STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

November 16 – 30, 2013

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **November 16 – 30, 2013**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

State Clearinghouse
1400 Tenth Street, Room 113
Sacramento, CA 95814

INFORMATION AVAILABLE ON-LINE

The CEQA Statute and Guidelines are available through the Natural Resources Agency's website at:

<http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

Environmental Document Filings with the State Clearinghouse 1999-2012

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at www.ceqanet.ca.gov.

2011122044	<p>Time Extension for Use Permit Application No. 2011-07 - Vista Towers - Lake Road Stanislaus County --Stanislaus</p> <p>Request for a one year time extension to construct a new telecommunications facility with a 100' tall street lattice tower and two 12' x 20' pre-fabricated equipment shelters within a 35' x 70' lease area. Antennas and other communications equipment will be installed on the tower (12 antennas and a microwave dish). The proposed tower will be positioned on top of a hill and directly adjacent to several electrical transmission towers running west to east through the property.</p>	CON	12/03/2013
2013114002	<p>Sale of Reversionary Interest in 5 Acres to Forbestown Lodge No. 50 Bureau of Land Management --Butte</p> <p>Proposed action is the direct sale of the reversionary interest of the lodge and surrounding 5 acre property to a non-profit organization.</p>	EA	12/17/2013
2011101007	<p>McCoy Solar Energy Project Riverside County Riverside, Blythe--Riverside Note: Revised</p> <p>The applicant, McCoy Solar, LLC has requested a conditional use permit (No. 3682) and public use permit (No. 911) from Riverside County to construct, operate, maintain, and decommission an up to 750 MW photovoltaic solar facility and necessary ancillary facilities including a generation tie line, access road and switch yard with the precise generation capacity or megawatts dependent on the technology selected and efficiencies available at the time of a ROW authorization. The applicant also has proposed to enter into a Development Agreement with Riverside County for the project. The portion of the project under the land use authority of Riverside County would be on 477 acres of private land, while the majority of the project is proposed to be located on approximately 4,096 acres of federally administered public land.</p>	EIR	01/02/2014
2013082069	<p>Truckee R. Br and Donner Lake UC Bridge Scour Treatment Caltrans #3 Marysville--Yuba FYI Final</p> <p>This project is located in Nevada County on I-80 at post mile 9.13 and 28.0-28.1. The purpose of the project is to rehabilitate the supporting structures of the bridge by repairing bent caps, replacing seismic shear blocks, and replacing seismic restrainer cables on both the Truckee River Bridge (#17-0063 R/L) and the Donner Lake UC (#17-0076). This project is needed because the spalled and fractured areas of the bridge bents require ongoing maintenance and repairs in order to maintain the structural integrity of the bridge.</p>	FIN

2007012119	<p>Clear Creek Wastewater Treatment Plant Rehabilitation and Expansion Project Redding, City of Redding--Shasta</p> <p>An MND and NOD were prepared for upgrades to the CCWWTP in May 2007 for upgrades to the Clear Creek WWTP. Over the course of the project, it has become clear that the existing biosolids handling facility should be replaced as part of the project. A new biosolids facility will be constructed at the Plant in a graveled parking area. The project will not impact env resources or increase capacity of the plant, nor will it alter the mitigation requirements stated in the MND. As such, Addendum #2 was prepared pursuant to Sec 15164 of the CEQA Guidelines.</p>	MND	12/17/2013
2013111051	<p>The Oaks San Juan Capistrano, City of San Juan Capistrano--Orange</p> <p>The proposed project consists of a 32-lot subdivision for single-family detached residential homes, and modifications to an existing commercial equestrian facility on a 20.25 acre project site. The residential subdivision would feature 10,000 sf minimum lot sizes on an 11.79 acre project site. The equestrian facility would be reduced to 8.46 acres and maximum 50 horse stalls (100 existing), and would continue to offer equestrian training and boarding. Some of the existing equestrian structures would be demolished and approximately 296 trees would be removed 15 trees relocated on-site. Three new structures are proposed within the equestrian facility, including an employee casita, ranch house, and barn. Stormwater drainage will be treated with bio-swales and on-site infiltration. After the stormwater pollutants are treated via the bio-swales and on-site infiltration features, on-site stormwater runoff would be conveyed by connecting new on-site storm drain pipes to two existing storm drain pipes which discharge into San Juan Creek.</p>	MND	12/17/2013
2013111054	<p>ENV-2013-2870-MND Los Angeles, City of Los Angeles, City of--Los Angeles</p> <p>The proposed project involves the demolition of an existing vacant two-story duplex built in 1929, and the construction, use and maintenance of nine for-sale single family houses on a 18,174 net sf (.42 acre) site consisting of three lots in the Echo Park neighborhood of Los Angeles. There are three different designs for the nine homes, which are two to three stories in height. The units range between 1,688 sf and 2,594 sf. Each unit will have two covered parking spaces. The building heights vary from 23 to 36 feet. Vehicular access to Lots 1 through 7 is providing through a common 20-foot driveway that is accessible from Lake Shore Avenue. Direct vehicular access to the garages for Lots 8 and 9 is provided from Liberty Street. There are four non-protected trees, which will be removed. There will be 3,100 cubic yards of export.</p>	MND	12/17/2013
2013111055	<p>ENV-2013-2499-MND / 5058 E. Valley Boulevard Los Angeles, City of Los Angeles, City of--Los Angeles</p> <p>Continued use and maintenance of a 675 sf tire repair and sales shop with the addition of a 1,062 sf garage and 700 sf canopy for storage.</p>	MND	12/17/2013

2013112040	Endicott Biofuels II, Inc. Biofuel Production Facility Stockton, Port of Stockton--San Joaquin It is the intention of Endicott Biofuels II, Inc. (Endicott) to enter into a lease with the Stockton Port District (Port) for approximately 4.91 acres to construct and operate a biofuel production facility at an identified site adjacent to the TXI Riverside Cement Plant, 2845 W. Washington St, Stockton CA 95203. The proposed lease will allow Endicott to make the necessary improvements required to make improvements at the site to make it suitable for Endicott's intended uses.	MND	12/17/2013
2013112043	The Commons at Prairie City Folsom, City of Folsom--Sacramento The project applicant proposes to develop a 140,000 sf, three-story residential care facility. The proposed project would consist of studio (5), one bedroom (85), and two bedroom (21) living suites, and a dementia care unit with 20 beds. The proposed facility would provide a residential setting, with private patios for many ground floor residents, two outdoor common areas, and an enclosed outdoor area adjacent to the dementia unit. A sidewalk would be installed around the perimeter of the facility to provide a walking path for residents, and a landscaped buffer and frontage improvements would be provided along the Prairie City Road boundary.	MND	12/17/2013
2013112044	Use of Copper and Acrolein to Control Aquatic Vegetation in Water Conveyances Reclamation District No. 108 --Yolo, Colusa The use of acrolein and/or copper to treat algae and aquatic weeds in water conveyances, including irrigation canals and ditches. Reclamation District 108 is preparing this IS/MND to meet requirements of 1) The State Implementation Plan (SIP) Section 5.3 and 2) NPDES Permit #CAG990005.	MND	12/18/2013
2013112042	Dry Creek Greenway Multi-Use Trail Project Roseville, City of Roseville--Placer The Dry Creek Greenway Multi-Use Trail project is a proposed 4.25 mile paved multi-use trail in the City of Roseville. The proposed project would be a shared-use trail for pedestrians, bicyclists and other non-motorized vehicle users that would connect neighborhoods, parks, schools, businesses, natural areas, and the on-street bikeway system across the south side of the City. The proposed trail would extend from the existing Saugstad/Royer Park trail near the intersection of Riverside Avenue and Darling Way eastward to the City limits, just past the Old Auburn Road/South Cirby Way intersection. The trail would follow creek corridors along portions of Dry, Cirby, and Linda Creeks. These corridors currently contain segments of existing unimproved natural surface paths and paved multi-use paths, some of which do not meet current City design standards.	NOP	12/17/2013
2013112046	EIR on Oil and Gas Well Stimulation (pursuant to Pub. Res. Code Section 3161 (b)(3) [a.k.a. "SB 4"]) Conservation, Department of -- Senate Bill 4, enacted on September 20, 2013 added certain provisions to the Public Resources Code. One of the newly added provisions (section 3161, subd. (b)(e)) requires the CA Dept. of Conservation to conduct an EIR to provide the public with detailed information regarding any potential environmental impacts of	NOP	01/16/2014

