

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

September 1 – 15, 2016

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **September 1 – 15, 2016**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

<u>Documents Received on Thursday, September 01, 2016</u>			
2014121055	<p>Prestressed Concrete Cylinder Pipe Rehabilitation Program Metropolitan Water District of Southern California --Los Angeles</p> <p>Metropolitan Water District proposes to rehabilitate portions of five existing subsurface water delivery pipelines within its service area. Approximately 100 miles of prestressed concrete cylinder pipe with diameters varying from 54 to 201 inches would be rehabilitated either by relining the existing pipe with steel or replacing existing pipe with new welded steel pipe. These five existing pipelines (also known as feeders) are: Allen-McColloch Pipeline, Calabasas Feeder, Rialto Pipeline, Second Lower Feeder, and Sepulveda Feeder.</p>	EIR	10/17/2016
2015051054	<p>General Plan Land Use and Urban Design Elements Long Beach, City of Long Beach--Los Angeles Note: Review Per Lead</p> <p>The project proposes to update the City's General Plan Land Use Element (LUE) and to adopt a new General Plan Urban Design Element (UDE). The proposed LUE would replace the current 1989 General Plan LUE. Compared to the existing LUE, the proposed updated LUE would introduce the concept of "PlaceTypes," which would replace the current approach of segregating property within the City through traditional land uses designations and zoning classifications. The UDE would be an entirely new element of the City's General Plan. The UDE aims to improve the City's PlaceTypes by creating great places, improving the urban fabric, public spaces, and defining edges, thoroughfares, and corridors.</p>	EIR	11/01/2016
2016011006	<p>Golden Hills Wastewater Treatment System Improvement Project Golden Hills Community Services District Tehachapi--Kern Note: 1 HC & 1 CD</p> <p>The project consists of the rehabilitation of the existing old sewage system collection components used by the privately managed Golden Hills Sanitation Company (GHSC) to provide service to 185 existing connections and areas planned to have sewer service by the original design. The GHSC is currently in receivership and two options have been identified for treatment of the sewage. The system rehabilitation common to both options includes replacing components that are not functioning properly, including 6 inch and 8 inch collection pipes, 6 inch, 8 inch, 12 inch gravity main pipes, manholes, and removal of the existing lift station on Woodford Tehachapi Road. The two options are: Option A, rehabilitation of the Golden Hills Wastewater Treatment Plant (WWTP) and related infrastructure upgrades; and Option B, conveyance of wastewater to the City of Tehachapi WWTP and related infrastructure upgrades and decommissioning of the Golden Hills WWTP. The purpose of evaluating two options for the proposed project is to inform decision makers of the potential environmental impacts associated with both Option A and Option B for full disclosure and informed decision making.</p> <p>In addition to the system upgrades common to both options, Option A would include the rehabilitation and continued operation of the Golden Hills WWTP, with an opportunity to provide treatment for up to 0.10 million gallons per day of future</p>	FIN

<u>Documents Received on Thursday, September 01, 2016</u>			
	sewage effluent loads according to the plant's rated capacity. Option B would include installation of a lift station and 4-inch diameter force main pipeline to the City of WWTP at Tucker Road and Red Apple Avenue for effluent treatment and disposal. The route for the force main would be entirely within either GHCS property or public right of way and the Golden Hills WWTP would then be decommissioned.		
2016054002	Shingle Springs Rancheria Residential 10.18 Fee-to-Trust Project Environmental Assessment Bureau of Indian Affairs Placerville--El Dorado Note: Review Per Lead	FON	10/03/2016
	The proposed project includes a transfer of 10.18 acres of land in El Dorado County into federal trust on behalf of the Shingle Springs Band of Miwok Indians. This land would be divided into 10 residential parcels and developed with single family residential modular homes. Access to the site would occur via extension of Honpie Road from the adjacent Shingle Springs Rancheria.		
2016091001	Greenfield Apartments Project Westminster, City of Westminster--Orange The project consists of the consolidation of three parcels on Locust St in the City of Westminster into an approximately 1.8 acre site for the development of 50 residential rental units that includes an affordable component. The applicant is requesting a density bonus to accommodate the proposed number of dwelling units. The project will include both single level flats and two story, townhome style units with one, two and three bedrooms. A total of 85 unenclosed parking spaces are provided onsite in compliance with parking standards for affordable housing projects imposed by the State. A portion of the parking spaces will be provided in detached carports structures arranged along the south and west property lines. The project will take access from a single driveway on Locust St.	MND	09/30/2016
2016091006	Commercial Marijuana Permanent Ordinance, Juniper Ridge Industrial Park City-Initiated Rezone and General Plan Amendment, and the Claremont Property Project Coalinga, City of Coalinga--Fresno The proposed project would include the rezone and redesignation of the Juniper Ridge and Claremont Property project sites to MBL and MB. The Claremont Property project also includes the reuse of the former Claremont Custody Center facility for a CMO. The CMO Permanent Ordinance would supersede the CMO Urgency Ordinance currently in place in the City of Coalinga, and would provide permanent standards for CMOs within the City.	MND	10/03/2016
2016091002	Fairfield Inn and Suites Oceanside Boulevard (GPA15-00004, ZA15-00009, D15-00022, CUP 15-00002) Oceanside, City of Oceanside--San Diego The applicant is proposing to construct a 99-unit Fairfield Inn and Suites on the vacant 2.32-acre site (APN 152-320-37-00). This would require obtaining a General Plan Amendment to change the land use designation from Single-Family Residential to General Commercial. A Zoning amendment would also be needed to change the existing residential single family zoning to commercial recreation.	NOP	09/30/2016

