STATE CLEARINGHOUSE

NEWSLETTER

May 16-31, 2008

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **May 16-31, 2008**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: February 13, 2007
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, Senior Planner
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner
916-445-0613
scott.morgan@opr.ca.gov .

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2007**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

2006071109	<p>Arboretum Specific Plan Fontana, City of Fontana--San Bernardino</p> <p>The proposed Arboretum Specific Plan proposes the development of the site with as many as 3,526 residential units within 4 villages, an 8.8-acre Commercial Activity Center with 95,832 square feet of commercial retail and office uses, a regional arboretum, scattered parks, an elementary school, and a combined elementary-middle school. Proposed developments on the project site would be accompanied by on-site roadway, water, sewer, power, gas, telephone and cable line extensions and improvements.</p>	EIR	06/30/2008
2007062106	<p>City of Fortuna General Plan Update Program EIR Fortuna, City of Rio Dell--Humboldt</p> <p>The City of Fortuna is updating the City's General Plan. The proposed update will make changes to the goals, policies, programs of the following elements in the City of Fortuna General Plan: Land Use, Economic Development, Community Character/Design, Transportation and Circulation, Natural and Cultural Resources, Parks and Recreation, Open Space and Visual Resources, Public Facilities and Services, Public Health and Safety. The General Plan update will also result in an updated land use diagram, which includes three annexation areas. A Mill District Area Plan is also included in the General Plan Update. The General Plan also includes the addition of two mixed use areas, the Mill District and Riverwalk area.</p>	EIR	06/30/2008
2007092005	<p>39th and Adeline Mixed-Use Project Emeryville, City of Emeryville, Oakland--Alameda</p> <p>NOTE: Co-Lead Agencies: City of Emeryville and City of Oakland.</p> <p>The project is the redevelopment of a 1.12-acre site located along Adeline Street between Yerba Buena Avenue and 39th Street, consisting of five parcels. The site straddles the City of Oakland/City of Emeryville border, with the western three-quarters of the site located in the City of Emeryville. The proposed project would result in the demolition of an existing structure on the site and the development of four interconnected three-story (plus mezzanine) buildings. In total, the development would consist of 101 residential rental units (including studios, one- to three-bedroom units, live/work spaces, and work/live spaces), 1,000 square feet of retail space located at the corner of Adeline Street and 39th Street, and 119 parking spaces. All parking, except for the on-street parking, would be located in a below-grade parking structure. In addition, the project would include a landscaped courtyard located in the interior of the site.</p>	EIR	06/30/2008

2008012005	Sutro Tower Digital Television Project San Francisco, City and County of San Francisco--San Francisco The project site is in the Midtown Terrace area of the Twin Peaks neighborhood. The proposed project would involve conversion of the television antennas on Sutro Tower from the current combination of analog and digital to an all-digital system, in compliance with a Federal Communications Commission mandate effective 2009. Project components would include: (1) replacement of the nine existing analog main antennas at the top of Sutro Tower with no more than five digital antennas at the same location; (2) structural upgrades to the tower to enable the tower to meet Building Code wind resistance requirements for an "essential facility" and to accommodate the placement of new digital television equipment on the tower; (3) removal of four digital main television antennas between Levels 5 and 6 of Sutro Tower; (4) removal of nine analog auxiliary television antennas on Level 2 and installation of two digital auxiliary antennas extending between Levels 3 and 4 and one digital auxiliary antenna at Level 2; (5) alteration, replacement, or addition of small ancillary and accessory antennas and equipment associated with the operation of Sutro Tower broadcasters; and (6) addition of auxiliary equipment, and electrical, elevator, and public safety improvements associated with the proposed project. The project would result in an overall net reduction of approximately 14 television antennas, from 22 to 8 antennas. There would be no expansion of the tower itself or the ancillary buildings at the base of the tower.	EIR	06/30/2008

	residential building containing 2 dwelling units, providing 3 parking spaces per unit, and rooftop deck; a Zoning Administrator's Adjustment to permit the building to observe a reduced ~4-1/2' side yard setback in lieu of the 5' otherwise required; to permit parking in the front yard setback along Woodlawn Ave. in lieu of observing the 19' prevailing setback otherwise required; and a Zoning Administrator's Determination to permit a 6' in height wall and fence within the required front yard setback in lieu of the maximum 3-1/2' otherwise permitted. All existing structures and landscaping will be removed, including a 10" diameter avocado tree, and ~100 cubic yards of dirt will be exported from the site.		
2008051072	Green Valley Enterprises General Plan Amendment and Zone Change, GPZ-2004-001, PD-2008-015 Santa Maria, City of Santa Maria--Santa Barbara An amendment to the General Plan (Land Use) from 2.28 acres of GI to 2.28 acres of HDR. A zone change from 2.28 acres of PD/M-2 to 2.28 acres of PD/R-3. A Planned Development Permit is being reviewed concurrently with the General Plan Amendment and Zone Change for the construction of the thirty-six, 2-story, affordable apartment units.	MND	06/16/2008
2008051073	Stetson Crossing Specific Plan Hemet, City of Hemet--Riverside The Stetson Crossing Specific Plan proposes a community-scale center, including a mix of commercial, restaurant, and support retail and service facilities complete with landscaping and onsite parking. The proposed project includes up to 190,000 sf of building area with 24% building coverage on a 17.41 acre parcel. The center would be anchored by one major retail pad and several secondary pads for smaller retail tenants. The project as proposed includes a convenience store, which includes a gas station and drive-thru car wash, major anchor tenants, specialty shops, commercial activities, automotive uses, and restaurants. The project as proposed will be similar in design (aesthetics/architecture) to the Page Community Plaza located across from the project site south of Stetson Avenue.	MND	06/16/2008
2008051075	General Plan Amendment/Zone Change 08-0612, Annexation No. 611 Bakersfield, City of Bakersfield--Kern A concurrent General Plan Amendment/Zone Change/Annexation. The General Plan Amendment from UER to MUC (Mixed Use Commercial), Zone Change from A to C-O (Professional and Administrative Office Zone) of the same 6.2 acre site. The proposal also includes the annexation of the site to the City of Bakersfield.	MND	06/17/2008
2008052063	Project #07-047 - Trinity Sierra Properties Sutter County Community Services District Yuba City--Sutter Request to rezone the subject 5-acre property from M-1 (Light Industrial) District to C-M (Commercial-Industrial) District to allow for the sale of truck and recreational vehicle accessories. Design Review for a proposed 20,000 sf building to provide sales area, office, shop, and storage area for the proposed business. An existing 3,000 sf building will be retained for the proposed use. 2008052064	CUP2006-0020 - Di Riordano Yuba County --Yuba The project is a conditional use permit to allow for the development of a motocross training and competition facility on a 28.64 acre site. The project proposes development in two phases. Phase one would allow for the use of the site during daylight hours between 9:00 am and 5:00 pm and overnight dry camping on Fridays and Saturdays coinciding with competition events. Phase two would allow for the addition of a lighting system and hours would be extended to 9:00 pm and would allow competition events until 10:00 pm on Fridays and Saturdays.	MND	06/16/2008
2008052068	Solar Photovoltaic Project - Del Valle Water Treatment Plant Zone 7 Water Agency Livermore--Alameda The project is intended to provide cost saving and environmentally preferable solar energy for Zone 7's Del Valle Water Treatment Plant (D VWTP). At its peak output, the photovoltaic system will supply 300 kW (AC) at DVWTP (approximately 54% of the total energy need for this facility). Zone 7 would continue to purchase traditional energy from PG&E to supplement the solar power which is not available during non-daylight hours. Construction of this system would occur entirely within the DVWTP facility, on a currently unused 2-acre area.	MND	06/16/2008
2008052070	Brentwood Civic Center Brentwood, City of Brentwood--Contra Costa The project would include the demolition of all existing on-site structures and the construction of a 7,200 square foot Council Chambers building, a 55,000 square foot City Hall, a 32,000 square foot Community Center, and a 2.5-level parking garage with approximately 280 parking spaces. The project would include the approval of amendments to the General Plan and Downtown Specific Plan to allow development within areas currently designated City Park, as well as adjacent roadways and parking lots. In addition, a new district zone would be added to the Downtown Specific Plan, as well as adjacent roadways and parking lots. In addition, a new district zone would be added to the Downtown Specific Plan specifically for the 5.49-acre site to facilitate the construction of the new Civic Center complex in the proposed form and configuration.	MND	06/16/2008
2008052071	2008-020 CEQA Review of Grading Plan for SR 4 Bypass Overburden Disposal Site for Teichert Construction Calaveras County Angels Camp--Calaveras The applicant is requesting approval by Public Works of a Grading Plan for the disposal of approximately 270,000 cubic yards of excess material to be produced from the construction of the SR 4 Bypass. The SR 4 Bypass Project was the subject of a previous and separate CEQA review conducted by Caltrans. The action to be taken by the Planning Commission is the possible adoption of a CEQA Mitigated Negative Declaration for the Grading Plan for the overburden disposal site on private lands under the jurisdiction of the County. The overburden disposal pile will achieve a height that varies locally from 0 feet to 52 feet above original ground surface and will be constructed at a 2:1 maximum slope at finished grade. Where existing natural slopes are steeper 5:1, "keyways" shall be excavated into the natural ground surface prior to placement of fill materials. Fill areas will be seeded, fertilized and mulched between September 15 and October 15. Best Management Practices will be implemented to control erosion. The	MND	06/16/2008

