STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

September 1 – 15, 2014

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **September 1 – 15, 2014**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

State Clearinghouse
1400 Tenth Street, Room 113

<u>Documents Received on Tuesday, September 02, 2014</u>			
2014092001	Tentative Parcel Map Application No. PLN2014-0081 - Arnerich Stanislaus County --Stanislaus Request to create four parcels of 53+/-, 57+/-, 63+/-, and 197+/- acres from a 370+/- acre parcel. Parcel uses currently consist of rangeland, irrigated crops, and two single-family dwellings. Access for Parcels 1, 2, and 3 will be obtained via Sonora Road and Parcel 4 will be served by a proposed access and utility easement.	CON	09/22/2014
2014092002	General Plan Amendment and Rezone Application No. PLN2014-0077 - BPL Properties Stanislaus County Modesto--Stanislaus Request to amend the General Plan designation of Agriculture and the zoning designation of A-2-40 (General Agriculture) to P-D (Planned Development) on a 1.5+/- acre parcel. The proposed P-D zoning would allow the site to be used for, and developed with, C-2 (General Commercial) uses. The existing property consists of a 2,945+/- sf building, previously in use as a card room, and a parking lot. The project involves two phases of development: the first phase proposes to allow C-2 uses to operate in the existing building; the second phase consists of the construction of a 6,500 sf commercial building and associated parking lot.	CON	09/22/2014
2014012042	Tuolumne River Regional Park Obstruction Management Project Modesto, City of Modesto--Stanislaus The City of Modesto, as owner and operator of Modesto City-County Airport, proposes to trim or remove up to 999 trees that have grown into the approach and transitional surfaces (as defined by FAR Part 77: Objects Affecting Navigable Airspace) for Runways 28R and 28L (Proposed Project). Trees identified for treatment include 989 native and 10 non-native species. Trees would be trimmed to appropriate heights, as set forth in FAR Part 77, as well as other FAA regulations. Approximately 240 of these trees are located within Runway 28R's Object Free Area (OFA), and therefore are proposed for removal to comply with FAA Advisory Circular 150/5300-13 Airport Design. Per AC 150/5300-13, any objects (except for these essential for air navigation) that protrude above the runway safety area edge elevation within the OFA require removal.	EIR	10/16/2014
2014021072	Astoria I by RE Astoria I, Astoria II by RE Astoria II, Astoria III by RE Astoria III Kern County --Kern Re Astoria I: Zone change from 2.5-acre Estate residential to Exclusive Agriculture, CUP for 100 MW solar facility on 1,202.3 acres. RE Astoria II: CUP for 40MW solar facility on 454.02 acres. RE Astoria III: CUP for 35MW solar facility on 402.32 acres.	EIR	10/16/2014

<u>Documents Received on Tuesday, September 02, 2014</u>			
2014061010	3121 Old Topanga Canyon Road Residential Project Calabasas, City of Calabasas--Los Angeles The project would consist of the construction of one single-family detached residence on a vacant, disturbed parcel located in the City of Calabasas, CA, at 3121 Old Topanga Canyon Road. The project will also involve selected vegetation removal, minor grading, slope stabilization, landscape installation, hardscape installation or other site work necessary to complete the home construction. The project will also include any off-site work required to extend infrastructure, such as potable water lines and electricity, to the site, any cleaning and repair of in-place drainage facilities, and any paving or re-paving of either the private driveway or Old Topanga Canyon Road required to either ensure adequate access or to repair a public or private street following installation of project-associated infrastructure.	EIR	10/16/2014
2001111135	John Wayne Airport Settlement Agreement Amendment Orange County --Orange FYI Final The proposed project is the modification of certain substantive provisions and an extension of the term of the settlement agreement between the County of Orange, City of Newport Beach, et. al., regarding development and operations at John Wayne Airport.	FIN	
2007031159	The Lexington Project Los Angeles, City of --Los Angeles The proposed project would include the development of 786 residential units with approximately 22,200 square feet of community-serving retail and restaurant uses on an approximately 5.9 net acre site. Additionally, a three-level parking facility, consisting of two subterranean levels and one ground level, would be located below the residential units. To accommodate the proposed project, existing structures on the site would be removed.	FIN	
2013102020	Interstate 680 Southbound High Occupancy Vehicle (HOV) Gap Closure Project Caltrans #4 Walnut Creek--Contra Costa Note: FYI Final As the CEQA lead agency, Caltrans, in cooperation with the Contra Costa Transportation Authority (CCTA), is proposing to improve traffic operations and relieve congestion by closing the current high-occupancy vehicle (HOV) lane gap on southbound Interstate 680 in Contra Costa between Livorna Road and Geary Road. The HOV lane would be added through roadway widening and restriping of the existing roadway. The median barrier would be upgraded to meet current standards. The South Main Street Undercrossing would be widened to accommodate the HOV lane. The two existing combined retaining/soundwalls located between the Rudgear Road interchange and South Main Street would be replaced, and a new soundwall would be constructed at the edge of the shoulder of NB I-680, just north of the North Main Street interchange. All work would be within existing Caltrans and local street right-of-way.	FIN

2014091004	Daskalakis Parcel Map Encinitas, City of Encinitas--San Diego The project consists of a Tentative Parcel Map to subdivide 1.99 acres into 4 parcels.	MND	10/01/2014
2014091005	Pajaro Valley High School Connector Trail Watsonville, City of --Monterey The trail segment is intended to provide important secondary, non-vehicular access to Pajaro Valley High School from Airport Boulevard. The trail would parallel Highway 1, trending southeastward for the initial portion, then generally head south/southeastward to its ultimate intersection with Harkins Slough Road. Portions of the trail would traverse private ownerships which would require an easement for purposes of access; however, the majority of lands affected by the trail are under the ownership of the City of Watsonville. A limited portion of the trail alignment would cross lands within the County of Santa Cruz. Acquisition of lands and/or an easement on private and public property would therefore be required for portions of the trail alignment.	MND	10/01/2014
2014091007	IS 6786; CUP 3436 and VA 3962 (Fresno County): Allow Expansion of Existing County Detention Facility Fresno County Fresno--Fresno Detention facility - jail two phases (300 bed medium and maximum security jail and related facilities for Phase 1 with Phase 2 consisting of two additional jail housing floors for an addition 300 beds/construction of second laundry floor and new electrical cogeneration facility fuel by natural gas on 1.1-acre portion of a 2.9-acre parcel under County ownership adjacent to existing Jail. Application also includes a variance to waive on-site parking. The temporary closure of L Street during construction is also considered.	MND	10/01/2014
2014091008	Newport Boulevard and 32nd Street Modification Project Newport Beach, City of Newport Beach--Orange The Newport Boulevard and 32nd Street Modification Project has been developed to improve the intersection of Newport Blvd and 32nd Street in order to increase vehicular capacity and reduce existing traffic congestion to an acceptable level of service. The proposed project is located within a fully urbanized section of the City of Newport Beach and would add an additional northbound through lane along Newport Blvd from 30th Street to 32nd Street and add an additional southbound through lane along Newport Blvd from Via Lido to 32nd Street, terminating as a right-turn only lane at 32nd Street.	MND	10/01/2014
2014091009	Stone Creek Casitas Chula Vista, City of Chula Vista--San Diego The project proposal consists of a 97 unit apartment complex comprised of one and two bedroom units with attached carports within six buildings. Additionally, proposed on-site improvements for the parcel include a recreation building, 181-space parking lot, new landscaping and children's play area, and four trash enclosures. Off-site improvements include street improvements to Main Street with a 24-ft. street dedication. The proposal consists of Design Review, Rezone, and Planned Sign Program applications. The Rezone of the property proposes to	MND	10/02/2014

	change the zone from Limited Industrial (ILP) to Apartment Residential (R3) zone, which is consistent with the General Plan designation of Residential High (RH).		
2014092003	Water Line Project Monterey Park Tract Community Services District Ceres--Stanislaus The proposed Project consists of connecting to the City of Ceres' existing water distribution system via a four inch water transmission line that would be installed and extended approximately five miles to the Monterey Park Tract. The 4-inch water line will ultimately connect to a proposed water storage tank, to be developed on a site within the Monterey Park Tract and located on Monterey Avenue. All infrastructure of the proposed water transmission line will be installed underground within the existing County road Right-of-Way (ROW).	MND	10/01/2014
2014092004	Kentucky Avenue Widening and Complete StreetsProject Woodland, City of Woodland--Yolo Widen, reconstruct, & upgrade Kentucky Ave (West St to East St). West St to College St: include 2 lanes, a 2 way left turn lane, bike lanes, & improved sidewalk. College St to East St, include a divided 4-lane configuration w/bike lanes, sidewalks & landscape planters. Improve College St (Kentucky Ave to Topaz Way) w/added wide walks, replaced/relocated curb & gutter, pavement rehab, & striping. The project requires land acquisition to increase the right of way along Kentucky Ave for the proposed improvements. Improvements also include reconstruction of pavement within project limits, new curbed medians, a new traffic signal at College St, a reconfigured traffic signal at East St, a complete upgrade to City street lighting, 2 widened railroad crossings w/upgraded warning signals, bus turnouts, landscaping, & master-planned upgrades to City storm drainage.	MND	10/02/2014
2014091001	Sierra Industrial II Project Fontana, City of Fontana--San Bernardino The project includes the construction and operation of approximately 763,350 nsf "high cube" logistics warehouse use with associated office and mezzanine spaces. The project would consist of a single building containing 746,350 sf of ground-floor logistics warehouse operations and supporting office spaces, and 17,000 sf second-floor mezzanine spaces. The two offices would be located at the northwest and southwest corners of the building and will provide administrative spaces for the principle use and, depending on the number of logistics warehouse tenants, may ultimately support up to two tenants. 36 feet of internal clear height would be provided inside the building.	NOP	10/01/2014
2014091006	Remedial Action Plan for Potrero Canyon (Lockhead Propulsion-Beaumont No. 1) Toxic Substances Control, Department of Beaumont--Riverside The proposed project is to clean up the Potrero Canyon (site), also known as Lockhead Propulsion - Beaumont No. 1, within the City of Beaumont, Riverside County, California. The proposed cleanup includes remediation of contaminated soil and groundwater, landfill containment, and mitigation of residual munitions and explosives of concern. The proposed remedy is the subject of a Regional Action Plan (RAP), currently under preparation by DTSC, and includes: shallow excavation and disposal of impacted soil, hydraulic containment for the regional groundwater plume, landfill capping, and institutional controls that would restrict future land use at the site. 2014091003	Private Property Acquisition - Clara Park Expansion Phase III Cudahy, City of Cudahy--Los Angeles The Clara Street Sports Complex was included in the LA County Open Space Assessment District (Prop A), of 1992-96 for \$2.7 million dollars. The proposed project, Clara Park Expansion Phase III is to acquire one additional parcel (.45 acres). The scope of the project includes the purchase of one property, relocation of all residents, demolishing the buildings and developing park improvements on the one parcel including lighting, landscaping, picnic seating, exercise equipment and fencing.	Neg	10/01/2014
1989013110	Lake Earl Wildlife Area Management Plan Fish and Game (HQ) Environmental Services Crescent City--Del Norte The project will allow for continued breaching at Lake Earl and Lake Talawa to the Pacific Ocean under continued maintenance conducted by Del Norte County. Del Norte County proposes to continue a land management practice by periodically breaching the sandbar between Lake Earl and Lake Talawa to the Pacific Ocean when the lake surface elevation is between +8' MSL and +10' MSL during the wet season period from September 1 to February 15. A breach will occur on or about February 15th if lake levels are at +5' MSL or greater to prevent flooding conditions from occurring during the late winter and springtime, while ensuring adequate water within the lakes for aquatic and wetland habitat are sustained throughout the dry summer period. The sandbar is mechanically breached with a D8 bulldozer.	NOD	
1992083049	Gravel Extraction on the Lower Mad River Humboldt County --Humboldt The project is limited to one encroachment for aggregate extraction from the channel of the Mad River for commercial purposes. The Permittee proposes to extract up to 50,000 cubic yards of gravel annually from the Guynup bar. Federal permit restrictions on the annual volume of gravel extracted were implemented based on a flow-based analysis of gravel replenishment. On average over the last four years (2010 thru 2013), the annual extraction volumes have been 19,783 cubic-yards. No extraction was conducted at this bar in 2009.	NOD	
2005081077	Chula Vista Bayfront Master Plan and Port Master Plan Amendment San Diego, Port of Chula Vista--San Diego The San Diego Regional Water Quality Control Board is issuing a Clean Water Act Section 401 water quality certification (Cert. No. R9-2014-0028) to the project applicant, Dynegy South Bay, LLC. The applicant proposes to remove in-water structures associated with the South Bay Power Plant within tidal waters of San Diego Bay. The voids left by removing the intake structures will be filled in to match the slope and substrate of the adjacent shoreline. The remaining structures will be removed by crane with minimal impact to the shoreline and bay floor, with the exception of four discharge structures, which will be structurally sealed in place.	NOD	
2008042029	East Side Potter Valley Road Improvement Project Mendocino County --Mendocino The project involves three encroachments: 1) at Mile Post (MP) 5.23, replace an existing 42-inch metal arch culvert (MAC) with wither: a) a new 42-inch MAC or b)	NOD

