STATE CLEARINGHOUSE

---

**SUMMARY  
OF  
POSTINGS**

**November 1 – 15, 2015**

# STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **November 1 – 15, 2015**.

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov](http://www.opr.ca.gov)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Director

## CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

### USPS:

State Clearinghouse

<b><u>Documents Received on Monday, November 02, 2015</u></b>			
2015111001	Houghton Canal Bridge Replacement Project Fresno County Kerman--Fresno The proposed federally funded project consists of replacing the Houghton Canal Bridge on N. Chateau Fresno Avenue. The project will replace a structurally deficient timber bridge, with posted load limits, with a bridge that meets current safety standards. Road approach improvements will start at approximately 700 feet on both sides of the bridge. Due to low traffic volumes and reasonably short detour of three miles, the roadway will be closed to public traffic. Traffic will be detoured around the project site by way of Belmont Avenue, Grantland Avenue, and SR 180. It is anticipated the contractor will stage on the roadway.	<b>MND</b>	12/01/2015
2015111002	Bel Air Apartment Homes (Murrieta 196) Project Murrieta, City of Murrieta--Riverside The project site consist of one assessor's parcel number 913-160-040. The project proposes the construction of a 916-unit multifamily residential community within a vacant 9.85-acre parcel. The 196 units will be located within nine three-story buildings, situated around community open space and amenities, including a two-story community center and pool, children's play area, and barbecue areas. The community will include 76 one-bedroom units, 114 two-bedroom units, and a 6 three-bedroom units. Each unit will include a balcony or fenced private yard ranging in size from 100 to 127 sf for ground floor units and 70 to 80 sf for upper floor units. Trash enclosures will be 6 feet in height and constructed from concrete block with stucco fronts.	<b>NOP</b>	12/01/2015
2015112003	Downtown Martinez Jail Demolition Project Contra Costa County Martinez--Contra Costa Note: Extended Review  Contra Costa County Public Works Department is working with the Contra Costa County Administrators Office to demolish the existing County Jailhouse building and surrounding granite curb separating the existing parking area to the south of the building from the sidewalk and construction of additional downtown parking. The existing Jailhouse was constructed out of granite in 1904. An addition to the Jailhouse was completed in 1944. The Jailhouse is currently vacant (with the exception of some obsolete storage) and has not functioned as a Jailhouse since 1986. The Jailhouse is currently contaminated with hazardous materials including asbestos and lead-based paint.	<b>NOP</b>	12/16/2015
2015112004	Rancho Murieta North Sacramento County --Sacramento The project request includes large and small lot Tentative Subdivision Maps to create 8 villages, with a total of 827 single-family residential units (299.6 acres); a commercial area of ~39.8 acres, and ~432.8 acres of Parks/Recreation/Open Space. The project requests also includes rezoning the parcels from an overall zoning of A-2 (PD) to RD-4 (PD) (~230.0 acres), RD-5 (PD) (~67.1 acres), GC (PD) (~39.8 acres), and O (PD) (~435.3 acres. Additionally, the request includes a Use Permit to allow casitas and accessory dwellings in accordance with the	<b>NOP</b>	12/02/2015

<b><u>Documents Received on Monday, November 02, 2015</u></b>			
	proposed Design Guidelines, as well as a Special Development Permit to allow deviations from County Zoning Code standards for building heights and minimum setbacks, and a Design Review.		
2015112001	PA-1500206 (SA) (Revised) San Joaquin County --San Joaquin A Site Approval application for an off-site wine cellar facility to include the conversion of an existing 1,000 sf accessory building into a tasting room and wine cellar and the conversion of an existing 250 sf accessory building into a multi-purpose building with a commercial kitchen facility. The proposed off-site wine cellar will have ten marketing events per year with a maximum attendance of thirty people per marketing event. No indoor or outdoor amplified music is proposed at the marketing events.	<b>Neg</b>	12/01/2015
1999102012	Northwest Rocklin Annexation/Sunset Ranchos Rocklin, City of Rocklin--Placer CDFW has executed lake and streambed alteration agreement no 1600-2015-0147-R2, pursuant to section 1602 of the fish and game code to the project applicant, Sunset Ranchos Investors, LLC.  The project is limited to eight separate work areas within the Whitney Ranch Project area that includes work within unnamed seasonal wetland swales and intermittent drainages which are tributaries to Pleasant Grove Creek. The purpose of these stream crossings is to construct utilities and associated access roads to support the required master plan infrastructure for the Whitney Ranch Project area. There will be 0.213 acres of impact to features under the jurisdiction of the CDFW.	<b>NOD</b>	
2015032056	Corralitos Creek Diversion Bank Repair Project Watsonville, City of Watsonville--Santa Cruz The project is limited to the stabilization of the left stream bank (looking down stream) adjacent to the surface water diversion and fishway facilities in Corralitos Creek. Large 3-ton rip rap will be keyed in and installed to conform to the bank contours upstream and downstream of the repair site and will not extend into the low flow channel past the current bank contouring. Approximately 40 cy of rock will be used to construct the project. No rip rap above the existing stream bed grade shall be placed more than four feet from the toe of the stream bank. No rip rap shall be keyed in below the existing stream bed grade more than five feet into the active channel. Streambed material excavated for key-ways will be used as intergrade backfill. Due to the high scour of the location, the rock area will not be vegetated. No vegetation or woody debris will be disturbed as a result of the project. CDFG is executing a lake and streambed alteration agreement no. 1600-2015-0020-3 pursuant to section 1602 of the fish and game code to the project applicant, Steve Palmisano, City of Watsonville.	<b>NOD</b>

