STATE CLEARINGHOUSE

---

**SUMMARY  
OF  
POSTINGS**

**November 1 – 15, 2016**

# STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **November 1 – 15, 2016**.

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov](http://www.opr.ca.gov)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Director

## CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

### USPS:

<b><u>Documents Received on Tuesday, November 01, 2016</u></b>			
2005092019	Happy Valley Pipeline Project East Bay Municipal Utility District Moraga, Lafayette--Contra Costa The applicant will replace an existing water pipeline crossing and associated bank stabilization at Lauterwasser Creek. Work will occur within an EBMUD easement on two private properties at 557 Miner Road and 85 Van Ripper Lane in Orinda, CA. The existing pipeline and concrete encasement will be removed, the trench widened, and the pipe replaced in-kind with a new 16-inch pipe.	<b>ADM</b>	
2016-11	Pala Band of Mission Indians - APNs: 110-120-01,07,08,09,23 Bureau of Indian Affairs --San Diego The subject property consists of five contiguous parcels totaling 23.98 acres more or less. The property is used almost exclusively for agricultural purposes. The Tribe currently grows citrus trees on the property. There is also one residential housing unit. The property will continue to be used to grow citrus.	<b>BIA</b>	11/30/2016
2015111060	Saint Mary's College Campus Master Plan Moraga, City of Moraga--Contra Costa The subject of this NOP for an EIR is the Saint Mary's College Campus Master Plan which is intended to be the guiding document for future growth on the campus. The planning horizon is about 15 years (2015 to 2030). Phase 1 projects (2016-2020) are expected to result in about 173,000 gsf of new building area and 148 new parking spaces. Phase 2 projects (2020-2030) would result in about 39,000 gsf of new building area and a reduction of 8 parking spaces. New development would occur generally in the currently developed area of the campus (approximately 105 acres), leaving much of the undeveloped lands untouched. Access would remain from St. Mary's Road at the northwest end of the campus. The new/remodeled projects include the following: Library and Learning Commons; New Elevated Parking Structure; Saint Albert Hall Library Repurposing; McKeon Pavilion Remodel and Expansion; Secondary Ingress/Egress; New Residential Building; Madigan Gym Remodel; New Student Center; New Entryway Roundabout; New Tennis Court Restrooms; New Baseball Seating; Stadium Upgrades; New Theater/Academic Building and Chapel Green Roundabout.  The existing campus includes 68 buildings and approximately 969,000 gsf, with about 105 acres of the 443-acre campus developed as the "campus core" where academic and student life buildings are concentrated. The campus provides 1,576 residence hall beds. Currently, there are 2,787 fulltime undergraduate students and 755 fulltime, on-campus graduate students. At project completion, there would be about 2,820 fulltime undergraduate students and 1,012 fulltime, on-campus graduate students. By 2030, the Master Plan would provide for about 212,540 gsf of new building area.  New landscaping and utility extensions would also occur over the planning horizon. Two-story, elevated parking structures would be provided in two locations in areas where surface parking is now provided. Bikeway and pedestrian improvements would be included. The Master Plan includes Design Guidelines related to architectural design, landscaping, and sustainability.	<b>EIR</b>	12/15/2016

<b><u>Documents Received on Tuesday, November 01, 2016</u></b>			
2013031054	Disposal of the Cal Sorrento Property Caltrans #11 San Diego--San Diego Note: 1 CD  The project proposes the disposal (sale) of the Cal Sorrento Property located within Sorrento Valley in San Diego, CA. The purpose of the project is to dispose of excess State-owned property that is not being occupied or utilized. After researching the potential to market the buildings with historic preservation covenants for rehabilitation and adaptive use, Caltrans has determined that it is neither prudent nor feasible to sell the property with historic preservation covenants for the buildings. The SVP Historic District and Sorrento Tower Complex represent two historical resources that are eligible for inclusion in the California Register of Historical Resources and National Register of Historic Places. The project consists of two build alternatives that ultimately dispose of State property. Under Alternative 1, Caltrans would transfer all five historic properties out of State ownership in "as-is" condition and without historic preservation covenants. Under Alternative 2, Caltrans would sell the property without the five historic properties by demolishing the buildings prior to transfer out of State ownership.	<b>FIN</b>	
2016061010	Virada Specific Plan and Project Master Plan Indio, City of Indio--Riverside Note: 1 CD  The Applicant, Presidio Mana Indio, LLC is proposing to amend the existing Fiesta de Vida Specific Plan/Project Master Plan (SP/PMP) to Virada Specific Plan/Project Master Plan, a 656.34-acre mixed use master planned community located at the base of the Indio Hills in northwestern Indio. The project also includes an amended TTM No. 33276 (large lot) and TTM No. 34404 showing all single family lots. The project comprises of 1,289 single and multi-family residential units (1- and 2-story) within various Planning areas/neighborhoods that are designed to provide a variety of residential options to future residents. In addition to residential neighborhoods, the project includes a 106 acre community park, a 6.56-acre community shared solar array, community open space and recreation in the form of parks, paseos, a 3.07 acre community center with a clubhouse, fitness center; a new fire station, and a 2.09 acre commercial use area (3,000 sf) with a demonstration garden (xeriscape plants) at the entrance to the community. The project also includes open space associated with a utility corridor (81.78 acres) and the Indio Hills (166.90 acres). At this point, no development is proposed with this entitlement.	<b>FIN</b>	
2016111001	NPDES Permit for the Maintenance and Operations of the Madera-Chowchilla Water & Power Authority Madera-Chowchilla Water & Power Authority Madera--Madera The NPDES Permit for which this report is made provides for the categorical exception from numeric water quality criteria and objectives for priority pollutants for the application of aquatic pesticides by public entities in the exercise of resource or pest management activities (Water quality order no. 2013-0002-DWQ). As a special district of California, Madera-Chowchilla Water & Power Authority is eligible for coverage under, and has applied for a general	<b>MND</b>	11/30/2016

	NPDES Permit relating to the application of aquatic pesticides directly to MCWPA agricultural water.		
2016111002	Tentative Parcel Map No. 5941 (Planning Division Case No. PL15-0067) Ventura County --Ventura The applicant requests approval of a tentative parcel map to subdivide tax APN 695-062-160, Lot15, (13,260 sf) and 695-0-062-170, lot 16, (11,755 sf) into two legal lots of 14,500 and 10,515 sf as originally recorded in the Upson Tract, map book 11, pages 1 and 2, and depicted in Record of Survey 32-RS-3. No new construction is proposed as part of the requested tentative parcel map, however, the applicant has indicated that it is likely that: a single family dwelling will be constructed at a later date on lot 16; a two story addition to the existing single family dwelling and new garage on lot 15; and a retaining wall will be constructed on both parcels. Future development of the retaining wall would potentially require the removal of three coast live oak trees on lot 15.	<b>MND</b>	11/30/2016
2016111003	Keck Graduate Institute Mixed-Use Project, Parking Expansions, and Projected Campus Growth Claremont, City of Claremont--Los Angeles The proposed project involves the development of new mixed-use buildings for student housing, associated expansion of parking areas, and other related improvements to the existing Keck Graduate Institute campus and KGI-owned parcels. The project would construct two new four-story KGI campus buildings located on the existing vacant lot at the southwest corner of Bucknell Ave and Wharton Dr/Santa Fe St. Buildings would include residential units, academic space, and ancillary uses. Parking for three existing lots (E, F, and I) would be expanded and one new lot would be developed. Enrollment at the KGI campus would increase from 456 students and faculty/staff in the 2015-2016 academic year to 723 students and faculty/staff in the 2021-2022 academic year.	<b>MND</b>	11/30/2016
2016111005	Las Positas Retaining Wall Caltrans #5 Santa Barbara--Santa Barbara Caltrans proposes to remove the undermined portion of the existing retaining wall at PM 1.5 on former SR 225/Las Positas Rd. and construct a soil nail wall in the same alignment. The proposed project is on former SR 225/Las Positas Rd in Santa Barbara.	<b>MND</b>	11/30/2016
2016111006	Barker Minor Use Permit San Luis Obispo County --San Luis Obispo Request by Raymond C. Barker Jr & Lubova Barker for a minor use permit to allow for the addition of a portable asphalt batch plant and lime treatment plant to an existing concrete and asphalt recycling operation center. The project would result in the disturbance of approximately 0.84 acres, of a 7.42 acre parcel. The site is within the industrial land use category and is located at 425 Volpi Ysabel Road, on the southeast portion of the intersection of Concrete Court and Volpi Ysabel Road, in the community of Templeton, in the Salinas River sub area of the North County planning area.	<b>MND</b>	11/30/2016

2016111007	Jacinto Tract [ANNEX No. 92 (LAFCO S195), GPA No. 134, ZC No. 450, TTOM No. 19956] Redlands, City of Redlands--San Bernardino The project site is 18.54 acres in size and located on the east side of Wabash Ave, between Highland and Citrus Avenues. The project includes an annexation of contiguous parcels into Redlands (as required by municipal code to connect to city water and sewage systems), a zone change application to zone the 18.54 acres as R-E District upon annexation, a general plan amendment to amend the designation from rural living (0.4 du/acre) to very low density residential (0-2.7 du/acre), and a tentative tract map to subdivide 18.54 acres into forty residential lots, ranging in size from 14,044 sf to 18,541 sf in size, and two lettered lots for landscaping and stormwater basins.	<b>MND</b>	11/30/2016
2016112001	P16-0002/Van Noord Parcel Map El Dorado County --El Dorado The tentative parcel map would create four parcels from a 112.87 acre site. Parcel 1 would be 12.8 acres, parcel 2 would be 56.8 acres, parcel 3 would be 11.6 acres, and parcel 4 would be 29.0 acres. Parcels 1 and 2 would be served by El Dorado Irrigation District domestic water service or private wells, and parcels 3 and 4 would require the installation of wells. Sewer systems would be installed on each lot. Access to the parcels via private driveways would be from Thompson Hill Road, an existing public, county-maintained road. Site disturbance would avoid steep slopes, cultural resources, watercourses, wetlands, oak woodlands, and sensitive plant communities.	<b>MND</b>	11/30/2016
2016102069	Dupen Timberland Conversion Forestry and Fire Protection, Board of --Yuba Conversion of 7 acres of non-TPZ land zoned Agriculture/Rural Residential and Agriculture/Rural Residential - Commercial into an organic blueberry orchard in Yuba County adjacent to State Highway 49.	<b>NOP</b>	11/30/2016
2016111004	Sterling Medical Office Building Irvine, City of Irvine--Orange A total of 260 parking spaces are proposed. The ground level parking garage would contain 54 full size spaces and 3 handicap spaces. Uncovered surface parking would include 136 full-size spaces, 63 long-term spaces and four handicap spaces. A single vehicular access to the surface parking lot is proposed vis Osborn in the southeastern portion of the property.	<b>NOP</b>	11/30/2016
2016112002	Inland Land Use and Development Code Amendment: Cannabis Manufacturing Fort Bragg, City of Fort Bragg--Mendocino In 2014, the city council adopted an updated inland land use and development code. The ILUDC is the city's guiding collection of land use policies and regulations that implement the general plan's vision for Fort Bragg's future through the year 2022. The applicant requests and ILUDC Amendment to establish define and regulate Cannabis Manufacturing. This ILUDC Amendment would modify article 2 (zoning districts and allowable land uses), article 4 (standards for specific land uses), and article 10 (definitions).	<b>Neg</b>	11/30/2016

