STATE CLEARINGHOUSE

---

**SUMMARY  
OF  
POSTINGS**

**March 16 – 31, 2015**

# STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **March 16 – 31, 2015**.

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov](http://www.opr.ca.gov)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Director

## CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

### USPS:

State Clearinghouse  
P.O. Box 3044  
Sacramento, CA 95812-3044

OR

### USPS/Courier Service / Hand Deliveries:

State Clearinghouse  
1400 Tenth Street, Room 113  
Sacramento, CA 95814

## INFORMATION AVAILABLE ON-LINE

The CEQA Statute and Guidelines are available through the Natural Resources Agency's website at:

<http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

## Environmental Document Filings with the State Clearinghouse 1999-2014

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at <http://www.ceqanet.ca.gov>

<b><u>Documents Received on Monday, March 16, 2015</u></b>			
2015031053	Perrin/Minnewawa Elementary School Project Clovis Unified School District Clovis--Fresno Clovis Unified is proposing to acquire an approximately 20-acre site for a new elementary school and to construct and operate a school on the site. The school would serve an enrollment of approximately 750 students in kindergarten through sixth grades.	<b>MND</b>	04/14/2015
2015032047	Pinecrest Lake Level Modification Project State Water Resources Control Board --Tuolumne On December 16, 2011, Pacific Gas and Electric Company filed a request with the State Water Resources Control Board to modify the existing Clean Water Act Section 401 water quality certification (certification) condition pertaining to the minimum Pinecrest Lake level. Pinecrest Lake is part of PG&E's Spring Gap-Stanislaus Hydroelectric Project. Pinecrest Lake is located on the South Fork Stanislaus River in Tuolumne County, CA. Prior to making a modification to the certification, the State Water Board must comply with CEQA.	<b>MND</b>	04/14/2015
2015032048	Foresthill Dollar General Store (PLN14-00170) Placer County --Placer The project proposes a Minor Use Permit and Design/Site Review to construct a general merchandise retail store approximately 9,100 sf in size with a new parking surface, landscaping and exterior lighting on a 1.3-acre lot.	<b>MND</b>	04/14/2015
2015032050	DeAngelis Family Apartments Sonoma County --Sonoma Request for a design review with hearing for a new 70-unit apartment complex that qualifies as type "A" affordable housing with 100% density bonus on a 2.74 acre parcel.	<b>MND</b>	04/14/2015
2015032051	Jail Project Trinity County --Trinity The purpose of the project is to construct a new 96-bed jail. The jail would have approximately 25,000 sf of floor space as well as an outdoor exercise area encompassing at least 600 sf. Associated features would include employee and visitor parking, security fencing, dumpster enclosures, a perimeter access road, and landscaping. Offsite improvements would include utility tie-ins, construction of a turn lane on State Highway 3 at its intersection with Tom Bell Road, and construction of an emergency access road.	<b>MND</b>	04/14/2015
2015031054	Hymettus Estates Encinitas, City of Encinitas--San Diego The project consists of a Tentative Map, Coastal Development Permit, and Design Review Permit for a nine-lot density bonus subdivision including construction of nine single-family homes.	<b>NOP</b>	04/14/2015

## CEQA Daily Log

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, March 16, 2015</u></b>			
2015031055	Roberts Ranch Subdivision (TSM 14-90 and ZC 14-180) San Benito County Hollister--San Benito The proposed project includes a 206 detached single-family lot subdivision with a gross density of the 3.87 units per acre and related on- and off-site infrastructure and amenities to serve the proposed residential uses, and requires the approval of major subdivision map and other discretionary approvals from the County including: a general plan amendment, a zone change, and a major subdivision map. The project may also require approvals from other agencies. The project site is approximately 53.29 acres of land located in the unincorporated County southeast of, and adjacent to, the City limits of Hollister; the project site is within the City of Hollister's Sphere of Influence and the City's Urban Service Area.	<b>NOP</b>	04/14/2015
2015032049	PA-1500029 San Joaquin County Stockton--San Joaquin A Minor Subdivision application to subdivide an existing 49.36-acre parcel into two parcels. Parcel 1 is a homesite parcel to contain 2.47 acres. The Designated Remainder parcel is to contain 46.89 acres.	<b>Neg</b>	04/14/2015
2011072039	Newman Ridge Project Amador County Ione--Amador Notes: Response to Comment  The proposed project consists of the following two components: 1) the Newman Ridge Quarry; and 2) the Edwin Center North. The Newman Ridge Quarry is an andesite quarry on approximately 278 acres, with operations occurring on approximately 216 acres. The production level of the Quarry is anticipated to be 5 million tons per year, to be extracted over approximately 50 years, depending on market demand. The Edwin Center North site would host various material processing facilities on approximately 141.37 acres, including an aggregate plant, an asphalt concrete (AC) plant, ready-mix concrete plant, an asphalt and concrete recycling plant, and a rail load out facility for finished products, as well as ancillary administration and support facilities (e.g., fuel storage, truck scales, temporary construction trailer). Mining would not occur within the Edwin Center North, which is geographically separate from the Quarry. The railroad load out facility would be located directly off the existing Union Pacific-Ione Branch rail. The majority of material processed at the Edwin Center would be railed to regional markets, rather than trucked, to the regional market.	<b>Oth</b>	
2003111131	Homeland and Romoland Area Master Drainage Plans and Homeland/Romoland Area Drainage Plan Riverside County Flood Control and Water Conservation --Riverside The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0140-R6 [Revision 2], pursuant to section 1602 of the Fish and Game Code to the project Applicant, Riverside County Flood Control and Water Conservation District. The Romoland MDP Line A, Stage 4 Project is limited to the construction of the Romoland MDP Line A, Stage 4 project, which includes construction of the remainder of Romoland MDP Line A, Lines A-2 and A-3, Homeland MDP Line 1, Juniper Flats Basin, and Briggs Road Basin. The proposed 31,500 linear foot storm water management system will consist of open channels, reinforced concrete boxes, reinforced	<b>NOD</b>

	concrete pipes, and earthen basins.		
2006102053	2935 Telegraph Ave. (File #: ER06-0012) Oakland, City of Oakland--Alameda Minor Revisions to a previously-approved 142-unit mixed use development that involved a Major Design Review and Variances for reduction of required rear yard setback. Proposed revisions will add: 20 additional residential units for a total of 162 units; increase a 2,805 square foot retail space by 1,240 sq. ft. for a total of 4,045 total sq. ft.; a Minor Variance to waive 10 required off-street parking spaces for the retail space.	<b>NOD</b>	
2008071075	State Route 91 Corridor Improvement Project Caltrans #8 Anaheim, Corona, Riverside--Riverside, Orange The proposed action is to authorize the possession and use agreement of approximately 5.89 acres of real property ("Grant Project") within APNs 115-050-030, 115-050-033, 115-060-016, 115-060-026, and 118-270-043 in the city of Corona. The grant of the rights to the subject properties is a subsequent discretionary action to further the 91 Freeway Widening Project where the Riverside County Transportation Commission (RCTC) has been working with the State of California Department of Transportation (Caltrans) acting as lead agency for California Environmental Quality Act purposes. RCTC desires to acquire on behalf of Caltrans and the District agrees to grant to RCTC the right to possess real property by entering into the possession and use agreement to allow RCTC to construct the 91 Freeway Widening Project without delay.	<b>NOD</b>	
2010041109	EA 10-195 - East Shafter Logistical Center Water and Sewer Improvements Shafter, City of Shafter--Kern The State Water Resources Control Board (SWRCB), as the responsible agency, will be issuing a water supply permit. The City of Shafter proposed project included construction of a potable water storage tank, pump station, and distribution pipeline.	<b>NOD</b>	
2011022044	Brighton Landing Specific Plan Vacaville, City of Vacaville--Solano The Operator proposes to upgrade four storm drain outfalls and two culverts as part of a single-family residential neighborhood development on approximately 217-acres. The Project is located at Leisure Town Road and Elmira Road, Vacaville. The California Department of Fish and Wildlife (CDFW) is executing a Lake and Streambed Alteration Agreement Number 1600-2013-0308-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Steve Porath, Brighton Land, LLC.	<b>NOD</b>	
2011091017	Lakeland Village Master Drainage Plan (MDP) Riverside County Flood Control and Water Conservation --Riverside The Riverside County Flood Control and Water Conservation District (District) proposes to implement the Lakeland Village Master Drainage Plan (MDP). Implementation of the MDP consists of three (3) separate components: Administration of the MDP - The MDP will be a guide for the alignment, type, size, and cost of major existing and proposed MDP facilities within the watershed to address the current and future drainage needs of Lakeland Village and the	<b>NOD</b>

	<p>surrounding area.</p> <p>Future construction of the MDP facilities - The MDP identifies the approximate location, size, and type of MDP facilities needed to alleviate and control flooding within the Project boundary.</p> <p>Future operations and maintenance of the MDP facilities - Once a facility is constructed, it will require maintenance in order to retain flood control capacity. It is expected that the District will operate and maintain all the MDP storm drains, channels, and basins.</p>		
2013032032	<p>Yuba River Charter School Nevada County Grass Valley--Nevada</p> <p>The project consists of the Department of Toxic Substances Control's (DTSC) approval of a Final Removal Action Workplan (RAW) to address contaminated soils within the Kenny Ranch Burn Dump site ("the Site") pursuant to the authority granted under Chapter 6.8 of the California Health and Safety Code, Division 20, Sections 25323.1 and 25356.1. The Site was formerly identified in the Nevada County Recorder's Office as Assessor's Parcel Number (APN) 07-111-05 and is now the northern portion of the APN 07-200-09. The RAW was prepared by Holdrege &amp; Kull (September 15, 2014) on behalf of Yuba River Charter School and is incorporated by reference.</p> <p>The objective of the RAW is to mitigate potential risk to human health and the environment by reducing or eliminating future exposure to lead- and arsenic-impacted soils identified during previous investigations. Major elements of the removal action include (1) excavation of approximately 2,200 to 2,860 cubic yards of contaminated soil; (2) hauling contaminated soil to a certified hazardous waste disposal facility, and (3) bringing clean fill material to balance the site for the final grading. This will result in approximately 314 to 408 large trucks trips to and from the site.</p>	<b>NOD</b>	
2013082082	<p>McKinley Avenue Bridge Project Stockton, City of Stockton--San Joaquin</p> <p>The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0401-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, City of Stockton as represented by Ray Deyto.</p> <p>The project is limited to repair of a bridge foundation by excavating the stream channel surrounding the bridge foundations to a maximum depth of 2 feet below the bed of the north Branch of French Camp Slough. The excavated area will be replaced with geofabric and rock slope protection. The bridge deck will also be resurfaced. The wing walls will be repaired. No widening or other alterations of the existing bridge shall occur.</p>	<b>NOD</b>	
2014032064	<p>Use Permit Application No. PLN2014-0023 - Verizon Wireless - E. Hawkeye Ave Stanislaus County Turlock--Stanislaus</p> <p>Request to install a new wireless communication facility consisting of a 110' high stealth monopole with a 204 square foot equipment shelter at its base and nine (9) mounted antennas on a 17.3+/- acre parcel in the A-2-40 an existing structure which is used for agricultural operations.</p>	<b>NOD</b>	

## CEQA Daily Log

Documents Received during the Period: 03/15/2015 - 03/31/2015

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, March 16, 2015</u></b>			
2014061084	Oasis Area Irrigation System Expansion Project Coachella Valley Water District --Riverside The Oasis Area Irrigation System Expansion Project will supply up to 32,000 acre-feet of Colorado River canal water/year that will be utilized for irrigation to replace the current groundwater pumping for irrigation. The Oasis Area lies near the northwest margin of the Salton Sea, south of 66th Avenue, west of Harrison Street and north of 86th Avenue, within the Oasis area of Riverside County. The system improvements include: construction of 18 miles of underground pipelines; 3 reservoirs; 4 pump stations; the installation of water meters within concrete vaults and upgrade of an existing Imperial Irrigation District electrical circuit to provide power to the pump stations.	<b>NOD</b>	
2014062028	Nearby Lagoon Vegetation Management and Sediment Removal Project Santa Cruz, City of Santa Cruz--Santa Cruz The project consists of periodically scheduled and implemented maintenance activities that are necessary to maintain pedestrian access areas, the functional width and depth of primary lagoon channels above the concrete weir and maintenance of the outflow channel upstream of the Nearby Lagoon Pump Station. Maintenance activities include, but are not necessarily limited to the following: activities such as sediment removal or vegetation control to correct conditions that threaten or degrade natural environments (such as non-native plant species control, removal of trash from channels or drainage and erosion repairs, and habitat enhancement). The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2014-0251 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Mark Dettle/City of Santa Cruz Department of Public Works.	<b>NOD</b>	
2014062084	Recycled Water Project Pleasanton, City of Pleasanton--Alameda The purpose of the Proposed Project/Action is to construct and operate a new recycled water system to replace/augment existing irrigation supplies in the City's service area. The development of recycled water service within the City will lessen the demand for Zone 7 Water Agency (Zone 7) potable water supplies and help the City meet the State of California's Water Conservation Act of 2009, which requires a 20 percent reduction in urban per capita water use by the year 2020. Furthermore, the addition of recycled water to the City's water supply portfolio will increase its water system reliability since recycled water is a local supply within the City's control and is drought-resistant. The Addendum assesses the effect of minor changes to the alignment of recycled water facilities in order to achieve design efficiencies. The net effect of the changes is approximately 2.0 miles of new or repurposed pipeline.	<b>NOD</b>	
2014081021	Media Center Office Building Project El Monte, City of El Monte--Los Angeles This document is prepared as an Addendum to a previously adopted Mitigation Negative Declaration for the Media Center Project, SCH No. 2014081021, which was adopted on October 7, 2014 by the El Monte City Planning Commission. The City is proposing to make minor technical revisions to the original approved project and intends to adopt an Addendum to the previously adopted Mitigated Negative Declaration (MND) in order comply with the California Environmental Quality Act	<b>NOD</b>