<b><u>Documents Received on Monday, November 02, 2015</u></b>			
2015118004	Route 58 Emergency Reopening Caltrans #6 --Kern Emergency project to reopen Route 58 following mud slides.	<b>NOE</b>	
2015118005	Development of the Bizz JOhnsn Trail Extension and Trailhead Improvements Susanville, City of Susanville--Lassen This project will grade and resurface a 0.3 mile unpaved extension to the existing Bizz Johnson National Trail, a parallel 0.3 mile unpaved natural dirt surfaced equestrian trail, two foot paths from side streets to the trail along existing disturbed site; interpretive signs and replacement of entrance sign at street all for public use; safety.	<b>NOE</b>	
2015118006	San Francisquito Creek Wall Repair and Fish Ladder Baffle Repair at Lagunita Dam Fish & Wildlife #3 Menlo Park--San Mateo The project is limited to the repair of a section of rock wall long the bank of San Francisquito Creek and repair to one fish ladder baffle. An approximately 15-foot section of a 30-foot long rock wall located downstream of the Lagunita Diversion Dam has deteriorated and will be replaced. The work area next to the rock wall will be blocked off with netting and fish will be relocated from the blocked area to the adjacent pool. Once the fish are relocated, the rocks inside the netted area that have fallen from the wall into the creek will be gathered by hand and used to repair the wall.	<b>NOE</b>	
2015118007	Lands of Nicholas Grading Violation Restoration Project Fish & Wildlife #3 --Santa Cruz The project is limited to the following activities: Restorative grading and revegetation of approximately 0.23 acres of riparian and mixed riparian habitat located on the upper banks of the San Lorenzo River to address clearing and grading done in violation of Fish and Game Code and Countyof Santa Cruz Code. Re-contouring will involve a Bobcat and/or mini-excavator to restore the disturbed areas to their original grade and topography.	<b>NOE</b>	
2015118008	Humboldt County DFW - Grizzly Bluff Road Bridge Replacement Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Ferndale--Humboldt The primary purpose of the Project is to replace an obsolete bridge that spans Williams Creek on Grizzly Bluff Road with a new bridge that meets current design standards. The current bridge will be replaced with a 60 foot long single span cast-in-place pre-stressed concrete voided slab. The proposed Project would include construction of a temporary detour bridge (flatcar) on the south side of the existing bridge, temporary diversion of Williams Creek, vegetation clearing for detour and construction, demolition of the existing structure, creek bank excavation, construction of the new bridge including pile driven abutments and decommissioning of temporary detour.	<b>NOE</b>

<b><u>Documents Received on Monday, November 02, 2015</u></b>			
2015118009	Humboldt County DPW - Kneeland Road PM 5.02 Roadway Restoration Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Humboldt The primary purpose of the Project is to repair storm damage to Kneeland road at PM 5.02. The proposed Project would include construction of a geogrid-reinforced embankment trench and vertical drain system with underdrain. The cross drain will be replaced with an 18" HDPE pipe cross drain. During roadway repair construction no riparian vegetation is proposed to be disturbed. Temporary impacts to waters of the State will be due to placement of 6.6 linear feet of rock slope protection into the bed and bank of the creek as an energy dissipater to maintain integrity of the channel.	<b>NOE</b>	
2015118010	Jesse Property Lower Road Upgrades Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Sonoma The project entails grading and erosion control upgrades to an existing seasonal road approximately 600 feet in length and installation of a culvert at the location of a former wet crossing of a stream that has failed.	<b>NOE</b>	
2015118011	Avenal Water Transmission Replacement Line Planning Project Avenal, City of Avenal--Kings Planning, engineering, and design work for future infrastructure project.	<b>NOE</b>	
2015118012	Install SMART Irrigation Controllers on Various Routes. (424201) Caltrans #11 --San Diego The project would install SMART irrigation controllers at 84 locations and would protect the states's investment in highway planting per Governor's State of Emergency regarding drought conditions.	<b>NOE</b>	
2015118013	SR-67 Median Barrier (EA:403200) Caltrans #11 --San Diego Work will include installing centerline traffic channelizers, CMS and CCTV cameras, and rumble strip on the outside shoulders.	<b>NOE</b>	
2015118014	SR - 94 Bridge Rail Rehab - 41440 Caltrans #11 Lemon Grove--San Diego The project includes upgrading existing bridge railings, bridge approach rail systems, guardrails, end treatments, and pedestrian facilities to meet the Americans with Disabilities Act (ADA) standards.	<b>NOE</b>	
2015118015	GVMWD 4 Inch Domestic Water Supply Pipeline Replacement Project Golden Valley Municipal Water District Gorman--Los Angeles Approximately 1,900 feet of 4" steel dedicated water suppl pipeline connecting the District well to the District's Water Storage Tank was constructed with no interior coatings in the early 1960's. The water pipeline is now deteriorated and needs replacement to meet current standards of health and safety.	<b>NOE</b>

2009072070	Housing Element Rezone Implementation Program EIR Nevada County Grass Valley, Nevada City, Truckee--Nevada GP12-002; Z12-002; EIR12-002. The proposed project amends the General Plan Land Use and Zoning Designation for select properties to Urban High Density (UHD)/high density residential zoning (UHD/R3) (or the equivalent of UHD/R3) and adds the Regional Housing Need (RH) Combining District (LUDC Sec. L-II 2.7.11) to accommodate a min of 699-units of high density housing as mandated by the State Department of Housing and Community Development.	<b>NOD</b>	
2009101040	Twentynine Palms Water District Wastewater Disposal Project Twentynine Palms Water District Twentynine Palms--San Bernardino The Twentynine Palms Water District has constructed two evaporation ponds to support treatment operations at its Fluoride Removal Water Treatment Plant located near the intersection of Utah Trail and Amboy Road. These ponds were installed based on an environmental document, an Initial Study/MND, adopted by the District in Nov 2009. As part of this original IS/MND, the District proposed to construct a third evaporation pond to manage future effluent discharged from the Plant.	<b>NOD</b>	
2010051001	Mid-Coast Corridor Transit Project San Diego Association of Governments San Diego--San Diego The University of California design approval is for the segment of the project that crosses the SD campus on an elevated structure with two stations located on University property. The larger Mid-Coast Corridor Transit project will extend the existing SD Trolley system from the US-Mexico border north, through Downtown SD, to a northern terminus in University City. The total project is approximately 11-miles in length and includes 9 total stations.	<b>NOD</b>	
2015062094	Cal Waste Materials Recovery & Recycling Facility Expansion and Transfer Station Galt, City of Galt--Sacramento Revised Solid Waste Facilities Permit to allow the following design and operational changes: Increase in max daily tonnage from 150 to 630. Addition of mixed/municipal solid waste, green waste and construction and demolition debris. Increase in traffic volume from 226 vehicles per day to 396 vehicles per day. Increase in permitted area from 6.29 acres to 6.68 acres.	<b>NOD</b>	
2015071043	CSUSB Student Housing and Dining Commons California State University Trustees San Bernardino--San Bernardino The proposed project is comprised of an approximate 125,000 sf student housing facility (416 beds) and an approximate 50,000 sf dining facility in the northern portion of the City of San Bernardino. The project will be located in existing Parking Lot E, adjacent to existing student housing.	<b>NOD</b>