	project will file a Notice of Intent to comply with the NPDES Stormwater Discharge Permit for Construction Activities and provide a Storm Water Pollution Prevention Plan. Preconstruction surveys will be conducted for nesting raptors, passerines, and non-passerine land birds for any work commencing between February 1 and August 31. The property is located on the north slope of Bald Hill, about 0.6 mile northeasterly of the intersection of SR 49 and Murphys Grade Road north of the City of Angels Camp and within the City of Angels Camp sphere of influence.		
2008052072	Nickel Vineyard - Vineyard Conversion #P07-00662-ECPA Napa County St. Helena--Napa The project includes earthmoving activities, and the installation and maintenance of erosion control measures associated with the construction of 17.8 gross acres of new vineyard (13.5 net acres) within a 77.9 acre holding. The project proposes the installation of vineyard within 8 blocks with topography ranging from gentle to moderately sloping (slopes typically 6% to 30%, averaging 19.5%) grassland, oak woodland, and chaparral at elevations between ~320 and 585' above mean sea level.	MND	06/16/2008
2008052074	Murdoch Townhomes Oakdale, City of Oakdale--Stanislaus Rezone 07-160-03; Planned Development 07-140-02; and Tentative Subdivision Map 07-200-01. A request to rezone 3.16 acres of 12.05 acre site from General Commercial (C-2) District to Medium-Density Residential (MDR). The remaining 8.89+/- acres are already developed with general commercial uses (C-2) and will not change. Development to a Planned Development 07-140-02 and Tentative Subdivision Map Application to create 29 lots for single-family residential uses ranging in size from 2,800+/- sf to 3,843+/- sf.	MND	06/16/2008
2008052076	GreenVolts Utility-Scale Solar Field Alameda County Byron--Alameda, Contra Costa, San Joaquin The intent of the project is to provide 2 MW of renewable power to Pacific Gas & Electric (PG&E) to meet the State of California mandated Renewable Portfolio Standard (RPS) per California Public Utilities Code, Section 399.11. The project site was chosen for its proximity to the Western Area Power Administration Tracy Substation across Kelso Road to the northwest. The applicant proposes to utilize high concentration photovoltaic (HCPV) technology to generate electricity.	MND	06/17/2008
2008051069	University of La Verne Campus West Athletic Fields La Verne, City of La Verne--Los Angeles The Project is a proposal by University of La Verne (ULV) to develop and operate an athletic complex that would consist of approximately 740,000 square feet of athletic fields, tennis courts, parking and road, and would comprise approximately 17 acres. ULV proposes to develop the Campus West project in three phases: Phase One consists of a baseball stadium with a 400 foot outfield; grandstand seating; warm-up area; a building facility that will include restrooms and concessions; and approximately 105 temporary parking stalls. Phase Two consists of a multi-purpose field including 127 parking spaces; a softball stadium with a 300 foot outfield and 87 parking spaces; tennis courts with a building for restrooms and storage with 83 parking spaces; to be completed by	NOP	06/16/2008

	2020. Phase Three consists of a football/track stadium with additional parking spaces; a gymnasium; and the extension of Wheeler Avenue to Arrow Highway.		
2008051074	Valley Region Elementary School #13 Los Angeles Unified School District --Los Angeles The proposed project would provide 38 classrooms for kindergarten through fifth grade students. The proposed facilities would consist of two main structures, each two stories (approximately 34 feet in height), which would encompass approximately 73,000 square feet of building area. In addition, the Proposed Project includes a multipurpose room, 86 surface parking spaces for faculty and staff, a library, administrative areas, food services (including a lunch shelter) and playfields.	NOP	06/16/2008
2008052065	2620 Augustine Drive Development Project Santa Clara, City of Santa Clara--Santa Clara The office component will be in six towers located along the southern, western, and northern boundaries of the project site. The northern half of the site will have two 12-story towers, one eight-story tower, and two 96,000 square foot, 5.5 story parking garages. The southern half of the project site will have two 12-story towers and an eight story tower. The parking garages will, however, be smaller. The southern half of the project site will have one 68,000 square foot and one 86,000 square foot parking structure, both of which will be six stories. The southern half of the site will also have 30,000 square feet of retail space located within the towers.	NOP	06/16/2008
2008052067	I-80 Eastbound Cordelia Truck Scales Relocation Project Caltrans #4 Fairfield--Solano The Eastbound Cordelia Truck Scales facility would be reconstructed approximately 2,500 feet to the east of their present location in a large oval configuration. The new facility would be a Class B Commercial Vehicle Enforcement facility (CVEF) (with Class B being defined as an independent command facility of the CHP located along a major highway route) which will have the capacity to inspect all eastbound I-80 trucks passing the facility 24 hours per day, 7 days a week. The facility would contain up to four sets of scales to accommodate two lines of empty and loaded trucks. The new facility would contain four inspection bays, parking for up to 22 semi-truck trailer combinations, 49 automobile parking spaces, and a roadway along the outer edge of the oval to allow weighted trucks to be driven around into the inspection bay or to be reweighed. A single-story operations building would be constructed to facilitate the vehicle inspection and weighing process.	NOP	06/16/2008
2008052069	65th Street Station Area Project Sacramento, City of Sacramento--Sacramento The project analyzes three scenarios for roadway, bicycle, pedestrian, and transit improvements within the 65th Street Station Area. These circulation improvements would support existing and planned land uses in the area.	NOP	06/16/2008

The project consists of a total of 413,675 sf in building space.	NOD	
2002032163	Zone 7 Water Agency Well Master Plan Zone 7 Water Agency --Alameda The proposed pipeline would be located along the private haul road that extends directly south into the Chain of Lakes #2 Well Field from El Charro Road. The pipeline will undercross one stream, the Arroyo Mocho just below its confluence with the Arroyo Las Positas using a jack-and-bore trenchless method. The jack-and-bore tunneling under Arroyo Mocho would occur at the concrete lined sedimentation basin between El Charro/Vulcan Bridge and the Hanson bridge (the access road to the Chain of Lakes #2 Well Field Area).	NOD	
2002091107	Environmental Protection Measures for the Ongoing Routine Operations and Maintenance Program Ventura County Watershed Protection District --Ventura The Watershed Protection District proposes to incorporate feasible environmental Best Management Practices into the current maintenance program to reduce environmental impacts of the ongoing maintenance program and to obtain long-term permits and approvals from various state and federal regulatory agencies.	NOD	
2003022120	Tercero Housing Improvement Project University of California, Davis Davis--Yolo The project consists of facility expansion and improvements to Tercero Student Housing in the Central Campus at UC Davis. The project includes the construction and operation of the new buildings which will house 600 students to meet student demand for on-campus housing and for planned future increases in student enrollment. The project is part of the planned three-phase Tercero Housing Improvements Project, which as original planned would provide housing for 1,200 students.	NOD	
2006112062	North Connector Project Solano Transportation Authority Fairfield--Solano Then North Connector Project, located primarily in unincorporated Solano County near the City of Fairfield, involves the construction of two sections of roadway (the East End and West End) to provide additional east-west capacity north of U.S. I-80 for local traffic, which currently uses U.S. I-80. The project will be a total of 3.7 linear miles (including both the East and West End components). Existing land uses in the project area are comprised mostly of agricultural uses, as well as some residential and commercial development.	NOD