	(CEQA) for this proposed second tier project modification. The project modifications/changes are summarized in the following text. The formal action(s) that may be taken by the City consists of: eliminate the bridge over Rubio Wash and the connection to Rosemead Boulevard; reorient the loading docks at the warehouse; and provide an emergency access gate for emergency access into Driggs Avenue at the northern boundary of the project site.		
2014102072	State Route 99 Bridge Rail Upgrade, Seismic Retrofit, Widening, and Scour Repair Project Caltrans #3 Elk Grove--Sacramento The California Department of Transportation (Caltrans) proposes to install seismic retrofit catcher/restrainer systems at the expansion joints of the following four bridges: Cosumnes River (24-0020R/L) and Cosumnes River Overflow Bridges (24-0021R/L). On Dillard Road Overcrossing (24-0163) non-standard bridge railings will be replaced on both sides of the bridge, remove asphalt concrete (AC) surfacing, sidewalk/curb, and place polyester concrete deck overlay.	<b>NOD</b>	
2015012065	PA-1400260 San Joaquin County Stockton--San Joaquin A site approval application of Louis and Elvira Rivera (c/o Dillon & Murphy) for agricultural truck parking for 1 truck and 2 trailers to include the use of an existing 1,750 square foot building for maintenance. This parcel is not under a Williamson Act contract. The Property is zoned AU (Agriculture-Urban Reserve, 20-acre minimum) and the General PI designation is R/L (Low Density Residential). The project site is located on the west side of Snyder Lane 1,475 feet south of State Route 88, east of Stockton. (APN/ADDRESS: 101-022-27/2703 Snyder Lane, Stockton) (Supervisory District 4).	<b>NOD</b>	
2015022006	PA-1500002 San Joaquin County Stockton--San Joaquin A Minor Subdivision application of Community Partnership for Revitalization (c/o Michael Farley) to subdivide an existing 40,827 square foot parcel into two parcels. Parcel One to contain 24,316 square feet and Parcel Two to contain 16,511 square feet. These parcels are not under a Williamson Act contract. The Property is zoned R-L (Low Density Residential) and the General Plan designation is R/L (Low Density Residential). The project site is located on the east side of N. Lillian Avenue, 260 feet north of Miner Avenue, Stockton. (APN/Address: 143-360-15/444 N. Lillian Avenue, Stockton) (Supervisory District 2).	<b>NOD</b>	
2015039010	Lake or Streambed Alteration Agreement No. 1600-2014-0249-R1 "Ammirati" THP Forestry and Fire Protection, Department of --Shasta The project is limited to 7 encroachments including the installation of five permanent crossings and two temporary crossings, as identified and described in the 1611 Addendum on page 28 of the Timber Harvesting Plan.	<b>NOD</b>	
2015039011	Lake or Streambed Alteration Agreement No. 1600-2014-0333-R1 "Sternberg" THP Forestry and Fire Protection, Department of --Modoc The project is limited to 5 encroachments including maintenance of existing crossings, extension of one crossing, removal of CMP and channel re-alignment.	<b>NOD</b>

	buildings, and Foster City residents and visitors.		
2005092044	Rancho Cordova Parkway Interchange Project Rancho Cordova, City of Rancho Cordova--Sacramento The proposed project would construct a new interchange over U.S. 50 between Sunrise Boulevard and Hazel Avenue in the City of Rancho Cordova, Sacramento County, California. The interchange would be a "south-only" connection and would also include construction of a new four-lane arterial street, called Rancho Cordova Parkway. Rancho Cordova Parkway would extend from the new interchange south to a new signalized intersection with White Rock Road. The project is located partially within the city and partially in unincorporated Sacramento County. The project would construct auxiliary lanes along U.S. 50 in the area between Sunrise Boulevard and Hazel Avenue.	<b>NOD</b>	
2006071134	East Area 1 Specific Plan Amendment Santa Paula, City of Santa Paula--Ventura The Project includes amendments to the East Area 1 Specific Plan, consisting of refinements to the land use plan; an amended and restated Development Agreement; and a Master Vesting Tentative Map ("MVTM") to subdivide the Project Site. The Project implements the City's General Plan. The Project includes 501 acres that would provide for up to: (1) 1,500 residential dwelling units, (2) 240,000 square feet of commercial and light industrial uses, (3) 9.2 acres of civic uses for school facilities, and 225.3 acres of open space and park uses on the 501 acre site. Ordinance No. 1255 approving this project was introduced for first reading on February 17, 2015. The second reading and adoption occurred on March 16, 2015.	<b>NOD</b>	
2014081023	Deer Creek Rock Surface Mining Permit and Reclamation Plan (PMR 14-002) Tulare County Porterville--Tulare Final Environmental Impact Report, Mitigation Monitoring and Reporting Program, and Surface Mining Permit and Reclamation Plan, to amend an existing 98 acre surface mining operation to increase annual production from 500,000, to a maximum 950,000 tons per year, as permitted by PMR 01-001, PMR 09-002, and PSP 01-055 (ZA). The requested permit amendments will make PMR 01-001, PMR 09-002, and PSP 01-055 (ZA) consistent, and allow for heavy-duty truck hauling not to exceed 376 round-trips per day, with no lateral expansion of the existing approved mine footprint. The estimated total production is still 40,000,000 tons of rock material over an estimated 50-years of operation. The disturbed area is proposed to be reclaimed for grazing. The mined material will be transported by truck to the Deer Creek Rock Company site, an existing permitted rock plant adjacent to the Project site. Result in no increase in the maximum depth of the mine as expansion will occur laterally.	<b>NOD</b>	
2014122001	Housing Element Update 2015-2022 Woodside, City of Woodside--San Mateo Housing Element Update: (a) Provide public information regarding housing opportunities; (b) Encourage resident participation in County housing programs; (c) Conserve and rehabilitate affordable housing units; (d) Accommodate housing for special needs groups, such as disabled residents and the homeless; (e) Assure consistency with State requirements; (f) Coordinate Town housing	<b>NOD</b>

2008052133	San Francisco Westside Recycled Water Project San Francisco, City and County of San Francisco--San Francisco The San Francisco Public Utilities Commission is proposing the San Francisco Westside Recycled Water Project. The primary purpose of the project is to reduce the City and County of San Francisco's reliance on potable water for nonpotable uses, such as irrigation, through the production and distribution of highly treated recycled water. The project would have an operational capacity to serve peak-day demands of up to 5 mgd (or 2 mgd annual average) to meet the current water demand in areas of western San Francisco that have substantial irrigation needs, including Golden Gate Park, Lincoln Park/Lincoln Park Golf Course, The Presidio Golf Course, and other irrigated areas within the Presidio. In addition to capacity to serve these areas, the proposed project would have enough capacity to serve potential future customers, such as the San Francisco Zoo. The project includes construction of a recycled water treatment plant and underground storage as well as construction of and/or upgrades to distribution facilities (pipelines and pumping facilities) for service to existing customers.	<b>EIR</b>	05/01/2015
2014052038	North Sacramento Streams, Sacramento River East Levee, and Related Flood Improvements Project Sacramento Area Flood Control Agency Sacramento--Sacramento, Yolo, Sutter, Solano SAFCA is proposing to implement flood system improvements to reduce flood risk along the Sacramento River, American River, Natomas East Main Drainage Canal,	<b>EIR</b>	05/01/2015

	and Arcade Creek. SAFCA, in response to the U.S. Army Corps of Engineers withdrawing its levee accreditation for the levee systems which include the American River north and south levees, the NEMDC east levee, the Arcade Creek north and south levees downstream of Marysville Boulevard, the Sacramento River east levee from the mouth of the American River to Freeport, and the Beach Lake levee, is evaluating actions that would be needed to re-accredit these levee systems. SAFCA has divided the project into three categories of components.		
2014062011	Tahoe Valley Area Plan South Lake Tahoe, City of South Lake Tahoe--El Dorado The Tahoe Valley Area Plan is being prepared by the City of South Lake Tahoe pursuant to Chapter 13 of the Tahoe Regional Planning Agency (TRPA) Code of Ordinances, which allows local governments to adopt conforming Area Plans that contain policies and development ordinances that are consistent with and further the goals and policies of the TRPA Regional Plan. The Area Plan also implements the City's General Plan. The Area Plan defines a vision for the future intended to improve mixed-use development opportunities, concentrate development in and around the Town Center, improve pedestrian, bicycle and transit circulation, and provide housing in close proximity to commercial activities, amenities, and recreation.	<b>MND</b>	04/16/2015
2015031062	ENV-2014-3113-MND / 518 E. Broadway Los Angeles, City of --Los Angeles Preliminary Parcel Map for a 2-unit condominium building on one lot, and a Coastal Development Permit in the Venice Coastal Zone.	<b>MND</b>	04/16/2015
2015031063	ENV-2014-3333-MND / 612 N. Belmont Avenue Los Angeles, City of --Los Angeles A Preliminary Parcel Map for five single family lots, with 10 parking spaces, under the Small Lot Ordinance. The project site is 0.23 acres in the RD2-1VL-CDO zone. The project is also filing a Director's Determination, DIR-2014-3761-CDO.	<b>MND</b>	04/16/2015
2015031064	207 Seaside Way Project Long Beach, City of Long Beach--Los Angeles The proposed project would consist of a 113-unit multi-family apartment complex on the 0.67 acre site. The project would include a single structure that would consist of eight levels (one subterranean level and seven aboveground levels). The bottom three levels would consist of parking, and provide 144 on-site parking spaces. The apartment structure would reach a maximum height of 85 feet above the East Seaside Way grade. The apartment units would include a mixture of studios, and one- and two-bedroom configurations. Additional amenities include a cafe, fitness center, retail space, and a lobby. The roof would primarily consist of mechanical platforms.	<b>MND</b>	04/16/2015
2015031065	442 West Ocean Boulevard Project Long Beach, City of Long Beach--Los Angeles The proposed project would consist of a 95-unit multi-family apartment complex on the approximately 24,000 sf site. The project would include a single structure that would consist of nine levels (one subterranean level and eight aboveground levels). The bottom three levels would consist of parking, and provide 153 on-site	<b>MND</b>	04/16/2015

	parking spaces. The apartment structure would reach a maximum height of 85 feet above West Seaside Way grade. The apartment units would include a mixture of studios, and one-, and two-, and three-bedroom configurations. Additional amenities include lobby space, a fitness center, and a roof deck.		
2015032056	Corralitos Creek Diversion Bank Repair Project Watsonville, City of Watsonville--Santa Cruz Repair eroded system bank on Corralitos Creek near the City Water Dept surface water diversion. The bank will repair and stabilized with 40-cy or 3-ton rock slope protection.	<b>MND</b>	04/16/2015
2015032060	Twitchell Island Habitat Enhancement Project Reclamation District 1601 Isleton--Sacramento The goal of the Twitchell Habitat Enhancement Project is to expand and diversify the habitats on Twitchell Island. The specific objectives of this project are to design, plant, monitor, and maintain two new habitat enhancement sites (28 total acres), and replant three existing habitat mitigation sites (16.5 total acres) on Twitchell Island. The project sites will be monitored for five years after planting to ensure habitat establishment.	<b>MND</b>	04/16/2015
2015032068	Butte 191 Realignment Caltrans #3 Paradise--Butte Caltrans has prepared two alternatives that provide improvements to the roadway to address the observed collision patterns. Both alternatives will improve the roadway alignment by modifying horizontal curves and vertical profile on SR 191 in Butte County. They will each help to prevent motorists from driving off of the road, provide a wider recovery area for errant vehicles and improve sight distance. By policy, roadway improvements to this degree require the roadway to be improved to current mandatory design standards by straightening out curves, widening the shoulders to 8 feet and correcting the vertical profile to stay under a 7% grade.	<b>MND</b>	04/20/2015
2015031066	Conditional Use Permit No. 03721/Desert Quartzize Solar Project Riverside County Blythe--Riverside The proposed project consists of construction and operation of a 300 megawatt (MW) solar photovoltaic (PV) electrical generating facility and associated infrastructure on a total of ~5,003 acres of public and private land (4,843 acres of BLM-managed public land, and 160 acres of private land). The facility would include a solar array field utilizing single axis solar PV and fixed-tilt arrays, a system of interior collection power lines located between inverters and substations, one on-site substation (~6.5 acres), one operations and maintenance (O&M) building, two primary off-site access roads and several interior access roads, and 2.8 miles of 230 kilovolt (kV) double circuit transmission line between the solar field and Colorado River Substation.	<b>NOP</b>	04/16/2015
2015032057	Urban Forest Master Plan Palo Alto, City of Palo Alto--Santa Clara The City of Palo Alto is proposing to adopt and implement its Urban Forest Master Plan (UFMP). The UFMP is intended to provide a vision for the City's urban forest, and guide future activities relating to the urban forest over its 10-year horizon. The UFMP establishes the value of the City's urban forest, documents baseline	<b>Neg</b>	04/16/2015

	<p>conditions for future monitoring, identifies community concerns and opinions relating to the urban forest, outline key challenges and potential conflicts facing the urban forest, and provides an action plan for the future. The action plan establishes goals, policies, and programs to guide the Urban Forestry Division of the City to achieve its vision for the urban forest - maintaining the health and sustainability of the urban forest, minimizing conflicts with infrastructure and development, and increasing climate adaptability.</p>		
2015032059	<p>Leisure Lane Storm Drain Improvements Project Sacramento, City of Sacramento--Sacramento</p> <p>Construction of new approximately 10 ft x 30 ft outlet weir box north of CA-Hwy 160 between the City's existing 8 inch waterline and 12 inch sewer line in the City's Basin. To build the new outlet weir box, the existing 3 ft by 4 ft box culvert, the 60 inch diameter pipe, and the 34 inch diameter pipe will be extended. The outlet weir box will have a 12 inch diameter pipe at grade that will allow all collected storm water to eventually drain out of the Basin over several days. South of CA-Hwy 160, a transition manhole will be constructed wherein the flow shape will change from rectangular to round, followed by placement of approximately 145 ft of either 54 inch diameter Reinforced Concrete Pipe (RCP) or 60 inch diameter plastic pipe buried at-grade within the existing ditch. The buried pipe will terminate with a standard flared end section, with concrete cobbled rip-rap.</p>	<b>Neg</b>	04/16/2015
2003021141	<p>General Plan Amendment/Zone Change (PA 01-114) (aka: The Ranch Plan) Orange County --Orange</p> <p>The Master Area Plan land use for Planning Areas 3 and 4 provided for residential, Urban Activity Center (UAC), Neighborhood Center and Business Park uses as well as public facilities, public parklands, and open space. The Master Area Plan for Planning Areas 3 and 4 (PA140072) identifies eight subareas in Planning Area 3 (PA140073-PA140080) and one subarea in Planning Area 4 (PA140081). In addition, key required infrastructure has been addressed including the construction of Cow Camp Road, Segment 2 and "K" Street (ST140018 and ST140019). Within the 3,313-gross acres contained within the two planning areas, 2,686 gross acres are proposed for development with 7,500 dwelling units, 201 gross acres of UAC uses, and 19 acres of Neighborhood Center; and 50 acres of Business Park uses. The remaining 627 acres of the planning areas would be in permanent open space. It is staff's determination that none of the triggers that require a new environmental document exist.</p>	<b>NOD</b>

