STATE CLEARINGHOUSE

NEWSLETTER

June 16-30, 2009

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **June 16-30, 2009**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: February 13, 2007
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, Senior Planner
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner
916-445-0613
scott.morgan@opr.ca.gov .

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
2000 through 2008**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

<u>Documents Received on Tuesday, June 16, 2009</u>			
2007062084	Hidden Falls Regional Park (PEIR T20070444) Placer County Lincoln, Auburn--Placer NOTE: Review Per Lead The Hidden Falls Regional Park Project involves access and passive recreation improvements at a regional park proposed by the Placer County Department of Facility Services. The County has the principal responsibility for approving and carrying out the proposed project and is the primary source of funding for the proposed project. The proposed project would include improvements of access, and construction of a multiple-use, natural0surface trail system and other passive recreational facilities that would be located within Hidden Falls Region Park. The Park is located in Placer County between north Auburn and the City of Lincoln.	EIR	07/30/2009
2008081090	San Joaquin Cross Valley Loop Transmission Project Public Utilities Commission Visalia, Farmersville--Tulare NOTE: Review Per Lead Southern California Edison (SCE), in its California Public Utilities Commission (CPUC) application (A.08-05-039), filed on May 30, 2008, seeks a Certificate of Public Convenience and Necessity (CPCN) for the San Joaquin Cross Valley Loop Transmission Line Project (Proposed Project), which includes the following major elements. The objective of the Proposed Project is to build electrical facilities necessary to maintain safe and reliable electric service to customers, and serve the forecasted electrical demand in the southeastern portion of the San Joaquin Valley.	EIR	07/31/2009
2009061056	Conditional Use Permit Case No. 26, Map No. 79 Kern County Bakersfield--Kern A Conditional Use Permit to allow a hazardous chemicals storage facility (Section 19.38.030.D.2) in a M-2 PD (Medium Industrial-Precise Development Combining) District. The project site is located at the northwest corner of Seventh Standard Road and Broken Court in western Rosedale. The project area stretches across the south half of 2 seperate 4.3 acre parcels, and totals 4.42 acres. The site is zoned M-2 PD and is designated SI (Service Industrial) by the Western Roasedale Specific Plan. The northern half of the 2 parcels, north of the project owner. The property owner leases the southern half of the 2 parcels to the current applicant, Mutli-Chem Group, LLC. The project site is currently developed with a 3,000 sf office/shop/warehouse, parking lot, landscaping, and an outdoor storage yard. The project site is fully fenced and has recently been graded. The applicant is requeston a conditional use permit to add a hazardous chemicals storage area tot he existing office and shop facility. Approval of the current request would allow the existing facility to receive, store, and distribute potentially hazardous production chemicals to customers within Kern County, Santa Barbara County, Tulare County, and Kings County. The applicant intends to continue to use the existing 3,000 sf office building for administrative operations, is in the process of adding a commercial coach for additional office space, and will use the remaining portion of the parcel for the out door storage and warehousing of	MND	07/15/2009

	hazardous chemicals.		
2009061058	Location and Development Plan 07-03, Conditional Use Permit 09-04 Adelanto, City of Adelanto--San Bernardino The location and development plan is for the construction of a 16,000 sf metal building for the remanufacture of wooden pallets. The conditional use permit is for the outdoor storage of wooden pallets.	MND	07/15/2009
2009062061	Pla-Vada Community Assn Water Storage Tank and Well Nevada County --Nevada Use permit application to install a 130,000 gal water storage tank for Pla-Vada Community Assn, plus a new well, pump, & pump house.	MND	07/15/2009
2009061061	The Art Exchange Long Beach, City of Long Beach--Los Angeles The art Exchange is intended to provide a permanent and affordable workplace for the development and production of art by local artists. The Exchange would operate on a profit-centered business model where artists sell directly to the public and are connected to networking opportunities that would help promote an art community for the City. The project totals approximately 10,850 sf of building area on a 15,000 sf site (0.34 acres) with nearly 6,000 sf in new floor area which will complement the historic former Acres of Books building and use similar open truss structural systems. The project will utilize the Acres of Books building by renovating and reusing the front 5,000 sf (50 foot wide street frontage and 100 foot depth), maintaining the façade on Long Beach Boulevard. The project building will use an open floor plan to take advantage of the existing clear span structural system along with adjustable wall systems to create studios and other spaces that can change for future needs. Sustainable plans for this project include obtaining LEED certification at a minimum of the Silver level as well as compliance with the City's Green Building Code.	NOP	07/15/2009
2009061062	Brentwood Town Green Los Angeles, City of --Los Angeles The proposed project would develop 40,139 sf of neighborhood-oriented commercial uses within two story commercial buildings. The buildings would house approximate 25 commercial tenant spaces, ranging from 400 to 6,000 sf. The project would be built above a one-level subterranean parking garage, approximately 12 feet below grade. Additional at-grade parking would be provided in the northern portion of the site. The project site would also include 3,000 sf of outdoor food consumption areas. Each building would be approximately 32 feet in height, and a retractable fabric canopy would be added over the open courtyard areas, bringing the total project height to 50 feet. Existing buildings on the project site would be demolished.	NOP	07/15/2009
2007091125	PC 07-32 - Special Equestrian Area No. 1 Twentynine Palms, City of Twentynine Palms--San Bernardino The City of Twentynine Palms Community Development Department is proposing to adopt an overlay designation for a 2 square mile area of the community. This designation shall identify the properties as "horse" property and will allow a higher	Neg	07/15/2009

Neg	07/15/2009
2007011083	Mendota General Plan Update Mendota, City of Mendota, Firebaugh--Fresno The City proposes to update its General Plan, which had its last comprehensive update in 1991. The proposed General Plan update will address six of the seven mandatory topics: Land Use, Circulation, Open Space, Conservation, Noise, and Safety. The Housing Element was prepared separately in 2004 and is not required to be updated until 2009. The City of Mendota is situated in the central portion of the San Joaquin Valley, in northwestern Fresno County near the confluence of the San Joaquin River and the Fresno Slough. State Routes (SR) 33 and 180 also intersect in Mendota. The main transportation route between northern and southern California, Interstate 5, is located about 15 miles west of Mendota. The City is approximately ten miles southeast of the City of Firebaugh and 35 miles west of the City of Fresno.	Oth	
2009012002	La Joya Mine Remediation Fish & Game #3 --Napa The proposed La Joya Mine Remediation Project consists of removing ~6,500 cubic yards of existing mine tailings adjacent to an unnamed tributary to Cry Creek upslope to three separate receiving sites.	Oth	
1992102990	Well Drilling Project on Private Lands in Mammoth Lakes Mammoth County Water District Mammoth County Water District has applied for an amended water supply permit to operate five new wells, construct one new water treatment facility, install new pipelines and construct a new booster station to provide drinking water for existing and new customers within their service area.	NOD	
2004022111	City of Chico Water Pollution Control Plant Expansion Chico, City of Chico--Butte The project involves constructing a new outfall pipeline and diffuser to replace the existing pipeline and diffuser. The existing outfall diffuser is designed to handle 12 million gallons per day (MGD) of wet weather flow. The new outfall pipeline and diffuser will be designed to handle 37.5 MGD of peak wet weather flow (PWWF) to match the designed PWWF of the existing WPCP at future build-out. The existing outfall will be abandoned, capped, and sealed once the new outfall is constructed.	NOD	
2005102034	Arsenic Removal at Mammoth Community Water District Groundwater Treatment Plants #1 and #2 Mammoth County Water District Mammoth Lakes--Mono Mammoth County Water District has applied for an amended water supply permit	NOD

	to operate two arsenic removal treatment plants for two of their existing wells. The project involves the installation of chemical feed equipment at both treatment plants to inject ferric chloride to the water treatment process. Precipitated arsenic will eventually be disposed of at the Benton Crossing Landfill.		
2006122032	Hughson Wastewater Treatment Plant Hughson, City of Hughson--Stanislaus The proposed project will involve expanding and upgrade the WWTP to increase capacity from 1.0 million gallon per day (mgd) to 1.9 mgd, and address violations of effluent limitations. The Project involves: 1) modifying and upgrading the headworks with coarse and fine screens, 2) installing a Parhshall flume and bio-filters, 3) constructing a return activated sludge and waste activated sludge pump station, 4) installing two gravity belt filter presses, 5) upgrading the operations center building, 6) installing a supervisory control and data acquisition system, 7) removing the Hatch Road influent pump station and associated force main, 8) installing a 36-inch gravity sewer to extend approximately one mile from Hatch Road to the new influent pump station, 9) abandoning percolation ponds seven through ten, 10) rehabilitation and grading percolation ponds five and six, and 11) constructing new percolation ponds.	NOD	
2007072064	Zone 3 / Old Mammoth Water Storage Tank Mammoth County Water District Mammoth Lakes--Mono The Mammoth Community Water District will operate and maintain a new one-million gallon water storage tank on National Forest System land in the Mammoth Bluffs area off of Old Mammoth Road. The purpose of the water tank is to improve the existing water distribution system to better meet fire flow demands throughout the Town of Mammoth Lakes. Ancillary structures include a control building adjacent to the water tank, and electrical transformer, a 150 foot long improved gravel access road, and two underground pipelines.	NOD	
2007121113	New Water Production Wells: 2007 Lake Arrowhead Community Services District --San Bernardino Lake Arrowhead Community Services District is proposing to construct and operate two new groundwater production wells (Wells No 6 & 8) and associated sodium hypochlorite chlorination treatment systems. Wells No. 6 & 8 are two of eight new municipal wells being proposed in the Lake Arrowhead community. The wells will be drilled at a 12-inch diameter and to an estimated depth of approximately 715 feet.	NOD	
2009042033	Van Sickle Bi-State Park Tahoe Conservancy South Lake Tahoe--El Dorado Special use permit for 156 acres of land on the California side of the state line and 262 acres of land on the Nevada side for a new 418 acre bi-state park. The park includes day use areas, multi-use trails and Stream Environment Zone restoration. The day use areas include picnic table and restrooms.	NOD

2009042094	<p>Pulgas Balancing Reservoir Structural Rehabilitation and Roof Replacement Project San Francisco, City and County of --San Mateo</p> <p>The San Francisco Public Utilities Commission (SFPUC) is proposing the Pulgas Balancing Reservoir Structural Rehabilitation and Roof Replacement Project to demolish and rebuild the roof of the existing Pulgas Balancing Reservoir (located near the southern end of Upper Crystal Springs Reservoir on property owned by the SFPUC in unincorporated San Mateo County) to improve seismic and water quality reliability. The San Francisco Planning Department is the lead agency under the CEQA.</p> <p>The project includes the construction of shear walls at all four corners of the reservoir foundation; repairing and resealing cracks in the reservoir walls and slab, fixing corroded rebar, and replacing out-of-date, miscellaneous mechanical and architectural structures within the reservoir (electrical, security and ventilation systems). All proposed improvements would be constructed within existing SFPUC facilities and would not require acquisition of new property. The proposed duration of construction activities is approximately 11 months. Project construction is anticipated to begin in the spring of 2010 and continue through the summer of 2011.</p>	NOD	
2009068237	<p>Luther Pass Pump Station Standby Generators Replacement South Tahoe Public Utility District South Lake Tahoe--El Dorado</p> <p>The Luther Pass Pump Station currently has two 1200kW diesel-powered generators housed in an on-site trailer. One generator has burned up and the remaining generator is obsolete. This replacement project includes a new diesel-powered generator(s) in a durable building in about the same location. The beneficiaries are District ratepayers and other visitors and residents of the Lake Tahoe area.</p>	NOE	
2009068238	<p>Emergency Retention Basin Liner Replacement Project South Tahoe Public Utility District --El Dorado</p> <p>Replacement of existing, 20-year old liner which has reached the end of its useful life, and doesn't meet current requirements. New liner will decrease basin failures and improve performance in storm events. Replacement has been requested by Lahontan RWQCB. Beneficiaries are District ratepayers and the Lake Tahoe environment.</p>	NOE	
2009068239	<p>Wastewater Headworks Replacement Project South Tahoe Public Utility District South Lake Tahoe--El Dorado</p> <p>Replacement of existing STPUD plant headworks which was originally built in 1959 and expanded in 1966. The existing grit removal process plugs up consistently, requiring extensive maintenance and the outdated grit removal devices catch more organics than necessary, negatively impacting landfills. STPUD proposes to build a new headworks to current building codes and utilizing industry standard equipment to improve the ability to process wastewater, as well as offer environmentally sound biosolids capture and recycling.</p>	NOE