	The project application includes a development plan and conditional use permit for the hotel, a Conditional Use Permit for a reduction in the number of required parking spaces, and a variance for wall heights in excess of six feet.		
2016091003	The Lakes Specific Plan Project and Topgolf Facility El Segundo, City of El Segundo--Los Angeles The Lakes specific plan consists of the 26.6 acre area that currently comprises the Lakes at El Segundo. The SP would establish two subareas, with uses and development standards applicable to each subarea. The 3.6 acre SCE easement and 0.7 acre portion of the West Basin Municipal Water District property are part of the overall project, but are not a part of the proposed specific plan. The associated development project proposes to replace the existing driving range with a Topgolf facility on approximately 12 acres. Other improvements would include modifications to the fairways/layout of the existing golf course, parking lot expansion, screening pole installation, replacement of existing net poles, turf installation, and demolition/construction of a new clubhouse. In addition to the SP, proposed entitlements include a general plan amendment; general plan map amendment; zone change; zoning map change; zone text amendment; site plan; lot line adjustment and conditional use permit.	NOP	09/30/2016
2016092002	Fort Bragg Hare Creek Center Project Fort Bragg, City of Fort Bragg--Mendocino The project would entail the construction of a new shopping center that would consist of three buildings: Building A at 15,000 sf, building B at 10,000 sf and building C at 4,500 sf, for a total of 29,500 sf of retail space. The project would be served by Bay View Avenue via Ocean Views Drive. The project would include a new 99 space parking lot, loading zones, pedestrian improvements, rainwater storage tanks, utilities, drainage improvements, and associated landscaping.	NOP	09/30/2016
2016092001	Hayes 4 - Phase One Subdivision Development Agreement Riverbank, City of Modesto--Stanislaus The proposed project consists of the City's approval of a development agreement between the City and the developers of the Hayes 4, Phase 1 subdivision. The land covered by this DA has been previously approved by the City of Riverbank as Tentative Map No. 07-2004 on August 28, 2006 and modified by City Council Resolution No. 2006-105). The DA will extend the duration of the Tentative Map and is proposed to expire 5 years from the date of approval. In addition to extending the duration of the Tentative Map, the purpose of the DA is clarify the number of lots, storm drainage concepts, and the conditions of approval for the tentative map.	Neg	09/30/2016
2010072053	I-205/Lammers Road/West Eleventh Street Interchange Caltrans #10 Tracy--San Joaquin CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2015-0076-R3, pursuant to section 1602 of the Fish and Game Code to Caltrans as represented by Javier Almaguer. Project is limited to the fill of 316 linear feet of an unnamed drainage channel to Old River to construct a new highway interchange to impact an area approx. 0.036 acres using 50 cubic yards of clean soil. The project shall also include the fill of approx. 1,131 linear feet of a cement lined agricultural channel and the installation	NOD

	of 1,425 linear feet of 72 inch concrete reinforced pipe culverts as well as new inlet and outlets.		
2010112031	Sun Valley Apartments Parking Lot Pleasant Hill, City of Pleasant Hill--Contra Costa The CDFW has executed Streambed Alteration Agreement No. 1600-2013-0468-R3, pursuant to Section 1602 of the Fish and Game Code to Kevin Bundy. Project is limited to the grading and re-contouring of four hundred and seventeen linear feet of the eastern bank of Ellinwood Creek to allow for the expansion of the rear parking area, dog park construction and the removal of unacceptable fill material previously installed along the creek bank.	NOD	
2013012079	Peninsula Corridor Electrification Project Peninsula Corridor Joint Powers Board San Jose--Santa Clara Project is limited to electrifying the Caltrain Corridor from 4th and King Streets in San Francisco to about 2 miles south of Tamien Station in San Jose, in order to allow conversion of the Caltrain commuter fleet from diesel trains to Electrical Multiple Units. The project includes installation of 130 to 140 single track miles of overhead contact system (OCS) for the distribution of electrical power to the electric rolling stock. Additional project features required for right-of-way electrification include overbridge protection structures, at grade crossing warning devices and replacement of the current rolling stock. CDFW is executing a Lake and Streambed Alteration Agreement No. 1600-2015-0254-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant for project activities relating to the electrical safety zone including pruning and removal of riparian vegetation along the drainages and creeks crossing or paralleling the tracks. Trees will be removed using chainsaws and loppers. If a tree requiring pruning or removal occurs within a channel, Permittee will utilize bucket trucks to perform the work from outside the channel. Along wetlands, exclusion fencing will be installed to prohibit workers and equipment from entering the habitat and tree work will be conducted from outside the wetland boundary. An estimated total of 0.366 acre and 1,031 linear feet of riparian vegetation will be impacted by the proposed project.	NOD	
2013081079	Revisions to the Kern County Zoning Ordinance - 2015 C. Focused on Oil and Gas Local Permitting Kern County --Kern The originally approved project consists of an amendment to Title 19 Kern County Zoning Ordinance (July 2012), with focus on Chapter 19.98 (Oil and Gas Production), to include new site development standards for all oil and gas exploration, extraction, operations, and production activities in unincorporated Kern County. Aera Energy LLC proposes to hydraulically fracture one existing well941HR2-33 (API# 03060081) in five stages, which is expected to take approx. 3 days (including placement of portable tanks and all ancillary equipment to support the closed loop system, as well as the well stimulation treatment (WST). The DOGGR permitted, but yet to be drilled, well will be located in a densely developed oilfield (South Belridge) and directionally drilled in 2016. As such, there would be no new ground disturbance or expansion of existing facilities associated with this project.	NOD

	<p>Fluids from the WST will be collected in a closed system and will not be discharged onto the ground or into sumps. Flow-back fluids from the well immediately after WST operations will be collected in the closed system at the well site. The collected fluid operations will be collected in the closed system at the well site. The collected fluid will be transported from the well site for treatment in a water treatment facility, Water Plant 20, and transported via pipeline to Aera's permitted Class II disposal wells. Injection Project No. 05200001. The estimated water volume is to be used is approx. 2,000 bbls and the source water would be purchased from Belridge.</p>		
2013081079	<p>Revisions to the Kern County Zoning Ordinance - 2015 C. Focused on Oil and Gas Local Permitting Kern County --Kern</p> <p>The originally approved project consists of an amendment to Title 19 Kern County Zoning Ordinance (July 2012), with focus on Chapter 19.98 (Oil and Gas Production), to include new site development standards for all oil and gas exploration, extraction, operations, and production activities in unincorporated Kern County.</p> <p>CA Resources of Elk Hills, LLC proposes to hydraulically fracture one existing well (API# 03054264), which is located in a densely developed oilfield and was directionally drilled in 2014. The hydraulic fracture would occur in two stages (two fracturing events). Recovered fluids, including wastewater and produced water after fracturing activity, will be collected in a closed system and portable tanks at the well site, and disposed of via injection wells that have already been permitted. The estimated water volume to be used is 4,000 barrels and the water would be purchased from the West Kern Water District. DOGGR will permit the well stimulation treatment activity of this project, and is therefore, a CEQA Responsible Agency.</p>	NOD	
2014102014	<p>Fort Bragg Coastal Restoration and Trail Project Phase II Fort Bragg, City of Fort Bragg--Mendocino</p> <p>CDFW is issuing an Agreement for one encroachment: project activities related to the excavation and disposal of approx. 2,263 cubic yards of soil and sediment in habitats potentially jurisdictional as Waters of the State on the former Georgia-Pacific, LLC Wood Products Facility (mill site) within the City of Fort Bragg. Project activities include temporary impacts to approx. 372 sq. ft. of the stream and 872 sq. ft. of upland riparian habitat to facilitate access during excavation activities. The project is being undertaken subject to an Order by the CA Environmental Protection Agency's Dept. of Toxic Substances Control.</p>	NOD	
2015112002	<p>Tower Bridge Fender Replacement Project Caltrans #3 Sacramento, West Sacramento--Sacramento, Yolo</p> <p>CDFW has executed Streambed Alteration Agreement No. 1600-2016-0243-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Caltrans, District 3.</p> <p>Project is limited to the collection of instream borings using a barge mounted drill in order to provide subsurface geological information for the larger Tower Bridge Fender Replacement Project. A barge and tow boat will be launched from Natomas Park boat ramp and drilling operations will occur at 4 designated locations in the wetted Sacramento River channel, alongside the Tower Bridge.</p>	NOD

