STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

October 16 – 31, 2016

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **October 16 – 31, 2016**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

2015062076	<p>Mosquito Road Bridge (#25C0061) over the South Fork of the Americal River Replacement Project El Dorado County --El Dorado</p> <p>The new proposed 3-span, likely cast in place, prestressed concrete box girder bridge is approximately 400 ft over the South Fork American River with a max span of approximately 550 feet. Substandard roadway approaches that currently restrict emergency vehicle access will be eliminated through the relocation of the new bridge. Departure from the existing roadway on the south involves approximately 575 of roadway approach to the nearly 1,200 ft long bridge along with a 300 foot northerly approach where the alignment converges back to the existing roadway. A more detailed description is provided in Chapter 2 of the Draft EIR.</p>	EIR	11/30/2016
2015092075	<p>Niles Canyon Safety Improvements Project Caltrans #4 Fremont--Alameda</p> <p>Caltrans proposes to construct multiple safety improvements at specific site locations along the SR 84 corridor between SR 238 (Mission Blvd) and the SR 84/I-680 Separation. The project alternative developed to meet the purpose and need of the project is the Build Alternative. Improvements of the Build Alternative include fixed object removal and relocation, the installation of rock drapery systems, limited shoulder widening, widening and barrier replacement on Alameda Creek Bridge and Overhead, and the signalization of the Pleasanton-Sunol Road / SR 84 intersection.</p>	EIR	11/30/2016
2015111077	<p>Rehabilitation of Western Regional Sewers, Project No. 3-64 Orange County Sanitation District Seal Beach, La Palma, Los Alamitos--Orange</p> <p>The Orange County Sanitation District is proposing to rehabilitate and/or replace entire lengths of the Orange Western Sub-Trunk, Los Alamitos Sub-trunk, Westside Relief Interceptor, and the Seal Beach Blvd interceptor. These sewer lines are located in the westernmost portion of the OCSD service area. Collectively, the sewer lines convey sewage flows from the cities of Anaheim, Buena Park, Cypress, Los Alamitos, La Palma, and Seal Beach and Rossmoor in unincorporated Orange County. The project also proposes complete replacement of the Westside Pump Station wet well and replacement or rehabilitation of the existing force main and odor control facilities.</p>	EIR	11/30/2016
2016104001	<p>Otay River Estuary Restoration Project U.S. Fish and Wildlife Service San Diego, Chula Vista, Imperial Beach--San Diego Note: Review Per Lead</p> <p>Restore coastal wetland and upland habitat (i.e., estuarine, intertidal, native upland) on 33.51 acres of primarily disturbed uplands at the west end of the Otay River floodplain, just to the south of San Diego Bay; and restore approximately 91 acres of an active solar salt pond (Pond 15) to tidally influenced subtidal and intertidal habitats. All restoration will occur on the San Diego Bay National Wildlife Refuge. The US Fish and Wildlife Service is the lead agency; the US Army Corps of Engineers is a Cooperating Agency. The project will also require State and local</p>	EIS	12/05/2016

2015102065	Will C. Wood High School Stadium Project Vacaville Unified School District Vacaville--Solano Upgrade of an existing track and field complex with a new multipurpose stadium and track complex at Will C. Wood High School. The stadium would include approximately 4,000 seat bleachers with a press-box, a variety of track and field event areas within and around the stadium, and support buildings. Field lights and related equipment would be installed at the stadium.	FIN	
2015072001	Main Gate Road and "C" Street Project (a.k.a. Hamilton Square) Novato, City of Novato--Marin Note: Revised The proposed project includes two key components: (1) site remediation and (2) site development. The remediation component will include excavation of soil impacted by the release of hazardous materials, post-excavation a total of 31 residential units in 8 three-story buildings and 1 two-story building. The project includes a large central common park space and small pavilion and parklet along the sidewalk on Main Gate Road. Additional front yards, upper-story balconies, and landscaped areas are provided. There are two vehicular entry points on "C" Street and one on Main Gate Road. Each unit is provided with two tuck-under parking spaces. There are 17 additional parking spaces along the internal alleyways.	MND	11/15/2016
2016101042	Avila Beach Drive Bridge Seismic Retrofit Project San Luis Obispo County --San Luis Obispo The County is proposing to seismically retrofit the existing bridge on Avila Beach Drive over San Luis Obispo Creek in the community of Avila Beach, in southwestern San Luis Obispo County. The bridge is located approximately .03-mile east of the intersection of Avila Beach Drive with Ana Bay Road, 0.12 mile west of the intersection of Avila Beach Drive with First St, and 2.2 miles due west of US Hwy 101. The proposed retrofit will increase the strength of the bridge at the hinges over two of the piers and at the abutments by replacing the existing cable restrainers and internal shear keys, which will more effectively transfer seismic loads through the expansion joints.	MND	11/15/2016
2016101043	McCoy Lateral Rehabilitation & Atwater Drain Bypass Merced Irrigation District Atwater--Merced Note: Review Per Lead The McCoy Lateral Rehabilitation project involves the enlargement of the McCoy Lateral and replacement of dilapidated lining along a portion of said lateral identified as a restrictive segment of the system. The project begins at the McCoy Lateral intersection with Weir Avenue and continues downstream for approximately 7,334 feet, terminating at the head of the McCoy Lateral "F". This project will include lining and rehabilitating the heads of two sub-laterals, the McCoy lateral "D" and "F". The Atwater Drain Bypass project includes re-directing the spills of the 1900 and Tin Flume Laterals to a new booster pump station. These captured spills will be boosted through approximately 3,600 linear feet of	MND	11/21/2016

	new pipeline to be connected to Deckert Lateral.		
2016102040	PA-1600026 (UP) San Joaquin County Stockton--San Joaquin A use permit application for the expansion of an existing 13,495 sf religious assembly facility from a maximum of 170 members to a max of 700 members to be completed in two phases over three years. Phase one includes the construction of a 23,700 sf multi-purpose assembly hall for educational programs and recreational activities, a 250 sf well house, a 600 sf structure to house the fire tanks, and conversion of an existing 6,150 sf agricultural building into a storage building. Phase two includes the construction of a 20,500 sf social hall with a kitchen, dining area, and retreat area. No additional members are proposed with phase two. (Use type: religious assembly - Regional)	MND	11/15/2016
2016101041	Cowan Heights Residential Development Project Orange County --Orange Project would include the development of 22 new detached single-family homes on an approx. 5.9 acre project site. The Applicant is proposing to demolish the existing structure (storage shed) located on the project site and construct 22 detached single-family homes at a density of approx. 3 units per acre. The project site conforms to the current General Plan designation of Suburban Residential; however a zone change would be required form Agricultural Residential to Planned Community or Planned Unit Development. The 22-single family units would be two stores in height and have an average lot size of 10,000 sq. ft.	NOP	11/15/2016
2016102042	Waterfowl, Coot, Moorhen, and Common Snipe Hunting Fish & Wildlife Commission -- Waterfowl, coot, moorhen and common snipe hunting, specifically a potential modification to the current hunting regulations which may include season and or bag limit changes and closed seasons.	NOP	11/15/2016
2006072023	Proposed Amendments to Sport Fishing Regulations Fish & Game Commission -- California Fish and Game Commission adoption of Inland Sport Fishing Regulations for California.	Neg	11/15/2016
2016102041	PA-1600103 (SA) San Joaquin County Lodi--San Joaquin A site approval application for an agricultural equipment sales and repair and custom agricultural manufacturing facility to be constructed in 3 phases over 10 years. Phase 1 to include the conversion of an existing 6,010 sf agricultural storage building into a 1,027 sf office and 4,983 sf shop, and the construction of 3 storage containers totaling 1,920 sf. Phase 2, with permits to be issued within 5 years, to include the construction of a 6,000 sf shop and storage building. Phase 3, with permits to be issued within 10 years to include the construction of a 6,000 sf shop building. A sign modification is also being requested pursuant to development title section 9-1710.4(j) to modify the sign face for a wall mounted sign from the permitted maximum 50 sf to 120 sf. 2010061062	<p>Salton Sea Species Conservation Habitat Project Resources Agency, The Westmorland--Imperial CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0141-R6, pursuant to section 1602 of the Fish and Game Code to the project applicant, DWR. Project is limited to the construction of three pond units (East New, West New, and Far West New) that will impound saline water at a shallow depth within the project site, the development of associated water delivery systems, and associated electrical power infrastructure development to provide power for the water pumps. the project will restore piscivorous bird habitat within an area of currently exposed and dry playa area to offset the loss of habitat of this type that is occurring as the Salton Sea recedes and concurrently increases in salinity.</p>	NOD	
2014032087	<p>Martis Valley West Parcel Specific Plan Project Placer County --Placer, Nevada Various discretionary entitlements to transfer 760 residential units and 6.6 acres of commercial from the designated development of 1,360 residential units and 6.6 acres of commercial on the East Parcel (under the existing Martis Valley Community Plan) to the West Parcel. A portion of the West Parcel (662 acres) would be rezoned from Timberland Production Zone (TPZ) to Residential, allowing for the development of residential units and associated commercial, homeowner amenities, and small community retail uses. The remaining 390 acres of the West Parcel would remain designated Forest and would be zoned TPZ. The Specific Plan would provide a comprehensive set of goals and policies, project objectives and implementation measures to guide the development of the West Parcel, and establish Development Standards for parcel layout, buildings, and facilities, as well as Design Guidelines for architecture, landscaping, and other project elements. A component of the MVWSP is the conversation of the East Parcel. The MVWSP proposes the permanent retirement of 600 allowable units and redesignation of the 670 acres of the East Parcel currently zoned for development to Forest. The mechanism for preserving the East Parcel would consist of either (1) sale of the East Parcel to a land trust or similar organization, or (2) recordation of a conversation easement restricting use of the East Parcel.</p>	NOD	
2014061049	<p>Aera Energy LLC T11-Block 12 Development Project Fish & Wildlife #4 --Kern The proposed Project amends the Incidental Take Permit to allow final placement of well pads to be determined prior to construction and based on the results of preconstruction surveys for Covered Species to further minimize impacts to Covered Species. The Project includes an extension of the existing Division of Oil, Gas and Geothermal Resources Designated South Belridge Oil Field which would include the development of 67 wells (43 oil producers and 24 stream injectors) which are considered shallow in nature. The wells, associated access roads, pipeways, and associated supporting infrastructure will result in the take of species listed by the State as threatened or endangered, pursuant to Fish and Game Code Section 2081 and as such CDFW is a responsible agency under CEQA with respect to the Project. The project will result in permanent and temporary impacts to 32 acres of giant kangaroo rat (<i>Dipodomys ingens</i>), San Joaquin antelope squirrel (<i>Ammonspermophilus nelsoni</i>), and San Joaquin kit fox (<i>Vulpes macrotis mutica</i>).</p>	NOD