	having the potential to be affected by the proposed project: aesthetics, air quality and greenhouse gas emissions; biological resources; energy; geology and soils; hazards and hazardous materials; hydrology and water quality; noise; public services; solid and hazardous waste; transportation and traffic; and mandatory findings of significance. However the analysis of these environmental topic areas in the Draft MND concluded that the proposed project would not generate any significant adverse environmental impacts. The Facility is included in the DTSC EnviroStor Database due to historic release.		
2015111010	San Diego River Trail - Qualcomm Stadium Segment San Diego Association of Governments San Diego--San Diego The proposed project would consist of Class I bikeway and is located in the Mission Valley community of the City of San Diego, along an approx. 0.8 mile segment extending eastward from the terminus of Fenton Parkway along a vegetated slope behind the Fenton Marketplace shopping center and through the southern portion of the Qualcomm Stadium parking lot to connect with Rancho Mission Road. Most of the trail would occur on existing paved surfaces within the stadium parking lot. The San Diego River is located adjacent to the trail on the south; however, the trail would not encroach into the river corridor. Construction of the trail would remove a total of approx. 56 parking spaces within the Qualcomm Stadium parking lot. These spaces are not public parking spaces, but are utilized for events at the stadium.	<b>MND</b>	12/03/2015
2015111011	Irvine Lake Pipeline North Conversion Project Irvine Ranch Water District Orange, Irvine--Orange IRWD proposes the conversion of the northern section of the Irvine Lake Pipeline (ILP) from an untreated water system to a recycled water system. The project would include construction of a 2.4 million gallon recycled water reservoir on 2.7 acres at 1802 East Santiago Canyon Road, Orange; conversion of an existing Zone A-C booster pump station at the Rattlesnake Complex located north of Portola Parkway between Jeffrey Rd. and Culver Dr. in Irvine to a Zone A-C+ booster pump station; reconfiguration of the Orchard Hills Facility located at 10570 1/2 Woody Knoll, Irvine, to serve as a back-up source of recycled water; and construction of a 20-inch Zone C+ pipeline along a portion of Jamboree Road from the Baker Raw Water Pump Station northerly to the intersection with Santiago Canyon Road and a 10 inch pipeline along a portion of Santiago Canyon Road.	<b>MND</b>	12/03/2015
2015111012	San Ysidro Community Plan Update and El Pueblito Viejo Village Specific Plan EIR San Diego, City of San Diego--San Diego The proposed update for the San Ysidro Community Plan (SYCPU) and El Pueblito Viejo Village Specific Plan (EPVVSP) would be consistent with and incorporate relevant policies from the 2008 City of San Diego General Plan, as well as provide a long-range, comprehensive policy framework for growth and development in the San Ysidro community. The San Ysidro Community Plan, which includes El Pueblito Viejo Village, was originally adopted in 1990, and was last amended in 2003. Separate plans are being prepared for the San Ysidro community and El Pueblito Viejo Village, and would be evaluated in a single PEIR.	<b>NOP</b>	12/03/2015

<b><u>Documents Received on Wednesday, November 04, 2015</u></b>			
2015111013	Midway-Pacific Highway and Old Town San Diego Community Plan Updates San Diego, City of --San Diego The project is the update of two adjacent Community Plans - Midway-Pacific Highway and Old Town San Diego. The proposed updates for both plans provide a long term comprehensive policy framework for growth and development in these communities, and would serve as the basis for guiding a variety of other actions such as streetscape, public facilities, and infrastructure improvements. The updates incorporate relevant policies from the 2008 City of San Diego General Plan and provide community specific land use designations, and policies and recommendations. Each Community Plan contains introduction and implementation chapters and the following elements: Land Use; Mobility; Urban Design; Economic Prosperity, Public Facilities, Services, and Safety; Conservation; Recreation; Noise; and Historic Preservation Although separate community plans are being prepared for each community, the updated Community Plans would be evaluated in a single PEIR.	<b>NOP</b>	12/03/2015
2015112005	2747 and 3045 Park Boulevard Office Projects Palo Alto, City of Palo Alto--Santa Clara The proposed project would involve the construction and operation of two office buildings, one at 2747 Park Boulevard and one at 3045 Park Boulevard. The applicant is the same for both projects. The EIR will analyze the impacts that would result from construction of both of the projects simultaneously. The 2747 Park Blvd. project would involve demolition of the existing 4,800 sq. ft. commercial building and construction of a new 33,323 sq. ft., three story R&D/office building with parking and landscaping. An existing oak tree in the center of the site would be preserved. The 3045 Park Blvd. project would involve demolition of the existing 17,756 sq. ft. two story commercial building and construction of a new 29,120 sq. ft., two story R&D/office building with parking and landscaping.	<b>NOP</b>	12/03/2015
2010032103	PA-0900199 (Revisions of Approved Actions) San Joaquin County Stockton--San Joaquin Revise the existing Major Waste Tire Facilities Permit to allow the facility to store up to 40,000 waste tires at any time, plus limited storage of an additional 2,936 tons (equal to 296,300 PTE) of altered waste tires on the premises, from May 15th to September 15th each year.	<b>NOD</b>	
2011022008	Vanden Meadows Specific Plan and Development Project Vacaville, City of Vacaville--Solano The Central Valley Regional Water Board is issuing a 401 Water Quality Certification for the subject Project. The project consists of grading and filling existing wetland swales and a roadside ditch in preparation for future construction of residential housing.	<b>NOD</b>	
2014041092	Oak Creek Escondido, City of Escondido--San Diego The project is implementation of a RP for excavation and offsite disposal of the impacted soil at the Oak Creek Development Project. The recommended remedy for the site also include a Land Use Covenant to prohibit the use of ground water under the entire Site.	<b>NOD</b>