2016112003	PA-1600225 (MS) San Joaquin County Stockton--San Joaquin A minor subdivision application to subdivide an existing 57 acre parcel into a homesite parcel and a designated remainder parcel. The homesite parcel to contain 5-acres and the designated remainder parcel to contain 52-acres.	<b>Neg</b>	11/30/2016
2000102055	Stream Maintenance Program Update 2012-2022 Santa Clara Valley Water District Milpitas, Cupertino, Gilroy, Los Altos, San Jose, ...--Santa Clara The CDFW is executing a Lake and Streambed Alteration Agreement No. 1600-2016-0293-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Garth Hall, Santa Clara Valley Water District. The activity covered under this Agreement includes the placement of a soil plug measuring approx. 25 feet long and 10 feet dep, with a 15-foot base and 8-foot top to prevent high flows from Coyote Creek from entering the canal from Coyote Creek during a recent high-flow event. This project is intended to prevent seepage of water into the canal to avoid erosion issues.	<b>NOD</b>	
2002112033	Sonoma-Marin Area Rail Transit Todd Road Operations and Maintenance Facility Sonoma Marin Area Rail Transit Commission Petaluma--Marin, Sonoma CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0191-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Bill Gamlen / Sonoma-Marin Area Rail Transit District. This project is a single phase of the long term non-motorized pathway project SMART will be building from Larkspur to Cloverdale. This phase includes an approx. 0.35 mile long section of a non-motorized pathway. The pathway will impact on linear drainage channel that runs almost parallel to the pathway alignment.	<b>NOD</b>	
2005092019	Happy Valley Pipeline Project East Bay Municipal Utility District Moraga, Lafayette--Contra Costa The Ozone System Upgrade Project is one of many projects in the certified WTTIP EIR and includes replacement of the existing air-fed ozone system with a liquid oxygen (LOX) ozone system at the Sobrante Water Treatment Plant (WTP) and Upper San Leandro (USL) WTP. During the detailed design of the project, some changes and additions to the original project were identified. These changes include the revision of LOX tank size, addition of vaporizer structures at the LOX tanks, modification of the LOX facility location, addition of required piping, and addition of new HVAC equipment with exterior access stairs, a landing, and access doors on the existing ozone buildings at both WTPs. In accordance with CEQA, EBMUD completed an Addendum to the WTTIP EIR to address environmental impacts from the design changes. An evaluation was conducted, and it was determined that the changes do not result in new significant impacts from the design changes. An evaluation was conducted, and it was determined that the changes do not result in new significant impacts or cause an increase in the severity of previously identified impacts as presented in the certified WTTIP EIR, EBMUD will implement the same mitigation measures for the design changes that are presented in the Project EIR.	<b>NOD</b>

<b><u>Documents Received on Tuesday, November 01, 2016</u></b>			
2016052054	County File #LP14-2044 Contra Costa County --Contra Costa The applicant seeks approval of a land use permit to establish a new, 13,250 sf church facility with preschool and daycare on the site in two phases. The project involves the demolition of all existing structures, except for the southernmost residence on the site. Associated outdoor play areas, landscaping, and paved parking are proposed. The proposal includes the removal of 56 trees from the site, and construction activity within the drip line of 4 trees that are to be preserved. An annual Christmas tree sales event is proposed to be included in the land use approval, and a variance to the parking landscape requirement of one planter island per ten parking spaces is requested. The subject property is located at 1619 Bixler Road, in the unincorporated area of Discovery Bay.	<b>NOD</b>	
2016091001	Greenfield Apartments Project Westminster, City of Westminster--Orange The project is a proposed three-story, 50-unit apartment building located at 14041, 14051 and 14061 Locust Street in the City of Westminster. The project site is 1.8 acres and will accommodate single-level flats and two-story townhome-style units with one, two and three bedrooms. The project provides 84 parking spaces located around the perimeter and on the west side of the project site. The project will take access from a single driveway on Locust Street. The project is required a General Plan Amendment, a Zoning Map Amendment, a Tentative Parcel Map, Comprehensive Plan and Density Bonus.	<b>NOD</b>	
2016091065	WITHDRAWN - Per Lead Agency, on 11/29/2016. Improvement District No. 4 Water Exchange Program with Kern-Tulare Water District Kern County Water Agency Bakersfield--Kern, Tulare The project proposes to utilize existing facilities to perform annual balanced water exchanges between improvement district no. 4 and Kern-Tulare Water District in order to improve the operational efficiency of each district.	<b>NOD</b>	
2016092021	Labcon Warehouse Addition Petaluma, City of Petaluma--Sonoma The applicant requested site plan and architectural Review approval to authorize development of a 40,000 sf addition to the existing industrial building on an approximately 10-acre parcel with partial existing site development. The proposed addition project includes four at grade rear loading docks, one new and one relocated driveway at Cader Lane, additional automobile and bicycle parking facilities, a new bus stop and shelter at Lakeville Hwy, extensive landscaping improvements, and street frontage improvements at Lakeville Hwy and Cader Lane such as bicycle lanes and meandering sidewalks.	<b>NOD</b>	
2016119001	App. No. 2016-08, Annexation and Pre-Zoning Dinuba, City of Dinuba--Tulare Annexation and pre-zoning of three properties totaling 25 acres into the City of Dinuba to facilitate the extension of Randle Avenue from Olive Way to Sierra Way.	<b>NOD</b>	

## CEQA Daily Log

Documents Received during the Period: 11/01/2016 - 11/15/2016

<b><u>Documents Received on Tuesday, November 01, 2016</u></b>			
2015098032	Saucelito Elementary School Planning Application Saucelito Elementary School District --Tulare Application for planning and feasibility study funding to investigate and identify the most effective, sustainable, and affordable long-term solution to the community's drinking water problems, most notably nitrates, DBCP's and water supply reliability. This project will benefit students and staff at Saucelito Elem. Sch.	<b>NOE</b>	
2016018146	Zero Discharge Flushing Program Indian Wells Valley Water District Ridgecrest--Kern The company NO-DES (Neutral Output-Discharge Elimination System) has introduced technology for flushing system pipelines and keeping the water contained within the system, resulting in no loss of potable water, and potentially saving over a million gallons of water annually. The system works by connecting the truck or trailer mounted filter system from hydrant to hydrant. The operator can then close valves as necessary to allow for unidirectional flushing of the main pipe line. The water is filtered through bag filters and re-chlorinated before being pumped back into the system through another hydrant. The implementation of the NO-DES flushing system will enhance the District's water conservation efforts by millions of gallons per year, thereby improving its ability to provide a safe, reliable, and sustainable water supply to its customers.	<b>NOE</b>	
2016118001	Conditional Use Permit 16-12 Los Alamitos, City of Los Alamitos--Orange CUP 16-12 - A Resolution approving Conditional Use Permit 16-12 to allow a vehicle impound yard at 10621 Bloomfield Street, Unit 20, in the Planned Light Industrial (P-M) zoning district.	<b>NOE</b>	
2016118002	Donner Trail Elementary Modernization Tahoe Truckee Unified School District Unincorporated--Placer, Nevada The project proposes to add two new classrooms and a restroom to the existing Donner Trail Elementary School. The project would avoid all impacts to drainage features onsite and there are no identified archaeological or historic resources at the project site.	<b>NOE</b>	
2016118003	Otay Mesa Vernal Pool and Upland Habitat Restoration Project (Project) Fish & Wildlife Conservation Board San Diego--San Diego The Chaparral Lands Conservancy pursuant to Fish and Game Code section 2081(a) for a project to restore five acres of severely damaged vernal pools and associated maritime succulent scrub upland habitat. Work in vernal pools will include repairing major past damage from tire trenching, removing significant erosion fill, reducing pool edge gradients, and restoring natural pool contours and slopes. In addition, approximately five pools will be constructed in suitable soils in highly disturbed areas where original natural pools may have been eliminated. Fill removed from vernal pools will be used to create or repair nearby Mima mounds and to fill tire trenching in nearby upland areas.	<b>NOE</b>

2016118004	Crown Castle/NextG T Mobile San Deigo Project 365239 Public Utilities Commission San Diego, Vista, Imperial Beach, Oceanside--San Diego Crown Castle / NextG installs telecommunicaitons infrastructure to enhance wireless and broadband speeds.	<b>NOE</b>	
2016118005	App No 2016-09 - General Plan Amendment and Zone Change - APN 017-074-005, 006 Dinuba, City of Dinuba--Tulare Amend the Dinuba General Plan to change the designation of the above sites from "Residential - Medium" to "Residential - High" and amend the Zoning Map to rezone the subject properties from "R-1-6 (Single-Family Residential, 6,000 sq. ft. minimum)" to "RM-1.5 (Multi-Family Residential, 1,500 sq. ft. minimum)".	<b>NOE</b>	
2016118006	NRG EVGo (REV) Installation University of California, San Diego San Diego--San Diego The project proposes to provide and install electric vehicle charging stations at various locations throughout the UC San Diego main campus, Scripps Institution of Oceanography (SIO) and medical centers. General scope of work for each site includes minor site modification as needed to tie the stations to existing power and data systems, as well as provision of electrical equipment to support unique power demands of the station. The work is being proposed in order to access incentive funds being offered by the vendor, NRG, EVGo, to install infrastructure in support of electric vehicle charging stations. The staions would support the overall sustainability mission iat UC San Diego, particularly the pledge for the campus to reach carbon neutrality by 2025. In addition, the stations would support ongoing and proposed climate neutrality research and potentially offer oportunitites to return power to the campus grid. Tere are seventeen (17) sites being proposed which are listed in the attached document which included a detailed scopes for each site.	<b>NOE</b>	
2016118007	Electrical Vehicle Charging Stations Project at 404 Aviation Boulevard and 204 Concourse Boulevard Sonoma County Water Agency Santa Rosa--Sonoma The proposed project would be implemented at two locations to increase the number of onsite charging stations. Three duel charges would be installed at 404 and two duel charges at 204. The project would increase the available charging stations to a total of ten and would be powered by the existing solar photovoltaic supplemented power supply located at the building at 404 Aviation Boulevard.  The trenching to install electrical conduit for each charging station would be approximately 50 feet long, 2 feet wide and 2 feet deep. All project work would be conducted within the footprint of the existing parking lot and building facilities in previously developed areas.	<b>NOE</b>	
2016118008	Conditional Use Permit (CUP) 336-90M Los Alamitos, City of Los Alamitos--Orange A resolution of the Planning Commission of the City of Los Alamitos, California, approving a modification of Conditional Use Permit 336-90 and Site Plan Review 11-01 to permit the addition of a second entrance to the McDonald's fast food	<b>NOE</b>

