# STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **October 16-31, 2008**.

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov/clearinghouse/clearinghouse.shtml](http://www.opr.ca.gov/clearinghouse/clearinghouse.shtml)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Senior Planner

## CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE  
P.O. BOX 3044  
SACRAMENTO, CA 95812-3044

## INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

## MEMORANDUM

DATE: February 13, 2007  
TO: State Agency CEQA and Intergovernmental Review Coordinators  
FROM: Scott Morgan, Senior Planner  
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner  
916-445-0613  
[scott.morgan@opr.ca.gov](mailto:scott.morgan@opr.ca.gov) .

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE  
1999 through 2007**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

<b><u>Documents Received on Thursday, October 16, 2008</u></b>			
2007071020	680 East Colorado Boulevard Commercial Project Pasadena, City of --Los Angeles The proposed project involves the demolition of existing improvements, excavation for a five-level subterranean garage, and the subsequent construction of a 160,000 square foot five-story commercial office building with 522 subterranean spaces. The building would have ground floor retail/commercial and restaurant uses, and four stories of office space above. Delivery parking is situated at the southern edge of the building with vehicular access from El Molino exclusively. Alternatively, access may be routed to El Molino and Green Street. Under the restaurant, retail/office scenario, the project would include 111 excess parking spaces that would serve the existing playhouse located across El Molino to the west.	EIR	12/01/2008
2007101081	Rancho Santa Fe Roundabouts Project San Diego County --San Diego Construction of traffic roundabouts at the following three intersections along Paseo Delicias in unincorporated community of Rancho Santa Fe in northwest San Diego Co.: Paseo Delicias/El Camino del Norte/De Dios Highway (El Camino del Norte), Paseo Delicias/El Montevideo/La Valle Plateada (El Montevideo/La Valle Plateada), and Paseo Delicias/Via de la Valle/La Fremontia (Via de la Valle/La Fremontia).	EIR	12/08/2008
2007102143	Adoption of Statewide Regulations Allowing the Use of PEX Tubing California Building Standards Commission -- The California Building Standards Commission (BSC) proposes to adopt new state plumbing code regulations that would remove the prohibition against the use of cross-linked polyethylene (PEX) tubing, a type of plastic pipe, for potable water uses from the California Plumbing Code. The tubing would be authorized for use in various cold and hot water (including potable water) plumbing applications in residential, commercial, and institutional buildings.	EIR	11/14/2008
2008041019	Silverlakes Equestrian and Sports Park Norco, City of Norco--Riverside The Applicant proposes to develop a 122-acre equestrian center and sports facility that would be used for a variety of recreational uses, such as equestrian events, soccer, football, lacrosse, etc. The project may include the following: equestrian trails, campground, recreational vehicle area with water and electrical hook ups, storage and maintenance facilities, temporary and permanent lighting, temporary and permanent horse stalls and onsite parking. The project as proposed also includes a multi-media sign that would be situated along the I-15 freeway. The project may include the restoration and rehabilitation of an existing structure that would be used for a recreation hall. The project also includes potential connections to the Coast-to-Crest Trail along the southerly border of the project site.	EIR	12/01/2008

	(20) employees and will also be leasing office space for a total of approximately thirty-one (31) employees on-site. Water will be supplied by the existing Gateway Water Treatment Plant and waste water will be handled by the existing Gateway Water Treatment Plant with on-site drainage to flow into the proposed retention basin.		
2008102054	Highway 1 Soquel to Morrissey Auxiliary Lanes Project Caltrans #6 Santa Cruz--Santa Cruz The build alternative would construct auxiliary lanes (merging lanes) on Highway 1 in Santa Cruz County for a distance of 0.98 mile. Specifically, adding one auxiliary lane from the Soquel Ave. on-ramp to the Morrissey Blvd. off-ramp in the northbound direction and extending an outside lane between La Fonda Ave. and the Soquel Ave. off-ramp in the southbound direction. The project also would replace and add bike lanes and wider sidewalks to the La Fonda overcrossing, and add sidewalk improvements along Rooney Street and Morrissey Blvd. between Elk Street and San Juan Avenue.	<b>MND</b>	11/14/2008
2008102055	Round Hill Pressure Zone Improvement Project East Bay Municipal Utility District Alamo--Contra Costa EBMUD needs to increase the water pumping capacity to the existing developments and development projects served by the Round Hill Pressure Zone. Based on current and project water demands, EBMUD is proposing to construct a new 1.0 mgd water pumping plant at 455 Livorna Rd. in Alamo. The project includes the installation of 1,400 linear feet of new 12-inch diameter water pipeline to tap into the existing 20-inch pipeline in Livorna Rd. and pump up to the existing 8-inch pipeline in Legacy Dr.	<b>MND</b>	11/14/2008
2008102058	P07-0027 Wilkes Tentative Parcel Map El Dorado County Placerville--El Dorado A tentative parcel map creating four (4) parcels ranging in size from 3 to 3.15 acres from a 12.16 acre site.	<b>MND</b>	11/14/2008
2008101078	Skyline Ranch Recycled Water Project Regional Water Quality Control Board, Region 9 (San Diego), San Diego --San Diego Skyline Ranch Country Club proposes upgrades to its existing wastewater treatment plant to provide recycled water to its existing on-site golf course. The California Regional Water Quality Control Board, San Diego Region intends to modify the facility's waste discharge requirements to prescribe requirements for the treatment and use of the recycled water consistent with Title 22 of the California Code of Regulations.	<b>Neg</b>	11/14/2008
2008101081	Steinbeck Minor Use Permit San Luis Obispo County Paso Robles--San Luis Obispo Request for a Minor Use Permit to allow the conversion of an existing 1,080 sf. storage building into a 1,215 sf. winery and tasting room facility, and construct a parking area, leach field, and associated outdoor use areas. No special events are proposed. The project will result in the distribution of approx. 3,850 sf. on a 156-acre parcel.	<b>Neg</b>	11/14/2008

1991093072	Marin County Development Code Update Final Supplemental EIR Marin County --Marin The Marin County Community Development Agency (CDA) is proposing text and zoning amendments to the Development Code (Title 22) and the Interim Development Code (Title 221), which will reclassify certain parcels in the unincorporated areas of Mill Valley and San Rafael.	<b>NOD</b>	
2000092027	Milpitas Midtown Specific Plan Update Milpitas, City of Milpitas--Santa Clara The proposed project consists of changes to the existing and planned roadway system within the Milpitas Midtown Area, which were described in the Specific Plan EIR as either the existing condition or as proposed mitigation for impacts created by the Specific Plan.	<b>NOD</b>	
2002111113	Tijuana River Valley Invasive Plant Control Program (SAA R5-2003-0019) California State Coastal Conservancy San Diego--San Diego DFG is intending to execute a Lake and Streambed Alteration Agreement pursuant to Sec. 1602 of the Fish and Game Code (SAA #1600-2008-0279-R5) to the project applicant, Southwest Wetlands Interpretive Assoc. The applicant proposes to alter the stream to continue the Tijuana River Valley Invasive Plant Control Program. Streambed Alteration Agreement #R5-2003-0019 was issued for this project but has since expired. The project involves the control of giant reed ( <i>Arundo donax</i> ), castor bean ( <i>Ricinus communis</i> ), and salt cedar ( <i>Tamarix ramosissima</i> ). The objective of the project is to enhance the native riparian, mulefat, and salt marsh habitats by removing these exotic species. The species are spread throughout over 3,600 acres of the Tijuana River Valley. The invasive species will be controlled through a combination of physical and chemical methods. In most cases, the plants will be cut and their stumps or resprouting rhizomes will be sprayed with an appropriate herbicide. Equipment used will include backpack sprayers and power sprayers, occasional use of a mower in suitable sites, ATVs and tractors (on trails), and trucks (on roads). Only the above ground portions of the exotic, invasive plants will be treated, and the soil will not be disturbed. The project will be implemented in phases. Native riparian habitats found on site include extensive willow woodlands, mulefat, scrub and salt marsh.	<b>NOD</b>	
2004099075	Polsley Gravel Extraction Mendocino County --Mendocino The Dept. of Fish and Game (DFG) is issuing an agreement for one encroachment: commercial gravel extraction at three gravel bars on Mill Creek and one gravel bar on Grist Creek.	<b>NOD</b>	
2006111045	Olive Vista Drive and Jefferson Road Improvements Project (WA#1C6007) San Diego County --San Diego DFG is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game code (SAA#1600-2006-0478-R5) to the project applicant, Co. of San Diego. The applicant proposes to alter the stream/lake to widen Jefferson Rd. and Olive Vista Dr. Project activities include installation of a rip-rap energy dissipater and replacement of a section of culvert under Jefferson Rd. The applicant shall mitigate the permanent impacts to 0.012	<b>NOD</b>

2007082160	<p>acre streambed and wetland at a 3:1 creation-to-impact ratio through the purchase of 0.036 acre of riparian habitat creation credits at Rancho Jamul Mitigation Bank. The operator shall mitigate the permanent impacts to 0.17 acre southern coast live oak riparian forest at a 2:1 ratio through the deduction of 0.34 acres oak credits from the Co. of San Diego Rancho San Diego Mitigation Bank.</p> <p>Bidwell-Sacramento River State Park Habitat Restoration and Outdoor Recreation Facilities Development Project Parks and Recreation, Department of Chico--Butte</p> <p>State Parks, with planning assistance from The Nature Conservancy (TNC), is proposing to implement the project on two parcels known as the Singh Unit and Nicolaus property (collectively known as the project site) along the Sacramento River within and adjacent to Bidwell-Sacramento River State Park (BSRSP or Park), west of the City of Chico in Butte Co., California. The Singh Unit is owned by State Parks and located within BSRSP. The Nicolaus property is currently owned by TNC, but would be transferred to State Parks, as part of the proposed project, prior to implementation of habitat restoration activities and recreation facilities development. After transfer of the Nicolaus property to State Parks, the current BSRSP headquarters (located in the Indian Fisheries subunit) would be relocated to the existing farm complex on the Nicolaus property, which is on higher, less frequently flooded ground than the current headquarters location. Both the Singh Unit and Nicolaus property are currently in agricultural production (walnut and/or almond orchards). There is a Williamson Act contract on the Nicolaus property. Prior to habitat restoration or recreation facilities development on the Nicolaus property, the contract will either be phased out, amended or a new contract will be executed, which allows for such uses.</p>	<b>NOD</b>	
2007111111	<p>Beach and Orangethorpe Mixed-Use Specific Plan Buena Park, City of Buena Park--Orange</p> <p>The Beach Orangethorpe Mixed-Use Specific Plan (BOMUSP) involves the creation of an urban mixed-use development and is anticipated to be built out in two phases. The max. development that would be allowed by the proposed BOMUSP is: 1,000 multi-family residential units in multiple high-rise structures; 355,000sf. of retail development; a 300-room/277,000sf. hotel and subterranean and above-ground parking. The BOMUSP would allow one of the residential buildings to be alternatively developed with office uses, which would replace 177 multi-family units with approx. 195,000sf. of office space. If office space is developed in lieu of residential units, the max. number of residential units would be reduced to 823 units. The project includes the construction of on- and off-site utilities (e.g., sewer, water, storm drain, electric, gas, telephone) to serve the proposed uses. Some improvements, including transportation and utility infrastructure improvements would be required within Caltrans jurisdiction (i.e. Beach Blvd., SR91, I-5).</p> <p>The BOMUSP does not provide a specific project design for the site; rather, it identifies a number of land use concepts that demonstrate how development allowed under the BOMUSP could be implemented on the site. The ultimate building layout and site planning would occur during subsequent development approvals, including the tentative tract map and precise planning process.</p> <p>The proposed project requires: (1) a General Plan Amendment to change the land use designation for the entire site to BOMUSP; (2) a zone change to change the zoning for the entire site to BOMUSP; (3) an amendment to the ECSP to remove</p>	<b>NOD</b>

2008108180	SJCOE Colonial Heights SDC Portable Addition San Joaquin County Office of Education Stockton--San Joaquin Two modular units (joined as one unit on the ground). 2,400 sf with 2 classrooms, restrooms and service room for special education classes. 18 student capacity. Onsite extension of all required utilities.	<b>NOE</b>	
2008108181	2008 Main St. Lift Station Improvements Mendocino, City of --Mendocino The project is for Mendocino City Community Services District to repair an existing access road and to install a telephone line in the existing easement to the Main Street Lift Station located 190 feet south of the intersection of Lansing St. and Main St. on State Park land. The road was installed in 1974. The existing road was for routine maintenance of the pump station and to provide access for emergency vehicles, if needed at the site. The lift station telephone line will be used for an emergency dialer to alert District personnel of a power outage or equipment failure. Both the telephone line and the road improvements are required to help prevent Sanitary Sewer Overflows and for safety. The project consists of digging a 190-ft long x 2-ft deep trench for a 2-inch conduit for the telephone line. Repairs to the road include removal of vegetation from the easement, re-rocking of the existing 12 foot access road, 95% compaction of fill and road aggregate, installing 4-foot wide x 2-foot deep ditches on both sides of the road, and paving the road from the County road (Main Street) to the State Park property line.	<b>NOE</b>	
2008108182	2008 Heeser Dr. Lift Station Improvements Mendocino, City of --Mendocino The project is for Mendocino City Community Services District to construct a 19 ft x 11 ft building over an existing pump station, repair an existing access road to the Heeser Drive Lift Station, and to install a telephone line to the new building. The project is located on Heeser Dr. in Mendocino on State Park land (APN 119-170-10). The building is needed to house an emergency generator that will be installed by 2010. The purpose for the existing road is for routine maintenance of the pump station and to provide access for emergency vehicles, if needed at the site. The lift station telephone line will be used for an emergency dialer to alert District personnel of a power outage or equipment failure. The improvements are required to help prevent Sanitary Sewer Overflows and for safety.	<b>NOE</b>	
2008108183	NextG-Metro PCS Carbon Canyon Distributed Antennae System (DAS) Project Public Utilities Commission Chino Hills--San Bernardino Installation of micro antenna, new poles, aerial and underground fiber, and other associated DAS equipment in the City of Chino Hills.	<b>NOE</b>	
2008108184	NextG-AT&T San Diego/Poway Distributed Antennae System (DAS) Project Public Utilities Commission Poway, San Diego--San Diego Installation of micro antenna, new poles, aerial and underground fiber, and other associated DAS equipment in the cities of Poway/San Diego.	<b>NOE</b>