<u>Documents Received on Friday, May 16, 2008</u>			
2007122016	Auburn Ravine Park Project Lincoln, City of Lincoln--Placer The project consists of Certification of a MND for a 1.9-acre dog park, 2,000 linear feet of pedestrian and bicycle trails to connect to the city's expanding trail system, path side seating, and three exercise stations. The site is currently designated in the General Plan as PR (Park & Recreation), and is zoned P (Park).	NOD	
2008012120	Ultra Violet Treatment Facility Palo Alto, City of Palo Alto--Santa Clara The proposed project would replace the Palo Alto Regional Water Quality Control Plant's (RWQCP) existing chlorine disinfection facility with an ultraviolet (UV) disinfection facility which would be built adjacent to the existing Chlorination Station building. The new UV facility would consist of a concrete channel structure approximately 80 feet long and 45 feet wide, sitting 11 feet above grade. The UV facility and the associated lamp washdown and cleaning area would be permanently covered by an unenclosed structure that would be approximately 30 feet tall. The project includes the installation of photo voltaic panels on the structure's roof top.	NOD	
2008022029	Advanced Data Center 69-kV Line Project Sacramento Municipal Utility District Sacramento--Sacramento The proposed project would consist of constructing a 2,400 double-circuit subtransmission line along the east side of Winters Street, and the north or south side of McClellan Park Drive to serve a dedicated customer substation at Advanced Data Center. In addition, ~1,100' of single-circuit subtransmission line would be removed from the west side of Winters Street, and 6 poles would be reduced 8-10' in height.	NOD	
2008022151	Rancho Seco Power Plant Wastewater Treatment Artificial Wetland Project Sacramento Municipal Utility District Galt--Sacramento Construct and modify the Rancho Seco Power Plant wastewater treatment and disposal system by creating an artificial wetland that would provide additional wastewater treatment and create additional wastewater storage. The artificial wetland would be constructed in one of two existing, concrete-lined service spray basins (measuring 330 by 165 feet at the bottom) that were previously used for cooling non-radioactive water at the plant. Treated wastewater would flow through the wetland, to a storage cell, and then to 1.5 acre irrigation area.	NOD	
2008059021	Bug Timber Harvesting Plan (2-06-117-BUT) Forestry and Fire Protection, Department of --Butte 1600 agreement for two culvert installations (crossing #1 and #41), two culvert replacements (crossing #9 and #32), one ditch relief/road maintenance and culvert maintenance/installation (crossing #42). 2008058189	Elkhorn Basin Ranch Acquisition - Also Known as Knaggs Ranch Acquisition Sacramento Area Flood Control Agency --Yolo The acquisition of the 1,682 acre Elkhorn Basin Ranch (also known as the Knaggs Ranch) property by the Sacramento Valley Conservancy and Yolo Land Trust, and the granting of easements for flood control and agricultural conservation to one of these organizations, using funds from SAFCA, California Dept. of Water Resources, other public entities, SVC, YLT, and private grants and loans.	NOE	
2008058190	Replacement Well #2 Health Services, Department of Hollister--San Benito The project consists of the replacement of existing well with a new well of similar capacity. The existing well requires replacement to mitigate a failing casing that is producing water with excess turbidity.	NOE	
2008058191	4700 & 4704 Dewey Orchard Court / 6756 & 6760 Ellsworth Circle Boundary Line Adjustment Sacramento County --Sacramento The proposed project consists of a Boundary Line Adjustment between 4 lots in the RD-5 zone, in order to create wider corner lots.	NOE	
2008058192	License Agreement Between the Regents of the University of California and the United States Golf Association University of California, San Diego La Jolla--San Diego The proposed project is a License Agreement to be executed between the Regents of the University of California and the United States Golf Association in connection with the 2008 United States Open Golf Championship at Torrey Pines Golf Course. The temporary project includes equipment staging, pedestrian access ways, parking and a Championship spectator drop-off facility on University property in support of the event.	NOE	
2008058193	Conserving Our Watersheds Ranch Water Quality Improvement Project Marin Resource Conservation District --Marin Work at the first ranch consists of fencing and a new pipeline and trough to improve water quality by improving livestock distribution. Approximately 3,500' of fence will be installed to exclude livestock from Lagunitas Creek. An existing upland spring development will be renovated, and water will be conveyed to a new water trough. The spring will be fenced to exclude livestock from access. Work at the second ranch will involve installation of essential pump components on an existing footing in an agricultural pond and laying of pipe to move the water upland to a new trough. The pond will be fenced to prevent erosion damage.	NOE	
2008058194	Tischer Property, Sullivan Creek Restoration Project Fish & Game #4 --Tuolumne Restoration of eroded banks in Sullivan Creek by planting rock rip-rap along the outer banks, backfilling with smaller diameter drain gravel topped with dirt fill to restore the banks to pre-disturbance natural contours. All disturbed slopes will be revegetated using native trees and shrubs, and seeded with native seed mix. Seeded slopes will be covered with mulch and bio-degradable, geotextile erosion-control blankets.	NOE

2004042122	Eastern Sacramento County Replacement Water Supply Project Sacramento County Water Agency Folsom--Sacramento SCWA will provide approximately 31,500 AFA of remediated groundwater from GET facilities for use in Central Groundwater Basin area. The project would also provide 5,000 AFA of water to the Cosumnes River via the Folsom South Canal.	FIN	
2007052118	Del Norte County Wal-Mart Expansion Project Del Norte County Planning Department Crescent City--Del Norte The proposed project consists of expanding the existing 83,092 square foot Wal-Mart store on the project site by as much as 87,034 square feet to a maximum size of 170,126 square feet. (Note that the actual expansion is anticipated to be smaller, but is evaluated at 87,034 square feet in the EIR to provide a conservative analysis.) As part of the expansion, the Wal-Mart store would be upgraded to Supercenter and would operate 24 hours a day.	FIN	
2007071146	Upper Chiquita Reservoir Emergency Storage Project Santa Margarita Water District Rancho Santa Margarita--Orange The proposed project would include development of an earthfill dam structure and a covered, domestic water reservoir with a storage volume of 720 AF within the City of Rancho Santa Margarita north of Oso Parkway and west of the current terminus of State Route 241. The reservoir footprint would be approximately 19.7 acres with a surface area of approximately 15.4 acres and would have a High Water Level of 860 feet. The overall permanent disturbance area for the project would encompass approximately 27 acres. In addition to the proposed dam and reservoir, the project also proposes the following facilities: access roads, spillway and drainage facilities, inlet/outlet facilities, a pump station, disinfection equipment, and pipeline connection to the South Orange County Pipeline.	FIN	
2007121129	Fullerton Turnback Facility Orange County Transportation Authority Fullerton--Orange OCTA with Metrolink proposes construction of a second track at the Fullerton Transportation Center (Fullerton Metrolink Station) between Harbor Boulevard and Orangethorpe Avenue. The purpose of this project is to provide a turn-around location for Metrolink trains providing 30-minute intra-Orange County service. Project includes: terminal track, storage track, modification of the platform at Fullerton Metrolink Station, and relocation of a communications building. The terminal track is a stub end track along Walnut Avenue. The construction of this track will require modification of the south passenger platform, ending just east of the pedestrian overpass. An optional additional track line, the Anaheim Layover Facility, is proposed as an overnight layover and storage facility for trains between Orangethorpe and SR-91.	FIN