	annexation of the Territory (as described in the EIR certified by the City of San Diego) from the City of San Diego to the city of Santee and Padre Dam Municipal Water District. The Annexation Scenario would result in the construction of a 430-unit residential development with 283 detached single-family residences and 147 single-family detached units clustered on larger lots (green sort units), approximately 4.0 acres (gross) of public parks, 0.64 acre (0.49 acre usable) of pocket parks, a multi-use trail, and public streets and private driveways on the Project site. The remaining pocket parks, a multi-use trail, and public street and private driveways on the Project site. The remaining 94.89 acres of the property would be preserved as Multi-Habitat Planning Area (MHPA) open space. Under the No Annexation Scenario, the site would remain in San Diego's jurisdiction and would result in the construction of a 422-unit residential development with 282 detached single-family residences, 140 single-family green court units, approximately 4.0 acres (3.0 acres usable) of public parks, 0.50 acre (0.39 acre usable) of pocket parks, a multi-use trail, and public streets and private driveways and 94.73 acres of MHPA open space. The site is located within the East Elliot Community Plan Area and within the Mission Trails Design District. The site is designated for residential use and is zoned RS-1-8.		
2007042062	Hosford Parcel Map Subdivision Humboldt County --Humboldt A Parcel Map Subdivision of an approx. 24,830 square foot parcel into three parcels of approx. 6,600 sf (5,100 sf net) to 11,630 sf (8,879 sf net). The parcel is currently developed with two single family residences and detached accessory structures (one SFD and shed to be removed). The parcels are or will be served by McKinleyville Community Services District.	NOD	
2008052010	Pickerel Floodplain Restoration Solano County Water Agency Winters--Solano The project is limited to: (1) re-sloping approximately 0.5 acres of the upper terrace along the north bank of Lower Putah Creek, and (2) and revegetating the Project area with native grasses. The Project is located along Lower Putah Creek, north of Putah Creek Road between Canal Lane to the west and Wintu Way to the east, in the City of Wintners, Solano County. The California Department of Fish and Wildlife is executing a Streambed Alteration Agreement 1600-2013-0410-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Rich Marovich, Solano County Water Agency.	NOD	
2011091085	Santa Maria Energy Oil Drilling and Production Plan Santa Barbara County --Santa Barbara Construction and operation of 136 oil and gas wells, a 3-mile crude oil pipeline, and an 8-mile recycled water pipeline. The proposed wells will produce oil and gas from the diatomite formation using a cycling streaming method. Tertiary treated (recycled) water from the LCSD plant will be used to generate the steam and will be provided to the project site via the recycled water pipeline. Oil produced from the wells will be delivered to an existing oil pipeline via the new 3-mile oil pipeline for transport for refinery destination.	NOD

2013118131	Relocation of the District's Service Center Operations Claremont Unified School District Claremont--Los Angeles The project consists of relocating Claremont Unified School District's Service Center operations to the District Office located at 170 West San Jose Avenue, Claremont, California 91711. To effectuate this relocation, the District will construct a small office structure and install a few accessory structures including a garage and staging areas.	NOE	
2013118132	Work Plan for Shoreline Slag Removal and Barrier Wall Feasibility Studies, Selby Slag Site Toxic Substances Control, Department of --Contra Costa The project is the approval of a work plan for evaluating the feasibility of removing shoreline and offshore slag, and the feasibility of installing a barrier wall along the northern shoreline of the Selby Slag Site (Site). The purpose of the project is to evaluate the feasibility of removing shoreline and intertidal slag (primarily the monolithic slag in the General Region), as well as to evaluate the physical and geotechnical conditons at the Site that will impact the design and alignment of a northern barrier wall.	NOE	
2013118133	Gold Camp Data Center New Heat Exchanger and existing Cooling towers Repair/Upgrade Technology Services, Department of Rancho Cordova--Sacramento The project proposes an Energy Conservation Measure (ECM) for CalTech's Gold Camp Data Center facility. The measure will provide significant energy efficiency upgrade and cost savings to the facility. The HVAC related measure includes the installation of a new heat exchanger and major upgrade to three existing cooling towers. The use of heat exchanger allow substantial free cooling when outside temperatures are below 60 degree thereby reducing the energy costs to provide cooling to the server banks throughout the data center.	NOE	
2013118139	Petition for Change for Water Right Permit 17421 (Application 23664) State Water Resources Control Board Ukiah--Mendocino The project involves approval of a petition for change. The Petitioner proposes replacing the permitted point of diversion (POD) with two existng POD's,	NOE

2013021052	<p>City Ordinance: City-Wide Exclusive Franchise System for Municipal Solid Waste Collection and Handling Los Angeles, City of Los Angeles, City of--Los Angeles Note: Review per lead</p> <p>The City of Los Angeles is proposing to adopt and implement an ordinance for the implementation of a Citywide Exclusive Franchise System for Solid Resources Collection and Handling. The proposed ordinance would replace the current open market system for commercial Solid Resources with a franchised Solid Resources collection system comprised of 11 zones, with one exclusive Franchised Hauler per zone. The proposed ordinance would also increase diversion of materials away from landfill disposal by requiring Franchised Haulers to provide recycling services to Commercial Establishments and by establishing recycling and diversion goals.</p>	EIR	01/10/2013
2013042068	<p>Transfer of Excess Land Parcel Near 5th and R Streets Caltrans #1 Eureka--Humboldt Caltrans is proposing to transfer or sell State-owned excess land within the City of Eureka. The parcel is identified as APN 002-076-004 and is approximately 7,067 sf in area.</p>	FIN	
2013111057	<p>Amend the City of Encinitas Opportunistic Beach Fill Program Encinitas, City of Encinitas--San Diego The project proposes to amend the existing Opportunistic Beach Fill Program in the City of Encinitas to include two new receiving beaches (namely Leucadia Beach and Cardiff Beach). Addition of these sites would allow for stream lined approval of projects proposing placement of beach compatible materials derived from opportunistic sources (e.g., upland construction projects, wetland restoration, dredging) at two additional receiving beaches within the City. Addition of the beaches to the City's program would allow flexibility in placement locations to address areas of localized erosion and/or minimize haul or dredge distances from a given sediment source. The proposed project sites are: 1) Leucadia Beach between Range Street and Diana Street and 2) Cardiff Beach in the vicinity of Restaurant Row.</p>	MND	12/18/2013
2013111058	<p>Active Recycling Company, Inc. Material Recovery Facility and Transfer Station Project Los Angeles, City of Los Angeles, City of--Los Angeles Active Recycling Company is applying to increase the permitted daily tonnage of the existing Material Recovery Facility (MRF) and transfer station. The facility is currently permitted as a Medium Volume Transfer/Processing facility that can accept source-separated C&D debris, greenwaste, and mixed municipal solid waste (MSW). The proposed project will not require the construction of any new structures. The MRF and transfer station operations would make up approximately 24,200 sf (0.56 acres) of the 3.56 acre Recycling Center parcel.</p>	MND	12/18/2013

