commerce Ave. The purpose of the project is to reduce congestion and improve traffic operations at the SR 242/Clayton Rd and SR 242/Concord Ave interchanges, thereby enhancing mobility in the area, and improving accessibility to key local destination including the Concord CBD and the Concord BART station.	FON	
2017061030	High Desert Water Bank Antelope Valley-East Kern Water Agency --Los Angeles The agency proposes the development and operation of a groundwater bank on approx 1,500 acres of land in the western edges of the Antelope Valley. The project would store State Water Project water supplies from the Agency and other banking participants during wet weather year periods when supplies exceed demands and would recover the water for use by the Agency and its partners during dry weather years when demands exceed suppliers and other times when there are disruptions to State Water Project Supplies. Implementation of this project will require the construction of monitoring and production water wells, turnouts of the CA Aqueduct, underground and above ground pipelines, recharge basins, and water storage and booster pump facilities.	MND	07/13/2017
2017061031	Jamboree Road (Main to Barranca) Widening Project Irvine, City of Irvine--Orange The city of Irvine has prepared an initial study mitigated negative declaration to analyze the potential environmental effects associated with the proposed roadway widening project along Jamboree Rd, Main to Barranca. Jamboree Rd is a significant roadway to the city's Irvine Business Complex, which is a major employment hub serving surrounding communities within the city of Irvine and the county of Orange. The proposed roadway widening will add a fifth northbound through lane and a fifth southbound through lane on Jamboree Rd, Main St to Barranca Parkway, from approx 2,000 ft south of Main St to approx 2,000 ft north of Barranca Parkway to improve the existing level of service along Jamboree Rd. The overall length of the project study area along Jamboree Rd is approx 1.2 miles. The project would acquire land on both sides of the existing roadway by widening the same distance from the existing roadway centerline. Construction activities along the road segments include construction of concrete curbs and gutters, curb ramps, concrete sidewalks. Asphalt Rubber Hot Mix, Filtera Box Systems, catch basins, local depressions, and resurfacing of slurry seal type.	MND	07/13/2017

1989070309	<p>Deutsch Project, Specific Plan and Environmental Impact Beaumont, City of BEAUMONT--RIVERSIDE</p> <p>CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0017-R6, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Beaumont Sundance LLC.</p> <p>Project is limited to the commercial development of a 13.6 acre lot located on the west side of Highland Springs Avenue immediately north of Eighth Street within the City of Beaumont. The commercial development will include on-site parking and street improvements (e.g. sidewalk) and the reconstruction of the existing HSFCC. approx. 873 linear feet of the HSFCC are proposed to be replaced with reinforced concrete box culvert storm drain thereby placing the channel underground for this section.</p>	NOD	
2000011025	<p>Additional Environmental Analysis for the Newhall Ranch 2010 RMDP/SCP EIR Fish & Game #5 Santa Clarita--Los Angeles</p> <p>The project was previously approved by the CDFW in 2010 consists of the MSAA and ITPs identified above, all of which rely on otherwise implement in whole or in part of the RMDP and SCP. In approving the Project in 2010 CDFW also certified an environmental impact report (hereafter, the 2010 EIR), and took other related actions under CEQA and the Fish and Game Code, including the filing of a NOD and Decision on Dec. 3, 2010. In 2015 in related litigation the CA Supreme Court identified two issues in need of further attention by CDFW. (Center for Biological Diversity v CDFW (2015) 62 Cal.4th 204). The court directed CDFW to revisit its 2010 determination that the project's GHG would not be significant under CEQA. The Court also held that two mitigation measures approved by CDFW in 2010 authorizing, if necessary, collection and relocation of stranded fish during in-water construction activity violated protections afforded species designated as "fully protected" under the Fish and Game Code.</p> <p>On remand from the Supreme Court the Project applicant, the Newhall Land and Farming Company proposed various modifications to the previously approved Project to address the two issues identified by the Supreme Court. As to GHG, the project applicant developed a suite of thirteen measures in a detailed reduction plan to achieve "Net Zero Emissions" for the project, thereby offsetting 100% of the Project's GHG Emissions. Relying on technical input from the CARB CDFW has determined that the project's GHG emissions will not be significant under CEQA.</p> <p>As to the collection and relocation measures addressed by the Supreme Court, the Project applicant proposed modifications to obviate any need for the measures as originally approved by CDFW in 2010. Specifically, the Project applicant will implement changes to the timing and construction methods for the project bridges and bank stabilization infrastructure that will avoid all water contact during the construction of those facilities. With the "no water contact" during related</p>	NOD