	an 8X5-foot concrete box culvert, 2) at MP 5.50, replace an existing 36-inch culvert with a 48-inch culvert and 3) remove up to 0.25 acres of riparian trees (measured in tree canopy area) between P.G&E. power poles 16 and 17, 24 and 26, and 62 and 64. Mitigation for various aspects of the overall project including removal of riparian trees will be accomplished by an approved conservation easement on eight acres in the Potter Valley area.		
2011091085	Santa Maria Energy Oil Drilling and Production Plan Santa Barbara County --Santa Barbara This proposed project involves the installation of an 8-mile long, 16-inch diameter polyvinyl chloride (PVC) buried recycled water pipeline.	NOD	
	The Project will result in temporary impacts to 4.04 acres of California tiger salamander (<i>Ambystoma californiense</i>) upland habitat. The project is expected to result in incidental take of California tiger salamander, which is designated as a threatened species under the California Endangered Species Act. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.		
2012082027	Facebook West Campus Remedial Action Plan Toxic Substances Control, Department of Menlo Park--San Mateo The Sobrato Organization (Project Sponsor) would demolish the existing buildings, surface parking, and landscaping at the Project site. The Project would construct two four-story office buildings (approximately 129,960 sf each; 259,920 sf total) with surface parking and landscaping. The proposed buildings would provide flexible design for office , biotech, and/or research and development (R&D) uses with a capacity of approximately 1,300 employees. In order to develop the Project site to the desired height of 68 feet, the Project requires rezoning to the M-2(X) (General Industrial, Conditional Development) zoning district with a corresponding Conditional Development Permit (CDP).	NOD	
2013102020	Interstate 680 Southbound High Occupancy Vehicle (HOV) Gap Closure Project Caltrans #4 Walnut Creek--Contra Costa The project will add a High-Occupancy Vehicle (HOV) Lane in the southbound direction on Interstate 680 in Contra Costa County, between 0.6 mile north of the Livorna Road interchange in Alamo and 0.2 mile north of the Geary Road interchange in Walnut Creek.	NOD	
2013122050	The 2014 Fisheries Restoration Grant Program Fish & Wildlife #2 --Humboldt The project is limited to removing a concrete sill from Olds Creek. The sill is approximately 43 feet across by 10 feet tall and 3 feet thick. Abutments about 6 feet wide on both sides of sill will not be removed in order to maintain streambank stability. Instream habitat features will be installed at 15 locations including large wood/root wads.	NOD

2014032039	Decker Island Electrical Crossing Reclamation District 341 Rio Vista--Sacramento, Solano The project will extend electrical supply from existing PG&E lines on Sherman Island to the existing Decker Island operation via a buried electrical cable. The approximately 1,100-foot cable will cross approximately 900 feet of Horseshoe Bend, a branch of the Sacramento River, which separates Decker Island from Sherman Island. The cable will be trenched under Horseshoe Bend. The State Lands Commission action is an approval of a 25-year General Lease - Right-of-Way Use through August 14, 2039.	NOD	
2014041018	Crosby & Overton Inc. RCRA Hazardous Waste Facility Permit Renewal Toxic Substances Control, Department of Long Beach--Los Angeles DTSC is considering approval of a permit renewal for the Resource Conservation and Recovery Act Hazardous Waste Facility Permit for the existing Crosby & Overton, Inc. (C&O) Facility for the treatment and storage of hazardous wastes pursuant to Health and Safety Code Chapter 6.5. The C&O Facility is an existing privately owned hazardous waste storage, treatment, and transfer facility. The Facility operates under an existing RCRA Hazardous Waste Permit issued in 1993 by the California Department of Toxic Substances Control (DTSC). The existing permit expired on July 1, 2003; however, C&O is permitted to operate under the existing permit since the application for renewal was submitted on a timely basis. The renewal of the permit authorizes the Facility to continue to operate the same activities and under the same terms and conditions as the current permit for another 10 years.	NOD	
2014051019	Santa Ana River Trail (SART) Phase III Project San Bernardino County San Bernardino, Redlands--San Bernardino The County of San Bernardino (the County) is proposing to improve Needles Highway along a 16-mile segment beginning at "N" Street within the City of Needles, continuing northerly to the California/Nevada state line.	NOD	
2014051102	Adoption of Master Reclamation Permit for USMC Camp Pendleton Northern Regional Tertiary Treatment Plant Regional Water Quality Control Board, Region 9 (San Diego), San Diego --San Diego The project consists of adoption of a Master Reclamation Permit for the Northern Tertiary Regional Tertiary Treatment Plant (NRTTP). The NRTTP will provide tertiary treatment of domestic wastewater generated on the northern portion of the Marines Corpse Base Camp Pendleton.	NOD	
2014052061	Scott River Bioengineered Streambank Enhancement Siskiyou Resource Conservation District Etna--Siskiyou The project is limited to using streambank bioengineering techniques along 650 linear feet of the western bank of the Scott River to restore and stabilize an actively eroding bank, which is currently causing agricultural fields to slough into the river adding fine sediment to a reach that provides spawning and rearing habitat for Chinook and coho salmon. If left untreated, the continued erosion has the potential to flank behind existing riparian vegetation and cause significant damage to both instream riverine habitat, as well as agricultural production.	NOD

2014071005	Super Creek Quarry Expansion Revised BLM Plan of Operations and Amended Reclamation Plan No. 137 Conservation, Department of --Riverside Implementation of a reclamation plan and Plan of Operations on BLM land involving expansion of an existing decorative rock quarry to add 33.4 acres of active quarry and 21 acres of undisturbed area, mining of two hilltops, development of two new waste rock placement areas, installation of additional sediment basins and drainage controls, and completion of final grading and revegetation. Extraction methods remain the same as current operation. No expansion of annual production, and no change of amount of material hauled off-site to nearby retail facility. Projected life of operation is 25 years.	NOD	
2014072026	Delta Coves Utility Project Diablo Water District Oakley--Contra Costa The main objective of the Delta Coves Utility Project (the "Project") is to serve the future residents of Delta Coves with potable water for domestic and fire suppression purposes and natural gas from the PG&E gas pipeline. Additionally the new trunk line will provide water for new fire hydrants to be installed along Bethel Island Road between the Bethel Island Bridge and Sandy Lane. The Delta Coves EIR provided analysis for up to 498 single family dwellings, 110 condominium units, and associated commercial/recreational area, and is located entirely within the service boundary of the Diablo Water District (DWD). The final map for the Delta Coves community currently includes 494 single-family dwellings, and 66 condominium units. DWD will provide potable water, and Pacific Gas & Electric Company (PG&E) will provide natural gas service to Delta Coves and Bethel Island through completion of the following components of the Delta Coves Utility Project: 1) Delta Coves Off-Site Water Trunkline, 2) Delta Coves Off-Site Gas Pipeline, 3) Chloramination Plant, 4) Pump Station, 5) Water Reservoir, 6) Bridge Crossing, and 7) Completion of Water Line Loop (on-Site) within Delta Coves. 	C-FS (Freeway Service Commercial) zone. This parcel is not under a Williamson Act contract. The property is zoned C-FS (Freeway Service Commercial) and the General Plan designation is C/FS (Freeway Service Commercial). The project site is located on the east side of State Route 99 West Frontage Road, 600 feet north of Woodson Road, north of Lodi. (APN/Address: 005-160-19/24323 N. State Route 99 West Frontage Road, Acampo) (Supervisory District 4).		
2014098001	Sidewalk Reconstruction Caltrans #6 Chowchilla--Madera Reconstructing damaged segments of existing sidewalk on State Route 233, Robertson Boulevard. Construction activities include removal of damaged sidewalk, prepare subsurface for new concrete, place concrete forms, and pour new concrete. The work would match the edge of the existing sidewalk sections that do not require reconstruction.	NOE	
2014098002	Transfer of Coverage to El Dorado County APN 034-172-08 (Lowe) Tahoe Conservancy --El Dorado Project consists of the sale and transfer of 1,008 sq. ft. of potential coverage rights from Conservancy-owned land to a receiving parcel on which a private residence will be constructed. The transfer enables the receiving landowner to carry out the project without any net increase in the amount of existing land coverage in the hydrologically-related area.	NOE	
2014098003	Stockton 99 Ramp Meters (10-1C420_) Caltrans #10 Stockton--San Joaquin Project will install ramp meter systems & Single Mode Fiber Optic Cables along the ramps under the existing communication conduit under the median barrier on SR99. Work will also include; ramp widening to provide a High Occupancy Vehicle preferential lanes, CHP & maintenance vehicle pullouts.	NOE	
2014098004	CAPM (10-0W190_) Caltrans #10 --San Joaquin Proposed project would extend the service life of the pavement. This will improve the safety of the SR99 from PM 22.9/38.8.	NOE	
2014098005	TUO 120 Slope Repair (10-0W800_) Caltrans #10 --Tuolumne Project will stabilize the Hilfiker Wall adjacent to SR 120 in order to prevent further displacements and ultimately protect the integrity of the roadway. This project will improve safety on SR 120.	NOE	
2014098006	CAPM (10-0X160_) Caltrans #10 --Amador A traffic signal installation project at the intersection of Sutter Street and SR-49. This project will improve the safety for the area.	NOE