	Quality Control Board.		
	The proposed ordinance will consist of Chapter 10A.17 of the Mendocino County Code and Chp 20.242 of the Mendocino County Zoning Ordinance. The proposed ordinance applies to inland areas of the County. The Coastal Zone is not affected.		
2014092082	Richmond Bay Specific Plan Richmond, City of Richmond--Contra Costa In accordance with general plan action LU3.E (development of a specific plan in the Southern Gateway Change Area to merge existing and proposed development into a mixed use community including education, research and development, light industrial, residential and other sensitive uses), the specific plan addresses an area known as the Southern Shoreline. The specific plan documents the long term vision and proposes detailed recommendations for the plan area, and its planning framework and objectives would regulate development related decisions in the plan area until 2045 and beyond. The development standards within the specific plan would establish the zoning regulations for the plan area. The specific plan is designed to be consistent with the South Richmond PDA established under Plan Bay Area.	EIR	10/17/2016
2016041018	Cypress College Facilities Master Plan Program EIR North Orange County Community College District Cypress--Orange The proposed project would involve the demolition of approximately 56,561 asf of existing buildings and facilities at Cypress College. Approximately 138,000 asf of new academic, auxiliary, and recreational uses would be constructed, which also includes the increase in square footage due to the expansion of existing buildings. Approximately 1,100 net parking spaces would be created from construction of a new parking structure and reconfiguration of existing lots. Parking lots 1 through 9 will be reconfigured with 90 degree parking stalls to increase efficiency; entries/exits for all parking lots will be reconfigured to improve visibility and traffic flow; pedestrian sidewalks, crosswalks, and connections for pedestrian safety will be incorporated; clear and directional wayfinding signage will be provided; and photovoltaic canopy covered parking lots will be included.	EIR	10/17/2016
2014061059	Brentwood School Education Master Plan Los Angeles, City of Los Angeles, City of--Los Angeles Brentwood School, the Project Applicant, is proposing the Brentwood School Education Master Plan. Brentwood School is an independent K-12 coed day school with 995 students and facilities on two campuses located approximately one-half mile apart in the Brentwood-Pacific Palisades Community of the City of Los Angeles. The East Campus, located at 100 S. Barrington Place, is approximately 7.5 acres in size and contains existing facilities currently used for grades 7-12. Portions of the East Campus occupy land owned by the West Los Angeles Veterans Administration. The West Campus, located at 12001 Sunset Blvd, is approximately 3.5 acres in size, and contains existing facilities currently used for grades K-6.	FIN

2016034001	Boost-Back & Landing of the Falcon 9 First Stage at SLC-4 West VAFB, CA & Offshore Contingency Option U.S. Air Force Lompoc--Santa Barbara Note: 1 CD The Proposed Action is Space Exploration Technologies Corporation's (SpaceX's) project on VAFB (Federal land). SpaceX now operates the Falcon Launch Vehicle Program at SLC-4E on VAFB. SpaceX proposes using first stage recovery (boost-back and landing) by returning the Falcon 9 First Stage to SLC-4W for potential reuse up to six times per year. The Proposed Action includes: infrastructure improvements at SLC-4W; the boost-back maneuver (in-air), return flight and landing of the Falcon 9 First Stage on the new SLC-4W pad, the boost-back and landing of the Falcon 9 First Stage on a barge specifically designed for the landing.	FIN	
2016091007	Oakdale Village Residential Project El Cajon, City of El Cajon--San Diego The Oakdale Village Housing project is a proposed 15 unit multi family residential development to be developed by Gulf Development & Construction Corp. The proposed development includes four, three story buildings on the site, separated by private entryways that provide access to the respective garages and unit entrances. Along the southern project boundary and the center of the project area there will be nine, three 3-bedroom/3.5 bathroom units, each with a private patio; and along the northern project boundary there will be six, 2-bedroom/1.5 bathroom units. Site amenities include two picnic areas and a playground. A six ft high wooden fence encompasses the project site and includes landscaping and trees to provide visual buffering between the adjacent properties.	MND	10/03/2016
2016091011	ENV-2014-4933-MND Los Angeles, City of Los Angeles, City of--Los Angeles The project includes the demolition of an existing retail and commercial building and the construction of a new seven story mixed use development on an approximately 28,500 sf lot. The new building will contain 3,575 sf of commercial space on the ground floor and 98 dwelling units on second through seventh floors, consisting of nine dwelling units set aside for very low income households and 89 market rate units. The seven story building will have a max building height of 89 ft. The project will provide a min of 139 residential parking spaces and seven commercial parking spaces in a garage that consists of a street level and two subterranean levels. The project also proposes a min of 98 long term bicycle parking stalls and 10 short term stalls. The new building will provide a min of 10,850 sf of open space areas, including a recreation and gym room on the ground floor, a court yard on the third floor, and private balconies.	MND	10/03/2016
2016091012	Perris Gateway Commerce Center Perris, City of Perris--Riverside Proposal to construct a 380,000 sf high cube warehouse bldg on approximately 21.3 acres located within the PVCC Specific Plan, 0.27 acres of which will be provided for purposes of street dedication, and the remainder of the site to be developed with 205,000 sf of landscaping, 225 passenger vehicle parking stalls, 98 trailer parking stalls, and two detention basins. The warehouse building will	MND	10/03/2016