2007102131	Marina Play Residential Project Santa Clara, City of Santa Clara--Santa Clara Certification of the Final EIR; PD Rezoning to allow construction of up to 277 rental apartment units; PD Rezoning and Tentative Subdivision Map to allow construction of up to 63 residential units (57 single family, 6 multi-family residential lots and one common lot); Development Agreement to vest development rights; Lot Line Adjustment to alter the parcel boundary to accommodate BRE development and Taylor Morrison development.	NOD	
2007121129	Fullerton Turnback Facility Orange County Transportation Authority Fullerton--Orange The Orange County Transportation Authority (OCTA), in cooperation with Southern California Regional Rail Authority, proposes the construction of a turn back facility between Pomona Avenue and Orangethorpe Avenue at the Fullerton Transportation Center to facilitate intra-Orange County service. An optional additional track line, known as the Anaheim Layover Facility, is proposed for use as an overnight layover and storage facility for Metrolink trains.	NOD	
2007122078	Empire Station Oakley, City of Oakley--Contra Costa The Empire Station project is a 5-acre mixed-use development with office and residential uses. The residential component of Empire Station will consist of 47 townhomes on ~3.5 acres. The townhomes consist of two building types, a four-unit building and a five-unit building. A total of 11 buildings, three five-unit and eight four-unit buildings, would be constructed. All units will have two-car attached garages and 3rd floor exterior sun decks. The office component of the project consists of three 3,000 sf buildings in the northeastern corner of the project site.	NOD	
2008012063	Upper Truckee River Restoration Project, Middle Reaches 3 and 4 South Lake Tahoe, City of South Lake Tahoe--El Dorado The City of South Lake Tahoe proposes to construct 4,000 feet of new river channel, restore 19 acres of SEZ, modify two in-channel structures to allow fish passage, and construct three aquatic habitat enhancement structures.	NOD	
2008021042	Thoreson Sand Mine and Reclamation Project (CUP06-014) Merced County --Merced The project consists of a surface sand mine that would excavate onsite alluvial (sand) materials and transport them to various offsite locations. The project would include one mining phase. No processing of materials would occur onsite as part of the project. The applicant expects the total production would be 750,000 cubic yards of material over ~5 years. This rate of extraction would result in a maximum annual production of 15-20,000 cubic yards annually. Final reclamation is to dryland grazing, and will be completed within a year following the completion of mining and is estimated for the end of 2013.	NOD

2004092099	Roblar Road Quarry Project Sonoma County Cotati, Petaluma--Sonoma Develop a hard rock quarry that will disturb approximately 70 acres over a 20-year mining period. The quarry will provide aggregate and road base, subbase drain rock, quarry fines, fill material, riprap, and possibly concrete aggregate. As these materials are mined and processed, they will be stockpiled for eventual loading and delivery. The quarry is located adjacent to Roblar Road and is adjacent to a closed unlined landfill. Phase one (five years) will begin with construction of an access road and construction and installation of truck scales, an office, equipment storage area, parking lot, and processing equipment. The initial phase would establish the quarry floor at its permanent elevation. Phase two (five years) and phase three (ten years) would consist of mining the quarry in an easterly direction for a total production of 11,400,000 cubic yards of material.	EIR	07/03/2008
2007091007	Garden Del Mar Project Del Mar, City of Del Mar--San Diego The project includes the development of approximately 20,000 square feet of gross floor area of small commercial condominium spaces for offices, restaurant, and retail uses. The proposed project would consist of an open campus of six two-story buildings arranged in three rows parallel to Camino del Mar and organized around three public plazas - one at the corner of Camino del Mar and 10th Street, a second interior courtyard plaza, and a third viewing plaza on the second level. The front row/street-level commercial spaces along Camino del Mar and bordering the corner public plaza would be reserved for retail and restaurant uses to ensure an active pedestrian-oriented streetscape. The three rows of buildings would buffer the residential neighborhoods from the street level noise and activity along Camino del Mar.	EIR	07/03/2008
2008021008	Valley Region Span K-8 No. 1 School Los Angeles Unified School District --Los Angeles The proposed project involves construction and operation of an elementary and middle school on a 6.4 acre site. Development would include three classroom buildings, a middle school gymnasium, a multipurpose building with food service facilities, a library, and an administration building. The kindergarten and elementary classroom buildings combined would provide capacity for 750 students. The middle school classroom building would provide capacity for 297 students. The proposed campus would include turf playfields and hardcourts as	EIR	07/03/2008

2008052090	<p>Public Law 84-99 Levee Rehabilitation Project - RD 536 Central Valley Flood Protection Board Rio Vista--Solano Repair Alternative Sites 004 and 005: Sites 004 and 005 will be land site repairs. These repairs will consist of excavating the existing slope 6' and backfilled with compacted select fill. This will add 14' to the existing levee crown. The existing agricultural ditch will have to be moved 20' to accommodate the new levee toes and will be rebuilt to the existing configuration.</p> <p>Repair Alternative for Sites 006-016: Sites 006-016 will consist of water side repairs. These repairs consist of variations of one basic design. This basic design is as follows. All areas will be cleared and grubbed to a depth of 3' below the existing ground surface. After the material has been removed 18" minus rock will be placed where needed by pushing into place from the crest. 4" minus rock will be broadcast on top to fill in interstitial voids. In addition, orange fencing will be placed in the water 1' away from the levee toe to protect in water vegetation located 1' or more away from construction. All in water vegetation located on the land side of the orange fencing will be removed by hand and placed on the other side of the fencing.</p>	MND	06/18/2008
2008052091	<p>Public Law 84-99 Levee Rehabilitation Project - RD 2098 Central Valley Flood Protection Board Rio Vista--Solano Under the proposed action the damaged sites are to be constructed to match the levee's pre-flood geometry using materials less susceptible to erosion and wave wash than were previously in place. The geometry of each site is to be constructed to match the levee geometry immediately upstream and downstream of the damaged site. Specifically, the Alternative 1 repairs would consist of excavation of at least 6" beyond the damaged area on the levee slope, placement of 24" riprap (similar Caltrans Class Light) at the toe to a height of 1' above the design water elevation, and extending the riprap into the water to meet the projected levee slope.</p>	MND	06/18/2008
2008031109	<p>Charnock Well Field Restoration Project Santa Monica, City of Los Angeles, City of, Santa Monica--Los Angeles The project involves implementation of a water treatment system and other improvements that would help to remove groundwater contamination from the Charnock groundwater sub-basin and restore this resource as a water supply for the City of Santa Monica (City). As part of the project upgrades, improvements will be required at two existing City-operated water service facilities. The City is planning to return the Charnock groundwater wells to full production using a well head treatment system to be constructed at the Charnock well field. The treatment system will use filtration with granular activated carbon (GAC) to treat water from the three contaminated wells at the well field. The treated water will be pumped to the Santa Monica Water Treatment Plant for the final treatment and distribution. Water treatment improvements are also proposed for the Santa Monica Water Treatment Plant including water disinfection and water softening. Improvements for the SMWTP may include two salt water wells, as part of a water softening treatment system, that would replace existing salt water wells located on Santa Monica beach.</p>	NOP	06/18/2008