2015118058	Middle Fork Ditch Pipeline and Hydro Project Calaveras Public Utility District --Calaveras Planning and Environmental Studies to facilitate Construction documents for water supply project. Study funding provided by California Drinking Water State Revolving Fund.	<b>NOE</b>	
2015118059	Mechum Boat Dock Replacement Regional Water Quality Control Board, Region 5 (Central Valley), Redding --Contra Costa The Mechum Boat Dock Replacement Project consists of replacing the old docks, gangways, steel pilings with new docks, gangways and pilings. The new dock will expand the surface area by 970 square feet. New piling will be installed using a floating and crane with a plastic cushion and 3,000 pound hammer attachment. The project will permanently impact 0.022 acre(s) of waters of the United.	<b>NOE</b>	
2015118060	Rio Vista Dock Replacement Rio Vista, City of Rio Vista--Solano Replacement of the Rio Vista guest dock and gangway, which are deteriorating and loosing functionality. The total structure area will reduce slightly with the new dock and gangway installation. The existing piles will be used; no new piles will be driven. No in-water work will be performed.	<b>NOE</b>	
2015118061	Purchase and Operation of Portable Control Equipment Metropolitan Water District of Southern California --Los Angeles Metropolitan proposes to purchase and operate portable control equipment at Metropolitan facilities throughout Los Angeles County. The portable control equipment (negative air machines, fume extractors, dust collectors, etc.) which contain HEPA filtrations, provide ventilation and particulate and toxic containment emissions control for operations including but not limited to sandblasting and plasma arc cutting.	<b>NOE</b>	
2015118062	Apogee Chemical Inc. Toxic Substances Control, Department of Richmond--Contra Costa These further restrictions will prohibit the construction of residences without an evaluation of potential soil vapor intrusion of volatile organic compounds into future buildings and the implementation of engineering controls if deemed necessary. The evaluation and implementation of engineering controls will be subject to DTSC approval.  The project also modifies the cleanup goal for vinyl chloride (VC) in groundwater from 3.8 micrograms per liter to 47 micrograms per liter. The proposed cleanup goal is protective of human health and the environment under the current industrial or commercial land use scenario. This change will allow discontinuation of groundwater monitoring as groundwater concentrations will have attained the revised cleanup goal for four sampling events over a period of approximately two years.	<b>NOE</b>

2015111018	Foothill Terrace Gardens Project - TTM 16910 & Development Permit P-14-08 San Bernardino, City of San Bernardino--San Bernardino The proposed project includes the development of a 5.14 acre site located immediately north of Foothill Blvd. (SR-66) (APN 0142-041-15). The Project includes the Foothill Terrace Gardens, a gated 43-unit detached condominium community. The proposed development includes an amendment to the existing lot line resulting in the dedication of approx. 0.15 acres, and approx. 2.0 acres of landscaped space and 0.89 acres of useable landscaped open space. Two access points will be available from Terrace Road. Along Foothill Blvd (SR66), the site would be developed to have reverse frontage. The Project site has been previously disturbed and is served by existing infrastructure such as roads and sidewalks. The site is devoid of sensitive plants and wildlife species.	<b>MND</b>	12/04/2015
2015111019	Rondell Oasis Hotel Project Calabasas, City of Calabasas--Los Angeles The proposed project involves the construction of a 4 story hotel with up to 127-rooms, a pool and surface parking on an approx. 4.13 acre property. The project site is on the east side of Rondell Street, east of Las Virgenes Road and adjacent to the Ventura Freeway southbound on-ramp. The hotel would have a building footprint, including the designated trash area, of approx. 20,410 sq. ft. gross floor area of 72,954 sq. ft. As part of the development site, Rondell Street would be vacated by the City, adding an area of approx. 9.87 acres to the project site. Rondell Street would be paved beyond current terminus along the project frontage and terminate at the north end of the project site. Vehicular access to the new hotel would be from Rondell Street off of Las Virgenes Road.	<b>MND</b>	12/04/2015
2015112011	Miner Slough Bridge Project Caltrans #4 Rio Vista--Solano Caltrans proposes to rehabilitate or replace the existing bridge on SR 84 over Miner Slough (the Minor Slough Bridge Project). The project proposes two alternatives for the bridge based on a current planning study. The first alternative, Alternative 1 (bridge replacement), is to build a new swing-span bridge approx. 100 feet west of the existing alignment. The second alternative, Alternative 2 (bridge rehabilitation), is to rehabilitate the existing bridge.	<b>MND</b>	12/04/2015

	cafe and ice cream stand with indoor and outdoor seating. Project parking would be located underground (below the two-story hotel) and at grade. A total of thirty nine parking spaces are proposed. The project consists of a single lot of record located at 2655 Shell Beach Road east of the intersection with Spyglass Road. total site area (gross) is 0.56 acres. The project site is vacant and was previously occupied by a gasoline service station demolished in 2008. The project also includes a request for a reduction in off-street parking (39 parking spaces are proposed instead of the required 42 parking spaces) as allowed by Zoning Code Section 17.34.050(A)(1).		
2015111021	Granger Solar San Diego County --San Diego Note: Extended Per Lead	<b>MND</b>	12/21/2015
	The project is a Major Use Permit (MUP) for a solar energy project. The project consists of an approx. 2.5 megawatt solar facility installed upon approx. 27 acres of an approx. 40-acre project site. The proposed project consists of the construction, operation and maintenance of a solar energy generating facility. The site will be served by the Valley Center Municipal Water District.		
2015111024	Montezuma Pipeline/Mid-City Pipeline Phase 2 SDP (PTS No. 406277) San Diego, City of La Mesa, San Diego--San Diego A Site Development Permit for the installation of approx. 1.16 miles of new water pipelines which consists of 5,680 linear feet of new 66" diameter Cement Lined and Coated Steel transmission main and 422 LF of 8-inch PVC distribution main. The 66-inch transmission main will run from the Alvarado Water Treatment Plant (AWTP), located at the intersections of Lake Murray Blvd. and Kiowa Dr., to the intersection of 68th and El Cajon Blvd. The northern terminus of the pipeline will be connected to Existing Valve Vault No. 3 located where the Earl Thomas Reservoir Outlet Pipeline intersects the Clear Wells Interconnect Pipeline at the AWTP. The south terminus will be connected to the Mid-City Pipeline Phase 1 project water lines which start on El Cajon Blvd. between 68th and 69th Streets. The project also includes replacement of a remote control panel and antenna mast for the Murray 2nd Pipeline, as well as installation of insert flow meters for the Murray 2nd Pipeline and the Mid-City Pipeline. The majority of the project alignment will be constructed using open trenching. The pipeline will be tunneled and no trenching will be required at three locations: 1) crossing I-8; 2) under the San Diego County Water Authority 108-inch main on Lake Murray Blvd.; and 3) under the San Diego Water Authority 48-inch main on El Cajon Blvd. For the I-8 crossing, the tunnel launching pit will be located in the Denny's parking lot at 6970 Alvarado Road on the south side of I-8, and the receiving pit will be on the north side of I-8 in the City of La Mesa within the Lake Murray Blvd. public right of way. Both tunneling pits will be sited in existing development areas that do not contain sensitive biological resources.  There will be excavations in unpaved areas at the connection with Valve Vault No. 3 at the AWTP and at the Murray 2nd Pipeline. Existing Valve Vault No. 3 is on the City owned land adjacent to Lake Murray Blvd. The excavation for the Murray 21st Pipeline is partially within a Multiple Habitat Preservation Area. It is on City owned property near the Del Cero Baptist Church at the intersection of Pennsylvania Lane and Delaware Ave. Related work will include traffic control, best management practices for erosion control and storm drain inlet protection,	<b>MND</b>	12/07/2015