2014098007	Riverbank/Hilmar Rumble Strips (10-0X320_) Caltrans #10 --Merced Project will reduce the number and severity of cross-centerline head-on collisions and install centerline rumble strips along both passing zones/no passing zones to alert motorists when they have crossed the centerline. The shoulder rumble strips & tactile vibrations/audible rumbling will improve the safety on SR165.	NOE	
2014098008	Old River Bridge CAPM (10-3A750_) Caltrans #10 --San Joaquin Project will extend the service life of the pavement on the SR 4 from post mile 0.0/8.3.	NOE	
2014098009	Crosstown AWS (10-0X970_) Caltrans #10 Stockton--San Joaquin The scope of the work includes installing two Changeable Message signs (CMSs), two Close Circuit Television cameras (CCTVs) and six Traffic Monitoring Stations (TMSs).	NOE	
2014098010	SR-120 MAAG Road CAPM Caltrans #10 --Stanislaus The scope of work includes cold plane and asphalt concrete overlay to extend the life of the existing pavement and to provide a smoother riding pavement surface. The project will improve the safety of the area between PM: 6.1/11.3.	NOE	
2014098011	Stanislaus CAPM (10-0V660_) Caltrans #10 --Stanislaus This project will preserve and extend the pavement of the mainline, entrance and exit ramps. It will also improve STAA trucks turning radius at the southbound I-5 off-ramp to SR-140 eastbound (NE corner) and at the westbound SR-140 to I-5 and will improve the safety on SR120.	NOE	
2014098012	Fowler Ave Left Turn (10-0U290_) Caltrans #10 --Merced Project will install left-turn lanes for both the north and southbound directions on SR 165. The shoulders will be widened to 8 feet. The widening will require drainage work and utility relocation Fowler Avenue will be realigned improving the safety for the Fowler Avenue intersection.	NOE	
2014098013	Bank Stabilization Project at the Closed Pedley Landfill (Project) Fish & Wildlife #6 Riverside--Riverside Project site is a landfill that has not operated since approximately 1958. In 2010, severe rain caused a portion of the North Slope along the Santa Ana river to erode, along with a portion of the landfill aside the De Anza Channel. Therefore, a permanent improvement to the landfill was proposed but, due to timing in order to obtain the appropriate permits and funding, a less permanent improvement was completed in June, 2011. Subsequently, in 2014 a spring storm caused erosion to the landfill along the Santa Ana River and the De Anza Channel.	NOE

Bureau of Indian Affairs --Riverside The subject property consist of four parcels of land, encompassing ~138.60 acres more or less, commonly referred to as the "Beylik" property. The parcels are contiguous to trust lands. This parcel of land is within the Traditional Use Area of the Tribe. In systematically acquiring its aboriginal territory, the Tribe seeks to consolidate its land based, provide for the opportunity to diversity its economic development and protect its natural and cultural resources. While there is no specific development proposal for the property, it has the potential for exceptional highway commercial development.	BIA	10/02/2014				
2013121019	General Plan Land Use and Circulation Elements Update San Luis Obispo, City of --San Luis Obispo FYI Final The Proposed project is an update to the City's Land Use and Circulation Elements. The Land use Element designates the general location and intensity of housing, business, industry, open space, education, public buildings and facilities, and other land uses. It helps guide neighborhood preservation, revitalization, and enhancement and protects environmental resources. The Circulation Element includes goals and policies relating to how residents, products and visitors move around San Luis Obispo. This element addresses cars, bicycles, pedestrians, air, rail, and public transportation. As part of the update, small changes in the definition of the zoning designations are expected and specific sites will be evaluated for changes to the current designations.	FIN

2014091010	La Palma Freeway Overlay District La Palma, City of La Palma--Orange The City of La Palma is proposing the adoption of a new zoning overlay district entitled "Freeway Overlay District (FO)" to allow for the construction of pole signs and billboards on land adjacent to and abutting SR 91 right-of-way within city boundaries. The FO designation is intended for certain areas of non-residential land uses adjacent to the freeway that provide special information display opportunities and require a tailored approach to planning and design. The designation is intended to allow for information dissemination from freestanding display structures including both static information displays and electronic/digital displays. The ordinance allows for a number for a number of sign standards that are intended to apply to signs in all zoning districts. The proposed FO District will encompass fourteen separate parcels on either side of SR-91.	MND	10/02/2014

Work will excavate and pour a new concrete pad to install a new power transformer and fencing around the transformer; in the warehouse build new walls to subdivide the building into a battery room and switchgear room, remove an existing wall between room 1304 and 1305 to provide space for new main switchboard, add new concrete curbs, doors, relocating sprinklers, light fixtures and switches. In the data center install new conduit and wiring, add and/or upgrade electrical and computer equipment.	NOE	
2014098056	St. Helena Hospital Part 2 Emergency Grant Funding State Water Resources Control Board St. Helena--Napa The State Water Resources Control Board (SWRCB) is a responsible agency for this project. SWRCB's Safe Drinking Water Proposition 84 Program is providing state funds for the project. St. Helena Hospital proposes a project that includes the reduction of turbidity in the storage that supplies water to the water system. Turbidity was increased as a result of the seismic event on August 24, 2014 near the city of American Canyon, California. Turbidity increased to 34.9 NTU and now causes the potential for bacteria to grow in the water supply. Activities to reduce the turbidity include vacuuming the interior of the 1 million gallon storage tank.	NOE

2013091070	SDG&E Master Special Use Permit (MSUP) and Permit to Construct (PTC) Power Line Replacement Projects Public Utilities Commission Pauma Valley--San Diego, Orange SDG&E's proposed MSUP/PTC Power Line Replacement Projects would consolidate over 70 existing special use permits for SDG&E facilities within the Cleveland National Forest (CNF) into one MSUP to be issued by the Forest Service. The MSUP would allow the continued operation and maintenance of approximately 102 miles of SDG&E's existing 69 kV transmission line (TL) also referred to as power lines, 12 kV circuits (C) also referred to as distribution lines and ancillary facilities, as well as approximately 34 miles of existing access roads require to maintain and operate SDG&E electric facilities within the CNF.	EIR	10/20/2014
2013111019	Heacock Channel Improvement Project March Joint Powers Authority Moreno Valley--Riverside The proposed project alignment generally follows the existing Heacock Channel starting at the intersection of Cactus Avenue and Heacock Street. It runs parallel to Heacock Street for approximately 9,800 lineal feet where it terminates at the recently improved Heacock Street Bridge at Perris Valley Channel - Lateral A. The proposed Project is aligned to follow the existing drainage pattern of the earthen Heacock Channel and will be designed to contain the 100-year flood discharge to reduce flooding impacts currently experienced by the residential, commercial, federal, public and privately owned properties within the vicinity of the Channel. Due to numerous site constraints and the limited area available for improvements, this approximately 9,800 lineal feet will be designed a fully concrete lined channel.	EIR	10/20/2014

2014092022	Weitchpec Slips Project 01-0B440 Caltrans #3 --Humboldt The Weitchpec Slips Project (01-0B440) consists of roadway stabilization and repairs on SR 169 in Humboldt County from post mile (PM) 26.4 to 29.9. The repairs are needed due to damage from a series of slipouts and a slide that occurred as a result of the March 2011 storm event. The slide and slipouts are located at PM 26.45, 29.04 and 29.8. Slipouts at PM 26.45 and 29.04 are both located on the downhill side of the roadway. The slide and slipout damage at PM 29.8 is on both the uphill and downhill sides of the roadway.	MND	10/06/2014
2014092023	Victory Road Bridge Replacement at Lone Tree Creek (BR. No. 29C-356) San Joaquin County --San Joaquin The proposed Project consists of replacing the existing bridge structure on Victory Road over Lone Tree Creek. The existing bridge has structurally deficient status and a sufficiency rating of 48.3 which make the bridge eligible for replacement under the Federal Highway Bridge Program (HBP). The replacement bridge would consist of a single span Cast-in-Place Concrete Slab structure. The replacement bridge would be designed to AASHTO standards and would consist of two 12-foot wide travel lanes, two 4-foot wide shoulders, and bridge railing for an overall bridge width of 34 feet 10 inches. The new bridge is anticipated to be approximately 40-feet in length. Work associated with the replacement bridge would include reconstruction of the approaches on Victory Road on the north and south side of the bridge.	MND	10/06/2014
2006012020	South San Francisco Bay Shoreline Phase I Study California State Coastal Conservancy Fremont, Milpitas, Palo Alto, San Jose, Sunnyvale, ...--Alameda, Santa Clara -Reduce the risk to public health, human safety, and the environment due to tidal flooding along the South Bay shoreline in Santa Clara County. - Reduce potential economic damages due to tidal flooding in areas near the South Bay shoreline in Santa Clara County. - Increase contiguous tidal marsh to restore ecological function and habitat quantity, quality, and connectivity in the Study Area for native, resident plant and animal species, including special-status species such as steelhead trout, CA clapper rail, and salt marsh harvest mouse. - Provide opportunities for public access, education, and recreation in the Study Area.	NOP	10/03/2014
2014091011	Riverwalk Residential Development Project Long Beach, City of Long Beach--Los Angeles The proposed project consists of subdivision and development of the 10.56 acre project site into a gated residential community containing 131 detached single family homes on lots with a minimum sf of 2,400 sf. The proposed homes would be a mixture of 2 and 3-stories with a maximum height of 35'6". The development would be served by internal, privately maintained streets connected to the existing neighborhood by Daisy Avenue. The development would include 262 private garage parking spaces and 40 on-street guest parking spaces located along the development's internal streets. It would also include a private recreation center, a pocket park, and private access to the bike/ped path along the Los Angeles River. All common property, including these amenities and common streets, would be managed by the future HOA.	NOP	10/03/2014