2016118016	<p>CAL FIRE Grass Valley Air Attack Base Underground Facilities Project Forestry and Fire Protection, Department of Grass Valley--Nevada</p> <p>Project consist of trenching 2,000 lineal feet by up to 48 inches wide, within a 500 foot by 300 foot area within the Nevada County airport, for repair and replacement of underground plumbing and utilities. Asphalt or concrete will be saw cut and removed to allow excavation with a backhoe. Excavation may occur up to 48 inches deep. All material removed will be placed and treated on site of the airport and contained in a manner that prevents any erosion leaving the immediate placement site. Underground assets will be placed, soil or gravel backfilled, and material compacted. Concrete, asphalt or grass will be re-established on the sites that were removed to bring site to original visual appeal. The entire airbase will be re-sealed and re-painted including parking areas for vehicles and aircraft. All sidewalks, drainage ways and driveways will be repaired with the best available material. Site maintenance, including pipe repair, surface sealant repairs, painting and improvements may require additional cutting, trenching, and patching for repair and replacement within the project boundary. Equipment that will be needed to perform this work will include a backhoe, pavement saw, jack hammer, concrete delivery trucks and additional construction personnel vehicles. Project work will take place between the months of January and June and involve approx. 5 weeks of on the ground activity.</p>	<b>NOE</b>	
2016118017	<p>Amendment to Conditional Use Permit (CUP) NO. 1814 - St. Ephrem Catholic Church El Cajon, City of El Cajon--San Diego</p> <p>The amendment allows the demolition of an existing single-story building with a gathering room, two ancillary classrooms, kitchen and restrooms for a new social hall.</p>	<b>NOE</b>	
2016118018	<p>Activity Center Replacement - California School for Deaf Fremont (CSDF) Education, Department of Fremont--Alameda</p> <p>On the existing State owned campus for the CSDF, the proposed project consist of removing the existing 1,920 sq. ft. modular building and all associated items and construct a new 2,160 SF building with new walks, patio, wrought iron fencing, accessible parking space, utility access, storm drain inlets, and landscaping. The new building will be constructed consistent with current building code requirements and in the same general location. The Dept. of State Architect would not rectify the modular building constructed in 1979, because it is considered out of compliance with current code and regulations.</p>	<b>NOE</b>

<b><u>Documents Received on Thursday, November 03, 2016</u></b>					
2008101097	<p>Southeast Los Angeles and Southeast Los Angeles Community Plans Los Angeles, City of Los Angeles, City of--Los Angeles Note: Reference SCH # 2008101098</p> <p>The combined South/Southeast LA CPA will be updated to reflect current policies while addressing community issues relating to land use. The project will amend text and land use maps of the South/Southeast CPA. Several zoning ordinances will be adopted to implement updates for the two community plans such as changes for certain portions within the CPA for specific uses, design standards, and development standards. The zoning ordinances include amendments to the zoning map for height and district changes under LAMC Section 12.32 and the adoption of two implementation Overlay districts under LAMC Section 13.14. Amendments will occur within the Framework &amp; Circulation Elements within the general plan, housing incentive ordinance, neighborhood stabilization ordinance and others necessary.</p>	<b>EIR</b>	02/01/2017		
2016081066	<p>Picerne Lomita Apartments Lomita, City of Lomita--Los Angeles</p> <p>The project includes demolition and removal of the existing equipment rental yard and construction of a five-story, 223-unit, multi-family residential development, which includes approximately 227,000 sf of residential uses and 225,000 sf of parking area (including two level of subterranean parking). The project would also include residential amenities such as a pool, fitness center, community room, and fourth floor common area balcony.</p>	<b>EIR</b>	12/19/2016		
2016112008	<p>Tanti Apartment Project Lake County Lakeport--Lake</p> <p>The applicant has applied for a minor use permit, a design review permit and a complex grading permit in order to improve the 2.48 acre site with three two-story buildings developed with forty-four two bedroom apartment units. Parking will also be provided on site. The complex grading permit is required for the grading of the site along with the importation of approximately 9,000 cy of fill.</p>	<b>MND</b>	12/02/2016

<b><u>Documents Received on Thursday, November 03, 2016</u></b>			
2016112009	Chico River Road Trunk Line Installation Project Chico, City of Chico--Butte The project consists of the non-capacity increasing replacement of an existing sewer trunk line with approx. 3.4 linear miles of 24 inch sewer trunk line. The project will be located entirely within the existing right-of-way and will occur along Chico River Road from the city of Chico Water Pollution Control Plan to Miller Avenue, generally located within Butte County jurisdiction. Trenching depths will range from 3-15 feet. Typical facilities to be constructed shall include 24 inch sanitary sewer pipeline and appurtenances; asphaltic slurry seal; installation of pavement markers, striping, and thermoplastic pavement markings. There are no permanent above ground structures associated with the project.	<b>MND</b>	12/02/2016
2016112010	8 Townhouses - E. Cliff Drive "Road House site" Project Santa Cruz County --Santa Cruz The project proposes to divide an existing 39,250 sf parcel into eight residential parcels and construct eight residential dwelling units. The proposal also includes the removal of two significant trees (42 in. diameter and 24.2 in. diameter) and the grading to include approximately 200 cy of cut and 1,300 cy of fill. The project requires a subdivision, residential development permit, coastal development permit, roadway/roadside exception, preliminary grading review, and soils report review.	<b>MND</b>	12/02/2016
2016112011	Little Llagas Creek Park Project, Morgan Hill, California Morgan Hill, City of Morgan Hill--Santa Clara The city of Morgan Hill proposes to improve an existing 1.7-acre open space parcel for passive recreational use. The proposed project involves the construction and installation of recreational facilities improvements as well as improvements to segments of West Third St and Del Monte Ave. The City's park improvement plans include: 1) construction of trails, paths and walkways; 2) picnic tables; 3) a pedestrian bridge across Little Llagas Creek; 4) play equipment; and 5) benches, lighting, security camera, and water fountain. Additionally, the city would reconstruct an existing parking lot and repave West Third St and Del Monte Ave for improved access. An existing bridge on West Third St crossing Little Llagas Creek would also be replaced.	<b>MND</b>	12/02/2016
2016111013	Scattergood Generating Station Units 1 and 2 Repowering Project Los Angeles Department of Water and Power Los Angeles, City of--Los Angeles Note: Review Per Lead  The Los Angeles Department of Water and Power proposes to remove from service generating units 1 and 2 at Scattergood Generating Station and replace their generating capacity with a natural gas-fired combustion turbine generator and a steam turbine generator operating in tandem to substantially increase efficiency in relation to fuel consumption and power production. The new generating units would utilize air cooled condensers, allowing SGS to completely eliminate the use of ocean water for generator cooling. The proposed project would include a 10-MW battery storage component to store electricity generated during low demand periods that can be used later to support peak electricity demand.	<b>NOP</b>	12/16/2016

<b><u>Documents Received on Thursday, November 03, 2016</u></b>			
2016111014	Port of Long Beach Deep Draft Navigation Study Long Beach, Port of Long Beach--Los Angeles Note: Review Per Lead	<b>NOP</b>	12/09/2016
	<p>The Port of Long Beach Deep Draft Navigation Study will evaluate dredging to deepen several channels, basins, and standby areas within the Port to improve waterborne transportation efficiencies and navigational safety for current and future container and liquid bulk vessel operations. Study areas include the approach channel extending seaward from the Queen's Gate opening of the Long Beach Breakwater; approach channel, berths, and turning basin to Pier J; the Southeast Basin and associated berths; and the Pier T/West Basin and berths. Additionally, structural improvements may need to be performed to several of the berths within the project areas to reinforce the wharf design to accommodate the proposed dredging. A new electrical substation may be constructed landside to provide electricity to the dredge equipment.</p>		
2010061025	Bridgeport Public Utility District Arsenic Removal Project Bridgeport Public Utilities District --Mono	<b>Neg</b>	12/02/2016
	<p>The purpose of the proposed project is to comply with the federal and state drinking water standard and begin removing naturally occurring arsenic from the potable water supply. As of January 23, 2006, all water suppliers were held to a higher standard for arsenic, which was lowered from 50 ppb (parts per billion) to 10 ppb. While this is the federal max contaminant level, the California State Water Resources Control Board, Division of Drinking Water, is administering the regulatory process. Although the district has applied for and received regulatory extensions regarding compliance, the DDW has now issued an order to the district requiring compliance with the new arsenic MCL.</p>		
2000011025	Additional Environmental Analysis for the Newhall Ranch 2010 RMDP/SCP EIR Fish & Game #5 Santa Clarita--Los Angeles Note: Review Per Lead	<b>Oth</b>	01/06/2017
	<p>Five Point LLC, the project applicant, responded to the Supreme Court decision with a proposal to CDFW to modify the previously approved project in two aspects. As to the GHG issue addressed by the court, the project applicant has committed to achieve zero net GHG emissions for the project with implementation of 13 mitigation measures, mitigation measure 2-1 through 2-13) described in the draft AEA, that will reduce, mitigate, and offset 100 percent of the project's GHG emissions. With respect to unarmored threespine stickback, the project applicant has proposed modified design and construction methods for bridges and bank stabilization in or near the Santa Clara River to obviate the need for the two prior mitigation measures of focus for the Supreme Court, consistent with Fish and Game Code section 5515.</p>