<u>Documents Received on Wednesday, June 17, 2009</u>			
2009061065	Eagle Canyon Dam and Debris Basin Project Riverside County Flood Control and Water Conservation Cathedral City, Palm Springs--Riverside The proposed project would include the construction, operation and maintenance of an earthen dam, debris catchment and underground storm drain. The project will provide flood detention and flood hazard mitigation for the developed portion of Cathedral City located downstream of the canyon. The outlet works would be ungated and the dam would, therefore, only hold water for brief periods of time following significant flood events. The debris basin would keep sediment and debris from flowing downstream and would be cleaned out on a periodic basis to prevent buildup of debris and soils. Stormwater flows from the wash would be conveyed through approximately 3300 lineal feet of 42" drainage pipeline (Line 43), which extends to East Palm Canyon Drive (Highway 111) and follows the right-of-way for approximately 1000 LF, terminating at the West Cathedral Channel, which is located southeast of Eagle Canyon next to Bankside Drive. Prior to construction of the project, the Project Proponent anticipates remediation of potentially hazardous materials resulting from illegal dumping that previously occurred on the site.	NOP	07/16/2009
2009061066	Mission Canyon Community Plan Santa Barbara County --Santa Barbara The purpose of the proposed Mission Canyon Community Plan is to articulate and implement the community's expressed desire to preserve neighborhood character and charm and protect and enhance the quality of life enjoyed by residents and visitors. The project consists of the draft Mission Canyon Community Plan, Residential Design Guidelines and implementing amendments to the County's Land Use and Development Code.	NOP	07/16/2009
1994033009	Russian River Summer Crossings Sonoma County --Sonoma The Sonoma County Department of Transportation and Public Works proposes to continue installation and removal of 3 summer crossings across the Russian River. The purpose of the project is to provide local access to residents and improve emergency access during the summer months. The summer crossings are located at Washington School Road near Asti, Vacation Beach Avenue at Vacation Beach and Odd Fellows road in Guerneville. The summer crossings consist of temporary bridges that span the low-flow channel of the Russian River and gravel roads that are constructed over the remainder of the channel to meet up with the bridge.	NOD	
2007082027	Gualala Instream UPE04-0040 Sonoma County --Sonoma The Applicant, William Hay Jr. of Bed Rock Incorporated proposes to commercially mine gravel in the Gualala River near Gualala, in Sonoma County. Proposed work includes gravel extraction from 12 gravel bars in the South Fork and Wheatfield Fork of the Gualala River, installation of summer crossings to access the mining sites, processing gravel at a plant adjacent to the river, and maintenance of a diversion sump and the diversion of water from the river to operate the gravel plant. Habitat enhancements such as large wood structures are covered by this agreement.	NOD

2008091054	Terminal Hill Tunnel and Shaft Project Los Angeles, City of Los Angeles, City of--Los Angeles The Metropolitan has granted the Los Angeles Department of Power and Water a permanent easement for access to their construction project at the Second Los Angeles Aqueduct. The permanent easement is granted subject to terms and conditions as sepcifies in the Permanent Easement Deeds. Metropolitan requires installation and construction or reconstruction plans to be submitted for review and written approval.	NOD	
2008092116	San Joaquin River Restoration Stream Gage Installation and Operation/Maintenance Water Resources, Department of --Madera, Merced, Fresno The CDFG is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the Project applicant, CA Dept. of Water Resources, San Joaquin District. The Project consists of the rehabilitation of 2 existing water monitoring gage structures and the installation of 3 new water monitoring gages. Work will be conducted when the river is dry. Existing gages will have 4 inch diameter conduits extended between 30 to 45 ft into the low-flow channel of the river and will be anchored to the river bottom using concrete and steel. New gage installations will require excavation of a rectangular area (5ft x 5ft x 2 ft) to form concrete foundations. Upright standing culvert pipes will be anchpred to the poured concrete foundations using a crane to move and position the gage house. Sections of 4 inch pipe will be attached to the new gage house (via a 45-90 degree elbow) and placed above ground from the gage house down the side of the embankment and into the San Joaquin River. 2 to 3 anchors will be installed in the channel to keep the conduit containing the probes stable.	NOD	
2009021089	Summit Drive Drainaige Improvements Project San Diego County Escondido--San Diego The project is replacement and improvement of drainage facilities to accommodate the 100 yr storm flows beneath Summit Drive.	NOD	
2009041039	San Marcos Elementary School Reconstruction San Marcos Unified School District San Marcos--San Diego The project would require the demolition of the existing elementary school. The school would be reconstructed to accommodate 850 students, an increase of 300 student seats, representing a 31 percent increase in enrollment capacity. The project also includes a reconfiguration of the school site boundaries.	NOD	
2009042092	T-Mobile Cellular Monopole, Hebrew Christian Church Eureka, City of Eureka--Humboldt The project is composed of the construction of a 50 ft high, 16 inch diameter painted steel T-Mobile cellular monopole with cellular cabinets in back of the existing Hebrew Christian Church, within a 200 sf area of property on a developed 66.5ft x 56 ft parcel in the central area of the City of Eureka. The cellular pole would be a monopole design with 3 concealed antennas within a plastic enclosure cover (radome) without top lighting. The foundation for the monopole would be ~7 ft square and 7 to 8 ft in depth located at the back of the building within the existing lawn and sidewalk area. The total number of cubic yards of soil to be	NOD

	removed from the site is 12 yards. The remainder of the existing lawn and sidewalk would remain. The Applicant in submitting for a building permit would be required to furnish a soils report, structural drawings for the foundation and pole certified by a California Licensed Structural Engineer.		
2009068246	Visitor Center Fencing Project, Red Rock Canyon State Park Parks and Recreation, Department of --Kern The project is to install a fence along the northwest section of Abbott Drive near the Red Rock Canyon State Park Visitor Center. The goal and purpose of the fence is to prevent vehicles from illegally accessing the main wash. The project will direct vehicles to use and remain on the designated road. The fence will be made of four foot treated peeler lodge poles and three foot steel rods. DPR-approved standard project requirements have been incorporated into this project.	NOE	
2009068247	Removal Action Workplan, Proposed Modernization Project on Portions of the Existing Vicentia Elementary School Campus, Corona-Norco Unified School District Toxic Substances Control, Department of Corona--Riverside The project involves approval of a Removal Action Work Plan (RAW) by the Department of Toxic Substances Control pursuant to Health & Safety Code, chapter 6.8, submitted on January 22, 2009 by Leighton Consulting, Inc. The RAW, prepared in accordance with Health & Safety Code section 25323.1 and 25356.1 subsec (h), focuses on removal and offsite disposal of soils impacted with excessive levels of polychlorinated biphenyls at the project site. The purpose of the project is to mitigate impacted soils that exceed the project-specific human health risk criteria to minimize human exposure to identified chemicals of concern.	NOE	
2009068248	Lake Skinner Outlet Conduit Repair Project Metropolitan Water District of Southern California --Riverside The Metropolitan Water District of Southern California proposes to authorize final design, pipe fabrication, and construction for three segments of prestressed concrete cylinder pipe on the Lake Skinner Outlet Conduit. The scope of work includes preparation of detailed engineering plans and drawings, procurement of materials, pipe fabrication, shutdown coordination, all activities in advance of award of construction contract, and construction to repair the three PCCP sections on the conduit.	NOE	
2009068249	Alma Forest Fire Station and Helitack Base - Landslide Stabilization Project Forestry and Fire Protection, Department of Los Gatos--Santa Clara Two above-ground water tanks, located due south of the property at Alma FFS/HB, recently overflowed, which saturated the soils below the tanks and created a significant landslide. To repair the damage and stabilize the slope, the owner of the tanks has initiated a project which would be conducted on private property but the landslide also extended onto state property. The engineers working for the owner of the water tanks have requested approval from the state to extend project activities onto the state property. The project described here pertains only to the activities on the state land. The state will issue an easement to the owner of the water tanks, which will authorize the wall construction and site stabilization treatments to extend across the property boundary for a distance of approximately 20' onto state land. The retaining wall would extend approximately	NOE

	10' north of the property boundary onto state land. The wall would be constructed of steel pile and concrete, approximately 3' tall and 1' thick. Native vegetation will need to be removed for several feet on either side of the proposed wall and beyond it to inspect the geophysical characteristics of the soil. Following wall construction, the area would be re-vegetated with native grasses. No trees would be removed on the state property. The issuance of the easement is expected to be completed during June-July 2009 and the repair and stabilization work would immediately follow.		
2009068250	Office of Historic Preservation Parks and Recreation, Department of Sacramento--Sacramento The Office of Historic Preservation is under Parks but works under the authority of the Historic Preservation Act, specifically Section 106 compliance. This office is the lead agency for the Historic Preservation Compliance, which review and approve plans for construction and their affects on historic resources, which is similar to the CEQA review, required by statute. Parks is approximately 2% of their customer base. Utility comapanies such as PG&E, SMUD and Water companies are their primary customers.	NOE	
2009068251	Caltrans, Highway 299 Culvert Rehabilitation Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Arcata--Humboldt The purpose and objectives of the project are to repair and upgrade the culverts and downdrains to protect the roadway from erosion related structural failures. The proposed construction activities will consist of: installing new corrugated steel pipes; installing a culvert liner; replacing headwalls and sections; installing culvert aprons and downdrains; installing rock slope protection; conducting slope revegetation and erosion control.	NOE	
2009068252	Wood Burning Stove Installation at Park Residence #18 Parks and Recreation, Department of --Monterey Install a new wood burning stove with an outlet at park residence #18 at Pfeiffer Big Sur State Park to provide a heat source during electrical outages. Work involves cutting an approximately 12"x12" wide quare hole in the ceiling; cutting an approximately 8" wide circular hole in the roof for installation of the ceiling box and pipe; and installing a triple wall chimney pipe from the ceiling box through the attic and outside. On the roof, the triple wall chimney pipe will be topped off with a cap with a spark arrestor, as well as two brackets mounted to the roof for stability. Weather stripping and flashing will also be installed around the base of the pipe. A standard 8" interior outlet will be placed in the dining room, allowing the stove to be positioned on a firebrick hearth at the minimum required distance from the wall in accordance with code standards.	NOE	
2009068253	Crocker Dam, No. 2014 Water Resources, Department of Hillsborough--San Mateo Geotechnical investigation of site in order to perform stability analysis.	NOE

	inclusion of affordable housing units onsite. Thus, the proposed project would result in a Citywide maximum height of 4 stories (45 ft) in the R3B and R4 zoning districts, which is one story shorter than is currently permitted.		
2009068257	YCCD Woodland Campus; Well Replacement and Water Line Connection Yuba Community College District Woodland--Yolo This project would involve excavation of a 3' wide trench approximately 4' deep and installation of a 12" diameter domestic water supply line. The water line would extend from the municipal water main connection in E. Gibson Rd. south along the west side of the Woodland Community College campus in an 8' high berm composed of fill and then under a paved drive south for a short distance to the existing water distribution system. The existing well would continue to supply water for irrigation purposes. The municipal supply would provide drinking water to the Woodland Community College campus.	NOE	
2009068258	Temporary Urgency Changes in Place of Use, Purpose of Use, & Points of Diversion to Transfer Water from Delta Wetlands Properties to Metropolitan Water District Water Resources, Department of --San Joaquin, Contra Costa, Los Angeles DWP, on behalf of Reclamation District No. 756 and Delta Reclamation District No. 2026, proposes to transfer up to a total of 17,941 acre-feet of water to MWDSC during 2009 due to the current statewide drought and the need for additional water by MWDSC to meet its municipal needs. DWP proposes to fallow land on Bouldin Island and Webb Tract and transfer this water to MWDSC. Water will be made available at banks Pumping Plan and be conveyed to MWDSC using SWP facilities.	NOE	
2009068260	Parmenter Residence Ross, City of Ross--Marin Design review, hillside lot/hazard zone 3 use permit and variances for construction of a new 839 square foot single family residence on a vacant lot in a residential zoning district.	NOE	
2009068261	Marc Black Natchez Creep Rip-Rap Fish & Game #2 --Yuba This project will place approximately 200 cubic yards (50 tons) of various sized rock rip-rap around a private bridge to stabilize the banks of Natchez Creek and the road above. This work will occur by use of an excavator working from the road above and no equipment will enter the creek. Prior to placement of rock, loose dirt and material that sloughed off the banks toward the creekbed in the recent storm shall be removed by hand starting on the bank at the point furthest from the water line and moving towards the water to reduce the potential for additional sediment to enter the walkway. Additionally, the private road and bridge above the creek will be rocked to reduce dust and erosion.	NOE	
2009068262	Middle Creek Bank Stabilization Near Pond Creation Fish & Game #2 --Lake Rip-rap and 4' concrete cylinders cut in half will be placed along the east bank of Middle Creek to prevent further erosion in the area. An area of 18"x2'x400 linear feet (0.01 acres) will first be excavated to allow the cylinders to be keyed in below	NOE