	Business Park uses. The remaining 627 acres of the planning areas would be in permanent open space. It is staff's determination that none of the triggers that require a new environmental document exist.		
2009061035	Consideration of District Alternative Treatment Technology for the WRF: Membrane Bioreactor in place of Approved Oxidation Ditch Technology Hi-Desert Water District Yucca Valley--San Bernardino The Project will be constructed in three phases, 1 through 3. The District will construct Phase 1 of the Project, which includes installation of a sewer collection system, a wastewater treatment facility (WWTF), and water reclamation recharge ponds. Approximately 77 miles of sewer pipeline will be constructed in the central portion of the Town of Yucca Valley to convey an annual average flow of one million gallons per day of wastewater to the proposed WWTF. This phase of the project will provide the core infrastructure for expansion of the collection, treatment, and disposal system needed for future Phases 2 and 3.	<b>NOD</b>	
2011081080	Stateline Solar Farm Project San Bernardino County --San Bernardino The Project includes construction, operation, maintenance, and decommissioning of a 300-megawatt alternating current solar photovoltaic energy generation plant, interconnection transmission line, operation and maintenance (O&M) facilities, wells, waterlines, and site access roads. Project activities include mowing, disk and rolling, grading, vegetation removal, trench digging, pile driving road construction, compacting soil, and other activities.  The Project will result in permanent impacts to 1,575 acres of desert tortoise ( <i>Gopherus agassizii</i> ) habitat resulting in incidental take of individuals of this species, which is designated as a threatened species under the California Endangered Species Act (CESA). This Incidental Take Permit Amendment No. 1 reduces the acreage the project impacts, reduces the required Habitat Management (HM) Lands, reduces the cost estimate for HM Lands, extends the timeline to acquire HM Lands, and incorporates a Memorandum of Understanding (May 12, 2014) authorizing biologist to handle covered species.	<b>NOD</b>	
2013112019	Jennings Avenue Pedestrian and Bicycle Rail Crossing Santa Rosa, City of Santa Rosa--Sonoma Construction and operation of a new ADA complaint at-grade pedestrian and bicycle rail crossing at Jennings Avenue and the Sonoma Marin Area Rail Transit corridor, with no closure of an existing crossing elsewhere in the City.	<b>NOD</b>	
2014041069	Tentative Map Application 2013-5, Villages at Santa Ana Creek (Brigantino Subdivision) Hollister, City of Hollister--San Benito The California Department of Fish and Wildlife (CDFW) has executed Streambed Alteration Agreement number 1600-2014-0214-R4, pursuant to section 1602 of the Fish and Game Code to the project Applicant, UCP Santa Ana Hollister, LLC.  The Project includes activities related to extending an existing concrete box culvert, placing rip-rap, and planting the banks with native riparian tree cuttings.	<b>NOD</b>

2015012020	Rubber Dam No. 1 Fabric Replacement Project Alameda County Water District Fremont--Alameda ACWD proposes work to remove and replace the fabric on its existing inflatable Rubber Dam No. 1. The fabric has been in place since 1979, past its anticipated useful life. The project involves removal of the existing rubber dam fabric and installation of new fabric. Minor modification will also be made to the existing concrete foundation to accommodate the new anchoring system needed for the new fabric.	<b>NOD</b>	
2015039015	Grant Award # ARV-11-019 to SacPort Biofuels Corporation: SacPort Renewable Diesel Pilot Project Monterey Bay Unified Air Pollution Control District --Monterey Install a waste-to-energy facility at Fort Hunter Liggett consisting of shredding equipment, genset, gasification reactor, and enclosed flare. The CEQA Guidelines, Section 15221, allows for the use of a Finding of No Significant Impact prepared under NEPA to be used in place of preparing a Negative Declaration. Therefore, the Air District is using the Army's Finding of No Significant Impact for an Environmental Assessment of a Net Zero Program at Fort Hunter Liggett for this project. The FNSI was approved by the Army on September 30, 2014.	<b>NOD</b>	
2015038147	Del Valle Pumping Plant (DVPP) Erosion Repair Water Resources, Department of Livermore--Alameda DFD staff will repair four areas of erosion near Del Valle Dam. The first DVPP erosion area is adjacent to the north east corner of the pumping plant lot and is approximately 260 square feet. The second erosion site at DVPP is located along the western edge of the parking lot and runs approximately 400 feet northwest to southeast. The second erosion site is approximately 3,500 square feet. The third area is approximately 500 square feet and located immediately south and adjacent to the Control Structure for the Glory Hole. The fourth erosion area runs from the ingress along the entry road to the Glory Hole for approximately 350 feet. The erosion site is located on the right side of the maintenance road when traveling south towards the Glory Hole, terminating at the bend leading to the Glory Hole. Repair work includes vegetation removal, using fill dirt and aggregate base and then compaction. Equipment, fill dirt, and aggregate base will be staged in the parking lot near the Control Structure. The entire project is within DWR right of way.	<b>NOE</b>	
2015038149	California Aqueduct (CAAQ) Erosion Repair Water Resources, Department of Livermore--Alameda, San Joaquin, Stanislaus DFD staff will repair erosion damage at 15 locations along the CAAQ. Erosion sites range in size from small rills, to undermined culvert drains, to 100 cubic yard slumps in the embankment. The erosion sites are located on either the primary or secondary side of the aqueduct or occur on access and turnout roads to the aqueduct on the primary side. The repair sites are all within DWR right of way and all equipment will be staged at the nearest check at the end of each work day.	<b>NOE</b>	
2015038152	Collier Slide and Disposal Caltrans #2 --Siskiyou Project will cut a bench into the hillside to prevent debris from making it to the roadway.	<b>NOE</b>

	fence. The project site is located in the West Patterson Industrial Business Park Zone.		
2015032066	Stockton & T Street Mixed-Use Project Sacramento, City of Sacramento--Sacramento Note: SCEA/IS	<b>Oth</b>	04/20/2015
	The proposed project would remove the existing 120,000 sf vacant office building (formerly AT&T) and associated parking lot and subdivide the property for construction of a mixed-use residential and commercial development. The proposed project includes a 214-unit, five-story, multi-family housing complex with ground floor commercial and parking garage, on the corner of Stockton Boulevard and T Street. In addition, the proposed project include construction of approximately 21 single-family homes between S Street and U.S. Highway 50.		
2011111065	Issuance of Hazardous Waste Facility Permit for CleanTech Environmental, Inc. Toxic Substances Control, Department of Irwindale--Los Angeles The project consists of making a permit determination on the CleanTech Environmental Inc. hazardous waste facility permit application to allow the construction and operation of a hazardous waste storage and treatment facility.	<b>NOD</b>	
2012041003	Los Angeles International Airport (LAX) Northside Plan Update Los Angeles World Airports Los Angeles, City of--Los Angeles The LAX Northside Plan Update (the Project) establishes new regulations and permits future development occurring within the LAX Northside Sub-area (Project site) located at 6400-7901 W. Westchester Pkwy; 9201 S. Sepulveda Blvd.; and 9320 S. Lincoln Blvd (between Pershing Dr. and Sepulveda Blvd.). The Project will update the Northside Design Guidelines and Standards in the approximately 340 acre Project Site and permit up to a maximum of 2,320,000 square feet. The entitlements associated with the Project include, among other things, an amendment to the LAX Specific Plan, Vesting Tentative Tract Map No. 72148, and grading/building permits.	<b>NOD</b>	
2014081087	Fresno, Kings, Madera Bridges Seismic Restoration Caltrans #6 Fresno, Chowchilla, Firebaugh--Fresno, Kings, Madera Caltrans proposes to seismically retrofit five bridges located in Fresno, Kings and Madera Counties to conform to the latest seismic design standards on State Routes 33, 41, 43, 233 and 152. The Bridges are: CCID Main Canal (42-0134), 41/99 connector (42-0216F), Kings River (45-0007), Kings River State Route 233/152 connector (45-0064), (41-0059E).	<b>NOD</b>	
2014081102	Freedom Ranch Alcohol and Drug Treatment and Recovery Facility San Diego County --San Diego The project is the expansion of the existing facility from 50 to 125 beds. The MUP area would expand from 4.5 acres to 112.6 acres and the area of onsite structures would increase by 22,298 square feet from just under the existing 15,000 square feet.	<b>NOD</b>

<b><u>Documents Received on Friday, March 20, 2015</u></b>			
2015032069	Silver Springs Lot P Sacramento County Elk Grove--Sacramento The Silver Springs Lot P proposed project would convert approximately 34.4 acres of vernal pool grassland to residential development (57 homes on 30.9 acres home, 3.4 acres landscape corridors, 5.9 acres street right-of-way, and .1 acre sewer lift station), and set aside 51.2 acres as a "wetland preserve" on a total 91.5 acre project site.	<b>NOP</b>	04/20/2015
2015031077	Santa Cruz Island Argentine Ant Eradication Fish & Wildlife Conservation Board --Santa Barbara The Nature Conservancy proposes to treat specific areas of Santa Cruz Island which have identified Argentine Ant infestations. Pilot test programs conducted with a selected pesticide have proven effective in eradicating Argentine Ant populations; the methods proven in the pilot testing will be applied to all identified infestation areas. Pesticide would primarily be applied via helicopter, at a frequency of every one to four weeks between May and October, in 2015 and 2016. Valley Anchorage, the largest infestation site and measuring between 800 and 1200 acres, is the primarily focus of the proposal. Monitoring and possible re-treatment of approximately 200 acres included in the pilot testing program are also included in the proposal. Best management practices and avoidance will be used to prevent impacts to native and endemic species and habitat.	<b>Neg</b>	04/20/2015
2015032081	Pocket Canyon Retaining Wall Project Caltrans #4 --Sonoma Caltrans proposes to construct a CIDH tangent wall to stabilize the slope beneath SR 116 at post mile 15. The wall will be 12-ft high at its highest point and a total of 165-ft long. A uniform 4-ft shoulder will be put in place on the southbound lane above where the wall is being installed, otherwise the lane configurations will remain the same as existing. Type-80 see-through railing will be installed above the wall and adjacent to the new shoulder. Two utility poles will have to be temporarily relocated for the project.	<b>Neg</b>	04/22/2015
2015032070	Trinity River Channel Rehabilitation Sites: Coarse Sediment Management Activities Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Trinity Note: Tiered IS (15177) to SCH# 2008032110 The purpose of the Coarse Sediment Management Project is to restore aquatic habitat in the Trinity River by injecting coarse sediment (clean native gravel 3/8 to 5 inch diameter) at five locations to supplement coarse sediment removed from the system by the Lewiston Dam on the mainstem Trinity River. The proposed project is designed to enhance aquatic habitat quality. The proposed Project would include introducing coarse sediment into the river primarily at high spring flows with heavy equipment or by using a conveyor system to carry the gravel to mid-channel locations. This work is considered to be within the scope of the Master EIR for channel rehabilitation and sediment management for remaining phase 1 and phase 2 sites = SCH# 2008032110.	<b>Oth</b>	04/20/2015

2015032071	Trinity River Channel Rehabilitation Sites: Fine Sediment Management Activities Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Trinity Note: Tiered IS (15177) to SCH# 2008032110  The purpose of the Fine Sediment Management Project is to enhance salmon and steelhead habitat downstream of Lewiston Dam on the mainstem Trinity River. The proposed project is designed to enhance aquatic habitat quality. Fine sediment will be excavated from the Hamilton ponds along Green Valley Creek a tributary to the Trinity River as needed by permitted activities to enhance salmonid habitat. This work is considered to be within the scope of the Master EIR for channel rehabilitation and sediment management for remaining phase 1 and phase 2 sites = SCH# 2008032110.	Oth	04/20/2015
1991022072	Kings Canyon Expressway, Segment 3 Caltrans, Planning FRESNO--FRESNO The California Department of Fish and Wildlife is executing a Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the Project applicant, Southern California Edison. The applicant proposes 8 new crossings to realign and widen State Route 180 (SR 180) near the communities of Centerville and Minkler from a two-lane conventional highway to a four-lane divided expressway. This 4.5 mile segment (Segment 3) will require either a new bridge or new culvert at each of the 8 waterways.	NOD	
2004042137	Almaden Lake Park Improvement Project San Jose, City of San Jose--Santa Clara The California Department of Fish and Wildlife (CDFW) has executed Streambed Alteration Agreement number 1600-2014-0417-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, the City of San Jose, Department of Public Works.  The project is to connect the existing Almaden Lake Trail (south of Coleman Road) to the Guadalupe River Trail (north of Coleman Road), by building a short connector route under Coleman Road and along the Guadalupe River.	NOD	
2010061037	Imperial Solar Energy Center West Imperial County El Centro--Imperial The overall Project will consist of construction of a 150 Megawatt (MW) photovoltaic solar energy facility and a transmission interconnection line (T-line) on approximately 1,145.87 acre. The portion of the Project being constructed within the next 90 days will be restricted to construction activities in Blocks 1 through 3, T-line construction activities in Blocks 4 and 5, and Operation and Maintenance activities within the T-Line corridor and overhead collection system path. This will result in impacts to 644.99 acres of flat-tailed horned lizard ( <i>Phrynosoma mcallii</i> ) habitat. The project is expected to result in incidental take of flat-tailed horned lizard, which is designated as a candidate species under the California Endangered Species Act (CESA). The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.	NOD