2017068242	Emergency Permit for Treatment of Hazardous Waste, Genentech, San Mateo, County, California Toxic Substances Control, Department of South San Francisco--San Mateo The California Department of Toxic Substances Control (DTSC), pursuant to authority granted under Chapter 6.5, California Code of Regulations, Title 22, Division 4.5, Section 66270.62, has issued an Emergency Permit to Genentech SSF (EPA IDs: Building 15-CAR000182634, Building 48-CAR000182709 and Building 7-CAD080129000) to treat hazardous waste by chemical stabilization. These hazardous waste items are expired. The items are currently being stored in the reactive flammable cabinets at three Genentech SSF waste storage areas in South San Francisco, California 94080. DTSC has determined as a safety precaution to prevent an accident or severe injury, an Emergency Permit should be issued to chemically stabilize the hazardous waste prior to transportation off site by Clean Harbors Environmental Services (CHES). The treatment of the hazardous waste involves the controlled addition of solution to the containers to reduce the reactive or ignitable characteristics of the chemicals. Treatment will take place within a designated exclusion zone specific to each site. Building 15 will have a 50 foot radius in all directions; Building 48 will have a 93 foot x 90 foot area; Building 7 will have a 48 foot x 105 foot area. Only reactive material technicians from CHES will be allowed in the exclusion zone. Movement, preparation, and treatment of the items will be in accordance with established standards. A follow-up report will be submitted to DTSC by Genentech SSF. The report shall include certification that the treatment area has been cleared of all residual hazardous waste generated from this emergency treatment and that all generated waste has been properly managed and/or disposed. The Emergency Permit is effective beginning June 17, 2017 and shall expire on September 14, 2017. The treatment is anticipated to take place on a Saturday when the one nearby sensitive receptor (a day care center) will be closed.	NOE	
2017068243	Red Hen Vineyard Pierce's Disease Revegetation Project (Lake or Streambed Alteration Agreement No. 1600-2017-0036-R3 Fish & Wildlife #3 --Napa The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement number 1600-2017-0036-R3, pursuant to Section 1602 of the Fish and Game Code to Red Hen Partners, LLC. This project includes riparian vegetation management along approximately 750 linear feet within Dry Creek streambank in order to reduce suitable host plants for Pierce's Disease (<i>Xylella fastidiosa</i>) in areas adjacent to vineyards. The project includes the following components: 1) convert high pressure sodium (HPS) high mast fixtures to light emitting diode (LED) fixtures; 2) convert HPS wall pack fixtures to LED fixtures; 3) convert HPS cobra head fixtures to LED fixtures; 4) convert HPS ceiling fixtures to LED fixtures; 5) convert incandescent fixtures to LED fixtures; and 6) convert T8 fluorescent fixtures to LED fixtures.	NOE	
2017068255	Lighting and Mechanical Retrofit Corrections and Rehabilitation, Department of San Luis Obispo--San Luis Obispo Pursuant to Energy Executive Order B-18-12 calling for a reduction in energy usage of 20 percent by the year 2018 for all state facilities, the California Department of Corrections and Rehabilitation (CDCR) is proposing to retrofit existing lighting and upgrade mechanical systems at CMC. The project includes the following components: 1) convert high pressure sodium (HPS) high mast fixtures to light emitting diode (LED) fixtures; 2) convert HPS wall pack fixtures to LED fixtures; 3) convert HPS cobra head fixtures to LED fixtures; 4) convert HPS flood fixtures to LED fixtures; 5) convert incandescent fixtures to LED fixtures; 6) convert fluorescent exit sign fixtures to LED fixtures; 7) replace inefficient hot water heaters in dorms with energy efficient hot water heaters; and 8) install variable frequency drives on the supply and return fan motors at East Facility. The purpose of the project is to reduce electrical and gas usage, and maintenance costs. The intensity, timing, and duration of lighting will therefore remain the same.	NOE