	include 43 docking bays. In addition to the proposed on site and potential off site improvements, the project includes a specific plan amendment which will change the land use designation in the PVCC specific plan from commercial to light industrial. The proposed project also includes a tentative parcel map to consolidate parcels and provide right of way dedication. The DPR application is to review the architecture and approve the project layout.		
2016092007	Mammoth Creek Gap Closure Project Mammoth Lakes, City of Mammoth Lakes--Mono The proposed project involves the construction of a Class 1 multi use path that will be designed to connect from Minaret Rd to an existing MUP on the west side of Minaret Rd. The MUP will run east-west, paralleling Old Mammoth Rd on the south side of Mammoth Creek and to the north of Old Mammoth Rd. The MUP will be ten ft wide and compliant with Caltrans and Americans with Disabilities Act Requirements. The path will be paved with asphalt of sufficient strength to support snow removal.	MND	10/03/2016
2016042066	Squaw Valley-Alpine Meadows Base-to-Base Gondola Project Placer County Olympic Valley--Placer The project includes installation, operation, and maintenance of a winter-time only/ski season only gondola connecting the Squaw Valley and Alpine Meadows ski areas. The eight-passenger per cabin gondola would have a design capacity of approx. 1,400 persons per hour in each direction. Travel time between the ski areas is estimated at approx. 16 minutes. In total, the lift would be approx. 13,000 feet in length (based on slope length). Two base terminals, two mid-stations, and 37 towers would be installed. The project would also include installation, operation, and maintenance of an avalanche control system within proximity to the Alpine Meadows portion of the gondola alignment. The avalanche control system would consist of remotely operated gas-activated exploders (Gazex exploders).	NOP	10/03/2016
2016091009	ArtCenter College of Design Master Plan Pasadena, City of Pasadena--Los Angeles ArtCenter was first established in Los Angeles in 1930 and moved to its current Hillside Campus (at 1700 Lida Street) in the City of Pasadena in 1976. In 2004, ArtCenter established a second campus also in Pasadena, referred to as the South Campus (at 950 S. Raymond Avenue). As the South Campus has grown and operations have shifted to this campus over time, the Hillside Campus and the south Campus have become increasingly connected. As a result, the Art Center has submitted one Master Plan application for a new 15-year Master Plan (the Project) that encompasses development on and comprehensively identifies vision for both the Hillside Campus and the South Campus. ArtCenter would focus growth on its South Campus, while providing for infrastructure improvements and building renovations to existing buildings, additional parking, installation of photovoltaic (PV) solar cells, and modifications to campus access. The Project would be implemented in two phases, with Phase I occurring between 2017 and 2022 and Phase II occurring between 2022 and 2032. It is anticipated that upon completion of the project, total enrollment within ArtCenter would increase from its current enrollment of approx. 2,000 full-time equivalent (FTE) students to a maximum of 2,500 FTE students and increase faculty/staff from 753 faculty/staff members to approx. 994 faculty/staff members between the two campuses. 2016098055	Cleaveland National Forest, Ground Operations - North Parks and Recreation, Department of --Riverside The project provides for operations and maintenance of trailhead/staging area and campground with potable water and restroom facilities. Potable water sampling and toilet pumping will also be performed. Maintenance includes cleaning toilets, cleaning the staging/trailhead and campground areas, maintaining and painting facilities and signs, and trash removal. Trail maintenance will be performed one eight miles of OHV trails.	NOE	
2016098056	Humboldt-Toiyabe National Forest, Ground Operations Parks and Recreation, Department of --Alpine, Mono, Nevada, Sierra The project involves the operations and maintenance of facilities and OHV/OSV trails in the California portions of the Bridgeport and Carson Ranger Districts. Trail signing includes installing, updating, and maintaining route designation signs to identify open riding areas and monitoring dispersed camping areas. Trail maintenance includes brushing, cutting out logs across trails, and maintain erosion control structures. OSV activities include signing wilderness boundaries, posting information at trailheads and providing information to visitors.	NOE	
2016098057	Stanislaus National Forest, Summit Long Valley Restoration Parks and Recreation, Department of --Tuolumne The project will restore several unauthorized user created OHV route segments totaling approximately 1.5 miles, unauthorized expansion of designated OHV dispersed campsites, unauthorized user created OHV dispersed campsites, and seven impact barren areas totaling approximately 1-5 acres. Selected unauthorized campsites will become authorized once moved away from sensitive resources and/or reduced to an ecologically sustainable size. Project activities include pulling back dispersed campsites from streambanks and riparian areas, tilling, and installing erosion control material, rock barriers, wood posts, and signage.	NOE	
2016098058	Stanislaus National Forest Ground Operations and Maintenance Parks and Recreation, Department of --Alpine, Mariposa, Calaveras, Tuolumne The project will provide facilities and operations and maintenance at five OHV recreation sites including Date flat OHV Parking area, Niagara OHV Campground, Hull Creek Campground, Black Springs dispersed camping area, and Crandall OHV parking and dispersed camping areas. Covered activities include restroom cleaning, garbage service, campsite cleanup, vault toilet pumping, information kiosk maintenance, and routine route maintenance.	NOE	
2016098059	San Bernardino National Forest, Ground Operations Parks and Recreation, Department of --Riverside, San Bernardino The project will provide operations and maintenance of four staging areas, six parking sites, and three campgrounds. Maintenance includes cleaning toilets, cleaning the staging/trailhead and campground areas, maintaining and painting facilities and signs, and trash removal. Trail maintenance will be performed on 52 miles of ATV/motorcycle trails and 169 miles of OHV Green sticker routes. The project also includes monitoring activity to implement the habitat management program and soil conservation plan.	NOE

	5 acres.		
2016098087	Trinity OHV Area Ground Operations Parks and Recreation, Department of --Trinity The project includes maintenance of roads, trails, staging areas and campgrounds within OHV areas in Southern Trinity County. Maintenance activities include trail signing and kiosk installation, trimming overhangingg vegetation, removing route hazards (e.g., downed trees and rocks), gate and fence repair or replacement, trail tread work, maintenance of erosion control structures (water bars, rolling dips, culverts, grading and armoring where necessary), and trash removal. All disturbed slopes will be seeded with native plant species, and stabilized with a geo-netting, mulch, and/or straw wattles to prevent erosion. Work will be performed using hand tools and a SWECO 480 trail tractor and mini-excavator as needed. Existing user maps and website content will be updated.	NOE	
2016098088	BLM Restoration of Pacific Crest Trail Parks and Recreation, Department of --Kern, San Bernardino The BLM Ridgecrest Field Office will perform a suite of restoration and protection measures on 69 sites on BLM managed land identified in Region 2 of the restoration and protection plan to dissuade and prevent OHVs from willful illegal or accidental entry onto the Pacific Crest Trails. Restoration activities include vertical mulching, seeding, barriers, erosion control measures, regulatory signing, educational signing, enforcement patrols, monitoring, photo documentation, and public outreach from the planning report.	NOE	
2016098089	Imperial Sand Dunes Recreation Area (ISDRA) Ground Operations Parks and Recreation, Department of El Centro--Imperial This project funds maintenance contracts in support of the OHV recreation program in the ISDRA. The maintenance work includes removing trash, pumping and cleaning vault toilets, dust abatement by water spraying, removing sand from roadways and camp pads, and replacing signs.	NOE	
2016098090	Southern California Mountains Foundation (SCMF) Restoration Parks and Recreation, Department of --Riverside, San Bernardino The proeject will fund nursery operations for native plant species to treat resource impacts and support restoration in areas impacted by unauthorized OHV use. Funding will increase the manpower available to assist the SBNF in maintaining existing restoration projects by utilizing SCMF's Urban Conservation Corps to work on high priority projects across the forest. Restoration maintenance projects include seeding, planting, chunking, barrier installation, slashing, vertical mulching, signage, and fence replacement on approximately 3,000 acres impacted by unauthorized use. The SCMF will coordinate volunteer monitoring patrols that report and restore existing and new unauthorized OHV routes.	NOE	
2016098091	Friends of El Mirage Ground Operation - Multi-Sub Regions Parks and Recreation, Department of --San Bernardino The Friends of El Mirage (FOEM) will implement a Ground Operations Project working under a Memorandum of Understanding with the Bureau of Land Management (BLM) Barstow Field Office to do general ground maintenance in the 25,850 acres of open areas in the El Mirage Subregion. Maintenance activities	NOE