2013111026	<p>Vision 2020 Facilities Master Plan Orange Coast College Costa Mesa--Orange</p> <p>Orange Coast College is proposing to implement the facilities master plan to develop modern teaching and learning facilities. Improved circulation in and around campus would increase accessibility, improve pedestrian safety, and enhance the overall connectivity of campus uses. New buildings proposed include a Planetarium, Language Arts and Social Sciences building, Chemistry building, Multidisciplinary building, Dance facility, Student Union, and 818-bed student housing project.</p>	<b>NOD</b>	
2014051029	<p>Cimarron Ridge Menifee, City of Menifee--Riverside</p> <p>Specific Plan No. 2013-247 proposes the adoption of the Cimarron Ridge Specific Plan which includes a land use plan designation of planning areas, circulation plan, development standards, design and landscape guidelines for a 240.3 acre area and a max of 756 single-family residential dwelling units. The Specific plan would set forth guidelines for landscape and architectural design, infrastructure plans, phasing of development and administrative procedures. Existing infrastructure such as water, sewer, storm drain and roadways will also be expanded as part of the Specific Plan, which will range from: upgrades and widening of the existing roadways; construction of new roads and signals; construction of new and expanded water pipelines; construction of new and expanded sewer pipelines; construction of new flood control facilities; and construction of water quality basins to improve the quality of stormwater runoff.</p> <p>Tentative Parcel Map 36657 proposes to subdivide 240.3 acres into 7 parcels for financing and land conveyance purposes.</p> <p>Tentative Tract Map 36658 proposes to subdivide approximately 240.3 gross acre project site into 756 medium density single family residential lots, and other lots for open space, recreation, and drainage purposes.</p> <p>General Plan Amendment No. 2014-016 proposes an amendment to the City's General Plan to change the land use designation for the project site of 2.1-5 du/ac residential to specific plan to reflect the proposed specific plan and its land use designations. In addition, a technical correction is proposed to rectify mapping errors which resulted in inaccurate depictions of the alignment of Goetz Road. Specifically, Exhibit C-3 Roadway Network of the General Plan recognizes two alignments for Goetz Road at the intersection with Valley Blvd: 1) the existing, built alignment of Goetz Road that would merge with Valley Blvd, and, 2) the re-alignment of Goetz Road that would include a controlled intersection with Valley Blvd.</p> <p>Change of Zone No. 2014-017 proposes to change the zoning of the subject site from One-Family Dwellings, One Family Dwellings - 10,000 sf min lot, and Open Area Combining Zone Residential to Specific Plan to reflect the proposed specific plan and its land use designations and development standards.</p>	<b>NOD</b>

2014081056	<p>Countywide Water Conservation Program San Luis Obispo County --San Luis Obispo</p> <p>The project is known as the Countywide Water Conservation Program. The program is intended to reduce further decline of impaired groundwater basins in the County. The program is also intended to require countywide water conservation provisions. Specifically, the program includes a water neutral development component and a water conservation component. The water neutral development component requires all new development to offset new water demand at a 1:1 ratio. This applies to properties that overly the Paso Robles Ground Water Basin and areas within the Nipomo Mesa Water Conservation Area. In addition, agricultural uses that overly the Paso Robles Groundwater Basins must offset water demand at a 1:1 ratio for any new or expanded crop production. The Countywide water conservation component requires several specific measures to implement water conservation.</p>	<b>NOD</b>	
2014102037	<p>Greenwood Avenue Culvert Replacement Project Napa County Calistoga--Napa</p> <p>The project includes removing a failed culvert crossing, installing a roughened channel fish passage structure, enhancing riparian vegetation, and installing California freshwater shrimp habitat structures.</p> <p>The project will result in impacts to California freshwater shrimp habitat including temporary impacts to 9,000 sf; the project will permanently remove 17 linear ft of California freshwater shrimp habitat. The project is expected to result in incidental take of California freshwater shrimp, which is designated as an endangered species under CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of project implementation.</p>	<b>NOD</b>	
2014112018	<p>El Dorado Springs 23 Tentative Subdivision Map / A14-0005/Z14-0009/TM14-1514 El Dorado County --El Dorado</p> <p>CDFW has executed lake and streambed alteration agreement no. 1600-2014-0286-R2, pursuant to section 1602 of the fish and game code to the project applicant, Standard Pacific Homes.</p> <p>The project is limited to the development of 49 single family residential lots with an average gross density of 2.26 units per acre along with approximately 4 acres that will be designated as Open Space and Landscape lots, and approximately 1 are designated for future right of way for widening of White Rock Road. On site infrastructure associated with the project will include water, sewer, storm drain improvements, and the construction of internal access roads, with two access points to White Rock Road. A right in and right out only onto White Rock Road will also be constructed at the north end of the development. The 2 storm drain outfalls which will lead to the unnamed tributary of Carson Creek will be outside of the Department's jurisdiction but may indirectly impact the creek by increasing runoff into the creek and potentially causing erosion of the creek's banks. A rock lined ditch will be constructed along the northern perimeter of the project site and empty into the unnamed tributary to Carson Creek. The depressional seasonal wetland adjacent to the unnamed tributary of Carson Creek will be graded and partially lined with rip rap where a storm drain outfall is located. The area designated as</p>	<b>NOD</b>

