

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

March 1 – 15, 2016

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **March 1 – 15, 2016**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

<u>Documents Received on Tuesday, March 01, 2016</u>			
2013102057	<p>Amoruso Ranch Specific Plan Roseville, City of Roseville--Placer</p> <p>The proposed project includes a proposed annexation, sphere of influence amendment, specific plan, General Plan amendment, and development agreements for approx. 694 acres. The project would include 1,302 low density residential units, 542 Medium density residential units and 873 High density residential units, an elementary school, a fire station and 51 acres of commercial uses. 145 acres of open space and 223 acres of parks are also proposed.</p>	EIR	04/14/2016
2015101037	<p>Olivenhain Trunk Sewer Improvements Project (City Case #15-256 MUP) Encinitas, City of Encinitas--San Diego</p> <p>The Olivenhain Trunk Sewer (OTS) is a large diameter sewer that conveys wastewater from the City of Encinitas (City), including the community of Olivenhain, and portions of the City of Cardiff and unincorporated San Diego County almost 4 miles along Escondido Creek and San Elijo Lagoon to the Olivehain Pump Station at the Manchester Avenue/I-5 Interchange.</p>	EIR	04/14/2016
2012102046	<p>Walt Ranch Erosion Plan Application #P11-00205-ECPA Napa County --Napa</p> <p>The Walt Ranch Erosion Control Plan Application (ECPA) #P11-00205-ECPA proposes earthmoving activities on slopes greater than five percent in connection with the development of 356 net acres of vineyard within 507 gross acres on the approx. 2,300 acre Walt Ranch (Proposed Project). A total of 65 vineyard blocks are proposed. The 507 gross acres include vineyard avenues that would be constructed around each of the proposed vineyards blocks, rock stockpile areas, and access roads that would be constructed or realigned from their existing configuration. Erosion control features that would be installed include: surface and subsurface drainage pipelines, drop inlets, out sloped level spreaders, rock checks, diversion ditches, rock sediment basins, and rolling dips. Up to three new groundwater wells and four new groundwater storage reservoirs would be constructed, along with water distribution pipelines. Deer fencing would surround individual vineyard blocks or clusters of vineyard blocks.</p>	FIN	04/04/2016
2016031002	<p>ENV-2015-490-MND Los Angeles, City of --Los Angeles</p> <p>Project site has a total lot area of 417,318 sq. ft. (9.58 acres) prior to dedication & 405,744 sq. ft. (9.31 acres) after dedication. The site is zoned C4(CW)-U4.5 & is located within the Westlake Community Plan & the Central City West Specific Plan. The site has a land use designation of Regional Center Commercial. The project site currently contains a 10-story, 730,597 sq. ft. office building with an associated parking lot, and an adjacent 4-story, 267,340 sq. ft. parking structure that serves the office building. The proposed project involves demolition of all structures on the project site & the construction of a 7-story, 1,814,680 sq. ft. mixed use building with a maximum height of 90-feet. The project would include: 1,500 residential units, 30,000 sq. ft. of retail space. A total of 2,606 parking stalls will be provided within the building, with one above-grade level, one at-grade level, one at-grade level, and four below-grade levels. A total 1,500 long-term bicycle</p>	MND	03/30/2016

2016031003	<p>parking spaces & 180 short term bicycle parking spaces will be provided. The project would export approx. 505,000 cubic yards of dirt. The project would also remove 328 non-native trees, non-native shrubs, two rubber tired loaders, and one tractor/loader. The applicant has requested Project Permit Compliance for the Central City West Specific Plan and a haul route approval.</p> <p>GPA15-0002 & TPM 15-00006 (PM-19703) Hesperia, City of Hesperia--San Bernardino Consideration of General Plan Amendment GPA15-00002, to amend the land use designation from Rural Residential with a minimum lot size of one-acre (RR-1) and Tentative Parcel Map TPM15-00006 (PM-19703), to create four parcels and a remainder on 5.0 gross acres located on the northeast corner of Tioga Street and Topaz Avenue. The City of Hesperia has expanded the General Plan Amendment to include an additional 17.6 gross acre parcel to the north (APNs: 0405-471-31 and 06).</p>	MND	03/30/2016
2016031012	<p>Rancho Cienega Sports Complex (Celes King III) (G922) (WO: E1907694) Los Angeles, City of Los Angeles, City of--Los Angeles The proposed Rancho Cienega Sports Complex Project (proposed project) includes the development of an upgraded and expanded sports complex in the City of Los Angeles Council District 10. The proposed project would construct a new indoor pool and bathhouse with a community room and fitness annex on the 2nd floor; a new indoor gymnasium with office space, a running path, and a lookout deck on the second floor.; a new tennis shop with restrooms and tennis overlook; a new stadium overlook with a concession stand, restrooms and a ticket office; installation of new driveways; and upgrades to existing parking areas. The proposed project would also renovate the existing City of Los Angeles Department of Recreation and Parks maintenance yard and building as well as the existing refuse collection. Other site improvements include upgrades to existing parking, security lighting, additional stormwater and drainage infrastructure landscaping, and hardscaping.</p>	MND	03/30/2016
2016032013	<p>Collier SRRA Water Supply and Waste Water Treatment System Project and Break Room Project Caltrans #2 --Siskiyou Caltrans proposes two projects at the Randolph E. Collier Safety Roadside Rest Area (SRRA), located in Siskiyou County at the junction of Interstate 5 and State Highway 96. The first project would rehabilitate the water supply and waste water treatment systems and the second would construct a break room compliant with OSHA regulations. The project would include upgrade of an existing water system, replacement of an existing waste water treatment system, construction of a new building to be used as a break room for SRRA workers, upgrade of the facility's electrical system, and installation of a generator including a structure and fencing. Work to complete the project would include excavation of soil, tree removal, disposal of excess earthen material, installation of the water supply and waste water system components, and would require closure of the rest area for one construction season (approx. 6 months). The project would not require right of way acquisition or temporary construction easements. The project would require a Waste Discharge Permit from the North Coast Regional Water Quality Control Board.</p>	MND	03/30/2016

<u>Documents Received on Tuesday, March 01, 2016</u>			
2016031001	Canyon Springs Healthcare Campus Project Riverside, City of --Riverside Canyon Springs Marketplace Corporation is proposing a Specific Plan (SP) (Canyon Springs Healthcare Campus SP) on the project site. A site master plan has been developed and includes both short-term and long-range planning goals that cover construction over a 10-year period. The SP would include future development over five phases. The current project phasing for the future development is provided to the best of the applicant's knowledge as a reasonably possible scenario. Future project phasing could overlap depending on market conditions. A worst-case scenario assuming construction of all phases concurrently will be assumed in the environmental analyses.	NOP	03/30/2016
2016032001	Sebastopol General Plan Update Sebastopol, City of Sebastopol--Sonoma The proposed project is a comprehensive update to the Sebastopol General Plan, including the Land Use Map.	NOP	03/30/2016
2016032002	Carmax Automobile Dealership Pleasant Hill, City of Pleasant Hill--Contra Costa The proposed project includes demolition of existing buildings on the project site (former K-Mart and former McDonald's Restaurant, ~9.95 acres) and construction of new auto dealership facilities (sales, service, carwash, staging and presentation areas) encompassing ~18,824 sf, ~4.22 acres of surface parking area for customers, employees and sales/display of vehicles, and various miscellaneous appurtenant structures and site improvements. The project also includes a potential future phase that would include additional service buildings to accommodate expansion of the auto dealership on a portion of the site (~2.02 acres). The project involve the following entitlements if necessary, including but not limited to: a Re-zoning to PUD (Planned Unit Development) with a related Concept Plan, Development Plan, Conditional Use Permit, Architectural Review Permit (including tree removal), Lot Line Adjustment and/or Parcel Map, Encroachment Permit(s), Flood Control Permit(s), Sign Permits, Demolition Permits, Grading Permits and related approvals.	NOP	03/30/2016
2016031004	Berths 177-178 Transit Shed Demolition Project Los Angeles, City of --Los Angeles The project consists of demolishing a 135,000 sq. ft. cargo transit shed. The transit shed is part of a 40-acre cargo terminal operated by Pasha Stevedoring and Terminals , which had used the shed to store steel sheets and other cargo as part of their terminal operations since 1986. The transit shed sustained significant damage from a fire that occurred in September 2014, and has since remained vacant and been deemed unusable. The structure will be demolished to the top of the pavement with the foundations left in place, and no new structures will be built. Upon project completion the site will be returned Pasha who will continue to use the open property to handle and store cargo in a manner consistent with the previously existing use.	Neg	03/30/2016