	This notice constitutes the NEPA component of the project.		
2008052093	Santa's Village Road Guardrail Caltrans #5 Scotts Valley--Santa Cruz Caltrans proposes a Clean Up the Roadside Environment (CURE) safety enhancement project that would construct an outside shoulder, install a concrete guardrail, improve drainage facilities, remove fencing, relocate utilities, and construct a retaining wall along the southbound lanes of SR 17.	MND	06/19/2008
2008052096	L.L. Anderson Dam Spillway Modification Project Placer County Water Agency --Placer The presently proposed project involves widening the existing spillway at L.L. Anderson Dam and replacing and raising the dam crest parapet wall to pass the PMF. The spillway crest would need to be widened 32' to maintain the peak reservoir stage at El. 5273' during the general storm PMF. The spillway widening would be achieved by rock excavation with blasting and machinery, construction of new spillway structure, seepage cutoff through grouting of new spillway structure rock foundation, rock bolting and shotcrete, re-establishing automatic control system to the existing power adjacent to the new spillway structure, demolition of the existing spillway structure, and placement of excavated rock spoil against downstream face of the dam.	MND	06/19/2008
2008052098	Colusa Subreach Wildlife Habitat Restoration Project at Seven Tracts along the Sacramento River Between Colusa and Princeton Fish & Game #2 Colusa--Colusa, Glenn TNC in association with the Sacramento River Conservation Area Forum (SRCAF) and other partners propose to restore approximately 251 acres of wildlife habitat on portions of seven tracts within the levees of the Sacramento River between Princeton and Colusa. The wildlife habitat restoration activities are proposed through a planning and stakeholder involvement program called Colusa Subreach Planning (CSP). The seven restoration tracts from north to south are identified as Womble, Jensen, Stegeman, 1000-Acre Ranch, Boeger, Colusa-North, and Cruise n' Tarry. Three of the restoration sites, which are currently owned by TNC (Jensen, 1000-Acre Ranch, and Boeger), are proposed to be acquired by the State of California. The total area of the seven tracts is approximately 825 acres. The purpose of the proposed project is to restore the ability of the Colusa Subreach to support native wildlife, including species listed under the state and federal endangered species acts and other special-status species. Restoration activities include removal of non-native vegetation; site preparation; installation of irrigation systems and use of surface water or groundwater supplies; planting of native trees, shrubs, and grasses; interim irrigation of plants as they become established; and construction of minor public access improvements. Restoration would occur over a four-year time period.	MND	06/20/2008
2008052094	Gilroy Trails Master Plan (Gavilan to Sports Park) Gilroy, City of Gilroy--Santa Clara Bike/pedestrian trail to connect Gavilan College with the Gilroy Sports Park, using a bridge across Uvas Creek. The paved trail will be 12 feet wide with 18-inch shoulders. The bridge will be 140 feet long and 10 feet wide.	Neg	06/19/2008

	playfields and an at-grade parking structure.		
2008051092	Taylor Tentative Parcel Map Goleta, City of Goleta--Santa Barbara The applicant proposes the subdivision of the existing 1.91 acre parcel into four parcels ranging in size from approximately 0.35 to 0.82 gross acres, modified ingress/egress including a partial cul-de-sac to be constructed at the end of Camino Contigo, and connection to the following utilities: Goleta Water District (water), Goleta Sanitary District (sewer), Southern California Edison (power), Southern California Gas Company (gas), Cox Cable of Santa Barbara (cable) and Verizon Phone Company (phone).	NOP	06/20/2008
2008051093	Central Region Elementary School No. 20 Los Angeles Unified School District --Los Angeles On the southern area, the White House Place PC would be demolished and replaced with a surface parking lot with 137 spaces. These 137 spaces are to be shared by Virgil MS and CRES No. 20 faculty and staff, with 65 spaces dedicated to the Virgil MS and 72 spaces for CRES No. 20. The proposed project would include exterior safety lighting and a public address system. CRES No. 20 would be constructed in the central area and would consist of two-story buildings (approximately 34 feet in height), encompassing approximately 62,000 square feet on 3.18 acres, including 1.7 acres of playground area. School classrooms, a multipurpose building, and the administration area would be located primarily along the western block of Westmorland Avenue and southern block of Council Street. The entrance to the CRES No. 20 will be from Council Street. CRES No. 20 playfields would be located on the western portion of the site adjacent to Virgil MS.	NOP	06/20/2008
2008051094	Victor Valley College 2007-2017 Facilities Master Plan Victor Valley Community College District Victorville--San Bernardino The proposed project is the 2007-2017 Facilities Master Plan (Master Plan or FMP), which establishes a 20-year plan for the campus. The VVC Campus presently serves an enrollment population of approximately 9,100 full-time equivalent (FTE) students. Master Plan implementation will serve a projected 14,616 FTE of enrolled students by the year 2020 with a total of 932,380 square feet of existing and future classrooms and related building expansion.	NOP	06/20/2008
2008051096	Marina Park Newport Beach, City of Newport Beach--Orange The Subject property is an approximate 10-acre site situated along West Balboa Boulevard between 15th and 19th Street. The proposed project consists of a public park and beach, a public short-term visiting vessel marina, improved parking lots, tennis courts, half-court basketball courts, the Neva B. Thomas Girl Scout House, and the Balboa/Sailing center which includes a restaurant, support offices, and classrooms.	NOP	06/20/2008

2008051102	US Highway 101/State Route 46 West Interchange Modification Project Caltrans #5 Paso Robles--San Luis Obispo NOTE: Joint Document consists of Mitigated Negative Declaration and Environmental Assessment. The California Department of Transportation proposes to relieve local and regional circulation problems and reduce existing and future congestion by improving the US 101/State Route 46 West interchange ramps, and relocating Theatre Drive to a new intersection with State Route 46 West, west of its current location. The interchange reconstruction would convert the existing compact diamond interchange signal-controlled ramp intersections into roundabouts. Adjacent frontage roads would be either redirected into the new roundabouts or relocated away from the interchange. The proposed project does not include any modifications to the US 101 through lanes. Improvements would be made to all four on- and off-ramps in the interchange to achieve the desired geometry and traffic operations.	JD	06/23/2008
2008051108	West Covina Park-And-Ride Foothill Transit West Covina--Los Angeles NOTE: Joint Document consists of Environmental Assessment and FONSI. Foothill Transit proposes to build a multi-level structure on the site that would provide parking for the local and regional commuters. This would include: provision of 520 net new parking spaces in a multi-level structure on the site at 100 South Vincent Avenue in the City, for use by Foothill Transit bus patrons and	JD	06/23/2008

2008052104	State Route 65/Galleria Boulevard Interchange Modification Project Roseville, City of Roseville--Placer The project will widen the southbound off-ramp to two lanes and add a signal at the off-ramp. Other improvements include restriping local roadways and signal modifications.	MND	06/23/2008
2008052109	Porter College House B Addition University of California, Santa Cruz Santa Cruz--Santa Cruz The proposed project consists of the addition of a sixth floor to an existing 73,400 sf student residence hall on the UC Santa Cruz campus. The project would add ~11,000 assignable square feet to an existing building and would accommodate 121 new student bed spaces. The building height would increase from 54' to 74'. Project construction would take place concurrently with construction for a previously approved seismic retrofit and capital renewal project. Existing utilities have adequate capacity to serve the additional building space.	MND	06/23/2008
2008052110	Infrastructure Improvements, Phase 2 University of California, Santa Cruz Santa Cruz--Santa Cruz The proposed project consists of storm water control improvements at 33 locations within the Jordan Gulch and Moore Creek drainages on the UCSC campus. These natural drainages on the campus, used to convey both natural storm water runoff and runoff from development, are experiencing progressive erosion. Sinkholes within the drainages have become clogged, with reduced ability to infiltrate water. The project would install check dams and step pools, reinforce banks, clean out sinkholes, and implement other measures to reduce siltation and halt progressive erosion.	MND	06/23/2008
2008051100	HASA Bleach Manufacturing Plant Project Lancaster, City of Lancaster--Los Angeles Construction (two phases) and operation of an approximately 161,210 square foot salt-to-bleach manufacturing plant, including a 62,510 sq. ft. manufacturing facility (Phase 1), a 77,700 sq. ft. warehouse (Phase 2), and a 21,000 sq. ft. corporate office (Phase 2). The manufacturing facility would use new three raw materials (salt, electricity and water) to produce bleach (hypochlorite), muriatic acid (hydrogen chloride), and caustic (sodium hydroxide) for the swimming pool and water treatment industries. Five different processing modules would be used to manufacture the products. The warehouse would be used to house the various packaging lines and package the manufactured products for shipping. The project would provide approximately 8,936 square feet of landscape and 142 parking spaces.	NOP	06/23/2008
2008051101	Valley Region Span K-8 #2 Los Angeles Unified School District Los Angeles, City of--Los Angeles The Proposed Project would consist fo approximately three buildings which would be one two-stories in height and encompasses approximately 106,418 square feet of total building area. The Proposed Project includes 50 classrooms, a library, a multi-purpose room, and approxiimately 113 surface parking spaces for faculty and staff. The Proposed Project would provide 1,290 two-semester seats for students in grades kindergarten through eight and would require approximately	NOP	06/23/2008