<b><u>Documents Received on Thursday, November 03, 2016</u></b>			
2009031001	Chevron Tank Farm Remediation and Development Project San Luis Obispo, City of San Luis Obispo--San Luis Obispo CDFW has executed Streambed Alteration Agreement No. 1600-2015-0094-R4, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Chevron Environmental Management Company. Project includes activities related the remediation and restoration of stream and wetland habitats on Chevron property on Tank Farm Road.	<b>NOD</b>	
2009089013	Operation and Permitting of Well 6 for Marygold Mutual Water Company San Bernardino County --San Bernardino The State Water Resources Control Board (SWRCB), as the responsible agency, will be issuing a water supply permit. The Marygold Mutual Water Company existing water treatment system includes a 1,000 gallon per minute and a 2,000 gallon per minute well, with a chlorine injector, two 2-million gallon storage reservoirs, 2 low lift pumps to fill tanks, and three 1000 gallon per minute booster pumps each with 50 HP motors to distribute the water to the system. The Marygold Mutual Water Company is adding two 10-micron cartridge filters for particle filtration and two ion exchange vessels containing resin beads to remove perchlorate (via an ion exchange process). The cartridge filters will be replaced over time, and after many years, the resin beads are removed and regenerated offsite and fresh beads are inserted. These components will be installed in the treatment process before the chlorine is added and are the fifth phase of an overall project that is outlined in the lead agency's environmental document. The Project will provide for the operation and maintenance of these new treatment components and the overall treatment system.	<b>NOD</b>	
2011021042	Kern River Flow and Municipal Water Program Bakersfield, City of Bakersfield--Kern The Recirculated EIR was prepared per the Judgment and decision from the Superior Court for the State of CA, County of Tulare. This program proposes to increase and restore more regular flows of water to the Kern River channel with the goals of protecting and preserving the local water supply, environment, and quality of life for City residents. To implement City policies, and to provide water for prior and ongoing City projects, the City will attempt to increase and restore stream flows in the Kern River channel more consistently during the year, primarily below the Calloway Weir. The Proposed Program consists of the use of existing and new, additional water supplies.	<b>NOD</b>	
2016022056	Auburn Lake Trails Water Treatment Plant Project Georgetown Divide Public Utilities District --El Dorado SWRCB is a responsible agency for this project. The SWRCB's Safe Drinking Water State Revolving Fund Program is providing funds for the project. The Georgetown PUD proposes to upgrade their current water treatment plant including the: construction of a new filter building, construction of a new raw water pump station, replacement of non-compliant filters with approved contact clarifier filters, a new adequately sized disinfection contact basin, and waste stream processing facilities.	<b>NOD</b>

**Documents Received on Friday, November 04, 2016**

2014081104	Santa Paula West Business Park Specific Plan Santa Paula, City of Santa Paula--Ventura The specific plan would guide future land use development on approximately 53.81 acres of the city's 125-acre West Area 2 designation. West Area 2 was included as an expansion area in the city's general plan, which was approved by the city of Santa Paula in 1998. This designation allows for a variety of manufacturing, research and development, professional office, and limited commercial uses, with integrated vehicular circulation, pedestrian walkways, and infrastructure. The land uses envisioned within the specific plan would be a mix of low-intensity industrial (such as light manufacturing or research and development), professional offices, and supporting commercial businesses. These uses are allowed in the commercial/light industrial and light industrial zones.	<b>EIR</b>	12/19/2016
2014111019	El Toro, 100-Acre Parcel Development Plan Orange County Irvine--Orange The Project proposes the redevelopment of previously disturbed property on the former Marine Corp Air Station El Toro. The project is an in-fill mixed-use, low-impact development located within proximity to the Irvine Station. Proposed used include multi-use office (1,876,000 sf); 2,103 dwelling units; community commerce (220,000 sf); hotel (242 rooms); and associated open space and infrastructure improvements. The development plan includes design guidelines	<b>EIR</b>	12/19/2016

	and development standards, which will guide the development of the approximately 108 acre project site.		
2016061004	Kerman High School Athletic Facilities Addition and New Elementary School Project Kerman Unified School District Kerman--Fresno The project includes the acquisition of a site for an addition of high school athletic facilities to an existing high school and a new elementary school site and the construction and operation of the school facilities. The high school facilities would be placed on the westerly approximately 32 +/- acres and the elementary school would occupy the northeasterly approximately 13 +/- acres. The elementary school would serve an enrollment of 750 students in grades K-6. The high school athletic facilities would serve the existing 1,500 student enrollment of Kerman High School and allow for an increase to 2,000 students by freeing up space on the existing high school site.	<b>MND</b>	12/05/2016
2016111017	Healthsouth Rehabilitation Hospital of Murrieta Project Murrieta, City of Murrieta--Riverside The proposed project site consists of a single parcel, approximately 4.72 gross acres, located at 35470 Whitewood Road in Murrieta, Riverside county, CA (APN 392-310-018). The project proposes construction and operation of a two story approximately 68,968 sf, 80 bed rehabilitation hospital to be constructed in two phases. The proposed project will operate 24 hours a day, seven days a week as an acute inpatient rehabilitation hospital. In addition to this building, the project proposes a courtyard for physical therapy, on site parking, two biofiltration basins, and a detention basin. Primary access to the project site will be from Whitewood Road via the southern driveway, and the project proponent will be responsible for street improvements, including addition of a median, pedestrian walkway, and street lights, along Whitewood Road. There will also be a shared driveway on site to allow for access of the Murrieta Skilled Nursing Facility located on the parcel directly to the north. The project site is currently in the process of being annexed into Easter Municipal Water District and the Metropolitan Water District of Southern California. The project proponent will install approximately 1,200 lf of 12-in diameter water line from an existing off site EMWD water facility at the intersection of Sea Country St and Whitewood Road as well as approximately 236 lf of 6-in diameter lateral from EMWD's existing 15-in diameter sewer pipeline in Whitewood Road.	<b>MND</b>	12/05/2016
2016111018	Bear Valley Road Bridge over the Mojave River Apple Valley, City of Apple Valley--San Bernardino The Town of Apple Valley, in cooperation with Caltrans, proposes to widen, rehabilitate and seismically retrofit the Bear Valley Road Bridge (54C-0086) over the Mojave River and improve approach roadways from Mojave Fish Hatchery Road to Jess Ranch Parkway. The bridge is located in the Town of Apple Valley, but the west approach roadway is in the cities of Hesperia and Victorville. Bear Valley Road is designated a major divided arterial in the Town's General Plan. At the bridge, Bear Valley Road carries six lanes of traffic with an annual average daily traffic (AADT) of approximately 56,000 vehicles, approximately five percent of which are trucks.	<b>MND</b>	12/05/2016

	Clara County. The track and field uses would be football, soccer, and track and field by the school and community. Hours of use and lighting would remain about the same as current field operations. Construction is projected to start in January 2017 and be completed by November 2017.		
2016111016	Fullerton College Facilities Master Plan North Orange County Community College District Fullerton--Orange The District to construct a new Welcome Center, new instructional buildings, a Horticulture and Vocational Services Center, a new child development center, and an 840-space parking structure; realign campus access to the parking structure; construct a new Maintenance and Operations Facility and Thermal Energy Storage; construct new storage, offices, and a shower/locker room north of the existing pool; implement improvements to Sherbeck Field; create new parking lots south of the Lemon Street parking structure; and construct a Performing Arts Complex. Renovations would include the Math Building, Physical Education, Wilshire Theater, Business Building, Humanities Building, Campus Services, Administration Building, Fine Arts Gallery, and Academic Computing. It is anticipated that these improvements will be phased over a 10-year period.	<b>NOP</b>	12/05/2016
2016111019	UC San Diego La Jolla 2018 Long Range Development Plan (LRDP) Update University of California, San Diego La Jolla--San Diego UC San Diego proposes to update the LRDP for the La Jolla campus, previously adopted by The Regents of the UC in September 2004. The 2018 LRDP Update will address anticipated growth in student enrollment and associated expansion of faculty, staff, academic and ancillary programs in the context of UCSD's Strategic Plan (2014). It is anticipated that UCSD could experience a population increase of approximately twenty-five to thirty percent by the year 2035. This increase would exceed the population assumptions in the 2004 LRDP and its program EIR. Accordingly, UCSD will update the LRDP and prepare a new program EIR to address the effects of this growth. The UC will serve as lead agency for this project.	<b>NOP</b>	12/05/2016
2016112012	Sunset Area Plan/Placer Ranch Specific Plan Project Placer County Rocklin, Roseville, Lincoln--Placer The proposed Sunset Area Plan is a Placer County-initiated update to its 1997 Sunset Industrial Area Plan. The Placer Ranch Specific Plan (PRSP) is included as part of the proposed Sunset Area Plan. This effort would update the existing community plan, general plan, maps, and regulations. The Sunset Industrial Area, which includes the Placer Ranch Specific Plan (PRSP) project site, encompasses 8,358 acres located in unincorporated south Placer County. The County will prepare an EIR for the project to satisfy the requirements of the CEQA and will serve as lead agency for CEQA compliance. The EIR will analyze the overall Sunset Industrial Area at a program level, and provide a more detailed project-level analysis for the Placer Ranch Specific Plan.  The Sunset Area Plan will bring forward new land use designations, including: General Commercial, Entertainment/Mixed Use; Business Park; Innovation Center; Eco-Industrial; Light Industrial; Public Facility; and Urban Reserve. The 2,213-acre Placer Ranch Specific Plan (PRSP) is a mixed-use community proposed in the Sunset Area Plan consisting of 5,827 residential units including a 720 unit age-restricted community; an elementary school, middle school, 323.5	<b>NOP</b>	12/05/2016

	acres of neighborhood parks and open space; and 6,356,800 sq. ft. of general commercial, commercial mixed use, and campus park (office, research and development, light industrial, and commercial) uses complementary to the university. The proposed university and non-residential land uses of the project are intended as a catalyst for employment-generating development in Placer County's overall Sunset Area.		
2016112016	Tracy Village Tracy, City of Tracy--San Joaquin The Tracy Village Project is a proposed gated community consisting of up to 600 single family detached residential homes. The project would include three man-made lakes totaling approximately ten acres, along with a community recreation center with pool, spa and bocce courts, open space, and trails/pathways. The following schools are located within a mile distance from the project site: Hirsch Elementary, Monticello Elementary, and Anthony Traina Elementary. The project site is within the City's Sphere of Influence.	<b>NOP</b>	12/05/2016
2016111015	Hemet-Ryan Airport Land Use Compatibility Plan (Hemet ALUCP) Riverside County Airport Land Use Commission Hemet--Riverside The proposed project is the RCALUC's adoption of an ALUCP that would be applicable to the environs of Hemet-Ryan Airport. The proposed ALUCP includes "Additional Compatibility Policies" tailored specifically to the Airport's land use environs and reflects the Commission's efforts to develop an ALUCP that fully satisfies the objectives of the State Aeronautics Act and addresses local concerns. The ALUCP establishes policies for determining the consistency of future, proposed development projects within the Hemet-Ryan Airport Influence Area with the objective of protecting public health, safety, and welfare, as set forth in the State Aeronautics Act.	<b>Neg</b>	12/05/2016
2016112013	Butte & Ash Creek Bridge Replacement Project Caltrans #2 --Modoc Caltrans proposes to replace two bridges along SR 299 in Modoc County. The purpose of the project is to restore the long-term reliability of the Butte Creek Bridge and Ash Creek Bridge, and reduce the need for continued maintenance and repairs. Work activities would include the construction of two new bridges on their existing alignment, installation of new guardrails and bridge railing, reconstruction of approach pavement and shoulders to conform to the new bridges, and the improvement of road connections within the project limits. The project would require vegetation clearing, temporary construction easements, and acquisitions of new ROW. The project would include water diversion at Ash Creek Bridge, and pile driving at both the Butte Creek and Ash Creek Bridges.	<b>Neg</b>	12/05/2016
2014101060	Remedial Action Plan (RAP) for Laborde Canyon (Lockhead Propulsion-Beaumont No. 2) Toxic Substances Control, Department of Beaumont--Riverside The proposed project is to clean up the Laborde Canyon (Site), also known as Lockheed Martin Beaumont Site 2, located in unincorporated Riverside County, California. The proposed cleanup includes remediation of contaminated soil and groundwater in five areas where previous site operations were conducted. The proposed remedy is the subject of a Remedial Action Plan (RAP), currently under	<b>NOD</b>