2016031005	<p>City of Long Beach Downtown and TOD Pedestrian Master Plan Long Beach, City of Long Beach--Los Angeles</p> <p>As an amendment to the adopted Mobility Element of the City's General Plan, the proposed Downtown and TOD Pedestrian Master Plan (PMP) is intended to provide policies, guidelines and standards to ensure that all capital projects incorporate best practices for pedestrian design. The PMP identifies high priority catalytic infrastructure investments that the City of Long Beach can implement over the next 15 years. The PMP will be consistent with, and further define, the Downtown Plan and Pedestrian Priority Areas identified in the Mobility Element. The PMP will work as a model or framework for the rest of the City. It will include a list of capital improvement projects so the City can pursue funding. It will include short-term, mid-term and long-term projects along with cost estimates for the short-term projects to assist in the grant process funding. The PMP will give guidance to the City's Public Works Department for urban design issues.</p>	Neg	03/30/2016
2016032003	<p>Knoxville Wildlife Area Native Grassland Restoration Project Fish & Wildlife #3 --Napa</p> <p>Project proposes to enhance and restore native grassland habitat functions and values by the removal and control of invasive plants in a portion of low gradient grassland area in the Knoxville Wildlife Area, Napa County, CA. Target invasive plants are yellow-star thistle (<i>Centaurea solstitialis</i>) and medusahead (<i>Elymus cypripedifolius</i>). Plant control techniques will include a prescribed burn to kill invasive weeds and their seeds and remove dead vegetation. Following the prescribed burn, the project area will be planted with native vegetation including perennial grasses, forbs, shrubs and trees.</p>	Neg	03/30/2016
2016032008	<p>Siskiyou County Regional Transportation Plan 2016 Siskiyou County --Siskiyou Note: Review Per Lead</p> <p>The overall focus of the 2016 RTP is directed at developing a coordinated and balanced multi-modal regional transportation system that is financially constrained to the revenues anticipated over the life of the plan. The coordination focus brings the County, Caltrans, cities of Dorris, Dunsmuir, Etna, Montague, Mt. Shasta, Tulelake, Yreka, the Town of Fort Jones governmental resource agencies, commercial and agricultural interests, Karuk Tribe, Quartz Valley Indian Reservation, Shasta Indian Nation, and citizens into the planning process. The balance is achieved by considering investments and improvements for moving people and goods across all modes including roads, transit, bicycle, pedestrian, trucking, railroad and aviation. The previous RTP was adopted by the SCLTC in 2011.</p>	Neg	04/06/2016
2004111015	<p>Shafter-Wasco Sanitary Landfill Permit Revision (GPA 8, CUP 1, Map 78, Ag Preserve No. 8 Exclusion) Kern County Shafter, Wasco--Kern</p> <p>Proposed changes include: Indicate an acreage allotment for the already permitted composting activity (not currently actively composting); increase in estimated closure year from 2053 to 2059; updated operating documents' dates; removal of permit conditions that are obsolete or duplicative of existing regulations and/or the monitoring program; new condition requiring an RFI Amendment</p>	NOD

	Application prior to conducting composting activities.		
2010041060	South Bay Bus Rapid Transit San Diego Association of Governments Chula Vista, National City, San Diego--San Diego SANDAG has adopted a Second Addendum to the Final EIR for the South Bay Bus Rapid Transit Project to address a change since initial approval of the project and certification of the Final EIR on July 26, 2013, and adoption of a prior Addendum to the Final EIR on Oct 24, 2014. The proposed change involves the intersection of Siempre Viva Rd and the eastbound SR 905 to westbound Siempre Viva Rd; the existing stop sign would remain for vehicles exiting eastbound SR 905 on the westbound Siempre Viva Rd. SANDAG has determined that the project change does not create any of the conditions in CEQA Guidelines 15162 requiring preparation of a Subsequent EIR and therefore has adopted an Addendum pursuant to 15164.	NOD	
2015101049	Las Virgenes Creek Restoration Project - Phase II Calabasas, City of Calabasas--Los Angeles CDFW has executed lake and streambed alteration agreement no. 1600-2015-0212-R5, pursuant to section 1602 of the fish and game code to the project applicant, City of Calabasas. The proposed project involves two primary components: creek restoration and development of public access facilities. Creek and riparian corridor restoration includes activities such as: debris removal, erosion and sediment control and biotechnical slope and bank stabilization, fish habitat enhancement, fish passage barrier removal, and improving flood carrying capacity through selective willow thinning and removal of aggressive exotic trees and shrubs. Public access facilities that would be developed as part of the proposed project include public trails and environmental education areas.	NOD	
2016038001	Laguna Beach County Water District Anode Replacement and Repair Parks and Recreation, Department of --Orange The purpose of this project is to provide a staging area for the Laguna Beach County Water District (LBCWD) while performing their Anode Replacement and Repair Project. The anode replacement shall take place along HWY 1 to protect an existing pipeline. LBCWD has a permit with the Department of Transportation (DOT) as well as an easement. For safety purposes, they are requesting to stage equipment on State Parks property, as State Parks discretion. DPR-approved standard project requirements have been incorporated into this project. A copy of these requirements may be obtained by submitting a request to the project Environmental Coordinator listed below.	NOE	
2016038002	American River Parkway Enhancements at Sutter's Landing Park Central Valley Flood Protection Board Sacramento--Sacramento To modify approximately 3,500 feet of an existing gravel service road located at the waterside levee; creation of a landslide trailhead to include benches, interpretive kiosks, a sprinkler system; and the restoration of floodplain habitat by removing non-native vegetation and replanting with native vegetation.	NOE

	Proposed access includes a driveway off of Detroit Lane and McHenry Avenue. The applicant is proposing to use private septic and well.		
2016031007	Merced "Bear Creek Bicycle Path" Project, a.k. Bikeway Connector btwn Bear Creek and Black Rascal Creek Merced, City of Merced--Merced Project consists of the construction and upgrade of a 5,000 foot long Class I Bike Path segment; installation of a bike/pedestrian bridge over Black Rascal Creek; and the temporary use of three construction staging areas. upgrades to the existing path include widening to 10 feet and resurfacing.	MND	04/01/2016
2016031008	East-West Intertie Water Conservation Project Tranquility Irrigation District --Fresno The Proposed Action/Project would allow water to move against gravity from the Western Distribution System (WDS) supplied by the existing lift station (TID Lift #1) to the Eastern Distribution System (EDS) supplied by the existing lift station (TID Lift #2), by physically connecting the two distribution systems within the District. (Figures 1-1 and 1-2). The proposed intertie pipeline would reduce the District's existing 2.7 mile conveyance path through earthen canals for water deliveries during annual winter periods, between the months of October through March. The nine acre solar site would provide power to the District.	MND	04/01/2016
2016031009	Hayes Avenue Storm Drain Project San Diego, City of --San Diego The project would replace 26 linear feet of existing storm drain pipe on Hayes Avenue; abandon approx. 150 linear feet of existing storm drain pipe at 820 Hayes Avenue; install approx. 250 linear feet of storm drain pipe at the alley between 906 Hayes Avenue and 930 Hayes Avenue and down the canyon; install 100 linear feet of storm drain pipe on Hayes Avenue; and install an energy dissipater, catch basin, and clean outs (figure 4). A three foot-wide trench on Hayes Avenue would need to be excavated to install the new 18-inch reinforced concrete pipe (RCP) storm drain next to an existing 160 linear feet storm drain main. The trench would be three to ten feet deep.	MND	04/01/2016
2016032006	Chernioglo Minor Land Division (PLN15-00262) Placer County Loomis--Placer The applicant is requesting approval of a Minor Land Division of a 9.9-acre property in order to create two parcels consisting of 5.5 acres and 4.8 acres. The proposed project would create two buildable residential parcels. Each of the proposed parcels will utilize domestic water wells for drinking water. The project will be served by the individual wells and onsite sewage disposal systems. Site access of the proposed parcels will require the construction of improvements and a Plate R-17 roadway connection onto King Road to serve the parcels.	MND	04/01/2016
2011082069	Southport Sacramento River Early Implementation Project West Sacramento Area Flood Control Agency --Yolo WSAFCA is preparing a subsequent EIR to analyze the addition of the Borrow One Site to its approved Southport Sacramento River levee project. The Borrow One site contains materials needed to construct the Southport project. The Borrow One project area is an approx. 120-acre parcel presently used for	NOP	04/01/2016

	agricultural activities. Up to 300,000 cubic yards of material would be removed from the Borrow One site to support levee work associated with the Southport project. Approx. 95 acres of the 119-acre property would be excavated to an average depth of 2 feet. An approx. 25-acre pond would be excavated on the eastern portion of the site, and the excavated material used to backfill excavated areas on the remainder of the site. The permanent pond would provide irrigation and drainage for the Borrow One site.		
2016032005	Gibbons Park Master Plan Sacramento County --Sacramento Project involves the full development of the existing park consistent with the conceptual master Plan drawing.	Neg	04/01/2016
2002071089	March Business Center Specific Plan March Joint Powers Authority Riverside--Riverside This project proposes minor changes to SP-1 and Tentative Map 30857 to more efficiently develop the South Campus. Specifically, the project proposes to: 1) replace the "curvilinear" intersection of Village West Drive and Krameria Ave with a simpler, more efficient "tree" intersection; 2) adjust the alignment of Krameria Ave slightly to the north to avoid the existing landfill; 3) move the southerly terminus of "M" Street approximately 305 ft to the west as it enters the Ben Clark Training Center; and 4) make minor adjustments in acreages of parcels as a result of these adjustments and realignments. These actions would be accomplished through a Specific Plan Amendment (SP-1, A5) and an amendment to Tentative Map 30857 (TM 30857 Amendment #3). In addition, TM 30857 Amendment #3 revises the map to include development phases. Minor General Plan changes are also proposed as part of the Project. These include 1) minor changes to the general plan land use plan resulting from the requested street realignments; 2) modification of Table 1-1 to increase Parks, Rec and Open Space development and reducing other Industrial and Business Park uses by 21.1 acres; 3) amending the March JPA Trans Plan Exhibit 2-1 to identify the realignment of the Krameria Ave/Village West Dr intersection; and 4) modifying Table 2-2 to identify the addition of bike lanes on Van Buren Blvd. Finally, the project includes modifications to the existing March Business Center Design Guidelines to accommodate more appropriate drought resistant methods.	NOD	
2007062030	Salt River Ecosystem Restoration Project Humboldt County Ferndale--Humboldt This implementation project will reconnect the Francis Creek and Williams Creek tributaries back to the Salt River by removing 97,200 cy of sediment from the Salt River channel and floodplains, enhancing 2.5 miles of in-channel complexity, and restoring 47.3 acres of riparian and wetland corridor.	NOD	
2007072023	Modesto Master EIR Update and General Plan Amendment Modesto, City of Modesto--Stanislaus Construction of a new one-story, 2,695 sf restaurant building providing 60 seats and drive through service.	NOD