2008051103	Loyola Marymount University Master Plan Los Angeles, City of Los Angeles, City of--Los Angeles LMU proposes a 20-year Master Plan intended to upgrade, renovate and replace nonresidential and residential facilities on its Westchester campus. The proposal includes approximately 566,037 net new square feet of academic, student, and administrative facilities; approximately 475,716 net new square feet of residential facilities to house a greater percentage of undergraduate students; the establishment of height limit setbacks from the campus perimeter; enhancement of recreational facilities and open space; relocation of parking; and pedestrian and vehicular circulation improvements.	NOP	06/23/2008
2008052103	Kaiser Center Project Oakland, City of Oakland--Alameda The project would result in two office towers of approximately 436 feet or 34 stories tall in place of the "20th Street Mall" and 566 feet or 42 stories tall in place of the "Webster Street Mall". Approximately 22,500 square feet of retail space would be constructed on the ground floor along the Webster and 20th Street frontages. The project would add approximately 852 net new parking spaces. The project would result in a net increase of public open space by approximately 4,500 square feet. All existing development on the 2.2-acre project site would be demolished and replaced as part of the proposed project.	NOP	06/23/2008
2008052106	Harry Tracy Water Treatment Plant Long-Term Improvements Project San Francisco, City and County of San Bruno, Millbrae--San Mateo The SFPUC is proposing 1) treatment process improvements including 5 additional filters, upgrades to the Chemical Storage Area, upgrades to solids handling area; 2) seismic reliability improvements including internal structural improvements, pipeline stabilization, slope stabilization; and 3) electrical, HVAC, and site access improvements at the Harry Tracy Water Treatment Plant. The project also may include the relocation of the treated water storage tanks elsewhere on SFPUC property if recommended in the geotechnical report.	NOP	06/23/2008
2008021077	DeCicco Tract Map, and Development Plan / Variance / Coastal Development Permit ED 06-227 (SUB2005-00241), DRC2006-00064) San Luis Obispo County --San Luis Obispo Request by Franco DeCicco for a Tract Map, Development Plan, Variance and Coastal Development Permit (SUB2005-00241/ DRC2006-00064) to create a mixed-use development on four existing parcels totaling 0.64 acre. The development would include four residential condominiums totaling 10,500 square feet, plus courtyards and decks; a motel consisting of 18 two-bedroom units totaling 18,780 square feet, plus decks; 2,245 square feet of hospitality and service areas; 9,060 square feet of common area; and subterranean parking. The Variance request would waive Planning Area Standard 1 for the Cayucos Commercial Retail land use category which requires architecture in commercial zones to be either Western or Victorian style. The proposed project is within the Residential Multi-Family and Commercial Retail land use category and is located at the northeast corner of Ocean Boulevard and Old Creek Road. The site is in the Estero planning area.	Neg	06/23/2008

Project objective is to increase creek carrying capacity, reduce erosion, and enhance habitat.	MND	06/25/2008
2008052120	# 2006-031 Planned Development Permit for Valley Springs Community Shopping Center Calaveras County --Calaveras The project is a request for a Planned Development Permit for a +/- 13.75 acre commercial shopping center on a +/- 24 acre site located within the C2-PD (General Commercial-Planned Development) zoning district. The applicant is proposing as a concurrent project with Caltrans the realignment of State Route 26 in a northwesterly direction in order to straighten a curve and improve sight distances. Realignment of State Route 26 is a necessary precedent to development. The proposed Valley Springs Community Shopping Center will be a general commercial retail center consisting of multiple buildings, a parking lot, walkways, and landscaped areas. The proposed total retail/commercial space will be approximately 91,849 square feet, contained within a total of seven commercial buildings. The applicant proposes three access intersections to be constructed on State Route 26. The project site is on the flat alluvial plain adjacent to Cosgrove Creek, which runs parallel to the easterly and southerly boundary of the area to be developed.	MND	06/25/2008
2007011090	3714-3744 State Street and 3715 San Remo Drive Santa Barbara, City of Santa Barbara--Santa Barbara The applicant proposes to demolish the existing 113 room Sandman Inn Hotel and all site improvements, and construct a new 112 room hotel and 73 residential condominium units. The hotel and residential development would be on separate parcels. The hotel would measure 44 feet, 6 inches above existing grade and would have three stories above a one-level underground parking garage. The hotel building would be 64,422 square feet, including 18,848 square feet of non-room area (i.e., meeting rooms, corridors, lobby, laundry area, etc.) above a 46,701 square foot parking garage containing 114 parking spaces. The residential condominiums would be two to three stories tall and would be constructed above an underground parking garage containing 164 parking stalls. The residential development would have a maximum height of 31 feet above finished grade. Of the 73 residential condominium units proposed, 22 units would be one-bedroom units, 14 units would be two-bedroom units, and 37 units would be three-bedroom units. The applicant proposes to provide 11 of the 73 project units (2 one-bedroom units, 4 two-bedroom units, and 5 three-bedroom units) at sale prices targeted to middle-income households earning from 120-160% of median income, pursuant to the City of Santa Barbara's Affordable Housing requirements. 2008051111	Glendale Triangle Project Glendale Redevelopment Agency Glendale--Los Angeles The proposed Glendale Triangle Project (project) is located within the San Fernando Road Corridor Redevelopment Project Area at 3900 San Fernando Road. The 2.18 acre triangular site borders three major streets: Los Feliz Road to the north, Central Avenue to the east, and San Fernando Road to the west. The project includes the development of a transit-oriented, high-density multi-family, mixed-use project consisting of: 218 residential units; 54,000 square feet of commercial space; recreation and open space amenities; and a 3 1/2 level subterranean parking garage with 707 parking spaces.	NOP	06/25/2008
2008052112	Green Valley Plaza Fairfield, City of Fairfield--Solano The proposed project includes the development of approximately 465,000 square feet of retail uses on the project site. Four access points to the project site would be provided, including new signalized driveways along Suisun Valley Road and Business Center Drive (currently under construction) and at the intersections of Business Center Drive/Kaiser Avenue and Business Center Drive/Executive Court.	NOP	06/25/2008
2008052117	Neilsen Development Project (PA 07-057) Dublin, City of Dublin--Alameda Development of up to 34 lots with up to 36 single family and duplex dwellings along with an access road, on-site roads, grading and infrastructure extension on a 10.9 acre site. Requested entitlements include an amendment to the General Plan and Eastern Dublin Specific Plan to change the land use designation from Rural Residential/Agriculture to Single Family Residential and to reduce roadway widths, a Stage 1 and Stage 2 Planned Development zoning, a vesting tentative subdivision map and a development agreement.	NOP	06/25/2008
2008051112	21000 and 21100 Seaboard Road Malibu, City of Malibu--Los Angeles Currently, the four lots are: 4.08 acres (Lot 1), 1.03 acres (Lot 2), 4.22 acres (Lot 3), and 22.81 acres (Lot 4). Coastal Development Permit No. 05-061 proposes a lot line adjustment (LLA) for the four lots, which would result in the following lot sizes: Lot A (location of the proposed residence) (7.6 acres); Lob B (1.3 acres); Lot C (20.0 acres); and Lot D (2.6 acres). The four lots affected by this LLA are all legal parcels. While the LLA will allow for the development of the single-family residence proposed under Coastal Development Permit No. 04-051, it will also allow potential development of single family residences on each of the remaining three lots to be clustered around the access road and oriented to minimize disturbance to the surrounding areas.	Neg	06/25/2008
2008051113	Loveland Reservoir Fishing Improvements Project Sweetwater Authority --San Diego The proposed project includes improvement of ~1/2 mile of existing trail segments, within the designated fishing area. Existing trails would be widened as needed and unauthorized trails would be closed and allowed to revegetate. Other improvements would include one permanent 16' long pedestrian bridge; one 20' long cable anchored float crossing to be temporarily secured to metal posts during	Neg	06/25/2008

	periods of high water levels; and a 120' long fishing float to provide a stable fishing platform on the north side of the reservoir (SWA #A3210).		
2008052113	Route 101 Auxiliary Lanes Project Caltrans #4 Menlo Park, East Palo Alto, Palo Alto--San Mateo, Santa Clara Caltrans proposes to provide auxiliary lanes in both directions by widening Route 101 between the Embarcadero Road interchange in the City of Palo Alto, Santa Clara County, to the Marsh Road interchange in the City of Menlo Park, San Mateo County. In general, Route 101 would be widened on the outside to accommodate the addition of auxiliary lanes. The Henderson railroad overcrossing and the Ringwood Avenue pedestrian overcrossing would be reconstructed. The proposed project also includes extending the support foundation over the Hetch Hetchy aqueduct, widening of on-ramps to provide High Occupancy Vehicle lanes, installing and modifying existing ramp metering at on-ramps, and relocating the existing storm water lift station adjacent to the Henderson railroad overcrossing. Approximately 2,690' of retaining walls would be constructed along the depressed section of Route 101 north and south of the Henderson railroad overcrossing.	Neg	06/25/2008