2008092020	Salt Creek Heights Subdivision Redding, City of Redding--Shasta NOTE: Review Per Lead	EIR	08/06/2009
	The proposed Project consists of approximately 272.9 acres of undeveloped land, with approximately 145.5 acres deemed suitable for development. The Project proposes development of 440 residential units (248 singles family units, 96 clustered single family units, and 96 apartment units) designated with a mix of housing types, including single family, multiple family, cluster homes with garden courts, and custom home sites. More specifically, the proposed Project would construct the following: 12 single family units with an ~3,500 sf building on each lot, 49 single family units with ~3,000 sf buildings, 187 single family units with ~2,500 sf building, 96 clustered, garden court single family units totaling ~5,800 sf, and 96 apartment units totaling ~38,000 sf. In addition, the Project proposes a 13.9 acres neighborhood park with amenities such as a soccer field, a softball field, basketball courts, a frisbee golf course, a ball wall, and play grounds. The Project would also include construction of an internal circulation network, utility connections, and storm drainage improvements necessary to serve the lots.		
2008101034	Midway City Storm Drain and Street Improvement Project Orange County Santa Ana--Orange The proposed project includes storm drain improvements, including the construction of a main line storm drain, and street reconstruction within the Midway City are of unincorporated Orange County. The storm drain system proposed for the area will convey storm flows through a mainline storm drain system, ultimately outleting into the Edinger Storm Channel. Roadway pavement and structural sections will be reconstructed to provide increased crossfall to improve drainage. Curb and gutters will also be reconstructed along with residential and commercial driveway approaches. In addition, curbs, gutters, and sidewalks reconstruction and storm drain improvements. 2009062074	<p>South Willows Commercial and Industrial Center Willows, City of Willows--Glenn</p> <p>The applicant proposes to develop the property in 4 phases. Phase 1 will include the installation of off-site public utilities; improvements to existing Tehama Street and construction of Commercial Street (on-site); on-site public utilities within the limits of Phase1, the development of Lots 12-17; and the development of Parcels A and B. Phase 2 will include the extension of all publice improvements and utilities through the limits of Phase 2, and the development of Lots 9-11 and 18-20. Phase 3 will include the extension of all public improvements and utilities through the limits of Phase 3, and the development of Lots 3-6 and 21. Phase 4 will include the completion of all public improvements and utilities through the limits of the Project and the development of Lots 1-5. All on-site power lines will be placed underground.</p> <p>The project will include the installation of new public water mains, fire hydrants and building sprinkler lines to comply with Fire Department requirements. Project drainage improvements and detention ponds will be installed consistent with the South Willows Drainage Study prepared by Lafranchi & Associates (May 2009) to ensure proper site drainage and storm water management. The project will install a new 16" public water main along Tehama Street to the proposed Commercial Street intersection. The project will provide a new 12" main in the proposed public street from the new 16" public water main to the end of the public road to service the project. The proposed on-site system will be publicly owned and maintained. A new sanitary sewer main will be installed from the intersection of Tehama Street and the proposed Commercial Street under the existing water channels and SPRR tracks to the existing 18" sanitary sewer trunk line located east of the railroad tracks. The size of the sewer main will be determined by the City during the plan review and approval process.</p>	MND	07/20/2009

2009061077	Villas at Fig Garden Fresno, City of --Fresno The project consists of incorporating the existing Fig Garden Financial Center (on the west portion of the site) into a mixed-use development that includes a new residential building. The new residential building is proposed on approximately 4.69 acres located immediately east of the existing financial center (referred to as the "Site Addition"). This property currently contains a 44-unit apartment complex, one single-family home, and a vacant residential lot. Existing structures on the Site Addition will be removed as part of the Project. An approximately 0.73 acre open space/park area will be provided on the east boundary of the Site Addition. The Project proposes approximately 305 residential units (i.e., apartments) in a multi-tiered building up to six-stories in height with underground parking. The Project Site would be accessed from W. San Jose Avenue from Palm Avenue, or from within the adjacent Fig Garden Village Shopping Center and the Financial Center parking lot. Emergency access only will be provided from W. San Jose Avenue near the Site Addition. Development of the Project would require approval of a General Plan Amendment, Rezone Application, and Conditional Use Permit. The project would require that the 2025 Fresno General Plan and Bullard Community Plan be amended for the Site Addition to change the land use designation from Medium Low Density and Medium High Density to Office Commercial to be consistent with the existing Fig Garden Financial Center directly to the west. The Project proposes to rezone the Site Addition to C-P (Administrative and Professional Office) so that the entire Project Site including the Financial Center has the same zoning. In addition, the Project is applying for a Mixed-Use Conditional Use Permit pursuant to Fresno Municipal Code Section 12-325 to allow the development of the 305 unit apartment building on the Site Addition.	NOP	07/20/2009
2009061082	Plummer Park Improvement Project West Hollywood, City of West Hollywood--Los Angeles The current implementation components would involve demolition of the existing Great Hall/Long Hall structure, renovation of Fiesta Hall, development of a subterranean parking structure and park open space, development of a larger permanent childcare facility, and reconfiguration of uses within the park and addition of new park amenities. In addition, future implementation components may include construction of a new eight-court tennis center and parking structure, an outdoor basketball court, the possible expansion of PP onto adjoining commercially zoned properties along Santa Monica Boulevard, and potential acquisition of building sites along the north side of Santa Monica Boulevard.	NOP	07/20/2009
2009061083	Poway Walmart Expansion Project Poway, City of Poway--San Diego The proposed project consists of the expansion and remodeling of the existing Walmart retail store located at 13425 Community Road in the City. The expansion consists of the addition of approximately 54,745 sf of commercial/retail uses to the existing 142,955 sf structure (including the garden center and tire and lube area), resulting in an approximately 197,700 sf Walmart with a full-service grocery department. The project would include demolition of the existing tire and lube center and the adjacent vacant 7,000 sf commercial structure. The tire and lube center would not be replaced.	NOP	07/20/2009

	<p>The proposed project would include an extensive remodeling to both the exterior and interior of the store. The remodeled and expanded store would include approximately 40,835 sf of grocery sales area, 11,385 sf of grocery support area (bakery, deli, etc.), 23,630 sf of stockroom receiving area, 9,400 sf of ancillary area (front and rear offices, customer service, restrooms, vision center, janitors, sprinkler room, and electrical room), 103,790 sf of general merchandise area, and 8,665 sf of outdoor garden center area. The project would include a new entrance for the grocery uses, new lighting, new landscaping, and additional loading facilities with two truck doors on the eastern side of the building. In addition, signage would be changed on the existing building and new signage would be installed according to a sign program submitted with the site plans. The expanded store would operate on a 24-hour basis, and the existing store will remain operational during the expansion construction process.</p>		
2009061084	<p>Century Plaza Development Los Angeles, City of --Los Angeles</p> <p>The proposed project would involve the construction of a mixed-use development that would include two 49 story, 570-foot buildings. The buildings would be positioned on the north and south sides of a two-acre publicly accessible plaza area "the Plaza" surrounded by ground-level retail and restaurant uses. The proposed mixed-use development would consist of residential, hotel and office uses, as well as retail and restaurant uses. The proposed project would remove the existing 19 story Hyatt Regency Century Plaza Hotel (the "Existing Hotel") and associated buildings, as well as all landscaping now located on the Project Site. The Existing Hotel contains a total 726 hotel rooms, as well as a spa/health club, restaurants, conference rooms, a ballroom, and a lounge.</p>	NOP	07/20/2009
2009061088	<p>Proposed Amended Regulation XX-Regional Clean Air Incentives Market (RECLAIM) South Coast Air Quality Management District --Orange, Los Angeles, Riverside, San Bernardino</p> <p>SCAQMD staff is proposing amendments to Regulation XX-Regional Clean Air Incentives Market (Reclaim), Rule 2002 - Allocations for Oxides of Nitrogen (NOx) and Oxides of Sulfur (Sox), to reduce the allowable SOx emission limits based on current Best Available Retrofit Control Technology (BARCT) for the following industrial equipment and processes: 1) fluid catalytic cracking units (FCCUs); 2) refinery boilers and hearters; 3) sulfur recovery - tail gas treatment units; 4) sulfuric acid manufacturing process; 5) container glass manufacturing process; 6) coke calcining; and, 7) portland cement manufacturing. Additional amendments are proposed to establish procedures and criteria for reducing RECLAIM Trading Credits (RTCs) and RTC adjustment factors for year 2013 and later. Other minor changes are proposed for clarity and consistency throughout the regulation. The Initial Study Identifies the topics of "aesthetics," "air quality," "energy," "hydrology and water quality," "hazards and hazardous materials," and "transportation/traffic" as areas that may be adversely affected by the proposed project. Impact to these environmental areas will be further analyzed in the Draft EA.</p>	NOP	07/20/2009

2009068266	Change In School Facilities Fees Turlock Unified School District Turlock--Stanislaus District change in school facilities fees as authorized by statute and made applicable to residential and commercial/industrial development.	NOE	
2009068267	Lake California Water Intake Fish Screen Fish & Game #1 --Tehama Project Goal: To improve fish protection by constructing a new fish screen that meets federal and state mandates for safe fish passage. The design, construction, and implementation will be done under an agreement with CDFG, willing landowners and relevant agencies to resolve this compliance issue. Two riparian water rights existing at this site (2.65 cfs and 5.68 cfs). Lake California Property Owners Association has a contract with U.S. Bureau of Reclamation to obtain 200 acre feet of Central Valley Project water per Water-use season (as per Reclamation Contract No. 14-06-200-4961A-R-1). Description: Construct a DFG and NOAA Fisheries-approved screen design. Remove the existing screen and associated framework. Install a retrievable cone screen mounted on a metal housing installed on existing concrete footings. CDFG will likely subcontract a portion of this work to Intake Screens, Inc.	NOE	
2009068268	Southside Road Overlay Project (American Recovery Reinvestment Act / No. 697) San Benito County --San Benito The work includes placement of 2" asphaltic overlay over the existing chip seal surfacing on Southside Road, but not limited to cold planing, grinding, striping, and replacement of existing concrete tractor crossing. The work will be within the current right of way area.	NOE	
2009068269	North Cirby Way PG&E Pipeline Directional Bore (1600-2009-0062-R2) Fish & Game #2 Roseville--Placer Installation of approximately 5,000 linear feet of 8" diameter natural gas transmission line under Linda Creek. The gas pipeline is proposed to be installed via horizontal directional bore. The activity will take place in the vicinity of North Cirby Way.	NOE	
2009068270	Agreement No. 2009-0044-R4; 1540 Marsh Street Retaining Wall Fish & Game #4 San Luis Obispo--San Luis Obispo The proposed project would construct a retaining wall along the right bank (looking downstream) of the creek channel to prevent further failure of a parking area adjacent to the bank. Three 12" diameter concrete caissons would be built on the bank approximately 2-3' from the top of the bank. A concrete wall, approximately 8" thick and extending a maximum of 5' above soil level, would be built between the caissons. Approximately 2 cubic yards of gravel and soil backfill would be placed between the wall and the top of the bank, and the asphalt parking lot would be extended to the inside edge of the retaining wall. All equipment at the site would operate from the parking area and no equipment would enter the stream channel. Upon completion of construction, all disturbed soil would be stabilized using generally-accepted erosion and sediment control measures.	NOE