2015041002	Arcadia Logistics Center Arcadia, City of Arcadia--Los Angeles The project consists of a general plan amendment (GPA 15-02), Specific Plan (SP 14-01), and Tentative Parcel Map (TPM 14-06 (73407)). GPA 15-02 revises the text under general plan policy ED-1.4 to support the re-se of the Lower Azusa Road Reclamation Area as a master-planned warehousing and logistics center. SP 14-01 implements the City of Arcadia's General Plan within the boundary of the subject property and establishes a set of development standards and design guidelines for the planned development of logistics center buildings that would provide up to 1,688,00 sf of building space. TPM 14-06 (73407) subdivides the subject property into Parcels 1-6 and Lots A-F to enable development of the site.	NOD	
2015062070	Draper Mine Road crossing Curtis Creek Bridge (32C0028) Replacement Project Tuolumne County --Tuolumne The Tuolumne County Community Resources Agency intends to replace the existing Draper Mine Road crossing Curtis Creek Bridge (32C0028) with a 40 foot wide, pre-cast voided concrete slab bridge structure to improve roadway safety and comply with the American Association of State Highway and Transportation Officials (AASHTO) design guidelines. The existing Draper Mien Road Bridge is a one-span, 28 ft long, 22 ft wide bridge that was constructed in 1937. During Project construction the road will be temporarily closed and traffic will use nearby roads to access SR 108.	NOD	
2015092057	2016-2018 Markleevillage Fuels Reduction Project Alpine County --Alpine The Sierra Nevada Conservancy would provide \$230,115 in funding to Alpine County to implement the 2016-2015 Markleevillage Fuels Reduction Project. The project would treat a total of 234 acres to reduce wildlife risk. A total of 140 acres would be treated between Nov. 2016 and March 2017, and a second 94 acre treatment area would be treated between Nov. 2017 and March 2018. The project would involve the removal of brush, small trees and under story fuels by mechanical mastication. SNC has reviewed the IS and MND prepared by Alpine County, and concurs with the analysis in that document.	NOD

2016012051	Jenner Headlands Preserve Vegetation Management Project Forestry and Fire Protection, Department of --Sonoma The Jenner Headlands Preserve will create shaded fuel breaks prior to CAL FIRE implementing prescribed burns within them. The planned west project area is 141 acres and approx. 10,300 linear feet and the planned east project area is 124 acres and approx. 11,500 feet, for a total of 265 acres and approx. 21,800 linear feet. Forty three acres in the east fuel break were treated between 2013 and 2015 by mastication and hand crews, and this will be the first shaded fuel break burn unit. Ladder fuel vegetation was thinned from the shaded fuel break, and brush and trees have begun to sprout. The understory burn will maintain the effectiveness of the fuel break by consuming these small sprouts and the masticated material on the ground with low-intensity fire. As the Preserve works towards treating all 265 planned shaded fuel break acres, CAL FIRE will continue to burn the understory as the fuel breaks are created. Within the project area are two small open grasslands that will be burned for training and ecological restoration. Training activities will include firing operations and mobile attack from fire engines. Ecological restoration will be achieved through removal of heavy thatch build-up will promote native grasses and improve forage for browsers. The meadows range in size from one to four acres and will be broadcast using wet lines for control. Bulldozers or other heavy equipment will not be used to create control lines. Mowing and weedeating may occur in the meadows prior to burning operations in order to modify fuel arrangement to reduce fire intensity.	NOD	
2016028466	Adams Elementary School Closure and Attendance Area Realignment Desert Sands Unified School District La Quinta--Riverside The District is experiencing declining enrollment in its south-central portion. It proposes to close John Adams Elementary School (ES) after the 2015-16 school years and realign the District's elementary attendance areas for the reassignment of students currently enrolled at Adams ES to Harry S Truman ES and Benjamin Franklin ES, effective the 2016-17 school years. The proposed project would help the District reduce administrative and facilities expenses.	NOE	
2016038046	AEU Pine Grove Camp Water Tanks Replacement Forestry and Fire Protection, Department of --Amador This project consists of the proposed replacement of two 25,000 gallon redwood water tanks with two steel water tanks of similar capacity. The two redwood tanks have been in use at the camp from 1956 until 2009 when they were decommissioned. The redwood tanks will be dismantled using Pine Grove Camp personnel. The two steel tanks shall be placed on the existing 8-sided (octagonal) concrete slabs the current redwood tanks occupy using a backhoe and/or excavator. After placement the steel replacement shall be hooked up to the existing gravity-fed waterline system to distribute water to camp facilities.	NOE	
2016038047	Rancho Calaveras Fuelbreak Forestry and Fire Protection, Department of --Calaveras The project area (3850 acres) is located in southwestern Calaveras County north of Jenny Lind. Highway 26 and Jenny Lind Road (J14) serve as the west boundary with the Calaveras Rivers as roughly the eastern boundary. The area is known as Rancho Calaveras and consists of a subdivision of 1 acre to 10 acre parcels. Larger parcels up to 80 acres are found adjacent to the Calaveras River. Project	NOE

	(Lot 2 to 13) will be for sale and/or development; the existing residence on the site will remain on the proposed Lot 1. The project includes construction of a private access road with associated drainage and utility improvements and a creek crossing. Each parcel will be served by individual well and septic systems. The proposed site disturbance will be approx. 3.2 acres on a total 66.5 acres. The project is located on the west side of Old Oak Park Road between Vetter Lane and Erhart Road in the Arroyo Grande fringe area, about 1.2 miles north of the City of Arroyo Grande in the San Luis Bay (south) planning area.		
2016032009	Lake Ranch Reservoir Outlet Works Improvements Santa Clara County Saratoga--Santa Clara San Jose Water Co. is proposing to rehabilitate the Lake Ranch Reservoir in accordance with CA Division of Safety of Dams (DSOD) requirements. The reservoir was built between 1874-1876, with a capacity of about 70 million gallons. Due to the age of the embankments and lack of details on original construction, SJWC proposes to construct siphons over both dams and grout the existing outlet pipes, rather than replace them. Based on the DSOD's drawdown requirements, the siphon at Saratoga dam will consist of a 12-inch diameter pipe. At Beardsley dam, the siphon will consist of a 4-inch diameter pipe with 16-inch emergency pipe. The siphons will be constructed using high density polyethylene piping. The pipes will be buried and concrete-encased where they cross over the dam abutments, and will be mounted on the lake bottom with floating intakes.	MND	04/04/2016
2016032012	Demonstration Recharge Extraction & Aquifer Management Project + NSJWCD South System Improvements San Joaquin County Lodi--San Joaquin Note: Extended per lead.	MND	05/04/2016
	The proposed project involves: 1) the Demonstration Recharge Extraction and Aquifer Management (DREAM) Project, which is a one-time, short term pilot conjunctive use groundwater replenishment project involving up to 1,000 acre-feet of water, and 2) North San Joaquin Water Conservation District (NSJWCD) South System surface water distribution facility improvements. The purpose of the project is to further the use of available surface water for irrigation in lieu of groundwater withdrawal, which is the predominant irrigation source in the project area.		
2016032014	Lower Laguna Creek Open Space Trail Project Elk Grove, City of Elk Grove--Sacramento The Lower Laguna Creek Open Space Trail Project (Project) would involve construction of a 1.15 mile Pedestrian Trail, Class I Bikeway, educational area within the City of Elk Grove and City of Sacramento. 2007101108 Main Campus Infrastructure Renewal Project
University of California, Santa Barbara
Goleta--Santa Barbara
ADM
The Santa Barbara Campus proposes to replace certain underground utility distribution and collection pipelines. A phased infrastructure renewal program has been developed that addresses the natural gas and potable water distribution systems, and the sanitary sewer collection and storm drainage systems. The utilities that would be replaced have been identified as being in deteriorated condition and/or undersized to adequately serve the existing development located on the Main Campus.

2009122041 Dowd Road Bridge Over Markham Ravine - Bridge Replacement Project
Placer County
Lincoln--Placer
ADM 04/05/2016
Note: FYI - No review period per lead agency.

The proposed project will replace the existing narrow bridge along Dowd Road at Markham Ravine, just south of Nicolaus Road. The proposed project consists of replacing the existing reinforced concrete slab bridge with a two span cast-in-place post tensioned slab. The new bridge and roadway approaches will accommodate two-lanes of traffic.