<u>Documents Received on Thursday, September 04, 2014</u>			
2014098067	<p>Upper Stevens Meadow Restoration Project (SNC 802) Sierra Nevada Conservancy Susanville--Lassen</p> <p>The Lassen Land and Trails Trust, the conservation easement holder, is requesting \$115,385 in funding from the Sierra Nevada Conservancy's Proposition 84 Safe Drinking Water, Water Quality and Supply, Flood Control, River and Coastal Protection Grant Program to implement the removal of encroaching lodgepole pine on approximately 90-acres of the 640-acre property along Pine Creek within Upper Stevens Creek Meadow in Lassen County. The proposed project would remove encroaching lodgepole pine using both mechanical and hand treatment methods. The lodgepole trees would be used for a zigzag fence. Harvested trees not needed for fencing would be chipped and transported to biomass energy facility; however, these activities (chipping and transporting to a biomass energy facility) would provide off-set costs and are not part of the proposed project. The encroaching lodgepole pine threatens to impair the plant community through altered hydrology, shade, and changing soil composition. The loss of the meadow would impact Pine Creek, and ultimately Eagle Lake, by increasing water speed, erosion and sediment loads, flooding events, and would alter the native plant communities along the length of the stream. Therefore, by removing the encroaching lodgepole pine trees, the proposed project would maintain the native meadow plant community, protect the vegetation along the banks of Pine Creek, and would improve water quality and wildlife habitat.</p>	NOE	
2014098068	<p>Alpine County Hazardous Fuels Reduction and Healthy Watershed Project (SNC 798) Sierra Nevada Conservancy --Alpine</p> <p>Alpine County is requesting \$170,000 in funding from the Sierra Nevada Conservancy's Proposition 84 Safe Drinking Water, Water Quality and Supply, Flood Control, River and Coastal Protection Grant Program to reduce fuel loads and the threat of wildfire within the County's right-of-way, involving eight County Roads in Alpine County. The proposed project is designed to treat dense fuel loads that have built up within the County's right-of-way, which extends 30 feet beyond the centerline of the roadways. The proposed treatment locations are dominated by easily ignitable light fuel (sage, grasses and thickets of young pine). The dense fuel loads that are located within County right-of-way are adjacent to larger forested areas. Human-caused ignitions of wildfire often occur as a result of accidents, over-heated vehicles, tow chains, or discarded cigarettes. The reduction in fuel loads along the roadway right-of-way would reduce the threat of catastrophic wildfires. In addition, the reduced fuel loads along County roadways not only provide fuel breaks, but safer work areas for fire suppression crews.</p>	NOE	
2014098069	<p>Install GPS Antennas General Services, Department of Sacramento--Sacramento</p> <p>Project will install two GPS antennas to support Network Time Protocol servers for the Department of Health Care Services computer network. The antennas will help sync the time servers and increase computer network security for DHCS and will include installation of antenna wire, support poles, and mounting hardware. Work will install one antenna mast and use one existing mast to install two new GPS antennas. The support poles/masts will be approximately 20 feet in height and about 3 feet apart located behind the rooftop solar panel structure. Additional work will run cables to the interior space and install server components. The</p>	NOE

2014092021	General Plan Amendment & Rezone Application No. PLN2014-0080 - Salida Market Stanislaus County --Stanislaus Request to amend the General Plan designation of Medium Density Residential to Planned Development and rezone from C-2 to P-D on a .33 acre parcel in order to replace a 4,406 sf building with an 8,761 sf building to be used as a retail market. The proposed rezone is intended to address parking requirements and allow additional lot coverage. Proposed hours of operation are daily, from 7:00 a.m. to 10:00 p.m., year round. The project will have eight employees on a maximum shift and approximately 30 customers during peak times.	CON	09/25/2014
2012102061	NorCal Logistics Center Stockton, City of Stockton--San Joaquin The applicant, Arch Road L.P., proposes to further subdivide approximately 325 acres of its 495-acre property. The project site is comprised on two non-adjacent portions: an approximately 50-acre southern portion (at the southern end of the property) adjacent to Arch Road, and an approximately 275-acre northern portion (at the north end of the property) adjacent to Mariposa Road. The entirety of applicant's property is presently zoned for the development of industrial uses, "as of right," within the City of Stockton. The proposed subdivision will not enlarge nor change the industrial development already allowed on the property.	EIR	10/22/2014
2014042050	2555 Park Boulevard Palo Alto, City of Palo Alto--Santa Clara The project would demolish the existing building and construct a new 23,269 sf office building and onsite parking. The existing building was constructed in 1964 and appears eligible for inclusion in the California Register under criteria 3.	EIR	10/20/2014
2014051061	LAC+USC Medical Center Master Plan Los Angeles County Los Angeles, City of--Los Angeles The LAC+USC Medical Center Campus Master Plan would guide future development on the campus over a period of approximately 25 years (2015-2040) and would influence the delivery of health care services and health-related community programs. Development under the master plan would include the construction of new, or renovation of existing, office space for medical uses; retail space; open space; and parking. Demolition of some existing buildings and structures would be required to accommodate new development. Full buildout of the master plan could result in a total of approximately 1,725,000 sf of development throughout the campus.	EIR	10/20/2014
2013122044	North Flynn Road Slipout Caltrans #6 Livermore--Alameda The California Department of Transportation (Caltrans) proposes to repair and permanently restore a storm-damaged median slipout on westbound Interstate 580 near Livermore in Alameda County about one mile east of North Flynn Road (post miles R4.9 to R5.6). Included in the project is the construction of a tie-back retaining wall, the reconstruction of the number one lane, the widening of the inside shoulder, placement of a concrete barrier, the repair or modification of a	FIN

	drainage facility, and the relocation of electric conduit (Caltrans power line).		
2014091014	ENV-2014-1352-MND / 380 East Pershing Drive Los Angeles, City of --Los Angeles The proposed project includes the demolition of two existing 2-story duplex buildings with a total area of 4,830 sf and the construction of a new 2-unit, 3-1/2 story over basement condominium building with an attached garage in the R2-1 Dual Jurisdictional Coastal Zone. The maximum height of the building is 45-feet. The project requires less than 500 cubic yards of grading, 220 cubic yards of cut, 0 cubic yards of fill and 220 cubic yards of import/export. The project does not require the construction of retaining wall(s), and does not require the removal of protected trees.	MND	10/06/2014
2014092009	2012-042 Cottage Springs Resort Calaveras County --Calaveras The applicant is requesting approval of a Zoning Amendment (ZA) and Conditional Use Permit (CUP) to operate a family snow play and tube hill operation located at the site of the former Cottage Springs Ski Area. The ZA would rezone the entire 67.25 acre property from Unclassified-Highway Service (U/HS) to Recreation (REC). Title 17 requires approval of a CUP in the REC zone to operate this type of recreational activity.	MND	10/06/2014
2014092011	Silver Oak Estates Clayton, City of Clayton--Contra Costa The proposed project site contains several buildings associated with the former Yolanda Estate. An extant dwelling, garage, tank house, bath house, and several horse barns are on-site. An unimproved road winds through the site. An old fruit orchard occurs on the southern portion of the site.	MND	10/06/2014
2014092013	Z14-0002/PD14-0001/TM14-1515/Wilson Estates El Dorado County --El Dorado 1. Rezone the 28.18-acre parcel from One-Acre Residential (R1A) to One-Acre Residential-Planned Development (R1A-PD) and Open Space-Planned Development (OS-PD). 2. Tentative subdivision map and development plan to create 28 single-family lots ranging in size from 20,004 to 43,572 sf in size and one interior private road lot; two lettered lots for open space, drainage and waterline, and one "new construction" road lot.	MND	10/06/2014
2014092015	Inn Town Campground Use Permit Nevada City Nevada City--Nevada Use permit application of Inn Town Development, proposing to amend an existing use permit, approved in 1997, to expand the recreational use of the property by constructing a recreational 70-unit campground facility to include a variety of camping options with a 3,000 sf community building, swimming pool, and hiking trails. The prior use was a tourist train operation throughout the site. The existing rail track was removed and the roadbed will be used for access roads and emergency access. The site contains a historic Chinese Cemetery and remnants of the New and Old Mohawk Mine Shafts; these sites will be enhanced and made available for public view, education and preservation. The use permit includes a	MND	10/06/2014

	24-hour camp host to oversee the operation. Tree removal of 162 trees within building footprints is less than 10% of approx. 2000 trees on site.		
2014092016	Routine Maintenance of Stream Channel and Drainage Facilities Rancho Cordova, City of Rancho Cordova--Sacramento The City of Rancho Cordova's Stormwater Program and drainage services and administered by the City's Public Works Department which includes engineering, regulatory compliance, and operations and maintenance of the storm drain system. The City is approximately 34 square miles, relies on approximately 88 miles of creek, 17 miles of unlined open channels and 5 miles of concrete-lined channels to convey stormwater, and manages many detention/water quality basins. To continue City maintenance activities within jurisdictional components of the creek and stormwater system, the City is required to enter into a new Routine Maintenance Agreement (RMA) with CDFW that meets the current code requirements.	MND	10/06/2014
2014092017	Calaveritas Road Bridge Replacement Project Calaveras County --Calaveras The existing Calaveritas Road Bridge would be removed and replaced with a single span 110-foot long by 26-foot wide (24 foot clear traffic width) cast-in-place post-tensioned concrete box girder bridge. The north abutment would be founded on a pile footing due to a potential void at its location and the south abutment would be founded on a spread footing due to the presence of competent rock near the surface. The new bridge would have a structure depth of five feet and a profile grade approximately 4.5 feet higher than the existing bridge. The bridge profile is being raised to provide adequate hydraulic clearance over Calaveritas Creek. In order to accommodate the desire of local residents to preserve the aesthetics of the existing bridge, the new bridge would reuse the existing trusses as a non-load-bearing aesthetic feature.	MND	10/06/2014
2014092018	Monge Range Road Bridge Replacement Project Calaveras County Murphys--Calaveras The existing Monge Ranch Road Bridge would be removed and replaced with a single span 60 feet long by 25.5 feet wide (22 foot traffic width) precast pre-stressed concrete slab bridge. The concrete slab superstructure would be connected to the abutments with pins that transfer much of the soil lateral load behind the abutment into the superstructure, thus reducing the size of footing at the abutments. The abutments are expected to be founded on pile footings due to the depth to bedrock and scour concerns. Caltrans Standard Type 80 reinforced concrete barrier would be provided along each edge of the bridge deck.	MND	10/06/2014
2007031091	Jacobs Medical Office Building - Planning Case P14-0216 and P14-0221 Riverside, City of Riverside--Riverside The project, as proposed by Pacific Medical Buildings and Jacobs Development Company on behalf of the Riverside County Office of Education, involves the development of a three-story, 65,281 sf medical office building with related parking and landscaping on ~4.2 acres. A portion of the subject property is an archaeological site known as Riverside's second Chinatown, City Landmark #19, County Landmark, State Point of Historical Interest and listed on the National Register of Historic Places. A variance would be required as a result of on-site	NOP	10/06/2014