2011101046	<p>Salem Lutheran Church and School Specific Plan Orange, City of Orange--Orange</p> <p>The applicant is proposing the Salem Lutheran Church and School Specific Plan, which provides for a redesign of the church and school campus with a new approximately 23,000 square foot worship center that includes a 590 seat sanctuary, conference/meetings rooms, the sacristy, offices, choir/music rooms, storage, childcare, and other ancillary/administrative rooms. In order to accommodate the new worship center, the existing 3,262 square foot sanctuary building, and the existing 3,040 square foot preschool building will be demolished. Further, the existing on-site vacant structure (referred to as the "Fowler House" in the community) will be demolished, in order to accommodate a new preschool building. The new preschool building is proposed to be 7,505 square feet. Seven classrooms of approximately 525 square feet are proposed. Existing on-site infrastructure related to storm water, water quality management, vehicle circulation, and parking design are also part of the redesign. As part of this proposed project, a General Plan Amendment, Zone Change, and environmental review are required.</p>	<b>NOD</b>	
2012081028	<p>West Hills Water Treatment Plant San Benito County Water District Hollister--San Benito</p> <p>The Project involves construction of a new water treatment plant, a raw water pump station and pipeline, a treated water pipeline, and a paved access road. The water treatment plant will be comprised of treatment facilities, solids handling facilities (including drying beds), treated water storage tanks, an administration and operations building and associated facilities.</p> <p>The Project will result in impacts to 10.8 acres of California tiger salamander (<i>Ambystoma californiense</i>) (CTS) and San Joaquin kit fox (<i>Vulpes macrotis mutica</i>) habitat including temporary impacts to 5.5 acres; the Project will permanently remove 5.3 acres of undeveloped annual grassland habitat. The Project is expected to result in incidental take of CTS and San Joaquin kit fox, both of which are designated as a threatened species under the California Endangered Species Act. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.</p>	<b>NOD</b>	
2013061025	<p>Villa Sevillano Equestrian Center Santa Barbara County Carpinteria--Santa Barbara</p> <p>CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code ( # 1600-2013-0236-R5) to the Project applicant, Robert Seidler, from Polo Donkey, LLC. The Project proposes to build a commercial equestrian facility, which requires a conditional use permit from Santa Barbara County. The plan dedicates a 15-foot wide public equestrian trail easement along the creek, and the southern property boundary that provides linkage with other trails. To allow a small portion (23,361 sq. ft.) of an existing polo field within an Environmentally Sensitive Habitat ESH of Garrapata Creek, the Permittee is required to mitigate along a 30-foot buffer along the creek. Habitat restoration shall provide habitat for native species disturbed by human activity, establish healthy and self-sustaining native vegetation, reduce erosion, and reduce the spread of invasive plant species. After removing Cape ivy,</p>	<b>NOD</b>

	periwinkle and English ivy, the cleared soil will be covered with mulch and erosion control fabric. Approximately 200 native plants will be installed, using local genotypes and monitored for 5 years. The Permittee also proposes large bio-swales to be installed for drainage before entering the creek. The bio-swales are located outside of CDFW's jurisdiction, and also outside the ESH. All the drainage from the equestrian facility and the polo field will drain into the bio-swales.		
2014032078	Santa Clara Westside Storm Retention Basin Desilting Project Santa Clara, City of Santa Clara--Santa Clara The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0375-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, City of Santa Clara, Department of Public Works.	<b>NOD</b>	
	Gate repair of two inlet structures and pump station; removal of approximately 15,000 cubic yards of accumulated sediment from a retention basin.		
2014042013	Tesoro Avon Marine Oil Terminal Lease Consideration California State Lands Commission Martinez--Contra Costa The proposed Project involves Tesoro Refining and Marketing Company, LLC (Tesoro), a wholly owned subsidiary of Tesoro Petroleum Corporation, entering into a new 30-year lease of State sovereign land with the State Lands Commission to continue operating the Avon Marine Oil Terminal (Avon Terminal), located in Contra Costa County. The objective for the Project is to continue operations at, and maintain the level of refined petroleum product exported through, the existing Avon Terminal, thereby maintaining the operation and viability of Tesoro's associated Golden Eagle Refinery. In addition to a new 30-year lease, Tesoro is also seeking to conduct upgrades on the Avon Terminal to meet Marine Oil Terminal Engineering and Maintenance Standards (MOTEMS). The scope of the MOTEMS renovations includes: decommissioning of Berth 1; construction of a new berthing area, Berth 1A; repairs, retrofits, and renovations on the existing approach trestle; and demolition and removal of existing Berth 5. The State Lands Commission action is an approval of a 30-year General Lease - 2015 through 2044.	<b>NOD</b>	
2014042076	Van Allen Road Bridge Scour Mitigation Project San Joaquin County --San Joaquin The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0278-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, San Joaquin County Department of Public Works.	<b>NOD</b>	
	The project is limited to installation rock slope protection (RSP) across the channel of South Littlejohn's Creek beneath the Van Allen Road Bridge to reduce scour of the bridge piers and abutments, and prevent further degradation of the channel. Work will include clearing vegetation and grubbing along the banks on the creek, the temporary installation of an access ramp, diversion of the creek flow by a cofferdam or alternate, excavation of the earthen channel bottom and banks to a maximum depth of 4.5-feet, placement of an estimated 400-cubic yards of RSP and protection fabric to conform to the upstream and downstream conditions, and

<b><u>Documents Received on Friday, March 20, 2015</u></b>			
2014052035	<p>placement of Gabion Mats along the embankment to reduce depths of excavation. Approximately 430-cubic yards of material will be dredged from the stream over a maximum of 75-linear feet. Project staging will be located on an open dirt area at the southeast corner of the bridge crossing. Work will occur during periods of low flow in South Littlejohn's Creek.</p> <p>Sherman Island "Little Baja and Manzo Ranch" Fish Release Sites Project Water Resources, Department of --Sacramento</p> <p>The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0323-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, California Department of Water Resources.</p>	<b>NOD</b>	
2014062027	<p>The fish release sites are being designed and constructed to comply with the National Marine and Fisheries Services' Biological Opinion on the Long-term Operations of the Central Valley Project and State Water Project (2009) and CDFW Longfin Smelt Incidental Take Permit for the California State Water Project Delta Facilities and Operations (2009). The purpose of the project is to build new facilities to release fish that have been salvaged back into the Delta. The overall goal of the project is to reduce predation of salvaged fish at the fish release sites and increase salvaged fish survival rates.</p> <p>Austin Road Bridge Scour Mitigation Project San Joaquin County Stockton--San Joaquin</p> <p>The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0280-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, San Joaquin County Department of Public Works.</p> <p>The project is limited to the placement of rock slope protection (RSP) in the form of riprap beneath the bridge and along the adjacent embankments to address problems with scour along the stream channel that is exposing the bridge footings and bents to potential damage. Because the foundations are relatively shallow, smaller rocks will be placed underneath the bridge deck to avoid undercutting the bridge footings; however, because of the high velocities, concrete baffles will be required to effectively hold the small rocks in place. The proposed concrete baffles will be staggered to allow a nonconcrete path for riparian wildlife. Staging areas and temporary construction easements will be needed along the east and west edges of Austin Road to install the RSP. Access to the work site will be from Austin Road and adjacent San Joaquin County Department of Public Works operational roads; no new access roads will be necessary and no utilities will be relocated. Staging areas will be within easements on graded and graveled surfaces immediately adjacent to the bridge. Construction activities for the project will include subsurface disturbance. Construction equipment used will be a large front-loader on creek banks and multi-size excavators in the channel bottom. The anticipated approximate depth of excavation is 4.5 feet (137 centimeters). All soil excavated during the project is anticipated to have been previously disturbed during bridge construction.</p>	<b>NOD</b>

	restrictions of brackish tidal water from Hudeman Slough, a tidal tributary linking Sonoma Creek and the Napa River. Activities within the jurisdiction of this agreement include the servicing of tide gates that regulate the flow out of the management units. Three tide gates and one valve require servicing. Proposed service activities include the repair and replacement of existing riprap around the gates and removal of sediment and debris that are clogging them. an estimated 4 cubic yards of sediment will be removed from around each tide-gate. Rip rap shall be limited to the replacement of maximum 4 cubic yards per tide-gate. All materials and equipment will be staged from the levee road adjacent to the gate. Issuance of a Streambed Alteration Agreement No. 1600-2014-0347-3 is pursuant to Fish and Game Code Section 1602.		
2015038195	Hague - River Blvd - Stream Bank Retention Fish & Wildlife #3 --Sonoma Project is limited to the installation of 5 drilled helical piers to support a home's foundation and the stabilization of the streambank adjacent to the home using rock slope protection. The 5 helical piers will be drilled in place using a small track mounted drill rig and then pinned to the home's foundation to stabilize the structure prior to beginning slope stabilization. Bank stabilization will include the excavation of approx. 130 cubic yards of material from a 5 foot wide by 4 foot deep by 70 foot long toe trench and from a 3-foot deep by 70 foot long cut in the slope. The toe trench and slope will then be lined with a geotechnical fabric. Rock slope protection will then be installed, beginning in the toe trench and stacked up to the top of bank, filling the 3-foot cut slope with rock in order to reestablish pre-project contours. The excavated top soil will be used to backfill voids in the upper 2/3rds of the bank so that it can be replanted with native vegetation. Excess material will be removed from the site and disposed of properly. Issuance of a Streambed Alteration Agreement no. 1600-2014-0368-3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>	
2015038196	Sunburst Sanctuary Ytias Creek Bank Repair along Easement Road (Lake or Streambed Alteration Agreement No. 1600-2014-0140-R5) Fish & Wildlife #5 --Santa Barbara CDFW has executed a Lake and Streambed Alteration Agreement No. 1600-2014-140-R5, pursuant to Section 1602 of the Fish and Game Code, to John McCaughey from Sunburst Sanctuary. The Permittee proposes to place ungrouted rock rip-rap on the creek bank in two locations where water flow has caused erosion and the banks to become vertical. Two willows will be removed to protect the bank, which is along a farm road. Permittee may construct up to 4 "U" - shaped ungrouted rock weirs in each section as an option to bank protection, to catch sediment and to prevent the bottom of the channel from eroding. Permittee shall submit CDFW plans for either or both options for controlling erosion to the channel prior to any work in the creek.	<b>NOE</b>

**Documents Received on Friday, March 20, 2015**

demonstrated at the MillerCoors brewery in Irwindale, California from biogas from the existing on-site digester. The duration of this demonstration will be about eight weeks. The unit will then be moved to a landfill near Simi Valley, California where it will demonstrate the upgrading of landfill gas. This second demonstration will be for a period of about 4 weeks. At both sites, approx. 100 standard cubic feet per minute will be diverted from existing biogas infrastructure, treated, and returned to the original gas stream to be either flared or used to fuel a combined heat and power system consistent with the current practice of the facility.

If flaring occurs, only biogas drawn from a feed permitted for flaring will be returned to the flaring feed after conditioning. There will be no new flaring, nor will additional biogas be diverted to existing permitted flares. The BGU consists of piping, treatment canisters, a blower and a hydrogen sulfide removal module, and is skid mounted. The dimensions of the skid are 12 feet wide by 20 feet long and 6 feet high. The skid will be placed on an existing concrete pad at MillerCoors and on an existing gravel surface at the Waste Management landfill.

2015038205	The Lakeview Farms Dairy Biogas-To Electricity Project Energy Commission Bakersfield--Kern This research will support the installation of a pre-commercial Covered Lagoon Digester that will convert dairy manure into biogas; convert the majority of the gas into electricity for export to the PG&E distribution grid through a possible Senate Bill (SB) 1122 Bioenergy Feed-in Tariff contract; and, in another phase for a planned expansion, convert an estimated 25% to 33% portion of the biogas into renewable natural gas (RNG) for sale as a transportation fuel.	<b>NOE</b>

2015-03	Kashia Band of Pomo Indians of the Stewarts Point Rancheria - APNs: 123-160-005-000 Bureau of Indian Affairs --Sonoma The subject property consists of two parcels of land, encompassing ~480.00 acres more or less, commonly referred to as APNs: 123-160-005-000 (portion). The parcels are contiguous to the eastern boundary of the Stewarts Point Rancheria. The property was not being actively used by its prior owners and is not currently being used by the Tribe for any purpose other than analysis and protection of natural resources. It has not habitable buildings and is uninhabited. Kashia is in the process of considering results of an expert evaluation, documentation and preservation studies for the means of using the newly acquired property. Until the necessary studies are done, the land will be used only for three purposes: 1. Identify and inventory all sites and objects of environmental and cultural significance to the Tribe; 2. Enable Kashia to take all necessary steps to ensure that those sites and objects are protected; and 3. Provide to Kashia and its members access to the property for traditional uses, and for restoration of the property to its best possible condition both culturally and	<b>BIA</b>	04/21/2015

	environmentally.		
2015031082	<p>Proposed Amendments to Rule 2202 Employee Commute Reduction Program (ECRP) Guidelines South Coast Air Quality Management District Diamond Bar--Los Angeles</p> <p>The SCAQMD is proposing amendments to the Rule 2202 ECRP Guidelines which include administration language and document restructuring to provide clarity and guidance to the regulated community. Specifically, staff is proposing that the Employer Clean Fleet Purchase / Lease Program and Mobile Source Diesel Particulate Matter (PM) / Oxides of Nitrogen (NOx) Emission Minimization Program be removed, as they have been or soon will be overtaken by state regulations that specifically address the original intent of these program elements. Staff is also proposing the inclusion of High Average Vehicle Ridership (AVR) and AVR Improvement Submittals as an additional plan submittal type to incentivize worksite AVR improvements and streamline submittals of the ECRP as a rule compliance option. The environmental analysis is the Draft EA concluded that this proposed project would not generate any significant adverse environmental impacts.</p>	<b>EA</b>	04/21/2015
2011111016	<p>2035 General Plan (General Plan Amendment 09-42) San Benito County Hollister, San Juan Bautista--San Benito</p> <p>The County proposes a comprehensive update of the General Plan to revise and replace the existing General Plan, including all elements, the Land Use and Condition Diagrams, and other existing goals, policies, and implementation plans to reflect current law and changing matters of public interest and concern. The 2035 General Plan will establish and implement new goals and policies for regulating development projects, and for balancing population growth with infrastructure availability, agricultural preservation, and natural resource protection. Other goals and policies are directed to ensuring timely availability of public infrastructure and services, encouraging a well-balanced economy, integrating new planning concepts endorsed by the County Board of Supervisors, and translating updated goals and policies into implementation programs.</p>	<b>EIR</b>	05/06/2015
2013122059	<p>Santa Row Expansion (PDC13-050) San Jose, City of San Jose--Santa Clara</p> <p>The project proposes to expand the Santana Row site by 1.91 acres (the expansion area is referred to as Lot 17), increase the allowable office space entitlement by 510,000 sf, and increase the retail entitlement by 55,641 sf. In addition, the project proposes to increase the allowable number of residential units by 47 and the allowable number of hotel rooms by six. The expansion is proposed on four adjacent parcels (collectively referred to as Lot 17), an approximately 1.91-acre site comprised of four parcels (APNs 277-38-003, -004, -005, and -010). In addition, the project proposes to permanently close Santa Row to automobile traffic from Olin Avenue to Olsen Drive. The area between Olin Avenue and Olsen Drive will become a pedestrian thoroughfare, terminating at a plaza near the existing movie theater.</p>	<b>EIR</b>	05/06/2015