	The project is expected to result in incidental take of giant kangaroo rat, San Joaquin antelope squirrel, and San Joaquin kit fox, which are designated as threatened and endangered species under the CESA. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as result of Project implementation.		
2014101061	Mariposa Public Utility District Wastewater Treatment Facility Improvements Mariposa Public Utilities District --Mariposa The existing Waste water Treatment Facility (WWTF) was constructed in 1984. The WWTF consists of a head works structure including a communitor and partial flume flow monitoring, two oxidation ditches, two secondary clarifier's, flow proportional chlorine gas injection, chlorine contact tank and flow proportional sulfur dioxide feed for dechlorination. The facility provides secondary treatment, disinfection and dechlorination before discharge to Mariposa Creek.	NOD	
2015022026	The Park at Granite Bay (PSUB 20140145) Placer County Roseville--Placer The project proposes a residential subdivision of 56 single-family residential units on a 16.3-acre project site.	NOD	
2015122027	Garden Bar Road at Sanford Ranch, Bridge Widening Project Nevada County --Nevada The Nevada County Department of Public Works, in corporation with Caltrans, is proposing to widen the one lane Garden Bar Road Bridge (Bridge # 17C-0074) at Sanford Ranch over the Little Wolf Creek with a wider steel girder bridge. The proposed bridge project will widen the existing structure form 14 feet to 22 feet wide. Bridge railings will be mounted on the edge of deck. The bridge will continue to be supported by two concrete abutments and one pier that will remain in Little Wolf Creek. The roadway to the north of the bridge will be widened to allow for a larger radius curve to reduce the risk of collision with the bridge railings. This project is being funded with federal Highway Bridge Program (HBP) and County State Exchange funding.	NOD	
2016061036	Yada Family Farm Subdivision Carlsbad, City of Carlsbad--San Diego The Yada Family Farm Subdivision project is proposing to subdivide a 4.57 acre site into 12 single-family residential lots and a remainder lot for a project density of 2.8 dwelling units per acre. Lots 1-12 are newly proposed, while the thirteenth lot is identified on the map as "not a part" and is presently developed with an existing two-story single family home. Residential dwelling units on Lots 1-12 are not proposed as part of the subdivision, but in the future will include the development of 12 single family dwelling units and two (2) second dwelling units proposed on Lots 1 and 5 that will satisfy the project's inclusionary housing requirements. The proposed residential lots range in size from 9,500 sq. ft. to 15,720 sq. ft. Four (4) of the proposed single-family lots, including the existing single-family home will access the site form Buena Vista Way, while the remaining eight lots will access the site from Valley Street by way of a new public cul-de-sac street. The project includes demolition of small sheds and remnant greenhouse/shade structures associated with a former agricultural use. Project	NOD

	grading affects 3.48 acres of the site with grading quantities consisting of 38,900 cubic yards of remedial (removal & compaction), 5,890 cubic yards of cut and 5,890 cubic yards of fill. No import or export is proposed. The project proposes a volume of grading equal to 1,693 cubic yards per acre.		
2016082032	Sewer Replacement Project Weed, City of Weed--Siskiyou The project entails replacement of replacement of approximately 7,900 ft of old vitrified clay sewer main piping, as well as installation of new manholes and cleanouts. The purpose of the project is to eliminate sewer backups and provide improved access to sewers for operation and maintenance activities. A portion of the project site is encompassed by a hazardous materials site where ongoing groundwater monitoring and treatment has been occurring since the case for the site was opened in 2001.	NOD	
2016082059	Manzanita Drive Residence Oakland, City of Oakland--Alameda Construction of a new single family dwelling on a vacant lot requiring Regular Design Review to construct a new single family dwelling on a vacant lot; Minor Variance to allow the building to exceed the 18-foot height-limit above the edge of pavement height for down-sloping lots; and Minor CUP to allow a maximum building height of 34 feet 9 inches from the City of Oakland and an Incidental Take Permit (ITP) from the CDFW for approval of potential pruning of the roots of two pallid manzanita plants and pruning of one branch on one of the two plants.	NOD	
2016091022	Relocation and construction of school district central kitchen facility Anaheim Union High School District Anaheim--Orange The proposed project consists of the relocation of the District's central kitchen facility from the District office, located at 501 North Crescent Way, in the city of Anaheim, county of Orange, State of CA, to 2735 West Ball Rd, also in the city of Anaheim, adjacent to West Ball Rd to the south, between major cross streets of South Dale Ave to the west and South Magnolia Ave to the east, on the southeastern portion of the Dale Junior HS campus, on land currently used as a school athletic field, and the construction of the new central kitchen facility thereon. The project location is more particularly depicted on the site map. The new central kitchen will consist of a 40,000 sf, two story facility, with parking areas and a loading dock, and will have four primary components" 1) dry storage, 2) cold storage, 3) a production kitchen, and 4) offices and support facilities (e.g. small storage areas, restrooms, and a meeting room). When finished, the new facility will have the capability to produce up to 50,000 meals daily without further expansion, in contrast to the existing facility, which was designed to provide 7,000 meals per day, yet is currently serving over 30,000 meals on a daily basis.	NOD

	stored in the State Water Project's San Luis Reservoir. In exchange, the Westside Districts will deliver 2 acre-feet of water to Rosedale by July 1, 2017, for each acre foot delivered by Rosedale in 2016. The point of delivery for the water returned to Rosedale will be the Cross Valley Canal or any other mutually agreeable location, including a transfer of the Westside District's previously banked supplies in the Pioneer or Kern Water Bank Projects in Kern County. The return of water shall not require the Westside Districts to recover water from the groundwater basin.		
2016108180	Mistletoe Stream Maintenance (Lake or Streambed Alteration Agreement No. 1600-2016-0453-R1) Fish & Wildlife #1 Redding--Shasta The project is limited to the removal of dense stands of cattails from the stream channel which are constricting stream flow and causing localized flooding. Cattails are generally removed using bladed weed-eaters. In areas where mature trees do not prohibit access, heavy equipment, such as an excavator with a flail mover extension positioned at top-of-bank, may be used. In some instances an excavator bucket may be used to pull cattails out without disturbing the soil with the bucket.	NOE	
2016108181	Shasta College Stream Summit - Bioengineering Demonstration (Lake or Streambed Alteration No. 1600-2016-0503-R1) Fish & Wildlife #1 Redding--Shasta The project is limited to the treatment of up to 75 linear feet of eroding streambank along Stillwater Creek using vegetated mechanically stabilized earth lifts and brushlayering techniques.	NOE	
2016108182	Tideland Use and Occupancy Permit to Park 'N Fly for Parking Lots San Diego Unified Port District San Diego--San Diego The proposed project is a Tideland Use and Occupancy Permit (TUOP) to the PNF - SDP, LLC, dba Park 'N Fly, a Delaware Limited Liability Company (Tenant) for their use of four (4) existing parking lots. The project consists of four (4) existing parking lots, including approximately 58,621 square feet of land known as Lot 1 located at 1550 West Palm Street in the City of San Diego, California; approximately 104,830 square feet of land known as Lot 2 located at 2535 Pacific Highway San Diego, California; approximately 56,100 square feet of land known as Lot 5A combined with approximately 27,607 square feet of land known as Lot 5B located at 3275 Pacific Highway; and approximately 100,249 square feet of land known as Lot 3 located at 3125 Pacific Highway, all located in the City of San Diego. 2016108196	<p>Consideration of an Ordinance Amending Title 20 of the Municipal Code to Regulate the Personal, Medical, and Commercial use of Marijuana and to Repeal Chapter 9 Stanton, City of Stanton--Orange</p> <p>In January 2016, the city adopted ordinances to ban marijuana dispensaries, cultivation, and delivery services, as permitted by the MMR and Safety act of 2016 ("MMRSA"). On June 28, 2016, the Secretary of State Certified proposition 64, the control, regulate, and tax adult use of Marijuana Act for the November 8, 2016 ballot. The city council is now asked to consider an ordinance that amends the City's zoning ordinance contingent on AUMA's passage, to rescind the ban on all private residential cultivation to comply with the new state law allowing individuals to have six living marijuana plants and the marijuana produced by those plants in their homes.</p>	NOE	
2016108197	<p>Operation of Edinger Avenue Well and Associated Chlorine Gas Disinfection System State Water Resources Control Board Santa Ana--Orange</p> <p>SWRCB, as the responsible agency, will be issuing a water supply permit. The City of Tustin constructed an 860 feet deep, 1650 gallon per minute well, with a 450 Horse Power pump, to help improve groundwater production and reliability. In the process, the city of Tustin also constructed a 2,000 square foot building to the house the well and a chlorine gas disinfection treatment system. A waste water discharge system was also installed within the building and includes a flow meter, setting basin, sand separator, and air gap discharge to the storm drain. Two chlorine gas cylinders are housed on site as part of the disinfection system. A metering tube and ejector feeds the gas into a 1 inch PVC to create a chlorine situation. A caustic storage container and recirculation pump is also included as part of the system. The construction of the well and disinfection system was completed on October 1, 2016. This project will provide for the operation of the well and disinfection facilities.</p>	NOE