2013111059	Auberry Road Improvement Project Caltrans #6 --Fresno The purpose of the project is to improve safety while maintaining traffic operations at the intersection. The project is proposing to construct a single-lane roundabout that would force all traffic to make right-hand turns creating a traffic pattern that promotes a safer intersection by slowing down traffic from all directions on a high-speed roadway.	MND	12/18/2013
2013112045	ASBS Stormwater Improvements Project Trinidad, City of Trinidad--Humboldt The City of Trinidad Area of Special Biological Significance (ASBS) Stormwater Improvements project has been designed to collect, treat, and infiltrate City stormwater runoff. This will be accomplished by modernizing the City stormwater system through incorporation of Low Impact Development Best Management Practices (LID/BMPs) to capture, treat, and infiltrate stormwater runoff, thus reducing pollutants entering Trinidad Bay.	MND	12/18/2013
2013112047	Freeway Performance Initiative I-680 in Alameda County Caltrans #4 Fremont, Pleasanton, Dublin--Alameda This project proposes the installation of a ramp metering system for sixteen on-ramps/connectors along Route 680 in Alameda County from Scott Creek Road Undercrossing in the City of Fremont to Alcosta Boulevard Overcrossing in the City of Dublin. These on-ramps/connectors are also widened to provide for High Occupancy Vehicle (HOV) preferential lanes or additional mixed-flow lanes. There will be six retaining walls used for the widening. The project also proposes the installation of traffic monitoring stations for four connectors in the corridor.	MND	12/18/2013
2013112050	Three Creeks Trail Pedestrian Bridge Project San Jose, City of San Jose--Santa Clara The City of San Jose is in the process of developing the Los Gatos Creek Trail and the Three Creeks Trail as part of a citywide effort to improve the pedestrian and bicycle trail system, including the approved Los Gatos Creek Trail-Reach 4 project. The proposed project would provide bicycle and pedestrian access on a new bridge structure that would connect to both the Los Gatos Creek and Three Creeks trails. The project would replace the existing wood trestle with a pre-fabricated, 210-foot-long, single-span steel truss bridge with a poured concrete deck, new concrete abutments, and small retaining walls adjacent to the new bridge abutments to allow for future Los Gatos Creek trail connection.	MND	12/18/2013
2013112052	2013-2021 Housing Element Yuba County Unincorporated--Yuba The Housing Element is a legally required Element of the Yuba County General Plan. The proposed update to the Housing Element serves as a policy guide for meeting the existing and future housing needs for all economic segments of the unincorporated areas of Yuba County for the planning period of 2013-2021. Through an analysis of adopted land use policies, the Housing Element ensures that the County of Yuba plans for its fair share of the regional housing need. In addition, the Housing Element contains estimated of existing and projected future housing needs, outlines strategies to address those needs and identifies	MND	12/19/2013

	constraints to housing production.		
1999111132	Draft Subsequent EIR for FMFCD 2013 District Services Plan Fresno Metropolitan Flood Control District Fresno, Clovis--Fresno For the purposes of program planning, structure, service delivery, and financing, a distinction is made between flood control and local drainage services. The flood control program relates to the control, containment, and safe disposal of stormwater that flow onto the valley floor from the eastern streams. The local drainage program relates to the collection and safe disposal stormwater runoff generated within the urban drainage areas and rural watersheds. Collectively, these facilities comprise the District Service Plan.	NOP	12/18/2013
2013111056	Tranquillity Solar Generating Facility EIR Fresno County --Fresno RE Tranquillity LLC (the Applicant) has applied to the Fresno County Public Works and Planning Department (the County) for six CUP to construct, operate, maintain, and decommission photovoltaic electricity generating facilities and associated infrastructure to be known as the Tranquillity Solar Generating Facility, which would generate a total of up-to 400-megawatts on approximately 3,732 acres in unincorporated Fresno County (collectively, the Project). The Project would provide solar power to PG&E customers via an interconnection within the Project site to two existing PG&E transmission lines: the Panoche-Helm and Panoche-Kearney lines.	NOP	12/18/2013
2013111060	Camino Del Rio Mixed Use San Diego, City of San Diego--San Diego Site Development Permit and a Planned Development Permit to demolish existing structures (53,496 sf) and on-site surface parking and construction of a mixed-use development (approximately 398,000 sf gross floor area) consisting of residential, retail, and shopkeepers units in a "wrap design" within the Mission Valley Community Plan area. The project would range in height from two stories to five stories and would have a total of 291 residential units, 14 shopkeepers units, and 9,000 sf of retail and commercial space. A total of 514 parking spaces would be provided in a six-story, above ground parking structure, in addition to 78 surface parking spaces, for a total of 592 parking spaces.	NOP	12/18/2013
2013112049	Hat Ranch Project Manteca, City of Manteca--San Joaquin The proposed project site is located in a currently unincorporated area of San Joaquin County, southeast of the City of Manteca City limits. The City limits currently make up the project's western, and a portion of the northern and eastern boundaries. The project is proposed to be annexed into the City, bordered by the future Antone Raymus Expressway to the south and the future Atherton Drive extension to the east. The proposed project is an age-restricted residential development that would include 800 single-family units on ~184.3 acres of land. Also proposed is ~30.3 acres designated for park usage that would include the existing 30,000 sf residential mansion to be converted into a senior community center with amenities (such as tennis courts, softball fields, etc.), as well as park areas, for the residents of the project. In addition to the proposed project, a Non-age Restricted Alternative development will be analyzed at an equal level as	NOP	12/18/2013

	<p>project will occupy approximately 46 percent of the approximately 156-acre site. Existing agriculture on the project site would be removed and replaced by the proposed project, consisting of approximately 3,070,400 square feet of warehouse/distribution building space and approximately 46,000 square feet of retail building space (totaling 3,117,000 square feet). The proposed project is anticipated to be built in more than one phase, with initial grading and construction scheduled to commence in fall of 2013.</p>		
2013081010	<p>UCLA Stuart House Replacement Project University of California, Los Angeles Santa Monica--Los Angeles</p> <p>The proposed project involves the construction and operation of a new 4-level (3 above ground and 1 subterranean level), approximate 21,700 gsf building to accommodate the Stuart House program and related services provided by the Rape Treatment Center (RTC). The existing Stuart House building located at 1336 16th Street, approximately 170 feet southeast of the project site, would be vacated upon completion of the new building. The project would involve a net increase of approximately 13 employees. Construction is anticipated to begin in February 2014 with completion in August 2015.</p>	NOD	
2013092017	<p>Storm Drain Master Plan 2012 Update Milpitas, City of Milpitas--Santa Clara</p> <p>The proposed project is the implementation of the Milpitas Storm Drain Master Plan (SDMP), which identifies the capital improvements needed to maintain recommended levels of protection against stormwater runoff, and the need for a revenue stream that would allow the necessary capital improvements to keep the storm drain system in working order for the adjacent land uses into the future. The SDMP is based on ultimate build-out within the City's boundaries according to the General Plan's Land Use Map (October 2012). The Milpitas SDMP is divided into different types of improvement projects throughout the City's storm drainage system. To increase the pipeline storm drain system capacity, there are two types of proposed projects: installing new relief sewer pipelines parallel to existing pipelines; and replacing overloaded pipelines with larger diameter pipes in the same locations. Each of the City's storm drainage collection systems discharges into one of Coyote Creek's tributaries, by either gravity or pumping. The proposed project would include the replacement of existing outfalls, installation of new outfalls, or new outfalls where none exists.</p>	NOD	
2013118134	<p>Cruise Terminals CCTV Surveillance Enhancements San Diego Unified Port District San Diego--San Diego</p> <p>The proposed project involves the installation of surveillance cameras and closed circuit television (CCTV) infrastructure on the immediate land side approaches to both the B Street Pier Cruise Ship Terminal and the Broadway Pier Cruise Terminal. Coverage will provide full day/night visibility of all approaches, and entry ways to the regulated terminal areas.</p> <p>There are currently four early generation cameras providing area coverage but it has been found these are insufficient to effectively monitor this vulnerability area.</p>	NOE