	approximately 256,802 sf of net new floor area within the project site.		
2016082077	CalCannabis Cultivation Licensing Program Food and Agriculture, Department of -- The overarching goal of the proposed program is to establish a regulatory licensing program that would ensure that commercial cannabis cultivation operations would be performed in a manner that protects the general public, cannabis cultivation workers, and the environment from the individual and cumulative effects of these operations, and fully complies with all applicable laws. An additional purpose is to establish a track and trace program to ensure the movement of medical and adult-use cannabis items are tracked throughout the production chain.	EIR	07/31/2017
2017021049	Alliance California Gateway South Building 4 San Bernardino, City of San Bernardino--San Bernardino Development of one high cube logistics warehouse building having 1,063,852 sf of floor space and 188 loading docks on the site of the existing San Bernardino Public Golf Club. Other site improvements include truck courts, drive isles, parking areas, landscaping, lighting, signage, and a water quality/detention basin. Riverside Public Utility water well abandonments and relocations and Southern California Edison easement and power pole abandonments and relocations would occur, as well as off-site road improvements to the north between the project site and Orange Show Road.	EIR	07/31/2017
2014032060	Saranap Village Mixed Use Project Contra Costa County Walnut Creek--Contra Costa Request for approval of a General Plan Amendment, Rezoning, Major Subdivision, and Final Development Plan for the Saranap Village Mixed Use Project in Contra Costa County. The project analyzed in the eptember 2014 draft EIR calls for 235 multi-family units, approximately 44,000 sf of commercial space, and major right of way improvements. The County is recirculation portions of the DEIR to address public comments on the Aesthetics analysis; analyze a new Mitigated Plan Alternative that includes 196 multi-family units, approx. 22,000 sf of commercial space, and slight changes to proposed ROW improvements; and analyzes a reclassification of Blvd Way from arterial to collector.	FIN	
2017061032	Joint Use Fields Project San Diego Unified School District San Diego--San Diego Construction and operation of joint use fields at two District school sites, Cubberly Elementary and Encanto ES. Each project would entail the installation of a new natural turf field and a stabilized walking track that would provide new recreational space for students and residents at each site. A joint use agreement would be executed between the District and the city's park and recreation department that specifies details of the use. The fields would be constructed with bond funding from the district's proposition Z, while the city would commit to operate and maintain the facilities. The proposed project does not include the installation of lighting; accordingly, fields would not be used between dusk and dawn.	MND	07/14/2017

2017061033	Haynes Generating Station Units 3 Through 6 Demolition Project Los Angeles Department of Water and Power Long Beach--Los Angeles The proposed project would include the removal of units 3, 4, 5, and 6, which were originally constructed more than 5 decades ago, to minimize health and safety risks and reduce future maintenance. Although these units were operationally decommissioned, the units were left physically in place. Tanks D and E, which are empty and have been cleaned, are also proposed for demolition. In addition, various ancillary facilities would also be demolished as part of the project. These include electrical and control buildings, generator step-ups, polishing tank, maintenance shop, and storage structures. The duration of demolition and associated activities would be approx 2.5 years. Demolition would typically take place 5 days per week Monday through Friday in 8-hour shifts. During peak project demolition, more than 100 workers would be on site.	MND	07/14/2017
2017061034	MDRA 14-036 Sanchez Residential Additions Poway, City of Poway--San Diego A request to construct a 1,574 sf addition to an existing residence at 16290 Rostrata Hill Rd, convert a detached garage/work shop to a 988 sf guest house, and construct a new attached 833 sf garage and work-out room.	MND	07/14/2017
2017061035	Talus Creek Diversion Project Los Angeles Department of Water and Power --Inyo LADWP proposes to divert the flow of Talus Creek into the Second Los Angeles Aqueduct for municipal use. When flowing, Talus creek crosses over both Los Angeles Aqueducts and becomes braided before infiltrating the ground and evaporating west of Hwy 395. A measuring weir, slide gate, steel pipe, and small settling pond with grating cover would be installed as part of the proposed project. When Talus Creek is not flowing, the pipe connecting to the SLAA would be closed off with a slide gate to prevent any inflow of debris or animals.	MND	07/14/2017
2017061036	Descanso Community Services District 2017 Water System Improvements Descanso Community Water District --San Diego Improvements to potable water system - Construction of joint treatment facility, install new pipeline from Well #5 to Well #6, construct new block wall building for iron and manganese treatment switch and propane tank at Well #6, install portable generator and manual transfer switch at Well #5, install communication antenna at Well #6, install new water distribution pipeline from Well #6 to existing distribution system, install flowmeter and groundwater level sensors at Well #5 and Well #6, replace existing highline with new underground water transmission pipeline along Viejas Grade Rd, set up and use staging and laydown areas to facilitate water system improvement work.	MND	07/14/2017
2017062034	BSDS Investments, LLC Final Map Subdivision Humboldt County --Humboldt A major subdivision to divide an approx one-acre parcel into seven lots ranging in size from 6,000 sf to 7,481 sf. The parcel is currently vacant and approx 100 trees are proposed to be removed to facilitate the subdivision. An exception to the solar shading requirements and right of way width is requested. The parcels will be served with community water and sewer provided by the McKinleyville Community	MND	07/14/2017