<b><u>Documents Received on Friday, November 06, 2015</u></b>			
2015041017	<p>Open Space and landscape lots will be partially graded during construction activities. Any disturbed area will be hydro-seeded. The depressional seasonal wetland located in this area designated as Open Space and Landscape Lots will be permanently impacted.</p> <p>Permittee-Responsible Off-Site Mitigation Preserve University of California, Merced Merced--Merced, Madera</p> <p>As approved by UC and County of Merced, the project involves the construction and operation of a major research University campus in Merced County which will sustain up to 25,000 full time students and a contiguous associate community to support the needs of the university. The ITP and Minor Amendment No. 1 (collectively, the ITP as amended) will result in permanent impacts to 1,870 acres of California tiger salamander, Swainson's hawk, and San Joaquin kit fox habitat, portions of which are occupied by succulent owl's clover; Colusa grass, and San Joaquin orcutt grass. Major Amendment No. 2 revises the Project Description to include off-site wetland restoration work. The wetland restoration work will result in the conversion of 35.5 acres of CTS upland habitat to potential CTS breeding habitat, and result in temporary impacts to 80 acres of CTS upland habitat. The Project, as modified, is expected to result in incidental take of CTS, Swainson's hawk, and San Joaquin kit fox which are designated as threatened species under CESA; and succulent owl's clover, Colusa grass, and San Joaquin orcutt grass which are designated as endangered species under CESA. The ITP, as amended, as issued by CDFW, authorizes incidental take of these species that may occur as a result of the project. Major Amendment No. 2 documents the location and description of the wetland restoration work, including details of the increased impacts to the Covered Species and an analysis of the potential for take; adds measures to minimize take and fully mitigate the wetland restoration-related impacts to the covered species; removes a remnant reference to the originally-required small mammal burrow excavation activities which was overlooked during preparation of amendment no. 1; and allows the permittee to use alternative exclusion fence designs with CDFW written approval. In major amendment no. 2, the increased habitat disturbance is mitigated by an increase in the compensatory mitigation required of the permittee.</p>	<b>NOD</b>	
2015072004	<p>Bullock Bend Mitigation Bank Project Yolo County --Yolo</p> <p>The project is a Use Permit, a Flood Hazard Development Permit, grading permit, and a Williamson Act Open Space Agreement, to construct a mitigation bank for juvenile salmonid (salmon) and Swainson's hawk nesting habitat. Westervelt Ecological Services, LLC, the applicant and landowner, is proposing to establish the Bullock Bend Mitigation Bank on approximately 116.24 acres of a 119.65-acre property in northeast Yolo County. The project would provide mitigation credits to offset impacts to salmonids and Swainson's hawk nesting habitat as well as impacts to floodplain and riverine riparian habitats as regulated by state, federal and local agencies.</p> <p>The project site is an oxbow of the Sacramento River and is bordered by the Sacramento River on three sides. The interior 88 acres of the oxbow is a cultivated field. Agricultural land surrounds the project site on the west side in Yolo County and across. The project would breach the existing farm berm along the Sacramento River and excavate back-water channels to restore floodplain</p>	<b>NOD</b>

	function and create seasonal aquatic habitat on approximately 96 acres that would be newly inundated during Sacramento River flood events.		
2015118084	Carmel River Lagoon Large Woody Debris Augmentation California State Coastal Conservancy Carmel-by-the-Sea--Monterey Placement up to 7 wood structures within the Carmel River Lagoon approximately middle of open water (sandbar). Project will increase habitat complexity which will benefit Steelhead trout and other fish species.	<b>NOE</b>	
2015118085	Temporary Emergency Permit for Treatment of Hazardous Waste, Fresno County, Department of Public Health, CA. Toxic Substances Control, Department of --Fresno The California department of Toxic Substances Control pursuant to authority granted under Chapter 6.5, California Code of Regulations, Title 22, Section 66270.61 has issued an Emergency Permit to Fresno County of Public Health to remove, transport, and treat hazardous waste. The hazardous waste to be treated consists of: 100 grams of 2-4-dinitrophenylhydrazine and 25 grams of nitroguandine. It has been determined that these items are or may be highly reactive and/or explosive and must be safely transported to be treated offsite. The items are currently being stored in the public health lab which is in the basement of a public building located at 1221 Fulton Mall, Fresno, CA 93721. The chemicals are a potential safety hazard and present an unacceptable risk for continued storage. Fresno County Department of Public Health does not have a permit for the treatment of the hazardous waste; therefore DTSC has determined that as a safety precaution to prevent an accident or severe injury, an emergency permit should be issued for Fresno County Sheriff's Department Explosive Ordnance disposal (EOD) unit to remove, transport and treat the hazardous waste.	<b>NOE</b>	
2015118086	Habitat Restoration at the Palos Verdes Nature Preserve Rancho Palos Verdes, City of Rancho Palos Verdes--Los Angeles The City-owned Palos Verdes Nature Preserve provides approximately 1,400 acres of protected open space for the protection of biological resources and passive recreation. The PVNP habitat restoration project will restore 5 acres of coastal sage scrub habitat at the Alta Vicente Reserve (a sub-area of the overall PVNP). The project will be funded by the Los Angeles County grant and administered by the Palos Verdes Peninsula Land Conservancy (PVPLC) who will remove invasive plants and install 10,000 native plants. The project will provide habitat for the coastal California gnatcatcher.	<b>NOE</b>	
2015118087	Swarthout Canyon Pipeline Long-Term Exposure Prevention Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --San Bernardino The proposed project consists of the installation of concrete revetment mats over a 8" petroleum transmission pipeline exposed by streambed erosion, and re-contouring of the streambanks. The channel will be widened and sandbags and straw bales will be placed at the downstream end to prevent erosion of the streambed.	<b>NOE</b>

2015118113	<p>Central Plant Reclaimed Water/Capitol Park Irrigation Project General Services, Department of Sacramento--Sacramento</p> <p>To meet the goals established in Executive Orders B-18-12 and B-29-15, the Department of General Services proposes to use water reclaimed from the Central Plant operations to irrigate Capitol Park. Prior to implementation of Drought irrigation restrictions, the State purchased potable water from the City to irrigate Capitol Park. In addition to re-using water efficiently, the project will reduce the fees to purchase irrigation water as well as reduce the fees to discharge water into the municipal sewer system.</p> <p>The project consists of installation of a 100,000 gallon underground water storage tank and a chemical feed system to adjust the water pH and control biological growth in the tank; installation of pumps, power, and controls at the Central Plant; and installation of a new 4 inch purple PVC pipeline connecting the Central Plant to Capitol Park using the existing utilidor. Project components in Capitol Park include installation of approximately 2,900 linear feet of new direct buried 4 inch purple PVC pipeline along the 10th Street, N Street and 16th Street sidewalks at a depth of 18-24 inches; installation of mixing valves at two irrigation meters and installation of backflow preventers to ensure that reclaimed water does not enter potable water lines. Informational signage will be installed at each of the parks approximately 20 entry-ways.</p>	<b>NOE</b>	
2015118114	<p>Lower Otay Reservoir Sluice Gates Replacement San Diego, City of San Diego--San Diego</p> <p>The project consists of the replacement of two (2) existing 6-foot diameter reinforced concrete pipes (RCP) and replacement of two (2) existing manually operated sluice gates (8-foot wide by 8-foot high) on the Lower Otay Auxiliary Spillway to allow emergency drawdown of the reservoir (10% drawdown by</p>	<b>NOE</b>