2014098099	James Property Pond Fish & Wildlife #3 Petaluma--Sonoma The project is limited to the modification of the existing spillway on a small irrigation pond by lowering it 1.6 feet in order limit the pond volume to 20-acre foot. The project is being undertaken in order to comply with the requirements of a State Water Resources Control Board small irrigation registration. The project will include grading approximately 400 cubic yards of material to create a new spillway at a reduced elevation, placement of concrete cutoff walls on the upstream and downstream ends of the spillway, and placement of a 10-foot long by 8-foot wide section of rock slope protection within the spillway outfall. SAA #1600-2014-0241-3.	NOE	
2014098100	Port of Stockton Maintenance Dredging Docks 16 Through 20 Fish & Wildlife #3 Stockton--San Joaquin The project is limited to maintenance dredging of sediments from in front of existing docks 16-20 at the Port of Stockton's West Complex on the Stockton Deep WaterShip Channel. Maintenance dredging will re-establish the 35 feet below mean lower low water (MLLW) at docks 16-20. Dredged material will be removed by a hydraulic dredge and transported via pipeline to the designated dredge material confinement area (DMCA) on Roberts Island No. 1. SAA # 1600-2014-0170-R3.	NOE	
2014098101	Port of Stockton Maintenance Dredging Docks 2, 3, 12, and 13 Fish & Wildlife #3 Stockton--San Joaquin The project is limited to maintenance dredging of sediments from in front of existing docks 2, 3, 12, and 13 at the Port of Stockton's East Complex on the Stockton Deep Water Ship Channel. The berthing areas at docks 2 and 3 will be dredged to a depth of 35 feet below mean lower low water (MLLW). The berthing areas at docks 12 and 13 will be dredged to a depth of 40 feet below MLLW. Dredged material will be removed by a hydraulic dredge and transported via pipeline to the designated dredge material confinementarea (MDCA) on Roberts Island No. 1 and/or a portion of Rough and Ready Inland. SAA #1600-2014-0169-R3.	NOE	
2014098102	Soquel Pioneers Tree Removal Project Fish & Wildlife #3 --Santa Cruz The Project is limited to risk management pruning of one bay laurel tree estimated to be 120 feet in height. The tree has three co-dominant trunks. Trunk 1a measures 68 inches at diameter at breast height (DBH). The entire trunk of trunk 1a will be removed to 10 feet above grade. Trunk 1b measures at DBH with one basal stem measuring 12 inches at DBH. Trunk 1b will be removed to 6 feet above grade. Trunk 1c measures 43 inches at DBH. Trunk 1c will be removed above the major scaffold limb to 20 feet above the root collar and the scaffold limb will be shortened to 10 feet form its attachment to the main trunk. SAA #1600-2014-0074-R3.	NOE

2014098109	Alta Sierra Mutual Water Company; Horizontal Well #12 State Water Resources Control Board --Kern The State Water Resources Control Board (SWRCB) as the lead agency will be issuing a water supply permit. The Alta Sierra Mutual Water Company proposes to operate a previously drilled horizontal well, well 12.	NOE	
2014098110	Drought Emergency Grant Funding Request for Valley Teen Ranch State Water Resources Control Board --Madera The State Water Resources Control Board (Board) is a lead agency for this project. The Board's Public Water System Drought Emergency Funding Program is providing state funds for the project. The proposed project includes funding the hauled water and covering the cost of the well rehabilitation work including pulling the pump and the downhole video inspection. Once Well No. 1 is put back online, the Valley Teen Ranch will disconnect from the agricultural well that they are currently connected to.	NOE	
2014098111	Drought Emergency Grant Funding Request for Madera County Maintenance District #60-Dillon Estates (MD60) State Water Resources Control Board Madera--Madera The State Water Resources Control Board (Board) is a responsible agency for this project. The Board's Public Water System Drought Emergency Funding Program is providing state funds for the project. MD60 proposes to perform pump repairs and evaluate Well No. 1 as well as haul water in the event that the well is not producing enough water to meet the demands of the MD60 customers. The interim repairs include a temporary above-ground connection between the new well that was drilled during the Proposition 84 feasibility study and the existing MD60 storage tank. The work consists of the installation of a temporary pump, electrical work, and approximately 1,640 feet of temporary 4-inch diameter water pipe.	NOE

2013072057	Talmage Road/Southbound U.S. 101 On-Off Ramps Realignment Project Ukiah, City of Ukiah--Mendocino The City of Ukiah is proposing to modify and reconstruct the southbound portion of the US 101 interchange with Talmage Road (SR 222) to provide additional capacity in order to address future impacts associated with regional growth and protected growth in the Airport Industrial Park. The purpose of the project is to alleviate congestion and improve traffic operations and safety for the southbound Highway 101 on and off ramps and along the Talmage Road corridor. The project includes a partial cloverleaf interchange configuration with a new signalized intersection at the southbound ramp terminus with Talmage Road. There would be three left turn lanes onto westbound Talmage Road and one eastbound lane. Two dedicated left turns would be provided into the Airport Industrial Park. The existing southbound off-ramp would be removed. The new signalized intersection at Talmage Road and the southbound on/off ramp are proposed to be interconnected and coordinated with the existing signalized intersection at Talmage Road and Airport Park Blvd. Other proposed improvements include new sidewalks, signing, striping, medians, and safety lighting.	EIR	10/22/2014		
2014072017	Lilly Gap Forest Health Project, Phase 2 (SNC 794) Sierra Nevada Conservancy --Calaveras The BLM is requesting approximately \$185,000 in funding from the Sierra Nevada Conservancy's Proposition 84 Safe Drinking Water, Water Quality and Supply, Flood Control, River and Coastal Protection Grant Program to reduce the risk of large damaging wild fires, thereby preventing erosion and enhancing overall forest health in the Lilly Gap area in the Sierra National Forest. The proposed project is the second phase of the 420-acre Lilly Gap Forest and Watershed Health Project, and is part of the Lilly Gap Biomass Demonstration Project (CA-180-10-25) for fuels reduction and ecosystem restoration for watershed protection. The total 420-acre Lilly Gap project area is located on BLM administered public lands on forested slopes adjacent to the Mokelumne River that has not experienced fire in decades.	FIN

	uses that will be within the maximum floor area (1.3:1) allowed under the Urban Mixed Use-North (MU-N) zoning designation. The proposed building height is approximately 38 feet, which is within the 175 feet allowed under the MU-N zoning designation.		
2014091017	Water System Improvement Project Washington Unified School District --Fresno The Proposed Project consists of the development of a new well, installation of approximately 3,800 linear feet of water distribution pipeline and hydrants within the existing County of Fresno road rights-of-way, and connection to the existing Washington Colony School water supply system (located approximately 600 ft east of Washington Union High School).	MND	10/07/2014
2014092020	Housing Element 2015-2023 Palo Alto, City of Palo Alto--Santa Clara Update of the City of Palo Alto Housing Element 2015-2023.	MND	10/07/2014
2014092026	840 West Napa Street Apartments Sonoma, City of Sonoma--Sonoma The proposal involves developing the 1-acre site with 11 residential apartments. No subdivision into individual lots or condominiums is proposed. The project narrative indicates that the development is intended to provide "an opportunity for rental housing that is not often available in Sonoma". The apartments would take the form of ten duets divided between five detached buildings, and one detached unit. The apartments are arranged along a private drive on the west side of the site that would access the development from both West Napa Street and West Spain Street. Four of the apartments would be two-story structures featuring 2 bedrooms and 1 1/2 baths and four of the apartments would be one-story structures featuring 2 bedrooms and one bath. Three of the apartments, designated as affordable units, would be single-story structures with two-bedroom and one bath. Living areas for the units would range from 916 to 1,280 sf. Building heights range from 16 feet (for the one-story units) to 25 feet measured to the roof peak. Each apartment unit would have a one car attached carport with a parking apron in front of the carport. In addition to carport and apron parking, four guest parking spaces are proposed along the driveway.	MND	10/07/2014
2014092040	AT&A Mobility//S.A.C. Alameda County Livermore--Alameda The request is to construct and operate two new telecommunications faux tower facilities in the Altamont Pass area.	MND	10/14/2014
2013102027	Empire Storm Drain Project Stanislaus County --Stanislaus The proposed project is a Low Impact Development storm water system which includes the installation of sidewalks and bio-retention swales for storm water storage and provides storm water quality treatment through natural soil percolation. The swales provide attenuation storage and opportunities for pollutants to settle and be retained within the wale area without having a need to discharge the storm water into receiving waters of the State. This document has been completed to meet US Dept. of Agriculture "Environmental Report"	Neg	10/07/2014

	requirements in compliance with the CEQA and NEPA.		
2014091019	SPR15-00005 Hesperia, City of Hesperia--San Bernardino A Site Plan Review SPR14-00005, to construct an 85-foot high, 750 sf City Freeway Pylon Sign which includes a 364 sf digital display.	Neg	10/08/2014
2014092024	PA-1400116 (SA) San Joaquin County --San Joaquin A Site Approval application to construct a 16.0-acre, 1.82 megawatt solar power facility. This is an unmanned facility. The project site will include a switch yard to connect existing transmission lines to the ground mount units. The applicant is requesting a surfacing modification.	Neg	10/07/2014
2014092028	PA-1000131 (UP) Time Extension San Joaquin County Lodi--San Joaquin A time extension for a previously approved Use Permit application for a truck stop. The project includes 16 pumps and 24 fueling stations to serve 16 gasoline and 8 diesel fueling positions. The project also includes a 7,700 sf convenience store with an attached 3,000 sf fast food restaurant, and a 1,200 sf storage building.	Neg	10/07/2014
1994072021	ADOPTION OF CARSON CREKK SPECIFIC PLAN El Dorado County EL DORADO HILLS--EL DORADO/SACRAMENTO The El Dorado County (County) prepared a Final Program Environmental Impact Report (EIR) for the "Carson Creek Specific Plan" (CCSP) which was certified by the County Board of Supervisors (BOS) in September 1996. In addition, an Amended Specific Plan for the CCSP and Final Program EIR was certified by the BOS in September 1999. The purpose of the Carson Creek Specific Plan (CCSP) was to establish comprehensive guidance and regulations for development of 710 acres in western El Dorado County which included facility improvements by the El Dorado Irrigation District (District). The District has confirmed that necessary facility improvements within the CCSP area include removal of the Business Park 2 (BP2) lift station, located on Golden Foothill Parkway, which is outdated and has been identified by the District as a high priority for replacement. The Final Program EIR indicated that all wastewater flows would bypass the existing BP2 lift station; however, removal of the facility was not specifically addressed. The removal of the BP2 lift station will require minor, technical changes to the Final Program EIR. Therefore, an Addendum has been completed by the District in accordance with CEQA Guidelines Section 15164, and none of the conditions requiring additional CEQA review apply.	NOD	
2004052134	Randall Sand & Gravel CUP-02-41 Humboldt County --Humboldt The project is limited to one encroachment for aggregate extraction from the channel of the South Fork Eel River for commercial purposes. The Permittee proposes to extract up to 50,000 cubic yards of gravel, with a three year average extraction rate not to exceed 35,000 cubic yards, from the Randall gravel bar. Extracted gravel will be processed at an adjacent gravel processing facility and stored as needed on site.	NOD