2009068271	<p>Streambed Alteration Agreement No. 2009-0038-R4 for the Construction of a Driveway & Installation of 2 Parallel Culverts Across Unnamed Tributary to Aqua Fria Fish & Game #4 --Mariposa</p> <p>A driveway will be constructed to access a new home site across a seasonal drainage channel. Two parallel culverts will be installed in the channel bed to maintain the present channel drainage characteristics. The culverts will be 60" diameter HDP pipe of approximately 28' in length. A concrete headwall will be constructed at the upstream end of the culvert and mitered with a riprap apron at the downstream end.</p>	NOE	
2009068272	<p>Modular Home Replacement Project - Prairie City State Vehicular Recreation Area (SVRA) Parks and Recreation, Department of Folsom--Sacramento</p> <p>This project will replace in kind a modular home that was originally removed because it contained asbestos. The replacement modular home will be 25'x60' and meet all code requirements. The pad will need to be re-graded slightly and the utilities will need to be upgraded. We will also be installing a permeable surfaced driveway and clearing a small area to the side of the home to allow for excess storage. One non-native tree will need to be removed to allow equipment to have better access to the site. We will also be pruning nearby trees to alleviate the fuel load if a fire were to occur in the area and to be within the setback requirements designated by CalFire. This project will have minimal impact and will be in an area that is already disturbed. This project will be less than one acre and have a total square footage of less than 2,500 square feet.</p>	NOE	
2009068273	<p>Gregg Double Track Project Caltrans, Planning --Madera</p> <p>The purpose of the proposed improvements in the Gregg segment of the San Joaquin Valley rail corridor is to enhance efficiency of rail traffic to flow through this segment of track. The primary improvement proposed is double tracking, specifically from Milepost 1008.95 to Milepost 1010.44 and from Milepost 1012.24 to Milepost 1013.9. The project will also include the upgrade of approximately 1.8 miles of the Gregg siding from Milepost 1010.44 to Milepost 1012.24, improvements (crossovers) at Milepost 1011.21 and Milepost 1011.43, installation of a culvert extension at Milepost 1012.74, a culvert extension at Milepost 1009.52 and signal improvements along the whole 4.95-mile alignment of the project.</p>	NOE	
2009068275	<p>Landfill Removal Fish & Game #5 --Ventura</p> <p>The applicant intends to alter the streambed by removing concrete debris and other non-native materials from the streambed area. Removal shall continue until clean fill/soil is encountered. Concrete slurry and concrete debris were poured over the banks of the stream and down in the bottom of the channel. This occurred numerous times over the years and will now be removed to restore the banks and channel bottom of the Arroyo Colorado. A removal and restoration plan will be developed for Department review prior to the clean-up of the site. The impacted area of the Arroyo is in a u-shape and is 25-30' deep. Two culverts drain into the area from the surrounding agricultural fields.</p>	NOE

2009058111	Former North Fork Mill Site, Brownfields Cleanup Project Removal Action Workplan Toxic Substances Control, Department of --Madera The goal of the Brownfields Cleanup Project is to remediate certain areas of the former North Fork Mill site. Specifically the goal is to remediate an area known as the former dip tank area and to remediate a waste pile known as waste pile #2. Surface soil in the former dip tank was found to contain dioxin at concentrations up to 10,500 ng/kg. The average concentration of dioxin in stockpile #2 was found to be 70.2 nanograms per kilogram (ng/kg). The Removal Action Workplan (RAW) indicates that soil from the dip tank area that contain dioxin and pentachlorophenol (PCP) above human health screening levels will be excavated and disposed of at offsite locations. Waste pile #2 will also be removed. The removal action is necessary to remove the health risk posed by dioxins and PCP.	NOE

	remove existing wood trellis and patio cover; Re-landscape to match existing palette on Highway 111. Based on preliminary information, the existing structures on the property may be of historical significance and may be eligible for listing on the California Register. In addition, the site may have significant archaeological resources that may be impacted and the site is part of CA-RIV-64 according to the Eastern Information Center, University of California Riverside.		
2008122019	Heron Point Boat Launching Facility Stanislaus County Oakdale--Stanislaus NOTE: Review Per Lead	Neg	07/24/2009
	Demolition of the existing one-lane ramp, Construction of a new two-lane concrete v-groove boat-launching ramp, Installation of steel framed, aluminum decked boarding float, Addition of rock slope protection, Construction of new 60,000 square foot, 40 vehicle/trailer parking area, Construction of a new two-unit vault restroom, Installation of a fish-cleaning station, Installation of a sewer and a water distribution system for the restroom and for drinking water, Installation of an electrical system and lighting, Drainage, Construction of kiosk.		
2009062079	City of Roseville Housing Element Update Roseville, City of Roseville--Placer NOTE: Review Per Lead	Neg	07/22/2009
	The City of Roseville Housing Division is proposing to amend the General Plan to adopt the updated Housing Element in accordance with state law.		
2009062080	Town of Paradise Housing Element Update Paradise, City of Paradise--Butte NOTE: Review Per Lead	Neg	07/23/2009
	The project includes a comprehensive update of the Town's Housing Element, as required by state law. The Housing Element includes goals, policies and programs to meet the Town's Regional Housing Needs. Allocation and other state requirements. No development is proposed at this time. No changes to land use designations or zoning are proposed.		
2003091019	Puddingstone La Venture Specific Plan - Tentative Tract Map 53984 (Case No. SP91-02; 92-02TTM; 27-03EIR) La Verne, City of La Verne--Los Angeles The project is a revised version of a project that was previously circulated for public review from Dec 24, 2004 through Feb 2, 2005. Primary revisions to the project include a reduction in unit size and modified access, wastewater service and fire safety provisions. This revised project consists of 15 single family detached custom lots on the 38.49 acre Puddingstone Hill. Lot sizes vary from 12,306 to 123,857 sf. The residential lots would be located primarily in the eastern portion of the site, along the eastern side of the Puddingstone Hill park. One lot would be located on the northwestern portion of the site. It is the developer's stated intent to limit the residential development in areas not constrained by slopes, native vegetation and view corridors. The residential pads would be generally confined to the areas with terrain below the 25% slope.	RIR	08/06/2009

2003022071	Bel Marin Keys Community Services District Levee Repair Project Bel Marin Keys Community Services District Novato--Marin NOTE: Addendum The previously adopted MND authorized repairs to the easterly most portion of the Bel Marin Keys South Lagoon Levee, adjacent to the South Lagoon. The previous project restored the eroded sections of the levee and installed armor stone to absorb wave action to protect the slope from future erosion. The project also included the construction of an overflow structure and repairs to the levee adjacent to Bel Marin Keys Boulevard. The proposed project includes an emergency overflow structure to maintain the water levels within the lagoon during storm events. The overflow structure shall consist of (3) 6'x4' corrugated steel overflow pipes which shall be powered for a sluice gate to control the operation of the structure. In addition, the project includes the replacement of the existing tide gate structure that connects the eastern moat (closest to the South Lock) to the Novato Creek. The proposed tide gate structure would replace an aged structure currently in place with a weir to control the flow. The existing pipe will be replaced with a large diameter pipe which will improve the water quality in the moat by continuous flushing, increasing the tidal flow which would in turn reduce sedimentation by the lock. The proposed tide gate would include the replacement of the sluice gate to control flowwaters. As part of this project, the moat will also be "mucked out" to restoring the overall capacity.	NOD	
2005021116	Mesquite Lake Specific Plan Imperial County --Imperial Construction and operation of a Large Volume Transfer/Processing Facility on 25 acres; operating 24 hours a day, 7 days a week; a maximum tonnage of 1,500 tons per day; a maximum traffic volume of 500 vehicles per day.	NOD	
2007071076	El Casco System Project Public Utilities Commission Banning, Beaumont, Calimesa--Riverside, San Bernardino The Project, consists of construction of a new 220/115/12 kV substation, upgrades to the existing Zanja and Banning Substations and Southern California Edison's (SCE) Mill Creek Communications Site, upgrades to a total of 15.4 miles of 115 kV electric sub-transmission line and associated structures, and installation of fiber optic communication cables within existing conduits in public streets and on existing SCE structures. 2009022055	Humboldt State University Aquatic Center, Floating Dock California State University, Humboldt Eureka--Humboldt HSU proposes to demolish existing wharf structures and construct a new gangway and floating dock for boating instruction and recreational uses on Humboldt Bay. Additionally, a portion of the dock will be used as a mooring site for the California Department of Fish and Game (CDFG) patrol boats(s). The intent of the facility is for educational and recreational use while facilitating CDFG's continued use as a patrol boat mooring facility.	NOD	
2009042088	Paradise Drive Area Rezoning and General Plan Amendment Tiburon, City of Tiburon--Marin The project is the rezoning of 230 acres of territory comprising 85 assessor parcels in the Tiburon Planning Area and General Plan Amendments affecting 22 of the 85 assessor parcels and making unrelated error corrections to Tiburon General Plan 2020 diagrams and text.	NOD	
2009042109	Renovation and Remodel of the California Shakespeare Theater Facility County File LP08-2050 Contra Costa County Orinda--Contra Costa A. A request for approval to amend Land Use Permit #20440-87 for the renovation and remodel of an existing seasonal outdoor theater facility. The proposed construction includes the demolition of 9 modular buildings, construction of 3 permanent buildings which consist of a ticket booth, restroom and small concession, a multi-purpose building, and expansion of the theater control booth. In addition, the project includes 3,700 cubic yards of grading for road widening, landscape areas between buildings and picnic areas, and new buildings. The improvements also include electricity, new water and waste systems, new signage, and the replacement of site lighting. The theater improvements will also increase the seating capacity from 550 to 564 seats. B. A request to establish take-out food uses for the theater concessions located in the upper grove area, and the multi-purpose building. C. A request for a tree permit to remove 14 code-protected trees and work within the dripline of 7 trees within the vicinity of the theater area. The existing use of the theater complex will not change as a result of the proposal, and the increase on the number of persons working at, or coming to the site will not be significant. In addition, the construction of the proposed improvements will be constructed in 3 phases.	NOD	
2009042115	Safe Routes to School (SR2S) / Non-Motorized Transportation Pilot Program (NTPP) Projects Tiburon, CA Tiburon, City of Tiburon--Marin The project is the improvement of existing paths and stairs as well as safety-related crosswalk and striping improvements in the general vicinity of Del Mar Middle School.	NOD

2009069024	South County on Canterbury Drive Santa Cruz County --Santa Cruz Proposal to create a 19 unit town home development for affordable homeownership with three Measure J units. Requires a Subdivision Residential Development Permit, a Coastal Permit, a Roadside/Roadway Exception, Design Review, Soils Report Review and Environmental Review.	NOD	
2009068278	Joan F. Sparksman Elementary School Conversion Temecula Valley Unified School District Temecula--Riverside The Temecula Unified School District is proposing to close Joan F. Sparksman Elementary School and convert this school to an alternative studies center that would serve relocated students from Rancho Vista High School (HS), Rancho Santa Rosa HS, Temecula Valley Adult School, and Rolling Hills Academy Home School.	NOE	
2009068279	Coward Road Hedgerow Project Santa Cruz County Resource Conservation District Watsonville--Santa Cruz The Hedgerow project will plant 1,200' of native plants alongside an organic crop field. The first objective is improving water quality by stabilizing the soil to reduce soil erosion. The second objective is to enhance the filtering of sediments and nutrients from inevitable runoff through a vegetated hedgerow. The third objective is to reduce harsh winds that can damage crops and contribute to erosion. The fourth objective is improving the quality of habitat for beneficial micro and macro-invertebrates, by removing non-native plants and increasing native plant diversity. This in turn will help to reduce the need for pesticides and herbicides. The fifth objective is for the hedgerow to help block pesticides and herbicides from the adjacent conventional crops.	NOE	
2009068280	Harkins Slough Filter Strip Santa Cruz County Resource Conservation District --Santa Cruz The South farm field at High Ground Organics Farm drains down a hemlock dominated hill into a small riparian corridor/historic erosion gully and then straight into Harkins Slough. When the farmers purchased this property in 2000, they began to plant willows, cottonwoods and alders in the small riparian corridor/erosion gully to provide root structure that would slow down some of the runoff from this field, trap sediment and provide habitat for the numerous bird species in Harkins Slough. Last year with a small grant from the Fish and Game Commission we began the second phase of this project which is to eradicate the poison hemlock on the slope that connects the farm field with riparian corridor. We planted a 2,000 sq. ft. area that was once dominated by poison hemlock with deep rooted and rhizome forming grasses, sedges and rushes to further trap the sediment and heighten nutrients draining off the farm field into Harkins Slough. This project seeks to expand that successful planting model to another 5,000 sq. ft. of hemlock dominated hill. Our goal once again is to diversify the area with at least 4,000 locally collected native plants.	NOE