	yards of fill for remedial grading for a total site disturbance of 22,400 sf.		
2013112054	Blue Lead Gold Mine Nevada County Nevada City, Grass Valley--Nevada A Use Permit (U08-021) proposing to extract placer gold deposits from a 74.09-acre site. The extraction is proposed in a five phase operation over a 20-year lifespan. A Reclamation Plan (RP08-001) proposing to reclaim the 74.09-acre site from the proposed and historic mining activities, converting the property to an open space, timber land suitable for a rural residential land uses consistent with FR zoning district. A Rezone (Z08-006) proposing to add the Mineral Extraction (ME) combining district to the three FR-40 zoned parcels in this application.	MND	12/19/2013
2013112057	Midtowne Healdsburg Project Healdsburg, City of Healdsburg--Sonoma The project applicant (DRG Builders) is proposing to subdivide the site and develop 40 single-family detached dwelling units and 0.27-acre of open space/park. The density would be 13.75 units per acre. Each residence would have a two-car garage. Primary vehicular access to the site would be via a privately owned driveway connecting both Monte Vista Avenue and Ferrero Drive. Privately owned alleys would provide vehicular access to the homes. Pedestrian access to the project would be from connections to the sidewalks located along the Ferrero Drive, Healdsburg Avenue, and Monte Vista Avenue frontages.	MND	12/19/2013
2003051013	Cuyamaca College Facilities Master Plan Update Grossmont-Cuyamaca Community College District El Cajon--San Diego In 2004, the District adopted its 2003 Facilities Master Plan for the Cuyamaca College Campus and certified the Cuyamaca College Master Plan Final EIR. The District has subsequently developed a new educational master plan, which lead to an update to the previous Facilities Master Plan. A number of the projects in 2003 Facilities Master Plan have been deferred because of the funding to the 2013 Facilities Master Plan, while new projects have also been added. The projects would increase on-campus space by ~53,500 net asf. Campus population is projected to gro by 2,200 students (for a total enrollment of 11,150 students) during the 2013 Facilities Master Plan implementation.	NOP	12/19/2013
2003051078	Grossmont College Master Plan Grossmont-Cuyamaca Community College District El Cajon--San Diego In 2005, the District adopted its 2003 Facilities Master Plan and certified the Grossmont College Master Plan Final EIR (2005 Final EIR; SCH No. 2003051078). The District has subsequently developed a new educational master plan, which lead to an updated to the previous Facilities Master Plan. A number of the projects in 2003 Facilities Master Plan have been deferred because of funding to the 2013 Facilities Master Plan, while new projects have also been added. The projects would increase on-campus space by 210,000 net asf. Campus population is projected to grow by 4,800 students (for a total enrollment of 23,500 students) during the 2013 Facilities Master Plan implementation.	NOP	12/19/2013

2013112055	PA-1300183 (SA) San Joaquin County Tracy--San Joaquin A Site Approval application for a 16,500 sf farm equipment repair facility to include a 6,000 sf indoor space for repair work and a 10,500 sf covered area for shaded parking. The applicant is requesting an alternative surfacing material for farm equipment maneuvering areas.	Neg	12/19/2013
2005111118	South Pointe West Specific Plan Diamond Bar, City of Diamond Bar--Los Angeles CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2013-0084-R5) to the project applicant, Lewis Operating Corps., represented by John Snell. The project proposes to remove vegetation, grader over, or partially obstruct a total of 0.62 acre of CDFW jurisdictional drainages vegetated with coast live oak woodland, mixed chaparral/rural and southern willow scrub habitats. All impacts are permanent and will occur during the construction of 99 dwelling units, associated roadways, fuel modification zones, and a neighborhood park located over 42.12 acre of the project site. The 42.12 acres includes an approximately 31.28 acre tentative tract map area, an approximately 3.24 acre are located off-site which is proposed for a neighborhood park, and an approximately 7.45 acre area off-site which will be used as stockpile site for the placement of surplus oil material excavated during grading operations. A total of 16 coast live oak trees, 8-30 inches diameter at breast height (DBH) will be removed and total of one willow tree, 12 inches DBH will be removed. The project will mitigate for these impacts through riparian habitat creation, restoration, and/or enhancement of 1.4 acres of oak woodland, mixed chaparral, and southern willow scrub habitats at a CDFW approved location and include a plan for long term management.	NOD	
2008081090	San Joaquin Cross Valley Loop Transmission Project Public Utilities Commission Visalia, Farmersville--Tulare The Project is comprised of the construction, operations, and maintenance of a new 23-mile long double-circuit 220 kilovolt (kV) transmission line looping the existing Big Creek 3-Springville transmission line to the existing Rector substation, creating the new Big Creek 3-Rector and Rector-Springville transmission line circuits.	NOD	
2010044007	Marine Corps Air Ground Combat Center (MCAGCC) TwentyNine Palms U.S. Marine Corp Twentynine Palms--San Bernardino Project involves construction and operation of the new customer dedicated, 115/33kV Leatherneck Substation which will be connected and looped to the existing Hi Desert Substation and Carodean Substation. The Hi Desert-Leatherneck Subtransmission Line will consist partly of a new line and partly of reconfigured existing line. The Project will result in impacts to 289.07 acres of desert tortoise (<i>Gopherus agassizii</i>) habitat, including temporary impacts to 285.48 acres and permanent removal of 3.59 acres. The Project is expected to result in incidental take of desert tortoise, which is designated as a threatened species under the California Endangered Species Act (CESA). The incidental take permit referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.	NOD

2010062009	Central Marin Ferry Connection Multi-Use Pathway Phase I Project Marin County Larkspur--Marin The project involves connecting two pathways that are on either side of East Sir Francis Drake Boulevard (ESFDB). A new elevated multi-use path will cross over ESFDB and then slope down through a "U" shaped ramp over the salt marsh in order to match the existing grade of the existing multi-use boardwalk on the side of ESFDB.	NOD	
2011052049	High & MacArthur Mixed Use Project Oakland, City of Oakland--Alameda The project entails the redevelopment of a currently vacant lot with a mixed-use project including ~115 units of senior housing 3,446 sf of ground floor commercial space, and 65 parking spaces. Project approvals include without limitation: Major Conditional Use Permits to exceed the maximum allowable density, to reduce the parking requirement, and to provide ground-level parking and loading; Minor Variances to exceed the general height limit and the height limit adjacent to the R-50 Medium Density Residential Zone; and Design Review.	NOD	
2012062017	Merrill Residence Halls Capital Renewal University of California Santa Cruz--Santa Cruz On December January 3, 2013, the University adopted the Mitigated Negative Declaration and the Initial Study prepared for the proposed Merrill Capital Renewal Project and approved the Project. The Project, as described in the Initial Study and approved in January 2013, consisted of major maintenance and renovation of four student residence halls and the Guzman Suites student apartment building; improvements to the pedestrian circulation system and outdoor gathering spaces with Merrill College; and replacement of two small buildings with a new building of approximately 4,609 sf. The Project, as approved in January 2013, would add approximately 60 additional student bed spaces through reconfiguration of existing space and enclosure of existing stairwells and roof decks. The Project design has now been modified to include the demolition of the Guzman Suites apartments and associated infrastructure.	NOD	
2013071073	Jordan High School Major Renovation Project Long Beach Unified School District Long Beach--Los Angeles Implementation of campus master plan in approximately six phases starting in January 2014 ending in 2028 (dependent on funding). Project includes demolition of approximately 10 permanent buildings and 32 portable buildings, renovation of approximately 213,000 sf of existing building space, and construction of approximately 240,000 sf of new building space, to replace the classrooms that were demolished. At full buildout, the project site would consist of approximately 453,000 sf of total building space. The number of classrooms would decrease from 131 to 129 with a total maximum student capacity of 3,870. Capacity would decrease with the proposed project and there would be no change to enrollment. All phases of the proposed project would be contained within the existing boundaries of the school site.	NOD