2005041094	Laetitia Agricultural Cluster Subdivision Tract Map and Conditional Use Permit San Luis Obispo County Arroyo Grande--San Luis Obispo Note: Final 1 CD	<b>FIN</b>	
	<p>The applicant is requesting approval of a Vesting Tentative Tract Map and Conditional Use Permit. The submitted tract map is vested based on the date of submittal to the County; therefore, the San Luis Obispo County Land Use Ordinance dated January 2003 applies. The proposed project consists of the agricultural cluster subdivision of 21 parcels (totaling approximately 1,910 acres) into 106 lots, including 102 residential lots of one acre each; four build-able open space lots totaling approximately 1,787 acres; and approximately 25 acres of internal residential roads.</p>		
2012022039	Morgan Ranch Master Plan Turlock, City of --Stanislaus Note: Extend Per Lead	<b>FIN</b>	
	<p>The proposed project consists of the adoption and implementation of the Morgan Ranch Master Plan, which would modify the General Plan designations and zoning for approximately 170 acres and designate the land uses for Community Commercial, Office, High Density Residential, Medium Density Residential, Park, and Public/Semi-Public. The Master Plan would zone the land uses for Community Commercial, Commercial Office, High Density Residential, Medium Density Residential, and Public/Semi-Public.</p>		
2013102019	Use Permit Application No. PLN2013-0078 - Central Valley Recycling Inc. Stanislaus County Modesto, Ceres--Stanislaus	<b>MND</b>	04/21/2015
	<p>Request to intensify an existing California Redemption Value (CRV) and scrap metal recycling facility on two parcels totaling approximately 2.2 acres. The proposal would increase the volume of scrap metal recycling from an average of 1,350 tons to a maximum of 2,500 tons per month, and the number of employees from nine to 18 full time and five part time employees. Scrap metal will be cut, crushed, baled, and then transported off-site for further processing.</p>		
2014031075	IS Application No. 6585 (Giffen Solar Park, LLC) Fresno County San Joaquin--Fresno	<b>MND</b>	04/21/2015
	<p>The project for purposes of CEQA review consists of two components: a photovoltaic solar power generation facility with related improvements including a switching station, 9 inverter units, a battery energy storage system, and an eight-foot-tall chain-link fence on portions of a 156.79-acre parcel and a 160.00-acre parcel that is the subject of Unclassified Conditional Use Permit (CUP) No. 3383; and expansion of an existing 70 kilovolt substation and installation of a 70 kV double-circuit power line that will be constructed under CPUC jurisdiction. The photovoltaic solar power generation facility that was authorized by CUP No. 3383.</p>

2015032073	Mountain Meadows Restoration Complex Honey Lake Valley Resource Conservation District --Lassen The Mountain Meadows Restoration Complex Project consists of two distinct meadow restoration sites near Mountain Meadows Reservoir in Lassen County. The Upper Goodrich Creek restoration project site is located on an un-named tributary to Goodrich Creek. The project is approximately 4,800 long and encompasses approximately 72 acres of meadow/floodplain restoration. The project consists of 2 parallel meadows, referred to as East Meadow and West Meadow, which drain watershed areas of 1.4 mi <sup>2</sup> and 4.5 mi <sup>2</sup> , respectively. The two meadows converge in the lower third of the East Meadow. There is a zone of multiple headcuts in both meadows. The proposed project begins at the zone of headcuts in each meadow and treats the moderately incised gully channels downstream to the beginning of a stable, un-incised reach just upstream of its confluence.	<b>MND</b>	04/21/2015

2011042038	<p>Policy for Water Quality Control for Siting, Design, Operation, and Management of OWTS (Septic Systems) State Water Resources Control Board</p> <p>--</p> <p>On June 11, 2014, the California Regional Water Quality Control Board, San Francisco Bay Region (San Francisco Bay Water Board) adopted Resolution No. R2-2014-0028, amending the Water Quality Control Plan for the San Francisco Bay Region (Basin Plan). The Basin Plan amendment (OWTS amendment) incorporates, as required by State law (Water Code section 13291(e)), the State Water Resources Control Board's (State Water Board's) Onsite Wastewater Treatment System Policy (approved by the Office of Administrative Law on November 13, 2012). The OWTS amendment also amends the Basin Plan's wet weather overflow section to conform to existing law and makes other editorial, non-regulatory changes to the Basin Plan. The OWTS Basin Plan amendment was approved by the State Water Board under Resolution No. 2014-0064 on November 18, 2014, and by the Office of Administrative Law on February 17, 2015.</p> <p>A Substitute Environmental Document (SED) was prepared by the State Water Board for the Water Quality Control Policy for Siting, Design, Operation, and Maintenance of Onsite Wastewater Treatment Systems (OWTS Policy) in accordance with the State Water Board's certified regulatory program (Cal. Code Reg., tit. 23 Sec. 3777-3781). The State Water Board approved the OWTS Policy and the SED under resolution No. 2012-0032 on June 19, 2012. The proposed amendment harmonizes existing Basin Plan provisions concerning onsite wastewater treatment systems with the State Water Board's OWTS Policy and incorporates that policy by reference. No substantive changes or modifications to the previously approved OWTS Policy are proposed. No substantial changes with respect to circumstances under which the project will be undertaken have occurred, and no new information triggers the need for supplemental or subsequent CEQA analysis.</p>	<b>NOD</b>	
2013042065	<p>Fair Oaks Overhead Bridge Rehabilitation Sunnyvale, City of Sunnyvale--Santa Clara</p> <p>The City of Sunnyvale (City) proposes to rehabilitate the Fair Oaks Overhead Bridge (bridge). The bridge is located on Fair Oaks Avenue between Kifer Road and Evelyn Avenue. The bridge crosses over Hendy Avenue, the railroad tracks owned by the Peninsula Corridor Joint Powers Board (Caltrain), and through an apartment community. The Fair Oaks Avenue Overhead Bridge Rehabilitation Project (project) would rehabilitate the bridge to address several identified structural deficiencies while at the same time expanding bicycle and pedestrian amenities. The rehabilitated bridge would maintain its current automobile capacity - two travel lanes in each direction.</p>	<b>NOD</b>

<b><u>Documents Received on Monday, March 23, 2015</u></b>			
2015038207	American River Bike Trail Repairs 2015 Proect Sacramento County Sacramento--Sacramento The project will address maintenance repairs to the American River Bike Trail and one of its spur trails. New asphaltic concrete (a/c) will be overlaid between approximately Mile 12.5 of the bike trail and Mile 13, and between Mile 13.5 and Mile 15.5. Cracks in the pavement will be addressed by filling and overlaying with new asphalt. In cases of heaved and cracked pavement, a section between 4" and 12" will be removed and replaced. Any missing asphalt will be replaced, and the shoulders of the bike paths will be reformed with decomposed granite. No waterways will be affected and no tree removal is required.	<b>NOE</b>	
2015038208	SVCSO Sewer Trunk Main Replacement - Agua Caliente Creek Crossing Project Fish & Wildlife #3 Sonoma--Sonoma The project is limited to the relocation of section of the sewer trunk main pipeline to below Agua Caliente Creek. The pipe will be installed using a pipe ramming technique due to the presence of cobblestones within the streambed. Two pipe ramming pits will be constructed, a 36-foot long by 20-foot wide by 30-foot deep ramming pit and a 13-foot wide by 10-foot long by 28-foot deep receiving pit. Both pits are set back from the top of bank by at least 10 feet. Excavated materials will be stored for site restoration.	<b>NOE</b>	
2015038209	Bridge Rail Replacement on Gallinas Creek Bridge Fish & Wildlife #3 San Rafael--Marin The California Department of Transportation will replace the bridge rails on the Route 101 bridge over Gallinas Creek. SAA #1600-2014-0384-03	<b>NOE</b>	
2015038210	Snowberry Trail Bridge Installation and Culvert Crossing Removal (Lake or Streambed Alteration Agreement No. 1600-2014-0294-R2) Fish & Wildlife #2 Folsom--Sacramento The project is limited to the replacement of a dilapidated steel culvert stream crossing with a new free-span trail bridge, and removal of the existing steel culvert crossing materials and debris from the channel. This project will install a new 50-foot long by 5-foot wide wood trail bridge across a seasonal stream along the Snowberry Trail. The new bridge will be located approximately 100 feet downstream of the existing (damaged) culvert crossing.	<b>NOE</b>	
2015038211	State Route 5, 99, 108, 120, 152 and 205 Traffic Monitoring Stations Repair Caltrans #6 Stockton, Merced--Merced, Stanislaus, San Joaquin, Tuolumne Proposes to construct, modify, upgrade and/or replace existing intelligent Transportation System (ITS) elements at various locations along State Routes 5, 99, 108, 120, 140, 152, and 205 in Merced, Stanislaus, San Joaquin and Tuolumne counties. No additional right-of-way would be required.	<b>NOE</b>	
2015038212	Kern River Gas Depth of Cover Maintenance Project Regional Water Quality Control Board, Region 6 (Lahontan), Victorville --San Bernardino The Project is to inspect the pipeline right-of-way and to maintain a minimum 3-foot depth of cover over buried sections of the pipe. Authorized cover materials include soil, ungrouted rock rip-rap, and pre-cast articulated concrete-block. In no instance will cover material be placed above the natural grade of the channel so	<b>NOE</b>

	as to cause a condition of impoundment or change in the natural flow path of the waterway.		
2015038213	Walnut Creek Nature Park-Improvements Baldwin Park, City of Baldwin Park--Los Angeles Upgrade the existing facilities at Walnut Creek Nature Park. The proposed work involves improvements to the 4.5 acre nature park including revitalized landscaping, swale/dry streambeds, trails, building upgrades, access enhancements, interpretative features, seating area improvements, playground elements and fencing.	<b>NOE</b>	
2015038214	Lundblade Restoration Project (Lake or Streambed Alteration Agreement No. 1600-2014-0026-R1) Fish & Wildlife #1E --Humboldt The project is limited to five encroachments. Four separate culverts will be removed on unnamed tributaries to Little Larabee Creek, a tributary to the Van Duzen River. In addition, one water impoundment will be removed. All removals will be laid back to achieve slope stability and reduce potential impacts from erosion. These proposed encroachments are associated with restoration of damages created through illegal trespassing.	<b>NOE</b>	
2015038215	Honey Lake Valley Authority JPA Community Pool Project Susanville, City of Susanville--Lassen The project consists of the demolition and reconstruction of a community pool facility. The reconstruction of a new community pool facility will occur on the same site as the existing pool. The site has been used as a public community pool facility since the late 1930's. The age of the facility makes replacement of the facility more cost effective than rehabilitation. The existing pool is enclosed within an 11,500 square foot building with accessory outdoor recreation facilities including picnic area, horseshoe pits, patio/sun area and associated parking.	<b>NOE</b>	
2015038216	Metropolitan Wells Redevelopment Rio Dell, City of Rio Dell--Humboldt The proposed well redevelopment (proposed project) would provide redundant means of collecting raw water if the area experiences a drought and Rio Dell is not able to draw in adequate surface water through the infiltration gallery to supply the community, or if the infiltration gallery system needs to be shut down for maintenance.	<b>NOE</b>	
2015038217	DWR's California Aqueduct Water Turnout Modifications for San Luis Field Division in 2015 Water Resources, Department of --Merced, Fresno Modify 15 existing water turnout structures at various California Aqueduct locations within the San Luis Field Division on State Water Project right of way. Demolish and dispose of old concrete stop-log guides, fabricate and install new steel stop-log guide structures, replace grout into sealing surfaces, and modify head-panels. The work is needed to modernize and restore existing facilities for safety and ease of operations and maintenance. This will not result in any expansion of facilities or operations. Improvements to the State Water Project facilities provide benefits to the people of California by improving operational	<b>NOE</b>

	substation at Gaskell Road between 215th Street and 220th Street, to the Southern California Edison "Astoria" Switchyard offsite approximately 3 miles northeast of the project area.		
2015034001	West Mojave (WEMO) Route Network Project Bureau of Land Management --Los Angeles, San Bernardino, Inyo, Kern Note: Review Period Per Lead	<b>EIS</b>	06/04/2015
	The West Mojave Planning Area is located to the northeast of the Los Angeles metropolitan area. The conservation program established by the 2006 WEMO Plan amendment to the CDCA Plan applies to the BLM-administered public lands in the Planning Area. The WMRNP amendment to the Livestock Grazing, Motorized Vehicle Access, and Recreation Elements of the CDCA Plan, and the route designation process updates that would be incorporated into the CDCA Plan, if approved, would be applicable only to the BLM-administered public lands within the West Mojave Planning Area. The other changes analyzed in this SEIS would likewise apply only to the BLM administered public lands within the West Mojave Planning Area.		
2015031084	Hyder Ranch Sports Park, Special Use Permit PSP14-063 Tulare County Porterville--Tulare The proposed Hyder Ranch Sports Park will be constructed on approximately 22.3 acres of an existing 375.44-acre site (APN 305-070-12, 305-10-25 & 305-010-26). The Project will include a sports park and a small residential community garden/park to be constructed in two phases. Phase 1 will include three baseball/softball fields, three warm up fields, and a 69-space parking lot. Phase 2 includes a picnic area, a tot lot, basketball courts, a vendor/restroom building, soccer field, 82-space parking lot, and a community garden/park. Construction of Phase 1 is expected to begin immediately upon approval of the Project, whereas construction activities for Phase 2 are anticipated to begin within five years. The remaining 353.14 acres of the Project site will remain in their current state and agricultural uses (grazing) will continue.	<b>MND</b>	04/22/2015
2015031087	5573RPN; a) Amendment of Zoning Map No. 123-36, Zone Change Case No. 15; b) Conditional Use Permit Case No. 11, Map 123-36; Gulzar Dhindsa by Pasquini Engineeri Kern County Bakersfield--Kern The applicant is requesting: a) a change in zone classification from A-1 (Limited Agriculture) to A (Exclusive Agriculture); and b) a Conditional Use Permit to allow an agricultural trucking facility in an A District pursuant to Section 19.12.030.A.2 (Exclusive Agriculture - Use Permitted with a Conditional Use Permit) of the Kern County Zoning Ordinance.	<b>MND</b>	04/22/2015
2015031088	Sweany Water Line Replacement Project Laguna Beach County Water District Laguna Beach--Orange The Project would involve refurbishment of approximately 1,850 linear feet of an existing 8-inch water pipeline within an existing 20-foot wide utility easement dedicated to operation and maintenance of the existing pipeline. The Project would utilize a pipeline insertion technique within State Park to minimize impacts to existing native sage scrub bypass line at the reservoir; insertion of new 6-inch	<b>MND</b>	04/22/2015