	preparation by DTSC, and includes; groundwater plume containment at the southern boundary of the Site, limited removal and either on-site or off-site treatment of shallow soil in two locations, pilot test and possible groundwater treatment, and institutional controls that would restrict future land use at the site.		
2015062056	Facebook Campus Expansion Project Menlo Park, City of Menlo Park--San Mateo The Project includes the demolition of buildings at the site and the construction of two new office buildings (Building 21 and Building 22), encompassing approximately 962,400 gsf. The proposed Bldg 21 would contain approx. 512,900 sf of office and event uses and be located on the eastern portion of the Project site. The proposed Building 22 would include approximately 449,500 sf of office uses and would be located on the western portion of the Project site. Maximum building heights would be approximately 75 feet. The Project would also include the potential for a 200-room limited-service hotel with approximately 174,800 sf of space (Building 24) in the northwestern portion of the Project site. Project includes removal of 274 heritage trees.	<b>NOD</b>	
2016082024	Ditch Gulch Curve Improvement Project Caltrans #2 Hayfork--Trinity Construction of a bridge on a new alignment bypassing an existing curve. Once the new bridge is constructed an traffic is routed to the new alignment, the abandoned roadway would be removed and the Ditch Gulch creek channel would be reestablished.	<b>NOD</b>	
2016118044	North Campus Western Border Tree Removal and Restoration Project University of California, Santa Barbara Santa Barbara--Santa Barbara The Santa Barbara Campus proposes to remove 32 dead eucalyptus trees ranging from 6 to 32-inch dbh located in the dispersed/broken eucalyptus window along the west side of North Campus Faculty Housing and restore the area with the native oak trees. The 32 trees to be removed are Tasmanian blue gum and were determined to be dead by a certified arborist. Some of the trees are approximately 87 to 97 years old, have exceeded their lifespan. The trees are dead as a result of their agree and the long term regional drought. Due to a public trail and residential areas in the proximity of the trees, the trees have been determined to present a public safety and fire hazard. Tree removal would occur outside the bird nesting season.	<b>NOE</b>

	proposed to be a tolled facility. The proposed project encompasses 12-ORA-241 (Post Mile 36.1/39.1), 12-ORA-91 (PM 14.7/18.9), and 08-RIV-91 (PM 0.0/1.5) for a total length of approximately 8.7 miles.		
2014012023	Draft Environmental Impact Report for the City of Clearlake 2040 General Plan Clearlake, City of Clearlake--Lake Note: Recirculated	<b>EIR</b>	12/21/2016
	The proposed project is the preparation of a comprehensive update of the City's 1983 General Plan. California law requires cities and counties to adopt a General Plan to guide future development. The Draft Clearlake 2040 General Plan provides a plan for growth in the City through the year 2040. The original documents were produced by a graduate class of students from CalPoly, in 2014, at which time an DEIR was circulated for comment. This Revised DEIR is being recirculated for new public agency comment. The General Plan includes the following elements: Land Use, Circulation, Housing, Conservation, Open Space, Noise, Safety, Economic Development, Public Facilities, Community Design and Health.		
2015072055	Del Rio Tank and Wells Project Modesto, City of Modesto--Stanislaus The City of Modesto is the lead agency for preparation and review of an environmental impact report for the Del Rio Tank and Wells project (Proposed Project). The Proposed Project involves construction of a water storage tank, booster pump station, and two domestic water wells, which will provide additional storage volume water supply and pressure for the existing water system serving the Del Rio area. The City's 2008 Water System Engineer's Report Program Environmental Impact Report (Water System PEIR) evaluated the Proposed Project at a program level of detail.	<b>EIR</b>	12/21/2016
2016102042	Waterfowl, Coot, Moorhen, and Common Snipe Hunting Fish & Wildlife Commission -- Waterfowl, coot, moorhen and common snipe hunting, specifically a potential modification to the current hunting regulations which may include season and or bag limit changes and closed seasons.	<b>EIR</b>	12/21/2016
2015021009	Airport Metro Connector Los Angeles County Metropolitan Transportation Authority Los Angeles, City of, Inglewood--Los Angeles The proposed project includes a new multi modal transportation center to connect the Los Angeles international Airport to the regional bus and rail transit system with a light rail platforms, bus hub, pedestrian and bicycle amenities on parcels 4128-001-008, -004, -005, and -802. Proposed project components include: Three at grade LRT platforms to be served by the Crenshaw/LAX Line and an extension of the Metro Green Line; Bus plaza and terminal facility for Metro and municipal bus operators; Bicycle Hub with secured parking for up to 150 bicycles; Pedestrian plazas; passenger vehicle pick up and drop off area; and metro transit center/terminal building that connects passengers between the various modes of transportation.	<b>FIN</b>

2016111020	S. Stanford Avenue/County of Los Angeles Project No. R2015-02448-(2) Los Angeles County --Los Angeles The project is a request for a plan amendment, zone change, housing permit, and plot plan to construct a new 85-unit affordable housing development on three parcels in the West Rancho Dominguez-Victoria community. The requested plan amendment would change the plan category designated on the project site from H9 to H30; the requested zone change would change the subject property zoning from R-1 to R-3; the requested administrative housing permit would permit a density bonus of approximately 4 percent, an increase in allowed height from 35 ft to 40 ft, and a reduction in on-site required parking from 169 spaces to 93 spaces; the requested plot plan would approve the proposed development. All proposed parking will be located at grade and distributed throughout the site. The proposed units will be contained within two three-story buildings that reach a max height of 40 ft. The project site is located at 14803 S. Stanford Ave and is comprised of APN6137005036, 6137005902, and 6137005903 for a total area of approximately 2.72 acres.	<b>MND</b>	12/06/2016
2016112020	McCoy Creek Bridge Replacement Project Caltrans #1 --Mendocino Note: Review Per Lead  Caltrans is proposing to replace the McCoy Creek bridge, located on SR 271 between PM 17.70/18.0 in Mendocino County, with a two-span pre-cast concrete girder bridge. The new bridge would have two 12-ft lanes and 4-ft shoulders. To construct the bridge, Route 271 would be closed within the project limits for the duration of construction with through traffic detoured to Route 101.	<b>MND</b>	12/12/2016
2016112035	Western Canal Water District and Richvale Irrigation District Water Transfers from 2018 to 2022 Western Canal Water District --Amador, Butte, Alameda, Contra Costa, Glenn, Fresno, Kings, ... Environmental Impact Report to reevaluate effects of water transfers from the Western Canal Water District and Richvale Irrigation District service areas to interested agencies located south of the Sacramento-San Joaquin Delta and in the San Francisco Bay Are. The transfer would originate in Butte and Glenn Counties. The transfer buyers could be in Alameda, Contra Costa, Fresno, Kern, Kings, Los Angeles, Merced, Orange, Riverside, San Benito, San Bernardino, San Diego, San Joaquin, Stanislaus, or Ventura counties.	<b>NOP</b>	12/06/2016

	bus operators; Bicycle Hub with secured parking for up to 150 bicycles; Pedestrian plazas; passenger vehicle pick up and drop off area; and metro transit center/terminal building that connects passengers between the various modes of transportation.		
2015071005	MD-6 and MD-7 Water System Improvement Madera County --Madera The project consists of the installation of approximately 20,000 linear feet of water transmission pipeline along the east shore of Bass Lake within the County Road 274 right-of-way. A new booster pump station would be developed on existing Bass Lake Water Company Lands, at the Pines Tank Site. A new well would be developed at MD-6, Lakeshore and wellhead treatment facility at this site including a 52' x 26' metal treatment building, wash water tank, hydro pneumatic tank, 15' x 15' sludge dewatering shelter, miscellaneous yard piping, clearing and grading and gravel surfacing over an approximate 1/4 acre site. A 250,000 gallon water storage tank will be installed at MD-7 for fire suppression and water meters will be installed at all developed lots in both MD-6 and MD-7.	<b>MND</b>	12/07/2016
2016111022	Panama Street K-8 School Los Angeles Unified School District Los Angeles, City of--Los Angeles The project consists of demolition and removal of existing light industrial uses, and the construction and operation of a charter school facility for 532 Kindergarten through 8th grade students on an approximately 2.1-acre site. The school campus would have a classroom building, administration building and multipurpose building, along with lunch shelters, three play yards, and an underground parking lot.	<b>MND</b>	12/07/2016
2016111023	Screenland Drive Mixed Use Project Burbank, City of Burbank--Los Angeles The project consists of a 13-story building, approximately 170 feet high, that would contain a total of 40 residential units, approximately 3,730 sf of ground level retail/restaurant space, two levels of subterranean parking and two levels of above ground parking.	<b>MND</b>	12/07/2016
2016112025	Rush Creek Bridge (No. 03C-0118) on Modoc County Road 86 Replacement Project Modoc County --Modoc A new two-lane, single span, 69-foot-long, precast, prestressed, voided slab bridge, supported on 2.5-foot-thick concrete wall abutments and spread footings would be constructed in the existing alignment. The existing bridge is classified as "Functionally Obsolete." Roadway approaches would extend about 250 feet west and 190 feet east of the new bridge and be paved with asphalt concrete. A temporary detour would be constructed upstream of the existing bridge on an alignment distant enough to allow for rock slope protection on upstream banks and around the new abutments wing walls. The detour would be removed after the new bridge is completed. Permanent right of way, as well as temporary construction easements, will be required for new bridge widened roadway approaches, the temporary detour, and contractor staging areas.	<b>MND</b>	12/07/2016

2015062021	Chromium-6 Water Treatment System Project Soquel Creek Water District --Santa Cruz CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0104-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Michael Wilson/Soquel Creek Water District. The project consists of the construction of a well head water treatment system to treat naturally-occurring hexavalent chromium (chromium-6). Construction includes the building of a 16.6 feet in width and 45.4 feet in length new access bridge, the removal of up to 4 spruce trees ranging in diameter at breast height from 9 to 12 inches, a new raw water pipeline from the Soquel Creek Water District's Seascape well to the San Andreas well, replacement of groundwater pumps, and a new sewer force main.	<b>NOD</b>	
2016031025	Yorba Linda General Plan Update Yorba Linda, City of Yorba Linda--Orange Yorba Linda prepared an update to its 1993 General Plan, complying with CA Government Code Section 65300. The General Plan Update is a long-term policy document that serves as a blueprint to guide the City's vision for land use and development over the next 20-plus years. The purpose of the Yorba Linda General Plan Update is to reflect land use, circulation and other physical changes that have occurred since the adoption of the 1993 General Plan Update includes policies, programs, and implementation actions to address topical areas required by state law. The revisions do not represent a significant departure from the direction and policies set forth in the 1993 General Plan, nor would they result in significant changes in the amount, type, or rate of development in the City. Major components of the General Plan Update include: Update existing conditions, with year 2016 serving as the baseline year. Communicate "Our Vision for Yorba Linda" through a Vision Statement to set the tone for the General Plan's goals, policies, and actions, and establish a foundation based on community values and qualities unique to Yorba Linda. Update of General Plan development projects to buildout, including population, and residential and non-residential development. Communicate "Focus Areas" to more specifically identify those parts of the General Plan Planning Area where potential change is anticipated or planned. Add to, delete, or modify the 1993 General Plan goals, policies, and programs. Amend the remaining General Plan Elements to reflect the components described above.	<b>NOD</b>