2016-02 Rincon Band of Luiseno Mission Indians - APNs: 133-270-03
Bureau of Indian Affairs
--San Diego
BIA 04/05/2016
The subject property consists of land, encompassing ~6.20 acres, more or less, and is commonly referred to as APNs: 133-270-03. The property lies within the exterior boundaries of the Rincon Reservation.

	structure's exterior walls.		
	As many as 198 beds in the existing jail not consistent with contemporary incarceration plans will be removed and their space utilized for other support functions. Thus, there would be a net increase of 58 beds or inmates over the existing population. The 2013 Butte County Jail Needs Assessment identifies a need for 8 new staff as part of the County's response to AB 109. Whether or not all would work daily in the proposed facility is unknown at this time; for purposes of this initial study, however, it is assumed the operation of the proposed facility would include an additional 8 staff. Thus the proposed facility would include an additional 58 inmates and 8 staff over current inmate and staffing levels.		
	The proposed facility would be built to US Green Building Council LEED Silver standards or equivalent, as well as to Code of Regulations Title 15 and Title 24.		
2014062043	Granite and Dominguez Subdivision Rocklin, City of Rocklin--Placer CDFW has executed lake and streambed alteration agreement no. 1600-2015-0269-R2, pursuant to section 1602 of the fish and game code to the project applicant, John Mourier Construction, Inc.	NOD	
	The project is limited to work associated with the construction of a paved bike trail and a storm drain outfall. The bike trail will be approximately 742 lf and 12 ft wide. The storm drain outfall structure will be composed of 34 sf of reinforced concrete apron, approximately 4.5 ft long and 7.5 ft wide, and approximately 160 sf of 1/4 ton rip rap downstream of the concrete apron. The outfall structure will discharge into a daylight ditch approximately 63 ft long and will taper down in width from 8 ft wide down to 0. The daylight ditch will be lined with an erosion control blanket, hydroseeded, and covered with mulch and tackifier. The project will result the removal of ten trees, and the permanent impact of approximately 0.17 acres of riparian woodland.		
2014112056	Delta Emergency Rock and Transfer Facilities Project Refinements Water Resources, Department of Stockton--San Joaquin, Solano CDFW has executed lake and streambed alteration agreement no. 1600-2015-0190-R3, pursuant to section 1602 of the fish and game code to the project applicant, DWR.	NOD	
	The project is limited to creation of a permanent rock stockpile and emergency transfer site on the north shore of the Stockton Deep Water Ship Channel. Project activities include construction of 2 new approximately 600-sf concrete foundations that will be supported by piles. The foundations will be used for 2 rock conveyors. They include removal of 12 existing wooden piles and installation of up to 8 spud piles (steel pipes or H piles of 4 sf each) near the toe of the bank to support 2 conveyor support barge structures. They includes installation of up to 11 dolphin pile clusters for mooring of up to 3 transport barges during rock-loading operations.

	The applicant's intent is to expand their existing business and utilize the drydock to service its own vessel fleet as well as provide service to other vessels similar in size. The proposed hours of operation are Monday - Friday, 7:00 am to 5:00 pm, and occasional evenings and Saturdays.		
2016032024	Field & Pond Large Bed & Breakfast and Large Event Facility Project Yolo County Winters--Yolo Project is a proposal for a Use Permit to operate a large bed and breakfast and large special event facility in the A-X Zone.	MND	04/07/2016
2016032025	Chalet Road Townhomes (PLN15-00156) Placer County --Placer The project proposes a Conditional Use Permit and Tentative Subdivision Map to subdivide the two and one-half-acre site into 18 residential halfplex units (nine buildings total). Each unit contains its own garage as well as driveway parking for a total of 76 potential on-site parking spaces. Internal, private road segments are proposed to provide access to the future units. The project will include the demolition of the existing multi-story Stanford Chalet building to allow for this proposed project.	MND	04/07/2016
2016032026	Tanner Tentative Parcel Map (TPM-15-03) Siskiyou County Mount Shasta--Siskiyou Project consists of a tentative parcel map to subdivide a 10.69 parcel into four lots. The lots would range in size from 2.6 to 2.84 acres. The parcels would be served by individual well and septic systems. Parcels I, II, and III would have direct access to Pine Grove Drive, and Parcel IV would have direct access to Wisner Road. Pine Grove Drive and Wisner roads are constructed and paved.	MND	04/07/2016
2016031027	Doheny Village Plan Dana Point, City of Dana Point--Orange The proposed Doheny Village Plan (a Form-Based Code) is proposed for the project site in order to allow for a mix of land uses including industrial, office, retail, community service, and residential uses at the project site. The proposed Form-Based Code would establish the allowed massing and scale of buildings according to the type of environment, or transect zone, in which they occur. In addition, the allowed uses are identified for each transect zone in support of the intended physical character and overall environment. The project would require a General Plan Amendment, Zone Code Amendment, and Local Coastal Program Amendment.	NOP	04/07/2016
2014082050	Canyon Estates General Plan Amendment, Pre-Zoning and Annexation American Canyon, City of American Canyon--Napa A tentative subdivision map to establish 35 single family lots within the western 38 acres of a site adjacent to Newell Dr. The tentative subdivision map shows the lot configuration, roadway configuration and the general layout of utilities. Individual residential homes would be constructed in 1-story and 2-story structures not exceeding 35 ft tall. The project includes 28 lots between 20,000 sf and 30,000 sf, two lots between 30,000 sf and 40,000 sf and five lots measuring 40,000 sf to 45,000 sf which represent 'signature lots' within this development. 2015011033	<p>Cypress Mountain Drive Bridge Replacement Project San Luis Obispo County --San Luis Obispo CDFW has executed streambed alteration agreement no. 1600-2015-0190-R4, pursuant to section 1602 of the fish and game code to the project applicant, County of San Luis Obispo.</p> <p>The Project includes activities related to replacing a wooden bridge with a cast-in-place concrete bridge and replacing a culvert.</p>	NOD	
2015041055	<p>Palm Avenue Mixed Use and Commercial Corridor Master Plan Imperial Beach, City of Imperial Beach--San Diego This is a streetscape plan to traffic-calm Palm Avenue/SR 75 through improvements that include widened medians and sidewalks with additional landscaping, enhanced pedestrian safety "refuges," marked crosswalks, curb ramps, bulb-outs at intersections, narrower traffic lanes, on-street lanes, on-street diagonal parking along side streets and bicycle lanes. MF 1171</p>	NOD	
2015112032	<p>Environmental Determination for Valley Oak Subdivision (TSM 15-01 & Rezone 15-01) Anderson, City of Anderson--Shasta A proposed MND and rezoning request to develop 4.05 acres of a 6.3 acre approved Residential Planned Development (PD R-2 "Lau" Condominiums - 70 units approved in 2006) property as a 19 unit single family home subdivision (R-1/R-2). If approved, the project will include development of single-family homes with attached garages, a public street access and a 2.25 acre remainder lot. The entire property will be rezoned to Medium Density Residential curbs, gutters, and sidewalks from the abutting developed street (Stingly Lane). The project will gain access off of Stingly Lane by construction of a 590 ft long public street/cul-du-sac.</p>	NOD	
2015121006	<p>MND and Support IS for PG&E Company Gas Pipeline-300A/B Vegetation Management Project Fish & Wildlife #4 --San Benito The proposed project consists of removing trees and woody brush in riparian and non-riparian areas in select areas along the 37.5 miles of the GL 300A and GL 300B ROW, comprising approximately 18.17 acres of vegetation removal. Temporary work and staging areas comprise an additional 5.5 acres; vegetation will not be removed in these areas, except where these areas overlap with vegetation removal work areas. PG&E proposes to remove all trees within approximately 10 ft of the outer edge of the pipe and all other woody vegetation within 5 ft of the outer edge of the pipeline. Vegetation determined to be a hazard outside of the Pipe and Border Zones up to 14 ft from the edge of the pipeline may also be removed. Brush and tree species that are proposed for removal include, but are not limited to, blue oak, coast live oak, willow, California buckeye, foothill pine, juniper, coyote brush, and mule fat. The selective removal of trees and brush would not result in the creation of bare ground surface. The project would result in impacts to jurisdictional stream features, pursuant to fish and game code section 1600 et seq. and therefore, a streambed alteration agreement in necessary for the project.</p>	NOD

	<p>The existing trailers total approximately 1,445 square feet(sf). The existing trailer structures are leased by the District and will be removed by the lessor upon request by the District. Disassembly and removal of the existing trailers is anticipated to take approximately three days. The proposed building would be approximately 2,160 sf and would be an on-grade modular structure. This would consist of a below-grade "pit type" concrete foundation in which the trailer would be permanently attached. The foundation excavation extends to approximately 36 inches below grade. Excavation includes removal of approximately 240 cubic yards of soil and approximately 27 cubic yards asphalt. All foundation-related work is anticipated to take approximately two weeks. The modular building installation is anticipated to take approximately one week. Construction is anticipated to commence in approximately January 2016 with project completion by June 2016.</p>		
2016038137	<p>Sprint Wireless Telecommunications Facility Modifications at Marina Cortez San Diego Unified Port District --San Diego</p> <p>The proposed project involves modifications to the existing Sprint wireless telecommunications facility located at Marina Cortez on Harbor Island in the City of San Diego. The purpose of the proposed project is to improve the capacity of the Sprint network in the surrounding area and improve aesthetics of the site. The existing facility is located on the rooftop of the Marina Cortez building and is comprised of an equipment enclosure, 6-foot-tall panel antennas (one sector), a 5.16-foot-tall screen wall, and other associated telecommunication equipment. Currently, the existing panel antennas do not provide adequate capacity for Sprint's network and are not fully concealed by existing screen wall. The proposed project would remove the existing panel antennas, install new 6-foot-tall antennas (in four sectors), and associated telecommunication equipment to improve the capacity of the Sprint network, and install new 9-foot-tall Fiberglass Reinforced Plastic (FRP) antenna enclosures to fully conceal the new antennas and improve the aesthetics of the site. Overall the total height of the building would decrease by approximately 1.16 feet from the existing height of approximately 49 feet above ground level (agl), for a new height of approximately 47.83 feet agl.</p>	NOE