2009068281	Sycamore Creek Bank Stabilization Project Santa Cruz County Resource Conservation District Morgan Hill--Santa Clara The RCD and the Natural Resource Conservation Service propose to stabilize the channel, bank and improve riparian habitat along a portion of Sycamore Creek. Sycamore Creek is a tributary to Uvas Creek, which is designated critical habitat for the South-Central California Coast steelhead Distinct Population Segment. Streambank erosion along lower Sycamore Creek Bank Stabilization Project would stabilize and revegetate the channel and over-steepened banks along Sycamore Creek to reduce erosion, control the release of sediment and improve habitat for various species that may utilize the riparian corridor.	NOE	
2009068282	Cover Crops for Winter Erosion Control Santa Cruz County Resource Conservation District --San Benito, Santa Cruz This project provides financial incentives and technical assistance to growers to plant winter cover crops for erosion control. These cover crops are anticipated to provide sediment load reductions to tributaries of the Pajaro River that we will quantify using the RUSLEII computer model. This project reminds growers of the benefits of cover cropping for both local waterways and grower's soil health. It also opens dialog and fosters relationships between conservation staff and growers to advance the implementation of other farm water quality protection practices.	NOE	
2009068283	Harkins Slough Grassland Restoration Project Santa Cruz County Resource Conservation District Watsonville--Santa Cruz To study the appropriate level of disturbance necessary to increase the population viability of Santa Cruz tarplant through the implementation of a high intensity, short duration, rotational grazing regime on degraded coastal prairie. This information will be used in the development of a grazing plan to be used to restore the native coastal prairie grassland and improve habitat for the rare plant.	NOE	
2009068284	Benedict Canyon-Dutton Acquisition Mountains Recreation and Conservation Authority Los Angeles, City of--Los Angeles Fee simple acquisition of, and/or acceptance of conservation easement(s) over, approximately 18 acres in Benedict Canyon, Santa Monica Mountains for open space and wildlife habitat preservation, parkland, and low impact recreational uses.	NOE	
2009068285	Install Upgraded Crash Cushion - Traffic Safety Project Caltrans #3 Oroville--Butte The California Department of Transportation proposes to remove and replace 10 obsolete crash cushions at two locations: at the base of the South Oroville Separation (SR70/162), and at the South Oroville Railroad Underpass along SR162 near the town of Oroville.	NOE

	right will be limited to the water need to offset evaporation and seepage, except if the lake is emptied for required maintenance and repair.		
2009068287	Agreement 2008-0200-R4; White Sand Removal Fish & Game #4 --San Luis Obispo The Operator was cited for violating Section 1602 of the Fish and Game Code after removing approximately 200 cubic yards of sediment form the stream channel without first obtaining a Streambed Alteration Agreement. The sediment is stockpiled on the bank of McMillan Canyon Creek, and would be removed for personal use on the Operator's property. No sediment would be sold, transferred, traded, bartered, given away, or otherwise removed from the Operator's property. The sediment would not be used for commercial purposes.	NOE	
2009068288	Davis Ranch Two Way Left Turn Lane Caltrans #3 Rancho Murieta--Sacramento This proposed traffic safety project will construct a two-way left turn lane (TWLTL) near the Davis Ranch produce market on SR 16. Caltrans proposes to install TWLTL from Station 101+00 to 1,500', ending at Station 116+00. The roadway will be widened 6' on the north and south sides of SR 16. The purpose and need is to reduce rear-end collisions.	NOE	
2009068289	Sac 16 Maintenance - Resurfacing Caltrans #3 Sacramento, Rancho Murieta--Sacramento The California Department of Transportation proposes to replace the road surface and seal cracks at spot locations along SR 16. The project will consist of replacing the existing asphalt concrete surfacing to a depth of 0.25' (or 3") with hot asphalt mix from edge of pavement to edge of pavement. Removal of the existing pavement will be done with cold planing (grinding). The purpose and need is to extend the service life of the roadway and improve the riding surface.	NOE	
2009068290	Routier Road Rehabilitation Rancho Cordova, City of Rancho Cordova--Sacramento The City of Rancho Cordova wishes to complete pavement rehabilitation along Routier Road between Folsom Boulevard to Old Placerville Road. Improvements would include pavement overlay, pedestrian curb return ramp improvements to conform to ADA requirements, and minor improvements to conform to ADA requirements, and minor traffic signal work.	NOE	
2009068291	Sunrise Zipper Elimination Rancho Cordova, City of Rancho Cordova--Sacramento The City of Rancho Cordova wishes to eliminate a small segment of "zipper" street along Sunrise Boulevard north of White Rock Road. A "zipper" street is considered a small segment of roadway where frontage lane and frontage improvements such as curb, gutter and sidewalk, have not been completed, resulting in a short portion of roadway that necks-down from three to two travel lanes and back again. These short neck-down segments result in traffic merging hazards, increased traffic congestion, and pedestrian travel limitations due to lack of continuous bicycle lanes and sidewalks. The City proposes to eliminate this condition by installation of a frontage lane to provide a continuous through lane and through installation of a asphalt-concrete sidewalk to provide continuous sidewalk connectivity.	NOE

2009061092	671 Ocean View Boulevard and 672 Mermaid Avenue, Bonniei / Grech Residence Pacific Grove, City of Pacific Grove--Monterey NOTE: Review Per Lead	MND	07/23/2009
	<p>The site is currently developed with a 2 detached single family residences on a single parcel. The primary residence (671 Ocean View Blvd) was remodeled in 2008. Administrative Architectural Approval No. 3481-05 and Coastal Development Permit Exemption 3-06011X were approval for replacement of the windows and siding of that structure, but not for the placement of a new foundation. The foundation work was deleted from approval of AAA No. 3481-05. Building Permit 07-0237 was issued in error, because no CEQA review had been conducted in follow up to the Preliminary Archaeological Reconnaissance Report dated June 16, 2006. The BP 07-0237 application included the foundation that had been deleted from AAA No. 3481-05 and that was not included in the CDP exemption from the CA Costal Commission. This initial study incorporates, after the fact, the foundation replacement at 671 Ocean View Blvd, as well as the proposed project at the second dwelling on the site (672 Mermaid), yet to be approved and constructed.</p> <p>The proposed project at 672 Mermaid Ave is to construct a 760 sf, detached 3 car garage with 571 sf asphalt driveway , parking pad and walkway to replace a condemned and previously demolished 494 sf garage and ~906 sf of existing asphalt driveway and parking pad. In addition, the project includes the placement of a new foundation and crawl space under an existing 2 story secondary housing unit, repair and restoration of existing windows, new windows on the second floor to meet current code requirements for egrss, replacement of the existing porch cover and new porch posts, railings, and steps, removal of the masonry chimney flue, and demolition of an attached 166 sf laundry/storage facility.</p>		
2009062082	Sea Ranch Expansion Project - PLP08-0011 Sonoma County --Sonoma Use Permit, Coastal Permit with heating, and a Variance to exceed height limits for several buildings for the proposed expansion at the Sea Ranch Lodge to include 60 lodging units, reuse of original Post Office building (8,504 sf) with retail and commercial uses and new 23,882 sf administration building, restaurant and lounge, on a 52 acre parcel. 2009062086	Butte County General Plan Housing Element Butte County Biggs, Chico, Gridley, Oroville, Paradise, Unincorporated--Butte This Initial Study/Negative Declaration is for the Butte County Housing Element Update project. Since its establishment in 1969, the CA Housing Element Law has mandated that CA local governments develop plans to supply housing to current and future residents, regardless of income level. The purpose of the Housing Element is to address housing needs of the residents of the Unincorporated Area of Butte County through June 30, 2014. The Housing Element consists of 2 documents, the Housing Needs Assessment, which analyses the needs of residents of the Unincorporated Area through the 5 yr planning period, and the Housing Policy document that establishes policies and program to help Butte County meet the needs identified in the Housing Needs Assessment. The complete Housing Element document is an update of the 2004 Butte County Housing Element.	Neg	07/22/2009

1993033028	Garcia River Watershed Mendocino County MENDOCINO--Mendocino The DFG is issuing an Agreement pertaining to 199 encroachments: sediment reduction projects on non-fish bearing Class I, II and II watercourses within the Garcia River watershed.	NOD	
2003081142	Marina Coast Water District Regional Urban Water Augmentation Project Marina Coast Water District Marina, Seaside, Monterey, Sand City, Del Rey Oaks--Monterey The RUWAP would provide recycled and desalinated water service to areas on the former Ford Ord to meet the projected water demands of the redevelopment requirements of the former Fort Ord as anticipated by the Fort Ord Base Reuse Plan and its accompanying EIR. MCWD certified the RUWAP's EIR on October 27, 2004. MCWD certified Addendum No. 1 to the RUWAP EIR on November 15, 2006, and Addendum No. 2 on February 14, 2007. The MOU was negotiated in collaboration with MRWPCA, the Fort Ord Reuse Authority (FORA) and the City of Marina. It summarizes the RUWAP, the FORA allocation of RUWAP water for base reuse, and provides for cooperative use of recycled water by MCWD and MRWPCA for the RUWAP by cooperating, combining and sharing their respective rights to recycled water from MRWPCA's regional treatment plant. It commits MCWD and MRWPCA to meet and confer in good faith to evaluate the environmental, technical, managerial and financial feasibility of a project to use the RTP outfall to transport and discharge brine byproduct from a water desalination facility, a groundwater replenishment project to inject and store recycled water in the Seaside Groundwater Basin, and any other recycled water project to inject and store recycled water in the Seaside Groundwater Basin, and any construction and operation of treatment plan facilities, backbone conveyance facilities and recycled water delivery.	NOD	
2005081053	CLWA Groundwater Containment, Treatment, and Restoration Project Castaic Lake Water Agency Santa Clarita--Los Angeles Project consists of modified wells to intercept perchlorate-contaminated groundwater, use of new and existing pipelines to deliver perchlorate-contaminated water to a new treatment plant, several new production wells, and new pipelines associated to deliver treated water and water from new wells.	NOD

2007022077	Caples Lake Boat Launch and Access Road El Dorado Irrigation District --Alpine El Dorado Irrigation District and the US Forest Service are construction a 2 lane boat launch and ancillary facilitiesm a parking area, landscaping and a new access road off SR 88 and improvements to SR 88.	NOD	
2007122092	Truckee Railyard Master Plan Truckee, City of Truckee--Placer The Truckee Railyard Draft Master Plan provides for development of an eclectic mix of building types and uses within an attractive, pedestrian-oriented neighborhood. The Draft Master Plan anticipates that development will entend easterly from the Downtown Core. The pattern of development would include the highest development intensity occurring immediately adjacent to the Downtown Core and then decrease as development extends to the north and east. The Draft Master Plan includes provisions of affordable housing and recognizes the importance of allowing development within the Master Plan Area to "grow organically" to accommodated market demands and the community needs. The Draft Mast Plan includes a Maximum Allowable Development (MAD) that provides development thresholds for each of the Districts created by the Draft Mast Plan. This EIR evaluates the potential impacts of the development within the Master Plan Area based on the MAD. The MAD would allow up to: 570 residential units (including work/live units); 70,000 sf of retail area; 15,000 of office space; A 60 room hotel; A 1,000 seat movie theater; 20,000 sf grocery store; 25,000 sf civic building.	NOD

	such as public entry gates, signs, and fences; Relocated one public access point; Remove existing fences in areas closed due to elevated levels of metals once road/trail reconstruction is completed; Replace/install new fences or install other closure equipment at mine shafts.		
2009021061	Fresno Veterans Home General Services, Department of Fresno--Fresno The proposed project would provide veterans with an ~235,435 gsf residential care facility and a skilled nursing facility with a total of 300 beds. The proposed veterans home facility would be designed around a care unit design concept. Each care unit would contain a 21 bed member care unit called the "house". The house concept would include member rooms, a caregiver's station, a great room (with dining, living, and kitchenette areas), and utility rooms. A combination of 2 houses would represent a "neighborhood," which would share support services, such as the administration workroom, medications room, equipment room, whirlpool, member laundry, and a private office. Each member room would have ~380 net sf. The overall configuration would be 20% private and 80% enhanced. The enhanced room would provide 2 beds that would be separated by cabinetry at the foot of each bed. All resident rooms would be designed to meet the licensing requirements for an SNF level of care. A central therapy garden, located at the vertex of each neighborhood, would be shared by all neighborhoods. The garden would be easily accessed and designed to support the specific needs of each neighborhood. The proposed veterans home facility would include a main kitchen where food would be prepared. A main kitchen would be transported to dining areas within the home. A loading dock would be located close to the kitchen.	NOD