	pipeline within the existing 8-inch pipeline at eight small excavations along the 1,850 foot of pipeline; slip lien work at a private residence in Irvine Cove; and restoration of all native sage scrub habitat disturbed during construction.		
2015032079	Hayward 21st Century Library & Community Learning Center Project-Site Plan Review & Variance No. 201501354 Hayward, City of Hayward--Alameda The City of Hayward proposes to construct a new 3-story, 58,000 sf main library on a new downtown site on C Street that would expand library and community services that offers two homework tutoring centers; more public internet computers, education technology and wifi; technology training facilities for youth digital media and computer training classes; more community meeting/learning space; and a community learning/literacy center for adults and seniors. The building is being designed to meet a minimum LEED Gold standard and Zero Net Energy demands. The proposed project would demolish the existing main library and restore the civic plaza after constructing a new main library. The Project would include a recycled water system to capture rainwater for use in the new library gray water system and for irrigation of the plaza's green spaces.	<b>MND</b>	04/22/2015
2015031086	Groundwater Land Retirement/Groundwater Conservation Easement Program Angiola Water District --Tulare The Angiola Water District proposes to undertake implementation of a Groundwater Land Retirement/Groundwater Conservation Easement Program (also referred to as the Program or the Project), would acquire title to or groundwater conservation easements upon parcels of land in southwest Tulare County, impose permanent covenants prohibiting groundwater extraction and groundwater usage from on or off-site groundwater sources within the Tule Sub-Basin. The Program areas is generally defined as bordered by Road 92 to the east, the Kern County boundary to the south, the Kings County boundary to the west, and Avenue 88 to the north. The Program (or study) area, is comprised of ~1,458 parcels totaling an estimated 53,937 acres.	<b>NOP</b>	04/22/2015
2015032058	Saratoga Estates Subdivision (TM14-1520, PD14-0006 & Z14-0007) El Dorado County --El Dorado Renasci Development proposes to construct a 316-unit residential development. The single-family, detached residential units would be constructed on individual lots generally ranging between approximately 6,000 and 9,000 square feet with the exception of several larger lots (up to approximately 24,000 square feet) bordering the east project site boundary. The project would extend Wilson Boulevard to Saratoga Way and extend Saratoga Way to Iron Point Road in Folsom, thus completing the the east-west road connection between El Dorado Hills Boulevard and East Bidwell Street. The project features approximately 41 acres of open space areas, which includes public parks, a trail system, landscaping, and open space areas surrounding the creek corridor. The project would also include on-site and off-site infrastructure to serve the development . The El Dorado County General Plan land use designation for the project site is High Density Residential (HDR). The parcel containing the project site is currently zoned R1 (one-family residential district) and OS (open space). The project includes a proposal to change the zoning on the project site to R1-PD (one-family residential,	<b>NOP</b>	04/22/2015

2014071028	Elm Street Tentative Tract Map (Planning Application No. 08-0154/TM No. 33840) Wildomar, City of Wildomar--Riverside The project includes a change of zone from the existing designation of R-R to R-1. The change of zone designation will make the zoning consistent with the existing General Plan land use designation of Medium Density Residential (MDR). The project also includes a Tentative Tract Map (TTM No. 33840) to subdivide the 4.16-acre parcel into 15 parcels for future single family residential development.	<b>Neg</b>	04/22/2015
2015031083	Former Naval Petroleum Reserve No. 1 (NPR-1): Remediation of Areas of Concern (AOCs), including approval of cleanup plans for AOC 045, AOC 108, 109, 056 Burn Si Toxic Substances Control, Department of --Kern DTSC is considering approval of two Removal Action Work Plans (RAWs) and an Interim Corrective Measures Work Plan for the former Naval Petroleum Reserve No. 1 (NPR-1) property pursuant to Chapter 6.5 of the California Health & Safety Code. The RAWs and the ICMW, which are incorporated by reference, consist of excavation of landfill material/debris and potentially impacted soil that may release chemicals of concern (COCs) at levels that may pose a risk to human health. The documents evaluate remediation action alternatives and identify a preferred action to address the Areas of Concern (AOCs) in the Corrective Action Consent Agreement, signed by the U.S. Department of Energy (DOE) and DTSC in 2008. The preferred remediation action alternative includes excavation of soil/debris and landfill materials at the AOCs.	<b>Neg</b>	04/22/2015
2015032080	2014-2019 City of Sutter Creek Joint Housing Element Sutter Creek, City of Sutter Creek--Amador The 2014-2019 Joint Housing Element Update is an update to the existing General Plan Housing Element. This document supersedes previously adopted Housing Elements and replaces the existing Housing Element in the City of Sutter Creek General Plan. The 2014-2019 Draft Housing Element addresses the requirements of California Government Code 65583, for the planning period from 2014 to 2019. The Draft Housing element includes several sections including goals, policies, and implementation programs to support housing at all income levels, a housing needs assessment, review of constraints on housing development, resources analysis, a review of the previous Housing Element, and SB 244 Analysis. The IS assesses the impacts of implementing the 2014-2019 Joint Housing Element Update within the City of Sutter Creek.	<b>Neg</b>	04/22/2015
1985042404	Urban Runoff Diversion System Maintenance, Addendum to Supplement and FEIR Sweetwater Authority The proposed project is the maintenance of existing water quality cleansing constructed wetlands. 2015038235	Gordon Valley Fire Station Dozer Shed Construction Forestry and Fire Protection, Department of --Napa The equipment was transferred to the Gordon Valley Station in 2014 after a reevaluation of operational needs indicated that the new location would allow faster response times to the majority of vegetation fires within the Unit and the Santa Clara Unit to the south. The dozer is currently stored outside in a gravel area that requires a multi-point turn to stage the transport. The construction of the new dozer shed will protect the equipment from the elements and create a more effective location for mechanics to service the dozer and transport. Up to four small liquidambar trees will be removed along the narrow driveway to reduce the angle of the turn and allow the transport to enter and exit via a loop instead of turning around.	<b>NOE</b>

2015032083	Western Pacific Interceptor Canal Channel Maintenance Project Water Resources, Department of --Yuba DWR's Flood Maintenance Office Sutter Maintenance Yard proposes to conduct channel maintenance activities including debris and/or obstruction removal, vegetation management and wildlife damage management activities within the Western Pacific Interceptor Canal. Channel maintenance activities are required to maintain design flows, ensure proper water conveyance and allow adequate inspection of the channel.	<b>MND</b>	04/23/2015
2015031092	Mojave Aluminum Project Barstow, City of Barstow--San Bernardino Project includes the construction and operation of an aluminum direct chill billet casting facility. The project would consist of an approx. 500,000 sq. ft. aluminum cast housing building, on-site water treatment plant, evaporation pond, primary metal storage area, and a supporting office building. The cast house, water treatment plant, power plant, truck scales and loading area, evaporation pond, and an approx. 11,000 sq. ft. office building would be located on the eastern portion of the project site. The western portion of the project site will be used for aluminum and finished product storage. In order to visually screen the project from the adjoining residences, a ten foot high earthen berm topped with a chain link fence will be constructed along the western, northern, and eastern boundaries of the project site.	<b>NOP</b>	04/23/2015
2015031093	South Beach Restroom Coronado, City of Coronado--San Diego The project involves constructing a public restroom to accommodate existing needs. The project would require reconfiguring rock revetment/riprap on the project site and removing existing stairs that lead to the beach. The new building would be approx. 235 sq. ft. and include three single-accommodation stalls, one American with Disabilities Act (ADA) accessible stall, and a storage closet. A building plaza of approx. 1,000 sq. ft. would adjoin the facility and provide patio area for the building's exterior hand washing sinks, hand dryers, showers, and a new ADA access ramp, which would provide access to the facility from the street. Stairs from the patio would provide access to the beach.	<b>NOP</b>	04/23/2015

	hauled away. Replanting with native plants would occur where natural recruitment does not occur.		
2015012047	Divine Transportation Trucking Facility (PLN14-00053) Placer County Rocklin--Placer The applicant is requesting approval of a Minor Use Permit to construct a commercial trucking terminal and associated parking on an undeveloped, five-acre parcel located on Cincinnati Avenue in the Sunset Industrial Area.	<b>NOD</b>	
2015038236	Houston Canal and West Canal Erosion Repair and Road Grading Project Water Resources, Department of Byron--Contra Costa Faults in the levees and dam surrounding the Forebay must be maintained to protect against failures. If the levee breaches along West or Houston Canals, it has the potential to compromise the State Water Project's (SWP) ability to deliver water to millions of Californians; therefore, ensuring its safe and proper functioning is a high priority for the DWR. By restoring several areas of eroded levee along Houston and West Canals to original design, this project will help ensure that the Forebay facilities remain safe and fully operational.	<b>NOE</b>	
2015038237	Fire Preparedness Exercise 2015 Forestry and Fire Protection, Department of Chino Hills--San Bernardino, Los Angeles The Fire Preparedness Exercise (FPE) requires CAL FIRE San Bernardino Unit personnel to demonstrate physical fitness and the safe and effective use of fire suppression tactics in preparation for 2015 peak staffing level. The FPE will be located on land owned by the City of Industry. The total project area is approx. 50 acres; however, not all this area will be impacted by project activities. Approx. 10 acres will receive treatment for this training, 40 acres will remain undisturbed. The FPE will consist of 20 handlines (approx. 6 feet wide) constructed by CAL FIRE Type I hand crews on brush covered hillsides. The crews will utilize chainsaws to cut shrubs, and hand tools to remove surface vegetation exposing bare mineral soil (approx. 2 feet wide). No trees will be cut during these exercises. No burning of the slash will occur. There are no watercourses within the project area. Fire crews will hike on an existing trail prior to beginning the handline construction. Engine crews may conduct progressive hose lays which will not involve the cutting of vegetation and will be done on existing roads and disturbed areas. Fire apparatus shall be operated from existing roads and road shoulders to pump water for the progressive hose lay. No heavy equipment will be operated off existing road surfaces or disturbed road shoulders.	<b>NOE</b>	
2015038238	Pipe Across Creek (Streambed Alteration Agreement No. 1600-2014-0165-R4) Fish & Wildlife #4 --Mariposa CDFW has executed Streambed Alteration Agreement No. 1600-2014-0165-R4, pursuant to Section 1602 of the Fish and Game Code to the Ponderosa Basin Mutual Water Company. The Project includes activities related to the removal and replacement of an existing 4-inch water pipe across the East fork Chowchilla River.	<b>NOE</b>

2015038239	<p>On-Going Fiure Investigation Training: FI-210 Forestry and Fire Protection, Department of --El Dorado CALFIRE and El Dorado Hills Fire Dept. propose to use a 20-acre area (4 parcels) to assist in the annual training of fire prevention officers in the proper procedures to determine the cause and origin of vegetation fires. Approx. 5 acres of vegetation will be treated each year. The project site is in El Dorado Hills, CA east of Sacramento on the south side of State Highway 50 and west of Latrobe Road, at 4680 Golden Foothill Parkway (el Dorado Hills FD, Station 87). Approx. 1/4 of the property is developed containing Station 87 and associated infrastructure. The remaining area is grassland. Prior to burning operations, preparation of the area will consist of hand crew construction of 3 foot wide fire control lines around all identified burn plots. A type 3 fire engine will be present during all burning operations. The topography is generally flat with slopes ranging from 0 to 6% and the area is completely vegetated with grasses. No watercourses exist on or adjacent to the proposed project. No known occurrences or habitat of threatened, rare or endangered species occur in or adjacent to the project area. The training will consist of burning small sections within the control line perimeter over the course of the week long training in late spring/early summer as conditions and schedules permit. This NOE will cover annual on-going fire investigation training for 10 years. The AEU Environmental Coordinator will survey the project area each year prior to training to confirm the presence or absence of threatened and/or endangered species. In 2025 CAL FIRE will re-assess the environmental setting and amend the CEQA file for this project, as appropriate.</p>	<b>NOE</b>

2014071039	<p>6250 Sunset Project Los Angeles, City of Los Angeles, City of--Los Angeles</p> <p>The Project proposes a mixed-use development on an approximately 2.06 acre site located between Sunset Boulevard and Leland Way in the Hollywood community of the City of Los Angeles. The Project Site is currently developed with a building constructed in the late 1930's as the Earl Carroll Theatre (ECT Building) and a surface parking lot with accessory structures. The ECT Building has been used by the Nickelodeon on Sunset Corporation as a sound stage for television productions with associated offices since the early 1980's. The Project would protect and retain the ECT Building and construct a new seven-story, mixed-use building on the western portion of the Project Site. The Project includes approximately 4,700 sf of ground floor commercial space and 200 residential units. Five percent of the residential units are restricted as very-low income. The Project would also provide a pedestrian paseo between the new building and the ECT Building that would link Sunset Boulevard and Leland Way.</p>	<b>EIR</b>	05/11/2015
2014101034	<p>Mandarin and English Dual-Language Immersion Elementary School Project at Mark Twain Middle School Los Angeles Unified School District Los Angeles, City of--Los Angeles</p> <p>Note: Extended review per lead</p> <p>The proposed project includes, but is not limited to, a new classroom building consisting of approximately 15 classrooms, a multi-purpose room, and administrative and support spaces; new food services and lunch shelter facilities; designated elementary and kindergarten play areas; designated student drop-off and parking areas; and modifications to approximately eight existing portable classrooms. The proposed project design will conform with the requirements of the Americans with Disabilities Act, Division of the State Architect (DSA), CEQA, DTSC, and any other required improvements or mitigations to ensure compliance with local, state, and/or federal facilities requirements; and furnishing and equipping with grade-appropriate desks, chairs, and equipment.</p>	<b>EIR</b>	05/18/2015
2015031097	<p>San Bernardino National Forest Project Baldy Mesa OHV Trails and Staging Area Parks and Recreation, Department of --San Bernardino</p> <p>The OHMVR Division proposes to award grant funds to the San Bernardino National Forest, Front County Ranger District and the Southern California Mountains Foundation, for development of a 23-mile 50-inch Off Highway Vehicle (OHV) trail, staging area improvements, and obliteration and restoration of 55 miles of unauthorized trails in the Baldy Mesa OHV Area in San Bernardino County. The project includes new trail construction of four miles and upgrading 19 miles of user-created trail to U.S. Forest Service (USFS) standards. Closed trails would be ripped, seeded, and mulched. The 0.6-acre staging area improvements include k-rails around its perimeter to define its boundaries and contain vehicle to designated areas.</p>	<b>MND</b>	04/24/2015