2008108185	Verizon Noe Valley/San Francisco Distributed Antennae System (DAS) Project Public Utilities Commission San Francisco--San Francisco Installation of micro-antenna, new poles, fiber optic cable, and other associated DAS equipment in Noe Valley, San Francisco.	<b>NOE</b>	
2008108186	NextG/Metro PCS Los Angeles Distributed Antenna System (DAS) Project Public Utilities Commission Los Angeles, City of--Los Angeles Installation of DAS micro antenna, poles, fiber optic cable, and other associated DAS equipment in Los Angeles, CA	<b>NOE</b>	
2008108187	Waterman Creek Dam Removal Project Fish & Game #3 --San Mateo The San Mateo County Farm Bureau in cooperation with the property landowner, AMerican Rivers and Regulatory Agencies including National Oceanic and Atmospheric Administration's National Marine Fisheries Service (NMFS) and the Regional Water Quality Control Board (RWQCB) is proposing to remove an existing redwood log dam from Waterman Creek. The 12-foot high log dam is a barrier for fish passage. The dam will be removed in a phased approach in wich the top two of three tiers of logs will be removed int he first year and the channel conditions will be monitored by the RWQCB gor the first season (Phase 1). Phase 2, if deemed appropriate by the Agencies, will include the removal fromt eh log dam in Waterman Creek. Issuance of a Streambed Alteration Agreement Nmbner 1600-2008-0391	<b>NOE</b>	
2008108188	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0105 Fish & Game #1 Ukiah--Mendocino The project proposes to rehabilitate approximately 300 feet of eroding stream channel by upgrading undersized culverts to larger culverts or bridges, and by treating sections of the bank and channel with rock slope protection, brush mattresses, vegetative walls and biodegradable erosion control blankets all within an Unnamed Tributary to Orr Creek, thence the Russian River, thence the Pacific Ocean, Mendocino County.	<b>NOE</b>	
2008108189	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0398 Fish & Game #1 Fortuna--Humboldt Place approximately 25 linear feet of rock slope protection (RSP), modify a large woody debris (LWD) jam, and plant at least 25 willow cuttings.	<b>NOE</b>	
2008108190	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0349 Fish & Game #1 --Humboldt Replace, modify, or decommission 72 existing stream crossings, ditch relief culverts, and seep drains on ranch roads.	<b>NOE</b>	
2008108191	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0217 Fish & Game #1 --Humboldt Install new culverts on existing poorly constructed road/stream crossings at eight sites. Several Humboldt crossings will be removed and failed crosings will be improved with new culverts. Activities will prevent additional sediment from being delivered to Dobbyn Creek.	<b>NOE</b>

	and Deer Creek will receive maintenance. Removal of excess fuel will provide homeowners with small lots adjacent to community greenbelt areas to achieve 100 feet of defensible space. Project work will exclude watercourses and riparian plant communities. The project will encompass approximately 50 acres of small association parcels within the development.		
2008108200	Whittier Department of Motor Vehicles - Employee Break Room Expansion Motor Vehicles, Department of Whittier--Los Angeles This project converts an existing exterior patio (256 +/- sq. ft.) To an interior break room addition. Additionally, repairs to the interior walls of a roof access shaft will be made. The project included the demolition and removal of exiting concrete patio flatwork, removal of a parapet wall at the roof. A new floor slab, roof, insulation, interior wall, and ceiling finishes, and other interior finishes will be made to the break room. The project will also provide untextured and unpainted moisture resistant moisture resistant gypsum board to finish the roof access shaft walls, located in the storage/work room.	<b>NOE</b>	
2008108201	Leasing of Office Space Transportation Commission Sacramento--Sacramento The Department of Transportation proposes to renew a lease for 123,736 square feet of office space in order to house staff.	<b>NOE</b>	
2008108202	Leasing of Office Space Transportation Commission Sacramento--Sacramento The Department of Transportation proposes to renew a lease for 248,323 square feet of office space in order to house staff.	<b>NOE</b>	
2008108203	Vault Toilet Installation Parks and Recreation, Department of --Santa Clara Install an American with Disabilities Act (ADA) compliant pre-manufactured vault toilet in the Day Use parking lot at Pacheco State Park to fulfill the Department's Consent Decree for Accessibility. Work will dig 5'D X 12'L X 14'W hole under the vault toilet location, pour a 20' X 20' cement slab to provide ADA compliant access, and install the vault toilet using a crane. All equipment will be cleaned prior to entry of the park to avoid the establishment of non-native invasive weeds and all dirt removed will stay on site.	<b>NOE</b>	
2008108204	Parking Lot Expansion, Salinas Valley State Prison, Soledad, California Corrections and Rehabilitation, Department of --Monterey The project consists of the construction of paved parking lot adjacent to the existing east staff parking lot at Salinas Valley State Prison (SVSP). As a result of gradual increases in the number of staff at SVSP, the existing parking facilities are proving to be inadequate, leaving staff to park in unauthorized and unofficial parking locations within the SVSP property. On several occasions each month, SVSP's parking lots are completely filled due to in-service training, staff orientation, and range training. Due to the shortage of available parking spaces, employees are parking in fire lanes, grass strips, and thorough-fares. This creates a risk of blocking emergency vehicles and an increased potential for vehicular accidents. The parking lot will measure approximately 200' by 150', and will contain 60	<b>NOE</b>

<b><u>Documents Received on Thursday, October 16, 2008</u></b>			
2008108205	<p>parking spaces. It will be located in a previously graded area on the northern end of SVSP, between an adjacent parking lot and two roads. Construction activities will include grading and compacting the existing ground surface, importing and compacting aggregate base rock, spreading and compacting hot asphalt concrete over the approximately 30,000 square-foot area, installing drain pipes, and installing a single pole-mounted light fixture in the center of the new lot.</p> <p>Parking Lot Expansion, California Medical Facility, Vacaville, California Corrections and Rehabilitation, Department of Vacaville--Solano</p> <p>The project consists of the construction of a paved parking lot adjacent to the existing parking lot located to the northwest of the California Medical Facility (CMF). The area where the parking lot would be constructed is located within CMF property and is covered with gravel and is presently being used as an overflow parking lot.</p> <p>As a result of gradual increases in the number of staff at CMF, the existing parking facilities are proving to be inadequate, leaving staff to park in unauthorized and unofficial parking locations within the CMF property. This can have the effect of inhibiting traffic circulation, which in turn can be a safety concern in terms of limiting traffic access and flow for emergency vehicles such as ambulances and fire trucks. The gravel lot that is presently being used has helped ameliorate this situation, but drainage problems and the fact that the gravel cannot be reliably and permanently marked with designated spaces contribute to an unpredictable parking situation from day to day and an associated increase in traffic circulation around existing parking lots and adjacent areas.</p> <p>The new lot will provide approximately 130 permanent parking spaces, and will mirror the width and configuration of adjacent existing paved lot, to effectively function as an extension of that lot. Construction activities will include removing the gravel from the existing overflow lot, and subsequently grading and paving the area to match the existing paved lot.</p>	<b>NOE</b>	
2008108206	<p>Re-Closure of Fan Hill Mine Parks and Recreation, Department of --Riverside</p> <p>Re-seal the opening to the Fan Hill Mine shaft for public safety purposes at Fan Hill at Indio Hills Palms. The abandoned mine is a vertical shaft approximately 8' by 8' and 50' deep. The mine shaft was previously closed in 2006 with reinforced steel plates under NOE with SCH# 2006048144, but the steel plates were removed by unknown vandals. The current project will seal the shaft by installing an expanded polyurethane foam plug into the upper part of the shaft, which will be covered by 2 feet of soil and made level to grade. A camera will be lowered into the mine shaft prior to closure to ensure no wildlife is in the shaft.</p>	<b>NOE</b>	
2008108207	<p>Nipomo - Santa Maria Water Intertie Pipeline Geotechnical Field Exploration Fish &amp; Game #4 --San Luis Obispo</p> <p>A drill rig would be towed to the river channel by a tracked dozer. Several holes would be drilled in the river bed to depths of 40 to 125 feet below the surface. The shallower holes would be drilled using an 8-inch hollow stem auger, while the deeper holes would be bored using mud rotary drills. A cone penetrometer would be used to obtain soil samples at various depths from each hole. Access to and egress from the site would be along one path, and no grading or road construction would occur. Fluid from the mud rotary drilling would be contained within a tank and re-circulated through the boring during drilling, then contained and properly</p>	<b>NOE</b>

	disposed of upon completion of the Project. All work would be done when the site is dry and devoid of water.		
2008108208	Jason Hocheder Sonoma County --Sonoma Request for a Zoning Permit for restoration of the Riverbank on the Russian River at this property.	<b>NOE</b>	
2008108209	Agreement No. R4-2008-0182-Coastal Conservancy-Geotechnical Investigations for San Clemente Dam Removal and Carmel River Re-Route Fish & Game #4 --Monterey Geotechnical exploration of the alluvial sediments located in the Carmel River arm of the San Clemente Reservoir and the granitic rock ridge separating San Clemente Creek and the Carmel River. The explorations will include five borings and two test pits within the alluvial sediments, as well as two rock core borings in the granitic rock ridge. Water will be extracted from the Carmel River and the San Clemente Reservoir for the geotechnical borings. Access to the Project site for drilling equipment will require the use of a rubber tired backhoe to access and excavate two test pits within the alluvial sediments. Track mounted drilling equipment will be required for the rotary wash borings in the channel bottom that will be drilled to obtain geological information. A helicopter transported drill rig will be used to complete the two rock core borings on the granitic rock ridge area. Following exploration, sites will be restored and revegetated.	<b>NOE</b>	
2008108210	Rutkowski Stream Widening Fish & Game #3 Healdsburg--Sonoma This project proposes to clear vegetation in the channel along 150 feet of an unnamed stream to maintain water flow. Currently, the channel contains thick vegetation of bulrush, cattails, and teasel. The project will also remove approximately a 25-foot long by 3-foot wide by 2-foot deep of sediment that has accumulated along the west side of the bank causing the east bank to erode. Issuance of a Streambed Alteration Agreement Number 1600-2008-0367-3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>	
2008108211	Bridge Over Nicasio Creek Fish & Game #3 --Marin This project will install a new pre-cast bridge across Nicasio Creek in Nicasio and remove the old rusted and rotted out existing bridge. Four four-inch Helix Piers will be installed on both sides of Nicasio Creek. The west side piers will be installed in the bank outside the 100 year flow and the east side piers will be installed outside of the bank. The pre-cast concrete bridge sections will be brought in by cranes and set in place on top of the Helix Piers. The bridge will be bolted to the Helix Pier head and a small concrete footing will be poured to connect the piers together. A concrete curb will be poured on top of the bridge to prevent direct run off into the creek. Railings will be installed along the bridge. Once the new bridge has been completed the old bridge will be removed using cranes. The old bridge will be removed to a location at least 100 feet from top of bank where it will be dismantled and loaded into a dump truck. Issuance of a Streambed Alteration Agreement 1600-2008-0353-3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>

2007081088	<p>Conditional Use Permit No. 06-34 San Bernardino, City of San Bernardino--San Bernardino BLBT Enterprises is proposing the development of a six-story, 82,951 square foot garage for a total building height of eight stories or approximately 160 feet. The proposed full-service hotel would include 133 guest rooms, a dining/lounge area, a meeting room, and a 63,574 square foot garage (two stories on ground level). The site is approximately 1.62 acres and is within the Commercial General (CG-1) land use district within the Freeway Corridor Overlay District. Access to the site will be from E Street at an existing entry point, and from a new entry point on Orange Show Road. The new Orange Show Road entry will be right turn in/out and left turn in only. Left turns out will be prohibited by a raised median. The project will be constructed in one phase.</p>	<b>FIN</b>	
2008101085	<p>Evans Minor Use Permit San Luis Obispo County --San Luis Obispo Request by Gary and Jane Evenas for Minor Use Permit / Coastal Development Permit to allow a new 2800 sf single family residence and conversion of the existing single family residence to a farm support quarter. The project will result in the disturbance of approximately 27,000 sf on a 33.13 acre parcel.</p>	<b>MND</b>	11/17/2008
2008101086	<p>Carousel Ranch; RCUPT 200600080 Project No. R2006-01208 Los Angeles County --Los Angeles The proposed project is a request for the establishment of an Equestrian Facility/Riding Academy on a 10.25 gross acre parcel of land. The site will be utilized for riding academy and equestrian related activities to provide developmental therapeutic programs for children with special needs, with occasional community events requiring the application and approval of Temporary Use Permits from the Department of Regional Planning. The site currently consists of several horse corrals, horse stalls, a tack room, storage shed and barns, a ranch house and garage, portable office trailers and a travel trailer used by a caretaker, several small horse arenas, and several movie set buildings but no filming is proposed. The applicant is proposing to cover the largest existing corral area on site (150' x 210'), creating a large horse arena for use during rainy weather conditions, and the arena will be open on all sides with lighting. All temporary seating for this arena shall remain outside of its footprint, no internal seating. The applicant is also proposing another small horse arena, and a parking area to accommodate up to 73 parking spaces, including 4 handicap spaces. The handicap spaces shall be paved with asphalt, while the other parking spaces and aisles shall be placed on decomposed granite. Portable toilettes shall be utilized within the floodplain zone. Access to the site shall be through Rocking Horse Road (i.e. a private road), with connection to Sierra Highway via Old Mint Canyon Road (i.e. also a private road). Grading/import of solid fill (decomposed granite) is proposed for parking lot and fire lane. A conditional use permit (CUP) is required to establish a riding academy on the site which is zoned A-1-20,000 (Light Agricultural - 20,000 square foot minimum lot size required). There are currently 12 employees for this operation, with anticipation for the number to increase to 30 to serve 00 children, at set increments at different times (i.e. never more than 100 on site at any time); and also with the anticipation for the number of horses on the property to increase from 20 to 30 maximum. Site is within the Aqua Dulce Community Standards District (CSD).</p>	<b>MND</b>	11/17/2008