2009064004	F-35 Joint Strike Fighter Initial Operational Test and Evaluation U.S. Air Force --Los Angeles, Kern, San Bernardino NOTE: Review Per Lead The purpose of the Proposed Action is to test the operational capabilities of the operationally representative F-35 aircraft under realistic "combat" conditions. This EA/OEA analyzes the potential environmental impacts from basing 20 F-35 aircraft at Edwards AFB, conducting pilot training and proficiency flights and test flights in several test ranges in the western U.S., and conducting a series of deployment demonstration at multiple locations. Test flight activities would include weapons missions at several ranges. Operations would occur within existing airspace and test ranges and would adhere to all existing restrictions and operating procedures established for these activities. No construction or modification of facilities would occur. The No-Action Alternative would be not to conduct the JSF IOT&E program.	EA	07/23/2009
2003112011	Southeast Specific Plan Project Rohnert Park, City of Rohnert Park--Sonoma The Southeast Specific Plan (SESP) would amend the boundary of the specific plan area as identified in the City's General Plan by reducing the project acreage from up to 119 to a maximum 80 acres and resulting in the development of a mixed use residential community within the City of Rohnert Park's Urban Growth Boundary. The proposed project would amend the existing City General Plan and develop up to 475 residential units, 10,000 acres of commercial uses, and a combined park and stormwater detention facility within the 80 acre SESP area in eastern Sonoma County, CA. The anticipated construction depending on market conditions.	EIR	08/07/2009
2009011067	Vector Habitat Remediation Program San Diego County --San Diego County of San Diego's Department of Environmental Health, Vector Control Program has initiated the development of a Vector Habitat Remediation Program to further reduce and/or eliminate mosquito breeding grounds in established wetlands, flood control facilities, effluent treatment ponds, and stormwater management facilities. The goal of VHRP is to fund projects that eliminate or	EIR	08/07/2009

	reduce mosquito-breeding habitat in a manner that protects human populations and animals from mosquito-borne diseases with the need to balance the water quality, biological, aesthetic, and hydrologic values. Future projects that will result in new effects or mitigation measures that are not addressed in the environmental document will require subsequent CEQA review.		
2008011060	Cold Spring Canyon Bridge Suicide Barrier Caltrans #5 Santa Barbara--Santa Barbara NOTE: Joint Document comprised of Draft EIR and Environmental Assessment.	FIN	
	The California Department of Transportation proposes to install a physical suicide barrier on the Cold Spring Canyon Bridge, near San Marcos Pass in Santa Barbara County.		
2000062052	Byron Highway Shoulder Widening Project (Byron Hot Springs Road to Alameda County Line) Contra Costa County Byron--Contra Costa The Contra Costa County Public Works Department (CCCPWD) is proposing to undertake road upgrades along Byron Highway from Byron Hot Springs Road to the Alameda County line, a distance of ~3.5 miles. The project will be constructed in 2 phases. Phase 1 is ~2,800 ft long and begins just north of Byron Hot Springs Road and ends 800 ft south of Ranklin Road. Phase 2 encompasses Byron Highway between the southern end of Phase 1 and the Alameda County line.	MND	07/23/2009
	In the project area, Byron Highway is ~24-28 ft wide (two 12 ft wide travel lanes with 0-2 ft wide paved shoulder on both sides) with gravel shoulders and earthen drainage ditches. The existing ROW varies from 50-200 ft. The proposed ROW will be a minimum of 65 ft wide, which will result in ROW is less than 65 ft wide. The purpose of the project is to provide 6 ft wide paved shoulders and 2 ft wide shoulder backing within the project area. Byron Highway will be widened to ~36 ft to accommodate the 6 ft wide paved shoulders and 2 ft wide shoulder backing. The modifications to the roadway are being implemented in order to bring the shoulders along this section of Byron Highway up to current design standards. No new travel lanes are proposed and no increase in capacity will occur as a result of the shoulder improvements.		
2009061095	Arroyo Seco Channel Repair Project Los Angeles County Pasadena, South Pasadena, Los Angeles, City of--Los Angeles NOTE: Review Per Lead	MND	07/24/2009
	The DPW proposes to repair portions of the Channel The Channel requires repairs to correct damage from erosion that impede proper flood control. Approx. 8,150 ft of the Channel would be repaired as part of the proposed project. The proposed project is a short-term construction project that would not result in any operational changes to the flood control of the Channel. The project components include (1) weir reconstruction; (2) channel wall spall repair; (3) channel invert spot repair; (4) levee panel reconstruction; and (5) channel repair and replacement. The concrete finish of all repairs would match the existing finish of the Channel.

2009062088	Lucas Elementary School Ceres Unified School District Ceres--Stanislaus NOTE: Review Per Lead The Ceres USD is proposing to construct a new elementary school campus on an ~14.44 acre parcel is located in the City of Ceres. The proposed elementary school would be designed to accommodate 626 students, employ ~38 faculty and staff, and would include ~26 classrooms in 7 separate buildings with future expansion of one building consisting of 6 classrooms, as well as one multi purpose building, one administration building, driveways and bus access areas, concrete flatwork, and hard-court and turf playfields. There would be no lighted fields. Joint use facilities with the City of Ceres are not anticipated at this time. The classroom and faculty buildings and parking and driveway areas would generally encompass the southern portion of the site with the playfields in the northern portion.	MND	07/24/2009
2009062089	Walt L. Hanline Elementary School Ceres Unified School District Ceres--Stanislaus NOTE: Review Per Lead The Ceres USD is proposing to construct a new elementary school campus on an ~10 acre parcel is located in unincorporated Stanislaus County, within the Sphere of influence of the City of Ceres. The proposed elementary school would be designed to accommodate 626 students, employ ~48 faculty and staff, and would include ~32 classrooms in 6 separate buildings, as well as one multi purpose building, one administration building, driveways and bus access areas, concrete flatwork, and hard-court and turf playfields. There would be no lighted fields. Joint use facilities with the City of Ceres are not anticipated at this time. The classroom and faculty buildings and parking and driveway areas would generally encompass the southern portion of the site with the playfields in the northern portion.	MND	07/24/2009
2009062090	Crest Tank No. 2 North Marin Water District Novato--Marin Construct a second water storage tank at the Crest site in the Bahia neighborhood of Novato. The 0.5 MG tank is needed to supply adequate storage to the Crest service zone. The Crest site has already been graded to allow installation of this second tank.	MND	07/23/2009
2009062092	Cherokee Canal Corridor Management Strategy Pilot Project: Phase I Sediment Removal Water Resources, Department of --Butte The proposed project would remove sediment and redesign the channel to facilitate ongoing maintenance in portions of subreach 2 and subreach 3 of Cherokee Canal (from the southern Richvale Irrigation District Canal siphon to the confluence with Cottonwood Creek). This reach of the canal is ~4 miles long and, on average, 400 ft wide, or 190 total acres. Cross sectional and 3 of the canal. DWR would remove up to ~750,000 cubic yards of sediment from these reaches to restore channel capacity to 25 yr level flood protection of 11,500 cubic ft per second. Sediment would be transported to several spoil site locations. Seven potential sites for disposing the spoils have been identified near the project. DWR may use some of all of these sites to dispose of the sediment. The proposed	MND	07/23/2009

	project would also include revegetation of the channel with native vegetation to replace species.		
2009062094	Vasco Road Safety Improvement Contra Costa County Byron--Contra Costa The Vasco Road Safety Improvement Project has been proposed by Contra Costa County to improve the safety of a 2 plus mile stretch of Vasco Road between Brentwood and Livermore, CA. The stretch of road being considered for improvements runs from engineering Station 363+00 in the north, south to Station 244+00, ~3 miles north of the Contra Costa County/Alameda County line. This stretch of rural, twisting road has heavy, fast-moving traffic, and a history of serious injury accidents.	MND	07/23/2009
	This project will construct a concrete median barrier along Vasco Road. The existing 2 lane segment from approximate Station 244+00 to 290+00 will require additional pavement to connect the 2 existing southbound passing lanes eliminating 2 merges. A break in the median barrier will occur between stations 270+00 to 279+00 (900 ft) to accommodate turning movements and access to the East Bay Regional Park District's facilities. There will be no increase in capacity as a result of the project. Associated drainage, retaining walls, signing, striping, turn pockets, guardrail adjustments, and barrier end-treatments will be constructed as necessary to accommodate the installation of these improvements. Two bridge widenings over Brushy Creek will be required.		
2005071108	Carrari Ranch Project Rancho Cucamonga, City of Rancho Cucamonga--San Bernardino The project proposes to annex the entirety of the 670.3 acre project site into the City of Rancho Cucamonga's incorporated area. The project site is composed of two primary components: 1) the 342.3-acre Carrari Ranch Specific Plan area, where the development of 110 single-family residential dwelling units is proposed; and 2) 328 acres east of the Specific Plan area which would be annexed into the City, but where no development is currently proposed.	NOP	07/23/2009
	The Carrari Ranch Specific Plan proposes a master planned, gated community consisting of 110 executive-level single-family homes on lots ranging from a minimum of 10,200 sf up to more than one acre within the southwestern portion of the Specific Plan area. As stated above, the proposed project has been modified to include a Specific Plan since the issuance of the July 22, 2005 and March 2, 2006 NOPs. Generally, a specific plan is intended to assist in the systematic implementation of the city's General Plan. It also links implementing policies of the General Plan to specific development proposals in a defined area. The Carrari Ranch Specific Plan would be subject to adoption by the City of Rancho Cucamonga as part of the project approval process.		
2009062093	Berkeley Aquatic Park Hydrology and Habitat Improvement Project Berkeley, City of Berkeley--Alameda The proposed project would improve water quality in the Aquatic Park lagoons by increasing water circulation and improving wetland habitat areas. The EIR will analyze the Parks and Recreation Commission (P&RC) Plan as the preferred project. As an alternative to the preferred project, the EIR will also analyze the Preferred Conceptual Design Plan as described in the Aquatic Park Improvement	NOP	07/23/2009

	Program (APIP). The preferred project would rehabilitate the existing tide tubes connecting the lagoons to San Francisco Bay and would eliminate the inflow of stormwater runoff into the lagoons. The alternative project would improve tidal inflow and outflow and allow no additional stormwater into the lagoons than under current conditions.		
2009061094	2009 Housing Element Fort Bragg, City of Fort Bragg--Mendocino The proposed 2009 Housing Element amendment provides: 1) updated information about how much new residential development should occur in the city to accommodate its "fair share" of project regional housing needs; 2) updated information for the housing needs assessment to address current economic, demographic, housing conditions, and a description of existing regulatory and market conditions, and; 3) revisions, additions and deletions of certain housing element programs and policies to better serve current housing needs, current community priorities, and changes to state law.	Neg	07/23/2009
2009061096	McCallister-PLN080342 Monterey County Carmel-by-the-Sea--Monterey Combined Development Permit consisting of: 1) A Coastal Administrative Permit for the demolition of an existing 2,398 sf single family dwelling and the construction of a new 7,206 sf, 3 story, single family dwelling with an attached 638 sf, 2 car garage, and 1330 cubic yards of grading/excavation; 2) A Coastal Development Permit to allow development within 750 ft of known archaeological resources; and 3) A Design Approval.	Neg	07/23/2009
2009062087	PA-0600067 San Joaquin County --San Joaquin A Minor Subdivision application to subdivide 2 parcels totaling 911.83 acres into 11 parcels. Parcel One and Parcels Three through Eleven each contain 8- acres more or less. Parcel Two to contain 106 acres.	Neg	07/23/2009
2009062091	Use Permit Application No. 2008-21 - W-D Swine Farm Relocation Stanislaus County Turlock--Stanislaus This is a re-circulation of the Initial Study due to changes in the waste management plan to meet requirements of the Regional Water Quality Control board. Request to establish a swine farm with an animal population of 106 mature hogs and 205 young hogs on a 9.71 acre parcel. The project includes moving on-site 2 prefabricated cold nursing buildings and 2 prefabricated portable farrowing buildings, construction of a growing barn, and a boar/sow barn. Two 4,500 +/- gallon retention tanks are being proposed to store liquid swine manure to be hauled away by a license septic hauler. Composting and field application of swine waste is no longer being proposed. A 100' x 210' +/- bed pack storage area will be used for the storage and drying of bed pack materials for reuse. Excess bed pack will be hauled off-site with liquid swine manure.	Neg	07/23/2009

2007061012	Lane Ranch Towne Center Lancaster, City of Lancaster--Los Angeles The proposed project consists of a 407,000 square foot commercial development located on approximately 35 acres at the southeast corner of 60th Street West and Avenue L. As part of the proposed project, a General Plan Amendment (GPA 06-03) and a Zone Change (ZC 06-03) would be required in order to change the general plan designation from a mix of Commercial (C) and Office Professional (OP) to C and the zoning from a combination of commercial planned development (CPD) and OP to CPD. A Conditional Use Permit (CUP 06-03) would also be required for the proposed project. The commercial development would include two anchors, one with a garden center, for a total of 284,341 square feet, a 14,820 square foot drug store, three submajor stores totaling 35,000 square feet, 4 buildings with "shops" totaling 28,000 square feet, and two restaurants (both fast food and sit-down) totaling 10,300 square feet. Some parking would be provided on a 100 feet wide strip of property designated as R-7,000 in accordance with existing zoning code regulations. A total of 1,960 parking spaces are anticipated to be provided and access to the site would occur from Avenue L and 60th Street West.	FIN	
2007061059	The Commons at Quartz Hill Lancaster, City of Lancaster--Los Angeles The proposed project consists of a general plan amendment and zone change to redesignate the project site from UR to Commercial and to rezone the project site from R-7,000 and R-10,000 to commercial planned development. Development on the project site would include approximately 344,550 square feet of commercial retail and restaurant facilities. The two anchor tenants would be located on the west side of the project site with loading docks located in the back of each building. Pad buildings would be located along the perimeter of the project site. The only known tenant at this time is a Walmart Supercenter.	FIN