2010091044	Sylmar Ground Return System Replacement Project Los Angeles, City of Los Angeles, City of--Los Angeles The Los Angeles Dept. of Water and Power is proposing to replace the existing marine cables and the marine electrode portions of the Sylmar Ground Return System. The proposed marine facility would originate at the existing Gladstone Vault, from this location, the new marine cables would extend to a new electrode array in the Santa Monica Bay. The marine cables would be installed several feet beneath the ocean floor by means of a water-jet plow to the site of the proposed electrode array, approx. 2 miles offshore. The electrode array would be located on the ocean floor at a depth of approx. 100 feet below mean sea level and consist of 36 concrete vaults, arranged in two rows of 18 vaults. Each vault is 20 feet long 8 feet wide, and four feet high.	EIR	04/25/2016
2014032010	735 Meder Street Santa Cruz, City of --Santa Cruz The project consists of Coastal Permit and Administrative Use Permit to construct a single-family residence, an accessory dwelling unit (ADU), two accessory structures (workshop and pool house) within a 7-acre development envelop on a 50-acre parcel. Site improvements include: access road improvements, installation of water storage tanks for fire protection, development of an onsite well for landscaping, and installation of a septic system for wastewater disposal. The proposal also includes a request for a variance/exception to slope regulations pursuant to Municipal Code section 24.14.040 in order to construct a portion of the driveway across slopes that exceed 30%. Other City approvals include a Watercourse Development Permit as part of the driveway is within the management area of Moore Creek Reach.	MND	04/08/2016
2016031031	Henderson Residence Bluff-Top Retaining Wall, Design Study 15-158 Carmel-by-the-Sea, City of Carmel-by-the-Sea--Monterey The proposed project is a new 63-foot long bluff-top retaining wall along the northern boundary of the property, overlooking the southern edge of Carmel Beach. The wall is proposed to range between 7 feet and 8 feet in height, with the top of the wall approx. 16 feet above the existing grade of the beach. The wall is proposed to match, to the extent feasible, the existing bluff face, and would be constructed with the appearance of natural stone. Physical changes to the environment includes the removal of some vegetation (non-native ground covers) and the construction of a 63-foot long, bluff top retaining wall with short wing-walls. 2008122060	<p>Manabe OW Specific Plan Watsonville, City of Watsonville--Santa Cruz</p> <p>The project is limited to the following activities: demolition of a 1,711 sf abandoned dwelling; construction of a 90 ft segment of a 6 ft wide asphalt pedestrian trail; and installation of three drainage outfalls with gabion spillways at the slough to discharge overflow storm runoff from the subdivision detention ponds. All three project elements will be located above the City of Watsonville's established high water flow line of the slough. The project is part of the Sunshine Gardens 89-lot subdivision development that includes the construction of dwellings on each lot and tree streets to serve the new parcels. The project complies with the residential land use prescribed by the City of Watsonville's approved Manabe-Ow Specific Plan. CDFW is executing a lake and streambed alteration agreement no. 1600-2015-0413-R3 pursuant to section 1602 of the fish and game code to the project applicant, Kevin Wang, Pacific Sunshine Development.</p>	NOD	
2013072023	<p>Calero County Park Trails Master Plan Santa Clara County San Jose--Santa Clara</p> <p>The project is limited to the construction of two new park trails, the Chisnantuck Trail and Ranch San Vicente Trail. The Chisnantuck Trail will be an approximately 4.1 mile single-track, natural surface multi-use trail 5 ft in width. The trail calls for 15 rock-armored swales within mixed bay/oak woodland. The Rancho San Vicente Trail will be an approximately 4 mile single-track, natural surface multi-use trail. The trail calls for 16 rock-armored swales within annual grassland. The armored swales will be trail and drainage width to ensure the water remains in the channel, and armored throughout the trail width. No mortar will be used in construction of swales within annual grassland. The armored swales will be trail and drainage width to ensure the water remains in the channel, and armored throughout the trail width. No mortar will be used in construction of swale crossings. Swales will be armored with large rocks at the base to make up the keystone/foundation and then smaller rocks will make up the tread for multi-use passage and energy dissipation. Rocks will be sourced from nearby on each site. The drainages being crossed do not flow frequently (flow is primarily short duration during peak storm periods). The trails have been located to avoid the need to remove trees. CDFW is executing a lake and streambed alteration agreement no. 1600-2015-0384-R3 pursuant to section 1602 of the fish and game code to the project applicant, Robb Courtney, County of Santa Clara, Department of Parks and Recreation.</p>	NOD

2015081057	Waterfront Master Plan Monterey, City of Monterey--Monterey On March 1, 2016, the City Council of the City of Monterey adopted second reading of an ordinance rezoning the planning area for the Waterfront Master Plan. The City Council had previously adopted the Neg Dec for the Waterfront Master Plan on February 16, 2016, at which time the council also adopted the Waterfront Master Plan and conducted first reading of the ordinance. An NOD was filed at that time. The Master Plan serves as a guide for future activities within the planning area. The Master Plan creates a vision for the planning area that implements General Plan and Local Coastal Plan goals, policies, and programs. The key components of the Master Plan include: goals, policies, programs, and projects for mobility, recreation, parking, public facilities, fiscal, and implementation; land use and development objectives, standards and design guidelines; and financing and implementation.	NOD	
2015101097	PRC 421 Access Road Maintenance and Repair Project Goleta, City of Goleta--Santa Barbara The proposed project consists of periodic maintenance and repairs to the PRC 421 access road for five years. Additionally, the project includes activities completed to repair and maintain the PRC 421 access road in the past.	NOD	
2015121028	Ridgeline Development Project San Bernardino, City of San Bernardino--San Bernardino The project would develop the parcel into one commercial building with a drive-through, ample parking, and landscaping. The project would consist of a 3,000 sf building which is planned to contain a coffee shop with drive-through land use and retail use.	NOD	
2015121064	City of Coalinga 2015-2023 Housing Element Update Coalinga, City of Coalinga--Fresno The project is the adoption and implementation of the Coalinga General Plan 2015-2023 Housing Element. The Housing Element is one of seven required elements of the General Plan. It addresses existing and future housing needs of persons of all economic segment groups, and serves as a tool for decision makers and the public in understanding and meeting housing needs in Coalinga. While the law does not require local governments to construct housing to meet identified needs, it does require that the community address housing needs in its discretionary planning actions by creating opportunities for housing in the land use plan and facilitating housing development through policy.	NOD	
2016011018	San Elijo Land Outfall Replacement Project San Elijo Joint Powers Authority Encinitas--San Diego The SEJPA proposes to replace the land outfall portion of the San Elijo Water Reclamation Facility (SEWRF) outfall system that extends between the SEWRF and the beach. The proposed alignment of the new land outfall would be slightly different from the existing outfall alignment in order to accommodate a trenchless construction method, horizontal direction drilling. The new pipeline would extend west approx. 80 linear feet from the existing outfall system within the existing SEWRF access road, under the access road, and across an existing flood control	NOD

	riverfront. The purpose of the Project is to improve transit service and local circulation with an alternative (non-auto) mode, and supporting existing and future development in the Cities of West Sacramento and Sacramento. The 3.3-mile streetcar alignment would extend from the West Sacramento Civic Center to the Midtown entertainment and retail district in Sacramento. New track, station platform and traction power facilities would be constructed within existing street rights-of-way. Maintenance facilities would be located on Caltrans owned property.		
2016032030	Town of Loomis Update to the Circulation Element IS/MND Loomis, City of Loomis--Placer The Project consists of an update to the Circulation Element of the Town of Loomis General Plan. The Project updates the Circulation Element of the General Plan to address new key issues, goals, and implementation policies. The Goals and policies identified in the Circulation Element Update aim to provide for an enhanced circulation infrastructure that is safe for all modes of travel and the community's general welfare and overall convenience including safety and interconnectedness as a whole. The project defines a preferred transportation system that reflects the Town's financial resources and broader goals, including preserving the historical and semi-rural character of the Town. The Project also identifies and incorporates near-term and potential long-term improvements to address the Town's future circulation needs.	MND	04/11/2016
2009091125	California High-Speed Train Project Merced to Fresno Section High Speed Rail Authority, California Madera, Fresno--Madera, Fresno The project proposes to conduct tree trimming of approximately 14 eucalyptus trees, arranged in four clusters, and minor erosion control adjacent to the northbound SR 99 on ramp at Herndon Avenue.	NOD	
2016012050	Monte Bello Open Space Preserve Bridge Projects Midpeninsula Regional Open Space District Palo Alto--Santa Clara The District has identified two creek crossing locations (Sites 1 and 2) along the Stevens Creek Nature Trail alignment in need of retrofitting. Site #1 is the location of an existing 24 ft long wooden beam bridge on an unnamed tributary to Stevens Creek. Stevens Creek Nature Trail in this area is multi-use, but can be closed to cyclists and equestrians. Channel incision and bank erosion underneath the bridge threaten its integrity, making it vulnerable to damage and/or failure during large storm events. Site #2 is an existing at-grade wet ford across the mainstem of Stevens Creek, upstream of the general vicinity of Site #1. Stevens Creek Natural Trail in this location is currently open only to pedestrians. The proposed project includes bridge construction activities at Sites 1 and 2. Work at Site #1 would replace the existing 24 ft long wooden beam bridge across Tributary Creek with a new 45- to 50-ft long steel bridge that is farther from the actively eroding creek banks. Work at site #2 would replace an existing at-grade wet ford crossing of the Stevens Creek mainstem with a new 45- to 50-ft long steel bridge to improve safety and avoid sensitive creek and riparian habitats.	NOD