PG&E proposes the project as contingency for a planned prescribed fire to be conducted this winter on PG&E property.	<b>NOE</b>	
2016118114	Sequoia Crest Fuel Reduction Project Forestry and Fire Protection, Department of --Tulare Sequoia Crest is a subdivision of approximately 100 homes in the southern Sierra Nevada's, located approximately five miles north of Camp Nelson. Access is via Redwood Drive from State Highway 190. The project area is within the Tule River drainage, with an elevation of approximately 6600 feet, and a generally western aspect. Vegetation is mixed conifer forest, including some very large giant sequoias (part of the Alder Creek grove). The treatment area has been identified as a priority project in the Tulare County Community Wildfire Protection Plan.	<b>NOE</b>	
2016118115	Mountain Communities Fire Safe Council-San Jacinto WUI Fuels Reduction Forestry and Fire Protection, Department of --Riverside The San Jacinto Mountains Wildland Urban Interface (WUI) is located in a densely overgrown forest where years of drought, bark beetle infestation, and seasonal dry winds known as Santa Ana severely increase the potential of a catastrophic wildfire. Norm Walker, Retired U.S.F.S. Division Chief, San Bernardino National Forest, provided the following description of the local communities: "The communities within the WUI are old established communities. There are no practical means of widening roads, establishing 'green belts' of manicured lawns, or building block walls between the community and wildland.	<b>NOE</b>

2005081071	Chiquita Canyon Landfill Los Angeles County --Los Angeles Note: Review Per Lead	<b>EIR</b>	01/09/2017
	<p>The project is an existing previously permitted landfill requesting continued operation and expansion. The project includes the following elements: development of a new entrance and support facilities; better utilization of the landfill's potential disposal capacity through a lateral extension of the existing waste footprint and increased maximum elevation; increased daily disposal limits; acceptance of all nonhazardous waste permitted at a Class III solid waste disposal landfill, exclusive of sludge; continued operation of the landfill; new design features; environmental monitoring; development of a Household Hazardous Waste Facility; mixed organics processing/composting operation; and set aside of land for potential future conversion technology. In addition, the proposed project includes the relocation of a portion of Southern California Edison's existing Saugus-Elizabeth Lake-Fillmore 66 kV Subtransmission Line in order to accommodate landfill improvements.</p>		
2015052040	1500 Mission Street San Francisco, City and County of San Francisco--San Francisco	<b>EIR</b>	01/04/2017
	<p>The project sponsor, Goodwill SF Urban Development, LLC, proposes to demolish an existing 29,000-sf, 30-ft tall building at 1580 Mission Street and to retain and rehabilitate a portion of an existing 57,000 sf, 28-ft tall building at 1500 Mission Street and demolish the remaining portions on the project site, and construct a mixed-use development with two components: an approximately 767,200-sf, 396-ft tall residential and retail/restaurant building at the corner of South Van Ness Ave and Mission St; and an approximately 567,300 sf, 227-ft tall office and permit center building for the city and county of San Francisco on 11th St between Market and Mission St. The project site is bounded by Mission St to the south, South Van Ness Ave to the west, and 11th St to the east in the South of Market neighborhood of San Francisco. The proposed project includes a proposed zoning map amendment and planning code text amendment to create the Mission and South Van Ness Special Use District to supersede the Van Ness &amp; Market Downtown Residential Special Use District designation and a proposed amendment to planning code section 270 associated with bulk limitations, allowing for an exceedance of the current Height and Bulk District limitations additional off-street parking and office space above the fourth floor.</p>		
2013081038	San Miguel Community Plan Update San Luis Obispo County --San Luis Obispo	<b>FIN</b>	
	<p>The proposed San Miguel CPU is a comprehensive update to the existing San Miguel Community Plan adopted in 2004 by the Country of San Luis Obispo. The life of the CPU will be the time period of 2016-2035. The CPU includes revisions to all chapters of the existing Community Plan, including new and revised goals, policies, and implementing actions to reflect current and specific future needs of the community. The CPU includes a revised land use and circulation plan that encourages infill development in existing neighborhoods and new cluster subdivisions and mixed housing developments east of the railroad. The CPU also expands the Urban Reserve Line and identifies two future expansion areas. The EIR will evaluate the CPU at a conceptual level of detail and will serve as a</p>

	programmatic EIR pursuant to section 15168 of CEQA Guidelines.		
2016111025	Taylor Yard Bikeway/Pedestrian Bridge Over the Los Angeles River Project Los Angeles, City of Los Angeles, City of--Los Angeles The proposed project would include the construction a multi-modal bridge over the Los Angeles River between Elysian Valley on the west and Taylor Yard on the east. The proposed bridge would be designed for bicycle and pedestrian use, and would also support emergency vehicles. On the south, the proposed bridge would connect with the existing bikeway along the river. Two American with Disabilities Act-compliant ramps would be constructed in this area. On the north, a new 275-ft long bikeway ramp would lead to a proposed two-way bike path with buffer along Kerr Road that would connect to San Fernando Road. Nine Magnolia trees located along Kerr Road would be removed under the proposed project. Proposed crosswalks would be added at the San Fernando Road/Future Street and Cypress St/Future Street intersections.	<b>MND</b>	12/08/2016
2016111026	Site Plan and Conditional Use Permit PLN16-00021 Victorville, City of Victorville--San Bernardino A site plan and CUP to allow for the development of a fueling station, with an accessory car wash and convenience store including alcohol sales within phase 1 of development, and a multi-tenant two story office/retail building within phase 2 of development on an approximately 5 acre building site. Primary access to this site will be served via Nisqualli Road, as well as a secondary access point via Balsam Road through an off-site connection.	<b>MND</b>	12/08/2016
2016111028	Horton Elementary Joint Use/Guymon St. Pocket Park/Hallmark Way Reversion to Acreage (PTS No. 495774 & 495796) San Diego, City of --San Diego A site development permit for development on environmentally sensitive lands and a reversion of acreage for the vacation of the existing unimproved Hallmark Way public ROW to allow construction of a proposed public pocket park. The project site is located on the north side of Guymon St between 49th St to the west and the existing Horton ES site at 5050 Guymon St to the east. The proposed project consists of development of a 0.86-acre public pocket park including children's play area, shade structures, barbeques, benches, exercise equipment, synthetic turf, restrooms, a drinking fountain, and security lighting on the southwestern portion of the project site. The project would also include construction of a 1.6-acre of a 3.5 acre facility for joint use by Horton ES and the city of San Diego, consisting of a natural turf field with six-foot wide decomposed granite walking track on its perimeter, on the northeastern portion of the project site adjacent to Horton ES. The project site is located within the Encanto Neighborhoods Community Plan Area and city council district 4.	<b>MND</b>	12/08/2016
2016112028	County of Mendocino Medical Cannabis Cultivation Regulation Mendocino County Ukiah--Mendocino Note: MND/IS sent on 12/01/16 revised and extended  The Mendocino County Board of Supervisors proposes two amendments to the Mendocino County Code to add: (1) chapter 10A.17, Medical Cannabis Cultivation Ordinance, to the Agricultural Code (Mendocino County Code title 10A); and, (2)	<b>MND</b>	01/04/2017

	chapter 20.242, medical cannabis cultivation site, to the inland zoning ordinance (Mendocino County Code title 20, division I). Together, these regulations (referred to as "medical cannabis cultivation regulation") will govern agricultural activities related to the cultivation of medical cannabis and establish limitations on the location and intensity of cannabis cultivation in the unincorporated area of Mendocino County.		
2016112029	Bones Lane Minor Subdivision Sonoma County --Sonoma Request for a minor subdivision of 189 acres, creating four parcels, 40, 42, 47, and 60 acres in size.	<b>MND</b>	12/08/2016
2016112030	Maine Prairie Water District - Ulatis Creek Pump Stations Maine Prairie Water District Dixon--Solano The project would construct two new pump stations: PSI, at the NW Corner of the intersection of Highway 113 and Fry Road, and PS2 at the SE Corner of the Brown Road crossing of Ulatis Creek. Project elements would include: installation and operation of PS1, a pump station with a 760 sf footprint and 30 cubic feet per second conveyance capacity, discharging into an existing canal to the north, including a temporary coffer dam; installation and operation of PS2, a pump station with a 4060 sf footprint and a capacity varying up to 96 cfs, including a temporary coffer dam; installation of an initial 1.5 mile 48-in pipeline for water conveyance from PS2 of 64 cfs; installation of a parallel 36-in pipeline from PS2 when needed in the future with a capacity of 32 cfs; installation and operation of fish screens at PS2 to prevent entrapment of fish; and installation of power lines to supply energy to pump stations.	<b>MND</b>	12/08/2016
2016112031	County Road 29 Bridge Replacement Project Yolo County Woodland, Davis--Yolo The County Road 29 Bridge over Dry slough (No. 22C-117) located approximately 0.74 mile west of CR 98 will be replaced. The replacement of this bridge is to improve vehicle safety while traveling on the County road. The new bridge length will be determined during preliminary engineering. The new bridge will be designed to accommodate two 12 foot wide travel lanes and two 4 foot wide shoulders. Earthwork and rock slope protection within the slough may be needed. A storm water pollution prevention plans and sediment control will be implemented during construction. Utilities may need to be relocated. The road will be closed to all through traffic during construction. A detour route will be provided.	<b>MND</b>	12/08/2016
2016111027	Promenade 2035 Los Angeles, City of Los Angeles, City of--Los Angeles The project, located within the Warner Center Plan area, would include approx. 1,432 multi-family residential units, approx. 244,000 sq. ft. of retail/restaurant uses, approx. 629,000 sq. ft. of office space, approx. 572 hotel rooms within two hotels, and an approx. 320,000 sq. ft., 15,000 seat Entertainment and Sports Center. The proposed uses would be supported by approx. 5,610 parking spaces at buildout. The proposed parking spaces would be distributed in both subterranean parking areas and above-grade parking. At buildout, the Project would remove approx. 641,000 sq. ft. of existing floor area and construct approx. 3,271,000 sq. ft. of new floor area, resulting in a net increase of approx. 2,630,000 sq. ft. of new floor area	<b>NOP</b>	12/08/2016