	include trash removal, restroom cleaning, and repair and maintenance of trails, roads, signs, and fences. FOEM proposes maintenance and trail signing in the Black Mountain (287 miles), Fremont Peak (409 miles), Coolgradie (264 miles), and El Mirage (190 miles) Subregions. The project funds an archeologist to survey trails prior to maintenance and signing activities to prevent impacts to cultural resources. FOEM will also print maps to reflect the changes in route designations.		
2016098092	Friends of El Mirage, Restoration - El Mirage Sub Region Parks and Recreation, Department of --San Bernardino Friends of El Mirage will restore illegal OHV trails in the El Mirage Subregion along approximately 190 miles of trail. Active restoration including ripping, mulching, and raking takes place along the initial line-of-sight of the closed trail to discourage future incursions into the restoration area. In areas where trespass has been an ongoing problem, fencing/peeler posts are incorporated. Photo documentation and data collection are included to assess the efficacy of arid lands restoration in OHV recreation areas. Supporting archeological and biological inventories occur prior to site restoration. Informational signing and outreach are provided to encourage OHV users to use only designated trails.	NOE	
2016098093	Desert Group Search & Rescue Volunteer, Education & Safety Program Parks and Recreation, Department of --Kern, San Bernardino, Inyo The project consists of purchasing emergency medical supplies, safety equipment, command post and ATV accessory supplies, vehicle equipment and fuel, a large trailer-mounted generator to provide power to a command post, night vision equipment, and other tools and supplies.	NOE	
2016098094	San Bernardino National Forest, Summit Staging Area Development Parks and Recreation, Department of --San Bernardino The project will formalize the Summit OHV staging area at Cleghorn Ridge. The unofficial parking area currently existing at the location will be formalized by creating a 1-acre staging area with 10 trailer parking spaces and additional standard parking spaces. The site will be improved with recontouring and drainage channels, rock boundaries to delineate parking and picnic areas, over side drains, picnic tables, vault toilets, bear proof trash receptacles, entrance signage, and an ATV/motorcycle loading ramp. Non-native plants would be removed prior to grading.	NOE	
2016098096	Plumas County, Four Corners OHV Track Planning and Environmental Review Parks and Recreation, Department of --Plumas The proposed project involves planning reconstruction and enhancement of the Four Corners OHV track and completing CEQA compliance for the project.	NOE	
2016098097	Tahoe National Forest Restoration Planning - Yuba River District OHV Campground Enhancement Parks and Recreation, Department of --Nevada, Sierra The project is solely environmental review for a planning study to address improvements and trail connections at existing OHV campgrounds. No ground disturbing activities are proposed.	NOE

2016098098	Needles Field Office Ground Operations Parks and Recreation, Department of --San Bernardino The proposed project funds general maintenance of existing facilities as well as the installation of route and interpretational signage.	NOE	
2016098099	Steele Peak Restoration, Fence Installation and Restoration Parks and Recreation, Department of --Riverside The project involves installing post and cable fencing in order to control access to the Steele Peak Parcel in Western Riverside County, which will protect and restore sensitive habitat. The fencing will be installed using manual labor, hand tools, and a gas-powered auger. Mechanical transport of materials is limited to administrative routes with materials transported from the route to the final location via manual labor. The project includes installation of four gates for administrative and emergency access. Restoration activities include removal of invasive species using mechanized and non-mechanized equipment, removing illegally dumped manufactured materials and structures, and seeding and planting native vegetation in those areas. All activities are performed using manual labor with transport of materials limited to administrative routes only.	NOE	
2016098100	Imperial Sand Dunes Recreation Area (ISDRA) Safety Parks and Recreation, Department of El Centro--Imperial This project funds OHV non-law enforcement park rangers, emergency medical and search and rescue (EMS/SAR) supplies, and rescue sand rail maintenance, which assists in providing emergency medical and rescue services to OHV visitors in the ISDRA.	NOE	
2016098101	BLM Needles Field Office Safety and Education Parks and Recreation, Department of --San Bernardino The project provides funding for classroom outreach, outdoor environmental education, rangers, and training.	NOE	
2016098102	Friends of Jawbone Education & Safety - Young Riders Education Program Parks and Recreation, Department of --Kern The project supports a Young OHV Riders Educational Program that includes training on OHV safety, trail etiquette, and potential environmental impacts and issues safety certifications. The program will teach youth to be safe OHV operators and stewards of the desert, as well as recruit parents to educate themselves on OHV safety and the potential environmental impact of off-trail OHV riding.	NOE	
2016098103	Friends of Jawbone Education & Safety - Owlshead GPS Support Parks and Recreation, Department of --Kern The project provides continued support of the "Owlshead GPS" Program (an internet-based system that allows the public to view or download agency OHV route data).	NOE