2016101048	Recycle City Solid Waste Facility Permit Revision Los Angeles County South Gate--Los Angeles Revision of an existing solid waste facility permit to add municipal solid waste processing. The existing permit allows processing of up to 3,000 tons per day of construction, demolition, and inert materials, including up to 500 TPD of green waste. The proposed revision still caps the processing at 3,000 TPD, however MSW will now be accepted at the facility in addition to CDI and green waste. To accommodate this change, a new building and subsurface load out tunnel will be constructed. All current and proposed waste operations would remain in the current 7-acre permitted area of the larger Recycle City Specific Plan. The site operates 24 hours per day and would continue to do so under the proposed revisions.	MND	11/16/2016
2016101044	Chappell Road Project Hollister, City of Hollister--San Benito The proposed project includes the following proposed actions: (1) expansion of the City's SOI over approximately 100.6 acres; (2) rezoning of three parcels to low density residential consistent with general plan designations; and (3) annexation of approximately 32.4 acres for those parcels. Parcel 1, 2 and 3 are proposed for near-term development, while the remaining parcels (parcels A through 1) would be annexed in phases based on the property owner's readiness. It is understood that future actions and detailed submittals for development of parcels A through 1 may require additional CEQA review.	NOP	11/16/2016
2016101049	Interstate 605 (I-605) Corridor Improvement Project Caltrans #7 Los Angeles, City of--Los Angeles The LA County Metropolitan Transportation Authority and the Caltrans District 7, in collaboration with the Gateway Cities Council of Governments and the San Gabriel Valley Council of Governments, are proposing improving on Interstate 605 between Interstate 10 and Interstate 105. In Governments, are proposing improvements on I-605 between I-10 and I-105 in addition to improving I-605, the proposed project includes related improvements on State Route 60 from Santa Anita Avenue to east of Turnbull Canyon Road on I-5 from Florence Avenue to Paramount Boulevard. Proposed improvements include reconfiguring the interchanges; adding mixed flow lanes and/or high occupancy vehicle lanes, and auxiliary lanes; or completing other modifications that would enhance freeway operations.	NOP	11/16/2016
2016101050	Los Angeles Trans-Pacific Telecommunications Cable Hub Los Angeles, City of Los Angeles, City of, El Segundo--Los Angeles The project consists of the installation and operation of up to four transpacific submarine cable systems, which would connect the US to various locations in Asia-Pacific, starting with Hong Kong. The terrestrial components of the project would include marine directional bores, beach manholes, buried conduit systems, fiber optic cables, ocean ground beds, and other ancillary components. All permanent project components would be installed below ground. The marine components of the project are comprised of the marine fiber optic cables and the marine portion of the directional bores. 2013031056	<p>Emerald Necklace Implementation Plan - Phase I Watershed Conservation Authority --Los Angeles</p> <p>The Emerald Necklace is a 17-mile interconnected network of bikeways, multi-use trails, parks, and greenways along the San Gabriel River and the Rio Hondo. The Emerald Necklace Implementation Plan Phase I includes sixteen projects that would close gaps in the trails network and increase access to people in the project area. The projects are located in four general areas along the Emerald Necklace which include the Quarry Clasp, Whittier Narrows, San Jose Creek, and Westside. The Quarry Clasp includes four projects (Projects 1-4) that would close the trail loop at the northern point of the necklace by connecting the San Gabriel River and the Rio Hondo. The Whittier Narrows area includes five projects (Projects 5-9) that would connect the Emerald Necklace Trail to the Whittier Narrows park resources at the southern side of the trail loop. These five projects would improve circulation in the Whittier Narrows area allowing access to pedestrians and bicyclists to all park areas currently inaccessible without a car. The San Jose Creek area would include two projects (projects 10 and 11) that would improve access to the Emerald Necklace for the communities on the east side of the San Gabriel River. The Westside area would include five projects (projects 12-16) that would create a continuous loop around the Emerald Necklace for equestrians and improved recreational potential for all user groups. Projects 12-16 would also improve access to the Emerald Necklace for the communities on the west side of the Rio Hondo.</p>	EIR	12/02/2016
2014092038	<p>VillaSport Athletic Club and Spa Roseville, City of Roseville--Placer</p> <p>The proposed project includes an approximately 88,000 sf building and an approximately 50,000 sf outdoor area. The proposed structure would be up to two stories in height. In addition to the building, the proposal includes a 433-space parking lot and landscaping. Indoor amenities would include swimming pools; whirlpools; a basketball court; exercise equipment; exercise studios; locker rooms; a spa; a cafe; and a kid's area with a basketball court, studios for skill-based classes, and play areas. Outdoor amenities would include an outdoor pool area with two swimming pools (one with 26 foot slides), whirlpools, an outdoor cafe, an outdoor play area with play structures, and an area for a potential future artificial turf field. The outdoor pool area would be surrounded by a fence and landscaping.</p>	EIR	12/02/2016
2015091003	<p>SunWest Project Los Angeles, City of Los Angeles, City of--Los Angeles</p> <p>The Project includes demolition of the existing 26,457 sf commercial/retail building on the Project site and development of the site with a mixed-use building, including 5 stories of residential apartments above a podium level, 33,980 sf of general commercial land uses (including 32,990 sf of ground-floor retail and a 990 sf leasing office), and two levels of subterranean parking. The Project includes 293 dwelling units - 105 studios, 110 1-bedroom units, and 78 2-bedroom units. Of the 293 dwelling units, 15 units would be very-low-income units. The maximum height of the building would reach approximately 80 feet.</p>	EIR	12/02/2016

2015112028	Laurel Place II Contra Costa County Concord--Contra Costa Rezone the property and subdivide the lot into 7 single family residential lots.	MND	11/17/2016
2016101051	Post Road Hydro-Pneumatic Booster Pump Station and Pipelines Eastern Municipal Water District Perris--Riverside Eastern Municipal Water District intends to install a pre-packaged hydro-pneumatic booster pump station, approximately 2,420 lineal feet of 18-in diameter steel supply pipeline, and approximately 3,000 lf of 8-inch diameter polyvinyl chloride transmission pipeline.	MND	11/17/2016
2016101052	May Flower and Live Oak Residential Project Los Angeles County Arcadia--Los Angeles The project is a proposal to develop fifteen unit residential townhouses on a 0.80-acre site located at 4332 E. Live Oak Avenue in the Mayflower Village neighborhood of unincorporated Los Angeles County.	MND	11/17/2016
2016102046	Carondelet Athletic Complex Walnut Creek, City of Walnut Creek--Contra Costa The applicant requests the following entitlements to allow demolition of 13 tennis courts and construction of a synthetic turf softball field and combination soccer and lacrosse field on a 6.33-acre site at 3737 Valley Vista Road: rezoning from P-D 1924 to a new planned development; design review; tree removal and dripline encroachment permit. The applicant, Carondelet high school, proposes to repurpose the existing outdoor recreation site as the Carondelet Athletic Complex to support high school athletic programs, which includes tennis, softball, soccer, lacrosse and aquatics.	MND	11/17/2016
2016102045	US 101 Managed Lanes Project Caltrans #4 --San Mateo, Santa Clara Caltrans in cooperation with the San Mateo County Transportation Authority and the City/County Association of Governments of San Mateo County, is considering improvements to US 101 in San Mateo County, including converting existing High Occupancy Vehicle lanes to Express Lanes between Whipple Avenue and Santa Clara County, and the addition of new Express Lanes on US 101 between Whipple Avenue to the I-380 interchange in San Mateo County. The project scope may include removing or replacing existing auxiliary lanes between interchanges, reconstructing ramp connections to US 101, and installing electronic toll collection infrastructure. The Express Lanes would allow HOV's to use the lane without paying a toll, and single occupant vehicles to use the lanes by paying a toll.	NOP	11/17/2016
2016102044	West of Galt General Plan Amendment Sacramento County Galt--Sacramento The proposed project is a county initiated general plan amendment which will add policy LU-80A allowing agricultural residential rezone applications to densities as high as AR-2 for properties within the project area. General plan LU-80A is proposed as follows: LU80A. Rezones proposed for properties located within the LU-80A policy area can be accepted and evaluated on a case by case basis as long as proposed densities maintain at least a two acre minimum lot size. 2004121049	<p>Crestline-Lake Arrowhead Water Agency and Lake Arrowhead Community Services District State Water Project Water Transfer and Infrastructure Improvements Project Crestline Lake Arrowhead Water Agency --San Bernardino</p> <p>In 2005, Lake Arrowhead Community Services District and Crestline-Lake Arrowhead Water Agency (CLAWA), as co-lead agencies, adopted MND for the State Water Project Water Transfer and Infrastructure Improvements Project. The Project included the one-time purchase of up to 10,000 acre-feet of State Water Project water by CLAWA from San Bernardino Valley Municipal Water District ("SBVMWD") for delivery to the District. The Project also included demolition of existing water storage tanks and associated structures, and facility improvements, including a new turnout, pipeline, and a one million gallon water storage tank. To facilitate the water transfer, the Project further included a 15-year agreement between the District and CLAWA to take delivery of the Purchased Water, in annual increments not to exceed 1,500 acre-feet, at CLAWA's State Water Project turnout in Lake Silverwood, and extension of the term as necessary until all of the water is delivered. The delivered Purchased Water would be taken from SBVMWD's Table A amount under the SWP. The Purchased Water would be used after treatment by CLAWA and delivery to the District. The District would pay CLAWA for the Purchased Water the District actually receives and for the use of CLAWA facilities the District actually utilizes. This Purchased Water was to be used by the District as a replacement water supply in lieu of water that otherwise would be withdrawn from Lake Arrowhead.</p> <p>The MND analyzed the purchase of up to 10,000 acre-feet of water from SBVMWD for the benefit of the District based on the non-binding Principles of Agreement for Crestline-Lake Arrowhead Water Agency to Purchase, Treat and Deliver Potable Water to Lake Arrowhead Community Services District approved by the District on June 22, 2004. The District subsequently requested that CLAWA only purchase up to 8,000 acre feet of water based on its predicted needs, as reflected in the Agreement and fully analyzed in the MND. After adjusting for storage and evaporative losses (5% of the water purchased), under the Agreement CLAWA would deliver 7,600 acre feet of water to the District. The District approved modifications to the Agreement to extend its term for an additional 15-year period in order to transfer the balance of the originally agreed upon 7,600 acre-feet of water to the District. The Project Changes do not include the construction of any facilities, as these have already been constructed as part of the Project and consists only of the extension of the time period within which the Purchased Water may be delivered by CLAWA to the District. The annual amount delivered would not exceed 1,500 acre-feet, as specified in the Agreement and analyzed in the MND, and would not exceed the previously agreed upon 7,600 total acre-feet of water.</p>	NOD	
2004122083	<p>Sherwin-Williams Development Project Emeryville, City of Emeryville--Alameda</p> <p>The proposed project consists of a General Plan Amendment, a Planned Unit Development (PUD) zoning designation, and a Preliminary Development Plan (PDP) that would allow the 10.05 acre project site to be divided into five development parcels that will accommodate up to 500 residential units; 74,000 sq. ft. of office space within the existing Building 1-31; a minimum of 2,000 sq. ft. and a maximum of 8,000 sq. ft. of ground floor retail/restaurant space; a 2,000 sq.</p>	NOD

2016108246	Metal Beam replacement at Post Mile 31.6 on State route 41 Caltrans #6 --Fresno The project would proposes to replace the existing metal beam guard railing and construct approximately 925-foot concrete barrier along the right shoulder of the southbound on-ramp to SR 41 from the existing beginning of metal beam guard rail on Friant Ave to the north end of Ness Ave in Fresno County.	NOE	
2016108247	Oceano Dunes - Oso Flaco Culvert Replacement Study Parks and Recreation, Department of --San Luis Obispo This project will provide geotechnical services to identify the soil conditions on Oso Flaco Rd, adjacent to the Oso Flaco Lagoon. The consultant will perform: 1. four exploratory borings using a truck mounted drill rig to depths up to 60 feet or refusal on bedrock, whichever is shallower, 2. obtain representative soil and rock samples from the test pits, 3. backfill the test pits with road base similar to existing requirements. Excavation will only occur in the existing road bed and will not disturb native vegetation on the site. No silt laden water will be allowed to enter Oso Flaco Lake. Appropriate sediment control will be in place for excavated material. Geotechnical investigation will occur outside the recognized breeding bird season. Activities will occur from September 15-February 15. All equipment on site will be free of leaks and in good operational condition.	NOE	
2016108248	San Fernando Valley Spineflower Experimental Habitat Manipulation and Seeding Project (Project) Fish & Wildlife (HQ) Environmental Services --Los Angeles CDFW is issuing a permit to Jodi McGraw pursuant to Fish and Game Code section 2081(a) for a project to examine factors that influence performance of San Fernando Valley spineflower individuals and populations, and evaluate San Fernando Valley spineflower seed application methods. The project includes manipulation of three factors that appear to influence San Fernando Valley spineflower distribution, abundance, and individual plant growth and reproduction: (1) soil compaction, (2) exotic plant abundance, and (3) soil moisture availability. These factors will be manipulated in a factorial design to examine how they reproduction. Experimental manipulations will be conducted at 10 sites that will be established in suitable San Fernando Valley spineflower habitat. Within each of the 10 blocks, 8 plots will be randomly located to receive broadcast seed to test the effects of the three habitat treatments. In the five blocks located more than 1,000 ft from existing San Fernando Valley spineflower populations, two additional plots will be established to receive translocated salvaged topsoil containing San Fernando Valley spineflower seedbank to compare this method to the broadcast seeding method used in the other eight plots. One control plot will also be located in each block. A max of 500 San Fernando Valley spineflower plants will be collected from the study and control plots at the end of the first growing season to assess biomass, flower production, fruit production, and seed viability. The harvested plants will be air dried and stored in a lab at the permittee's residence for additional examination, if needed. Monitoring will be conducted for a min of two years. The manipulation study will be completed by November 30, 2018. Dried specimens of San Fernando Valley spineflower will be stored in the lab until the permit expires on December 31, 2021. Any dried specimens remaining when the permit expires will be destroyed.	NOE