2013021042	Groundwater Reliability Improvement Program (GRIP) Supplementary Recharge Wells Project Water Replenishment of Southern California Whittier--Los Angeles Note: Addendum to the FEIR The proposed project includes three on-site supplemental recharge wells, two on-site monitoring wells, and one off-site monitoring well. The supplemental recharge wells would be operated to recharge and store up to 4.5 millions gallons per day (mgd) of Full Advanced Treated (FAT) recycled water in the underlying aquifers for replenishment and later use by other groundwater users. When the Montabello Forebay Spreading Grounds are unavailable for recycled water recharge or do not have sufficient capacity to hold local storm water during wet periods, the recycled water produced at the GRIP Advanced Water Treatment Facility would be directed to three proposed supplemental recharge wells located at the AWTF site. 	between the Jamul Tribe and San Diego Gaming Ventures, LLC, which would allow SDGV to manage the approved 203,000 sf tribal gaming facility to be located on the Tribe's existing reservation.		
2012011010	Santa Clarita Valley Sanitation District Chloride Compliance Supplemental EIR for Brine Concentration and Limited Trucking Los Angeles County Sanitation District Santa Clarita--Los Angeles The proposed modification to the approved chloride compliance project is to replace brine management by deep well injection with the addition of enhanced brine concentration equipment at the VWRP and limited trucking of concentrated brine (an average of 6 truckloads per day, 10 maximum) to an existing industrial facility.	FIN	
2016031034	Monterey Bay Charter School New School Project California State University Trustees Seaside--Monterey The Monterey Bay Charter School (MBCS) is proposing the construction of a K-8 public charter school on the CSUMB campus. The proposed project would involve the construction of approx. 60,000 sq. ft. of classrooms and associated facilities on an approx. 18-acre site on the southern boundary of the campus. The proposed project would be a ground lease- based, public-public partnership and the MBCS would be responsible for constructing, maintaining and operating the school.	MND	04/12/2016
2016031035	Marriott Residence Inn - Planed Development 15-005, Conditional Use Permit 15-020, and Oak Tree Removal Permit 16-002 Paso Robles, City of Paso Robles--San Luis Obispo To establish a 4-story extended stay hotel, with 119 guest rooms, 98,400 sq. ft. and 132 parking spaces. Project proposes to exceed the zoning height limit by 4 feet.	MND	04/12/2016
2016031037	Fernald Point Lane Bridge Replacement Santa Barbara County --Santa Barbara The project consists of replacing the existing Fernald Point Lane Bridge with a new bridge at the same location. The new bridge would provide the same number of travel lanes (two), but would be approx. 4 feet narrower (approx. 23 feet wide). The Romero Creek channel walls would be re-constructed upstream of the bridge, and new wing-walls constructed in the channel at all four corners of the bridge. The project also includes the construction of a new storm drain system southeast of the new bridge. Fish passage improvements have been incorporated into the project and include a low flow channel in the concrete channel bottom under the bridge, a series of two fish resting pools and a notched rock weir immediately upstream of the pipeline encasement across Romero Creek.	MND	04/12/2016
2016031039	Otay River Restoration Project Habitat Mitigation and Monitoring Plan Chula Vista, City of Chula Vista--San Diego The project involves implementation of the Otay River Restoration Project HMMP to restore over 100 acres of hydrologic and sediment transport processes and native habitats in the Otay River Valley on a roughly 300-acre parcel. The project includes establishment, re-establishment, and rehabilitation of roughly 2.74 acres of upstream habitat; 63.31 acres of onsite habitat; 10.88 acres of primary channel habitat; 4.09 of secondary habitat; 53.75 acres of terraces; 2.36 acres of seasonal	MND	04/12/2016

	ponds; and 31.96 acres of upland habitat. There is also an additional 63.89 acres of upland habitat; enhancement proposed as an optional project component that may be carried out in the future by other entities. It is anticipated the project would begin in the summer/fall 2016. Completion would take approx. 5 years including a 5-year maintenance, monitoring, reporting phase.		
2016031040	IS Application No. 6988 (Bonadelle Neighborhoods) Fresno County --Fresno Allow the use of tertiary-treated recycled water from an existing Wastewater Treatment Facility to irrigate a proposed spray field consisting of 77.96 acres of undeveloped land in the R-1-B (c) (Single Family Residential, 12,500 sq. ft. minimum parcel size; Conditional) and R-1-C (c) (Single Family Residential 9,000 sq. ft. minimum parcel size; Conditional) Zone Districts. Use of tertiary water associated with this application is in addition to its approved use on the golf course and other landscaped areas within the Millerton Specific Plan as permitted by Conditional Use Permit (CUP) No. 2942. The site is located within the Millerton Specific Plan, approx. 3,794 feet west of Auberry Road, 2,250 feet south of Millerton Road and 2.5 miles east of the unincorporated community of Friant (Sup. Dist. 5) APN 300-542-155, 165, 175 & 185).	MND	04/12/2016
2016031041	Pismo Creek Scour Repair Project Caltrans #5 Pismo Beach--San Luis Obispo Project proposes to repair the banks of Pismo Creek and piers of Pismo Creek Bridge (Br No 49-0015K) against erosion and scour. The bridge is a part of the southbound on-ramp to US 101 (PM 16.4) from Price St. in Pismo Beach. Construction work is within the existing right of way.	MND	04/12/2016
2016032032	Tree Permit for a New PEdestrian Bridge, County File #TP14-0013 Contra Costa County --Contra Costa The applicant is requesting approval of a tree permit to work within the driplines of 10 code-protected oak trees (ranging in diameter from 14.5 inches to 38 inches along the bank of the Green Valley Creek. This request for the purpose of constructing a 57-foot long 5-foot wide pedestrian bridge across a creek that bisects the subject property to provide access from the front yard to the main residence. The proposal will include grading of a portion of the front yard, the addition of 20 cubic yards of fill, and installation of associated erosion control measures.	MND	04/12/2016
2016032034	Use Permit 15-003 and Zone Amendment 15-002 (Willis/Herrera) Shasta County --Shasta Note: Review Per Lead The project is a use permit for the development of a single-story 9,100 sq. ft. retail building in a Mixed Use (MU) zone district and a rezoning to reconcile a zone district/General Plan map inconsistency. The project would include the retail building, parking area, landscaping, and storm water detention basin. Water service would be provided subject to a proposed annexation of the property to County Service Area #13 (Alpine Meadows). Sewage disposal would be provided by a proposed on-site septic system. Site development activities would include demolitions of an existing restaurant building and associated improvements;	MND	04/18/2016

	grading for the building pad, parking area, landscaping beds and detention basin; construction of water lines for the building.		
2016032035	Star Concrete Batch Plant Project Redwood City, Port of Redwood City--San Mateo Star Concrete proposes to construct batch plant that would produce approx. 1,600 tons of concrete/day with a maximum daily capacity of 2,000 tons/day. The proposed facility would include the following structures: raw material delivery pit, radial stacker, conveyors, aggregate hoppers, batch plant control building, and the actual batch plant. The batch plant would be the tallest proposed structure at approx. 70 feet tall. Other facilities to be constructed include storage silos for slag, cement, and fly ash; two 15,000-gallon tanks for processing water; clarifier for water re-use; approx. 19 standard automobile parking spaces; and approx. 10 parking spaces for mixer trucks. Access to the project site would be provided via an existing driveway on Frontage Road.	MND	04/12/2016
2016032037	Stony Village North Project Santa Rosa, City of Santa Rosa--Sonoma The Stony Village project site is a 5 +/- acre parcel located on the west side of Stony Point Road in southwest Santa Rosa. The undeveloped parcel is generally flat, has no trees, little vegetation and surrounded by properties developed with single-family homes and limited commercial uses. The project includes a Rezoning of the property from the R-3-18 (Multi-Family Residential) zoning district to the R-1-6 (Single-family Residential) zoning district; a CUP to allow for development of a small lot residential subdivision; and a Tentative Map to create 43 individual parcels each to be developed with two-story homes. Four of the lots would also offer second dwelling units. The Project is consistent with the General Plan land use designation of Medium Low Density Residential (8-13 units/acre).	MND	04/12/2016
2016032038	Santa Cruz Wharf Master Plan Santa Cruz, City of --Santa Cruz Project consists of adoption and implementation of the Wharf Master Plan and construction of two projects recommended in the Master Plan within the next two years. The two proposed near-term projects are relocation of the Wharf entry gate and construction of the East Promenade for pedestrian use. The Wharf Master Plan includes: policies; recommendations for expansion of the wharf for public access and construction of improvements and three new buildings; structural wharf improvements; circulation and parking improvements; and design standards for new buildings.	MND	04/12/2016
2016032039	Greyhawk III (PLN15-00154) Placer County --Placer The project proposes a Rezone, vesting Tentative Subdivision Map, and a CUP to construct a 72-unit residential development on a 20.55-acre site (approx. 17.5 net acres) at the northeast corner of Sierra College Blvd. and Eureka Road in Granite Bay. The project site, consisting of two parcels, is currently vacant. The project would include detached, single-family residences on the eastern portion of the site and attached residential "halfplex" units on the western portion. Access to the site will be from private roads accessed from a gated entryway off Eureka Road. The project would also provide secondary emergency access point from Sierra College	MND	04/12/2016