The ALP is a planning document for possible future actions which have not been funded.	NOE	
2014098145	Sanders Ranch Culvert Replacements Fish & Wildlife #3 San Ramon--Contra Costa The Project is limited to the insertion of a 125 foot long culvert into a previously existing, approximately 4 foot diamter culvert. Rock and grouting will first be removed and the new culvert inserted into the old one. The new culvert will be slightly smaller than the existing culvert and a gunite based material will be injected into the space in between the larger and smaller culverts and allowed to harden at both Project locations.	NOE	
2014098146	Hendy Woods Day Use ARea Rehabilitation Parks and Recreation, Department of --Mendocino Rehabilitate the existng day use parking, picnic area, and restroom at Hendy Woods State Park to provide better facilities for park visitors.	NOE	
2014098147	Camp Cady State Wildfife Area Riparian Restoration Demonstration Study Fish & Wildlife #6 --San Bernardino The objective of this proposed demonstration study is to determine the potential suitability and sustainability of selected plant materials for site restoration/revegetation on riparian salt cedar (Tamarix spp.) infestation sites along the Mojave River within CCWA jurisdiction. Evaluation of species selection and adaptation will be conducted in historically dominant salt cedar stands where potential for natural recovery of desirable, diverse, native vegetation following salt cedar reduction is limited. The study will emphasize: 1) native species selection and adaptation; and b) revegetation species response to supplemental drip irrigation.	NOE	
2014098148	Letter of Non-Objection for entering State-owned Sovereign Lands to Cap and Abandon Groundwater Well, OCWD-BSO2, Bolsa Chica Ecological Reserve California State Lands Commission --Orange Permission to enter State-owned lands for the purpose of capping and abandoning groundwater well, OCWD-BSO2, Bolsa Chica Ecological Reserve, Orange County. 2013111056	Tranquillity Solar Generating Facility EIR Fresno County --Fresno FYI Final	FIN	
	RE Tranquillity LLC (the Applicant) has applied to the Fresno County Public Works and Planning Department (the County) for six CUP to construct, operate, maintain, and decommission photovoltaic electricity generating facilities and associated infrastructure to be known as the Tranquillity Solar Generating Facility, which would generate a total of up-to 400-megawatts on approximately 3,732 acres in unincorporated Fresno County (collectively, the Project). The Project would provide solar power to PG&E customers via an interconnection within the Project site to two existing PG&E transmission lines: the Panoche-Helm and Panoche-Kearney lines. The Project also includes a Switching Station to be approved by the California Public Utilities Commission and owned and operated by PG&E.		
2014091021	Parkside at Baker Ranch Lake Forest, City of Lake Forest--Orange The proposed project involves closure and reclamation of the existing surface mine, and the construction of up to 250 single and multi-family attached and detached residential units on the approximately 30-acre project site. The project site is currently leased to approximately 81 tenants who use the property as a staging area for construction and landscaping businesses, or for the storage of vehicles, equipment and materials, and container plants and sales. Development of the proposed project would require the following approvals from the City: (1) Amendment to the City of Lake Forest General Plan; (2) Amendment to Baker Ranch Planned Community; (3) Approval of a Tentative Tract Map; and (4) Development Agreement.	MND	10/09/2014
2014091023	CNG Fueling Station and Transportation Yard Rialto Unified School District Rialto--San Bernardino The compressed natural gas Fueling Station (Phase I) includes a vehicle entry/exit access way along South Lilac Avenue; two fast-fill vehicle fueling positions (pumps) and roof structure; a CNG equipment enclosure to house 3 CNG storage tanks, 3 CNG compressors, and 1 backup generator; storm water facilities; utility upgrades to support operations; and hardscape/landscape improvements. The Transportation Yard (Phase II) includes a 9,100 sf office building; 9,900 sf service building with 6 service bays, storage area and office space; parking stalls for 94 buses with time-fill CNG fuel pumps; 4 bus wash stations; parking stalls for 96 staff, 33 visitors, and 6 accessible stalls; water quality treatment facilities; utility upgrades, including stub-out gas line for future City connection; and hardscape/landscape improvements.	MND	10/09/2014
2014091024	Electronic Message Center Sign Fountain Valley, City of Fountain Valley--Orange Clear Channel Outdoor proposes to remove an existing static billboard located at 12191 Edinger Avenue and construct a new 672 sf, 74-foot tall digital (LED) Electronic Message Center sign. The Electronic Message Center sign is proposed to be located on the City-owned site located at 10955 Ellis Avenue, Fountain Valley.	NOP	10/10/2014

2007122100	Digester Upgrade Project San Andreas Sanitary District --Calaveras The Project proposes to upgrade the existing anaerobic digester at the San Andreas Sanitary District's wastewater treatment plant and to construct a new aerobic digester. The project is designed in accordance with and is supplemental to the SASD Facilities Master Plan. The existing digester will be upgraded and continue to treat primary sludge and a separate aerobic digester will be constructed to treat waste activated sludge. A density meter will be added to the primary sludge discharge header to ensure feeding thick primary sludge to the anaerobic digester. Construction will last approximately one year and is tentatively planned from spring of 2015 to springs of 2016.	SIR	10/09/2014
2005052146	Moller Ranch Development Project/Moller Creek Culvert Replacement Dublin, City of Dublin--Alameda The Permittee proposes to construct a residential development on 182.85 ac that includes a single crossing over Moller Creek and two 24-inch storm drain outfalls at the creek crossing, and a system of bio-retention cells for storm water pollution control on approximately 91.09 ac of the Project site; an approximately 36-inch diameter storm drain outfall at the Tassajara Road culvert. The California Department of Fish and Wildlife (CDFW) is executing a Lake and Streambed Alteration Agreement Number 1600-2013-0048-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Jeff Lawrence/Braddock & Logan Services, Inc.	NOD	
2006012142	Kable Final Map Subdivision Humboldt County Eureka--Humboldt A Modification of a Final Map Subdivision and Coastal Development Permit which was approved April 3, 2008. The original project was for the subdivision of an approximately 2.5 acre parcel into five residential parcels ranging in size from 6,080 square feet to 1.75 acres. The parcel is currently developed with one single family residence which will be suited on proposed Parcel 1. The property is served with community water and sewer and proposed access is from Union Street, a paved public road. A portion of proposed Parcel 5 is located within the Coastal Zone. The Applicant is seeking to modify the improvement requirements for Union Street that were previously approved by the Planning Commission. Pursuant to Section 325-9, the applicant has submitted an exception required to reduce the improvement requirements. If approved, the project will expire on May 2, 2017 pursuant to AB 116.	NOD	
2007061075	Riverside Drive Bridge Widening and Rehabilitation Project Los Angeles, City of Los Angeles, City of--Los Angeles CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2014-0013-R5) to the project applicant, City of Los Angeles. The project proposes to impact 1.33 acres of streambed, including 0.11 acre of permanent impact to willow riparian habitat and 1.22 acres of temporary impact to willow riparian habitat and open water and mitigate with at least 3.75 acres of creation, restoration and/or enhancement. 2012011029	<p>Beacon Photovoltaic Project (PP12213); CUP 11, Map 152 (EIR 13-11 JLB) Kern County Mojave, California City--Kern</p> <p>The California Department of Fish and Wildlife (CDFW) is issuing Amendment No. 1 to Streambed Alteration Agreement 1600-2012-0088-R4 to the Permittee, Charles C. Holloway representing Los Angeles Department of Water and Power. The Project as originally permitted includes activities related to the construction and operation of a 250-megawatt net alternating current solar power generating installation. The Project consists of an approximately 2,298-acre plant site and associated transmission line that will develop a total of 2,301 acres. Project components in jurisdictional areas include impacts to jurisdictional washes resulting from the construction of three (3) Arizona-style crossings, improvements to an existing Arizona-style crossing, and desert tortoise-proof fencing associated with Arizona-style crossings at three (3) locations at the plant site boundary associated with a portion of Pine Tree Creek and an unnamed desert dry wash. No other ground disturbance or trenching will occur within jurisdictional desert dry wash and all other Project components and activities will maintain a minimum 50-foot no-disturbance buffer around the dry wash extent. Impacts to Mojave desert wash scrub habitat or specifically to scale broom (<i>Lepidospartum squamatum</i>), which is found in that habitat, will be avoided to the extent feasible, but minor encroachment and related impacts including scale broom removal may occur. Agreement Amendment No. 1 increases the total estimated area of disturbance from all Arizona-style crossings to Pine Tree Creek and the unnamed desert dry wash from 0.03 acre to 0.10 acre to accommodate the increased width of Project access roads.</p>	NOD	
2012081044	<p>Import of Fill Material to Warm Creek Conservation Basins San Bernardino Flood Control District San Bernardino, Colton--San Bernardino</p> <p>CDFW is executing a Lake and Streambed Alteration Agreement (SAA # 1600-2013-0079-R6) pursuant to Section 1602 of the Fish and Game Code to the project Applicant: San Bernardino County Flood Control District, represented by Mr. Annesley Ignatius, 825 East Third Street, San Bernardino, State of California, 92415, Phone (909) 387-7913. Work within the property is limited to the fill of the basins. The drainages will no longer flow into the basin inverts, and the remaining flow will be concentrated in a bio-infiltration swale in the easternmost portion of the basins terminating at the downstream Warm Creek Channel outlet at the downstream portion of basin 4. The proposed project impacts include the fill of the toe or invert of the basins and conversion of the drainages and basin invert to a bio-infiltration swale. Project impacts consist of the entirety of the Warm Springs Basin complex and the future maintenance of the bio-infiltration swale.</p>	NOD	
2012121031	<p>Cactus Avenue PUD PA12-0004, PA12-00005, PAT12-0029, PAT12-0030 P12-29 Moreno Valley, City of Moreno Valley--Riverside</p> <p>CDFW is executing a Lake and Streambed Alteration Agreement (SAA # 1600-2013-0169-R6 [Revision 2]) pursuant to Section 1602 of the Fish and Game Code to the project Applicant: CV Communities, 1900 Quail Street, Newport Beach, State of California, 92660, Phone (949) 251-8057. Work within the property is limited to the construction of a residential development consisting of 159 single-family residential lots, local streets, and associated infrastructure, within Tentative Tract 36436. The proposed Project will expand and reconfigure Quincy Channel resulting in the creation of a 58-foot wide trapezoidal-shaped channel.</p>	NOD

Documents Received on Wednesday, September 10, 2014

The channel bottom will be lined with ungrouted rip-rap and the channel slopes will remain earthen. In addition, the existing dry weather crossing at Brodiaea Avenue will be replaced with a four cell reinforced concrete box culvert, each being ten feet wide by seven feet high. A concrete apron will continue for approximately 220 linear feet downstream from Brodiaea Avenue. At this point, the rip-rap lined channel will continue in a sotherly direction to a new proposed concrete apron (approximately 70 feet in length) just upstream of the existing box culvert beneath Cactus Avenue. This reinforced concrete box culvert, each cell being seven feet wide by four feet high, will be extended approximately thirty feet northerly of the existing box culvert. The construction of the project will impact a total of 1.30 acres of streambed and associated riparian habitat.

2013111022 Lido House Hotel **NOD**

Newport Beach, City of
Newport Beach--Orange

The City is leasing the majority of the project site for the development of a 130-room Lido House Hotel. The proposed hotel would also include meeting rooms, accessory retail spaces, a restaurant, lobby bar, rooftop bar, guest pool and recreational areas, and all required appurtenant facilities including, but not limited to on-site parking, landscaping, utilities, and adjoining public improvements. The hotel would be no larger than 98,725 gross square feet. The project would also provide 148 surface parking spaces and would accommodate additional parking through active parking management including valet parking service. The proposed structures would be approximately four-stories with architectural features up to 58.5-feet in height. The project would also include public open spaces consisting of pedestrian plazas, landscape areas, and other amenities proposed to be located along Newport Boulevard and 32nd Street. The project also includes the following discretionary actions: General Plan Amendment, Coastal Land Use Plan Amendment, Zoning Code Amendment, Site Development Review, Conditional Use Permit, Traffic Study, and a Ground lease. The project also includes relocating a portion of the existing, angled, metered parking on the north side of 32nd Street (just south of the old City Council Chambers) further to the east in front of St. James Church, which is located just west of Lafayette Road. Currently, there is excess street capacity along 32nd Street (just west of Lafayette Road) that would be modified in order to accommodate angled parking along the north side of 32nd Street in front of the church and travel lanes. This would also pull the curb line along the project site south and 32nd Street would be restriped with the intent to modestly "straighten" out the westbound traffic lane to improve vehicle maneuvering. The project site is not listed on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5.