2015031098	Drought Relief Project North Kern Water Storage District Bakersfield--Kern The Proposed Project includes construction and operation of facilities that would allow the District to accept, convey and use water "produce" from oilfield operations in the Kern Front Field for irrigation and groundwater recharge. Facilities constructed as part of the Proposed Project include a pipeline along with associated infrastructure (including inlets, valves, flowmeters, monitoring stations, and sample ports) that would convey the produced water from a point on an existing pipeline located approximately one mile north of Imperial Street to the District's Rosedale Spreading Ponds for groundwater recharge. The Proposed Project pipeline would total approximately 2.5 miles in length and would be constructed within existing easements and rights-of-way. Additionally, the proposed project includes the delivery of produced water through an existing pipeline into the Lerdo Canal at a point just north of the Cawelo Pump Station B for irrigation purposes.	<b>MND</b>	04/24/2015
2015032084	New Berkeley City College Facility Project Peralta Community College District Berkeley--Alameda The Project would consists of the seismic upgrade and interior renovation of an existing 25,000 sf office building located in downtown Berkeley, CA. The Project would provide classroom and library space for existing Berkeley City College students and a small portion of space for existing faculty and support staff.	<b>MND</b>	04/24/2015
2015032087	General Plan Amendment #14-01 & Rezone #14-01 Patterson, City of Patterson--Stanislaus To Review and consider a proposed General Plan Amendment and Rezone of 2 parcels located at 247 & 249 N. 1st Street from a HI, Heavy Industrial Zone to LR, Low Density Residential zoning. Each parcel contains a 704 sf single family dwelling.	<b>MND</b>	04/24/2015
2015032088	Steindorf K-8 STEAM School Cambrian School District San Jose--Santa Clara The Cambrian School District proposes to reopen the Frank L. Steindorf, Jr. Elementary School, as a K-8 Science, Technology, Engineering, Arts and Math (STEAM) School. The reopened school would have an enrollment of up to 490 students. The school operated as a public school from 1956 through 1975. The school facilities are currently leased to private tenants and are utilized for a variety of uses, including a private preschool and K-6 elementary school, a church, and various educational programs. The baseball diamond on the eastern portion of the site is used by the Cambrian Little League.	<b>MND</b>	04/24/2015
2015032089	Lagoons Slip and Slide (EA: 01-0B420) Caltrans #3 --Humboldt Caltrans proposes permanent restoration of US 101, at PM 110.58 and PM 113.76 in Humboldt County. The project will include restoration and replacement of drainage facilities and installation of erosion control measures. Installation of construction signs warning the traveling public of construction and one-way traffic controlled restrictions will be required throughout construction.	<b>MND</b>	04/27/2015

<b><u>Documents Received on Thursday, March 26, 2015</u></b>			
2006102114	UTC Facility Site Closure Program EIR Santa Clara County San Jose--Santa Clara The Project involves five phases of site closure operations at the 5,200-acre UTC San Jose Facility. The property was historically used to design, manufacture, and test solid fuel rocket motors from 1959 until 2004. Closure operations include the removal of site infrastructure, including buildings, perchlorate remediation in soil and groundwater and installation and operation of a groundwater purification system. The Project as authorized in the ITP will result in temporary impacts to 12.7 acres of California tiger salamander (CTS) ( <i>Ambystoma californiense</i> ) upland refugia habitat. The Project is expected to result in incidental take of CTS which is designated threatened under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of (Amendment) increases the temporary upland habitat impacts by 12 acres resulting in impacts to 24.7 acres of CTS refugia habitat. The Amendment requires corresponding increases to the required Habitat Management (HM) lands by 12 acres, for a total of 27 acres of upland refugia HM lands.	<b>NOD</b>	
2008081019	Cherry Avenue Four-Lane Project Caltrans #6 --Kern This proposed Project involves widening SR 119 to the north of the current alignment entirely within the Caltrans Right of Way (ROW). The widening will allow for the extension of the existing passing lanes in the eastbound direction from PM 10.04 to PM 11.6 and in the westbound direction from PM 12.8 to PM 13.3, as well as shoulder widening to the current safety standard of 8 feet.  The Project will result in permanent impacts to 18.33 acres of San Joaquin antelope squirrel ( <i>Ammospermophilus nelsoni</i> ) and San Joaquin kit fox ( <i>Vulpes macrotis mutica</i> ) habitat. The Project may result in incidental take of San Joaquin antelope squirrel and San Joaquin kit fox, both of which are designated as threatened species under the California Endangered Species Act (CESA). The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.	<b>NOD</b>	
2011042082	El Cerrito Relief Line Project San Mateo, City of San Mateo--San Mateo The project is part of the City of San Mateo's overall sewer line alignment project that will increase in size an existing 18-inch sewer line to a 24-inch sewer line approximately 1200 feet long along El Cerrito Avenue and Tilton Avenue to carry sewage flow from the Town of Hillsborough. The overall project also includes construction of a new 27 or 30-inch sewer pipeline approximately 9000 feet long in a new alignment that will ultimately be discharged into the South Trunk sewer system at Idaho Street and Sunnybrea Boulevard. The project covered under the Lake and Streambed Alteration Agreement Number: 1600-2014-0160-R3, CDFW is executing pursuant to Section 1602 Fish and Game Code, is limited to the new pipe alignment crossing at San Mateo Creek at 800 East 3rd Avenue. The pipeline will be installed at the crossing of San Mateo Creek using Pilot Tube Guided Auger Boring construction methods.	<b>NOD</b>

2011092043	<p>Appian Tank Seismic Upgrade Project Alameda County Water District Fremont, Union City--Alameda</p> <p>This project involves replacement of the existing Appian Tank and auxiliary improvements at the tank site; replacement of the existing water pipeline to the tank; storm drain outfall improvements; access road improvements; and installation of a below-grade electric power line to the tank site. Tank replacement and auxiliary improvements would take place at the existing tank site, while the access road improvements, pipeline replacement, and the new electric power line installation work would take place along the existing access road.</p>	<b>NOD</b>	
	<p>The ITP Amendment 1 constitutes a Minor Amendment to an ITP CDFW issued to Alameda County Water District in connection with the project in August 2013. This Amendment modifies the timing of mitigation required by the original ITP.</p>		
	<p>The project will result in impacts to 4.077 acres of California tiger salamander (<i>Ambystoma californiense</i>) and Alameda whipsnake (<i>Masticophis lateralis euryxanthus</i>) also known as Alameda striped racer (<i>Coluber lateralis euryxanthus</i>) (collectively, the Covered Species) habitat including temporary impacts to 4.07 acres; the Project will permanently remove 0.007 acres of Covered Species habitat. The project is expected to result in incidental take of Covered Species, which are designated as a threatened species under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.</p>		
2012122068	<p>State Route 193 Curve Improvement Caltrans #3 Lincoln--Placer</p> <p>The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0221-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, California Department of Transportation.</p>	<b>NOD</b>	
	<p>The project proposes curve and super-elevation improvements which will also include shoulder widening along a one mile stretch of State Route 193 in Placer County from PM 4.4 to 5.4. Starting at the western extent of the project, PM 4.4, the new roadway will tie into the existing road approximately 405 feet west of Clark Tunnel Rd. As the proposed new alignment of SR 193 proceeds east, the new centerline is shifted to the south of the existing roadway, flattening out the first curve encountered east of Clark Tunnel Rd. At approximately 100 feet east of Clark Tunnel, the existing road curves sharply north. At this curve point the proposed new alignment will be shifted north, eliminating the sharp curve, continue east at a broad radius, crossing back over the existing roadway at approximately PM 5.04. Next, the new proposed road continues at a straighter alignment approximately 150 feet north of the existing roadway before crossing back over the existing roadway at PM 5.26. This portion of new alignment will straighten out a large curve that extends from PM 5.04 to PM 5.26. At PM 5.26, the new alignment will be shifted approximately 60 feet to the south and finally tie back into the existing roadway at Mandarin Hill Road (PM 5.44).</p>

2013112018	<p>Colvert Installation Caltrans #3 Placerville--El Dorado The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0298-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, California Department of Transportation.</p> <p>The project will install 394 linear feet (LF) of reinforced concrete pipe (RCP), three new drainage inlets (DI's), and construct new asphalt curb and gutters to direct water flow. All work will be performed within Caltrans existing right-of-way. The RCP inlet will be at the southern extent of the project area where water will be directed into a 30" RCP that will pass through one DI. At this DI the RCP will increase to a 29" by 45" oval RCP that will then pass through the second DI and terminate at the third DI. The DIs will also tie in three cross culverts that cross under the highway, carrying runoff from west to east. Asphalt gutter will be placed from the highway shoulder over the new RCP.</p>	<b>NOD</b>	
2014061039	<p>Renewable Energy General Plan Amendment Inyo County --Inyo An update to the Inyo County General Plan is proposed to address renewable solar energy development. As part of this update, Solar Energy Development Areas (SEDA) are proposed where renewable energy solar projects may be developed, based on the Program Environmental Impact Report (PEIR) prepared for the General Plan Amendment, and based upon future site specific studies, additional environmental review, and permitting pursuant to the County's Renewable Energy Ordinance Title 21, and other applicable State, federal, and local laws. Other updates proposed for the General Plan include: capping solar development in each SEDA based on megawatts and corresponding acreages; identifying and defining appropriate scales and sizes of solar facility development; providing that social, cultural, visual, economic, and environmental impacts are minimized; requiring reclamation at the termination of solar facilities; minimizing water consumption; working to protect military readiness; and; discouraging conversions of lands utilized for agriculture, mining, and recreation.</p>	<b>NOD</b>	
2014102037	<p>Greenwood Avenue Culvert Replacement Project Napa County Calistoga--Napa The Project includes removing a failed culvert crossing, installing a roughened channel fish passage structure, enhancing riparian vegetation, and installing California freshwater shrimp habitat structures.</p> <p>The Project will result in impacts to California freshwater shrimp habitat including temporary impacts to 9,000 square feet; the Project will permanently remove 17 linear feet of California freshwater shrimp habitat. The Project is expected to result in incidental take of California freshwater shrimp, which is designate as an endangered species under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.</p>	<b>NOD</b>

2014112022	Waiver of Waste Discharge Requirements for Small Food Processors, Wineries, & Related Ag. Processors Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento --Sacramento A Waiver of Waste Discharge Requirements for certain wastewater and residual solids discharges to land from small food processing operations, small wineries, and certain agricultural processing operations. A discharger regulated by the waiver could discharge of up to 1,000,000 gallons of process wastewater per year to irrigate crops or landscaped areas. The waiver would also regulate the use of the associated residual solids as a soil amendment on cropped or landscaped areas. The Waiver renews a prior waiver and expands its applicably to a maximum allowable discharge of 1,000,000 gallons of wastewater per year.	<b>NOD</b>	
2014121015	Westgate Residential Project - Case No. 2014-69 Westminster, City of Westminster--Orange The proposed project involves a Tentative Tract Map (TTM) to allow for the assemblage and subsequent subdivision of five parcels currently developed with an industrial use, a church, and residential dwelling units, totaling 7.17 acres located at 14260, 14292, 14302, and 14362 Willow Lane and 6411 Maple Avenue into 15 residential lots and one lot for a proposed neighborhood park. The existing on-site structures would be removed and the proposed development would consist of 79 new single-family detached cluster homes within a gated community with private streets and landscaping. The residential units are variable in dimension by plan type, with a density of 13.10 units per acre. The development would require a General Plan Amendment from Public/Semi-Public (14362 Willow Lane) and Industrial (6411 Maple Avenue) to Residential-Medium and a Zone change from R-1 and M-1 to R-3-PD to permit the proposed density of 13.10 units per acre. The project would also construct an on-site storm drain system that would convey water to the southeastern portion of the project site, into a new 36-inch storm drain that would be constructed in the right-of-way associated with Maple Avenue and into Industrial Way (to the south), where the new storm drain would then connect into the existing 64-inch storm drain pipe (point of connection) located in Edwards Street. The project site is listed on a list of hazardous materials sites (by the State Water Resources Control Board) complied pursuant to Government Code Section 65962.5.	<b>NOD</b>	
2015012055	Gans Subdivision Fortuna, City of Fortuna--Humboldt Subdivision of a 10.39 acre parcel into four parcels: Parcel 1 - 2.53 acres (vacant); Parcel 2 - 2.0 acres (vacant); Parcel 3 - 4.68 acres (developed with a single family residence); Parcel 4 - 1.18 acres.	<b>NOD</b>

	<p>Declaration), the Mariposa County Board of Supervisors, on March 24, 2015, approved an Agreement regarding the Disposal and Use of Material from the Ferguson Project for landfill daily cover material. The Mariposa County Board of Supervisors adopted findings pursuant to Public Resources Code Section 21166 and Guidelines Section 15162, determining that no subsequent environmental review was required to approve the above referenced agreement regarding importation and processing of soil cover material. The below numbered determinations describe the CEQA compliance conducted as part of the Local Enforcement Agency's (Mariposa County Health Department's) issuance of the Solid Waste Facility Permit, SWIS No. 22-44-0001 on February 29, 2000. The below numbered determinations also describes the CEQA compliance considered as part of the California Integrated Waste Management Board's (CIWMB) concurrence of the Solid Waste Facility Permit on February 25, 2000. The Notice of Determination filed as part of the permit issuance (approval) is attached and incorporated by this reference.</p>		
2000031092	<p>Santa Barbara Flood Control Maintenance Activities in the Goleta Slough Santa Barbara County Flood Control District Goleta, Santa Barbara--Santa Barbara</p> <p>CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (# 1600-2014-0237-R5) to the Project applicant, Seth Shank of the Santa Barbara County Flood Control District. The District routinely assesses conditions within each of the creeks to determine if desilting is necessary to fulfill the program objectives of increasing biological function of the system and protecting public and private land interests. The Tecolotito and Los Cerneros Creek Basins are typically desilted utilizing and the material is stockpiled and dewatered prior to beach replenishment or upland disposal. Atascadero, San Jose, and San Pedro creeks are primarily hydraulically desilted; however they may also be proposed for draglining if conditions are appropriate for implementation. During hydraulic desilting of Atascadero, San Pedro and San Jose creeks, sediment removed is directly discharged to Goleta Beach for beach replenishment.</p>	<b>NOD</b>	
2001031043	<p>San Antonio Creek Crossing Repair Santa Barbara County Flood Control District Santa Barbara--Santa Barbara</p> <p>CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (# 1600-2013-0290-R5) to the Project applicant, Seth Shank of the Santa Barbara County Flood Control District. The Permittee proposes to maintain the debris basins to prevent flooding, to collect debris and sediments, and maintain capacity with two methods. One method, where capacity is not at 25% full, the Permittee proposes to routinely clean sediments and vegetation within 10 feet of the toe of the dam, the entire dam face, the outlet structure, and a 15 foot wide low flow pilot channel through the basin, from the upstream end, and expanding to 30 feet wide, approximately 30 feet above the outlet structure. The remaining vegetation shall be left to provide habitat for wildlife. When basin capacity reaches or exceeds 25% full, or after a large wildland fire, the Permittee may clean out the basins to their original size. Vegetation above the high sediment level shall remain on the banks to prevent erosion and to provide a seed bed for colonization of native species. Native seeds shall be cast on the banks of the newly exposed banks to protect from erosion of eth slopes. Some of the basins were designed to be removed after the threat of the wildland fires passed. These basins maybe modified to allow for fish passage.</p>	<b>NOD</b>