	~65,000 sf, 385 parking spaces, associated landscaping and outdoor areas on a 20.6 acre parcel. The project would include a preschool for a maximum of 120 students and 17 teachers. The project would be constructed in 4 phases.		
2009061106	TPM 18900 San Bernardino County Rialto--San Bernardino The proposed project is Tentative Parcel Map 18900 to create 2 parcels on 312.88 acres.	MND	07/24/2009
2009061107	Rossi Living Trust Coastal Development Permit / Minor Use Permit San Luis Obispo County --San Luis Obispo Request by Rossi Living Trust for a Minor Use Permit/Coastal Development Permit to allow for the construction of a new ~3,761 sf single family residence with attached 1,289 sf garage and 1,830 sf basement. The project will result in the disturbance of the entire ~9,000 sf parcel with building, parking, landscaping, patios and swimming pool. The proposed project is within the Recreation land use category.	MND	07/24/2009
2009062095	Elk Grove Trail Crossing at State Route 99 Elk Grove, City of Elk Grove--Sacramento The proposed project would construct a segment of an off-street multi-use trail along the north bank of Elk Grove Creek from Laguna Springs Drive to Emerald Vista Drive. The project includes an ~908 ft long pedestrian overcrossing (POC) elevated over West Stockton Boulevardm State Route 99, and East Stockton Boulevard. At-grade trail connections would be provided from each end of the POC to East and West Stockton Boulevards.	MND	07/24/2009
2009061099	Mixed Use Overlay and R-4, Maximum Density, Zone Hawthorne, City of Hawthorne--Los Angeles The proposed project consists of a mixed-use overlay designation that would allow density of up to 30 dwelling units per acre in mixed use developments and in R-4 (maximum density) zones in certain appropriate areas, and changes in land use designations for selected areas from industrial to commercial and from commercial to medium density residential uses.	NOP	07/24/2009
2009062096	Regional Groundwater Storage and Recovery Project San Francisco, City and County of Daly City, South San Francisco, San Bruno, Burlingame--San Mateo NOTE: Review per lead. The Project would provide potable surface water to the cities of Daly City and San Bruno and the California Water Service Company (Cal Water) (Collectively referred to as Partner Agencies), to be used by these agencies in lieu of pumping groundwater during normal and wet years. The Partner Agencies currently use groundwater as one of the sources of their drinking water supply. The supply would be partially replaced by surface water supplies from the San Francisco Public Utilities Commission (SFPUC) regional water system. The reduction of pumping by Partner Agencies would increase groundwater storage within the South Westside Groundwater Basin. Stored groundwater would be pumped during periods of insufficient surface water supplies: (i.e., dry years).	NOP	07/28/2009

2009062097	Safeway Redevelopment Project (Broadway at Pleasant Valley Ave.) Oakland, City of Oakland--Alameda The 15.4-acre project site is the location of the existing Rockridge Shopping Center, which contains several retail stores including Safeway, Long's Drugs (now CVS), and others totaling approximately 185,000 sf of commercial space. The project includes the demolition of the Safeway and Long's Drugs stores, along with other adjacent stores, and the redevelopment and remodeling of the site with the construction of a new Safeway store, a new CVS store, and other commercial buildings. The project would contain a total of approximately 304,000 sf of commercial space and 1,006 parking spaces. Also proposed are modifications to adjacent streets including additional vehicle travel lanes and/or turn lanes.	NOP	07/24/2009
2009061103	Imperial Irrigation District Interim Water supply Policy for Non-Agricultural Projects Imperial Irrigation District El Centro, Brawley, Calexico--Imperial The Imperial Irrigation District is developing an Integrated Water Resources Management Plan (IWRMP) that will identify and recommend potential programs and projects to develop new water supplies and new storage, enhance the reliability of existing supplies, provide more flexibility for District water department operations, and maintain service levels within the District's existing water service area. Pending development of the IWRMP, the District has determined that an Interim Water Supply Policy (IWSP) for Non-Agricultural Projects (as such projects are defined in the IWSP) must be adopted in order to address proposed projects that may request a water supply from the District during the time that the IWRMP is still under development. The IWSP currently designates up to 25,000 acre ft per year of water for potential Non-Agricultural Projects within the District's water service area. The IWSP shall remain in effect pending the approval of further policies that will be adopted in association with the IWRMP.	Neg	07/24/2009
2009061104	Lake Morena Radio Tower San Diego County --San Diego The project is a Major Use Permit for the construction and use of 100 ft radio tower and associated 8 ft x 8 ft x 10 ft tall equipment shelter.	Neg	07/24/2009
2003042171	Guenoc Water Rights Modification Project State Water Resources Control Board --Napa, Lake The MND was prepared for closure of a waste management facility that formerly accepted liquid and solid wastes produced by geothermal exploration, steam power generation and other geothermal related activities. Closure will generally consist of consolidation and capping of the waste. The Division of water Rights is evaluation one of the mitigation projects which is lowering the elevation of Freeman Lake to ensure separation between groundwater and the landfill waste. Water will be used at Freeman Lake for fish and wildlife enhancement at the lake and the adjacent area, in addition to irrigation and stockwatering.	NOD

2006062071	Feather River Levee Repair Project Three Rivers Levee Improvement Authority Marysville, Yuba City--Yuba The project, as approved, will widen the setback levee in Segment 2 between station 0+00 and 6+50 by ~180 ft.	NOD	
2006121090	Hillside Management Zone Ordinance Update Sierra Madre, City of Sierra Madre--Los Angeles The Hillside Management Zone Ordinance Update is a revision and clarification of the existing Hillside Management Zone Ordinance, which includes an amendment to the City of Sierra Madre Zoning Map and amendments to the Municipal Code text. The HMZ Ordinance Update proposes to improve development standards relative to fire hazards, open space, aesthetics, grading limits, height limits, and to protect the natural habitat within the hillside area. This update also includes a Fire Prevention Plan that includes regulations on vegetation, roofing, eaves, exterior wall surfaces, overhangs, sprinkler systems, and fuel modification/brush control in order to reduce the potential for wildland fires. The HMZ Update also would allow only one dwelling unit per lot (and one second unity, per Municipal Code Chapter 17.22), thus increasing the amount of open space within the hillside area, improving the aesthetics of the hillside area by increasing lot sizes and increasing height restrictions on buildings so as not to impede on the view; and protect the natural habitat by implementing a suitability analysis that requires a census of biological resources located onsite. The requirement of landscaping and fencing plans also regulates the amount of space to be left in its natural state so as to not disturb natural habitats. The Ordinance would change the minimum lot size from 15,000 sf to two acres; extend the coverage of the hillside area to all areas of the City with significant slopes, including the area of the City north of Carter Avenue and Mira Monte Avenue; re-classify a number of ridgelines as prominent ridgelines; and change the zone from an overlay zone to a stand-alone zone. The HMZ Update would also reorganize information contained in the previous Ordinance.	NOD	
2009012052	2009 Fisheries Restoration Grant Program Fish and Game (HQ) Environmental Services --Mendocino The project proposes the replacement of an existing concrete box culvert with a new concrete bridge, placement of rock slope protection at the abutments, and restoration of the streambed.	NOD	
2009021011	California State University Bakersfield Baseball Facility Improvements California State University Trustees Bakersfield--Kern This project includes the construction and operation of several improvements to the recently constructed baseball practice field. These improvements include a 1,400 sf combination concession/ticket sales and restroom building, bleachers accommodating 1,500 people, a 10,000 sf pitching/batting tunnel, and completion of and additional 58 space parking lot. The project also includes the installation of lighting for night games/practice.	NOD

	Mountain General (40 acre minimum) to Mountain Home (5 acre minimum) Access is from Leonard Road and proposed on-site easements.		
2009062101	Schaefer Ranch Water System and Martin Canyon Creek Trail Extension Project Dublin San Ramon Services District Dublin--Alameda NOTE: Extended Review Per Lead	MND	07/31/2009
	The proposed project would include construction and operation of water conveyance facilities by Dublin San Ramon Services District (an ~4,000 ft pipeline with diameter of up to 12 inches and reconstruction of existing Pump Station 4B) for the existing 17-lot Clifden Parc subdivision and a new 302 lot Schaefer Ranch subdivision in western Dublin. The project would also include a three-quarter mile extension of the existing Martin Canyon Creek Trail by East Bay Regional Park District from their current property line to the Donlan Loop Trail.		
2009062103	Highland Lakes Road Fuel Reduction Project Western Shasta Resource Conservation District --Shasta The Highland Lakes Road Fuel Reduction Project has a goal of reducing wildfire risk to a rural residential area near Shingletown, Shasta County. Currently, the fire hazard rating for the vicinity is Very High, according to Cal Fire. The fire risk will be reduced by cutting and burning or masticating shrubs and small trees standing within designated fuelbreak zones adjacent to Highland Lakes Road. Trees greater than 8" diameter at breast height will be retained. In areas where all vegetation is smaller than 8" diameter, small conifers or hardwoods with full crowns will be retained at ~20 ft spacing. This will result in an open, park-like forest condition known as a shaded fuelbreak. Shaded fuelbreaks are known to reduce intensity and spread rate of fires, allowing crews an increased chance to halt fire from advancing to nearby areas.	MND	07/28/2009
2009062104	North Tahoe Fire Protection District Public Safety Center (PDSB T20080614) Placer County --Placer The project proposes to construct a 20,262 sf public safety center on a 2.4 acre lot to house administrative, fire protection, and training facilities with 39 parking spaces.	MND	07/28/2009
2009061113	Lytle Creek Ranch Specific Plan Rialto, City of Rialto--San Bernardino Adoption and subsequent implementation of a specific plan and associated entitlements for a mixed-use project authorizing the construction, use, occupancy, and habitation of up to 8,407 single-family and multi-family units, 849,420 gross leasable sf of retail commercial, office professional, and light industrial uses; open space and conservation areas; public and private recreational facilities; school sites; and associated public improvements and infrastructure facilities. In addition, the proposed project includes the construction of a revetment levee along the southern bank of Lytle Creek, spanning a distance of approximately seven miles. In addition to the on-site levee, the project will also construct approximately 2,000 linear feet of levee improvements to an existing levee located on adjoining property.	NOP	07/28/2009

2009068386	Observation Area Vegetation Maintenance Parks and Recreation, Department of --Shasta Remove, trim, and maintain vegetation at the main observation area at Burney Falls in McArthur-Burney Falls Memorial State Park to provide an unobstructed view of the falls for standing adults, small children, and wheel chair bound visitors. The District hazard tree inspector or other similarly qualified staff will direct all work.	NOE	
2009068387	ETS 7527 - Pole Replacement, 2 poles, Campo Regional Water Quality Control Board, Region 9 (San Diego), San Diego --San Diego The project entails replacement of a wooden H-frame utility structure. The existing wooden poles were installed many years ago, and the below-ground portions are rotting. The poles need to be replaced to ensure structural integrity and address safety concerns. A small crew will access the work site on foot. The existing poles will be cut at ground level. New holes approximately 8 feet deep and 2 feet in diameter will be dug with a hand shovel, and new poles will be installed using a helicopter. All work will occur in the existing utility easement.	NOE	
2009068388	Water Right Permit - Application: 31171 State Water Resources Control Board --Mendocino Application 31171 was filed on March 26, 2001. The application requests 16 acre-feet of water per year for irrigation. Water will be diverted from two onstream points of diversion to an offstream storage reservoir.	NOE	
2009068389	Chaffey High School - Compressed Natural Gas (CNG) Bus Fueling Facility Chaffey Joint Union High School District Ontario--San Bernardino The CJUHSD intends to construct a compressed natural gas (CNG) gas fueling facility within CJUHSD's existing bus storage/yard area. Improvements will involve the construction of a CNG pump and controls in an area of approximately 900 square feet. The fueling facility would serve approximately 22 bus stalls designed for CNG buses that would be located on both sides (east and west) of the fuel pump. Fuel lines would be extended to serve buses parked in these stalls.	NOE	
2009068390	San Bernardino Tax Relocation Employment Development, Department of San Bernardino--San Bernardino To lease approximately 13,069 square feet of office space to house the San Bernardino Tax staff.	NOE