<b><u>Documents Received on Friday, October 17, 2008</u></b>			
2008101087	Safe Drinking Water Project Armona Community Services District --Kings The project proposes to construct and operate a replacement well for the existing Well No. 2, including plans for possible treatment if arsenic levels are above the Environmental Protection Agency's standard of 10 parts per billion.	<b>MND</b>	11/17/2008
2008101090	Data Center-EA 786 - 444 N. Nash Street El Segundo, City of El Segundo--Los Angeles The project applicant proposes to expand the existing structure by 33,899 sf. the building is proposed to be renovated and expanded from 82,857 sf to 116,756 sf and 24 feet 8 inches in height. The proposed building addition would consist of a masonry/concrete building. Modifications to the existing building would include new door/frame and openings. Construction of a new customer dedicated 20 MVA 66/12 kilovolt (kV) electrical substation intended to service the project site and its tenants, together with the construction and/or removal and replacement of off-site transmission poles and services.	<b>MND</b>	11/17/2008
2008101092	Fontana Kaiser Medical Center Hospital Replacement Project Fontana, City of Fontana--San Bernardino The 47-acre Fontana Kaiser Medical Center Hospital Replacement Project would consist of renovations to and demolition/reconstruction of several facilities on the medical center campus including the existing hospital, medical offices, and administrative services. The project would also include renovations to and/or relocation of several infrastructure and service systems including energy, electrical, water, wastewater, access/parking and landscaping. For example, to support the renovation of the hospital, a new electrical substation would be constructed and electrical supply from San Bernadino Avenue would be extended to the hospital via Kempster Street. A total of five phases of construction are planned over an approximate six-year time frame.	<b>MND</b>	11/17/2008
2008101093	Murrieta Higher Education Facility Development Plan (DPO-007-2560 and CUP-007-2561) Murrieta, City of Murrieta--Riverside The project is proposing to construct a mixed use development project with a focus on educational facilities, professional offices and supporting uses. The proposed project is identified as the Murrieta Education Center, and if approved by the City of Murrieta, it would be developed in the southwestern portion of the City; northwest of the intersection of Monroe Avenue and Fig Street. The proposed facilities include: a retail center; two education buildings designated for classroom and research office space; a central building; and parking areas to support all of the proposed uses. In addition to these onsite facilities, the project is required to make the following off-site improvements: (1) construct one-half width roadway improvements along Monroe Avenue from its intersection with Guava Street southeast to the southeastern property boundary at the extension of Fig Street; (2) construct full width improvements on Guava Street from the current improved roadway to the intersection of Monroe (about 1/4 mile); (3) construct full width improvements on Jordan Lake from the current improved roadway to the intersection of Jordan and Monroe (about 1/4 mile) and install all utilities in roadway within the offsite roadways.	<b>MND</b>	11/17/2008

2008108228	Well 27 Water Treatment Plant Lakewood, City of Lakewood--Los Angeles Prior to placing newly-completed well #27 into service, installation of a wellhead treatment plant is required. The treatment process selected is coagulation and filtration through three pressure filters located next to the well. It will use typical water treatment chemicals such as caustic soda (1,000 gallon day tank), ferric chloride (500 gallon day tank), and acid (1,500 gallon day tank) to insure proper plant operation. It is anticipated that about 13 truck deliveries per year will be made to supply the above chemicals. Sodium Hypochlorite will be added from existing facilities. After the chemicals are added, an inline static mixer will mix the water, and then the water will flow into the three pressure filters. Following treatment, the water will enter an existing reservoir. On demand the water will be pumped out the reservoir and into the distribution system. Once a day the three filters will be backwashed and the backwashed water will be sent to a backwash tank. In the tank solids will settle out and majority of the water will be recycled back to the head of the plant. When a certain amount of solids has accumulated over time they will be removed by vacuum truck approximately four times year and disposed of in a proper manner.	<b>NOE</b>

2008108229	<p>Water Rate, Fee and Charge Adjustments for Zones 1,2,3,4 and 5 Placer County Water Agency --Placer</p> <p>The proposed project includes minor changes to the Placer County Water Agency's Rules and Regulations Manual, adjustments to water rates, fee and charges for all water customers in the Agency's Zones 1,2,3,4 and 5.</p>	<b>NOE</b>	
2008108230	<p>Relemetry Improvements Associated with Bella Tuscany Pipeline Project Placer County Water Agency --Placer</p> <p>The telemetry improvements are a supplement to development improvements already evaluated in a Mitigated Negative Declaration (Black Oak Vineyards Subdivision SCH 2003012100). The telemetry work would include remote telemetry units at the Bella Tuscany Water Storage Tank and at the upstream pressure reducing station (PRS) on Black Oak Road. The project area will be defined by right-of-way and easements obtained by PCWA at the sites.</p> <p>The proposed project includes construction, installation, and operation of the proposed telemetry units associated appurtenances. The PRS will be provided with a metering and control panel to monitor pressure and flow which will be communicated to the Auburn communications programmable logic controller (PLC) via a telephone circuit. This information will be sent to the storage tank and supervisory control and data acquisitions (SCADA) unit. Power to the PRS station will be from PG&amp;E, a trench will be required from the control located above ground to the nearest PG&amp;E power pole. The control panel will be located near the PRS within 10 feet in an outdoor enclosure. A telephone connection will also be required and this will need to be coordinated with ATT. The telemetry unit control panels would be approximately three feet in height and 2 feet by 2 feet, which will house programmable control panels, electrical equipment, and telemetry equipment for phone or radio communications.</p> <p>The tank size will require solar power since utility power is not feasible due to the distance involved. A panel will be installed to monitor and control the tank level, irrigation and valve status which will be communicated via radio to the Auburn communications PLC for processing by SCADA and retransmission to the PRS. Power for the tank will be derived from a set of solar panels (roughly 10' X 10' mounted on a 10 pole). The control panel and solar array will need to be mounted on the southwest side of the property for best solar access and communications connection to the Auburn Power. The enclosure will be mounted above ground.</p>	<b>NOE</b>	
2008108231	<p>Rehabilitation and Reconstruction of Softball Field 1 at Rish Park Rossmoor Community Services District Los Alamitos--Orange</p> <p>The Board of Directors of the Rossmoor Community Services District took action on October 14, 2008 to authorize the General Manager to pursue grant funding for the rehabilitation and reconstruction of Field 1 at Rush Park for softball use. Rush Park is currently developed with sport facilities, including a turf softball field and backstop. If grant funding is obtained for the project, the project would repair and replace facilities at Field 1 for softball activities. Field 1 would not be a full-sized softball field, but would instead provide a small-scale softball field for youth activities. The beneficiaries of this project would be the community and youth in the Rossmoor area.</p>	<b>NOE</b>

	11-acre commercial/retail development, a 17-acre community park, and a 5-acre neighborhood park that includes a storm water detention basin. Access to the auto mall and future commercial development would be from a new road off El Charro Road, with no through connection to Stoneridge Drive except for emergency vehicles.		
2007062027	Lincoln Regional Airport Master Plan Lincoln, City of Lincoln--Placer The Airport Master Plan developed several general planning goals for the master planning effort. These planning goals relate to various aspects of the physical layout, capacity, operations and development of Lincoln Regional Airport under development proposals considered for the Airport Master Plan, including: development funding through the Federal Aviation Administration's Airport Capital Improvement Program; airport safety and reliability; adequacy of aviation-compatible commercial development; compatible land uses in currently undeveloped areas; minimizing environmental impacts and related community effects; enabling flexible airport development adaptable to changing conditions; meeting airport revenue generating goals; achieving consistency with applicable federal, state, regional and local plans; and maintaining public confidence and support.	<b>FIN</b>	
2008022063	Honda Port of Entry Richmond, City of Richmond--Contra Costa Establishment of the Port of Richmond, Point Potrero Marine Terminal as the Northern California Port of Entry for imported Honda automobiles. Auto Warehousing Company (AWC) is proposing to expand its existing operations at the Port of Richmond to develop a Northern California Port of Entry for Honda automobiles. AWC currently receives and processes Hyundai and Kia cars imported from Korea by ship. AWC, in cooperation with the Trans Development Group, is proposing to construct improvements to the Point Potrero Marine Terminal (PPMT) that would include repairs to one of the ship berths and creation of a new rail yard adjacent to the ship berths at the PPMT so that imported autos could be loaded directly onto rail cars without the current intermediary step of shuttling them to the BNSF rail yard approximately 1 mile to the north.	<b>FIN</b>	
2005052107	Fox Hollow Santa Rosa, City of Santa Rosa--Sonoma The project consists of a subdivision application to subdivide the property into 172 lots for single-family residential use. The proposed subdivision is divided into three separate phases. A small lot Conditional Use Permit would allow minimum lot sizes of 3,006 sf. The largest lot would be 8,458 sf, with an average lot size of 3,980 sf. A total of 178 residential units are proposed (148 single-family detached, 9 duets, and 6 duplexes) for a total residential density of 7.95 units per acre.	<b>MND</b>	11/18/2008

	Clarke Street northerly from the intersection of Paschels Way and Clarke Street across the frontage of lot 15. Incremental wet and dry infrastructure will be installed to serve the project.		
2008091039	ENV-2008-2140-MND Los Angeles, City of --Los Angeles Conditional Use to permit the sale and dispensing of a full line of alcoholic beverages in conjunction with the proposed operation of 1) an approximately 3,158 sq. ft. restaurant (Unit No. 104/105) comprised of 10 karaoke music studios, accommodating 83 patrons, with hours of operation from 11:00 am to 2:00 am daily; and 2) an approximately 2,419 sq. ft. restaurant (Unit No. 201) accommodating 133 patrons with hours of operation from 11:00 am to 11:00 pm daily, all on an approximately 18,000 sq. ft. lot located within the C2-1 Zone. Conditional Use consideration is also required to permit hours of operation between the hours of 11:00 pm and 7:00 am within a mini-shopping center.	<b>MND</b>	11/18/2008
2008101096	Arlington Retail Center ("Tava Center") Riverside, City of Riverside--Riverside The applicant's proposal includes a Conditional Use Permit (CUP) to construct and operate a 50,000 sf health and fitness club, "LA Fitness". Additionally, the applicant requests Design Review to facilitate the development of the LA Fitness, a 7,000 sf "Soulplantation" restaurant, and a 5,000 sf retail building. This proposal involves two alternate site designs to allow for potential future widening of State Highway 91, immediately adjacent to west of the subject site. The decision to build either Alternative A or B will be contingent upon the intentions of the California Department of Transportation (Caltrans). While each potential site design is discussed in this report, only the environmental impacts for Alternative B are evaluated, as it is the site design that proposes the most number of building and therefore could potentially have the most impacts.	<b>MND</b>	11/18/2008
2008101100	Gearhart Conditional Certificate of Compliance San Luis Obispo County Paso Robles--San Luis Obispo Request to legalize one parcel of 89 acres. One building envelope, approximately 1.5 acre in size is proposed. Off-site road improvements within a private easement extending from Highway 41 to the project parcel boundary are proposed. The project would result in up to 2.3 acres of disturbance of an 89-acre parcel due to future development of the building envelope and on-site access improvements, and approximately 1.6 acres of disturbance for off-site road improvements.	<b>MND</b>	11/18/2008
2008101101	PM069652 / RENVT200700126 Los Angeles County --Los Angeles The proposed project is an application for a Tentative Parcel Map to subdivide the subject property into two parcels of 111,054 sf and 111,670 sf. Proposed Parcel 1 has an existing single-family residence and septic system, and Proposed Parcel 2 is vacant and will require the installation of a septic system. Both parcels are served by the Los Angeles County Sanitation Districts. The project site falls within the Acton Community Standards District.	<b>MND</b>	11/18/2008

2008108241	Agreement 2008-0180-R4; Unnames Tributaries to Sand, Aqua Fria an Carson Creek; Culvert Repair. Fish & Game #4 --Mariposa Metal culverts at the three locations will have any holes repaired with concrete slurry and then will be lined with a "cured in place" liner to prevent rusting and extent the life of the culvert. None of the worl will require equipment to enter the creek beds, only foot crews with hand tools.	<b>NOE</b>	
2008108243	West Marin Co-Composting Project Marin Resource Conservation District --Marin The WMCCP is a green materials composting operation, operating under the CIWMB "notification" regulatory tier. The project involves conversion of an existing on-farm composting operation to a green materials composting operation in order to enable processing of green wastes and equestrian wastes via co-composting with dairy wastes. The purpose of the project is to provide a local recycling opportunity for local green and equestrian wastes, facilitate nutrient management activities on the dairy, provide bedding materials for the dairy, provide compost for local agricultural and horticultural uses, and provide greenhouse gas reductions via enhanced soil carbon sequestration. The project will benefit the partner dairy local green waste producers, the County of Marin, equestrian facility operators, the local agricultural community and the general community via air and water quality improvements and atmospheric carbon sequestration.	<b>NOE</b>	
2008108244	Terranea Resort and Spa - Conditional Use Permit No. 215, et. al. Revision 1 Rancho Palos Verdes, City of Rancho Palos Verdes--Los Angeles the project approved by the City Council consists of improving the lower beach area located at the southeastern portion og the project site with the importation of 1,500 cubic yards of sand, construction of a foot bridge, construction of a vegetated drainage channel, and installation of security fencing.	<b>NOE</b>	
2008108245	Willow High School Portable Replacement John Swett Unified School District --Contra Costa Modernization of existing campus to benefit students enrolled in continuation and alternative education, currently housing 40 students in 4 portables including two classrooms, a library and administration/restrooms. An interim campus consisting of twp temporary portables will be placed on a pad to become the future 18 space parking lot to replace the current 14 space parking lot. The existing portables will be replaced with six upgraded modular buildings and one restroom building. The present half-court basketball court will be expanded to full-court.	<b>NOE</b>	
2008108246	Issuance of Streambed Alteration Agreement No. R1-07-0519, Unnamed intermittent stream, tributary to the Sacramento River, Shasta County. Caltrans #2 Redding--Shasta	<b>NOE</b>