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Friday, March 27, 2015</u></b>			
	Any and all modifications will require an amendment to this Agreement and final approval by CDFW.		
2002041066	V & J Sand Mine Reclamation Plan Lompoc, City of Lompoc--Santa Barbara The proposed improvements consist of rehabilitating the roadway, bike lanes, medians, consolidated curb cuts, enhanced bus stops, separated sidewalks, landscaping and streetscape, ADA compliant improvements and transit access. The project also includes a new traffic signal at Landis Avenue, traffic signal modifications at Grant Avenue and Engle Road, and installation of curb, gutter, and sidewalk on the south side of Grant Avenue from the Fair Oaks Boulevard intersection to 900 feet west of Fair Oaks Boulevard.	<b>NOD</b>	
2003101065	Esalen Institute Monterey County --Monterey The California Department of Fish and Wildlife (CDFW) has executed Streambed Alteration Agreement number 1600-2014-0224-R4, pursuant to section of the Fish and Game Code to the project Applicant, Esalen Institute.  The Project includes activities related to replacing an existing footbridge with a new, slightly larger bridge that will accommodate golf carts and emergency vehicles as well as pedestrians.	<b>NOD</b>	
2004072056	Big Lagoon Park Company Humboldt County --Humboldt The project involves the re-approval of a General Plan Amendment to the Humboldt County General Plan-North Coast Area Plan (NCAP) and a Zone Reclassification of an approximately 13-acre undeveloped parcel. The GPA/ZR will redesignate and rezone the existing cleared area to allow the relocation of 14 residential cabins, and will redesignate and rezone the surrounding forested area as timberland. The GPA/ZR will result in approximately 4.8 acres of being planned and zoned Residential Estates and Residential Single Family, with the remaining 8.2 acres being planned and zoned Coastal Commercial Timber and Commercial Timber. The reconfiguration of the boundary between Commercial Timberland (TC) and Residential Estates (RE) plan designation results in a net shift of approximately 2.4 acres from RE to TC. To ensure the zoning is consistent with the land use designations, the ZR proposes to align the zone boundaries between Commercial Timber (TC) and Residential Single Family (RS) to coincide with the relocation of the land use designation boundaries. The existing combining zones specifying Design Review (D) and that No Further Subdivision [is] Allowed (X) will also be adjusted. The ZR proposes to add the Planned Unit Development (P) combining zone to the principal Residential Single Family zoning district, and will result in a zoning of RS-X-D-P for the cleared portion of the property. The surrounding forested area will be zoned TC with a Design Review combining zone (TC-D). Further, the GPA amendment proposes to shift the existing location of the urban limit line to run coincident with the new RE designated area on the parcel to maintain consistency with the NCAP. The applicant is not proposing an increase in the total number of cabins, nor is an increase allowed. The GPA/ZR will become effective upon certification by the California Coastal Commission.	<b>NOD</b>

**Documents Received on Friday, March 27, 2015**

2015032026	Jean Sweeney Open Space Park Alameda, City of Alameda--Alameda The project will construct a bicycle and pedestrian trail as an off street Class 1 trail through the Jean Sweeney Open Space Park and a Class III bikeway facility along Atlantic Avenue between Construction Way and Webster Street.	<b>NOD</b>	
------------	---	------------	--

2015039021	California High School Athletic Complex Modernization Project (Ref SCH # 2011128147) Los Angeles County --Los Angeles The Department of Toxic Substances Control (DTSC) approved a Removal Action Workplan (RAW) for a portion of the California High School Athletic Complex Modernization Project (Project) pursuant to Health & Safety Code, Division 20, Chapter 6.8 as submitted by Leighton Consulting, Inc. (Leighton) on behalf of the Whittier Union High School District (District). The RAW, consists of a removal action (RA) to address elevated levels of arsenic in soil within the removal action area portion of the Project (referred to as Area B or the Site). The RAW evaluated RA alternatives and identified a preferred RA based on comparative analysis of alternatives. The preferred RA alternative proposed for the Site includes soil excavation to address arsenic-impacted soil in select areas of the site. DTSC is overseeing investigation and cleanup at the Site under a School Cleanup Agreement (SCA) (Docket No. HSA-SCA 13/14-036) with the District.	<b>NOD</b>	
------------	--	------------	--

The District prepared an Initial Study (IS) and a Mitigated Negative Declaration (MND) and filed a Notice of Determination (NOD) with the County of Los Angeles on July 6, 2013 for the larger school modernization Project. The project description for the Project proposed removal of the existing 5000-seat capacity stadium, turf football field and track, and construction of a 7,000-seat capacity stadium with artificial-turf field and track. It also included reconfiguration of the existing baseball and softball fields, improvement of various outdoor athletic facilities, disturbance of 26 acres and the addition of 2.98 acres of additional impervious surface.

Since approval of the MND, additional investigations by DTSC clarified the extent of removal actions that would be required to address elevated levels of arsenic in soil within Area B that was discussed in the MND. The RAW remedial activities will consist of excavation and disposal of approximately 730 cubic yards (912.5 cubic yards with fluff factor) or 1,131.5 tons of soil from five areas of concern (AOCs) at the site. This includes a 10% contingency for any confirmation sample locations requiring further dig.

Approximately 2.7 acres (Area B) within the Modernization Project 20.98 acres is subject of this RA. The estimated number of truckloads is 57 (20-ton) trucks. Soil excavation activities will take approximately 10 days to complete.

DTSC finds that only minor technical changes or additions to the previously approved MND are necessary to incorporate the activities proposed in the RAW, and that an Addendum to the MND for the larger school Modernization Project is the appropriate document to prepare to fulfill the requirements of the California Environmental Quality Act (CEQA).

	West Ocean Boulevard as well as a dog and fitness park on the southwest corner of the project site.		
2015032094	North American Wetlands Conservation Act 3 - Lower Putah Creek Floodplain Restoration Solano County Water Agency Winters--Solano, Yolo The purpose of the project is to improve fish and wildlife habitat in Lower Putah Creek, primarily by restoring natural form and function to the creek's channel and floodplain. The project will grade the existing floodplain to a 1-2 percent slope, starting from approximately 2 feet above low-flow water surface elevation. The project will also fill and narrow over-widened segments of the low-flow channel, and fill a branch of the braided low-flow channel that is undercutting an embankment. Invasive weeds within the project area will be controlled, and native vegetation will be installed throughout the recontoured floodplain. A side channel and spawning gravel will also be installed.	<b>MND</b>	04/28/2015
2015032099	Douglas Road and Grant Line Road Intersection Improvements Project Rancho Cordova, City of Rancho Cordova--Sacramento The City of Rancho Cordova Public Works Department proposes to install a new traffic signal at the intersection of Douglas Road and Grant Line Road. The project will also include widening of Douglas Road and Grant Line Road approaching the intersection to accommodate left-turn and right-turn pockets and bicycle lanes. The project will require minor right-of-way acquisition for the widening of Douglas Road.	<b>MND</b>	04/28/2015
2015032100	West End Parking Lot (Kings Beach Commercial Core Improvement Project) (PLN14-00092) Placer County --Placer The project proposes a Minor Use Permit and Variance to develop the 21,875 sf parcel for the use as a 29-space public parking lot and a Design Review for the site design of the parking lot.	<b>MND</b>	04/28/2015
2015032101	05600D Residences Fremont, City of Fremont--Alameda Design Review and a Vesting Tentative Tract Map for 93 residential condominiums on a 1.6 acre site at 42111 + 42183 05600D Road in the too transit oriented development overlay district. The density would be 58 du/ac. The units would be contained in one building above a parking garage.	<b>MND</b>	04/28/2015
2015031105	Agua Caliente Elementary School Palm Springs Unified School District Cathedral City--Riverside The project involves the phased relocation of existing Agua Caliente Elementary School (ACES) campus facilities. The PSUSD also proposes to add up to 120 students and associated faculty for a Pre-Kindergarten level at the ACES campus. The project would construct up to 82,544 sf of building space throughout six new facilities, a playground, fields, hardcourts, and parking and bus drop-off access. Construction of the new campus facilities and demolition of the existing campus facilities would occur concurrently on the ACES campus throughout an 18-month phased development. The ACES campus would remain in operation and would incrementally vacate and relocate students and faculty into the new buildings. The	<b>NOP</b>	04/28/2015

	PSUSD anticipates that all ACES operations would be moved into the new campus facilities by 2018.		
2015031107	LBA Realty Eastvale Industrial Development EIR Eastvale, City of Eastvale--Riverside The project involves construction and operation of a new 446,173 SF industrial warehouse building, parking and infrastructure on APN 160-020-033 (23.5 acres) and construction of road improvements to allow overflow truck parking and secondary access to the north (via easements with Southern California Edison and the neighboring property owner to the north on portions of APNs 156-020 and 160-020-033). The project will modify existing Riverside County Flood Control facilities located along the eastern and southern boundary. The existing open channel will be relocated and covered. An existing detention basin would be relocated to a portion of APN 160-020-023 generally at generally located at the southeast corner of the site. Project improvements would be required to allow shared truck access with the adjacent warehouse facility to the west.	<b>NOP</b>	04/28/2015
2015031102	Public Works - Old Creek Road Culvert Replacement Project; ED14-109 (40106181) San Luis Obispo County --San Luis Obispo The San Luis Obispo County Public Works Department proposes to remove and replace 53 feet of corroded 36" corrugated metal pipe (CMP) with a smooth lined 48" high density polyethylene (HDPE) culvert. The project site is located on Old Creek Road P.M. 6.334, in the North County Planning Area Rock wing-walls on the inlet and outlet, which have no vegetation in them, will be removed and the asphalt section of the road will be excavated to remove the old CMP. After the CMP is remove the trench will need to be enlarged by excavating the existing road base. When the trench is large enough the County will install 53 feet of 48" HDPE, pack the sides and top with road base and tamp it down. The County will then form the wing-walls with the rocks that are present. The County will not change the amount of rock that is currently in place at the wing-walls, so the finished foot print will be the same. No removal of trimming of vegetation would be required to replace the culvert. The majority of the construction will be on the road. Project staging will occur within the existing County Right-of-Way.	<b>Neg</b>	04/28/2015
2015031104	Annexation No. 84 and Prezone to M-1 Tehachapi, City of Tehachapi--Kern A request to annex two parcels totaling 4.2 acres into the City limits and a prezone of M-1. The northern most parcel identified as APN 223-190-02 supports a single family residential structure that has been adaptively reused for commercial purposes along with temporary metal storage containers. The southernmost parcel identified as APN 223-190-18 supports two occupiable single family residential structures, a non-habitable single family residential structure and a barn.	<b>Neg</b>	04/28/2015

A Specific Plan, General Plan Amendment, Zoning and a Development Agreement was approved to guide the development of project.	<b>NOD</b>	
2007101055	Sweetwater Authority Brackish Groundwater Desalination Project Sweetwater Authority Chula Vista--San Diego On March 25, 2015, Sweetwater Authority ("Authority") adopted an Addendum to the Final Environmental Impact Report ("Final EIR") for the Richard A. Reynolds Desalination Facility Expansion Phase 2 Project ("Project"). The Project consists of the expansion of the existing Richard A. Reynolds Desalination Facility to increase the desalinated potable water production from its current 5 million gallons per day (mgd) capacity to 10 mgd. Increasing potable water production of the desalination facility would help the Authority reduce reliance on imported water and improve the reliability of water supplied to the local communities. The Project consists of the construction of additional water treatment facilities and five new groundwater wells with associated conveyance pipelines to accommodate the new wells as Phase 2 of an effort that began with the Phase I Lower Sweetwater River Basin Groundwater Demineralization Project EIR (March 13, 1996). All activities approved as part of the Project are consistent with, and were fully analyzed in, the Final EIR for the Project (SCH #2007101055) certified by the Authority on February 24, 2010, and Findings and Facts in support of Findings for the Project were adopted by the Authority on November 10, 2010.	<b>NOD</b>

2012052073	Joerger Ranch Specific Plan Truckee, City of Truckee--Nevada Proposed project is a specific plan that would establish zoning districts to facilitate a mixed use commercial/industrial project with a multi-family residential component. At build out, the project may accommodate up to 97 residential housing units and approximately 460,000 sf of commercial and industrial uses.	<b>NOD</b>	
2014022022	Graham Hill Road Bridge Storm Damage Repair Project Santa Cruz County --Santa Cruz The repair work will consist of removing the existing wing wall and pouring a new concrete wing wall in the same location. The new wing wall will be doweled into the face of the existing bridge abutment to help provide bearing support for the bridge. Rock slope protection (RSP) will be installed around the new wing wall. A drain will be installed at the edge of the sidewalk, leading to a culvert along the edge of the new RSP, with an outfall at the bottom of the RSP. The portion of the sidewalk that has been undercut will be replaced. The County will also install RSP at the base of the pier in the channel to prevent further scour. Equipment may access the site from an existing construction staging yard on the north side of Channel 1. Prior to construction, a path will be cleared across the riparian woodland and Channel 1 wide enough to allow equipment access to the wing wall. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2014-0135-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Todd Sexauer, Santa Cruz County Department of Public Works.	<b>NOD</b>	
2014062083	Lake Earl Congregation of Jehovah's Witnesses - UP1410 - Use Permit for Quasi-Public Use (Church) Del Norte County --Del Norte The construction of an approximately 3,680 sq. ft. church. The church will seat approximately 180 persons. It is anticipated that one large weekend service will be held weekly with smaller group meetings during the week. As conditions of approval various requirements must be provided for including providing for adequate onsite parking, defined hours of operation, traffic improvements along Lake Earl Drive (including a deceleration and turn lane into the project area). Optional project features include landscaping which the applicants have indicated will be provided. Zoning in the project area is R1A-MFH.	<b>NOD</b>	
2014112025	Pinole Creek Fish Passage Improvement Project Contra Costa Resource Conservation District Pinole--Contra Costa The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0415-RX, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Contra Costa Resource Conservation District.  The Project is limited to the construction of a 184 linear foot fish-way notch through a previously existing 36 linear foot inlet apron within the upper 148 linear feet of an existing western, culvert bay. The fish-way notch will form and install approximately 13 angled concrete baffles. A 34 linear foot concrete training wall will be installed on the upstream apron and a 30 linear foot retaining wall will be installed on the downstream apron. A notched sill will also be installed on the	<b>NOD</b>