2016101056	Leonard Avenue Bridge Replacement Project Clovis, City of Clovis--Fresno The City proposes to replace the existing two lane bridge on Leonard Avenue over the Enterprise canal with a new three box culvert bridge that can accommodate two traffic lanes in each direction, sidewalks and bike lanes on both sides, and a median island. The proposed new bridge will approximately 115 feet long; and, including project related improvements, the new bridge will be approximately 150 feet wide. Small areas of property acquisition on the northeast, northwest, southwest and southeast corners of the bridge will be a part of the project. After project completion, there will still be one traffic lane in each direction on Leonard Avenue north of the bridge; and south of the bridge on Leonard Avenue there will be two traffic lanes in each direction that taper to one lane near the bridge.	CON	11/04/2016
2016102048	Old Alturas Road and Churn Cr Bridge Rehabilitation Project Redding, City of Redding--Shasta The city is proposing to rehabilitate and widen the Churn Cr bridge on Old Alturas Rd. Rehabilitation includes widening the bridge deck, pier walls, and abutments. The new roadway design includes two 12 ft lanes, a 14 ft wide center turn lane, 8 ft	MND	11/18/2016

	wide paved shoulders, and 6 ft wide sidewalks separated by a concrete barrier. Construction is proposed to begin in Summer 2018.		
2016102049	Hayward High School Measure L Bond Program Hayward Unified School District Hayward--Alameda HUSD is proposing to use Measure L Bond Program monies to fund two improvement projects at Tennyson High School: 1) modernization of school's athletic field/stadium, including new surface materials, PA/lighting systems, walkways, bleachers and other support components; and 2) construction of a new 22,046 sf STEAM building located on the school's existing recreational hardcourts. These two components comprise the proposed project, which would take place entirely within the existing school boundary and would not increase the student capacity of the school.	MND	11/18/2016
2016102050	Tennyson High School Measure L Bond Program Hayward Unified School District Hayward--Alameda HUSD is proposing to use Measure L Bond Program monies to fund two improvement projects at Tennyson High School: 1) modernization of school's athletic field/stadium, including new surface materials, PA/lighting systems, walkways, bleachers and other support components; and 2) construction of a new 22,046 sf STEAM building located on the school's existing recreational hardcourts. These two components comprise the proposed project, which would take place entirely within the existing school boundary and would not increase the student capacity of the school.	MND	11/18/2016
2016102051	Mt. Eden High School Measure L Bond Program Hayward Unified School District Hayward--Alameda HUSD is proposing to use Measure L Bond Program monies to fund three improvement projects at Mt. Eden High School: 1) modernization of school's athletic field/stadium, including new surface materials, PA/lighting systems, walkways, bleachers and other support components; and 2) construction of a new 22,046 sf STEAM building located on the school's existing tennis courts; and 3) construction of a new, approximately 30,000 sf performing arts center to be located on a portion of the school's existing student parking lot. These three components comprise the proposed project, which would take place entirely within the existing school boundary and would not increase the student capacity of the school.	MND	11/18/2016
2016101055	Climate Action Plan and General Plan Amendment San Diego County --San Diego The project is the development of a Climate Action Plan (CAP) that will include measures and actions to reduce greenhouse gas (GHG) emissions from the unincorporated County in proportion to the State's emission reduction goals. The EIR will provide a program-level analysis of the CAP and its actions. It will also be prepared as a Supplement to the 2011 General Plan Update (GPU) Program EIR to evaluate proposed amendments to General Plan Goal COS-20 and Policy COS-20.1, and proposed adoption of new or revised mitigation measure(s) related to the CAP and GHG emission reduction targets (2011 GPU Program EIR Mitigation Measures CC-1.2, CC-1.7, and CC-1.8). 2016101054	City of Long Beach Bicycle Master Plan Long Beach, City of Long Beach--Los Angeles The proposed 2016 updated Bicycle Master Plan identifies potential projects to improve bicycle transportation throughout Long Beach. Those projects described under the bicycle network improvements will require a separate environmental review and are not part of this environmental analysis. It is only through subsequent approval of any of these facilities that there could be physical change and consequent environmental effect. As such, the bicycle network improvements are a citywide expression of the goals and objectives of the proposed updated plan.	Neg	11/18/2016
2007012002	SFPUC Lower Crystal Springs Dam Improvement Project San Francisco, City and County of Hillsborough--San Mateo Project is limited to the repair of a failed restoration project below the dam in San Mateo Creek which has led to concerns of fish stranding in the stilling basin in uninhabitable conditions. A channel will be constructed through an existing riparian/emergent wetland restoration area below the base of the dam to permanently hydraulically connect and provide fish passage from the stilling basin at the base of the dam to a pool approx. 300 feet downstream. The channel will be excavated through existing riprap and the riparian wetland restoration area and will provide almost five feet of water during flows between 3 and 17 cubic feet per second. Other activities include installing two piezometers at the base of the dam, removing the existing riprap dissipation structure at the pool to install a new low flow discharge pipe, reconstructing the dissipation structure and planting the edges and banks of the creek with native vegetation. The CDFW is executing Lake and Streambed Alteration Agreement No. 1600-2015-0444-R3 pursuant to section 1602 of the Fish and Game Code to the project Applicant, San Francisco Public Utilities Commission.	NOD	
2008022054	Crystal Springs/San Andreas Transmission Upgrade Project San Francisco, City and County of Millbrae, Hillsborough, Burlingame--San Mateo In connection with approval of the project identified above, the SFPUC required compensatory habitat mitigation to address biological resources impacts that would result from implementation of the projects. Three habitat compensation sites, known as Homestead Pond, San Andreas Reservoir Wetlands, and Adobe Gulch Grasslands which are located within S.F. Peninsula Watershed lands that are owned by the City and County of San Francisco but managed by the SFPUC, will provide mitigation for certain of these impacts: On September 13, 2011, the SFPUC adopted Resolution No. 11-0156, authorizing the General Manager of the SFPUC to negotiate and enter into Water System Improvement Program (WSIP) funded Contract No. WD-2641R, Habitat Reserve Program, Homestead pond, San Andreas Reservoir Wetlands, and Adobo Gulch Grasslands, and upon successful negotiations, approve the plans and specifications for these three habitat	NOD

2008064007	San Onofre Landfill Permitted Increase in Daily Tonnage and Traffic U.S. Marine Corp --San Diego Updated the remaining site capacity from 1,244,986 cubic yard to 1,064,500 cubic yards and update the estimated closure date from May 2052 to May 2045. In addition, the place waste density changed from 1200 to 800 pounds of waste per cubic yard, and incorporate the updated Joint Technical Document, dated May 2016. There will be no expansion in the design or operation of the facility.	NOD	
2015062093	Algerine - Wards Ferry Road Bridge Replacement Project Tuolumne County Sonora--Tuolumne The Algerine-Wards Ferry Road Bridge (No. 32C0042) in Tuolumne County is proposed for replacement. The existing bridge is on the Eligible Bridge List (EBL) with Caltrans, Structure and Maintenance and Investigations Division due to the weakening of the reinforced concrete girders and efflorescence in the girders and abutments. The replacement bridge would be a one span, reinforced concrete slab bridge that provides the public with a safe way to travel on Algerine-Wards Ferry Road across Blanket Creek.	NOD	
2016022066	Menlo Park Small High School Project Sequoia Union High School District Menlo Park--San Mateo The SUHSD is proposing to construct and operate a small, three story high school facility with capacity to accommodate up to approximately 400 high school students and 35 faculty and staff. The proposed project would support high quality education and avoid overcrowding at SUHSD schools, particularly in the southern part of the district. The SUHSD would open the new school in time for the 2018-2019 school year. The proposed project would involve the following components: removal of existing site facilities (approximately 40,000 sf warehouse with associated parking and landscaping) and construction of a new high school, operation of the new high school, and a potential partnership with the San Mateo County Community College District. The proposed school would operate on a traditional schedule.	NOD	
2016052002	Dredging at Lagoon Intake Structure Project (CIP 301-629) Foster City Foster City--San Mateo The project proposes dredging of the Foster City Lagoon western intake channel to restore normal functioning of the intake channel and intake structure through the removal of sediment which has built up in the channel over time. Dredge material will be disposed of at one of five locations identified in the initial study. The project site is located within Angelo Slough west of Sea Cloud Park in Foster City, San Mateo County, and west of Angelo Slough adjacent to Sea Cloud Park.	NOD

	Combining) under Title 17 of the Tuolumne County Ordinance Code.		
2016082079	<p>Kirker Pass Northbound Truck Climbing Lane Contra Costa County Concord--Contra Costa</p> <p>The Contra Costa County Public Works Department (PWD) proposes to provide a truck climbing lane along Kirker Pass Road between Clearbrook Drive in the City of Concord and the northernmost Hess Road intersection. Kirker Pass Road is a four-lane principal arterial and route of regional significance between Central and East Contra Costa County. The roadway connects the City of Concord on the southwest end, through the Meridian Hills, to the City of Pittsburg on the northeast end. The purpose of the project is to provide a northbound truck climbing lane and paved shoulders for future Class II bike lanes. The project is needed to improve safety for motorists and bicyclists along this stretch of road. The road is frequently used by commuters and has heavy truck traffic. with sustained grades steeper than 8 percent, trucks are unable to match the speed of other vehicles on the roadway, causing significant congestion and creating a safety hazard. project elements will include roadway widening for the truck climbing lane, paved shoulders for future Class II bike lanes, relocation of drainage features, retaining wall construction; installation of signage and striping; construction of two bioretention areas; roadway conforms due to change in grade; and relocation of other existing roadside features. An open grade asphalt concrete (OG AC) overlay will be placed on the southbound and northbound lanes as part of the project, within the project limits. Standard construction equipment will be used, including but not limited to: excavators, graders, scrapers, loaders, sweepers/scrubbers, plate compactors, rollers, backhoes, cranes, drill rigs, and pavers. Disturbed areas will be stabilized following construction to ensure appropriate erosion and sediment control. Construction activities will generally be limited to the hours between 7:00 a.m. to 5:00 p.m. with noise-generating activities focused between 8:00 a.m. to 5:00 p.m.; however, there will be limited night work as necessary. Construction is expected to begin in 2018 and may require two construction seasons. Real Property transactions, including right-of-way acquisition may be necessary in support of this project. General Plan Conformance may be necessary from the City of Concord.</p>	NOD	
2016108251	<p>Malibu Hills Road Project Calabasas, City of Calabasas--Los Angeles</p> <p>The project will redesign a section of Malibu Hill Road and add a median that will filter out pollutants from urban runoff through a bio-media. Malibu Hills Road has been identified as a street that lacks catch basins. This causes runoff to travel for elongated periods until it reaches one. The longer the runoff travels along the road, the more contaminants it acquires. The best solution was to add a bio-retention center median which will consist of bio-media mass that will help filter out these contaminants as it travels down the street, the medial will be lined with an impermeable liner and underdrain system that will convey storm water to a nearby catch basin. The medial will reduce the discharge of sediment, bacteria and nutrients that enter the local bodies of water.</p>	NOE