<b><u>Documents Received on Monday, October 20, 2008</u></b>			
2008108248	Issuance of Streambed Alteration Agreement No. R1-08-0487, forest House Ranch, Yreka Creek Enhancement Project. Caltrans #2 Yreka--Siskiyou	<b>NOE</b>	
2008108249	Issuance of Streambed Alteration Agreement No. R1-08-0249, Tormey Drain and an unnamed tributary to Tormey Drain, tributary to Anderson Creek, Shasta County. Caltrans #2 Anderson--Shasta	<b>NOE</b>	
2008108250	Issuance of Streambed Alteration Agreement No. R1-08-0427, Antelope Creek, tributary to the Sacramento River, Tehama County Caltrans #2 Red Bluff--Tehama	<b>NOE</b>	
2008108251	Access ramps Caltrans #2 --Siskiyou The California Department of Transportation (Caltrans) in coordination with the Federal Highway Administration (FHWA) is proposing to repair or install sidewalk access ramps at various locations on State Route (SR) 3 in Fort Jones and Yreka in an effort to comply with the American Disability Act. The project includes the following construction. (See attachments) An environmental evaluation was conducted consisting of an inquiry of resource databases and records, consultation with resource agencies and field surveys. The following was determined: No project area limits. NO permits needed. Pending the field survey results, and confirmed findings of NOA will require the contractor to be notified as to its presence.	<b>NOE</b>	
2008108252	Henry's Prescribed Burn Forestry and Fire Protection, Department of --El Dorado The Henry's Prescribed Burn Project is approximately 550 acres of private land that will be understory burned as part the greater United States Forest Service (USFS) Henry's Burn (1600 acres). The USFS has completed an Environmental Assessment for their portion of the burn to take place on the USFS managed lands. The understory burn will be a multiple entry project with ignition occurring in the fall and/or spring. Ignition strategies will include both hand and aerial firing. Depth at the top of the burn will be created by hand ignitions and then a helicopter will be used to initiate the backing fire on the lower slopes. A minimal amount of hand thinning of small diameter trees (1" to 9") and brush will occur along control lines and the Caldor Road in order to reduce surface fuel loading and fire severity. The completion of this project has the potential to reduce fire severity thereby allowing suppression forces an area to safely engage in suppression activities for the Grizzle Flats Community and surrounding forest.	<b>NOE</b>	
2008108253	Design Review Permit DR08-062 Tuolumne County --Tuolumne Design Review Permit DR08-062 to allow the replacement of the metal roof on an existing residence with an "Onyx Black" 30-year composition roof on a parcel zoned R-1:D:MX (Single-Family Residential:Design Control Combing:Mobilehole Exclusion Combing) under Title 17 of the Tuolumne County Ordinance Code.	<b>NOE</b>

2008102078	Tentative Parcel Map Application No. 2008-12 & Exception Application No. 2008-03 - Mark Layton Stanislaus County Oakdale--Stanislaus This is a request to divide a 7.9-acre parcel into two parcels, Parcel 1 is proposed at 1.5-acres, Parcel 2 is a proposed remainder at 4.4 acres. An exception to allow a less than 20-acre parcel without fronting on a county-maintained road is also required.	<b>CON</b>	11/07/2008
2003071157	Harper Canyon / Encina Hills Subdivision Monterey County Salinas--Monterey The project applicant, Harper Canyon Realty, LLC has submitted to the Co. of Monterey Resource Management Agency - Planning Department an application for a Combined Development Permit (PLN000696) for a Vesting Tentative Map in order to subdivide land pursuant to the Subdivision Map Act and the Monterey Co. Subdivision Ordinance (Title 19). The proposed project includes the subdivision of 344 acres into 17 lots on 164 acres with one 180 acre remainder parcel. The residential lots would have an average density of one dwelling unit per 9.64 acres within the subdivided area, as lots would range in size from 5.13 acres to 23.42 acres. Improved lots would be sold individually for the construction of homes. The proposed project also includes Use Permits for grading on slopes greater than 30 percent and for the removal of 79 Coast Live Oak trees. The project site includes a 180 acre remainder parcel. The project applicant has committed to donating approx. 154 acres of the remainder parcel by deeding the property to the Monterey Co. Parks Department as an expansion of the adjacent Toro Park pursuant to Section 66458(a)(2) of the Subdivision Map Act. No development is proposed on the remaining 26 acres of the remainder parcel at this time.	<b>EIR</b>	12/05/2008
2006122030	Sierra College Boulevard Widening Rocklin, City of Rocklin--Placer The project would consist of the widening of Sierra College Boulevard to provide sufficient capacity to accommodate increases in regional and local traffic, establish a centerline alignment for the ultimate roadway and repair or replace existing deteriorated or inadequate paving sections. From the Aguilar Tributary to Interstate 80, the roadway will be widened from the existing 2 or 4 lanes to 6 lanes including median, curb, gutter and sidewalk and turn lanes as appropriate at intersections. From Granite Drive to Taylor Road, the roadway will be widened	<b>EIR</b>	12/04/2008

	from the existing 2 lanes to 4 lanes including median, paved shoulders, and as appropriate, turn lanes at intersections.		
2007071076	El Casco System Project Public Utilities Commission Banning, Beaumont, Calimesa--Riverside, San Bernardino SCE proposes to construct a new 220/115/12 kV substation (the El Casco Substation), upgrade the existing Zanja and Banning Substations and SCE's Mill Creek Communications Site, upgrade a total of 15.4 miles of 115 kV electric subtransmission line and associated structures, and install fiber optic communication cables between the Cities of Redlands and Banning. The entire project would be located within Riverside and San Bernardino Counties.	<b>FIN</b>	
2008101108	Revelle College Apartments and Commons Dining Renovation University of California, San Diego La Jolla--San Diego The proposed project is comprised of two adjacent components; apartments and an existing dining renovation. The proposed project would consist of three linked student residential apartment buildings totaling approx. 154,000 gross sf. and a renovation of the existing 25,183 gross sf. Revelle Commons. The residential student apartment buildings would house approx. 500 apartment style beds for second year students. The Revelle Commons renovation would involve modernization of the interior to create a restaurant-style dining venue and the addition of a market and café.	<b>MND</b>	11/19/2008
2008102075	Shenandoah Springs Residential Development Plymouth, City of Plymouth--Amador The subdivision of 23.78 acres within the City of Plymouth currently zoned Residential Single Family into 64 Single Family Residential Lots and a 3.3 acre park.	<b>MND</b>	11/19/2008
2008102076	City of St. Helena Corporation Yard Wastewater and Stormwater Improvement Project St. Helena, City of St. Helena--Napa The purpose of this project is to improve wastewater and stormwater facilities at the Corporation Yard. The project is needed because floods in 2005-2006 ruined the former office building and damaged the existing stormwater pump house. Mobile offices that replaced the flooded office building are currently utilizing a temporary waste system. The proposed improvements would achieve the following objectives: 1. Convey sanitary wastewater from the office building to the City's WWTRP; 2. Direct stormwater from the Corporation Yard operations area storm drains to the City's WWTRP, minimizing stormwater runoff and improving water quality discharge to Sulphur Creek; 3. Repair the existing pump house to service stormwater runoff from the building roofs and gutters, as well as sheet flow on Charter Oak Ave.; 4. Improve wastewater services for other parcels along Charter Oak Ave., in accordance with the City's Highway 29 Specific Plan, by providing an available sewer line; and 5. Increase safety by replacement and relocation of the damaged emergency siren/alarm within the Corporation Yard.	<b>MND</b>	11/19/2008

	<p>proposed project would divert up to 3 million gallons per day (mgd) of dry weather flows from the East Garden Grove Wintersburg Channel (EGGWC) into a newly constructed treatment wetlands system for water quality improvement purposes. The constructed wetlands would be located in the northeastern corner of Central Park between Slater Avenue and Talbert Avenue to the north and south, and Goldenwest Street and Gothard Street to the west and east. Project components include the construction of a diversion structure such as a rubber dam within the EGGWC to divert dry weather flows either into an existing water line in Goldenwest Street, or the existing storm drain system within Gothard Street, for transport to the newly constructed treatment wetlands within Central Park. These treatment wetlands would consist of three linear wetland features encompassing open water and channel areas and channels through which diverted channel flows would move and be subjected to a series of natural treatment processes improving overall water quality. Project objectives include the improvement of water quality and the potential beneficial reuse of treated water on site for park irrigation purposes if sufficient water is available.</p>

2008108256	Proposed Blythe Elementary School Addition, Removal Action Workplan Toxic Substances Control, Department of Los Angeles, City of--Los Angeles The project involves approval of a Removal Action Workplan (RAW) by the Department of Toxic Substances Control (DTSC) pursuant to Health & Safety Code, chapter 6.8, submitted on August 15, 2008 by Haley & Aldrich, Inc. The RAW, focuses on excavation and removal to mitigate soils impacted with excessive levels of chlordane and naturally occurring asbestos (NOA) at the project site. The purpose of the project is to mitigate impacted soils that exceed the project-specific human health risk criteria to minimize human exposure to the identified chemicals of concern (COCs). The estimated volume of impacted soils is 540 cubic yards or approximately 37 truckloads. The cleanup levels for these COCs are: the DTSC risk management level of 12 ppm for arsenic at school sites. Project activities will commence in November 2008 and are expected to take approximately nine (9) days to complete the excavation and 30 days to complete the site restoration.	<b>NOE</b>

<b><u>Documents Received on Tuesday, October 21, 2008</u></b>			
2008108257	<p>Removal Action Workplan, LeyVa Middle School Expansion, Evergreen Elementary School District Toxic Substances Control, Department of San Jose--Santa Clara</p> <p>The project involves approval of a Removal Action Workplan (RAW) by the Department of Toxic Substances Control (DTSC) pursuant to Health &amp; Safety Code, chapter 6.8, submitted on September 12, 200 by Strategic Engineering &amp; Science, Inc. The RAW, prepared in accordance with Health &amp; Safety Code §25323.1 and §25356.1 subsec. (h), focuses on excavation and removal to mitigate soils impacted with excessive levels of chlordane and naturally occurring asbestos (NOA) at the project site. The purpose of the project is to mitigate impacted soils that exceed the project-specific human health risk criteria to minimize human exposure to the identified chemicals of concern (COCs). The estimated volume of impacted soils is 2,507 cubic yards (including seven cubic yards of chlordane-impacted soil) or approximately 210 truckloads. The cleanup levels for these COCs are: (a) the California Human Screening Level (CHHSL) of 0.43 milligram per kilogram (mg/kg) for chlordane in residential soils; and (b) naturally occurring asbestos that is more than 25% of the samples exceeding 0.01% by weight asbestos count using the Transmission Electron Microscopy (TEM) method.</p> <p>Project activities will commence in late December 2008 and are expected to take approximately 14 work days (excluding Christmas Day and New Year's Day) to complete (during the school's winter break from December 20 2008 to January 4, 2009).</p> <p>Specific environmental safeguards and monitoring procedures that are enforceable and made a conditions of project approval to ensure that impacts to the environment will be less than significant are included in an approved Excavation Plan, Engineering Evaluation/Cost Analysis, Health and Safety Plan, Quality Assurance Project Plan, Transportation Plan, and Air Monitoring and Dust Control Plan. In addition, in the event resources of biological, cultural, or historical significance are found in the course of project activities, work will be suspended while a qualified biological, cultural, or historical resources specialist makes an assessment of the area and arrangements are made to protect or preserve any resources that are located. If human remains are discovered at the Site, no further disturbance will occur in the location where the remains are found, and the County Coroner will be notified pursuant to Health and Safety Code section 7050.5. The coroner will determine disposition within 48-hours (Public Resources Code, section 5097.98).</p> <p>An analysis of project activities upon existing environmental conditions indicates that implementation of environmental safeguards and monitoring procedures are enforceable and made a condition of project approval and will ensure that impacts to the environment will be less than significant. As a result, DTSC finds that the project is exempt from further environmental review under CEQA.</p>	<b>NOE</b>	
2008108258	<p>Entry Road Irrigation System Parks and Recreation, Department of --Santa Clara</p> <p>Install 2/4" PVC pipe irrigation lines down both sides of the entry road at Pacheocho State Park to replace existing above ground irrigation lines that are periodically destroyed by rabbits, squirrels, lawn mowers, and weed eaters. Work will manually excavate the 12" deep X 1280' long trench.</p>	<b>NOE</b>

	drainage to reduce mosquito breeding areas per vector control recommendations; repair of existing culverts and storm drains; form and pour footings for new bridge; rough grade, cut and fill and fine grade new trail path around perimeter of the project area; form pour, and install concrete curbing to define new perimeter trail; install grade and decomposed granite (DG) trail surface; plant representative riparian vegetation to upland plants near the new DG trail; and remove invasive and exotic plants.		
2008101120	Senior Canyon Mutual Water Company Pipeline Project Health Services, Department of Ojai--Ventura The proposed project includes the installation of a total of approximately 1500 linear feet of a new water line. A 130 foot span will be suspended over a dry ravine and another 215 feet will be suspended over Senior Canyon Creek. The three pipes over the Senior Canyon Creek will be suspended on a new pipe bridge and will replace two existing pipelines. The project also involves an upgrade and installation of water quality monitoring instrumentation and the construction of a 160 square foot utility structure for square of materials and tools.	<b>MND</b>	12/01/2008
2008102083	Plaza II (PCPB T20080098) Placer County Auburn--Placer Proposes to construct three new buildings on 3.3 acres as an expansion to Plaza I Shopping Center.	<b>MND</b>	11/20/2008
2008102084	Cabral Ranch (PSUB T20080105) Placer County Roseville--Placer Project proposes a tentative subdivision map to develop a low-density residential subdivision consisting of 12 single-family residential lots of 40,000 square feet or larger on 12.4 acres.	<b>MND</b>	11/20/2008
2008102085	Rosemore-Woodland 69-kV Transmission Line Project Modesto Irrigation District Modesto--Stanislaus Modesto Irrigation District proposes to construct approximately two miles of single-circuit 69-kV transmission lines on wood or tubular steel poles to connect the Woodard Generation Station to the newly expanded 2306912-kV Rosemore Substation. The new 69-kV lines would be located on public rights-of-way along Woodland Avenue and North Carpenter Road and along MD Lateral No. 4.	<b>MND</b>	11/20/2008
2004112063	Master Permit for Env. Enhancement Projects Santa Cruz County Capitola--Santa Cruz This project is under the Master Permit issued to the Santa Cruz Co. Resources Conservation Dist. (RCD) to administer the Santa Cruz Countywide Permit Coordination Program, for small, environmentally beneficial projects on private lands in Santa Cruz Co. In the main stem of the San Lorenzo River, there is a boulder cascade formed by two large boulders of approx. 14ft. in diameter that have lodged between bedrock outcrops and no act as a buttress for the accumulation of other smaller boulders. This boulder cascade is a barrier to fish passage. The project Applicant proposes to notch the boulder in the main chute using hand tools. Construction access is limited to foot traffic and tools are limited to those that can be carried to the site. Boulders will be drilled and broken with handheld pneumatic tools. This project is located in Felton, Santa Cruz Co., in	<b>NOI</b>