2015011013	1311 Cahuenga Mixed-Used Project Los Angeles, City of Los Angeles, City of--Los Angeles The Project would involve the demolition of the existing buildings and construction of a 7-story residential mixed-use building ranging from approximately 82 feet to 110 feet in height, based on relative elevation changes in the existing surrounding terrain, which generally slopes north to south. Existing buildings proposed for demolition include one single-family residence (single-story), a vacant 3-unit apartment building, two office buildings (one 1-story and one 2-story structure), an auto repair facility, and surface parking lots. The Project would provide 369 residential units, including 12 live/work units and 30 micro units, approximately 2,570 sf of commercial space on the ground floor and two levels of subterranean parking. Approximately 40,900 sf of open space is proposed, which includes space on the ground floor accessible to the public, an outdoor recreation deck on the 2nd floor, a roof terrace on the 7th floor, a covered deck on the 2nd floor, and a gym and recreation room. Parking would be provided in a two-level	<b>EIR</b>	01/04/2016

	subterranean garage, at ground level within the building, and in the mezzanine level above-ground. The Project would include approximately 567 parking spaces and 410 bicycle parking spaces.		
2015031029	Avenue 116 Canal Expansion Project Pixley Irrigation District --Tulare The project will provide surface water to farmland from Ave. 116 Canal in order to alleviate overdraft of groundwater. The proposed project objectives are to construct an open channel canal and recharge basin to connect over 800 acres of farmland currently not being served with surface water from the Ave. 116 Canal within the Pixley Irrigation District. The project will obtain easements as the open channel canal will cross country roads and right of ways, and will construct turnouts in Ave. 116 Canal at Rd. 148 as well as install 1 mile of open channel canal heading south along Road 148, and an open space channel canal will head east to west from Road 148 at Ave. 108 and will terminate into the proposed recharge basin. The recharge basin will ensure excess water will be returned to groundwater.	<b>MND</b>	12/11/2015
2015071041	Tentative Tract Map No. 250, Kingston Subdivision Bishop, City of Bishop--Inyo This revised Initial Study / MND evaluate the potential environmental impacts anticipated to result from implementation and construction of Tentative and Final Tract Map No. 250 that is proposed by Bob Kingston. The proposed project would include removal of the existing Bishop Nursery and associated improvements and construction of 15 graded sites to accommodate single family dwellings, construction of a main access roadway, drainage improvements, and extension of utilities to serve the individual parcels. Proposed parcels would generally be rectangular in shape and would range in size between 5,104 sf to 8,232 sf.	<b>MND</b>	12/11/2015
2015111039	Recycled Water Interconnection Camrosa County Water District Camarillo--Ventura The proposed project is located within the Camrosa Water District (Camrosa) service boundaries in unincorporated Ventura County, south of the City of Camarillo. Camrosa desires to construct approx. 3,000 linear feet of 16-inch recycled water pipeline connecting the Camarillo Sanitary District's (CamSan) Wastewater Treatment Plant effluent pipeline to existing surface water ponds maintained by Camrosa (proposed project). The proposed pipeline would connect via a turnout valve at the Cam San effluent pipeline to allow a minimum of 500 acre feet per year of tertiary-treated Title 22 effluent to be received by Camrosa for direct sale to Camrosa customers and the Pleasant Valley County Water District.	<b>MND</b>	12/11/2015
2015111040	Williams Homes / River Rock Project (City Project No. 2014-CDP-02) Santa Paula, City of Ventura--Ventura Project Applicant is proposing to redevelop the Project Site to provide a new residential subdivision with approx. 54 residential lots including 53 new homes and the retention/rehabilitation of the Hardison House main residence and barn/stables. Therefore a total of 54 single-family homes will be located on the future Project site. The proposed project would require the demolition of all existing structures on site with the exception of the Hardison House main	<b>MND</b>	12/11/2015

	residence and barn/ stables, which are recognized as a historic resource pursuant to CEQA and will be retained on site. Approx. 9.18 acres of the project site will remain as open space on lots designated as A through D on the proposed Venting Tentative Tract Map No. 5928.		
2015112023	Humboldt Bridge Preventative Maintenance Project Huntington Beach, City of Huntington Beach, Seal Beach--Orange Project site is located within the following General Plan designations : ROW (Right of Way).	<b>MND</b>	12/11/2015
	Draft MND No. 2015-003 analyzes the potential environmental impacts associated with a proposal to perform maintenance activities on the existing Humboldt Drive bridge that are intended to restore the integrity of its original design.		
2015112024	Oak Springs/Candlestick Road Storm Water Improvements Project Orinda, City of Orinda--Contra Costa The city proposes to provide a new storm drain to carry runoff from Candlestick Road across several private properties and discharge into the existing drainage system at SR 24. The proposed project would also abandon the existing 18-inch storm drain pipe that runs beneath the 19 Patricia Road garage. A new, longer storm drain pipe would be routed around this garage and ultimately down to the existing storm drain inlet adjacent to SR 24. The relocated pipe would be below ground and west of the existing gully.	<b>MND</b>	12/11/2015
2015112026	County Rountree Rehabilitation and Re-Entry Facility Santa Cruz County Watsonville--Santa Cruz Proposal to demolish approx. 5,692 sq. ft. of an existing County jail building, to construct additions totaling approx. 14,629 sq. ft. to include a new 7,647 sq. ft. inmate residential wing, new 2,891 sq. ft. visitation building, 2,700 administration addition, 1,391 sq. ft. storage addition, and to remodel approx. 14,256 sq. ft. of existing inmate residential area to a new program training area and 200 sq. ft. to the medium security facility. The project includes grading of approx. 3,800 cy. of cut and 4,800 cy. of fill, installation of new perimeter security fence, storm water improvements, outdoor recreation, expanded service yard and inmate inact sally ports, removal of 28 existing trees, planting of 28 replacement trees, and site landscaping.	<b>MND</b>	12/11/2015
2015111038	Venice Auxiliary Pumping Plant Project Los Angeles, City of Los Angeles, City of--Los Angeles Construction of an auxiliary pumping plant and associated facilities in support for the existing Venice Pumping plant (VPP). The proposed project would provide additional reliability and critical redundancies necessary to support the City of Los Angeles' wastewater conveyance and processing system. It would be a sized to supplement the pumping capacity of the VPP for a combined ultimate peak flow of 87 million gallons per day (mgd), reflecting wet weather flows of a 10-year storm event. Temporary and permanent closure (vacation) of Hurricane Street between Canal Court and Esplanade would be required. A portion of Canal Court (northern property boundary to Ballona Lagoon) would also be temporarily closed during construction. Two laydown areas (southwest and east of the proposed project) would be used during construction.	<b>NOP</b>	12/11/2015