2013118158	<p>San Joaquin Valley Unified Air Pollution Control District Rule Development: Amendments to Rule 4308 (Boilers, Steam Generators, and Process Heaters---0.075 MMBtu San Joaquin Valley Air Pollution Control District --Fresno, Kern, Kings, Madera, Merced, San Joaquin, ... U/hr to less than 2.0 MMBtu/hr)</p> <p>This is a rule amendment project to amend existing District Rule 4308. Rule 4308 applies to boilers, steam generators, and process heaters 0.075 MMBtu/hr to less than 2.0 MMBtu/hr. The purpose of this rule amendment project is to fulfill a commitment in the 2012 PM2.5 Plan which will contribute to the Valley's progress towards attainment of federal air quality standards for PM2.5 and ozone by reducing NOx, which is a precursor for both PM2.5 and ozone. The proposed amendments include: lowering the oxides of nitrogen (NOx) limit for natural gas fired instantaneous water heaters 0.075---0.4 MMBtu/hr from 55 ppmv; clarify that rule also limits CO emissions; add a definition for the following terms: Environmental Protection Agency, hot water pressure washer, and South Coast Air Quality Management District; add an exemption for hot water pressure washer; clarify section 6.2.3 that the SCAQMD protocol Nitrogen Oxides Emission Compliance Testing for Natural Gas-Fired Water Heaters and Small Boilers is only applicable to natural gas fired units.</p>	NOE	
2013118159	<p>San Joaquin Valley Unified Air Pollution Control District Rule Development: Amendments to Rule 4702 (Internal Combustion Engine) San Joaquin Valley Air Pollution Control District --Fresno, Kern, Kings, Madera, Merced, San Joaquin, ...</p> <p>This is a rule development project to amend existing District Rule 4702. Rule 4702 applies to any internal combustion engine rated at 25 brake horsepower or greater. The purpose of this rule amendment project is to make administrative updates to rule language to clarify existing rule requirements. The proposed amendments include: add Federal Register citations to Section 3.37; delete "stationary" from Section 5.2; delete "the" from Section 5.10.2; add "and" to Section 7.5.2.1; add "source" to Section 7.6.2.2; and add a line item to Table 2 to clarify that NOx limits for lean burn waste gas fired engines used exclusively in non-agricultural operations is 65 parts per million volume (ppmv).</p>	NOE	
2013118160	<p>New Leased Space for PARO (Power and Risk Management Office) Water Resources, Department of Sacramento--Sacramento</p> <p>DWR is requesting to lease: approximately 12,000 nuf of Office Space. The proposed use is compatible with the subject property., only normal tenant improvements are necessary, and there is adequate visitor and staff parking and the property is not 50 years old.</p>	NOE	
2013118161	<p>Lease of Office Space Commission on Peace Officer Standards & Training, California West Sacramento--Yolo</p> <p>The project proposes to lease approximately 40,248 square feet of general office space in an existing office building. This lease would house approximately 127 staff with 30-50 clients/visitors weekly. The space would accomodate approximately 50 parking spaces for employees and state vehicles. POST's headquarter relocation to the project location will help meet its future needs, achive improve funtionality and efficiencies in facility design and a cost savings in rent.</p>	NOE

2013112058	Roseville Hotel & Conference Center Project EIR Roseville, City of Roseville--Placer Construction of a Hotel and Conference Center facility on a 11 acre site in the City of Roseville.	NOP	12/20/2013
2013111065	Five Cities Lift Station Replacement Project. Project P13-000126 Pismo Beach, City of Pismo Beach--San Luis Obispo The Five Cities Lift Station Replacement Project consists of the replacement of the existing 1960's vintage above-grade lift station with a submersible wet well lift station and installation of approximately 2,300-LF of 8-in diameter forcemain sewer pipe. The lift station will have an enclosed chemical containment building and on site emergency generator. The existing lift station is located on Hwy 1 (also called Dolliver Street in the Project area) in the right-of-way across from the Pismo State Beach North Beach Campground entrance. The existing forcemain is a 6-in main aligned along the easterly side of Hwy 1, crossing Hwy 1 at Cypress Street and then crossing the Pismo Creek on the wooden Cypress Street Bridge. The City will be upgrading the Five Cities forcemain to an 8-inch diameter pipe as part of the project.	Neg	12/20/2013
2013111067	Housing Element Update - Case No. 2013-04 Westminster, City of Westminster--Orange The project consists of updating the City's current Housing Element (a required element of the General Plan) in accordance with Sections 65580 through 65589.8 of the CA Government Code. The updated Housing Element addresses the City's housing issues and needs for the period between 2013 to 2021. The adoption of the Housing Element will not in itself result in any environmental impact as the project is a policy document on housing issues rather than a development proposal. Furthermore, the Housing Element, if adopted, would apply citywide as it is not associated with a specific site, parcel, and/or lot.	Neg	12/20/2013
2012072021	Seven Bridges Scour Repair Project Caltrans #3 --Colusa, Butte, Glenn The California Department of Fish and Wildlife is executing Lake or Streambed Alteration Agreement number 1600-2013-0192-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, California Department of Transportation (Caltrans). The structure is an arch culvert on the upstream side, matched to a box culvert at the downstream side, covered with non-bearing wing walls on each side of the bridge (Br No. 11-0097). The facility has one lane in each direction, and staging requires a temporary construction easement on the northern side of the site. Scour has undermined the full width of the slab footing supporting the combined structure. The repaired would inject slurry concrete in the area under the slab that has been scoured out on the downstream side. To prevent future scour, up to 22.4 cubic yards of rock slope protection (RSP) would be situated downstream over fabric to slow water velocity.	NOD

2013114003	Sutter Basin Project U.S. Army Corps of Engineers Yuba City--Yuba, Sutter Report on flood risk management for the Sutter Basin. Plan to reduce flood risk by strengthening approximately 41 miles of existing Feather River West Levee from the Thermalito Afterbay to Laurel Avenue. The primary method of strengthening the existing levee is the construction of soil-bentonite cutoff wall of various depths. Non-structural measures would be implemented in conjunction with the recommended plan, including an emergency evacuation plan, identification of flood flight pre-staging areas, updates to floodplain management plan, and flood risk awareness communication.	EIS	12/23/2013
2013111069	Specific Plan DEV14-00001 (Civic Center Community Sustainability Plan) Victorville, City of Victorville--San Bernardino A Sustainability Plan to reclassify approximately 473 acres of land from its current General Plan and Zoning Designations to a Specific Plan General Plan designation with land use categories and development standards unique to the plan area. The Specific Plan is proposed to promote sustainable improvements, practices and development that exemplifies connectivity, environmental conservation and reduces the areas carbon footprint. The plan also seeks to provide options and opportunities for property owners, business owners, and developers to incorporate sustainable practices into their developments and/or operations above and beyond those that are required by the adopted building code.	MND	12/23/2013
2013111073	TeleSpan Communications LLC Monterey County --Monterey Combined Development Permit consisting of: 1) Coastal Development Permit to allow the development of a wireless telecommunications co-location facility. The facility includes a 150 foot high monopole that will support up to four commercial telecommunication providers and a 3,500 sf fenced area that will contain two (2) 240 sf equipment shelters and two (2) 50 foot emergency generators (Verizon and AT&T) and two (2) 100 sf areas for future equipment shelters for commercial telecommunication providers. The project include approximately 1,730 cubic yards of grading (865 cubic yards of cut and 865 cubic yards of fill) for site improvements including a new access road (approximately 800 linear feet of road); 2) Coastal Development Permit to allow the removal of 16 trees (five Oaks, two Pines and seven Cottonwoods; and 3) Coastal Development Permit to allow development within 100 feet of environmentally sensitive habitat area. The property is located between San Miguel Canyon Road and Hall Road, Royal Oaks (APN 181-061-012-000), North County Land Use Plan, Coastal Zone.	MND	12/23/2013
2013112064	Antelope Creek Flood Control Project Placer County Flood Control And Water Conservation Roseville--Placer The project proposes to construct two primary flood control element - an Upper Weir and a Lower Weir, along with recreational and aquatic and riparian habitat restoration elements. The project is situated along Antelope Creek between the SR 65/Roseville Bypass and Atlantic Street. The primary objective of the project is to detain additional flood volume along the creek corridor, thereby reducing downstream peak discharges along the Dry Creek main stem through downtown Roseville and portions of Placer and Sacramento Counties. 2003021052	<p>2013 Regional Water Facilities Optimization and Master Plan Update and Climate Action Plan San Diego County Water Authority --San Diego</p> <p>The 2013 Master Plan Update (Plan) evaluates the Water Authority's ability to continue to meet its water supply obligations. The Plan identifies proposed improvement projects that would enhance reliability and serve projected water demands in the San Diego region. This would include a pipeline conversion project, the installation of system isolation valves, the installation of a regulatory system storage tank, upgrades and a new power supply to the existing San Vicente Reservoir Pump Station, and the rehabilitation, repair, or replacement of existing infrastructure components. The Plan also includes preparation of a Climate Action Plan, which includes both GHGE reduction strategies and adaption measures to ensure the Water Authority's water supplies, infrastructure, and services will accommodate the potential impacts of climate change.</p>	SIR	01/06/2014
1996022060	<p>Vineyard Springs Drainage Master Plan Revision of Laguna Creek Flood Control Sacramento County Vineyard (subdivision)--Sacramento</p> <p>The adopted Drainage Master Plan for the Vineyard Springs Comprehensive Plan (VSCP) includes two regional detention basins at the confluence of Laguna Creek Tributary #1, two local detention basins on Laguna Creek, a single detention basin facility on Gerber Creek, and channelization of Laguna Creek from Sheldon Road to Vineyard Road (a total of five miles). The DMP also mentions that the ultimate condition will require an additional regional basin at the "Sacramento Aggregate Plant" (the Triangle Rock quarry) at a future time (noted as "20 to 25 years away" at the time the DMP was published). This ultimate basin would be located south of Florin Road in between the Folsom South Canal and Laguna Creek. The VSCP itself included plans to incorporate pedestrian and bicycle trails within the open space corridor along Laguna Creek. The goals of the adopted DMP included the elimination of what is called the "inter-basin transfer" between Laguna and Gerber Creek and the containment of the 100-year floodplain within the Laguna Creek open space corridor.</p>	NOD	
2013092051	<p>Northgate High School Aquatic Center Mount Diablo Unified School District Walnut Creek--Contra Costa</p> <p>The District is proposing to construct the Northgate High School Aquatic Center, which includes a 40 meter x 25 yard pool, ranging from 3.5 to 13 feet in depth with 16 competitive swimming lanes. The project also includes: three luminaires mounted on each of the four 60-foot light poles; a PA system; a 3,547 sf sports medicine classroom and lab facilities, restrooms, storage, office and maintenance structures; and other improvements.</p>	NOD