	2. Application 04WA-100 to rescind the existing Williamson Act land conservation contract on the 40.0+/- acre parcel pursuant to Resolution 122-70 and to execute a new Williamson Act land conservation contract pursuant to Resolution 106-04, including approval of the Agricultural management Plan.		
2008108331	Lake Clementine Launch Ramp Improvements Boating and Waterways, Department of -- Due to the low water levels it is necessary to extend the launch ramp at Lake Clementine. The extension will be approximately 30 feet wide and 13 feet long. The project will also place approximately 39 cubic yards of riprap along 43 feet of shoreline for stabilization. The grading for the ramp is minimal and will not disturb sediment deep enough to disturb any cultural resources. Also, no endangered or threatened species will be affected. A slit curtain will be used to mitigate any potential increase in turbidity from the construction.	<b>NOE</b>	
2008108332	Redding Field Office Reconfiguration, Department of Motor Vehicles Motor Vehicles, Department of --Shasta The proposed project will renovate the Department of Motor Vehicles Field Office located at 2135 Civic Center Drive, Redding, CA. The project is comprised of one store and approximately 7,000 gross square feet of an existing larger office building. The renovation will provide additional workload capacity for the field office program and improve building. this vacated space will add approximately 1,500 gross square feet to the DMV field office space. The vacant space will be converted into a break room and storage area. Other work includes the replacement of existing mechanical systems, upgrades to the electrical system, and replacement of existing floor and wall finishes, ceiling and lighting systems. Improvements will include fire/life safety, security, American Disability Act (ADA) code compliance, signage, and interior space.	<b>NOE</b>	
2008108333	Medea Creek Pathway Restoration Fish & Game #5 --Ventura The Applicant intends to alter the streambed by restoring a paved pathway along Medea Creek. The bank that supports the path has been eroded and undermined due to high flows. The banks and path will be repaired by filling the eroded areas within the streambed with an estimated 240 cubic yards of large boulders and 660 cubic yards of gravel fill. Once the eroded area is restored to the previous grade, the pathway will be re-constructed. A water diversion will be implemented at the project site. SAA #1600-2008-0264-R5.	<b>NOE</b>	
2008108334	Los Caballos Cleanup Parks and Recreation, Department of --San Diego Cleanup former Los Caballos horse camp at Cuyamaca Rancho State Park. Area contains various structural remnants and other debris that were contributing to erosion. Currently, the area is blighted by closed area signs, caution tape, barricades and other interim management mechanisms.	<b>NOE</b>

2008102086	Sanctuary K-8 School Project Lodi Unified School District Stockton--San Joaquin The 14-acre project site is located in a land designation known, and mapped on the USGS 7.5' Terminus and Lodi South quadrangles, as the Shima Tract. The proposed project is the development by the LUSD, on the above described site, of an K-8 school facility which is projected to serve a maximum of 850 K-8 students. It is anticipated that most, if not all, of the students will come from the residential development that is being proposed as the Sanctuary Master Plan Development (EDAW, 2006). The campus will provide traditional educational opportunities through classroom education, outdoor recreation and off-site opportunities. The facility will not include a venue for organized sports with high intensity lighting. The school will be administered by a typical combination of administrators, teachers, and facilities support staff.	<b>Neg</b>	11/24/2008
2001072121	Sorokko Master Plan and Land Division Marin County Tiburon--Marin Approval of the Sorokko Master Plan and Land Division shall divide the 18.9 acre Sorokko property into four lots and a remainder parcel, as well as establishing approx. building envelopes and access alignments for all five lots. Serge Sorokko has revised the project consistent with the recommendations of the Draft EIR to eliminate the on-site wastewater treatment and disposal facility and to connect to the Sanitary Dist. No. 5 sewer lines. Water shall be provided by the Marin Municipal Water Dist. The approved project includes the provision of an off-site affordable housing unit as well as the construction of frontage improvements along Paradise Dr.	<b>NOD</b>	
2003071058	Water Distribution System Master Plan and Wastewater Master Plan Elsinore Valley Municipal Water District Lake Elsinore, Canyon Lake, Murrieta, Unincorporated--Riverside The project consists of the permitting and operation of the Backbasin Groundwater Treatment Plant to reduce arsenic levels to potable water standards within the service area of the Elsinore Valley Municipal Water Dist. The treatment plant will blend water from two existing wells; Cereal Wells 3 and 4.	<b>NOD</b>	
2004022041	Interstate 80 Freeway Improvement Project, Sacramento and Placer Counties Caltrans #3 --Sacramento, Placer Caltrans proposes to address current recurring peak period congestion as well as more prolonged future congestion by adding capacity in each direction on mainline I-80 from 1.1 kilometers (0.70mi.) west of the Sacramento/Placer Co. line to approx. 1.56 kilometers (0.97mi.) east of SR 65 connector in Placer Co. This agreement pertains to Interstate 80 Freeway Improvement Project activities within the stream zone of Miners Ravine and unnamed tributaries to Secret Ravine. Specifically, the Interstate 80 Bridge over Miner Ravine will be widened. Additional bridge footings will be installed at Miners Ravine. Three culverts will be extended at three existing culverts at three tributaries to Secret Ravine.	<b>NOD</b>

2008108340	<p>IT Environmental Liquidating Trust, Montezuma Hills Facility -PostClosure Permit Renewal Toxic Substances Control, Department of --Solano</p> <p>This project consists of renewing the Montezuma Hills (Facility) Postclosure Permit. No physical changes to the site are proposed. The Facility consists of 1) a closed - covered Waste Consolidation Area (WCA), 2) a Groundwater Evaporation Basin and conveyance system, 3) and a former Waste Excavation Area. IT Environmental Liquidating Trust (ITELT) is the current owner. On January 31, 1998, Department of Toxic Substances Control (DTSC) issued a Postclosure Permit for the facility which expires ten years from the date of issuance. Under the conditions of the Postclosure Permit for the state and federal regulations require that a postclosure plan for a 30-year period be developed and implemented by the facility. The renewed Postclosure Permit outlines the procedure to fulfill these regulatory requirements which consist of three primary functions: a) continue maintenance of the closure cover. b) continue environmental monitoring; and c) continue maintenance of financial mechanisms to fund the postclosure activities.</p>	<b>NOE</b>	
2008108341	<p>Manning Water Treatment Plant Upgrades Health Services, Department of --Orange</p> <p>The Manning Water Treatment Plant Upgrades consist of a new addition of ammonio solution for the creation of chloramine disinfectant. No changes would be made to the existing storage tanks.</p>	<b>NOE</b>	
2008108342	<p>Routine Maintenance for the Bishop Creek Hydroelectric Projects in Inyo and Mono Counties Fish &amp; Game #6 Bishop--Mono, Inyo</p> <p>CDFG is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 (SAA# 1600-2008-0099-R6) of the Fish and Game Code to the project applicant, Southern California Edison. The applicant proposes to perform routine maintenance activities for its four hydroelectric power projects in Inyo and Mono Counties. Routine maintenance include the removal of sand, silt, sediment, debris, rubbish, woody and herbaceous vegetation and other obstructions to flow; the control of weeds, grasses, and emergent vegetation; making repairs to control erosion and stabilize banks; repairing gates, barricades, and small structures; and the repair and/or replacement, cleaning, and clearing of facilities all as necessary to maintain the structural integrity and capacity of these facilities for drainage, flood control, and conservation purposes.</p>	<b>NOE</b>

2008108349	<p>Adopting of Resolution Approving an Amendment to Coachella Valley Portion of Transportation Expenditure Plan and Retail Transaction and Use Tax Ordinance 88-1 Calimesa, City of -- The Riverside County Transportation Commission Transportation ("RCTC") Expenditure Plan and Retail Transaction and Use Tax Ordinance, Ordinance No. 88-1 (the "Plan") was approved by 78.9 percent of the voters in Riverside County in 1988. The purpose of this Plan is to relieve traffic congestion, increase safety, improve air quality, and provide funding for essential countrywide transportation improvements. The Plan listed the locations of anticipated improvements in Riverside County, including Coachella Valley area. Due to unanticipated realignments in roadways and the relinquishment of State control over other roadways and highways in Coachella Valley, the Plan must now be amended to reflect current conditions and specify the current roadway segments which are eligible for funding. The resolution approving an amendment to the Plan adopted by the City on 10/20/2008 does not approve the construction of any transportation improvements, but instead approves an amendment to the Plan in order to make funding available for the planning and environmental review of future transportation improvements. The beneficiaries of these improvements include the residents of Riverside County, particularly those of the Coachella Valley area.</p>	<b>NOE</b>	
2008108350	<p>SONGS Replacement Steam Generator Transport Parks and Recreation, Department of --Orange A Right of Entry Permit will be issued to Southern California Edison for the transport of 4 replacement steam generators along a 15 mile route from MCB Camp Pendleton's Del Mar Boast Basin to San Onofre Nuclear Generating Station. The path of travel is on Old Highway 101 through San Onofre State Beach, Bluffs Campground and Day Use parking area. the park will be closed for a day or two during each slow transport passage during the months of October to February of 2008 and 2009 when the campground is closed to overnight stays.</p>	<b>NOE</b>	
2008108351	<p>Bolsa Chicha Lowland Maintenance Dredging Project Parks and Recreation, Department of --Orange A Right of Entry Permit is issued to conduct tidal inlet channel maintenance dredging of approximately 300,000 cubic yards of clean sand and place it on the beach front down coast of the inlet jetty using hydraulic dredge pipe and dozer to final grade pursuant to State Lands EIR SCH #2000071068. 	Suites would be four stories in height, contain 112 guest rooms, and include approximately 58,570 square feet of floor area. The project site would contain 330 parking spaces, 59 of which would be in an underground parking garage located beneath the proposed Embassy Suites. The proposed project would also include an underground stormwater storage facility designed to hold approximately 244,899 cubic feet of water during large storm events.		
2008091084	<p>Housing Element Update Westminster, City of Westminster--Orange</p> <p>Update to the Housing Element of the City's General Plan. The Housing Element identifies land and financial resources available to meet its fair share of housing needs as determined by the Regional Housing Needs Assessment. The Housing Element also describes policies and actions the city will pursue to assist in the development of housing, remove constraints to housing, conserve and improve the housing stock, promote equal housing opportunities, and preserve existing affordable housing units.</p>	<b>NOD</b>	
2008108355	<p>Re-route Waterline at the Equestrian Staging Area, Granite Bay Parks and Recreation, Department of --Placer</p> <p>Install approximately 1,100 lineal feet of two inch PVC pipe to replace an existing underground waterline that was removed previously during dike repair work at Granite Bay. The new waterline will connect the existing water supply at the main parking lot to the Horse Assembly Area at the Granite Bay main day use area. Excavate a 24 inch deep by 12 inch wide trench along a new alignment starting from the existing water shut-off valve along the road edge to the intersection of the main entrance road to Granite Bay and the spur road that enters the main day use area. Install the new waterline and backfill the trench. Hand excavate around oak tree roots &gt; 3 inches in diameter to avoid mechanical damage to structural roots.</p>	<b>NOE</b>	
2008108357	<p>Construction of "Chapel of Grace" at Valley State Prison for Women, Chowchilla, California Corrections and Rehabilitation, Department of Chowchilla--Merced</p> <p>The project consists of the construction of an approximately 6,725-square-foot chapel building at Valley State Prison for Women (VSPW). The new building will be an infill project within the existing secure perimeter of VSPW, and will be located in the southeastern portion of the institution between two existing buildings (a small existing chapel and a visitor's center). The one-story building will be Type II-A construction, and will include a lobby, a sanctuary with associated chancel, storage areas, a mechanical/ electrical room, and staff inmate restrooms. Other elements of the construction project will include remodeled landscaping in the adjacent courtyard area, and relocation of walkways to accommodate the footprint of the new building.</p> <p>The purpose of the project is to provide an all-faith place of worship in order to facilitate the spiritual transformation of inmates at VSPW. The project has no potential to increase the inmate population at VSPW.</p>	<b>NOE</b>

2008101133	RENV T200600125 / PM 0668871 9828 Elizabeth Lake Road, Leona Valley Los Angeles County Palmdale--Los Angeles The proposed os a request for a Parcel Map to subdivide 19.67 acres into three lots. The property currently consists of an existing single family residence, which will be retained. No grading is proposed. Water service will be provided by water wells and sewer by septic systems. A portion of the Amargosa Creek runs through the project site. There are 10 oak trees on the site which will not be disturbed.	<b>MND</b>	11/26/2008
2008102093	District-Wide FEMA 2006 Storm Damage Repair Projects East Bay Regional Parks District --Alameda, Contra Costa The District proposes eight site-specific projects in Alameda and Contra Costa counties to repair landslides on existing roads and trails on District parklands or property under its operational jurisdiction that resulted from 2006 winter storm events. The locations of the eight project sites are reflected in the Location Map. Construction activities will include excavation, grading and clearing, soil placement and compaction, installing retaining walls and potential cut and fill activities to assist with slope stabilization.	<b>MND</b>	11/26/2008
2008102094	Sawyer's Landing Waterford, City of Waterford--Stanislaus 113-lot Residential subdivision on 28.8 acres of pasture land near the Tuolumne River (Pre-Zone, Annexation, Tract Map).	<b>MND</b>	12/10/2008
2008102095	Vedanta Retreat Creek Permit Application Marin County --Marin The applicant, Warner Hirsch on behalf of Vedanta Retreat, is proposing to dredge approximately 1,800 cubic yards of accumulated sediment from an existing pond that is fed by an unnamed tributary to Olema Creek. Excavation of the material is proposed to be done by mechanical means with an excavator from the pond top-of-bank. The dredged material is proposed to be temporarily stockpiled within the property for drying and subsequently used on road repairs, landfill and other maintenance activities as needed.	<b>MND</b>	11/25/2008
2008102096	Highway 1 Realignment Project Caltrans, Planning --Mendocino The California Department of Transportation (Caltrans), in conjunction with the Federal Highway Administration (FHWA), proposes to realign a section of Highway 1 that was damaged during the 2005/2006 storms in Mendocino County. The project is located in Mendocino County on Highway 1 near Albion between post mile (PM) 38.38 and 38.92. The scope of this project consists of realigning the roadway to the east and decommissioning the existing roadway. The asphalt concrete (AC) and aggregate base of the decommissioned roadway will be removed. Drainage work will consist of removal and relocation of culverts with placement of rock slope protection at the outlets.	<b>MND</b>	11/26/2008