2013122016 Flint Williamson Act Amendment and Grading Permit **NOD**

Sacramento County
Galt--Sacramento

The California Department of Fish and Wildlife is executing Lake or Streambed Alteration Agreement number 1600-2013-0237-R2 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Wendel Flint.

The project site would be converted from an agricultural field used for annual crop production to a mitigation bank containing restored floodplain mosaic wetlands.

The first phase of restoring the project site will include the construction of wetland basins, seasonal swales/low flow channels, and seeding. The depth of excavation

	<p>the management of sediment behind Log Cabin Diversion Dam and Our House Diversion Dam. The objectives of the proposed Plan are twofold: 1) to provide for dam safety and proper functioning of Project facilities, especially the fish release and low level outlet valves; and 2) to maintain the health of the aquatic environment downstream of the dams by allowing the passage of sediments that occur behind the dams. The main features of the proposed project area are: Log Cabin Diversion Dam and Impoundment (3.57 acres); Our House Diversion Dam and Impoundment (10.10 acres); Disposal Site 1 (9.51 acres); and access roads. Sediment management at both Log Cabin and Our House diversion dams includes four components: 1) maintenance of minimum pools; 2) passage of sediment; 3) planned mechanical removal of sediment, when needed; and 4) emergency removal of sediment.</p>		
2014082004	<p>Strombeck Subdivision Humboldt County Eureka--Humboldt</p> <p>The applicant is proposing a Minor Subdivision of a 0.33 acre parcel to create two parcels of 5,886 sf and 5,033 sf. The parcel is currently developed with a single family residence and a detached garage. The applicant is also applying for a Variance to allow proposed Parcel 1 to be developed at 40% lot coverage instead of the 35% required by the Residential Single Family (RS) zone. An exception is also requested to allow access from a 30 foot wide right of way which is less than the 40 foot standard under the subdivision regulations. The parcel is located within the Coastal Zone and requires a Coastal Development Permit for the subdivision. Both resultant parcels will be served with community water and sewer by the Humboldt Community Services District.</p>	NOD	
2014082008	<p>PWM Inc. - Hilfiker Monopole Humboldt County Eureka--Humboldt</p> <p>A Coastal Development Permit and Conditional Use Permit for the construction of a new 140 foot tall cellular communications tower and associated facilities. The northwest corner of the property is currently host to recently permitted residential development (CDP-04-106/Hilfiker). The approximately 16.5-acre parcel resulted from a prior Lot Line Adjustment (LLA-99-07). The tower is proposed to be located near the northeast corner of the property and will utilize a monopole design capable of supporting occupancy by multiple carriers. Nine (9) to twelve (12) panel antennas are currently expected to be installed near the top of the proposed tower. Each carrier proposing to site equipment on the tower will be required to submit a Cumulative RF report showing that the resulting Radio frequency (RF) emissions from the proposal will not exceed FCC standards for public exposure. Associated ground-based electronic equipment, including a back-up generator and equipment shelter(s), would be located within a fenced approximately 4,900 square foot lease area. The tower will improve service along Highway 101, the north and south spit, and the Humboldt Hill and Pine Hill areas, south of Eureka. The project is being pursued by PWM Inc., a local private communication site developer and owner, who wish to facilitate construction of the tower and leasing of the facility after securing commitments from other cellular providers interested in co-locating on the structure. Minimal ground disturbance is expected and no trees are proposed to be removed.</p>	NOD

2014098165	Director's Order Caltrans #2 --Shasta, Plumas During the 2014 emergency drought it was determined that these two locations are vulnerable to interruptions in water supply. This project will upgrade water storage facilities, install associated distribution infrastructure, and repair other existing facilities as needed.	NOE	
2014098166	ETS 225655 - CMP Pole Replacement, P216903, Ramona Regional Water Quality Control Board, Region 9 (San Diego), San Diego --San Diego The project entails replacement of an existing utility pole. The existing degraded wood pole will be replaced with a new fiberglass pole. Permanent impacts will be negligible (2 square feet/0.00005 acres).	NOE	
2014098167	TKPOA West Channel Dredge and Beach Replenishment Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe South Lake Tahoe--El Dorado The Applicant, Tahoe Keys Property Owners Association, proposes to dredge approximately 5,600 cubic yards (cy) of sandy sediment from the west channel at Tahoe Keys over a period not to exceed three years, and place the sand on the beach east of the channel.	NOE	
2014098168	7300 Line, Phase 2 Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe --El Dorado Eight new 50-foot poles will be installed immediately adjacent to the existing poles in the wetlands, all within current alignment. All of the new poles will be placed outside of active waterways. Work will be conducted by hand crews to minimize impacts. A total of 40 square feet (0.0009 acres) of wetlands will be disturbed by the project.	NOE	
2014098169	Prosser Creek Dam Geotechnical Investigations Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe Truckee--Nevada The project consists geotechnical boring and test pits to survey for the location, thickness, continuity, and liquefaction potential in the channel area of the Prosser Creek Dam foundation, and to test for liquefaction and engineering properties of the right abutment of the dam.	NOE	
2014098170	Streambed Alteration Agreement Notification No. 1600-2013-0151-R5 Aliso Creek Fish & Wildlife #5 Laguna Woods--Orange The project is limited to routine flood control maintenance activities at the project location within Aliso Creek. Emergent aquatic vegetation will be mowed or cut with hand tools, trimmers, and hedgers while leaving 1 foot or more of the cut vegetation above the water line to retain water quality and erosion control benefits. Accumulated sediment will be removed, as necessary, from within 20 feet of two existing pedestrian walkway structures that cross the stream.	NOE	
2014098171	B Street Pier Parking and ABM Parking Services Operating Contract Amendment San Diego Unified Port District San Diego--San Diego The proposed project involves an amendment to an existing Operating contract with ABM Parking Services (Operator) for the operation of public parking spaces located at the B Street Pier (Pier) in San Diego, CA. On January 10, 2014, San	NOE

	temporary trailers would be placed at the southeast end of the existing surface parking lot. The existing surface parking lot would be repaved and the existing landscaping would generally remain in place.		
2014092033	Eureka Waterfront Trail Project Phase A Eureka, City of Eureka--Humboldt Construct a 1.2-mile long segment of Class 1 multi-use non-motorized and pedestrian trail from Del Norte Street south to Truesdale Street. The alignment would be within the ROW of the North Coast Railroad Authority railroad except for two short segments of the trail - one that enters into a former Pacific Lumber Company property referred to as "Parcel 4" and the other that parallels the northerly portion of the west boundary of PALCO Marsh - before rejoining the railroad ROW and continuing south to Truesdale Street. The trail would consist of a 10-foot paved section and two 2-foot unpaved shoulders on each side. Where wetland or environmentally sensitive habitat occurs, the trail would narrow to 8-feet wide with 2-foot unpaved shoulders. The Phase A trail segment would be part of the California Coastal Trail and Eureka Coastal Trail systems.	MND	10/10/2014
2014092034	Orrs Creek Homes Planned Development Rezoning and Precise Development Plan Ukiah, City of Ukiah--Mendocino Rezoning of 4 vacant parcels from High Density Residential to Planned Development/High Density Residential and a Precise Development Plan to allow the construction of one 1,536 sf home with an attached garage on each of the 4 vacant parcels, ranging in size from 2,911 to 7,024 sf. The Project has frontage on Ford Street, a public street, which would provide access to the driveway and garage. The Project includes construction of frontage improvements, including curb, gutter and sidewalk, street trees and the planting of front yard landscaping. The Project site includes a section of Orrs Creek. No work within the creek is included in the Project. A group of valley trees located on Lot 1 and a garage would be removed. The remaining trees on the site would remain.	MND	10/10/2014
2014091026	Somis School Project Somis Union School District --Ventura The proposed project involves the construction of a new 475-student capacity kindergarten through 8th grade (K-8) school. The Somis Union School District has identified the need to replace the existing Somis School because it is underlain by pipelines that have been determined to create a potential hazard. The project site is less than 1/4-mile south of the existing Somis School. The proposed project would involve development of classrooms and associated facilities totaling approximately 58,564 sf. Specific facilities to be incorporated into the school include a library, offices, multi-purpose room, outdoor amphitheater, recreational fields, playgrounds, and staff and bus parking areas. 2014062032	<p>Shell Greenhouse Gas Reduction Project Contra Costa County Martinez--Contra Costa Note: Response to Comments</p> <p>The primary objective of this Project is to reduce greenhouse gas (GHG) emissions at the Shell Refinery (the Refinery) in Martinez, CA. This will primarily be accomplished by the permanent shut-down of the Refinery's flexicoker unit (FXU), which is an energy-intensive unit that emits significant levels of GHGs. It is anticipated that the project will reduce GHG emissions at the facility by 15%, as well as reduce sulfur dioxide (SO2) emissions by an accompanying 25%. Other project objectives include the integration of new energy-efficiency equipment, and the reconfiguration and modification of existing processing units to enable the Refinery to process lighter crude oil. The Project will not increase the Refinery's total production capacity or increase its capacity to refine heavy crude. Also, it would not add the capability to receive crude oil via rail.</p>	Oth