2016091015	Sussex Estates Subdivision Merced County Atwater--Merced The proposed project would subdivide an existing parcel of 7.71 acres into six residential lots of approximately one acre each, and also construct a cul-de-sac to provide access from Sussex Dr to five of the residential lots. Access to the remaining lot would be directly from Essex Dr. Each residential lot would include a building pad, a domestic well, and a septic tank with an accompanying leachfield. Utility would be underground in a public utility easement, and a storm drainage system would direct stormwater to an existing drainage basin.	MND	10/06/2016
2016091016	TVMWD Groundwater Production Well No. 3 Three Valleys Municipal Water District Claremont--Los Angeles The project consists of the construction of one new potable groundwater well, new chlorination facilities to be housed within an approximate 600 sf building, and new a pipeline to connect the well to the existing TVMWD transmission line located within Baseline Rd in front of the site. This new water supply and transmission infrastructure will allow TVMWD to produce up to approximately 685 afy of groundwater annually to enhance local groundwater supplies and enhance water supply reliability.	MND	10/06/2016
2016092014	Milliken Creek Flood Reduction and Fish Passage Improvement Project Napa County --Napa The project includes dam removal and bridge replacement on Milliken Creek, creek restoration actions, street drainage improvements, and construction of a bypass pipe. The existing dam on Milliken Creek at the Silverado golf course would be removed and replaced with a 20 ft wide by 122 ft long bridge. Creek restoration and enhancement activities would occur along approximately 600 ft of stream channel, extending from approximately 300 ft upstream of the existing dam. To address overland drainage issues in the Kaanapali Drive neighborhood, higher capacity drainage inlets will be installed on Kaanapali Dr. The project would also include the construction of a bypass pipe from the south end of the Silverado golf course to Kaanapali Dr and Hillcrest Dr intersection, and two new drainage inlets on Hillcrest Dr and Atlas Peak Rd to alleviate overland flooding.	MND	10/06/2016
2016092016	Kidder Creek Orchard Camp Zone Change (Z-14-01) and Use Permit (UP-11-15) Siskiyou County --Siskiyou The project is a proposed rezone and use permit application to expand an existing organized camp. The rezone would reclassify approximately 170 acres of land from TPZ to R-R-B-40. The use permit would expand the camp area from 333 acres to 580 acres and increase the total camp guest occupancy from 165 (total bed occupancy of 310) to a peak summertime occupancy of 844. The 844 occupancy includes camp guests, staff, and volunteers. It is anticipated that the expansion would occur over a twenty year period. The organized camp is a conditionally permitted use pursuant to Siskiyou County Code section 10-6.1502(c)(4).	MND	10/06/2016

2015062077	Navy Drive Widening Stockton, Port of Stockton--San Joaquin Project consists of widening Navy Drive from two to four lanes. The total pavement width would be between 70 and 80 feet wide consisting of 1) four continuous 12-foot travel lanes, 2) a center turn lane between the Nave Drive/ Washington Street intersection and the Navy Drive/BNSF railroad underpass intersection to allow for turning into and out of business along that portion of Navy Drive, and 3) shoulders on both sides of Navy Drive ranging from 2 to four feet in width.	NOD	
2015121023	Forest-wide Unauthorized Route Decommissioning U.S. Forest Service --San Diego, Riverside, Orange The OHMVR Division proposes to award grant funds to the Cleveland National Forest for the decommissioning of approx. 64 miles of unauthorized routes in the Descanso Ranger District and the Trabuco Ranger District. Restoration would be accomplished through a variety of options, including: extreme surface roughening, using an excavator to break up compacted soils, increase infiltration, and disperse runoff; recontouring slopes; spreading groundcover, such as rock, organic matter, or mulch; spreading native seed; and installing pipe-rail barriers to prevent re-entry. Signage would be installed at each site to direct riders to authorized areas for vehicle use.	NOD	
2016041045	C-15-030 West Coast Waste Fresno, City of Fresno--Fresno CUP Application No. C-15-030 was field as an amendment to CUP App. No. C-14-174 by Cynthia Liles of Clements Environmental, on behalf of Dennis Balakian of West Coast Waste Company, Inc., and pertains to +/- 18 acres of property located on the south side of East North Avenue between State Highway 99 and South Golden State Blvd. West Coast Waste Co, Inc. (WC) was established in 2001 and granted a CUP for clean and green materials, wood waste, and wood chipping for recycling purposes. WCW took possession of the premises from its previous owner who separated the facility in a dangerous and inappropriate manner and was subject of a Cease and Desist Order. WCW immediately pursued their original CUP and began cleaning up the site. In 2004, WCW modified their original CUP to receive and process up to 500 tons per day of clean green materials and untreated wood products. They continued to clean up the discards from the previous owners while making other site operation improvements to continue diverting recyclable products from landfills. WCW is now proposing to increase tonnage capacity from 500 tons per day to 1,500 TPD, material handlings, and site operations to being the next phase of their existing CUP and enhance overall recycling and organics handling operations. WCW proposed to install a composting system as part of their existing CUP and want to continue that development along with the installation of an anaerobic digester. Due to strict material load contamination rules, WCW is proposing to accept and process a variety of wastes to better comply with current and future regulations.	NOD

2013092039	Spanish Ranch Road Bridge (No. 9C-0039) Replacement Project Plumas County --Plumas CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0090-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Plumas county Dept. of Public Works. The project is limited to the replacement of an existing structurally deficient bridge over Spanish Creek. The current bridge is a single lane approx. 50 foot long bridge with steel stringers and laminated timber deck. The new bridge will occupy the same alignment as the existing structure. The new bridge will be two (2) lanes, approx. 114 feet long and 29 feet wide with metal tube bridge railings mounted on curbs. The bridge will be constructed of precast concrete voided slab elements supported on cast in place concrete substructures on driven pile supported foundations. The piles will be driven approx. 30 to 40 feet deep. The existing roadway embankment on the south bank of the creek will be removed. To prevent scouring, permanent rock slope protection will be placed adjacent to the new bridge abutments.	NOD	
2016012066	Bryant Field Airport Stock Drive Realignment Project Mono County --Mono CDFW is executing Streambed Alteration Agreement No. 1600-2016-0052-R6, pursuant to section 1602 of the Fish and Game Code to the Permittee, the Mono County Dept. of Public Works, represented by Mr. Garrett Higerd. The project includes the realignment of 575 feet fo existing roadway. The Streambed Alteration Agreement is being issued to address 0.005 acres of temporary impacts to the Aurora Ditch resulting from the excavation and replacement of the existing culvert (project). The project includes: the removal of the existing 42-inch-high, 60-in-wide pipe; the removal of less than three cubic yards of accumulated organic sediment from the areas adjacent the pipe; the replacement of the culvert pipe with an in-pipe; the placement of a precast headwall and concrete slurry and backfill around the new culvert; and re-pavement of Stock Drive. Surface flows will not be encountered during project activities, and the project will not occur during nesting season.	NOD