2013-09	Santa Ynez Band of Chumash Mission Indians of the Santa Ynez Reservation - APNs: 141-121-51, portion of 141-140-10 Bureau of Indian Affairs --Santa Barbara Note: Pursuant to the October 24, 2013 Order of the Interior Board of Indian Appeals (IBIA) in which it vacated the Tribe's Land Consolidation and Acquisition Plan ("TCA") and the submission of a revised narrative for the Camp 4 fee-to-trust application, the lead agency is reissuing this notice to again seek comments regarding the within-subject application submitted by the Santa Ynez Band. The previous notice was dated September 17, 2013.	BIA	12/24/2013
---------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------	------------

The subject property encompasses ~1,427.78 acres more or less. The project is adjacent to highway 154 and is 1.6 miles from the Santa Ynez Reservation. The Tribe intends to provide tribal housing and supporting infrastructure on a portion of the property. The remainder will continue to be used for economic pursuits (vineyards and a horse boarding stable), as well as for future long range planning and land banking.

2013082066	Central Middle School/Bridge School at Arroyo Project San Carlos School District San Carlos--San Mateo The proposed project includes modernization and expansion of the 8.96-acre Central Middle School campus in the City of San Carlos to accommodate a growing projected student population at the Central Middle School and new construction of the Bridge School at Arroyo on the site. The existing Central Middle School serves Grades 5 through 8; with the project, the expanded Central Middle School would serve Grades 6 through 8 and the new Bridge School at Arroyo would serve Grades 4 and 5. The modernization Central Middle School would allow a student enrollment of 600 students and the Bridge School at Arroyo would have a capacity for 400 students. Thus, the project site would have a total student population of 1,000 students at completion, an increase of approximately 350 students over existing enrollment at the Central Middle School. 2003021141	General Plan Amendment/Zone Change (PA 01-114) (aka: The Ranch Plan) Orange County --Orange Santa Margarita Water District filed an application for a temporary permit to appropriate water on September 16, 2013 pursuant to Water Code section 1425. The district proposes to divert return flows from purchased water flowing Gobernadora Creek. An upper basin will use a wetland process to treat non-storm flows for irrigation use within the Coto de Caza community. A lower basin will be used to attenuate storm flows. A portion of the water diverted will be stored in the District Portola reservoir. The temporary permit is necessary to reduce the District's reliance on imported water and prevent the imminent loss of grant defunding for the project.	NOD	
2004091159	Tijuana River Valley Regional Park Trails and Habitat Enhancement Project San Diego County San Diego--San Diego The project involves implementation of trails and habitat enhancement activities for Monument and Spooner Mesa in Tijuana Valley Regional Park. Specifically the project approved by the Wildlife Conservation Board will implement approximately 5 miles of trails and restore approximately 15 acres of coastal sage scrub habitat.	NOD	
2005071020	Sesi Property Closure Project, Otay Mesa Area, San Diego, California San Diego County San Diego--San Diego CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2005-0608-R5) to the project applicant, Jamir Adamo. Project activities include excavating and re-grading soils within the area of the existing landfill and adjacent area and covering the waste fill surface with a foundation layer, low permeability layer, and vegetation layer. This fill will extend into the stream in the southwest corner of the area of disturbance. These areas will be completed to a slope of 1:1 to 3:1, and were designed with a toe design to minimize the encroachment into the stream. Surface water drainage will be controlled by directing water that flows onto property from surrounding areas, as well as site runoff, into an engineered drainage feature that will be constructed on the final cover. Permeable riprap and gabion channel protection will be installed to reduce velocity and erosion. Short sections of channel will be lined with concrete where additional protection against erosion is required. Soil berms will be constructed at the edge of the top deck where surface runoff would flow down side slopes. The runoff will be collected and drainage into an open channel by asphalt concrete line down drains. Where closed depressions occur as the result of construction of the final cover section. The surface water will be discharged to the natural stream channel at the toe of the proposed landfill slope.	NOD	
2006061140	South Subregion Natural Community Conservation Plan / Master Streambed Alteration Agreement / Habitat Conservation Plan Orange County --Orange Santa Margarita Water District filed an application for a temporary permit to appropriate water on September 16, 2013 pursuant to Water Code section 1425. The district proposes to divert return flows from purchased water flowing Gobernadora Creek. An upper basin will use a wetland process to treat non-storm flows for irrigation use within the Coto de Caza community. A lower basin will be used to attenuate storm flows. A portion of the water diverted will be stored in the	NOD

<u>Documents Received on Monday, November 25, 2013</u>			
	District Portola reservoir. The temporary permit is necessary to reduce the District's reliance on imported water and prevent the imminent loss of grant funding for the project.		
2008012032	Camels Hump Caretaker Residence (PMPC 20110109) Placer County Colfax--Placer The project proposes a Minor Use Permit to allow for the construction of a caretaker's residence on a portion of a 597.5-acre property.	NOD	
2011042023	Dry-Fermentation Anaerobic Digestion Facility Project (SP09-057) San Jose, City of San Jose--Santa Clara New Solid Waste Facilities Permit to allow Anaerobic Digestion of 500 tons per day of compostable material (green material, pre and post-consumer food material, mixed soil waste, agricultural material) on a 120-acre facility.	NOD	
2011081095	Digital 395 Middle Mile Project Public Utilities Commission Bishop--Mono, Inyo, Kern, San Bernardino The project includes installation of approximately 600 miles of underground, high strand county fiber-optic cable, with various spurs (distribution lines) away from main backbone, connecting to 17 prefabricated buildings (nodes) within communities along the route, and approximately 626 underground access vaults placed approximately every 4,500 to 7,500 feet. The project is expected to result in temporary loss of 379 acres of Mohave ground squirrel (<i>Spermophilus mohavensis</i>) and desert tortoise (<i>Gopherus agassizii</i>) habitat and incidental take of these species. This ATP Amendment No. 2 will change the expiration date of the ITP from October 31, 2013 to December 31, 2014.	NOD	
2011091055	Crystal Geyser Roxane Cabin Bar Ranch Water Bottling Facility Project Inyo County --Inyo The Project would develop a spring water bottling facility and ancillary uses. The water bottling facility would include an approximately 198,500-square-foot bottling plant facility with four bottling lines an approximately 40,000-square-foot storage warehouse. Proposed ancillary uses include rooftop solar array, a fire suppression building, a stormwater detention basin, a leach mound, a fire access road, and a parking and truck, staging area. To provide adequate access from US 395 to the bottling facility, the Project would remove the site's existing access road (i.e., Cabin Bar Ranch Road) and construct a new permanent access road approximately 2,500 feet to the south. The bottling facility would utilize spring water from three existing production wells to supply the bottling operations. The Project would also use fourth existing well to provide domestic potable water to the water bottling facility's employees.	NOD	
2011111068	Upper Narrows Pipeline Replacement Project Victor Valley Wastewater Reclamation Authority Victorville--San Bernardino A significant storm event occurred in the Victor Valley sub region and San Bernardino County, beginning the week of December 19, 2010. As a result of the devastating rains, VVWRA sustained damage to the sewer interceptor under the Mojave River in a section of the river with extremely limited access known as the Upper Narrows. The pipe breach was discovered on December 29, 2010. VVWRA immediately began work to create an emergency sewer force main to bypass the	NOD