2002061035	Royal Rangers Adventure Camp San Bernardino County --San Bernardino NOTE: Recirculated Conditional Use Permit to establish a year-round campground and conference center with a maximum capacity of 350 people (youth and staff), including: dormitories, gymnasium, dining room, meeting rooms, tent camping, enclosed amphitheater, outdoor chapel, swimming pool, enclosed gun range, archery range, rope apparatus courses, nature trails, basketball courts, parking, and natural areas, on 50.31 acres.	EIR	08/13/2009
2007111114	Costello Pool and Bathhouse Replacement Los Angeles, City of --Los Angeles The City of LA DRP is proposing to replace the existing pool and bathhouse at the Costello Recreation Center, located on East Olympic Blvd. in East LA. The new swimming pool would provide a modernized swimming and diving pool (~75 ft x 45 ft) including a splash pad complete with the shower towers. The new bathhouse facility would include a staff entry pavilion with reception desk, outdoor changing stalls, benches, outdoor lavatory, and large storage pavilion. The proposed project would also include resurfacing the 2 basketball courts adjacent to and east of the pool and landscaping improvements. A Historical Survey performed for the proposed project determined the Costello Pool and Bathhouse to be eligible for listing in the CA REgister of Historical Resources under Citerion 1, "associated with events that have made a significant contribution to the broad patterns of CA's history and cultural heritage." As a result, impacts would be significant and unavoidable, even after incorporation of mitigation measures.	FIN	
2009012027	Housing Element Update Newark, City of Newark--Alameda The project involves an update to the Housing Element of the General Plan. The Draft Element identifies a number of future potential housing sites throughout the community. The Project also includes amending the General Plan land use map and changing the zoning for certain parcels, including the creation of new zoning districts, to accommodate the City's regional fair share housing allocation.	FIN	
2009052093	State Route 253 Slipouts Storm Damage Restoration Project Caltrans #3 Booneville--Mendocino The proposed project will restore the highway to its pre-storm condition by reconstructing the filed shoulder at 2 locations, PM 7.6 and PM 7.75. The failed section at PM 7.75 is 175 ft long, and the failed section at PM 7.6 is 150 ft long. The previous 2 ft shoulder will be upgraded to the current 4 ft shoulder and will be supported by a soldier tie back wall. Metal beam guardrail and striping will be placed throughout the limits of both walls. Non-functioning under drains will be reconstructed. To facilitate those under drains, an existing 18 inch and 24 inch cross culvert will be replaced, both with 24 inch culverts. Grading will be done to promote wetland habitat.	FIN

2009061116	5449 PS 3-07; Vesting Tentative Tract Map 6752 (PP08238) Kern County Tehachapi--Kern Vesting Tentative Tract Map No. 6752. Proposing to divide a 38 acre parcel of recod into 15 lots ranging in size from 2.5 acres to 2.72 acres for low density residential development; 3 limited design variations; development variations to the Land Division Ordinance to allow private access where public access is required, and to allow omission of equestrian trails where trails are required. As proposed, water for the 15 residential parcels would be supplied by the existing domestic water well and 2 proposed domestic water wells, and sewage disposal would be provided by individual septic systems. Access to the site is proposed from Bear Valley, a collector highway, via private roads.	MND	07/29/2009
2006012087	800 K & L Street Project Sacramento, City of Sacramento--Sacramento The City will analyze two project options in the EIR. One is the same project as analyzed in the previous DEIR and FEIR. This option includes two 300-foot towers over a shared parking podium. A 300-unit condominium tower would be located on the corner of 8th and K streets, and an approximately 300,000 sf office tower would be located at the corner of 8th and L streets. Both towers would rise from a shared 80 foot, approximately 722 space parking podium with approximately 17,730 sf of ground floor retail facing K Street Mall, 8th Street, and L Street. The second option also proposes two towers. One tower would be approximately 27-stories, 300' tall, with approximately 409 hotel rooms and areas for a restaurant, meeting rooms, and ballroom. The second tower would be approximately 6 stories, with 372 public parking spaces and approximately 3,000 sf of ground floor retail. The approximate total square footages of the hotel tower would be approximately 363,126 sf and 144,000 for the second tower. To accommodate the proposed project, the entire site would be cleared. The portions of the underground sidewalk would be shored and protected. Although the existing buildings are constructed below street grade, some additional excavation would be required for the proposed project. The project would require piles.	NOP	07/29/2009
2005082131	Stream Maintenance Program Sonoma County Water Agency --Sonoma The Sonoma County Water Agency (SCWA) has developed the Stream Maintenance Program (SMP) to improve the management of streams and channels in SCWA's jurisdiction through establishing programmatic guidance. The SMP provides the organizational framework to oversee routine stream and channel maintenance activities. The SMP has three primary activities: sediment management, vegetation management, and bank stabilization. These core maintenance activities occur mainly in engineered flood control channels throughout Sonoma County.	NOD	
2005121185	Clovis-Herndon Shopping Center Clovis, City of Clovis--Fresno The project includes the development of a shopping center with approximately 491,904 sf of leasable space on approximately 44 acres of a 50 acre site located on the north east corner of Clovis Avenue and Herndon Avenue, west of Sunnyside Avenue, and south of State Route 168. The project includes an	NOD

	approximately 228,754 sf Wal-Mart store, nine other major stores with space between 7,500 and 88,400 sf, and six additional commercial pads ranging from 4,400 to 8,000 sf. Parking includes approximately 2,558 vehicle stalls plus loading areas. Street improvement and traffic control improvements are planned to accommodate additional traffic generated by the Project. Connection to the City's water, wastewater, and the Fresno Metropolitan Flood Control District's storm water collection and disposal systems are proposed for the newly constructed area. The developer's applications include a Rezone, Site Plan Review, a Conditional Use Permit, and a Director Review and Approval.		
2006042158	Proposed Re-Adoption of Rule 4570 San Joaquin Valley Air Pollution Control District --Kings, Madera, Fresno, Merced, Kern, San Joaquin, ... The Project is the re-adoption of San Joaquin Valley Air Pollution Control District Rule 4570 (Confined Animal Facilities). This rule was originally adopted by the San Joaquin Valley Air Pollution Control District Board on June 15, 2006. The District concludes that re-adoption of the rule will not have a significant environmental impact because re-adoption of the existing rule does not impose any change in current operations at facilities subject to the rule.	NOD	
2007012060	Hammer Lane Phase III Street Widening Project Stockton, City of Stockton--San Joaquin Hammer Lane widening - Pershing Avenue/Five Mile Slough Outfall Improvement Project - Project activities include drainage improvements at the Pershing Avenue/Five Mile Slough outfall. The City of Stockton proposes upgrading the existing 15 in diameter culvert to a 30-42 in diameter culvert. The current opening into the box culvert will be enlarged to accommodate the new pipe size. A new outfall location will not be created. The majority of the work necessary to install the new culvert will take place from the road above, outside Five Mile Slough. It is anticipated that a coffer dam will be installed at both ends of the north barrel, diverting the water through the south barrel, so work can be conducted on the wall opening. Access to the slough is narrow and therefore, it is anticipated that there won't be any heavy equipment within the slough.	NOD	
2008041055	North City Specific Plan Cathedral City Cathedral City--Riverside General Plan Amendment No. 08-005, Change of Zone No. 08-004, and Specific Plan No. 07-001 - The North Specific Plan is ~5,000 acres within the City of Cathedral City that includes mixed-use urban, mixed use neighborhood, residential estate, open space residential, business park, light industrial, and open space land uses.	NOD	
2008052019	Sutter Medical Center, Castro Valley, Replacement Hospital Project Alameda County Hayward--Alameda The SMCCV Project is in accordance with the Alquist Hospital Facilities Seismic Safety act of 1983 as amended by California State Senate Bill 1953, which requires the replacement or seismic retrofit of existing acute care facilities that do not meet current earthquake resistant standards for hospitals prior to the compliance date of January 1, 2013. The project would develop a new acute care hospital, totaling approx 230,000 sf (~130 licensed beds) to replace an existing hospital. The project would also relocate an existing helistop and construct a new	NOD

	80,000 sf Medical Office Building. The project will involve demolition of two existing hospitals, small medical office buildings, and a 42 unit apartment building, and result in a net increase of 5,652 sf in totaling building area on the Project Site. The existing hospital would remain operational until completion of the new hospital. The project would establish a Planned Development district for the project site, and include related amendments to the Castro Valley Plan and Castro Valley Central Business District Specific Plan. The project also would include a merger and resubdivision of existing parcels and a correction of street frontage boundaries.		
2008052105	ED-89 PM 18.0 - 24.9 Water Quality Improvements Project Caltrans #3 --El Dorado The proposed project will implement water quality improvement measures to comply with National Pollutant Discharge Elimination System (NPDES) permit requirements and address planned water quality improvements identified in the Lake Tahoe Basin Environmental Improvement Project (EIP) and the Lahontan Regional Water Quality Control Board's 1995 Water Quality Control Plan for the Lahontan REgion, North and South Basins. Both plans require retrofitting the state highway system to stabilize eroding slopes and meet specific storm water.	NOD	
2008082090	Environmental Assessment 2008-0002, Star Bend Boat Ramp Dredging Yuba County --Yuba The project site is located adjacent to the Feather River, and west of the intersection of Feather River Boulevard and Star Bend Boat Ramp in the unincorporated area of south Yuba County. The project sponsor is requesting County review and approval of an Environmental Assessment plan to allow the dredging of 2,730 cubic yards of silt material in the existing Star Bend Boat Ramp on approximately a 9 acre parcel (APN 016-010-017). Dredging of the project would restore the existing boat ramp channel and allow the re-launching of boats in an un-navigable channel. High water events in 2005-2006 led to high levels of silt and sediment in the boat launch channel.	NOD	
2008091066	Bass Lake Water Treatment Plant Project Health Services, Department of --Madera The Project consists of installation of a water intake for a municipal water supply. Approximately 2 cy of debris and sediment will be cleared from the bottom of the pool, and a wall screen and compressed air piping from the pump station located outside of the creek. All piping will be anchored to the rock face next to the intake pool. Existing access roads will be used, and no riparian vegetation will be removed. Disturbed areas will be restored and revegetated.	NOD	
2008121031	Tres Pinos Creek Crossing San Benito County Water District --San Benito The proposed Project would annually install and remove a prefabricated creek crossing structure to accommodate vehicular passage at the site during periods when the San Benito Water District releases water for perolation operations. The structure would be similar to a Bailey bridge in that it would measure ~14 ft wide and 60 ft long and would be constructed of prefabricated metal segments designed to fit the contour of the streambed that exists at the time of installation. The deck would be constructed to be ~3 ft above the streambed surface, leaving	NOD

	~2 ft of clearance for flow. While a John Deer 510B backhoe or similar equipment would be used to install and remove the structure itself, no grading, excavating, or otherwise installed at the site. No vegetation would be removed or trimmed to accommodate the structure. The structure would be installed no earlier than April 15 and removed October 31. Upon disassembly, the structure pieces would be stored on an upper terrace out of the existing flow channel.		
2009012076	I-880 HOV Lane Widening Project Santa Clara Valley Transportation Authority San Jose, Milpitas--Santa Clara The project would involve construction of high-occupancy vehicle (HOV) lanes in I-880 between US Highway 101 in San Jose and State Route 237 in Milpitas. The project would add one HOV lane in each direction and would extend HOV lanes further south by ~4.6 miles.	NOD	
2009012079	Hearn Avenue Widening Phase 2 Santa Rosa, City of Santa Rosa--Sonoma The City of Santa Rosa proposes roadway improvements along an approximately 620-foot long segment of Hearn Avenue to improve circulation along the eastern Hearn Avenue corridor and to provide additional capacity for vehicle stacking at traffic signals. An approximately 150-foot long segment of Hearn Avenue would be widened. Specifically, the proposed road widening would include the following elements: 1) addition of a west travel lane along the entire project length; 2) addition of bike lanes to the east of the Colgan Creek box culvert; 3) installation of new curbs and gutters on both sides of the roadway; 4) widening of the existing box culvert by approximately 47 feet to accommodate the proposed roadway improvements; 5) upgrade of two pedestrian ramps at Whitewood Drive and the sidewalk and driveway at 637 Hearn Avenue to meet current ADA standards; 6) reconstruction of the existing railroad signal and crossing arm foundations; 7) addition of raised median islands on either side of the railroad crossing; and 8) replacement of approximately 170 feet of SMART track and other minor improvements to an additional approximately 380 feet of railroad track.	NOD	
2009041006	River/Stream Maintenance for Flood Control in the Kaweah River System Kaweah Delta Water Conservation District Visalia, Tulare, Farmersville--Tulare, Kings The applicant proposes routine maintenance activities within the Kaweah River system, including sediment removal, vegetative control, debris removal, erosion control work, and channel flow capacity restoration, to be conducted to maintain channel capacity for flood control, and reduce erosion.	NOD	
2009041146	East Los Coches Drainage Improvement Project San Diego County --San Diego The project is the replacement and improvement of drainage facilities along E. Los Coches Rd & consists of replacement of existing box culverts and the addition of a supplemental storm drain that will run parallel to the existing storm drain.	NOD