2016108252	GS-5 Groundwater Extraction Well Glendale, City of Los Angeles, City of--Los Angeles The objective of this project is to construct a new extraction well, GS-5, and connect it to existing Glendale South Operable Unit Facility. The new Well GS-5 will be located between the existing GSOU Wells GS-2 and GS-3 on Goodwin Avenue, Los Angeles, California. The well depth will be approximately 200 feet below ground surface and extracting groundwater at the rate of 600 gpm. Well GS-5 is expected to be in full service in February 2016.	NOE	
2016108253	Tiverton House Interior Refurbishment University of California, Los Angeles Los Angeles, City of--Los Angeles The project would replace the heating, ventilation and air conditioning system in Tiverton House, a 100-room hotel located at 900 Tiverton Avenue in Westwood that supports the families of patients admitted to Ronald Reagan UCLA Medical Center. The scope of work would include: replacement of condensate piping, pumps, electrical components, equipment pad, and structural anchorages; coring of concrete slab for new mechanical piping; construction of new wall and roof duct openings; installation of new air distribution and return ducts; and replacement of ceiling access panels and thermostats. Work hours would be performed in accordance with requirements of the City of Los Angeles. Replacement of the rooftop equipment would require the use of a crane and is not anticipated to impact adjacent properties. All interior work will be conducted during daytime hours to minimize disturbances to guests on adjacent floors.	NOE	
2016108254	26585 Agoura Road Second Floor Clinic Improvements University of California, Los Angeles Calabasas--Los Angeles The proposed project consists of interior improvements to provide primary care clinics on two thirds of the second floor of the University foot shell medical office building located at 26585 Agoura Road, Calabasas, CA 91302 for the UCLA Health System. The project is off campus and is not within the boundary of the LRDP. It would build out the space to provide adult and pediatric clinics, and a blood draw area. The project would also replace finishes and provide casework in the first floor lobby. Improvements to prepare the building for use would include replacement of the roof; installation of water heaters and circulating pump; installation of a main electrical switchboard, distribution panels, transformers, and feeders; and modifications to the building's fire sprinkler system. Construction work hours would be performed in accordance with requirements of the City of Calabasas.	NOE

	and wetland mitigation. Primary access would be provided off of Vine St via a private street stretching through the site and terminating just before Gable Ave to the east, with a secondary cul-de-sac stemming midway along the street. Secondary emergency access would be provided via a 20 ft wide service along the northern boundary of the site.		
1992012113	TIOGA INN Mono County To construct the Tioga Inn and associated project features on the site of the existing Tioga Gas Mart and Whoa Nellie Deli, located at 22 Vista Point Drive in the unincorporated community of Lee Vining. The project area encompasses 4 parcels totaling 67.8 acres of land within an overall ownership area of roughly 74 acres. The project encompasses multiple elements, many of which were analyzed in the 1993 environmental and planning documents. The original concept was to provide a full range of services and facilities for tourists (to Yosemite National Park, the Mono National Scenic Recreation Area, and the eastern Sierra Nevada generally), as well as meeting facilities, jobs and employee housing opportunities for area residents. The current proposal embodies goals and concepts developed in 1993, with added refinements.	NOP	11/21/2016
2016101058	Salinas Travel Stop Salinas, City of Salinas--Monterey Annexation, Rezoning/Rezoning, General Plan Amendment, Specific Plan, Parcel Map Site Plan Review for the proposed Salinas Travel Stop at the intersection of De La Torre Street and De La Torre Circle. The project site is located adjacent to the existing City of Salinas city limit within the city's Sphere of Influence and will entail annexation of approx. 64 acres. The proposed parcel map of would create four parcels. Proposed development on two parcels includes a 94-room hotel with pool area, a convenience store with attached branded fast food restaurant, automobile and truck fueling stations, and a mechanic's building. There are no specific development proposals for the other two parcels at this time; maximum development capacity per the existing General Plan General Industrial land use designation will be assumed for these parcels.	NOP	11/21/2016
2016101060	East Cat Canyon Oil Field Redevelopment Plan Santa Barbara County --Santa Barbara The project would re-establish oil production at a forecasted level of up to 10,000 barrels of oil per day by implementing a thermal enhanced oil recovery process within the Brooks sand (reservoir) underlying the eastern area of the existing Cat Canyon Oil Field. To do so, the Project wells, roads, utility and transportation infrastructure would be built out in two phases, Phase I and Phase II. The operational results and monitoring data collected from Phase I would help to confirm the Project's reservoir models and production forecasts, prior to additional investment and construction. Production from the Project is expected to continue for more than 30 years after initial production unless or until it is deemed uneconomic or undesirable to continue operation.	NOP	11/21/2016

2000011033	05-SLO-46 KP 51.8/90.6 (PM 32.2/56.3) Route 46 Corridor Improvement Project Caltrans #5 San Luis Obispo--San Luis Obispo CDFW has executed Streambed Alteration Agreement no. 1600-2015-0045-R4, pursuant to section 1602 of the fish and game code to the project applicant, Caltrans. The Project as originally approved by CDFW includes the reinforcement of the river bank at Location 1, replace the pipe culvert with an extended box culvert at Location 2, and replace the bridge at Location 3 with two new bridges to accommodate the conversion of SR 46 from a conventional two-lane highway to a four-lane divided expressway from PM 46.0 to 50.2, for the segment of the Corridor Improvement Project known as Whitley 2B. The Amendment No. 1 to the Agreement authorizes night work for activities that do not involve ground disturbance and includes details of restoration activities within Cholame Creek (Location 3).	NOD	
2009062054	Syar Napa Quarry Surface Mining Permit #P08-00337 Napa County Napa--Napa The project includes a Surface Mining Permit (SMP) No. P08-00337-SMP to modify the Mining and Reclamation Plan and associated Aggregate Mining and Aggregate Processing Operations, including Aggregate and Asphalt Sales, as currently permitted under UP-128182, UP-27374, and County Agreement No. 2225, to allow: a) an approximate 106-acre expansion of the current surfacing mining and reclamation plan for a 35 yr term; b) an increase in mining depth from approximately 300 ft and 150 ft above mean sea level to no greater than 50 ft above msl; c) an increase in production of Aggregate and Aggregate-Related Materials from approximately 1 million tons per yr to 1.3 million tons per yr; and d) add Reclaimed Asphalt Pavement handling equipment to the existing asphalt batch plant including an increase in asphalt production up to 300,000 tons per yr (inclusive of total annual production). This SMP replaces UP-128182, UP-27374, and County Agreement No. 2225, bringing existing and expanded Quarry Operations and the Quarry Facility under one permit. The project applicant has prepared a SMP as required by Napa County Code Chapter 16.12, (Surface Mining and Reclamation).	NOD	
2014081031	Sycamore-Penasquitos 230 Kilavolt Transmission Line Project Public Utilities Commission Poway, San Diego--San Diego San Diego Gas & Electric proposes to construct and operate an approximately 16.7-mile long 230 Kilavolt transmission line between the Sycamore Canyon and Penasquitos Substations. The transmission line would be located within the Cities of Poway and San Diego and a short segment is located on Marine Corps Air	NOD

	Station Miramar. The proposed power line would include approximately 13.9 miles of overhead line on new tubular steel poles and existing steel towers and 2.8 miles of underground line within Carmel Valley Road.		
2015022038	Cherryland Community Center Alameda County Hayward--Alameda DTSC approved modification to a previously approved project, which included the construction of a new 17,500 sq. ft. community center and reconfiguration of an existing parking lot, by including the removal and disposal of contaminated soil. This modification was made under a Removal Action Workplan approved by DTSC. As modified, the approved project constitutes a minor alteration to the previously proposed project.	NOD	
2016012021	Placer I-80 Auxiliary Lanes Project Caltrans #3 Rocklin, Roseville--Placer Caltrans, in conjunction with the Federal Highway Administration (FHWA), Placer County Transportation Planning Agency (PCTPA), Placer County, the City of Rocklin, and the City of Roseville propose to widen the existing I-80 adding an eastbound auxiliary lane at Location 1 between SR 65 and Rocklin Road, and a westbound auxiliary lane at Location 2 between Douglas Blvd. and Riverside Avenue. Consideration is being given to an alternative that would provide a fifth through lane (mixed flow) from 1,000 feet east of Douglas Blvd to west of Riverside Avenue (where four through lanes currently exist) instead of the proposed auxiliary lane.	NOD	
2016012030	Roseland Area/Sebastopol Road Specific Plan and Roseland Area Annexation Projects Santa Rosa, City of Santa Rosa--Sonoma The Specific Plan provides an overall vision for future development and redevelopment within the Plan Area. The Specific Plan provides a land use diagram, circulation plan, and infrastructure improvement plan, as well as goals and policies to guide future development. The proposed land uses in the Specific Plan area are generally consistent with land uses assumed in the Santa Rosa General Plan. The proposed land use diagram would accommodate residential uses of various types at a range of densities, as well as office, retail, institutional, and industrial uses. The Specific Plan Area encompasses approx. 1,860 acres. Approx. 640 acres of unincorporated County land would be annexed in the Specific Plan. The project also includes annexation of three additional existing unincorporated islands in southwestern Santa Rosa; West Third Street Annexation Area, approx. 22.7 acres; Brittain Lane Annexation Area, approx. 17 acres; and West Heam Avenue Annexation Area approx. 33.8 acres. These areas encompass approx. 73.5 acres.	NOD

	city granted franchise consistent with Whittier Municipal Code Section 18.52.030A. Development Review Application No. DRP 12-020 will allow for the review and approval of the site plan, floor plans and elevation associated with the utility facility. The project involves the drilling, development and testing of an exploratory groundwater supply well to assess the feasibility of drilling a new permanent potable water supply well at Suburban's Plant 211 site. The test well will demonstrate the groundwater yield and water quality in the underground aquifer.		
2016081063	Chromium 6 Blending Plan Project Phelan Pinon Hills Community Service District --San Bernardino The Phelan Pinon Hills Community Services District currently operates seven wells in which the level of hexavalent chromium (CR+6) exceeds the max containment level. The project proposes to install various improvements to support the District's Chromium 6 Blending Plan project within the District's service area. The project will require preparing and grading of the reservoir and booster pump station sites, and finally installation of structures (two booster pump stations, a blending reservoir, and additional reservoir) and pipelines/pumps (vertical turbine pumps at each of the proposed well sites, and pipeline installation along Sheep Creek Rd and Dos Palmas Rd to the proposed blending reservoir site). The project is expected to begin construction in July 2017. It is estimated that the project will be completed in approximately February 2019.	NOD