2017068287	Montebello: A Mixed-Use Condominium Project at El Cajon Boulevard and Thome Drive La Mesa, City of La Mesa--San Diego A Tentative Tract Map, Site Development Plan, and Design Review to construct a mixed-use condominium project at El Cajon Boulevard and Thome Drive in the C-D-MU (General Commercial/Urban Design Overlay/Mixed-Use Overlay) and R3-MU (Multiple Unite Residential/Mixed-Use Overlay) zones. The property owner, Arnold & Valerle Schmidt Revocable Trust, is proposing a new mixed-use development located at El Cajon Boulevard and Thorne Drive called Montebello. The subject development consists of two properties located on the north and south sides of El Cajon Boulevard to the west of Thorne Drive. The site consists of 4.66-acres addressed as 7664-7696 El Cajon Boulevard, 7699 El Cajon Boulevard, and 5017 Thorne Drive, La Mesa, CA 91942. The Assessor Parcel Numbers for the subject property are: 470-100-02-00, 470-100-03-00, 470-100-04-00, 470-100-05-00, 470-100-19-00, 470-150-07-00, and 774-701-00-06. The applicant proposes to construct 253 residential condominium units and 12 commercial condominium sites (approximately 5,000 sf) utilizing State Density Bonus Provisions. The application of the State Density Provisions provides Incentives or concessions, and wavers or reductions of development standards, subject to restricting 21 condominium units for affordable housing for a period of 30 years. The project includes commercial suites along the El Cajon Boulevard street frontage and residential condominiums behind and above the commercial use with parking on the ground level, including some subterranean parking on Montebello North. An affordable housing density bonus is proposed for this project in accordance with Government Code Section 65915. The applicant proposes a density of 54.3 dwelling units per acre with 253 residential condominium units on the 4.66-acre site. The Mixed-Use Overlay prescribes a density limit of 40 dwelling units per acre. The applicant has applied for a Density Bonus using State Density Bonus provisions which allow for the increased density. In exchange for the increased density, the project provides 11% of the units for very low income residents for 21 units (9 one bedroom: 12 two-bedroom units) with a 30-year affordability term. Pursuant to the Mixed-Use Overlay Zone, 187 units would be allowed without the State Density Bonus Provisions. The project proposes a 35% Density Provision Bonus, per Government Code 65915, which allows for 66 additional units. An affordable housing regulatory agreement to memorialize the affordable housing provisions, and related CC&Rs, will be recorded prior to building permit issuance. The site is zoned C-D-MU (General Commercial/Urban Design Overlay/Mixed-Use Overlay) and the northerly two-acre portion of Montebello North is R3-MU (multiple unit residential/mixed-use overlay). The entire subject property is designated in the	NOE

General Plan for "Mixed-Use Urban" land use. On April 28, 2009, the City Council approved General Plan Amendment GPA 08-01 and Zoning Ordinance Amendment ZOA 08-01 (Resolution No. 2009-062), which extended the Mixed-Use Overlay Zone to the north by two acres on Montebello North. The General Commercial zone is intended to provide areas in which all types of retail businesses, offices and services can be conducted. This zone is applied generally along major streets and in shopping centers. As stated in the City of La Mesa Zoning Ordinance, the Mixed Use-MU zone allows for "commercial uses that are neighborhood serving that generate pedestrian activity, such as cafes, restaurants, bookstores, floral shops, retail shopping, commercial recreation and entertainment spaces, personal and convenience service stores, bakeries, travel agencies, childcare facilities, art galleries, and offices. "The specific purpose of the Mixed-Use Overlay Zone is to provide a mechanism to:

- Revitalize older commercial corridors; Increase opportunities for infill housing while transforming and aesthetically improving transportation corridors into tree-lined civic boulevards with mixed use projects;
- Encourage new housing and innovative retail that is less automobile dependent; and
- Help to create pedestrian oriented neighborhoods where local residents have services, shops, jobs, and access to transit within walking distance of their homes.

The "Mixed-Use Urban" land use designation is assigned to the City's transportation corridors such as University Avenue, El Cajon Boulevard and La Mesa Boulevard. It is intended to allow a more intensive level of commercial development than Local Serving Commercial, but not the high volume regionally significant activities found in Regional Serving Commercial. By allowing a mixture of residential and commercial uses along established transit routes, the City hopes to encourage new housing that is less dependent upon the automobile for access and creates a livable urban environment. The proposed project would not conflict with any applicable land use plans, policies, or regulations because mixed use development is allowed by the Mixed-Up Overlay Zone and by the City's General Plan, and the proposed density increase and associated waivers and concessions are allowed in accordance with State Law.

The Arnold and Valerie Schidt Trust, property owner, is the beneficiary of the project. The project meets the required findings for approval under the City's Zoning and Subdivision Ordinances and the Subdivision Map Act. The Project required approval of a Site Development Plan (Case File No. DAB 14-18) and a Tentative Tract Map (Case File No. TTM 14-02) by the La Mesa Planning Commission. The Project also required consideration by the Design Review Board with their recommendations subject to City Council ratification. The City Council ratified the Tentative Tract Map/Site Development Plan, Design Review DRB 14-18 on June 13, 2017.