2008101136	<p>Fresh &amp; Easy Food Processing and Distribution Center March Joint Powers Authority Moreno Valley--Riverside</p> <p>The proposed project involves the development of a food processing and warehouse distribution facility by the project applicant, Fresh and Easy Neighborhood Market Inc. (F&amp;E). F&amp;E currently has an existing 766,304-square foot facility, on approximately 88.4 acres, that receives sorts, prepares, re-packages, stores, and distributes food and household products to up to approximately 235 stores located in Southern California, Arizona, and Nevada. This facility was approved by the March JPA in 2006 and is referred to as the "2006 Facility."</p> <p>F&amp;E is currently proposing to expand the 2006 facility to serve an additional 315 stores located in Southern California, Arizona, and Nevada. The expansion may also supply products to warehouse and manufacturing facilities anticipated to be located in Northern California (which would directly supply Northern California stores). This expansion would add approximately 1,145,600 square feet warehouse and food processing space, as well as additional parking to the existing facility. The expansion of the 2006 facility would take place entirely within the existing 88.4-acre project site. The combined approved 2006 facility and the proposed expansion are referred to as the "proposed project." Under the proposed project, a total of approximately 550 stores would be supplied from the F&amp;E facility.</p>	<b>NOP</b>	11/25/2008
2008101128	<p>Citrus Continuation High School Fontana Unified School District --San Bernardino</p> <p>Develop and operate new continuation high school and career technical center housing approximately 909 total students (calculated according to State classroom loading formulas) and approximately 50 staff members. The facilities would include two 1-and 2-story classroom buildings and include a multipurpose classroom/cafeteria, a library/resource center, and administration offices. The school would also include a gymnasium building and career technical/vocational wing. It is anticipated that approximately 760 students would be assigned to the school and approximately 150 students from Jurupa Hills High School and the Fontana Adult School may also use the career technical wing for specific career technical and Regional Occupational Program (ROP) classes not able to be housed at either of those sites. Due to the close proximity of Jurupa Hills High School and the Adult School to the new Citrus Continuation High School these students would walk to the career technical/vocational wing at CCHS. The on-site buildings would total approximately 77,696 sf. The playfields are anticipated to be shared between the FUSD and the City of Fontana, through a joint-use agreement. The proposed school is scheduled to open for the 2011-2012 school year.</p>	<b>Neg</b>	11/25/2008

(SCTA), in cooperation with Caltrans proposes to widen HWY 101 from four lanes to six lanes by adding one high occupancy vehicle (HOV) lane in each direction from N. of Pepper Rd. post mi. (PM) 8.9 in Petaluma to Rohnert Park Expressway PM 13.9 in Rohnert Park. The purpose of the project is to reduce congestion, improve traffic operations, encourage use of HOVs, and accommodate anticipated travel demand in the future.</p> <p>The California Fish and Game is issuing this Streambed Alteration Agreement for the widening of the stream crossing at Laguna de Santa Rosa and Copeland Creeks to accommodate the HOV lanes. Both streambeds are lined with concrete for flood control purposes. Vegetation at both creeks is dominated by ruderal species. All work within the stream zone will be conducted between June 15 and October 15.</p>	<b>NOD</b>	
2005121106	<p>Mesa College East Entry and Parking Garage San Diego Community College District San Diego--San Diego</p> <p>Develop a parking garage and a new east entry as part of the implementation of the adopted Mesa College Facilities Master Plan. Current action involves the deletion of the following mitigations measure - eastbound left turn lane on Mesa College Drive at Ashford Street</p>	<b>NOD</b>	
2006022139	<p>Zone 7 Mocho Groundwater Demineralization Plant Project Zone 7 Water Agency Pleasanton--Alameda</p> <p>The proposed project consists of construction and operation of a 7.7 mgd demineralization facility, located adjacent to Arroyo Mocho in the city of Pleasanton, California. The facility would treat potable supply from existing wells in the vicinity to help reduce total dissolved solids (TDS) levels in the area water supplies. Demineralization would occur through the use of a reverse osmosis treatment, producing finished water or permeate and concentrate with very high TDS levels. Zone 7 would blend permeate with other groundwater and/or surface water to achieve a target level of TDS. The concentrate from the treatment process would be discharged under special permit to the Dublin San Ramon Services District brine concentrate sewer, then to the Livermore Valley Water Management Agency sewer system, ultimately connecting to the existing East Bay Dischargers Authority outfall into the San Francisco Bay.</p>	<b>NOD</b>	
2006051070	<p>City of Livingston 2025 General Plan Livingston, City of Livingston--Merced</p> <p>The Cit. of Livingston 2025 GPU focuses on major revisions to three main elements - Land Use, Circulation and Urban Boundaries - of the City's 1999 General Plan. Minor revisions to the remaining elements of Open Space, Conservation and Recreation, Public Services and Facilities, and Safety are also included in the GPU. In addition, the 2025 GPU expands the City's Sphere of Influence (SOI) by approx. 2,905 acres. In addition to the 3,232 acres already contained in the existing SOI, the GPU adds 3,232 acres to the proposed SOU, as well as 2,261 acres of Urban Reserve areas. The 2025 GPU ultimately proposes a GP Area boundary of 8,398 acres (3,232 acres within the City limits and existing SOI + 2,905 acres within the proposed SOI + 2,261 acres of Urban Reserve).</p>	<b>NOD</b>	

## CEQA Daily Log

Documents Received during the Period: 10/16/2008 - 10/31/2008

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, October 27, 2008</u></b>			
2006052084	State Route 169 Bridge Replacements Caltrans #2 --Humboldt The project proposes removal and replacement of four bridges over Cappell, Mahwah, Rube Ranch, and Martin Ferry School creeks, tributaries to the Klamath River.	<b>NOD</b>	
2006081075	Project Number R2005-00572-(1), Case Numbers RCUP200500048, RENV200500064 Los Angeles County Los Angeles, City of--Los Angeles The proposed project described the expansion of an existing 200 tons per day Material Recovery Facility and Transfer Station to 700 tons per day. Site expansion of 1.11 acres to 1.61 acres and peak permitted traffic volume of 105 vehicles per day, operation will be Monday through Saturday and hours of operation of 6am to 6pm.	<b>NOD</b>	
2007051141	Lakeview Promenade Santa Maria, City of Santa Maria--Santa Barbara Mixed use commercial, residential, office, and entertainment project on a site totaling 9.4 acres. The project development is delineated as follows: 266 condominiums; approximately 40,000 sf for retail space; approximately 14,000 sf for restaurant use; approximately 14,000 sf for use as a spa/fitness/physical health care facility; and a 250-seat movie theater.	<b>NOD</b>	
2007102055	Osterweis Ranch Project Coastal Permit & Design Review Marin County --Marin The applicant, John Osterweis (Osterweis Ranch), is proposing to abandon/decommission an existing low water crossing and install a new clear span bridge to facilitate vehicular, livestock and pedestrian access from agricultural/residential buildings to adjacent agricultural lands. The proposed project includes the following: removal of two "old" abutment walls (approx. 15ftX8ftX4ft) and associated fill, installation of a new 65ft. bridge and associated abutment walls, as well as various "improvements" to adjacent driveways including placement of gravel. The new bridge is designed to pass a 100 year flood event. Construction activities include excavation of 563 cubic yards of fill, excavation of concrete, demolition debris and other non-soil materials. The project will require the removal of several native trees including one bay laurel and one alder, as well as other native, non-native vegetation in order to facilitate placement of the new abutments and other elements of the project. The applicant has stated that no grading will occur within the wetted area of the stream and that if equipment crossing of the creek is necessary, steel plates or wood mats will be temporarily installed to minimize impacts to the streambed.	<b>NOD</b>	
2008021045	Opportunistic Beach Fill Program in the Cities of Encinitas, Solana Beach, Coronado, and Imperial Beach Coronado, City of Coronado--San Diego The proposed project consists of the placement of opportunistically available and compatible beach sands on the beaches of the City of Coronado.	<b>NOD</b>	

## CEQA Daily Log

Documents Received during the Period: 10/16/2008 - 10/31/2008

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, October 27, 2008</u></b>			
2008042002	Recreational Boat Ramp Repair and Placement of a Seasonal Floating Dock - GP2008-16 Del Norte County --Del Norte The project proposes to repair approximately 90-feet of an existing boat ramp and install approximately 640 cubic yards of riprap on the Klamath River, Del Norte County.	<b>NOD</b>	
2008081030	North Shore Yacht Club Community Center Riverside County --Riverside The County of Riverside Department of Facilities Management (County DFM) has proposed the restoration and operation of a recreational facility in the unincorporated County of Riverside, referred to as the North Shore Yacht Club Community Center (proposed project). The County proposes to rehabilitate the North Shore Yacht Club, which is a historically significant facility originally designed by renowned architect, Albert Frey. The building and surrounding 10.91-acre parcel would be used as a community center which will provide space for public meetings, health and educational programs, a passive museum and cultural center, services for senior citizens, and a "mail box" service to be used on a daily basis. The project will provide recreational and public services to the growing communities of the Coachella Valley. The proposed project would include extensive interior rehabilitation of the North Shore Yacht Club to suit the proposed use of the facility as a community center. The exterior would be restored to its original design, including any updated building code compliance requirements. Outdoor areas would be improved with landscaping, demolition of the existing dilapidated pool terrace, and replacement of existing flat work and retaining walls.	<b>NOD</b>	
2008082061	Holiday Haus Project Mammoth Lakes, City of Mammoth Lakes--Mono Hotel Condominium that would include a total of 91 units (135 bedrooms) constructed above an underground parking structure. In the event that the Intrastar 7B Road is not constructed upon project implementation, the Applicant would construct a fire access road from the current proposed entry at SR-203/Main Street into the eastern portion of the project site, trending south. Under this alternative, the project would result in two fewer units and three one bedroom units (under the proposed project) would be changed to studio units.	<b>NOD</b>	
2008092001	Rezone, General Plan Amendment, Zone Change and PUD for APN: 039-471-09 (07-0667) Santa Cruz County --Santa Cruz The project proposes a General Plan amendment, zone change, Riparian Exception, and Planned Unit Development (PUD) allowing a maximum development density of 20 dwelling units per usable acre on the project site. A minimum of forty percent of the total number of units is to be affordable, by right: use & density would not be discretionary, 2.0 useable acres equating to a maximum of 40 dwelling units including the existing historic Rancho House. The remaining 3.5 acres would remain in open space to protect riparian areas adjacent to Aptos Creek. The project would amend the General Plan from "Urban Medium Residential: and "Urban Open Space Lands" to "Urban High Residential" and "Urban Open Space Lands" with a PUD. The Urban High Residential would be amended to allow 20 units per net developable acre with a 2,000 square foot lot	<b>NOD</b>

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, October 27, 2008</u></b>			
2008108378	Agreement 2008-0021-R4; District 5 Routine Maintenance Agreement Fish & Game #4 --San Luis Obispo, San Benito, Monterey Various routine maintenance activities including removal of debris and obstructions to the extent that these obstruction reduce capacity, removal of silt, sand or sediment when water way is dry, vegetation control within 50 feet of existing facility, minor repairs to existing facilities, rip rap replenishment, culvert maintenance, and test boring for geotechnical sampling and cultural investigations provided such work does not cause a significant adverse affect to fish and wildlife resources.	<b>NOE</b>	
2008108379	Copper Avenue Culvert Replacement Project, Agreement No. 2008-0152-R4 Fish & Game #4 Clovis--Fresno Remove the existing 45-fppt by 35-inch by 22-inch corrugated metal pipe arch culvert under Copper Avenue and replace with a 54-foot by 48-inch by 24-inch concrete box culvert. Cutoff walls and wingwalls would be constructed at both ends of the culvert. The upstream wingwall would measure 22-feet across and the downstream wingwall would measure 14-feet across. A 24-foot by 5-foot riprap erosion control apron would be installed on the downstream end of the culvert. Work will occur during low flow within the stream, and disturbed areas will be recontoured and revegetated where applicable.	<b>NOE</b>	
2008108380	Lemon Street Drainage Soil Remediation Project Fish & Game #3 Vallejo--Solano The applicant proposes to remove 60 cubic yards of diesel contaminated soil from 5 discrete areas along the Lemon Street Drainage. Issuance of a Streambed Alteration Agreement Number 1600-2008-0239-3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>	
2008108381	West Point Emergency Slop Stabilization Caltrans #10 --Calaveras The California Department of Transportation (Caltrans) proposes an emergency project to repair a portion of a hillside along the westbound side of State Route 26 in rural Calaveras County near West Point. Slip-out approximately 210 feet of downhill slop adjacent to the highway occurred on August 28, 2008. The proposed project would stabilize the slop prior to the winter season, using a combination of soil nails and gunite, in order to prevent further erosion of the embankment and potentially severe damage to the highway. Construction would use state-only funds but would occur on a portion of State highway that is on federal (Bureau of Land Management) land through perspective rights. A Caltrans Director's Order authorizing emergency funding for this project pursuant to Section 10122(a) of the Public Contract Code - Failure or Threat of Failure of Transportation Facility - was approved on September 12, 2008.	<b>NOE</b>	
2008108382	Kay Lane Recycled Water Main Slip-lining Forestville Water District --Sonoma The project would replace 1,400 linear feet of 8-inch diameter recycled water pipe by slip-lining existing pipe and standard trenching methods in one section to be installed below ground. Existing pipe is above ground and has deteriorated to the pot where repairs are no longer feasible or cost effective.	<b>NOE</b>