	3,120 round trips annually. Depending on seasonal and economic factors, mining operations will require one to two employees to excavate material and load trucks with sand for transport off-site. The site will be accessed from the north side of the project from Road 224. The customer base from the proposed project is anticipated to remain mostly from within Tulare County.		
2015111041	Porterville 5th Cycle Housing Element Porterville, City of Porterville--Tulare The 2015-2023 Housing Element is a Component of the Porterville 2030 General Plan. The Housing Element contains the City's goals, policies, and strategic plans for addressing the most critical housing needs in the community over the next eight years. it is designed to provide the City with a coordinated and comprehensive strategy for promoting the production of safe, decent, and affordable housing within the Community.	<b>Neg</b>	12/14/2015
2015112027	City of Manteca Housing Element Manteca, City of Manteca--San Joaquin The Housing Element is a comprehensive statement by the City of Manteca of its current and future needs and proposed actions to facilitate the provision of housing to meet those needs for persons at all income levels. The Housing Element is one of the seven General Plan elements mandated by the State of CA, as articulated in Sections 65580 to 65589.8 of the Government Code. State law requires that the Housing Element consist of "... an identification and analysis of existing and projected housing needs and a statement of goals, policies, quantified objectives, financial resources, and scheduled programs for the preservation, improvement and development of housing." The residential character of the city is, to a large extent, determined by the variety of its housing and the locations and maintenance of the housing. The Housing Element is an official response to the need to provide housing for all economic segments of the population, establishing goals, policies, and programs that will guide City decision making and set forth an action plant to implement these housing programs through 2023.	<b>Neg</b>	12/14/2015
2015112029	Dakota Shy Winery #P-14-00335-UP and #P14-00336-VAR Napa County St. Helena--Napa Approval of a Use Permit to allow the following: a) increase production from 1,000 gallons per year up to 14,000 gallons per year; b) Increase Tours and tastings; c) Add Marketing events; d) Increase in the number of employees; e) construction of a new winery building totaling 6,060 s.f. including 397 s.f. tasting room, and a 2,370 s.f. uncovered outdoor area; f) Construction of a private water system; g) Construction of a wastewater treatment system; h) Construction of an on-site detention basin to capture stormwater; i) Construction of eight additional parking spaces for a total of 14 parking spaces; j) Construction of a one way loop access driveway to the proposed winery buildings. The project also includes a Variance requests to encroach 503 feet into the required 600 feet setback from Silverado Trial.	<b>Neg</b>	12/14/2015

2014071009	Salsipuedes Creek Bridge Replacement Project Caltrans #5 Lompoc--Santa Barbara Note: Response to Comments  Caltrans proposes to replace the existing Salsipuedes Creek Bridge (Br. No. 51-95) on Highway 1 in Santa Barbara County. Highway 1 through the project area consists of a rural two-lane road passing through agricultural land. The Salsipuedes Creek Bridge is located at post mile 15.6, approximately 3.5 miles southeast of the city of Lompoc.	Oth	
2015091028	Agoura Park Agoura Hills, City of Agoura Hills--Los Angeles Note: Response to Comments  A request to build a 45,000 sf two story fitness facility and a 4,000 sf one story retail/restaurant building on a previously developed property including merging two parcels into one. The request includes removing 2 oak trees and impacting one other. The fitness facility design requires a variance for setback, height, and encroachment into the landscape planter on one of the street frontages. A sign permit is required for the signage on the property along with a variance to increase the maximum allowable size of the primary and secondary signs on one of the buildings.	Oth	
2015021018	Azusa TOD Specific Plan Azusa, City of Azusa--Los Angeles The Azusa TOD Specific Plan area encompasses 308 acres, primarily comprised of the 0.25 mi radius around the two new Azusa Gold Line stations as well as all or portions of Downtown Azusa, the City's Civic core, and the Foothill Blvd corridor. The Specific Plan identified development potential of 403,000 sf of retail, services, and office uses; a 150-room hotel; and 840 multi family residential units within the plan area. The City Council approved Resolution No. 2015-C56, certifying the Final EIR and Resolution No. 2015-011, approving the specific plan.	NOD	
2015082049	Flood Protection General Plan Amendment (PLN14-00187) Placer County --Placer Amendment to the Placer County General Plan Land Use Element, Natural Resources Element, Public Services and Facilities Element, and Health and Safety Element consistent with the requirements of the Central Valley Flood Protection Act of 2008 and its subsequent amendments, which requires cities and counties to amend their general plans to strengthen the linkage between land use planning and floodplain management practices and provide new requirements and standards for floodplain protection.	NOD	
2015091058	San Juan Creek Ocean Outfall Junction Structure Rehabilitation Project South Orange County Wastewater Authority Dana Point--Orange The proposed project consists of the inspection, assessment, and rehabilitation of the Junction Structure. Located at Doheny State Beach, adjacent to San Juan Creek and approximately 200 feet from the Doheny State Beach Campground, the Junction Structure is a reinforced concrete structure, approximately 10 feet inside	NOD

2015118073	Clear Creek Community Services District Water Treatment Plan Backwash Recycle Modification Project Clear Creek Community Services District --Shasta	<b>NOE</b>
------------	--	------------

The District service area encompasses approximately 19,000 acres or 29.6 square miles and abuts the City of Redding to the east. The District's primary raw water supply is obtained from the Whiskeytown Reservoir through the Clear Creek South Unit, Trinity River Division of the Central Valley Project as administered by the U.S. Bureau of Reclamation (USBR). The annual Water Service Contract is for 15,300 acre-feet and is classified as an Irrigation/Municipal and Industrial Contract.

Raw water from the Whiskeytown Reservoir is filtered and disinfected at the Water Treatment Plant (WTP) and then conveyed through the Muletown Conduit approximately 8 miles to the District. The WTP and Muletown Conduit also serve the Centerville CSD which has a 25% share of the facilities. The proposed project will allow the District to access USBR properties to install new plumbing to reroute 100% of backwash waste for recycling and use by the District and its customers.