	within the Project Site.		
2009071031	Berth 302-306 (APL) Container Terminal Project Los Angeles, City of --Los Angeles The proposed Project is located on Terminal Island within the Port of Los Angeles. The proposed Project site encompasses Berths 302-306 and is bounded by Terminal Way and Seaside Avenue to the north, Navy Way to the east, Earle Street to the west and Pier 300 and the Outer Los Angeles Harbor to the south. The approved Project involved the expansion of the terminal by adding Berth 306, adding 41 acres of constructed but unimproved back land and the installation of 12 cranes. Terminal capacity would expand to 3.2 million Twenty-foot Equivalent Units (TEUs) upon build out. The revised Project is now a smaller scope that would extend the lease an additional 16 years through 2043, replace eight existing cranes and reduce the previously assess throughput capacity to 2.4 million TEUs.	<b>NOD</b>	
2012111053	San Fernando Valley Water Recycling Project Los Angeles Department of Water and Power Los Angeles, City of, San Fernando--Los Angeles The proposed water recycling pipeline would be located entirely within public street rights-of-way in the Sepulveda Basin. The project area would connect to the existing recycled water distribution system at Vanowen Street near Van Nuys Golf Course and install approx. 11,550 linear feet of 16" diameter pipeline along Vanowen Street, turning South on Havenhurst Avenue then West on Victory Blvd. The pipeline will then split North and South on Balboa Blvd to connect Sepulveda Basin Sports Complex and other customers. The proposed alignment abuts a variety of commercial, residential, open space, public facilities, and limited manufacturing uses.	<b>NOD</b>	
2012111053	San Fernando Valley Water Recycling Project Los Angeles Department of Water and Power Los Angeles, City of, San Fernando--Los Angeles The proposed water recycling pipeline would be located entirely within public street rights-of-way in the Sepulveda Basin. The project area would be bound by I-5 to the east, Ventura Freeway to the south, Mason Ave. to the west, and Lassen Street by I-405 to the north. The proposed project alignment encompasses portions of the communities of Canoga Park-Winnetka-Woodland Hills-West Hills, Reseda-West Van Nuys, Mission Hills-Panorama City-North Hills, Van Nuys-North Sherman Oaks, and North Hollywood-Valley Village. The proposed alignment abuts a variety of commercial, residential, open space, public facilities and limited manufacturing uses.	<b>NOD</b>	
2013021042	Groundwater Reliability Improvement Program (GRIP) Supplementary Recharge Wells Project Water Replenishment of Southern California Whittier--Los Angeles The proposed project would offset the current use of imported water with a combined total of 21,000 acre-feet per year for groundwater replenishment in the Central Basin via the Montebello Forebay. An Advanced Water Treatment (AWT) plant would be constructed for treatment of tertiary treated recycled water from San Jose Creek Water Reclamation Plant prior to recharge via spreading. Influent/effluent diversion structures would connect the AWT plant to the existing outfall pipeline allowing advanced treated water to be blended with tertiary treated recycled water prior to spreading. Additionally, a brine line would be constructed	<b>NOD</b>

	2,500-3,000 lf of ductbank will be installed on Cerritos Ave and Anaheim Blvd for the future installation of a 69kV line that will be installed under a future project in mid-2017. The areas of ductbank total approximately 4.25 miles. Other project features include install of risers and vaults max vault depth = 10ft x 8ft x 20ft long.		
2016112032	Browns Valley Trunk Sewer Napa Sanitation District Napa--Napa Construction and operation of new wastewater conveyance facilities, including a new gravity trunk sewer pipeline and improvements to the West Napa Pump Station.	<b>MND</b>	12/09/2016
2016112034	Little Deer Creek Restoration & Flood Mitigation Project Nevada City Nevada City--Nevada The proposed Little Deer Creek Restoration & Flood Mitigation Project is a state of CA grant funded project located within Pioneer Park in Nevada City, CA. This proposed project is made possible through a joint effort between the city, Sierra Streams Institute and the DWR Urban Streams Restoration Program Grant. There are three primary objectives of the proposed project - 1) to restore approximately 640 linear feet (195 meters) of Little Deer Creek; 2) to reduce flooding impacts to the adjacent Lower Field, and general vicinity of Pioneer Park, by widening the streambed and regarding the Lower Field; and 3) to construct a "Roll and Stroll" trail (i.e., pedestrian, bike, recreational trail) within the perimeter of the park boundaries along Little Deer Creek.	<b>MND</b>	12/09/2016
2016111029	East Lake Specific Plan Amendment No. 11 Project Lake Elsinore, City of Lake Elsinore--Riverside The ELSPA No. 11 is the proposed project. The proposed project consists of amending the existing ELSP to: overhaul land uses, development regulations, circulation, drainage, and architectural guidelines for the specific plan area; streamline development by making the specific plan area guidance documents more user-friendly; protect the natural resources in the Back Basin; and ensure that the City's "Action Sports Capital of the World" activities have a permanent location in the city. The proposed project would allow for a change from the predominantly residential and open space uses currently allowed in the specific plan area to predominantly sports- and recreation-oriented uses while also maintaining open-space.	<b>NOP</b>	12/09/2016
2016111031	Bay Bridge Pump Station and Force Mains Rehabilitation Project EIR Orange County Sanitation District Newport Beach--Orange The proposed project would upgrade the Bay Bridge Pump Station and associated force mains. The proposed project would bring the pump station facility and force mains to current design and reliability standards to ensure continuous service for the OCSA service area. The proposed project would include construction of a new pump station at and adjacent to the existing Bay Bridge Pump Station. The new pump station would be constructed at the existing pump station site, in addition to a portion of the existing RV storage area that surrounds the pump station to the north, east and west. Once the new pump station is placed in service, the existing pump station would be taken out of service, demolished, and redeveloped with upgraded pump station facilities. In addition to the pump station improvements, the project would also include force main facilities for conveyance of wastewater. New	<b>NOP</b>	12/09/2016

	dual force mains would extend from the proposed pump station in a southwesterly direction, via microtunneling beneath PCH. The force mains would cross the Balboa Marina parking lot, and then head west across the Newport Bay Channel. This channel crossing would be constructed via microtunneling or a dredged trench, and the dual force mains would terminate at or near an existing valve vault immediately west of the channel. Both microtunneling and dredging will be further analyzed as part of the CEQA process.		
2016112033	Nevada Irrigation District Sphere of Influence Amendment and Update Nevada Irrigation District Grass Valley, Auburn, Lincoln--Nevada, Placer NID proposes to request LAFCo amend and update its Sphere of Influence, which is defined as the District's probable 20-year boundary and service area, as determined by LAFCo. NID will also apply to the State Water Resources Control Board to adjust its place of use for water rights.	<b>NOP</b>	12/09/2016

	traverse the northwestern boundary of the property.		
2016112040	Flood County Park Landscape Plan San Mateo County Menlo Park--San Mateo The proposed project consists of a Landscape Plan for the long-term redevelopment of San Mateo County's Flood County Park. On April 7, 2016, the County Parks and Recreation Commission voted to approve this plan as the Draft Preferred Alternative for improving Flood County Park. The Landscape Plan evolved through a series of community outreach efforts designed to identify community values, preferred uses, and site layout preferences. It is anticipated that implementation of the Landscape Plan would occur in three phases: phase I, phase II, and phase III. The phase I improvements are expected to be completed in approximately the first two years.	<b>NOP</b>	12/13/2016
2016112041	Veterans Memorial Senior Center/YMCA Redwood City Redwood City--San Mateo The city of Redwood City currently owns and operates the Veterans Memorial Center Herkner Pool, and the Senior Center Annex, located on the west side of Red Morton Community Park in the city of Redwood City. The VMSC building was constructed circa 1955 and, without substantial renovation, will soon reach the end of its useful life. The other facilities are also in need of major upgrades and repairs. The YMCA currently operates a facility at 1445 Hudson Street in the City of Redwood City, located approximately 0.65 miles east of the VMSC. The YMCA is in need of a larger facility. To accommodate the current and future needs of both facilities, the city has partnered with the YMCA to pursue a new joint facility. A master plan has been proposed for the 5.4-acre project site.	<b>NOP</b>	12/13/2016
2016112037	Columbia Union LLC, Site Development Permit SDP16-003 Tuolumne County --Tuolumne Site development permit SDP16-003 to allow the placement of three general commercial retail buildings for the Stone Mill Center as follows: building A=5,006 SF, Building B=2,967 sf and building C=7,960 sf, for a total of 15,933 sf of retail space, on a 2.1+/- acre site. The project site is currently zoned C-1:DMX:AIR under title 17 of the Tuolumne County ordinance code. The project site is located at the intersection of Parrotts Ferry Road and Union Hill Road, approximately 260 ft northwest of the intersection of state highway 49 and Parrotts Ferry Road. A portion of section 23, T2N, R14E, APN 33-033-47. Within supervisor district 1.	<b>Neg</b>	12/13/2016

	project is scheduled to begin early 2017.		
2000092026	Elverta Specific Plan Amendment Sacramento County --Sacramento The RWQCB is issuing a 401 Water Quality Certification for the subject Project. The project consists of mass grading approx. 1,745 acres to prepare for future residential development, paved streets, underground utilities, and other associated improvements. All impacts to waters of the U.S. will be from grading activities. The project will permanently impact 0.409 acres of waters of the U.S.	<b>NOD</b>	
2006032058	Railyards Specific Plan Update, KP Medical Center, MLS Stadium, & Stormwater Outfall Subsequent EIR Sacramento, City of Sacramento--Sacramento The project includes amendments the Sacramento Specific Plan and includes the development of: 6,000-10,000 dwelling units; 415,270 sq. ft. of retail; 2,757,027 - 3,857,027 sq. ft. of office uses; 771, 405 sq. ft. of flexible mixed use; approx. 1,228,000 sq. ft. of hospital and medical uses (with associated parking); 1,100 hotel rooms (keys); 485,390 sq. ft. of historic and cultural uses; and approx. 30 acres of open space. Entitlements are also requested for a major medical center (Kaiser Permanente Medical Center) and sports complex (MLS Stadium). The Sacramento Railyards Specific Plan area is approx. 244 acres and includes the subject property, the City's Sacramento Valley Station, and the UPRR rail corridor. The project proposes to subdivide approx. 197 acres of the site into 118 lots for a variety of uses, including residential, retail, and office. The project also includes a medical center campus on approx. 17 acres and a major sports complex on approx. 14.56 acres. The MLS Stadium project includes design and construction of the sports complex. The Railyards project also includes the design and construction of a stormwater outfall structure which is a facility that will collect, treat, and generally convey stormwater within the project area and discharge it to the Sacramento River.	<b>NOD</b>	
2012062009	Dublin Crossing Specific Plan (PA 08-049) Dublin, City of Dublin--Alameda On Nov. 5, 2013, the City of Dublin City Council approved the Dublin Crossing Specific Plan project, which includes demolition of the existing dwellings and other improvements on the site and construction of a residential mixed-use project with up to 1,995 single- and multi-family residential units; up to 200,000 sq. ft. of retail, office and/or commercial uses; a 30 acre Community Park; a 5 acre Neighborhood Park, and the provision for the 12 acre elementary school site to serve up to 900 students.	<b>NOD</b>