2008051121	Northwest Housing Infill Project & 2002 LRDP Amendment University of California, Los Angeles --Los Angeles UCLA proposes to construct additional undergraduate student housing consisting of 1,525 dormitory beds, dining, and support space totaling 550,000 gross square feet (gsf) in four buildings on three infill sites within the Northwest zone of the campus. The Northwest Housing Infill Project (NHIP) requires an Amendment to the 2002 Long Range Development Plan (LRDP) to provide the additional 550,000 gsf entitlement in the Northwest zone to accommodate the project. Because the NHIP has an estimated completion date of 2013, the LRDP Amendment will also account for an extended LRDP planning horizon from 2010 to 2013, but will not involve any modifications to the previously adopted campus wide trip generation and parking limits.	NOP	06/26/2008
2008052121	Mission College Educational and Facilities Master Plan West Valley-Mission Community College District Santa Clara--Santa Clara The Mission College Facilities Master Plan proposes a framework for land use and capital improvements that meets the goals set forth by the Educational and Facilities Master Plan for the year 2025. Project implementation would involve development of approximately 220,000 square feet of new space. Demolition of the Main building (235,000 s.f.) would require the construction of two replacement buildings, totaling 207,000 s.f. Project implementation would increase total permanent space on campus boundaries.	NOP	06/26/2008
2002072046	Incremental Recycled Water Program - Discharge Compliance Project Santa Rosa, City of Cloverdale--Lake, Sonoma The LRT2 funding agreement provides Sonoma County Water Agency funding for implementation of the Santa Rosa Urban Reuse Pilot Project. The purpose of the pilot project is to provide for the retrofit of a small number of existing users to recycled water with an opportunity to evaluate the customer outreach and retrofit process on a small scale before implementing the Santa Rosa Urban Reuse Project on a larger scale.	NOD	
2002072046	Incremental Recycled Water Program - Discharge Compliance Project Santa Rosa, City of Cloverdale--Lake, Sonoma Ordinance No. 3862 amends certain sections of Chapter 14-04 (Water Service) of the City Code. The amendments do not change the nature of the original Santa Rosa Urban Recycled Water Ordinance, the impacts for which were evaluated under the Urban Reuse Alternative in the IRWP Certified EIR, a Program EIR, together with the 2004, March 2007, and July 2007 Addenda. 2004052014	01-MEN-101 KP R159.2/R162.2 (PM R98.9/R100.8) Bypass Confusion Hill Rockslide Caltrans #1 --Mendocino The project would relocate 1.9 miles of U.S. Highway 101 at Confusion Hill slide. Caltrans is obtaining a temporary water right from the State Water Resources Control Board for the project.	NOD	
2004092032	Alameda County Partners in Restoration Permit Coordination Program Alameda County Resource Conservation District --Alameda As part of the Permit Coordination Program, the project will remove undocumented fill in and near the stream channel and restore the stream channel and its tributaries. The project is located at 10331 Crow Canyon Road, unincorporated Castro Valley, in the County of Alameda. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2008-0073-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Alfonso Crespin.	NOD	
2004102067	North San José Development Policies Update Project San Jose, City of San Jose--Santa Clara The Removal Action Workplan (RAW) consists of a removal of soil contaminated with arsenic from two areas, which will be consolidated on a region of the project site and capped. Approximately 22,060 cubic yards of soil will be excavated from Parcel C and from between Parcels B1 and B2, and redistributed on Parcels A, B1 and B2. Most excavation on Parcel C will go down to approximately 2 feet, and will be backfilled with imported clean soil. Some areas of Parcel C will be excavated down to approximately one-half foot, and capped by pavement and underlying baserock. The contaminated soils placed on Parcels A, B1 and B2 will be capped with asphalt and building foundations. Approximately 2,750 truck trips would be needed for transferring on-site soils, which would take an estimated 120 working days to complete. The RAW was prepared consistent with the Health and Safety Code, Section 25356.1.	NOD

2007112047	Ridgeview Office Complex (PMPA T20060559) Placer County Auburn--Placer The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2008-0028-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Sierra Crest Partners, LLC. Filling of approximately 0.03 acres of an unnamed seasonal drainage with 198 cubic yards of native soils to allow for construction of an office complex. Stormwater and surface water runoff from the site that was previously drained by the seasonal drainage will be collected into a new underground stormwater culvert system and discharged into an existing ditch located in the southwest corner of the project site. Riparian vegetation does not appear to be associated with the seasonal drainage.	NOD	
2007122001	Walnut Grove Sewer Connection Sacramento County --Sacramento, San Joaquin The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2008-00057-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Sacramento Area Sewer District. Pump Station at Walnut Grove Wastewater Treatment Plant: The new pump station will consist of a trench-style wet well equipped with two submersible pumps (one duty, one standby). The pump station will be sited along the southerly WWTP boundary. The pumps will have capacities of approximately 660 gpm and 720 gpm at 125 feet of head. A Booster Pump Station on North Cameron Road: The booster pump station location creates similar operating conditions as the pump station at the WWTP. The booster pump station will have similar overall configuration to the pump station at the WWTP, except there is no need for emergency storage. Approximately 54,000 feet (10.2 miles) of 10-inch force main from the Walnut Grove Wastewater Treatment Plant to the existing CSD-1 pump station at RCCC. No major modifications to the existing RCCC pump station are anticipated.	NOD	
2008011002	Tentative Tract Map No. 33973 Perris, City of Perris--Riverside The proposed project is a Tentative Tract Map of 384 single-family residential lots on approximately 153.7 acres (2.50 dwelling units/gross acre). Six lettered lots include 47.36 acres. Lots A, B, and C are San Jacinto River Corridor Open Space lots; Lot D (0.91 acre) is a proposed City-maintained Detention/Water Quality Basin; Lot E is a proposed 25.4-acre City-maintained community park, which includes a grinder pump system to handle sewerage generated from park; and Lot F is a 0.22 acre sewer lift station. Primary access to the project site is via River Road from Mapes Road west of Goetz Road to Ethanac Road. Secondary Access is from Mapes Road via Phillips Street to Ethanac Road.	NOD

2008012044	<p>Mono Gate One Diversion Facility Upgrade Project Los Angeles County --Mono</p> <p>The City of Los Angeles Department of Water and Power (LADWP) is proposing the upgrade and modification of the existing weir structure at Mono Gate One to meet present day requirements. Additionally, the project will improve functionality of the facility by installing current technology in monitoring, communication, and control devices. The project is located in the southwestern portion of Mono County, California. The Grant Reservoir is located approximately 0.5 mile to the west, and Mono Lake is located approximately 6.0 miles to the northeast of the project site. The primary access to the project site is from State Highway 395 via West Portal Road. The proposed Mono Gate One Facility Upgrade Project consists of: (1) construction of an approximately 150-foot bypass pipeline and valve installed to ensure that flows to Lower Rush Creek will not be interrupted. This pipeline will eventually be maintained as a bypass pipeline; (2) improvements to the Mono Gate structure, installation of equipment (for flow control and monitoring telemetry), and a new measuring station in the Rush Creek Return Ditch downstream of the bypass pipeline; and (3) either a new 12 kilovolt overhead power line from the Grant Reservoir shaft house to Mono Gate One along the existing road or a solar power array at the Mono Gate One facility to power operations. The completion of the project will (1) improve the structure integrity of the Mono Gate One Diversion facility, (2) allow for better flow control and measurements from the Grant Reservoir to Lower Rush Creek and Mono Craters Tunnel, and (3) allow for better communications, flow monitoring and flow control between the Mono Gate One facility and LADWP's Bishop facilities.</p>	NOD