	breach in the damaged sewer interceptor and divert the wastewater through newly built temporary lines and booster pumping stations. Additionally, the force of the river flow resulting from the storm event was so great that the exposed manholes along the damaged sewer interceptor within the Mojave River (estimated to be between MH 5-1 to MH 5-8, and MH 1 to MH 4) became titled; causing further damage to the pipeline and manholes. Sand, sediment, and debris entered the pipeline at the ruptured areas.		
2012052059	Dumbarton Quarry Reclamation Plan Amendment Fremont, City of Fremont--Alameda The applicant, on behalf of East Bay Regional Park District (EBRPD), has submitted an application for a Planned District Amendment to P-81-12(Q) for development of a former rock quarry into a 91-acre regional park facility including formal picnic areas with BBQ's, children playground and play areas, trails, park furniture, parking lots, restroom facilities, and, irrigated and non-irrigated turf meadows. The project also includes overnight camping facilities with 63 recreational vehicle (RV) sites, 17 walk-in camp sites and 20 car-camp sites. A small store, laundry and shower facilities are also proposed to serve the campsites. The project also includes construction of 13,000 sf event center and 150 person outdoor amphitheater with outdoor camp fire pit, and a one-half acre corporation and maintenance yard.	NOD	
2012072021	Seven Bridges Scour Repair Project Caltrans #3 --Colusa, Butte, Glenn The CA Dept. of Fish and Wildlife is executing Lake or Streambed Alteration Agreement number 1600-2013-0191-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, California Department of Transportation (Caltrans). To protect footings exposed by scour, the scour repair would be completed using smaller rock slope protection (RSP) in a "self-launching" installation. On the stream-side of piers 2 and 3, the installation would have a slope of 1.5:1, and on the upland-side of piers 2 and 3 the installation would match the original ground.	NOD	
2012112016	Mixed-Use Senior Residential Project Foster City Foster City--San Mateo Develop the vacant City-owned property with a mixed-use development consisting of senior citizen housing, retail/office space, and public space. The key project components would include up to 414 senior residential units and up to 70,000 sf of retail/office space within 20 buildings that would range in height from 3 to 6 stories; public open space, and amenities. The residential component would include 196 for-sale residential units, 152 assisted and independent living units, and 66 affordable housing units. The commercial component would consist of up to 40,000 sf of ground floor commercial retail space and up to a total of 30,000 sf of commercial space on the upper floors. The project also includes about 1.25 acres of public open space including a pedestrian promenade and a town square.	NOD

2012121075	Mission Bay High School Athletic Facility Upgrade and Modernization Project San Diego Unified School District San Diego--San Diego The project includes the construction and operation of upgraded athletic facilities on the Mission Bay High School campus in the City of San Diego. These improvements were identified in Propositions S and Z along with numerous other technological, safety, and modernization repairs and renovation for the high school. The District is also proposing modernization improvements for an aging facility to provide a safe and contemporary learning environment.	NOD	
2012122042	The 2013 Fisheries Restoration Grant Program Fish & Game #2 Goleta--Mendocino Remove a defective fish ladder that leads to the existing box culvert, and construct a series of steps and pools that provide fish passage up to the box culvert on Pismo Creek, and native plant restoration. The project will restore reliable access to 7.3 miles of critical steelhead habitat upstream of the barrier and improve habitat immediately downstream of the barrier.	NOD	
2013011003	Kearny High School Athletic Facilities Upgrades Proejct San Diego Unified School District --San Diego The proposed project is the construction of upgraded athletic facilities in a new configuration on the Kearny High School campus. The purpose for the new configuration of the facility is to allow for the construction of an athletic facility that meets all California Interscholastic Federation (CIF)/District standards and additional amenities which cannot currently be accommodated within the existing configuration. The physical layout of the upgraded athletic facilities would be realigned and would include new synthetic turf, ADA upgrades, new athletic and visitor amenities, stadium lighting, a public announcement (PA) system, and additional bleacher seating.	NOD	
2013032070	Housing Element - 2007-2014 Novato, City of Novato--Marin The Housing Element contains goals, policies, and implementing programs supporting the provision of a range of housing opportunities in Novato, in particular housing for persons in the low and very low income categories.	NOD	
2013081003	301 East Jeanette Lane Project Santa Ana, City of Santa Ana--Orange The project proposes a 182-unit multi-family apartment project on the 2.008-acre site. The project would include a single structure that would consist of four levels of apartment units above two levels of parking (one level of parking at grade, and another below grade). As such, the proposed building would include five levels above grade and would reach a maximum height of approximately 60 feet. While the proposed project would consist of a single building, apartment units would be arranged around three large landscaped open air courtyards (one on each end and one in the center of the structure). The apartment units would include a mixture of one-, two-, and three-bedroom configurations.	NOD

2013112067	Mindego Ranch Use and Management Plan Midpeninsula Regional Open Space District Woodside--San Mateo The proposed Use and Management Plan would direct future land management, operations, and public access actions and activities at Mindego Ranch. The goal of the U&M Plan is to protect and enhance habitat for sensitive wildlife species, while responsibly integrating land management activities and limited public access at Mindego Ranch. Specific project components include habitat enhancement actions (including eradicating non-native fish and bullfrogs, increasing capacity of smaller ponds, and installing livestock exclusion fencing); establishing conservation grazing (which includes installation of feeding/water facilities and implementation of water quality protection measures); providing minimal public access (including opening a new trail sections); and maintenance/operations projects (including erosion treatment and structure removal). 2013112069	<p>Medford Island Levee Rehabilitation Project Reclamation District 2041 Stockton--San Joaquin Reclamation District No. 2041 plans to rehabilitate Medford Island's entire levee system, approximately 5.9 mi in length, to achieve a sustainable Hazard Mitigation Plan cross-section standard, which requires levee crown elevations at one foot above the 100-year flood elevation. The proposed Project includes landside and waterside work. Landside work involves raising the levee crown and stabilizing the slope by placing fill material on the levee toe, slope, and crown. There will be a new all-weather road built along the levee crown. Waterside work involves repairing waterside bank protection (rock revetment) for erosion control along most of the levee, typically above Mean High Water.</p>	MND	12/26/2013
2013071072	<p>Proposed Rule 4001 - Backstop to Ensure AQMP Emission Reduction Targets Are Met At Commercial Marine Ports South Coast Air Quality Management District Diamond Bar--Los Angeles SCAQMD staff is proposing to adopt Rule 4001 - Maintenance of AQMP Emission Reduction Targets At Commercial Marine Ports, to establish actions to be taken in the event that emission reductions from port-related sources do not meet or are not on track to maintain the emission targets assumed in the Final 2012 Air Quality Management Plan for the purpose of meeting and maintaining the federal 24-hour PM2.5 standard. Proposed Rule 4001 would apply to the Port of Los Angeles and the Port of Long Beach. The Recirculated NOP/IS identifies the topics of aesthetics, air quality and greenhouse gas, biological resources, cultural resources, energy, hazards and hazardous materials impacts, hydrology and water quality, land use and planning, noise, public services, solid and hazardous waste, and, transportation and traffic as areas that may be adversely affected by the proposed project. Impacts to these environmental areas will be further analyzed in the DPEA.</p>	NOP	12/26/2013
2013081021	<p>Solid Waste Facility Permit Revision for Coachella Valley Compost Riverside County Coachella--Riverside The project consists of an amendment to a lease agreement between the County of Riverside and Burrtec, and revisions to the site's Solid Waste Facilities Permit (SWFB) and Report of Facility Information (RFI) to expand an existing compost facility from ~35 to 40 acres, increase the amount of material received from 250 tpd to 985 tpd, which includes up to 200 tpd of C&D waste; increase the amount of grease trap liquids and gray water accepted from 12,500 gpd to 55,000 gpd, compost up to 450 tpd, expand days of operation from 6 to 7, and expand the compost area from 15 to 31.9 acres.</p>	NOP	12/26/2013