2016091022	Relocation and construction of school district central kitchen facility Anaheim Union High School District Anaheim--Orange The project consists of the relocation of the District's central kitchen facility from the District Office, located at 501 North Crescent Way, Anaheim, CA, to 2735 West Ball Road, also in the City of Anaheim, on land currently used as a school athletic field, and the construction of the new central kitchen facility thereon. The existing central kitchen facility will be converted into a District conference center, per the District Master Plan, so that only internal changes will be necessary. The new central kitchen facility will consist of a 40,000 sq. ft., two story facility, with parking areas and a loading dock, and will have four primary components: (1) dry storage, (2) cold storage, (3) a production kitchen, and (4) offices and support facilities (e.g., small storage areas, restrooms, and a meeting room). When finished, the new facility will have the capability to produce up to 50,000 meals daily without further expansion, in contrast to the existing facility, which was designed to provide 7,000 meals per day, yet is currently serving over 30,000 meals on a daily basis. 2009051069	Orange Cove - WWTP Tertiary Upgrades (CEQA Addendum) Orange Cove, City of Orange Cove--Fresno This environmental document is an addendum to the Wastewater Treatment Facility Tertiary Upgrade project (approved project) MND, adopted in June 2009, by the city of Orange Cove. Since adoption of the IS/MND was approximately seven years prior, changes to the environmental setting may have occurred, thus requiring further environmental analysis. Any potential changes to the environmental setting are addressed in this addendum. As demonstrated in this addendum, the IS/MND continues to serve as the appropriate document addressing the environmental impacts of these changes, pursuant to CEQA. The project involves a series of upgrades and improvements at the city's WWTP to install a tertiary treatment process.	ADM	11/22/2016
2011021042	Kern River Flow and Municipal Water Program Bakersfield, City of Bakersfield--Kern The proposed program is a multi objective flow management and water supply program. The primary objective of the program is to allow additional quantities of water awarded to the City by the SWRCB to flow in the Kern River channel to protect, increase, and enhance the City's water supply to meet present and future demands for water. Increased flows in the Kern River would also increase infiltration and percolation to the basin, to serve as a long term water supply and source for City residents. The program calls for the utilization of an, as of yet, undetermined quantity of a new water supply to increase flows in the Kern River. Up to an average of approximately 160,000 afy of water (as available on hydrologic conditions) may be provided to the Kern River.	FIN

2016101064	<p>McCarthy Development Plan / Coastal Development Permit San Luis Obispo County --San Luis Obispo Request by Rob and Judi McCarthy for a development plan/coastal development permit to: 1) allow relocation of an access easement (Cave landing easement) to the neighboring property to the west, and 2) allow construction of a trail in the new easement alignment. The relocated trail is proposed as a 5-ft wide rural pedestrian trail with signage, dodgeway access features, and private property line fencing and signage. The project will result in the disturbance of approximately 23,000 sf for the construction of the trail, on two parcels totaling 62.66 acres. The proposed project is within the rural residential land use category.</p>	MND	11/22/2016
2016102056	<p>Folsom Joint Federal Rock Reuse Project Water Resources, Department of Sacramento--Sutter, Sacramento DWR Division of Flood Maintenance proposes to address the environmental consequences of the transportation of approximately 126,000 cy (or about 200,000 tons) of rock from the Federal JFP project site in Folsom, CA. Approximately 80,000 cy of rock would be relocated north to an 11 acre parcel owned by DWR near the Tisdale weir/bypass in Sutter County and the remaining maximum of 46,000 cy would be relocated to multiple storage locations used by the city and RD 1000, located in Sacramento county.</p>	MND	11/22/2016
2016102058	<p>Ashton Place Unit 3 Vacaville, City of Vacaville--Solano Subdivide 1.76 acres into 16 parcels for 15 single family detached homes and one common landscape/access/parking parcel. (1) to change the general plan land use designation of the property from neighborhood commercial to residential medium density, (2) amend general plan policy LU-P23.1 to remove commercial requirements in the project area and exempt new development within the Southtown Project area from having to meet or exceed the standard for any adjacent neighboring homes, (3) rezone the property to residential medium, (4) new tentative map for 16 parcels, (5) CUP for single family detached units in RM zoning, and (6) planned development with design review of the proposed house plans and review of requests to residential development standards.</p>	MND	11/22/2016
2016101061	<p>Southern California Edison Transmission Line Replacement Project Long Beach, Port of Long Beach--Los Angeles Note: Review Per Lead</p> <p>SCE is proposing to raise a segment of existing 66 kV subtransmission lines, a 12 kV distribution line, and a fiber wrap, and remove a 220 kV line in order to provide additional vertical conductor clearance across the Cerritos Channel. The transmission towers on which the lines are located would also be replaced. Raising and replacing the lines would provide additional clearance, thereby allowing bigger ships access to existing and potential future marine cargo terminals along the channel.</p> <p>The existing foundations and transmission towers on the south side of the Channel currently reside in the channel due to previous subsidence in the area. The timber pile-supported concrete foundations would be removed once the tower structures are removed. Three sets of towers on the north side of the channel would be removed or modified to hold the new transmission lines.</p>	NOP	12/02/2016

2016101067	UCLA Anderson Graduate School of Management Addition Project University of California, Los Angeles Los Angeles, City of--Los Angeles UCLA proposes the construction of a 4-level, approximately 62,000 gsf addition to the existing six-level building, approximately 305,000 gsf Anderson School of Management complex. The proposed building addition would be constructed on top of existing parking structure 5, which would remain operational. Additionally, a separate project proposes the potential construction of a new stair and elevator to provide access from the ground-level pedestrian path to Briskin Plaza.	Neg	11/23/2016
2016102060	PA-1600202 (SA) San Joaquin County Tracy--San Joaquin A site approval application for the expansion of an existing dairy from the current 2,023 cows to 2,450 cows and the construction of a 12,500 sf milk barn, a 40,000 sf freestall barn, two 60,000 sf freestall barns, one 38,400 sf loafing (shade) barn, one 10,200 sf loafing barn, one 8,500 sf loafing barn, and one 12,000 sf commodity barn.	Neg	11/23/2016
1998101061	Lower Mission Creek Flood Control Santa Barbara, City of Santa Barbara--Santa Barbara CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (# 1600-2015-0078-R5), to the Project applicant, Santa Barbara County Flood Control District. The project is a restoration project designed to increase flood capacity to a 20-year event level. The banks will be redesigned from a concrete trapezoidal shape to a combination of vertical concrete walls for the lower half of the banks, sloped with un-grouted rock, and rip-rap added for the upper half of the banks. The final configuration will have a width range from 60 to 70 feet at the top, and an average depth of 8 to 12 feet throughout the project site. A natural bottom will be maintained or restored to natural sediments where hardened concrete is now present. The rock rip-rap will be covered with top soil and pipes will be placed through the rip-rap to allow the planting of native creek. New culverts will be constructed between Gutierrez and Chapala Street Bridges to bypass an oxbow. A weir will be constructed at the inlet of the culvert. Five small parcels of open land will be left along the banks, ranging in size from 0.03 to 0.14 acres; these parcels will be planted with native vegetation expanding the riparian habitat and providing open spaces for residences. The area between Canon Perdido Street and Cabrillo Blvd Bridge will be excavated (82,000 cubic yards) to increase creek capacity. Material to be removed includes burlap bag concrete walls, masonry walls, shot-crete walls, gabions, wooden pilings, and other various bank materials. All materials will be recycled if possible. A pilot channel will be scored into the bottom, approx. 1 foot deep and 10 to 12 feet wide, and will be allowed to collect rock, cobbles and boulders. mitigation for fish consists of providing resting places for migrating steelhead by constructing artificial overhangs projecting from the walls, placing double rows of coarse boulders between the overhangs along the creek walls, and providing rock energy dissipaters. Mitigation for tidewater goby consists of coarse surface relief of the walls.	NOD

2016062043	<p>Shasta Water Management Project Shasta Valley Resource Conservation District --Siskiyou</p> <p>Project is limited to two components. Component one of this project is at the Hidden Valley Ranch point of diversion on the Shasta River. The current head gate structure that diverts water down an open conveyance ditch about 1500 feet to a fish screen and weir box will be replaced with fish screen at the point of diversion and a piped irrigation system. The existing intake headwall will be removed and replaced with the new fish screen (66 inch stainless steel cone frame) and intake structures. The fish screen and intake structure will be built off-site and placed in the river bed at the same location as the existing diversion structure.</p> <p>The second component of the Shasta Valley RCD project is at the Kettle Springs impoundment. The current diversion structure will be replaced with new headworks that will connect to new irrigation piping instead of utilizing ditch conveyance. Piping will be a more efficient way to irrigate, and will result in less diversion of water from the system. The new structure will be placed at the same location (on the levee) as the existing structure; pipeline will be installed in upland areas adjacent to current ditches. Large Woody Debris (LWD) structures will be place in Kettle springs Creek downstream of the existing spring impoundment.</p>	NOD

2016032076	<p>Shadowbrook Lift Station and Force Main Project Roseville, City of Roseville--Placer</p> <p>CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0112-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, the City of Roseville as represented by Ed Winston. The project is limited to the rehabilitation of the existing Shadowbrook Lift Station to improve its resiliency to sewer system overflows. The rehabilitation of the existing Shadowbrook Lift Station would be constructed in two phases (Phase 1 and 2). Phase 1 is not covered by the Agreement. Phase 2 consists of construction of the proposed dual six-inch force mains and would require a clearwater diversion to temporarily de-water a segment of Dry Creek and divert flows through the project area. The project would involve installation of a new fiberglass wet well within the existing pump station steel wet well, thereby occupying the same footprint. The new wet well would extend to a point approx. one foot above the 100-year floodplain. The existing masonry enclosure surrounding the pump station would be partially reconfigured to raise the concrete working pad to match the new top of wet well elevation; the existing lift station masonry block walls would also be extended vertically to retain the present eight-foot distance above grade. The footprint for the concrete pad would also be extended to provide a secured area for a permanently mounted on-site standby generator. The expansion area would be immediately adjacent to the existing lift station facility and overlay an area which is currently occupied by a concrete pad. The reconstructed lift station would cover an area of approx. 4,000 sq. ft., which is larger than the existing facility.</p> <p>Additionally, the proposed project includes installation of new dual six-inch force mains to connect from the lift station to the existing 63-inch Dry Creek interceptor sewer line located on the west side of the creek. The purpose of the second force main is to provide system redundancy rather than capacity for future sewage flows (sewer shed is built out). The new dual force mains would be approx. 370 feet in length and would consist of ductile iron pipe with ceramic epoxy lining.</p>	NOD	
2016061021	<p>CCPE Facility Project California State University, Long Beach Long Beach--Los Angeles</p> <p>The proposed project includes the development of the College of Continuing and Professional Education Project on the campus of CSU, Long Beach. The project will include up to approx. 35,000 sq. ft. of space.</p>	NOD	
2016108331	<p>Pump Station No. 13 Valve Replacement and Improvements Monterey Regional Water Pollution Control Agency Pacific Grove--Monterey</p> <p>The project's purpose is to increase the pump station reliability and to increase the protection of water quality in the Monterey Bay. The project includes replacing valves and a pump, and adding a valve in a sursurface vault. Some critical electrical gear will be relocated into an outside above-ground electrical panel.</p>	NOE	
2016108332	<p>Mare Island Naval Shipyard - Defense Reutilization and Marketing Office Toxic Substances Control, Department of --Solano</p> <p>The ROD/RAP recommends no further action for soil and revises the remedy for groundwater contained in the Proposed Plan to no further action. Institutional controls (ICs) are no longer proposed for shallow groundwater at the DRMO site</p>	NOE

	(Site). The Navy has determined that ICs for groundwater are not necessary because shallow groundwater to a depth of 15 feet below ground surface (bgs) meets the criteria for an exception to State Sources of Drinking Water Policy, domestic water on Mare Island is currently supplied by the City of Vallejo, and agricultural and domestic water wells require a 50-foot sanitary seal, thereby eliminating use of the shallow groundwater for these purposes.