2008108396	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0430, Cahn Family Farm Bank Stabilization and Restoration Project, Mendocino County. Fish & Game #1 --Mendocino Project consists of three encroachments that involve the placement of rock slop protection (RSP) and native riparian vegetation restoration on the banks of Robinson Creek in the Navarro River watershed.	<b>NOE</b>	
2008108397	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0221, Bulwinkle Creek Culvert Replacement Project, Humboldt County Fish & Game #1 --Humboldt Replace a 24-inch culvert with an 8-foot wide, 5-feet high, and 24-feet long pre-cast reinforced concrete box culvert.	<b>NOE</b>	
2008108398	Issuance of Lake or Streambed Alteration Agreement No. R1-07-0632, Janes Creek High Flow Channel Project, Humboldt County Fish & Game #1 --Humboldt Install a log and boulder deflector structure and excavate an 18-inch wide and approximately 50 feet long high flow channel.	<b>NOE</b>	
2008108399	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0163, Powers Creek Streambank Protection Project, Humboldt County Fish & Game #1 --Humboldt Remove a failing 120-foot long tire and tin sheet retaining wall, and construct a 120-foot long rock armored streambank. Two boulder deflectors or large woody debris (LWD) structures will be placed within the newly constructed streambank.	<b>NOE</b>	
2008108400	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0522, Pilot Test for Salt Rive Ecosystem Restoration Project, Humboldt County Fish & Game #1 --Humboldt Remove sediment to test bulk properties at three locations along the Salt River. Sediment removal will impact a total of approximately 900 square feet of streambank.	<b>NOE</b>	
2008108401	Drilling Trinity River Bridge Caltrans #2 --Trinity Caltrans proposes to conduct drilling at the Trinity River Bridge (bridge number 05-0028). A planning study has been prepared that identifies constructing outrigger piers to mitigate for future scour. It is proposed that the structure be supported on pile foundations at the supports. The purpose of the drilling is to generate subsurface geotechnical data essential for the design of the proposed bridge retrofit. The borings will consist of 94-mm diameter, vertical mud rotary soil borings located in or around the vicinity of the proposed supports of the retrofit for the bridge. Phase 1 of the drilled four boreholes from the bridge deck. Phase 2 drilling-the boreholes will be drilled at the ground level under, in the channel, and under the bridge for the east outriggers at Pier 3 and Pier 4. Track, rubber tired, truck or trailer mounted drill rigs will be used to drill the boring. All of the borings are estimated to be 150 feet in depth. A tender truck carrying water and other drilling supplies will accompany the drill rig. Water will either be transported to the site or obtained onsite from the Trinity River. The drilling fluid is a mixture of either	<b>NOE</b>

<b><u>Documents Received on Monday, October 27, 2008</u></b>			
	bentonite or polymer and water; the fluid is circulated through the boring via a closed system. Drilling fluid and cuttings will be stored in barrels and disposed of at an approved waste site when the investigations completed. Permits will be needed from the California Department of Fish and Game (Section 1602 Agreement), North Coast Regional Water Quality Control Board (401 Certification), and U.S. Army Corps of Engineers (NWP 6 Authorization). In addition, the USDA Forest Service, Shasta-Trinity National Forest has provided approval for the drilling and access on lands under their jurisdiction. The time duration of the Phase 2 fieldwork is estimated to be 2 to 4 week to complete the proposed borings.		
2008108402	Sacramento River Bridge Foundation Caltrans #2 --Shasta The Sacramento River Bridge foundation (spread footings built on bedrock) on State Route 273 in Shasta County in Redding may have scour problems or may need additional support due to tension demands. This bridge (#06-0014) is fracture critical and has a sufficiency rating of 66 (relatively low, Federal Standards). This 73-year old bridge (constructed 1935; widened 1961) has minor structural steel cracks and most steel elements exhibit chalky or dirt paint with occasional speckles of rust. The purpose of the project is to establish if there are foundation problems. To do this, foundation borings are required. Caltrans purposes to drill four borings through the deck to minimize environmental impacts. The foundation borings could be from 50 to 100 feet deep. Depending on the type of material encountered and availability of an additional drilling rig, the work could take up to a month.	<b>NOE</b>	
2008108403	Desalination Plant Seawater Intake Evalutation Santa Cruz, City of --Santa Cruz In March 2008, the City of Santa Cruz installed and began operation of a pilot desalination treatment plant on a portion of property owned by the University of California Santa Cruz at its Marine Science Campus. The purpose of this "pilot project" is to gather sufficient information to establish the optimal design and operating parameters for the most cost effective treatment process in terms of treated water quality, operational reliability, and cost for the future construction and operation of a 2.5 mgd seawater desalination plant as proposed in the City's adopted Integrated Water Plan and Urban Water Management Plan.	<b>NOE</b>	
2008108407	Vallejo Home Grape Arbor Removal Parks and Recreation, Department of --Sonoma Remove existing non-historic grape vine and dilapidated arbor between Vallejo Home and Chinese Kitchen to protect public health and safety and increase accessibility. Existing post holes will be covered with matching red brick.	<b>NOE</b>

2008101141	<p>104,555 residential units, 257,541,661 square feet of non-residential development, and 326,123 jobs in the City.</p> <p>Enserv West, LLC Vernon, City of Maywood--Los Angeles Enserv West, LLC ("Enserv") has submitted an application for a conditional use permit to operate a medical waste transfer station and treatment facility located at 4726 Loma Vista Avenue. The proposed operation will consist of transferring and treating of medical waste from generators such as hospitals, medical clinics or other procedures of medical waste. The quantities generated by these establishments will range from a small container of needles and syringes a month to several tons daily from larger medical centers. The project proposed will treat the medical waste via steam sterilization also known as "autoclaving". The waste will be containerized, stored, transported and treated, all in accordance with California State Law. Medical waste types not treated onsite will be transferred to other authorized permitted facilities for disposal. Enserv is proposing to operate a one 8-hour shift five days per week. The project is subject to the California Environmental Quality Act (CEQA) because it requires discretionary approval. The proposed project is consistent with the City of Vernon Comprehensive Zoning Ordinance and the City of Vernon General Plan.</p>	<b>Neg</b>	11/26/2008
1998082030	<p>1996.222E San Francisco, City and County of San Bruno, Millbrae, Belmont, Woodside--San Mateo The San Francisco Public Utilities Commission with cost-share and technical support from the USFWS Partners for Fish &amp; Wildlife Program is proposing to enhance habitat for California red-legged frog (CRLF, <i>Rana aurora draytonii</i>) by removing sediment behind Dam # 2 on San Mateo Creek. The excavation will be conducted with a front end loader, excavator and dump truck. Dam #2 is one of two small diversion dams on San Mateo Creek above the Crystal Springs Reservoir in San Mateo Co. The entire San Mateo Creek watershed above Crystal Springs Reservoir is owned by the SFPUC. This watershed is within a California Fish and Game Wildlife Refuge and is mostly closed to public access. The California Dept. of Fish and Game is executing a Lake and Streambed Alteration Agreement No. 1600-2008-0460-3 pursuant to Sec. 1602 of the Fish and Game Code to the project Applicant, San Francisco Public Utilities Commission.</p>	<b>NOD</b>

2008108417	<p>Humboldt Co. DPW - Sediment Excavation Pilot Test for Salt River Ecosystem Restoration</p> <p>Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Ferndale--Humboldt</p> <p>The purpose of the project is to collect information on the properties of the aggraded sediment that will be removed in the future as part of the full-scale Salt River Ecosystem Restoration Project (SRERP). The Salt River is aggraded with sediment and colonizing vegetation, primarily willows. The SRERP is a larger project intended to restore the Salt River ecosystem which is currently impaired due to the excess sediment. Information gathered during this pilot study will be used to complete the planning and design of sediment removal and reuse activities for the SRERP project.</p> <p>The pilot test project involves removal of sediment and debris at three specific locations within the Salt River Channel. All three excavation areas are located within areas of the channel that are proposed for future excavation and restoration. Each excavation area will be approximately 30 feet long, 10 feet wide and 3.5 feet deep. A backhoe or excavator area will be used to remove approximately 40 cubic yards of sediment at each location. Excavated materials will be placed directly into a dump truck for transportation to the Riverside Ranch where it will be stockpiled in an upland area. The Riverside Ranch is currently owned by Western Rivers Conservancy but the property is being acquired by the California Department of Fish and Game as part of the SRERP.</p>	<b>NOE</b>	
2008108418	<p>SR 29 Spruce Grove Road Widening and Left Turn Channelization SAA</p> <p>1600-2008-0263-R2</p> <p>Fish &amp; Game #2</p> <p>--Lake</p> <p>Caltrans is proposing a project to improve traffic operations at the intersection of state Route (SR) 29 and Spruce Grove Road, located approximately 1.5 miles south of the town of Lower Lake (Post Mile (PM) 18.5 to 19.2). Southbound SR 29 will be asymmetrically widened to provide a dedicated left-turn lane onto Spruce Grove Road. The left-turn lane will be constructed for southbound SR 29 traffic onto eastbound Spruce Grove Road North. Widening will occur to the west of SR 29. No soil disturbance will occur to the east of SR 29, except for shoulder backing placed to match the new asphalt concrete (AC) overlay. The project will include the extension of two existing drainage systems to match the new width of the highway, street lighting, shoulder backing, and AC overall. A biofiltration swale (west of SR 29) and a biofiltration strip (east of SR 29) will also be constructed to treat storm water that sheet flows from the highway. Biofiltration swales are vegetated channels and biofiltration strips are broad vegetated surfaces. The purpose of the project is to reduce the frequency and severity of collisions that occur within the proposed project limits. Construction of the proposed project is anticipated to begin in June 2009, and to be completed in May 2010. The project is expected to</p>	<b>NOE</b>

2008101149	Pizzuto Minor Subdivision San Diego County Vista, San Marcos, Escondido--San Diego The project is a minor residential subdivision to divide 41.1 acre lot into 3 residential parcels. The project is located at 2755 Deer Springs Place in the Twin Oaks Valley Community Planning Area within the unincorporated area of San Diego Co. The site is subject to the General Plan Regional Category Estate Development Area (EDA), Land Use Designation (18) Multiple Rural Use. Zoning for the site is A70 (Limited Agriculture). The site is currently vacant. Access would be provided by a proposed private road easement connecting to Deer Springs Rd. The project would be served by septic and imported water from the Vallecitos Water District. Earthwork will consist of 26,000 cubic yards of material cut and fill of 32,000 cubic yards with 6,000 cubic yards of imported material.	<b>MND</b>	12/01/2008
2008101151	PA07-0151 (TPM 35879), PA07-0152 (Master PP), PA07-0153 (PP), PA07-0154 (PP), PA07-0155 (PP), PA07-0156 (PP), PA08-0057 (GPA) & P08-060 (SPA) Moreno Valley, City of Moreno Valley--Riverside The proposed project involves the grading, construction and operation of a 66.92 acre business park for light industrial and warehouse distribution uses. The business park would consist of four buildings totaling approx. 1,484,407sf. and ranging in size from 16,732sf (parcel 2) to approx. 1,103,003sf. (parcel 1). The remaining two buildings are proposed to be 87,429sf. (parcel 3) and 277,243sf (parcel 4) in size for a total site coverage of 50.92%. Implementation of the project requires adoption of General Plan Amendment (PA08-0057) to the Circulation Element and Specific Plan Amendment (P08-060). In addition, the following discretionary approvals are required; Plot Plan Review (PA07-0152,-3,-4, -5, -6); and Tentative Tract Map 35879 (PA07-0151). The proposed project includes construction of "A" Street, which would extend along the eastern boundary of the business park from the proposed extensions of Krameria St. and terminate in a cul-de-sac at the northeast corner of the site. Additionally, the project proposes construction of the east-west extension of Krameria St., between proposed "A" St.	<b>MND</b>	12/01/2008

	and Heacock Ave., which would bisect the business park. Access to the business park would be provided via a driveway on Heacock St., Iris St., Krameria St., and "A" St. A total of 699 automobile and truck and trailer parking spaces are proposed. The proposed business park would be unified by internal circulation, utilities, landscaping, and design elements in accordance with the specifications set forth in the Specific Plan Views of the business park from the surrounding roadways and adjacent land uses would be shielded through the use of a 9ft. tall screen walls.		
2008102102	Tahoe City Residential Erosion Control Project Placer County --Placer The project will reduce sediment load to Lake Tahoe by a number of methods, including, but not limited to 1. Infiltrating stormwater runoff higher in the watershed; and 2. Directing sediment rich runoff into infiltration basins. Infrastructure improvements will include, but are not limited to, DIs, sediment traps, rock lined channels, vegetated swales, infiltration structures, PCC curb and gutter, and small micro-basins located throughout the project.	<b>MND</b>	12/01/2008
2008102104	Souza Industrial Subdivision Newman, City of Newman--Stanislaus, Merced The proposed project is a 55-lot industrial subdivision on three parcels totaling 51.6 acres.	<b>MND</b>	12/01/2008
2008101147	Los Alamos Community Plan Update Santa Barbara County --Santa Barbara The Los Alamos Community Plan Update is an amendment to the 1994 Los Alamos Community Plan. The purpose of the proposed LACP Update Project is to modernize the goals and objectives in the LACP to reflect recently identified local preferences for land use in the planning area under overarching policies of the Santa Barbara County Comprehensive Plan consistent with State planning law.	<b>NOP</b>	12/01/2008
2008101152	Carter Estates Winery Resort-Spa Riverside County Temecula--Riverside The plot plan proposes to construct a winery resort and spa consisting of eighteen (18) buildings totaling 206,126 square feet on approximately 111 acres. Buildings 1 through 5 consist of a variety of uses and amenities such as retail shops, restaurants, and wine tasting rooms. Building 6 consists of the hotel and wedding chapel; the hotel will consist of 179 hotel rooms, meeting rooms, wedding chapel facilities, a pool area, storage facilities, and the resort's service corridor. Buildings 7 through 18 will be comprised of 39 guest suites or "casitas". Other amenities will consist of an amphitheater and a spa complex. Additionally, approximately 76 percent of the net project area will be planted in vineyards.	<b>NOP</b>	12/01/2008
2008101153	Playa Manchester Los Angeles, City of Los Angeles, City of--Los Angeles Decron Properties, Corp. ("the Applicant") proposes to develop a mixed-use project containing a total of 260 dwelling units, including 16 ground floor live/work units (the "Proposed Project"). The Proposed Project will be developed on a 3.03 acre site located at 7270 through 7298 W. Manchester Avenue and 8626 Rayford Drive in the Westchester-Playa del Rey Community Plan area (the "Project Site").	<b>NOP</b>	12/01/2008