	equipment, an Edison transformer, four ground water production wells and associated piping and equipment. A 6-ft high block wall and a 20 ft wide wrought iron gate existing along the Ranchito Street frontage. A 5 ft 4 in high block well exists along the east, west and southerly property lines of the existing plant no. 1. Ground cover at the site consists of a concrete driveway and crushed rock. The site is landscaped with mature trees along the interior of all perimeters, and the parkway area along Ranchito St consists of grass and hedges. All existing structures within the existing plant no. 1 site will remain, except the existing water storage reservoir that will be replaced.		
2016091022	Relocation and construction of school district central kitchen facility Anaheim Union High School District Anaheim--Orange The proposed project consists of the relocation of the District's central kitchen facility from the District office, located at 501 North Crescent Way, in the city of Anaheim, county of Orange, State of CA, to 2735 West Ball Rd, also in the city of Anaheim, adjacent to West Ball Rd to the south, between major cross streets of South Dale Ave to the west and South Magnolia Ave to the east, on the southeastern portion of the Dale Junior HS campus, on land currently used as a school athletic field, and the construction of the new central kitchen facility thereon. The project location is more particularly depicted on the site map. The new central kitchen will consist of a 40,000 sf, two story facility, with parking areas and a loading dock, and will have four primary components" 1) dry storage, 2) cold storage, 3) a production kitchen, and 4) offices and support facilities (e.g. small storage areas, restrooms, and a meeting room). When finished, the new facility will have the capability to produce up to 50,000 meals daily without further expansion, in contrast to the existing facility, which was designed to provide 7,000 meals per day, yet is currently serving over 30,000 meals on a daily basis.	MND	10/10/2016
2016092021	Labcon Warehouse Addition Petaluma, City of Petaluma--Sonoma The applicant, Greg LeDoux & Associates, Inc. is requesting site plan and architectural Review approval to authorize development of a 40,000 sf addition to the existing industrial building on an approximately 10-acre parcel with partial existing site development. The proposed addition project includes four at grade rear loading docks, one new and one relocated driveway at Cader Lane, additional automobile and bicycle parking facilities, a new bus stop and shelter at Lakeville Hwy, extensive landscaping improvements, and street frontage improvements at Lakeville Hwy and Cader Lane such as bicycle lanes and meandering sidewalks.	MND	10/10/2016
2016092023	Sun Oaks Subdivision S-2014-01170 Redding, City of Redding--Shasta The applicant has proposed to divide 26.9 into 51 single family lots.	MND	10/10/2016
2016091020	Rincon del Diablo Sewer Master Plan Rincon del Diablo Municipal Water District --San Diego The proposed Rincon del Diablo Municipal Water District Sewer Master Plan would serve as the vehicle to allow the District to serve the Harmony Grove area with wastewater service. In order to do this. The District would exercise its latent powers to become a wastewater service agency through Local Agency Formation	NOP	10/10/2016

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<u>Documents Received on Friday, September 09, 2016</u>			
	<p>Commission (LAFD) approval and have its service boundary annotated to include this area.</p> <p>In conjunction with establishment of sewer service, the District will acquire the HGVWRF from the County, which is currently slated to provide wastewater service to approx. 750 equivalent dwelling units (TDUs). Once the District is successful in expanding its services to include wastewater and acquire the HGVWRF, it will modify the plant from approx. 750 EDUs to 1,700 EDUs. These modifications would serve existing homes and those proposed in the three specific plans noted above. There would not be excess capacity that would allow service to any further future housing development.</p> <p>The modified HGVWRF would receive wastewater flows from Harmony Grove Village Harmony Grove South, and Viliano, as well as any conversions from septic systems in the proposed service area (Figure 3). The HGVWRF would treat all wastewater to a Title 22, disinfected tertiary recycled water level and then continue to discharge the recycled water to the existing recycled water distribution system, which will include, in part the Harmony Grove Village, Harmony Grove South and Viliano communities. Specific improvements to the HGVWRF would entail filling in a section of the existing wet weather storage basin to facilitate construction of additional equalization basins, AeroMod tanks, gravity filters, chlorine contact tanks, and off-quality storage. Solar panels may be affixed to buildings and/or installed in open areas of the HGVWRF. Improvements would also be made to the Harmony Grove Sewer Lift Station located immediately adjacent to Harmony Grove Road, west of the HGVWRF, to ensure that all wastewater can be efficiently conveyed to the HGVWRF.</p> <p>Expansion of the HGVWRF will need wet weather storage, or a means for disposing of effluent, on an annual basis. The old quarry site at the northeast corner of the HGVWRF currently provides recycled water wet weather storage for the existing HGVWRF. The proposed expansion would add approx.. 207,000 gpd of additional capacity to the HGVWRF; typically the San Diego Regional Water Quality Control Board would require an additional 20 million gallons of wet weather storage. However, the recycled water would be conveyed to the District's recycled water distribution system, and that system has sufficient demand to dispose of the total plant effluent on an annual basis; thus no additional wet weather storage would be required.</p> <p>In order to connect the Harmony Grove Village, Harmony Grove South and Valiano subdivisions to the HGVWRF, wastewater collection pipelines would be constructed within streets to connect the existing wastewater pipelines to the HGVWRF. In order to facilitate the connection of existing septic system residences, a mainline trunk sewer would be installed in Country Club Drive and potential laterals installed in Harmony Heights Road, Mt. Whitney Road, Calico Lane, Eden Valley Lane, Surrey Lane, Milpas Drive and Hill Valley Road. As individual circumstances allow, residents would connect into this mainline to receive sewer service from the District. Each conversion would entail installation of a n individual 4-inch lateral and connection into the collection laterals or the 10-inch diameter mainline via a wye.</p>		
2016092022	<p>Young Ranch Residential Project Santa Clara County San Jose--Santa Clara YCS Investments, Inc. has submitted a Preliminary Development Plan for a Cluster Subdivision (Young Ranch Residential project). The proposed project consists of 79 home sites on the 2,150 acre Young Ranch property, which consists</p>	NOP	10/10/2016