1997122002	Addendum to the Lent Ranch Marketplace Final EIR Elk Grove, City of Elk Grove--Sacramento In October of 2014, the City and Applicant, Elk Grove Town Center, L.P. entered into an Amended and Restated Agreement Regarding Regional of the Outlet Collection at Elk Grove Project (File No. EG-14-012). On October 26, 2016 an Amendment to the Development Agreement (the 1st Amendment) was approved reducing the scope of the Development Agreement by removing a portion of property (commonly known as Phase 2) from coverage under the Mall Agreement. The 1st Amendment) was approved reducing the scope of the Development Agreement by removing a portion of property (commonly known as Phase 2) from coverage under the Mall Agreement. The 1st Amendment to the Development Agreement does not approve any specific development project.	NOD	
2003032055	Gasser Master Plan Napa, City of Napa--Napa Project is limited to: 1) Installing temporary falsework, and an approx. 10-foot wide, 65-foot long temporary bridge crossing for use during construction of the permanent bridge. 2) Excavating and installing two permanent, poured in-place concrete abutments. 3) Installing an approx. 44-foot wide, 125-foot long clear span bridge crossing. 4) Installation of rock slope protection as energy dissipation. 5) Riparian enhancement activities. The project is located on Tulocay Creek, at the intersection of Kansas Avenue and Gasser Drive, approx. 2,000 linear feet east (upstream) of the confluence with Napa River in the County of Napa, State of CA.	NOD	
2008032028	Willow Drive Minor Subdivision MS 853-2007 Danville, City of Danville--Contra Costa CDFW has executed a Streambed Alteration Agreement No. 1600-2016-0077-R3, pursuant to section 1602 of the Fish and Game Code to Curt Honodel. The project is limited to the construction of a bio-retention basin that is approx. 1,094 sq. ft. occurring above the top of bank and construction of an outfall structure that will consist of a 12 inch pipe installed using a 6 foot deep trench that shall remove 50 cubic yards of soil. The whole structure shall impact 26 linear feet with 0.009 acres of permanent impact over 8 linear feet.	NOD	
2010051055	Baker Water Treatment Plant Project Irvine Ranch Water District Orange--Orange SWRCB, as the responsible agency, will be issuing a water supply permit. The Irvine Ranch Water District proposed project includes construction and operation of a 28 million gallon per day water treatment plant that will use microfiltration membranes and ultraviolet disinfection to treat water from the Lake Matthews and Irvine Lake sources to provide water to district customers and 4 other agencies (El Toro Water District, Mouton Niguel Water District, Santa Margarita Water District, and Trabuco Canyon Water District) to be used during emergency conditions or during scheduled maintenance of the Metropolitan Water District of Southern California's Diemer Treatment Plant, to improve water supply reliability. The project will also include a new off-site pump station near Peter's Canyon Reservoir, a meter exchange and pipeline replacement, anew sewer pipeline for non-reclaimable wastewater, new pipelines to convey treated water, a residuals handling facility that would allow processing on site, and two new electrical conduit alignments. 	10,000 sf stand-alone buildings titled the "Innovation Center." The Innovation Center would also include a retail element. The three residential buildings and clubhouse would be constructed around a landscaped courtyard. The 225-unit housing development would include up to 750 individual bed and bedrooms would be oriented around larger common rooms.		
2016028369	Lower Putah Creek Salmon Spawning Habitat Enhancement Solano County Water Agency Winters, Davis--Solano, Yolo Operating from the top of bank, a small excavator fitted with a bucket rake/claw attachment will mechanically scarify or rake the creek bottom to a depth of approximately 12-18 inches to loosen cemented gravels. Over the term of this Agreement, scarification will occur at approximately 40 locations along 13 miles impacting approximately 1.5 miles (5 acres) of Putah Creek. If a pre-existing access road is not available, then an excavator will remove vegetation to create a temporary access road. The excavator will not grade or cut the access road and no trees larger than 4-inches in diameter will be removed. Riparian areas disturbed by te excavator will be restored with native grasses, trees and shrubs.	NOE	
2016108346	Campground Accessibility Improvements Geotechnical Study Parks and Recreation, Department of --Nevada Bore eight (8) holes at various locations in Donner Memorial State Park for geotechnical investigations to identify soil conditions and help guide plans for the installation of two (2) new restrooms and a beach access compliant for people with disabilities. For all eight (8) borings, a mechanical auger with a 3" bit will core down into the sil to a depth not to exceed 5 feet to obtain soil samples. Excavated holes will be backfilled with soil cuttings and any excess soil cuttings will be spread in adjacent undeveloped areas asway from the waterways.	NOE	
2016108347	Moccasin Creek Hatchery Pilot Recirculation Project Fish & Wildlife #4 --Tuolumne The San Francisco Public Utilities Commission (SFPUC), a department of the City and County of San Francisco (City), operates the Hetch Hetchy Water and Power System, which provides water to the California Department of Fish and Wildlife's Moccasin Creek Fish Hatchery (Hatchery) from Moccasin Reservoir. Starting January 2017, the City will be shutting down the eighteen miles of mountain tunnels that lead to Moccasin Reservoir for 60 days for maintenance (Shutdown). During the Shutdown, no water will be flowing into Moccasin Reservoir, and only 3 cubic feet per second (cfs) will be available to the Hatchery, as opposed to the 30 cfs that is otherwise required to operate the Hatchery. The Hatchery must remain in operation to maintain the lives of those fish in the Hatchery, including rainbow trout and endangered Lahontan cutthroat trout (Pilot Peak Strain), necessary for the Tahoe Basin Recovery Effort. These fish should not be moved.	NOE	
2016108348	Routine Maintenance in Tualota Creek near the Robert A. Skinner Water Treatment Plant Metropolitan Water District of Southern California --Riverside The Metropolitan Water District of Southern California (Metropolitan) proposes routine maintenance along an approximately 530-linear foot portion of Tualota Creek at the intersection of Auld and Borel roads located within the adjacent to the	NOE

	Robert A. Skinner Water Treatment Plant. The routine maintenance, which includes removal of vegetation and minor grading to reestablish flows, is necessary in order to restore flow capacity to a downstream portion of Tualota Creek.		
2016108349	9631 Crestview Boat Dock (Lake or Streambed Alteration Agreement No. 1600-2016-0218-R2 Fish & Wildlife #2 Clearlake--Lake The project is limited to the installation of a new 14-foot by 32-foot boat dock and gangway that will be attached to an existing seawall. The project will involve the driving six 8-foot steel piles into Clear Lake to support the dock. All work will be conducted from a barge.	NOE	
2016108351	Cloverdale Road Gully Repair Fish & Wildlife #3 --San Mateo The project entails stabilizing a large gully threatening the road and bridge infrastructure and correcting storm drainage flows forming the gully. A 42-inch diameter 400 linear-foot culvert will be installed through the gully to convey storm runoff to Butano Creek and will incorporate a concrete headwall, two concrete headwall, two concrete junction boxes with steel grates and rock energy dissipater at the outlet. The gully will be recontoured and stabilized by placement of approximately 985 cubic yard of fill to achieve a stable 3.1 or flatter slope. Rock will be placed in the lower portion of the gully and will be planted with willow, alder and other native vegetation. A sediment basin will be installed and will be approximately 0.25 acre excavated to one-foot depth. SAA#1600-2016-0320-R3.	NOE	
2016108352	Bear Creek Tree Removal Fish & Wildlife #3 Woodside--San Mateo The project is limited to the removal of damaged trees caused when a large blue gum eucalyptus tree fell, removal of the remaining trunk of the fallen eucalyptus, the partial removal of tree material and limbs that have fallen into Bear Creek and the removal of four blue gum eucalyptus trees on or near the bank of Bear Creek. The tree in the creek will be partially removed and the limbs and branches will be cut and removed by slings that will be lifted by a crane situated outside the creek. Most of the tree will remain in the creek. The four eucalyptus trees to be removed are extremely old and large, at the end of their lifespan and are shading out the native riparian trees. Native vegetation will be planted on-site after tree removal.	NOE	
2016108353	Emergency Directors Order I-8 (EA: 429203) Caltrans #11 San Diego--San Diego Directors Order to repair a dip and hole in the pavement. The void below the shoulder is approximately 5 feet deep and 5 feet in diameter. Work includes, grout subsurface voids along the alignment of the sewer line within the limits of the eastbound and westbound pavement and repair the shoulder pavement.	NOE	
2016108354	Tulucay Creek Bridge Repair Caltrans #4 Napa--Napa Caltrans proposes to repair and retrofit Tulucay Creek Bridge. All work will be performed on scaffolding located underneath the bridge and above the creek. This repair/retrofit will fix the existing bridge and extend it's life by 10-15 years, so	NOE