	Blvd. at the western edge of the project site. This secondary emergency access point would be gated and for the exclusive use of emergency vehicles.		
2016031032	Planada Community Plan Update Merced County --Merced The proposed project will serve as the long-range vision and land use strategy plan for guiding development within the unincorporated Community of Planada in Merced County. The CPU retains many of the land use designations and policies of the adopted 2003 Planada Community Plan. The primary change to land use would be to redesignate 15.6 acres of Medium Density Residential to Low Density Residential. In addition to land use, the Community Plan Update addresses circulation, open space and conservation, noise, and public services. In addition, a Community Character and Design Guidelines chapter is included. The proposed Community Plan Update does not include any specific development projects.	NOP	04/12/2016
2016031036	Indian Street Commerce Center Project Moreno Valley, City of Moreno Valley--Riverside The project proposes approx. 446,350 sq. ft. of light industrial uses within an approx. 19.64-acre site. As currently proposed, 357,080 sq. ft., or approx. 80 percent of the Project building area would be allocated for distribution warehouse uses; the remaining 89,270 sq. ft., or approx. 20 percent of the Project building area would be assigned to manufacturing uses.	NOP	04/12/2016
2016031038	Doheny Ocean Desalination Project South Coast Water District Dana Point--Orange The South Coast Water District proposes to develop an ocean water desalination facility in Dana Point, CA, at Doheny State Beach. The proposed desalination facility would produce up to 15 MGD of potable water, with an initial demonstration phase of 4 to 5 MGD. The major components of the project includes subsurface slant well intake system, desalination facility, product water distribution, ocean water concentrate disposal, and electrical energy service. The desalination facility would be sited on existing South Coast Water District property and the subsurface intake wells would be located at Doheny State Beach. Both the initial 4 to 5 MGD and ultimate 15 MGD capacities would be available to the District and local water agencies to provide high quality, locally-controlled, drought-proof potable drinking water supply.	NOP	04/12/2016
2016032036	Great America Theme Park Master Plan Project Santa Clara, City of Santa Clara--Santa Clara Rezoning the 112-acre California's Great America Theme Park site from CT (Thoroughfare Commercial) to PD (Planned Development) for a Park Master Plan project that would continue to allow existing attractions and operating practices and would provide flexibility to allow the installation of new rides and replacement of rides and attractions, extension of the operating season, modified operating practices, and additional hours of operation of the Great America theme park and amphitheater. 	the physical environment.		
2013051022	Orange County Feeder Blow-Off Structure Rehabilitation Project Metropolitan Water District of Southern California --Orange Metropolitan prepared an EIR for a project that includes replacing valves and all corroded piping within the existing structure, and re-establishes vehicular access to the blow-off structure to allow for these repairs as well as ongoing long-term operations and maintenance. The access road will be reinforced where it intersects a storm water drainage immediately west of the blow-off discharge outlet will be upgraded to comply with current CA Department of Public Health regulations for prevention of cross connection.	NOD	
2014091018	Sunnyside Estate Project EIR San Benito County Hollister--San Benito The project includes a Zone Change and Major Subdivision to subdivide and allow for the development of 200 single-family residential units, as well as on- and off-site improvements necessary to serve the residential uses. Lots would range in size between approximately 5,000 sf to approximately 13,824 sf. The proposed zoning designation would be Single-Family Residential. The project would provide 5.3 acres of parks and open space, including 0.4 acre retention/detention basin, 2.0 acre in flood plain, and 2.9 acre park. The proposed project would provide improvements, infrastructure and facilities for wet and dry utilities, and construction of an on-site retention/detention basin to manage stormwater.	NOD	
2014101070	Slover Avenue Distribution Center Fontana, City of Fontana--San Bernardino The project consists of specific plan amendment (SPA 14-003) and Design Review (DRP 14-020). SPA 14-003 amends the Fontana Gateway Specific Plan to: 1) change the specific plan's parking requirement for warehouses; and 2) allow loading facilities (roll-up doors, dock high doors) to face Slover Ave when certain conditions are met. DRP 14-020 provides a development plan for 671,324 sf, high cube warehouse building, including a detailed land use plan, architectural plans, and landscape design. On February 23, 2016, the City determined to carry out the project by approving DRP 14-020. On March 8, 2016, the City undertook second reading of Ordinance No. 1742. No changed circumstances have occurred within the meaning of CEQA Guideline Section 15162 between the first reading and second reading of Ordinance No. 1742.	NOD	
2015021074	Downtown Hawthorne Specific Plan Hawthorne, City of Hawthorne--Los Angeles The Downtown Hawthorne Specific Plan (DHSP) area totals approximately 786 acres or 1.23 sf. The DHSP designates five land use areas (residential, commercial, hospitality, mixed-use and public/quasi public) and four opportunity sites known as Transformative Projects. The four Transformative Projects (Hawthorne Mall, Civic Center, South Bay Ford, and St. Joseph's Plaza) in the DHSP are sites identified for new and catalytic development and investment. The Transformative Projects are intended to embody bold ideas and further support the Specific Plan's vision and objectives, which include: 1) provide a clear vision and flexible strategies framework that will help spur the future evolution of Downtown Hawthorne; 2) ensure an economically vibrant, safe, healthy and sustainable	NOD

2016038184	Inyo Mono Safety Enhancements Caltrans #9 --Inyo, Mono The project will add rumble strips along the highway and place traffic advisory signs to increase driver safety within Inyo and Mono County, California; all work will be conducted within the existing ROW and no resources will be distributed.	NOE	
2016038185	The Butano Creek Floodplain Restoration Project San Mateo County --San Mateo The San Mateo County Resource Conservation District (RCD), in collaboration with Peninsula Open Space Trust (POST), is proposing to reconnect Butano Creek to its historical floodplain located at the Butano Farms property in Pescadero, California. The Butano Creek Floodplain Restoration Project (project) would include restoration actions at five treatment sites along Butano Creek where the channel has been disconnected from the floodplain due to channel simplification (i.e., the removal of large wood) and incision. Restoration activities would include installation of logs and rootwads, a rock ramp, floodplain connector channels, and recruitment of living bank side alder trees to engineered specifications. The goal of the project is to restore natural function to the creek, reduce further incision of the creek bed and erosion of its banks, and raise the elevation of the creek bed to reconnect the creek with its former floodplain, restore the floodplain's ability to store sediment, address water quality mpariment for sediment, and result in improved habitat conditions for several rare and endangered species, including steelhead trout (<i>Oncorhynchus mykiss</i>), California red-legged frog (<i>Rana draytonii</i>) and San Francisco garter snake (<i>Thamnophis sirtalis tetrataenia</i>). Additionally, the project would improve conditions along Pescadero Creek Road, where sediment build-up in Butano Creek results in frequent flooding and is a public safety hazard to vehicles on Pescadero Creek Road.	NOE	
2016038186	Tideland Use and Occupany Permit to VMT Auto Sales for Operation of a Used Automobile Dealership San Diego Unified Port District San Diego--San Diego The proposed project is a Tideland Use and Occupancy Permit (TUOP) to VMT Auto Sales Inc, (Tenant) for use of approximately 9,353 square feet of tideland area located in the city of San Diego, California. The area proposed for use under this TUOP will be used only and exclusively for the purpose of the operation of a used automobile dealership including an office trailer and for no other purpose whatsoever without written consent of the Executive Director of District in each instance. The tenant will be responsible for compliance with all laws and regulations associated with the activities on or in connection with the above-described premises, and in all uses thereof, including those regulating storm water and hazardous materials. No new development, construction, or increase in the size of the Tenant's leasehold or the TUOP area is proposed or authorized as part of this TUOP. The site is currently and is proposed to be used exclusively for the purpose of the operation of a used automobile dealership including an office. The TUOP is anticipated to commence on December 1, 2015, and terminate on November 30, 2018, for a total term of three years. The TUOP may be terminated	NOE