<b><u>Documents Received on Thursday, October 30, 2008</u></b>			
	The Project Site is currently developed with 24,000 square feet of retail and office uses.		
	The Proposed Project will contain approximately 266,456 square feet of floor area and have a Floor Area Ratio of approximately 2.0:1. The Proposed Project will consist of a four-story building with one level of subterranean parking. The fourth floor residential units that face Manchester Avenue will include mezzanines above the top floor with private terraces. Each mezzanine will be a maximum of 500 square feet.		
2008101154	San Marino High School Pool Expansion San Marino Unified School District San Marino--Los Angeles The proposed project involves the expansion of the San Marino High School swimming pool. Three scenarios are currently being considered by the District: Scenario A would entail the expansion of the pool in its current location, and Scenario B and Scenario C would involve relocating the pool to the area of the basketball courts, and relocating the basketball courts to the areas of the pool and Michael White Adobe. The proposed project would require the removal of the Michael White Adobe, a locally historic landmark. If technically and economically feasible, the building would be relocated. If it is determined that the relocation of the Adobe is infeasible, it would be demolished.	<b>NOP</b>	12/01/2008
2008102101	I-5 North Stockton Corridor Improvements Caltrans #6 Stockton--San Joaquin In the Central to North Stockton area widening is proposed to the I-5 freeway on the inside median increasing the freeway geometry from 6 to 8 lanes between Country Club Boulevard and the proposed North Gateway Boulevard interchange. Inside widening would accommodate mixed flow lanes (Alternative 1) or HOV lanes (Alternative 2). If alternative 2 is selected the existing inside lane would be converted to an HOV lane between Charter Way and County Club Boulevard. Improvements to four interchanges are also proposed including Hammer Lane (existing), Otto Drive (proposed), Eight Mile Road (existing), and North Gateway Boulevard (proposed). Between interchanges auxiliary lanes are also proposed to the outside of the mainline. In selected locations noise barriers are proposed as a project feature.	<b>NOP</b>	12/01/2008
2008102103	Livermore Municipal Airport Rezoning Project Livermore, City of Livermore--Alameda Rezoning a 395 acre portion of the Livermore Municipal Airport (643 acres total) to proposed Airport Zoning District which includes two subdistricts: Airport Operations and Airport Service. The rezoning would limit development to intensities identified in the current Airport Master Plan.	<b>NOP</b>	12/01/2008
2008101150	Case No. LU06-0011 Ventura County Santa Paula--Ventura Request to upgrade the existing waste water treatment plant. The site has an existing office and storage structure. The applicant proposes to change the operations from open aeration tanks to a closed vessel system.	<b>Neg</b>	12/02/2008

2008101155	Well No. 9 and Arsenic Treatment Project Mojave Public Utility District Tehachapi, Mojave--Kern The work involves construction of a new replacement water well (Well No. 9) with an integrated arsenic treatment process. Also, the existing 8-in. transmission pipeline that joins the existing Well No. 7 and No. 8 to new Well No. 9 will be replaced. The pipeline will include one (1) encased crossing beneath the Union Pacific Railroad tracks. The new Well No. 9 will supply groundwater to residents within the Mojave Public Utility District service area. The project includes, but is not limited to one (1) new water well, necessary electrical equipment, necessary instrumentation equipment, water transmission pipeline, one (1) encased railroad track crossing and other appurtenances. Except the new encased railroad track crossing, all project improvements will be constructed on existing District property.	<b>Neg</b>	12/01/2008
2008101156	WWTO Bufkin Reclamation Kerman, City of Kerman--Fresno The proposed project consists of delivering un-disinfected secondary treated effluent for the purpose of flood irrigation 60+ acres of fodder (alfalfa) crop. The effluent will be delivered to the user (Bufkin) property directly from the City of Kerman Wasterwater Treatment Plant percolation ponds by way of a portable irrigation pump, a new standpipe, and existing irrigation piping network already used to irrigate the crop.	<b>Neg</b>	12/01/2008
2004051023	Upper Santa Ana River Wash Land Management and Habitat Conservation Plan San Bernardino Valley Water Conservation District Highland, Redlands--San Bernardino The Upper Santa Ana River Wash Land Management and Habitat Conservation Plan is a multifaceted, multi-agency, and multi-property owner project that provides for the coordination and accommodation of existing and anticipated future activities on the project site.	<b>Oth</b>	
1991063074	LITTLE CHICO CREEK BICYCLE PATH Chico, City of CHICO--BUTTE The CA Dept. of Fish and Game is executing Lake or Streambed Alteration Agreement No. 1600-2008-0257-R2, pursuant to Sec. 1602 of the Fish and Game Code to the project applicant, City of Chico - Capital Project Services Dept. The proposed path would extend from an existing bicycle path into the Caltrans right-of-way, over Little Chico Creek, and continue south into E. 20th St. Community Park. No construction activities would occur within the streambed or channel of Little Chico Creek. The existing bike path that parallels the creek would serve as a buffer between proposed project improvements north of the creek and the streambed. The proposed clear-span bridge would extend 130 ft. between two abutments placed on the north and south sides of the creek, outside of the ordinary high watermark and stream channel. Installation of the clear-span bridge would require trimming of vegetation within the creek channel for safety and clearance; however, this vegetation would not be removed.	<b>NOD</b>

2008108426	<p>Adoption of Resolution Approving an Amendment to Coachella Valley Portion of Transportation Expenditure Plan and Retail Transaction and Use Tax Ordinance No. 88 Desert Hot Springs, City of Palm Springs, Indio--Riverside</p> <p>The Riverside County Transportation Commission Transportation ("RCTC") Expenditure Plan and Retail Transaction and Use Tax Ordinance No. 88-1 (the "Plan") was approved by 78.9 percent of the voters in Riverside County in 1988. The purpose of this Plan is to relieve traffic congestion, increase safety, improve air quality, and provide funding for essential countrywide transportation improvements. The Plan listed the locations of anticipated improvements in Riverside County, including the Coachella Valley area. Due to unanticipated realignment in roadways and the relinquishment of State control over other roadways and highways in Coachella Valley, the Plan must now be amended to reflect current conditions and specify the current roadway segments which are eligible for funding. The resolution approving an amendment to the Plan adopted by the City on October 21, 2008 does not approve the construction of any transportation improvement, but instead approves an amendment to the Plan in order to make funding available for the planning and environmental review of future transportation improvements. The beneficiaries of these improvements include the residents of Riverside County, particularly those of the Coachella Valley area.</p>	<b>NOE</b>	
2008108427	<p>Native Plant Restoration Parks and Recreation, Department of --Monterey</p> <p>Restore approximately five acres of Carmel River State Beach by planting native plant species where non-native plant species have been previously removed. Grow seeds collected from native shrub, grass, and forb species within the park and install native plants in the restoration areas during the rainy season. Holes approximately 6 inches deep by 3 inches wide will be hand dug and immediately</p>	<b>NOE</b>

	Development Review Permit (DR 06-012) for a project exceeding 7,500 square feet of floor area; Design Compatibility Permit (DCP 06-008) for a condominium use in the M-1 District; Tentative Tract Map (TM06-027) for the air rights subdivision to create 66 condominium units.		
2008101159	Woodlake General Plan, 2008-2028 Woodlake, City of Woodlake--Tulare The "planning area" is the land within Woodlake's sphere of influence (SOI) line, containing 3,707 acres; urban development boundary (UDB) line, containing 2,552 acres, and its city limits, containing approx. 1,689 acres. In order to determine the amount of land needed for urban development in Woodlake over the next 20 years, 2008 to 2028, population projections and land use demand projections were prepared. Two population projections (low and high) were used in the General Plan. These population figures are projections from the base year of 2007, provided by the U.S. Census Bureau. The Plan's "low" population projection is based on Woodlake's growth rate from 1990 to 2000 (1.59 percent) and its "high" population projection is based on its growth rate from 1980 to 2000 (2.15 percent). Both of these growth rates are based on the U.S. Census Bureau figures.	<b>EIR</b>	12/19/2008
2006112153	Aegis Senior Living Continuing Care Retirement Community - Fountaingrove Lodge Project Santa Rosa, City of Santa Rosa--Sonoma The Aegis Senior Living Continuing Care Retirement Community Fountaingrove Lodge Project (Project), formerly known as Oaks 4 and 5, is a proposed community care facility located in the City of Santa Rosa (City), in central Sonoma County, California. The Project is located within incorporated northeast Santa Rosa at 4110 and 4210 Thomas Lake Harris Drive. The 9.85 acre Project area currently consists of undeveloped land. The Proposed Project would create a total of 136 community care units and 12 residential units to be used for employee housing. The applicant has indicated that the facility will be marketed to the gay, lesbian, bisexual, and transgender community.	<b>FIN</b>	11/13/2008
2008021107	GPA 07-01/ZTA 07-02/ZC 07-01/LCPA 07-01 34202 Del Obispo (Makar Properties) Dana Point, City of Dana Point--Orange Makar Properties, LLC, is proposing to amend the land use and zoning designations of the subject site from "Dana Point Specific Plan - Coastal Recreation Space" to "Commercial/Residential" to the General Plan designation of "Residential/Commercial" and the zoning designation of "Residential/Commercial-22." The proposed project also entails addition of a new land use category "Residential/Commercial" in the Land Use Element of the General Plan and a new zoning category "Residential/Commercial-22" in the Zoning ordinance. Additionally, a Local Coastal Program Amendment (LCPA07-01), is also required for amendments to the General Plan and the Zoning Ordinance and also since the subject site is located within the Coastal Overlay District.	<b>MND</b>	12/01/2008

	<p>Safety. The Housing Element was prepared separately in 2004 and is not required to be updated until 2009. The City of Mendota is situated in the central portion of the San Joaquin Valley, in northwestern Fresno County near the confluence of the San Joaquin River and the Fresno Slough. State Routes (SR) 33 and 180 also intersect in Mendota. The main transportation route between northern and southern California, Interstate 5, is located about 15 miles west of Mendota. The City is approximately ten miles southeast of the City of Firebaugh and 35 miles west of the City of Fresno. An NOP and an EIR for the GP was published in January 2007. Since that time, several modifications to the existing boundaries (through subsequent annexation) and the proposed Planning Boundaries have resulted in changes to the Planning Area and proposed Land Use Diagram. Therefore, the City determined that a new NOP is warranted.</p>		
2008102108	<p>City of Santa Cruz Sphere of Influence Amendment Santa Cruz, City of Santa Cruz--Santa Cruz</p> <p>The proposed project consist of an application to the Santa Cruz Local Agency Formation Commission (LAFCO) to amend the City of Santa Cruz's Sphere of Influence (SOI) to include the 174-acre portion of the UCSC campus for the purpose of providing extraterritorial water and sewer services.</p>	<b>NOP</b>	12/01/2008
2008102109	<p>Big Wave Wellness Center and Office Park San Mateo County Half Moon Bay--San Mateo</p> <p>An economically and environmentally sustainable community development that provides housing and employment opportunities for low-income developmentally dissable (DD) children and adults. The two primary components include a Wellness Center and Office park. In addition to these primary components the project includes: development of a 1.6 acre train system, resoration of wetland habitat(9.7 acres) us of sustainable on-site farming, a native plant nursery, recycling and composting, dog walking and grooming services, bus stops and shuttle service, solar cels for heating/energy, natural gas/biodiesel generator, wind turbines, geothermal cooling systems, bio-diesel filing stations, rain garden infiltration/treatment ponds and other sustainable development components.</p>	<b>NOP</b>	12/01/2008
2008101157	<p>Local Locket Conditional Use Permit ED08-107 San Luis Obispo County Paso Robles--San Luis Obispo</p> <p>Request by Ms. Vickie Luna for a Conditional Use Permit to allow the phased development of a storage facility including: Seven 2,842 square feet commercial buildings, a two story building consisting of a 2,842 square feet office on the first floor and a 1,158 square feet caretaker unit above, 34 parking spaces, 5000 gallon water tank, on-site septic system, and landscaping. This project will replace existing temporary storage containers in three phases. The first phase will consist of moving approximately one half of the storage containers to the other half of the property and construct first seven commercial buildings including an off site office and a care taker unit. The second phase will vacate the back portion of the property and add more buildings per market demand. The final phase includes removing all over aeas shipping container from the property and build out the rest of the buildings.</p>	<b>Neg</b>	12/03/2008

2008102106	John Trinkle Zone Reclassification San Joaquin County --San Joaquin Zone reclassification to reclassify 15 acres of a 20 acre parcel from AV-20 to R-R.	<b>Neg</b>	12/03/2008
2008102107	North Coast Partners, Inc. Minor Subdivision Humboldt County Eureka--Humboldt The project includes a minor subdivision to create two (2) parcels of 24,386sf. and 7,162sf. Each proposed parcel is currently developed with commercial operations, both of which are conditionally permitted in the Commercial General (CG) zoning district. Proposed parcel 1 is developed with an approx. 6,161sf. commercial structure occupied by Design Air Heating and Sheet Metal. Proposed parcel 2 is developed with an approx. 2,641sf. commercial structure occupied by the Crystal Springs Bottled Water Company, a pre-manufactured office and an approx. 350ft. deep artesian well and well house. Both commercial structures were constructed in 1961, prior to building permit or setback requirements. The office was permitted in 1988 and the bottling company was permitted in 1993. A variance is requested to allow for an exception to the rear yard setback for proposed parcel 2. The existing structure on proposed parcel 2 was constructed with a zero side yard setback in 1961. The parcel reconfiguration proposed with this subdivision will change the existing side yard to the rear yard where a 15ft. rear yard setback is required. The existing structure on proposed parcel 1 was also constructed with a zero side yard setback, a portion of which is adjacent to a residentially zoned trailer park. The portion of the side yard shared with the residentially zoned parcel requires a 20ft. setback by today's standards. The proposed subdivision will not increase the existing legal nonconformity to this requirement. The Special Permit is requested to waive the requirement of a loading space, per 313-109.1.5.2 of the Humboldt Co. Code on proposed parcel 2. Although there are no wetlands on the site, wetlands are present across Eich Rd. to the south and on an adjacent parcel fronting S. Broadway to the northeast. The project has been conditioned to require the construction of a storm water filtration system. Curb, gutter and sidewalk have already been developed along the frontage of the parcel in anticipation of this project. No trees are proposed to be removed for this project. No new development is proposed.	<b>Neg</b>	12/01/2008

2008108442	<p>Frenchman's Creek Water District Flashboard Dam Fish &amp; Game #3 Half Moon Bay--San Mateo</p> <p>The project involves the installation of a low-head step baffle fish ladder and protective fish screens on various bypass and other diversion inlet structures to an existing flashboard dam that is operated each summer in support of local irrigation of agricultural crops. The dam has a flashboard height of approximately 7.5 feet and a wing wall height of approximately 9.5 feet. When the flashboards are in place and impoundment occurs the resulting reservoir inundates an area of approximately 750-800 feet of stream channel. In order to avoid potential temporal and long term impacts to the natural resources of Frenchman's Creek, the Applicant has proposed several protective measures including: 1) installation of the fish ladder, 2) bypassing stream flow in support of aquatic resources downstream the dam and, 3) installation of the protective fish screens on the diversion inlet structures to avoid entrainment of fish and other aquatic species. The Department of Fish and Game is issuing Streambed Alteration Agreement Number 1600-2004-917-3 pursuant to Fish and Game Code Section 1602.</p>	<b>NOE</b>