	previous ND (12/1/11) remain substantively unchanged, and supports the finding that the proposed project does not exceed the level of impacts identified in the previous ND.		
2014062044	Tahoe Hills Erosion Control Project El Dorado County --El Dorado The Project site is an existing residential development on the west shore of Lake Tahoe bordered by SR 89 on the north, Lake Tahoe on the east, and Lakeview Drive on the South. The proposed project includes the construction of improvements to address erosion and water quality issues within the Project site. The Project will not change the use of the site or surrounding area. The Project will benefit the natural environment with the implementation of the proposed improvements. After Project completion, less sediment will enter Lake Tahoe from the Project area, thereby improving water quality in Lake Tahoe.	NOD	
2014098191	Margaret West Conservation Bank ACcess Culvert Installation Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Santa Rosa--Sonoma The purpose of the project is to provide an access point to the Margaret West Conservation Bank. The project would involve the placement of a 24-inch diameter, 38.foot long culvert in the ditch on top of which the access road would be built. The culvert would be buried approximately 6 inches below the existing ground surface and the bottom of the culvert would be filled with natural soil and gravel material to create a natural bottom and allow the continued movement of wildlife along the ditch bottom.	NOE	
2014098192	Zane Holdings Driveway Culverts Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Sonoma The purpose of the project is to widen and pave the existing driveways and install 3 culverts at existing ford stream crossings. The driveways will serve existing lots that will likely be developed with single family homes in the future. The project would involve the installation of three 42-inch diameter, smooth-bore, corrugated plastic pipe culverts. Each culvert will be approximately 30 feet long and will be buried so that the culvert inlet elevation is 12 inches below the stream flow line, allowing gravel to accumulate in the bottom.	NOE	
2014098193	Residential Walkway Repalcement Parks and Recreation, Department of --Calaveras Replace existing dilapidated walkway with weather resistant accessible walkway at Calaveras Big Trees State Park's residence to provide safe access around facilities. Work will remove 416' L x' W X 3" walkway; excavate 3" of soil and reroute walkway to avoid damaging tree roots; install expansion joints every 4', 1/2" steel bar and steel intersections; and pour 5" of concrete throughout walkway prism. Extracted concrete will be disposed of by a certified recycler. Extracted soil will be hauled to the maintenance yard for future use.	NOE	
2014098194	Pauley Pavilion Flood Repairs University of California, Los Angeles Los Angeles, City of--Los Angeles The proposed project would repair Pauley Pavilion following extensive flood damage to the 100, 150 and 200 levels and to stairwells and elevator shafts from the rupture of a City of Los Angeles' water main on Sunset Blvd. on July 29, 2014. 	Needs Allocation (RHNA). The Project does not change any land use or zoning designations since the City has an adequate supply of vacant residential land to meet its RHNA. The Project also triggers other minor General Plan amendments, such as to strengthen policies protecting lives and property from flood and fire hazards, which are also reviewed in the IS.		
1991022072	Kings Canyon Expressway, Segment 3 Caltrans, Planning FRESNO--FRESNO Caltrans proposes to realign and widen 4.5 miles of SR 180 from 0.7 miles east of Smith Avenue to 0.7 miles east of Frankwood Avenue near the communities of Centerville and Minkler in Fresno County. The purpose of the project is to improve continuity, safety, and capacity by widening the existing 2-lane conventional highway to a 4-lane expressway. New right of way will be acquired from agricultural lands, business/residential properties, state and county properties. Some existing SR180 right of way will be abandoned. The project includes residential/maintenance access roads, utility easements, and new crossings constructed over 8 waterways.	NOD	
2003071178	Faculty and Family Student Housing, Open Space Plan, and LRDP Amendment EIR University of California, Santa Barbara Santa Barbara--Santa Barbara In September 2004 and again in April 2006, the University of California, Santa Barbara, amended its Long Range Development Plan to designate land uses on the North and West Campuses for faculty and family student housing development along with open space improvements. An EIR Addendum prepared in March 2006 and approved in April 2006 evaluated minor revisions to the previous land use and design approvals. The number of faculty housing units on the North Parcel reduced from 236 to 215 (in April 2006?) to eliminate impacts to wetlands. Since the Addendum was prepared, the faculty housing units on North Parcel have been reduced to 172 units as a result of the Coastal Commission approval November 17, 2006 to eliminate impacts to additional wetlands and other environmentally sensitive habitat areas identified on the North Parcel. The University proposes to approve budget for construction of 31 of the 172 approved faculty housing units on North Campus. University of California design approval for the project occurred in September 2004 and was revised by UC in April 2006, and was approved by the Coastal Commission in November 2006. Habitat restoration commenced during Phase 1 and 2 and would continue for Phase 2 as well as subsequent phases. The Phase 3 total building area is 69,641 gross square feet. Phase 2- construction of 22 units of faculty housing and Phase 2 - construction of 37 units of faculty housings are complete. The majority of underground utilities and roads for the 151 unit site were installed as part of the Phase 2 project. Minor design changes in the current proposal for Phase 3 are that the units would be detached housing instead of townhomes. Some utility and road rework will be required in Phase 3 as a result of the design change from attached to single family residential units. The design changes do not result in any new significant impacts than those identified in the 2004 Final EIR and 2006 Addendum for the project. There is no new information, nor more significant impacts than previously analyzed, and no new context that would trigger PRC Section 21166 and the need	NOD

2009111104	Ordinances to Ban Plastic Carryout Bags in Los Angeles County Los Angeles County --Los Angeles The project consists of an ordinance adopted by the City of South Pasadena, based on the Los Angeles County model ordinance adopted on November 16, 2010, to ban the issuance of plastic carry-out bags and place a charge of \$0.10 on paper carryout bags at certain retail establishments in the City of South Pasadena. By ensuring that certain retail establishments will not distribute or make available to customers any plastic carryout bags, including compostable or biodegradable plastic carry-out bags, the ordinance aims to significantly reduce the number of plastic carry-out bags that are disposed of or that enter the litter stream in the City. The retail establishments that will be affected by the ordinance include any that: (1) Have a gross annual sales of two million dollars (\$2,000,000), or more, and which sell a line of dry grocery, canned goods, or non food items and some perishable items; or (2) Are buildings with over 10,000 square feet of retail space that generate sales or use tax pursuant to the Bradley-Burns Uniform Local Sales and Use Tax Law and have a pharmacy licensed pursuant to Chapter 9 of Division 2 of the Business and Professions Code. The ordinance will also ban the issuance of plastic carryout bags and place a charge of \$0.10 on the issuance of paper carryout bags at the drug stores, pharmacies, supermarkets, grocery stores, convenience food stores, food marts, or other entities engaged in the retail sale of a limited line of goods that generally includes milk, bread, soda, and snack foods, including stores with a Type 20 or 21 license issued by the Department of Alcoholic Beverage Control. 	(Hollywood Courthouse), which is an approximately 40,000 square feet, two-story courthouse built in 1986. The new courthouse will also be a two-story courthouse, and will include the renovation of three courtrooms as well as a 5,000 square foot addition for a total proposed project of 45,000 square feet. Parking will be provided via surface parking at the site. The project includes secured parking, which is currently located and will remain on the basement level.		
2014098206	Slope repair work on US 101 Caltrans #4 Cotati--Sonoma This slope was constructed as part of a recently completed roadway project on US 101. Shortly after being cut, the slope exhibited small failures. Parts of the toe of slope are cut vertically and lobes of debris are protruding onto the shoulder. Work consists of removing material and laying back the eroded slope.	NOE	
2014098207	Durham Mutual Water Co. Fish Screen Maintenance Project (SSA# 1600-1999-0160-R2) Fish & Wildlife #2 Chico--Butte The Department of Fish & Wildlife has executed Lake and Streambed Alteration Agreement number 1600-1999-0160-R2, pursuant to Section 1602 of the Fish and Game Code to Durham Mutual Water Co. The project consists of routine maintenance pertaining to the removal of sediments and debris that could reduce or block the flow of water above the fish ladder, screened diversion and fish screens at the Durham Mutual Water Co. Dam.	NOE	
2014098208	Streambed Alteration Agreement #1600-2014-0133-R2 Feather River Inn Bonta Creek Fish & Wildlife #2 --Plumas The project for the purpose of this agreement consists of removal of one culvert and one 1-lane bridge across Bonta Creek on the 116-acre Feather River Inn property. The structures are impeding creek flow and contributing to local flooding. Removal shall occur in the dry season. A 36-inch by 20-feet long steel culvert, and associated encasement rock and compacted fine sediment shall be removed, a 15-foot long free-spanning bridge composed of wooden joists anchored in the mortared rock anchor wall shall be removed. A separate mortared rock wall on the west bank of the stream up- and downstream of the bridge and a concrete weir below the bridge shall be left in place. The abutments to be removed are about 15 feet and 20 feet long, and two feet wide by four feet deep. A total of about 1000 cubic feet of material shall be removed. Both areas shall be reshaped to match the existing up-and downstream bed and bank. Either coffer dams will be erected to divert water around the immediate project area or straw wattles will be placed downstream to catch sediment. After restoration, logs shall be installed to prevent vehicles from crossing the stream.	NOE

	removed. The new update system will be relocated on the east of the Reserve adjacent to the maintenance yard, behind the State Park's residence and out of the view of the public. DPR-approved standard project requirements have been incorporated into this project.		
2014098232	Repair Historic Residence #2 Parks and Recreation, Department of --San Bernardino This project is to repair the electrical and plumbing infrastructure of residence #2. Repairs will be conducted in such a way as to not compromise the wall's or the building's historic integrity. All work and specifications will meet or exceed State and Federal Office of Historic Prevention codes and requirements, in compliance with California Public Relations Code 5024.	NOE	
2014098233	Habitat Restoration Parks and Recreation, Department of --Kern The project will restore habitat at 46 sites throughout the park in order to protect the natural and cultural resources from continued damage. The sites include vehicle trespass routes, illegal camping areas, and other damaged areas where vegetation has been removed and soils are compacts or eroded. Without restoration, these desert habitats would require decades or centuries to recover. The "vehicle mulch" technique will be used in which cut stems of shrubs will be planted and "soil potting" will be used where small holes (5 in. wide and 3 in. deep) will be dug in compacted soil. These techniques help to trap windblown seeds, retain moisture, and become nursery sites for natural plant recovery. Eroded areas will be restored by installing check dams. Newly restored sites will be protected by rock lines. The appearance of restored sites disguised old trespass routes and prevents further damage. Planting holes will be dug by hand with post-hole diggers and shovels, or a power auger if needed. No heavy equipment will be used. Fencing will be installed in selected areas where the great resource damage has occurred. DPR-approved standard project requirements have been incorporated into this project.	NOE	
2014098234	Reclamation District No. 2115 HMP Levee Maintenance Project- SA-12-1.0 Water Resources, Department of --Sacramento Rehabilitation of levees to the Hazard Mitigation Plan (HMP) criteria by placing levee fill and aggregate base material on the levee crown at various locations. No waterside work is proposed.	NOE	
2014098235	Gillis Hill Modified Shaded Fuel Break Placer County --Placer Gillis Hills ridge is an important, tactical location for a shaded fuel break. It is identified in both the Placer Community Wildfire Protection Plan and Local Hazard Mitigation Plan. 40 acres of treatment on private lands adjacent to BLM, BOR, USFS lands.	NOE	
2014098320	Geotechnical Investigations for People Mover, Mt. San Jacinto SP (14/15-IE-3) Parks and Recreation, Department of Perris--Riverside Under direction from the Palm Springs Aerial Tramway, Geocon requests a Right-of-Entry permit to conduct geotechnical investigations for the design and construction of a people mover to be located west of the Mountain Station in	NOE

Mount San Jacinto State Park. Geocon will excavate up to eight (8) four-inch diameter test borings with a hand auger, or six-to-eight-inch test bores with a gasoline powered auger. Sampling will be performed within the borings to collect soil samples for lab testing. Borings will be backfilled with locally derived material. Geocon may also perform a seismic refraction survey to help determine the subsurface conditions. The seismic refraction survey includes placing an array of geophones along the people mover alignment and measuring the response of energy waves in the subsurface. Geocon expects the boring sample field work to be completed in one day. The seismic refraction survey will be completed in one or two additional days. If snow is on the ground, an additional day may be needed to remove snow at the geophone locations. Boring locations will be accessed by foot along a path west of the mountain station. Wheel barrows or carts will be needed to transport equipment and samples. DPR-approved standard project requirements have been incorporated into this project.