	by the Executive Director of District or his duly authorized representative, or Tenant, as a matter of right and without cause at any time upon the giving of fifteen days' notice in writing to the other party of such termination.		
2016038187	Tideland Use and Occupancy Permit to Point Loma Marina, LLC for Public Art San Diego Unified Port District San Diego--San Diego The proposed project is a tideland use and occupancy permit (TUOP) to Point Loma Marina (Tenant) for their use of approximately 4,158 square feet of tideland area located in the southwest corner of North Harbor Drive and America's Cup Way in the City of San Diego. The area proposed for use under this TUOP would be used only and exclusively for the purpose of installation and maintenance of artwork and associated signals, landscaping, and utilities provided; however, that no activities or improvements shall interfere with the use and enjoyment of the premises by the general public.	NOE	
2016038188	Tideland Use and Occupancy Permit to O'Neil Wetsuits, LLC for Warehouse San Diego Unified Port District San Diego--San Diego The proposed project is a Tideland Use and Occupancy Permit (TUOP) to O'Neil Wetsuits, LLC (Tenant) for their continued use of approximately 43,930 square feet of warehouse space (Premises) and use of non-exclusive common areas located within an industry center commonly as the National Distribution Center (NDC) in the City of National City. The warehouse space area proposed for use under this TUOP would be used only and exclusively for the purpose of general storage, distribution, waterhouse, repair of wet suits and related products, and other such standard operations as may be directly related to the foregoing and for no other purpose whatsoever without the prior written consent of the Executive Director of the District in each instance.	NOE	
2016038189	Lease to Harvest Meat at the National Distribution Center San Diego Unified Port District National City--San Diego The proposed project is a renewal of a lease (Lease) to Harvest Meat Company Inc, (Harvest Meat) for approximately 97,084 square feet of building area located within an industrial center commonly known as the National Distribution Center in the City of National City. Harvest Meat currently has a lease with the District that consists of 69,801 square feet (sf) of warehouse space used for general storage and distribution of meat, poultry, produce, frozen foods, and for supply and food service distribution, as well as other standard operations and 10,993 sf building used for corporate office at the industrial center located at the National Distribution Center.	NOE	
2016038190	Future Yucaipa High School Expansion Property Acquisition Yucaipa-Calimesa Unified School District --Riverside The Yucaipa-Calimesa JOint Unified School District ("District") will acquire an approximate 4.22-acre parcel of real property located at 33002, 33076, and 33092 Yucaipa Boulevard, in the City of Yucaipa, California, identified as San Bernardino County Assessor Parcel No. 0303-071-28-0000 "Property"). The District intends to acquire the site for the future expansion of the existing Yucaipa High School. The District does not yet have specific information or plans as to the type of expansion that will be undertaken on the Property, or the full extent of any future improvements or uses.	NOE

	sustainability. SGMA also established a process for local agencies to request that DWR revise the boundaries of a groundwater basin on either a scientific or jurisdictional basis.		
2016038202	Three Rivers Well Recovery (Extension of Streambed Alteration Agreement No. 1600-2009-0181-R4) Fish & Wildlife #4 --Tulare The original project includes sediment removal from a side channel of the Kaweah River, which supplies water to several river wells. The extension to the Agreement authorizes the activity through December 1, 2019.	NOE	
2016038203	A Modified Full Solid Waste Facility Permit for Borrego Landfill Facility No. 37-AA-0006 Resources Recycling and Recovery, Department of --San Diego The proposed modified permit will decrease the permitted disposal area from 29 acres to 19 acres, design capacity from 727,000 cubic yards to 476,098 cubic yards, and change the estimated closure date from 2030 to 2046. Based on the low disposal rate and recent aerial survey the estimated site life will change to 2046; however, this is primarily dependent on the rate of tonnage intake. There will be no changes to the days/hours of operation or permitted tonnage.	NOE	
2016038204	Pike Ranch Mutual Water Company Uranium/Coliform MCL State Water Resources Control Board --Madera The State Water Resources Control Board (SWRCB) is the Lead Agency. The SWRCB's Safe Drinking Water State Revolving fund (SDWSRF) Program is providing funds for this project. The purpose of the project is to provide good, safe drinking water by conducting a Planning Study to evaluate the feasibility of alternatives to address elevated levels of Uranium that exceed the Maximum Contaminant Levels (MCL's), failing distribution lines, and Coliform contamination. Evaluated alternatives include consolidation, treatment, source replacement and/or a combination of any of the three.	NOE	
2016038205	Wireless Telecommunications Facilities on Parking Garage Adjacent to Hilton San Deigo Bayfront San Diego Unified Port District San Diego--San Diego The proposed project is the installation of up to three wireless telecommunications facilities on the top floor of the public parking garage adjacent to the Hilton San Diego Bayfront in the City of San Diego. Currently, one temporary wireless telecommunications facility is operated by New Cingular Wireless PCS, LLC dba AT&T Mobility ("AT&T") and occupies approximately 863 square feet on the top floor of the parking garage under an existing Tideland Use and Occupancy Permit (TUOP). The project is proposed to replace the existing temporary wireless telecommunications facility and would also allow for the placement of facilities for up to two additional carriers (e.g., Sprint, Verizon, T-Mobile), for a total of up to three carriers. However, the only specific carrier proposing to construct a wireless telecommunications facility at this time is AT&T.	NOE

2016038216	Loma Vista Community Perimeter Shaded Fuel Break Forestry and Fire Protection, Department of --Napa The purpose of this shaded fuel break project is to reduce the volume of fuels on the periphery of residences in the Loma Vista neighborhood, located at the lower stretch of Soda Canyon Rd., north of Napa, CA. The reduction in ladder fuels and brush continuity in the approximately 100-ft wide fuel break will reduce fire intensity and improve the effectiveness of surface fire containment and air tanker drops in the event of a wildfire. The 3.7 mile project will encircle an unnamed ridge west of Soda Creek spanning both sides of Loma Vista Drive. The western side of the project is located on slopes facing Silverado Trail. The location of the fuel break was selected to connect lands that are already low in fuel volume in order to minimize work and impact. The area surrounding the project is semi-rural, with approximately 35 homes enclosed within the fuel break. Vegetation type is classified as grasslands and vineyards in the majority of the project area. Oak woodlands are located within the project but are largely bypassed. Where the work is located within oak woodlands, the treatment consists of removing lower branches of mature trees. Fewer than 10 trees, all smaller than 6 inches in diameter are expected to be cut. Larger diameter material (larger than 6 inches) will remain as refugia for wildlife. Shrubs within the fuel break area will be cut and either chipped or cut further into small pieces and packed into topographic depressions outside the fuel break. All dead and dying vegetation will be removed.	NOE	
2016038217	Highlands Community Wildfire Risk Reduction Project Forestry and Fire Protection, Department of --San Mateo The project takes place on undeveloped wildland that completely surrounds the Highlands community of San Mateo County; this property is owned and managed as open space by the Highlands Recreation District (HRD). The Highlands is a community of over 800 homes and approximately 2500 residents in unincorporated San Mateo County. The high population in the area combined with an adjacent	NOE

	<p>freeway and arterial roads present ample opportunity for ignitions, and as a result, significant wildfire risk. One of the goals of the proposed project is to mitigate the threat of wildfire to habitable structures by utilizing Cal Fire hand crews to create an approximate 100' shaded fuel break and reduced fuel buffer zone between HRD managed open space and a residential community with very high historical and assessed value. HRD owned open space totals 40 acres directly contiguous to 120 residential properties, and adjacent to nearly 700 additional properties within the district boundaries. The proposed shaded fuel break would provide vegetation treatment and wildfire fuel reduction on approximately 22 acres of oak woodland, chaparral, and grasslands. The treatment will utilize hand crews to remove small diameter, suppressed trees, 50-70% of the brush species and dead/downed woody debris. Cut material will be chipped on-site and/or lopped-and-scattered. Riparian areas and wet areas associated with seeps and springs will be excluded from project activities.</p>		
2016038218	<p>Rancho Navarro & Holmes Ranch Roadway Fuel REduction Forestry and Fire Protection, Department of --Mendocino</p> <p>The project consists of mechanical mastication of understory fuels, brush & small trees, along both sides of primary roadways serving the Rancho Navarro & Holmes Ranch rural subdivisions. Operation will occur within easements controlled by Each Homeowners Association, extending from 30-ft on either side of road centerlines. This project will improve roadways for use as safe evacuation routes through the creation of defensible space. Treated areas may also improve roadways for use as safe evacuation routes through the creation of defensible space. Treated areas may also be used as primary or secondary fire control lines in the event of a major wildlife. The treated area is estimated at approximately 19-acers. Trees greater than the 8-in DBH shall only be removed if they are dead or dying. No heavy equipment ground disturbance will occur as the masticator will operate from roadways. Vegetation treated will be reduced to chips and spread on site.</p>	NOE	
2016038219	<p>Central Dam, No. 31 Water Resources, Department of --Alameda</p> <p>The proposed work consists of drilling two mud rotary wash borings 80 feet in depth in the auxiliary dam.</p>	NOE	
2016038220	<p>Water Right Application 31870, Petitions for Change for Licenses 8607, 9434, 9851B, and 11060B, and a Petition pursuant to Water Code Section 1707 for Statement State Water Resources Control Board --Mendocino</p> <p>The project involves approval of a water right application, petitions for change, and a petition pursuant to Water Code section 1707. Beckstoffer Vineyards XIV proposes: 1) to divert 274 acre-feet of water per year by permit; 2) to modify the place of use, purpose of use, and method of diversion under the licenses; and 3) to dedicate a portion of existing riparian claims to instream use.</p>	NOE