	will also include the construction of detention basins at a north central location and the southeast corner of the site. The project is proposed to be developed in six phases, beginning on the southern portion of the site and extending to the eastern, central and western, northern, and western portions of the project site. Roadways and landscaping will be installed in each phase as development occurs. The project also includes the provision of an open space area within the northwestern portion of the project site, which is within the identified FEMA floodplain area. Access to the proposed subdivision would be provided at two locations on the east side of the project from two locations on Jasper Road.		
2008051134	Brandywine II and III (TTM 33481 and TTM 33482) Riverside, City of Riverside--Riverside Tentative Tract Map 33481 proposes to create 25 lots for residential purposes and one lot for a detention basin on two lots totaling 18.78 acres.	MND	07/01/2008
	Tentative Tract Map 33482 involves the subdivision of approximately 15.13 acres of undeveloped land. TTM 33482 proposes to create 29 lots for residential purposes and one lot for a detention basin.		
2008052131	Lands of Guerrero (PMLD T20070789) Placer County Auburn--Placer Project proposes a Minor Land Division, General Plan Amendment and Rezone to subdivide two existing parcels consisting of a total of 20 acres into four parcels with a minimum lot size of 4.6 acres each.	MND	06/30/2008
2008052132	Robinson Sand & Gravel (PEAQ T20060351) Placer County --Placer Project proposes approval of a Grading Permit in order to complete grading work on two separate areas of the subject parcel which is the current location of the Robinson Sand & Gravel Quarry.	MND	06/30/2008
2008052135	70-76 Liberty Ship Way Industrial Complex Sausalito, City of Sausalito--Marin The proposed project involves the construction of approximately 57,075 square feet of industrial buildings on a 3.9-acre parcel located at 70-76 Liberty Ship Way near Schoonmaker Point in the Industrial Marinship District. The project requires approval of a Mitigated Negative Declaration, Design Review Permit, and a Sign Permit. The parcel currently contains dry boat storage and containerized storage, and a storage and launching area for a sea kayaking operation. The project proposal includes four buildings of 32 feet in height with approximately 119 parking spaces. Site access is via Liberty Ship Way, and interconnects with the existing Schoonmaker Point Marina parking area. An existing marsh restoration easement located along the southern edge of the site will be preserved, as well as an adjacent existing Class I pedestrian and bike path along the waterfront. There is no evidence that any listed toxic or hazardous waste sites are present on the project site (CEQA Guidelines 15072 (f)(5), GC 65962.5). However, the site is adjacent to an existing remediation effort currently under the supervision of the San Francisco Regional Water Quality Control Board.	MND	06/30/2008

2002042015	<p>Bacon Island Rehabilitation Caltrans #6 Stockton--San Joaquin</p> <p>The California Department of Transportation (Caltrans) proposes to repair and overlay pavement and improve associated drainage facilities on State Route (SR) 4 in San Joaquin County, from post mile (PM) 1.2 east of Bacon Island Road to the approach railings of the San Joaquin River Bridge. Existing shoulders would be widened to the current standard of 8 feet necessitating the extension of concrete box drainage culverts at PMs 10.61, 11.19, 11.61, 12.06, and 12.46. Approximately 0.006-acre of drainage will be permanently impacted. Additionally 0.513-acre of irrigation ditches will be filled, and 0.59-acre of new irrigation ditches will be created to replace the lost ditches. Avoidance and minimization measures will be implemented to protect the giant garter snake, western pond turtles, burrowing owls, and migratory birds.</p>	NOD	
2002114002	<p>Giacomini Wetland Restoration Project California State Lands Commission --Marin</p> <p>The National Park Service (NPS), Point Reyes National Seashore, is proposing to restore natural hydrologic processes and wetland functions to significant portions of the project area known as the Giacomini Ranch and Olema Marsh. The stated purpose of this large scale restoration project is to "promote restoration of ecological processes and functions" within the project area and adjoining watersheds. By a combination of actions including removal of levees, tide gates, and culverts, floodwaters of Lagunitas and other Project Area creek that carry sediment, nutrients, and other pollutants will be able to flood onto historic floodplains to be filtered and transformed by the restored wetlands.</p> <p>The California Department of Fish and Game (DFG) is executing Lake and Streambed Alteration Agreement Number 1600-2008-0141-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Don Neubacher, Point Reyes National Seashore, National Park Service.</p>	NOD	
2003062002	<p>City of Turlock Harding Drain Bypass Project Turlock, City of Turlock--Stanislaus</p> <p>The City is proposing the construction of a new force main and outfall from the City's existing outfall at the Harding Drain located at the intersection of Harding Road and Prairie Flower Road to the eastern bank of the San Joaquin River. Other facilities associated with the force main, will include a pump station, post-aeration structure, submerged outfall and gravity line connecting the post-aeration structure to the outfall. As analyzed in the EIR, the original plan was to install the pipeline by jack and bore at all three crossing locations. Under the modified plan, the installation method will be by digging an open cut across the Drain during the non-irrigation season and non-rainfall season. The force main will be installed into the open cut and then the TID facilities will be restored to pre-project condition. The crossing of TID Lateral No. 5 at Prairie Flower Road will still be by the original method of bore and jack.</p>	NOD

	Permit, Variance and Design Review.		
2008042111	Infineon Legacy Raceway Tire Removal Project, Sonoma County, California California Integrated Waste Management Board Sonoma--Sonoma The California Integrated Waste Management Board has directed Infineon Raceway to remove ten tire piles on property commonly known as Lakeville Property in southern Sonoma County. The Legacy Tire Program was codified by the State Legislature when it amended Title 14 of California Code of Regulations to require property owners to remove (abandoned) tires from all properties in California (for sites containing 500 or more tires) regardless of any prior reason for the tires being on the property. The State Legislature designated the Integrated Waste Management Board as the implementing agency for the Legacy Tire Project. The tire piles are ordered for removal due to the potential threat to health and human safety as potential hazardous waste release if burned and as potential mosquito breeding habitat. The project will remove approximately 10,000 tires from ten localities and reseed the localities with native grasses. The project site extends from the foot of rolling hills adjacent to Highway 121 and then slopes to the west to the top of the hills. The project is located in Assessor's Parcel Number 068-100-057 and 068-100-058. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2007-0526-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Jere Starks, Infineon Raceway.	NOD	
2008059030	Streambed Alteration Agreement 1600-2008-0038-3/THP 1-07-143 SCR Forestry and Fire Protection, Department of --Santa Cruz The applicant proposes the installation of a temporary log crossing on a Class I watercourse, and the replacement of a 48-inch culvert with a permanent bridge on a Class III watercourse. The watercourse crossings are associated with Timber Harvest Plan (THP) 1-07-143 SCR. The California Department of Fish and Game (DFG) is executing a Lake and Streambed Alteration Agreement 1600-2008-0038-3 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Matt Dias/Big Creek Lumber Company.	NOD	
2008058321	Streambed Alteration Agreement (1600-2008-0064-R5) Regarding Arizona Crossing Repair Project Fish & Game #5 San Dimas--Los Angeles The Operator made repairs to the existing Arizona Crossing after it was heavily eroded by a storm in 2005 by adding a concrete slab encasement and rip rap to an existing Arizona crossing. The work occurred within the original project footprint.	NOE	
2008058322	Dudley Ridge Water District/Lost Hills Water District/Semitropic Water Storage District Common Landowner Transfer Dudley Ridge Water District --Kern, Kings DRWD has proposed to transfer of up to 9,000 af of DRWD's 2008 SWP Table A water (allocated to Sandridge Partners) to KCWA (LHWD and SWSD). Sandridge Partners is a landowner in each of the districts and would benefit this year from transferring a portion of their DRWD water to their landholdings and farming operations in LHWD and SWSD. There is no construction, land use change, or modification to existing facilities; no new lands will be brought into production as a result of the requested change.	NOE