	intersection and the approaches to provide 6- to 8-foot wide sidewalks and 11-foot wide traffic lanes. It would also widen Hacienda Boulevard up to 90 feet curb-to-curb on the north and south approaches and Gale Avenue up to 81 feet curb-to-curb on the west and east approaches.		
2013112068	Folsom Life Time Fitness Folsom, City of Folsom--Sacramento The proposed project would be located at 110 Serpa Way in the southeastern section of the City of Folsom, on the northern side of Highway 50. The project site is within the southeastern portion of the Broadstone Unit No. 3 Specific Plan area, downslope from the Empire Ranch development project to the east, and upslope from the adjacent Costco and Green Acres Nursery to the west. The proposed project would consist of a two-story, approximately 116,363 sf fitness center building with outdoor facilities, and associated parking and improvements. Outdoor facilities would be comprised of an outdoor pool and whirlpool, bistro, eight tennis courts, and child activity area. Approximately 230 part-time and 75 full-time employees are anticipated to be hired to staff the project facilities. Hours of operation for the proposed indoor facility would be 24 hours per day, seven days per week. The proposed outdoor facilities would operate seven days a week as well, but the hours of operation would vary depending on the specific use.	NOP	12/26/2013
2013111081	Interstate 215/Barton Road Interchange Improvement Project Caltrans #8 Grand Terrace--San Bernardino The proposed Project is located in the City of Grand Terrace, and partially in the City of Colton in San Bernardino County, CA. The purpose of the proposed project is to improve the operation, increase the capacity, and reduce the existing and future congestion at the I215/Barton Road Interchange, and improve access to facilities served by the interchange. The proposed Project would replace the existing Barton Road overcrossing, reconstruct and widen Barton Road, realign the existing on- and off-ramps to enhance turning maneuverability and storage capacity, improve local roadways, and modify traffic signals. Four alternatives are being analyzed in this document: the No Build Alternative (Alternative 1) and three Build Alternatives (Alternatives 3, 6, and Modified Alternative 7).	Neg	12/26/2013
2010121070	Plant F41A Replacement Project Public Health, Department of Fontana--San Bernardino The CA Dept. of Public Health as the lead agency will be issuing a water supply permit. The Fontana Water Company (FWC) proposes to install a new well, Well F-54, to replace Well F41A. The project will also involve installation of about 3,000 feet of associated underground pipeline to connect Well F54A to the existing graded dirt road alignments and disturbed mining areas, avoiding disturbance of the Lytle Creek floodplain and reducing the overall length of the new pipeline from Well F54A to the FWC water distribution system. This is the second addendum prepared for this project and combined with the original initial study and final mitigated negative declaration package and first addendum, this document serves as the basis for this third tier environmental review of FWC's decision to replace inoperable Well F41A and connect it to the FWC distribution system. This addendum modifies the MND, adopted by the Department on December 22, 2010 and addendum No. 1 approved on February 1, 2012, as the CEQA environmental determination for the proposed implementation of the Well F54A	NOD

2013118222	U.S. Army Corps of Engineers Reauthorization of RGP 63 for Emergency Situations State Water Resources Control Board -- Provide an expedited response to public agencies and private parties conducting work in waters of the U.S. for emergency repair and protection measures necessary due to sudden, unexpected events that could potentially result in an unacceptable hazard to life or a significant loss of property.	NOE	
2013118223	Inyo National Forest, Bishop Creek Area Restoration Parks and Recreation, Department of --Inyo The project will implement active restoration activities on 49 unauthorized (and currently closed) routes within the Bishop Creek Project Area. These routes are causing or have potential to cause continuing resource impacts unless physically restored. Physical treatments include: vertical mulch (native vegetation and rock); native ground mulch; seeding and planting native vegetation; waterbars or other drainage features; decompaction; removing berms from the sides of the routes; removing fills and culverts at intermittent stream channels; and recontouring the road surface (naturalize grade by reducing fill and cut slopes).	NOE	
2013118224	Day Use Bioswale Parks and Recreation, Department of --San Benito The purpose of the Day Use Bioswale project is to construct a bioswale to collect, briefly detain, and filter runoff from the Day Use parking area at Hollister Hills SVRA. The Day Use parking area is a semi-permeable parking surface used by visitors as a staging area for their off-highway vehicles. Due to possible runoffs from the Day Use parking area, a bioswale would be a preferred feature to manage storm water runoff and to contain potential water contaminants. Currently the proposed project area drains to a vegetated area located between the Intermediate Kids Track and the Beginners Track. The swale drains an area of roughly one acre, making it an ideal setting for a bio-swale application. The bioswale will be treated as an interpretive opportunity and will feature native flora and panels explaining the purpose of the bioswale.	NOE	
2013118225	Inyo National Forest Designated Wilderness, Mono Craters, and Black Canyon Restoration Parks and Recreation, Department of --Inyo, Mono The wilderness and Mono Craters restoration involves active restoration of 82 unauthorized reoutes that are or may be causing continuing resource impacts unless physically restored. Physical treatments include: vertical mulch (native vegetation and rock); native ground mulch; seeding and planting native vegetation; waterbars or other drainage features; decompaction; removing berms from the sides of the routes; and recontouring the road surface (naturalize grade by reducing fill and cut slopes). The black canyon component restores approximately 0.72 miles of trail, a perennial stream crossing, and an associated wet meadow/riparian area.	NOE

2009021059	Southern California Edison Company, Presidential Substation EIR Public Utilities Commission Thousand Oaks, Simi Valley--Ventura FYI Final	FIN	
	The new subtransmission line would occur within ~3.5 miles of existing ROW; A new 66/16 kV distribution substation on an ~ four acre site; Removal of ~79 distribution poles and 5 subtransmission poles located within existing ROW, and replacement with ~83 subtransmission poles to accommodate a new 66 kV subtransmission line that would feed the proposed substation from two existing 66 kV subtransmission lines; Four new underground 16 kV distribution getaways; and facilities to connect the substation to SCE's existing telecommunications system.		
2013112070	Oro Loma Wet Weather Equalization and Ecotone Demonstration Project Oro Loma Sanitary District --Alameda	MND	12/26/2013
	The proposed project includes a multi-purpose wet-weather equalization facility that will include both a treatment wetland and an upland ecotone slope for polishing of treated wastewater. The facility will accommodate infrequent peak wet-weather flows, and provide an opportunity to pilot several adaptation strategies related to sea level rise, water quality protection, and infrastructure sustainability. The project site consists of a fifteen-acre parcel located at 2536 Grant Avenue in the community of San Lorenzo, unincorporated Alameda County, CA, sited adjacent to and east of the existing OLSD wastewater treatment plant.		
2013112071	Alder Drive at EID Canal - Bridge Replacement (No. 25C0069) El Dorado County --El Dorado	MND	12/26/2013
	The purpose of the Project is to replace the functionally obsolete Alder Drive Bridge over the EID Canal with a culvert that meets current design standards. The Project involves replacing the existing 32-foot-long, 18-foot-wide, 2-lane reinforced concrete slab bridge with a double-barrel culvert (two 36-inch or equivalent size circular culverts) that meets current design standards. The proposed culvert would tie in with the existing 30-foot-wide roadway providing two 12-foot traffic lanes and 3-foot shoulders on each side of the roadway. The proposed culvert would be located at the existing bridge location. All widening would occur along the eastern side of the existing roadway.		
2013112072	Grading Permit for the Lower Cosumnes River Floodplain Restoration Project (Oneto-Denier) Sacramento County Galt--Sacramento	MND	12/26/2013
	The project consists of the request for a grading permit to restore the floodplain and riparian habitat adjacent to the Cosumnes River. The project will result in several levees to be breached in strategic locations to enhance flooding of 834 acres of land adjacent to the lower Cosumnes River. Approximately 500 acres within the Natural Resources Conservation Service's easement area would be restored to riparian habitat.