2014081023	Plainview Wastewater System Project Tulare County --Tulare The project would result in construction of a wastewater main along Road 196 (and lift stations) which will connect to an existing city wastewater trunk line; (approximately five miles north of Plainview) and construction of a sewer collection system through lateral collection lines in various county rights of ways abutting each home or business within Plainview. The wastewater main line would be constructed within the Road 196 right of way extending from Plainview to the city sewer trunk pipeline (at the intersection of SR 65 and Road 196). Depending on precise engineering designs, between one and five lift stations or other appurtenant structures may also be required. Pipelines would be installed via open-cut trenching; trenches would be closed upon completion of construction. Roadways would be repaved/resurfaced as needed and specified by the county of Tulare.	EIR	12/12/2016
2013111058	Active Recycling Company, Inc. Material Recovery Facility and Transfer Station Expansion Project Los Angeles, City of Los Angeles, City of--Los Angeles The proposed project would require a new SWFP in order to: 1) increase the max daily capacity from 250 TPD to 500 TPD; 2) Revise the public use hours from 6 am to 4:45 pm to 5:30 am to 7:30 pm, Monday through Sunday (internal hours of operation will remain 24 hours/day, seven days a week; 3) include the continued processing of up to 300 TPD of scrap metal; and, 4) expand the area where operations are conducted from 24,200 sf to 38,599 sf. The expanded processing area is being requested to allow load-out of transfer trucks which will increase throughout capacity. No new construction is proposed. The solid waste facility is located within the property of an existing recycling center. The MRF and transfer station operations would make up approximately 38,500 sf (0.88 acres) of the 3.56 acre Recycling Center parcel.	MND	11/28/2016
2016101077	Kendrea Terrace Homes McFarland, City of McFarland--Kern Development of a 68 detached unit multifamily project. The project will include a 1.46 acre park and a 1,500 sf clubhouse. The dwelling units will all have attached 2 car garages and each unit will have solar panels on all the rooftops. The proposed project will be a net-zero project meaning that the projects electrical demand will be provided by on-site solar. The project will be xeriscaped which will reduce the water demand.	MND	11/28/2016
2016101080	Santa Anita Chick-Fil-A Restaurant Project Arcadia, City of Arcadia--Los Angeles The Chick-Fil-A restaurant project proposes approximately 3,000 sf of commercial development on 0.78 gross acres located on the northwest corner of Baldwin Ave and Huntington Dr. An existing Unocal 76 gasoline service station is currently occupying the site with 16 fueling stations, two fueling islands with canopies and one office/convenience store building with restrooms of approximately 1,600 sf. 	1) a general plan amendment, 2) a zone change, 3) a vesting tentative tract map, 4) a site development permit, and 5) a minor adjustment. Additional development would include associated infrastructure improvements, two neighborhood parks, perimeter fencing, slope landscaping, and completion of the existing rough-graded 1/4 mile segment of the Colinas Bluff Trail traversing the northern portion of the site.		
2016101075	Park Place Extension and Grade Separation Project EIR El Segundo, City of El Segundo--Los Angeles Note: Review Per Lead	NOP	12/09/2016
	The City proposes to extend Park Place from Allied Way to Nash Street with a railroad grade separation(s) in order to improve traffic and circulation in the project area. Park Place currently exists in two segments with a roughly quarter mile gap across an undeveloped area which consists of UPRR and Burlington Northern Santa Fe railroad spurs. The project would implement a cap closure to develop a Park Place as an alternative east-west route between Sepulveda Blvd and Douglas Street to relieve congestion along portions of Rosecrans Avenue and Sepulveda Blvd, as well as to improve local traffic circulation and access to and from the I-105 freeway and I-405 freeway.		
2016101076	Fig & 8th Los Angeles, City of Los Angeles, City of--Los Angeles Resources California, LLC, the Applicant, proposes to develop a mixed-use project on a 46,546 sf site that would provide 436 residential units and ~10,043 sf of ground floor commercial/retail/restaurant uses and 479 parking spaces. The proposed uses would be located within a new 42-story, high rise residential tower that, in total, would comprise ~503,535 sf of total floor area. The maximum height of the building would be 489 feet above ground level to the base of the helipad. The proposed floor area ratio (FAR) would be ~10.8:1. To provide for the new uses, the existing surface parking would be removed. Construction of the project is anticipated to commence in March 2018. Project construction, which is estimated to occur over a period of 30 months, is anticipated to be completed in the third quarter 2020.	NOP	11/28/2016
2016101079	Santa Ana River Conservation and Conjunctive Use Program Inland Empire Utilities Agency Riverside, San Bernardino--Riverside, San Bernardino, Orange SARCCUP is a watershed-scale collaborative program designed to improve the Santa Ana River watershed's water supply resiliency and reliability by increasing available dry-year yield from local groundwater basins. SARCCUP also would conserve water, promote water use-efficiency, conduct invasive weed removal, and improve habitat for the Santa Ana sucker (<i>Catostomus santaanae</i>), a native, federally-threatened fish species. Five regional water agencies in the Santa Ana River watershed have partnered to develop this program under broad oversight by the Santa Ana Watershed Project Authority: Eastern Municipal Water District, Inland Empire Utilities Agency, Orange County Water District, San Bernardino Valley Municipal Water District, and Western Municipal Water District. 2016101082	<p>Three Rivers Hotel (PSR 16-006) Tulare County --Tulare</p> <p>The project consists of a three-story hotel on a currently vacant 8.66 acre site comprised of two parcels in the "O" (Recreation) and "F-1" (Primary Flood Plain) Zones. The hotel would consist of 110 rooms, one 500 sf conference room, one 700 sf breakfast area, a swimming pool, fifteen (15) tiny homes for extended stay patrons, and two tiny homes for staff dwellings, one domestic well and an on-site septic system. Prior to constructing the project, the applicant must receive approval of a lot line adjustment and a site plan review.</p>	NOP	11/28/2016
2016101083	<p>Bonita Vista High School Track and Field Project Sweetwater Union High School District Chula Vista--San Diego</p> <p>The purpose of the proposed project is to complete a number of replacements, upgrades and improvements on Bonita Vista High School's existing athletic fields. Improvements will include replacement of the track with synthetic materials, replacement of the natural turf with an artificial turf, additional stadium seating (2000 seats for home and 100 seats for visitors), as well as providing new lights to allow for sports games to be held in the evening on the campus.</p>	NOP	11/28/2016
2016102067	<p>PA16-049, 405 E. 4th Avenue Mixed-Use Project San Mateo, City of San Mateo--San Mateo</p> <p>The project proposes to demolish the two existing structures on the site and construct a 4-story building that contains a total of 55,136 sf of office space on the first three floors, and 10,489 sf of residential space on the 4th floor for a total of 65,625 sf. The Floor Area Ratio is 2.98, and the residential density is 30 units/acre, with 15 residential units proposed. Maximum height of the building is 55 feet, and there are no setbacks proposed (or required) on any side of the building. The building walls will extend to the property lines on all four sides, with the street frontages articulated by the building entrance area and large window frames at the ground floor, and the parking garage driveway. Metal canopies and a 3rd floor balcony provide additional building articulation along the street frontages.</p> <p>The total amount of parking required for the project is 156 spaces. The parking garage has two levels below grade and provides a total of 83 spaces, including eight Clean Air/Van Pool/EV spaces and five ADA accessible spaces. Because the project is located in the Central Parking and Improvement District, it is eligible to fulfill the remainder of its parking requirements through a Parking Agreement with the City to pay in-lieu fees instead of providing the parking on-site.</p> <p>The proposed development would be consistent with the existing zoning (CBD/S-Central Business District, Support) and General Plan designation (Downtown Retail Core Support) on the site.</p>	NOP	11/28/2016

2016021106	2015 Title 9 Update (intial Study #15-0028) Imperial County --Imperial The Imperial County Planning & Development Services Department has prepared several revisions to title 9, the "Land Use Ordinance" of the Imperial County Codified Ordinance, in a continuing effort to keep Title 9 current and internally consistent. The purpose of Title 9 is to adopt and enforce all land use and building code regulations for the unincorporated areas of the County. By its very nature, the Ordinance is meant to be amended, as changes in County policies and State or Federal laws occur [...] All the revisions and corrections in this year's Title 9 Update resulted in changes to Divisions 1-8, 10, 13, 14, 19, 21-22, 24, and 26-27, 32	Neg	11/28/2016
2016101078	Soledad Regional Recharge Project Soledad, City of Soledad--Monterey The city public works department is proposing the Soledad Recharge project which includes installing new storm drain pipes, expanding the existing UPRR basin, and decommissioning the exiting basin. The project is needed to accommodate stormwater flows from existing and future development, reduce flooding within the city, and increase water supply for local agricultural uses through recharge back to the unconfined shallow aquifer. The project would be located in the city.	Neg	11/28/2016
2009071031	Berth 302-306 (APL) Container Terminal Project Los Angeles, City of --Los Angeles The proposed Project is located on Terminal Island within the Port of Los Angeles. The proposed Project site encompasses Berths 302-306 and is bounded by Terminal Way and Seaside Avenue to the north, Navy Way to the east, Earle Street to the west and Pier 300 and the Outer Los Angeles Harbor to the south. The approved Project involved the expansion of the terminal by adding Berth 306, adding 41 acres of constructed but unimproved back land and the installation of 12 cranes. Terminal capacity would expand to 3.2 million Twenty-foot Equivalent Units (TEUs) upon build out. The revised Project is now a smaller scope that would extend the lease an additional 16 years through 2043, replace eight existing cranes and reduce the previously assess throughput capacity to 2.4 million TEUs.	NOD	
2016051041	Castaic Area Multi-Use Trails Plan Los Angeles County Parks & Recreation --Los Angeles The proposed project includes a trails plan for approx. 100-miles of multi-use (hiking, mountain biking, and equestrian) trails system, staging areas, bike skills parks, parking areas, and other appurtenant facilities within a 75-sq. mile area in the Castaic Area of the Santa Clarita Valley Planning Area. 	localized sediment along the channel bed in a concrete-lined portion of the channel and repairing or replacing degraded culverts and blocked culvert outfalls. Other routine maintenance activities proposed include vegetation management; repair or maintenance of concrete/hardened channel banks and bed; installation and maintenance of trash capture devices; removal of accumulated debris; installation and repair of fences; repair of access roads; and graffiti removal.		
2016072028	Collecting Canal Maintenance Project Water Resources, Department of --Sutter DWR Division of Flood Maintenance proposes to address the environmental consequences of conveyance structures of the collecting canals, sumps, pumps, and structures of the drainage system of Project No. 6 Maintenance activities would include: sediment removal from approximately 60 miles of collecting canals; bridge repair and maintenance of three bridges; culvert repair, replacement, or removal; and debris removal, woody vegetation removal, or vegetation spraying associated with these activities. These facilities are located between the Sutter Buttes and Nicolaus, CA.	NOD	
2016082057	Dowd Road @ Coon Creek Bridge Replacement Placer County Lincoln--Placer The proposed project replaces the existing bridge which crosses Coon Creek at Dowd Road. The current bridge has been rated functionally obsolete, is prone to flooding, and provides insufficient width for two-lanes of traffic (it is a one-lane bridge). The new bridge is planned to be a 2-span cast-in-place post-tensioned concrete slab bridge measuring 150 ft long and 32 ft wide between the bridge barriers. The bridge would carry two 12-ft travel lanes and two 4-ft wide shoulders with a modified Caltrans Type ST-10 bridge rail.	NOD	
2016109010	P14-0805 and P15-0004 Project (Streambed Alteration Agreement No. 1600-2016-0031-R6) Riverside, City of Riverside--Riverside CDFW has executed Streambed Alteration Agreement No. 1600-2016-0031-R6, pursuant to section 1602 of the Fish and Game Code to the project applicant, Ayres D&C Construction. The P14-0805 and P15-0004 Project includes the construction of 18 residential units, which will include the removal and replacement of the existing Lincoln Avenue storm drain on the southeast side of the site with 3'x6' concrete storm drain. The existing trapezoidal concrete channel with energy dissipaters north of Aralia Drive will also be removed. An earthen infiltration basin will be constructed on the parcel northwest of Aralia Drive to divert runoff from the development.	NOD