	Code (LUDC) amendments and zoning map amendments (Case Nos. 13ORD-00000-00006 and 13RZN-00000-00002, respectively), to adopt revised zoning regulations and zoning and amendments (Case Nos. 13ORD-00000-00007 and 13RZN-00000-00003, respectively), to adopt revised zoning regulations and zoning and overlay maps for the Coastal Zone.		
2015052066	Elder Creek Channel Rehabilitation Project Water Resources, Department of --Tehama The project is limited to removal of sediment and vegetation to restore Elder Creek channel to the US Army Corps of Engineers 1957 design capacity of 17,000 cubic feet per second (cfs). The total disturbance footprint for all activities is 33.28 acres out of the 183.87 project area.	<b>NOD</b>	
2016082025	Moorhen Marsh Western Pond Turtle Habitat Enhancement Project Mt. View Sanitary District Martinez--Contra Costa The MVSD intends to enhance wetland and riparian habitat, perform maintenance excavation of the Moorhen Marsh ponds and Peyton Slough, replace aging water control structures, implement levee restoration and reconstruction, and improve visitor access and facilities.	<b>NOD</b>	
2016091037	McCall Avenue Sewer Repair and Rehabilitation (R&R) Project Selma-Kingsburg-Fowler County Sanitation District Selma, Kingsburg--Fresno The project would repair and abandon sewer pipelines owned by the City of Selma (City) and operated and maintained by the District, located parallel to McCall Avenue. A portion of these two pipelines are located within City limits and the majority of these pipelines are located south of the City in unincorporated Fresno County. The project involves rehabilitating approx. 3.4-miles (approx. 17,800 linear feet) of 24 inch diameter sewer pipeline on the west side of the road via sliplining - a trenchless construction method which involves inserting a new pipe into the existing pipe. In addition, the project would involve abandoning approx. the same length of 18-inch diameter pipeline on the east side of the road. The rehabilitation/abandonment limits are bound by Hwy 99 to the north in the City of Selma and Clarkson Avenue to the south in unincorporated Fresno County. Temporary construction staging would occur on disturbed District-owned lands outside the McCall Avenue right of way. The surrounding lands to the east and west of the project are developed with rural residences and agricultural lands.	<b>NOD</b>	
2016091041	City Orange Bridge Maintenance Project Orange, City of Orange--Orange The proposed improvements will repair the bridges, decks, side rails, sidewalks, and bridge girders; and clean and seal the deck for the bridges. The work area for the proposed bridge improvements are the bridges themselves. Grading activities will not be required; areas surrounding the bridge locations will not be disturbed.	<b>NOD</b>	
2016118155	Preliminary Test Well (Water Supply Project) Tulare, City of Tulare--Tulare The project is the installation of a preliminary test well to determine the suitability of a site for installation of a new water well that will eventually be connected to the City's existing water supply system.	<b>NOE</b>

2014042069	Corte Madera Inn Rebuild Corte Madera, City of Corte Madera--Marin Note: Recirculated EIR 2	<b>EIR</b>	12/29/2016
	<p>This REIR No. 2 provides the following two components that are intended to supplement the DEIR on the Corte Madera Inn Rebuild Project: 1) revisions to section 4.3, biological resources, of the DEIR to address new information that became available after circulation of the DEIR and first DEIR related to the on site pond; and 2) minor text revisions to section 4.3, biological resources, mainly to provide additional information on the black-crowned night heron, an issue that was addressed in comments on the DEIR and in the FEIR. A new impact related to removal of a widgeon-grass sensitive natural community (due to removal of the on-site pond) was identified, and a mitigation measure was recommended.</p>		
2016071010	Kaiser Permanente Specialty Medical Office Building Project Irwindale, City of Irwindale--Los Angeles The proposed project would provide a total of approximately 450 parking spaces. Proposed parking will include the construction of a five-story, an approximately 115,339 sf, 339 space parking structure on the northeastern portion of the project site. The proposed parking structure would be 64 feet 5 inches in height. Approximately 111 additional parking spaces will be provided in a surface parking lot to be located along the southern, western, and northern sides of the project site. A drop-off/pick-up zone will be provided just south of the new parking structure, along the northeastern portion of the MOB. The proposed project will also include associated landscaping and infrastructure improvements as well as ancillary uses including a Thrive bar, coffee cart, pharmacy, a small biweekly farmer's market, conference center, and other weekly healthcare-related events.	<b>EIR</b>	12/29/2016
2016102034	Triumph Development Hotel and Residential Project Truckee, City of Truckee--Nevada The applicants are proposing to construct a mixed use project that includes a 71,090 sf three story hotel with 114 rooms and five three story apartment buildings with a total of 138 rental units at 10470 East Jibboom St. The apartment buildings are proposed to have a total of 33 studios, 54 one bedroom units, 42 two bedroom units, nine three bedroom units, and common amenities. 361 parking spaces, including 123 hotel parking spaces (four handicap spaces and five guest check-in spaces) and 238 apartment spaces are proposed. East Jibboom St is proposed to be extended through the project site to Donner Pass Road with pedestrian improvements. A Class I trail is also proposed along the southern property line. The parcel is proposed to be subdivided into two parcels - a residential parcel of 7.6 acres and a hotel parcel of 2.8 acres is proposed. Amendments to the Downtown Specific Plan are proposed to ensure consistency with the Housing Element and Development Code.	<b>MND</b>	12/14/2016

The maintenance activities include: A) Debris or obstruction removal; B) Silt, sand, or sediment removal; C) Maintenance of channel capacity; D) Vegetation control: d-1, mechanical control; d-2, aquatic vegetation control; d-3, chemical vegetation control; E) Repair existing erosion control work; and F) Minor erosion control work. Mitigation measures for wildlife protection, erosion control and water quality are implemented to avoid significant adverse effects. Work is/will be done in accordance with existing biological opinions (US Fish and Wildlife Service 2005, 2001, 1991).</p> <p>22390 Swenson Drive, Project No. R2015-01161, CDP No. 201500052 Los Angeles County --Los Angeles</p> <p>The project is a request to construct a 3,416 sf, two story (1708 sf lower level, 1308 upper level) single family residence in the Santa Monica Mountains Coastal Zone. The height of the structure will be approximately 26'-33' from the finished grade. The residence contains 3 bedrooms, 3 bathrooms, and an attached garage. Solar panels for energy efficiency will be installed on the roof of the residence. The total building footprint area for the residence is 1,708 sf, which is approximately 2% of the lot area. The project will include a fire department required turnaround, 1-4 foot tall retaining walls, on-site wastewater treatment system, water well, draft hydrant, two 10,000 gallon water tanks, and a 1,000 gallon rainfall catchment cistern. The proposed landscaping will incorporate all locally native plants to blend with the existing landscape, and provide fire resistant and drought-tolerant landscaping. The house will incorporate minimal reflective glass and exterior illumination to comply with the dark skies ordinance. The materials palette proposes muted, earth tone colors to blend with the context and minimize potential visual impacts. The project contains slopes over 25 percent and has proposed minimal grading, with 543 cy of cut, and 218 cy of fill, and 325 cy of export. The project requires approval of a CDP for construction. The proposed project is located within 200 feet of mapped sensitive biological resources in the H2 habitat category.</p>	<b>MND</b>	12/15/2016
2016111054	<p>Malibu Memorial Park Malibu, City of Malibu--Los Angeles</p> <p>The Malibu Memorial Park project consists of a chapel, 176 parking spaces, 47 freestanding mausoleum structures with a total square footage of 9,400, approximately 28,265 in-ground burial plot spaces intermittently located throughout the property, 3,644 interments in above grade well crypt structures and approximately 65,036 sf of walking trails on approximately 21.0 acres of the 27.8 acre site. The 28-foot in height chapel building consists of a 6,673 sf main level and 9,348 sf subterranean garage and basement located in the center of the project site. Visitor access will be provided by a system of pedestrian and golf cart trails used to access the individual mausoleums and burial plots. A sloping waterfall would mark the primary entrance from Malibu Canyon Road, with an additional water feature in the median of the entry driveway. The project is located in the commercial visitor serving-2 zoning district. The complete project description is provided in the initial study.</p>	<b>MND</b>	12/19/2016

2016082023	<p>California Department of Fish and Wildlife 1602 Routine Maintenance Agreement Caltrans #3</p> <p>--Butte, Colusa, El Dorado, Glenn, Nevada, Placer, Sacramento, ...</p> <p>Caltrans proposes to enter into a long term routine maintenance agreement (RMA) with CDFW, under the Lake and streambed alteration program (1602). This RMA would cover routine maintenance activities occurring within streamzones and adjacent to state of right of way in Butte, Colusa, El Dorado, Glenn, Nevada, Placer, Sacramento, Sierra, Sutter, Yolo and Yuba Counties. Routine maintenance activities include, but are not limited to: the removal of sand, silt, sediment, debris, woody and herbaceous vegetation and other obstructions to flow; the control of weeds, grasses, and emergent vegetation; making repairs and improvements to control erosion and stabilize banks; repairing and/or replacing gates, barricades, culverts and small structures; the repair and/or replacement of existing structures, cleaning and clearing of facilities; and creation of temporary access routes.</p>	<b>NOD</b>

2016118184	<p>Emergency Permit for Treatment of Hazardous Waste, Harvey Mudd College</p> <p>Toxic Substances Control, Department of</p> <p>Claremont--Los Angeles</p> <p>The California Department of Toxic Substances Control (DTSC), has issued an Emergency Permit to Harvey Mudd College to treat hazardous waste by controlled reaction with a chemical solution.</p> <p>It has been determined that these items may be highly reactive and or ignitable and must be stabilized prior to being transported offsite. The items are currently being stored at the Harvy Mudd College facility. Because Harvey Mudd College does not have a permit for the treatment of the hazardous waste, DTSC has determined as a safety precaution to prevent an accident or severe injury, an Emergency Permit should be issued to chemically stabilize the hazardous waste prior to transportation off site by Clean Harbors Environmental Services (CHES). The treatment of the hazardous waste involves the addition of solution to the containers to reduce the reactive or ignitable characteristics of the chemicals.</p>	<b>NOE</b>	
2016118185	<p>Tentative Parcel Map T16-047</p> <p>Tuolumne County</p> <p>--Tuolumne</p> <p>Tentative Parcel Map T16-047 to merge two parcels which total 0.66+/- acre. The project site is zoned R-1:MX (Single-Family Residential:Mobilehome Exclusion Combining) under Title 17 of the Tuolumne County Ordinance Code.</p>	<b>NOE</b>