	of APN 678-15-016, 678-12-001, 678-11-003, 678-01-004, 678-01-018, and 729-57-003. All improvements would be undertaken on the two county parcels in the northern portion of the site, except for improvements to an emergency access road crossing the four city parcels. Open space within the portion of the project site planned for the home sites would be managed in a natural state through dedication of an open space easement that would be owned by the County. In addition to this managed open space area, an approximately 1,940 acre natural preserve is proposed on the city parcels.		
2016092024	State Route (SR) 242 / Clayton Road Ramps Project Caltrans #4 Concord--Contra Costa The SR 242/Clayton Rd Ramps project would modify the existing partial interchanges at Clayton Rd and Concord Ave. The SR 242/Clayton Rd interchange would be reconfigured from a partial interchange to provide new northbound and southbound SR 242 on and off ramps. Proposed local roadway improvements include a combination of additional travel lanes and the extension of left turn pockets on Willow Pass Rd, Concord Ave, Franquette Ave, Clayton Rd, Market St, and Commerce Ave. The purpose of the project is to reduce congestion and improve traffic operations at the SR 242/Clayton Rd and SR 242/Concord Ave interchanges, thereby enhancing mobility in the area, and improving accessibility to key local destination including the Concord CBD and the Concord BART station.	Neg	10/10/2016
2013012003	I-80/SR-65 Interchange Improvements Project Caltrans #3 Roseville, Rocklin--Placer Caltrans, in cooperation with the Placer County Transportation Planning Agency (PCTPA), Placer County, and the Cities of Roseville, Rocklin, and Lincoln, proposes to improve the I-80/SR 65 interchange in Placer County, CA, to reduce future traffic congestion, improve operations and safety, and comply with current Caltrans and local agency design standards.	NOD	
2014121046	National City Marine Terminal Tank Farm Paving and Street Closures Project & Port Master Plan Amendment San Diego Unified Port District National City--San Diego The Project includes the following components: (1) Paving of the former National City Marine Terminal (NCMT) Tank Farm; (2) Closure of portions of Quay Avenue and 28th Street, 32nd St; (3) a Port Master Plan Amendment (PMPA) to remove the streets from the Port Master Plan; and (4) Renewal of four short-term use permits; and 5) New real estate agreement on the former Weyerhaeuser leasehold. Project covers approx. 71.24 acres. The Project will provide additional space for marine terminal operations, including primarily import, export, handling, and storage of motor vehicles and may also include cargo transported aboard a Pasha Hawaii Transport Lines vessel.	NOD	
2015112055	Salado Creek Channel Maintenance Water Resources, Department of Patterson--Stanislaus CDFW has executed Streambed Alteration Agreement No. 1600-2015-0243-R4, pursuant to section 1602 of the Fish and Game Code to the project Applicant, DWR. Project includes activities related to the routine maintenance of Salado Creek at and adjacent to the concrete overchute over the CA Aqueduct.	NOD

	at the site of the existing Tierra Linda (TL) Middle School. With the project, the TL Middle School would serve Grades 6 through 8, and the new 4-5 Upper Elementary School would serve Grades 4 and 5. New buildings would be provided for the existing San Carlos Charter Learning Center (CLC) that resides on the TL campus. Total enrollment would increase to 1,396 students. About 27,900 gross sq. ft. of new building area would be provided on the campus.		
2016052013	East Grove Obstruction Removal at Nut Tree Airport Solano County Vacaville--Solano CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0258-R3), pursuant to section 1602 of the Fish and Game Code to the project applicant, Dave Daly, Solano County Nut Tree Airport. The project is part of a larger tree removal project, which includes the removal of approx. 1,700 trees on approx. 20 acres. The portion of the project subject to Lake and Streambed Alteration Agreement No. 1600-2016-0258-R3, is limited to the removal of 5.63 acre stand of mostly blue gum eucalyptus trees located on the banks of Pine Tree Creek, and a 0.26 acre stand of eucalyptus located on the banks of Horse Creek (total of 5.89 acres). Tree removal will be conducted along 1,630 linear feet of Pine Tre Creek and 170 lf of Horse Creek. The Permittee will remove both stands of trees which are considered obstructions to navigable airspace and a hazard to flight safety by the Federal Aviation Administration and Caltrans.	NOD	
2016061026	Westmorland Water Treatment Plant Improvements Westmorland, City of Westmorland--Imperial The City is proposing water treatment plant improvements that would include repairs and replacements to the canal turnout structure, sedimentation basin and finishing ponds, water treatment units, disinfection system, a new total trihalomethane (TTHM) reduction system, water storage facilities, pump stations, emergency generators, plant controls, and electrical system at the water treatment plant. In addition, existing valves, meters and fire hydrant assemblies in the water distribution system would be replaced and new water pipe loops provided.	NOD	
2016062008	NEV 174 Realign Roadway Curves Caltrans #3 --Nevada Caltrans proposes to improve safety along SR 174 in Nevada County from Maple Way to You Bet Road, PM 2.74 to 4.63. The project is located approximately 5.7 miles southeast of Grass Valley. The project would include realigning include realigning the highway, widening the shoulders, and adding a clear recovery zone.	NOD	
2016072039	Central Amador Water Project Pioneer Water Rehabilitation Project Amador County Water Agency --Amador AWA is proposing a new pipeline in order to increase fire flow and improve the distribution system reliability in the Buckhorn Ridge and Carson Drive area of the Central Amador Water project system. The proposed project would commence at the intersection of Buckhorn Ridge Roade and Cedar Heights Dr, and end at Carson Dr, between Gold Circle Dr and Meadow Crest Dr. New construction of facilities and appurtenances include the following: Installation of approx. 9,250 feet of buried 12-inch potable water gravity-flow pipeline commencing on Buckhorn Ridge Road near North Cedar Heights Drive	NOD

	<p>and ending at distribution system piping in Carson Drive; Connection to Tank C with a pressure-reducing valve (PRV); Replacement of a PRV station location at the north end of North Cedar Heights Dr. and adjacent to Buckhorn Ridge Road; Connection to existing distribution system piping in Carson Drive; and Connections to existing distribution system piping in Buckhorn Ridge Road and Pioneer Creek Road.</p> <p>The proposed pipeline alignment would travel within the Amador County rights-of-way along Buckhorn Ridge Road and connect to Tank C. Continuing southwest along Buckhorn Ridge Road to the intersection of Pioneer Creek Road, the proposed pipeline alignment would then transect through the private property known as Schaefer Ranch before finally terminating with a tie-in to existing distribution system piping on Carson Drive. The Proposed Project would provide an adequately sized main to supply upper Carson Drive and areas at lower elevations within the CAWP through a more direct route that would reduce the bottlenecks of the existing pipe system.</p>		
2016081019	<p>City of Ontario Recycled Water Distribution System Project Ontario, City of Ontario--San Bernardino</p> <p>The Project proposes to reduce its use of potable water, specifically for landscape irrigation applications. The proposed recycled water pipeline will provide a connection point to the existing recycled water pipeline with Euclid Ave. between the I-10 and Riverside Drive - and the parks surrounding the Euclid Avenue corridor with recycled water to be used for irrigation. In addition, a pipeline will be installed to connect two existing OMUC recycled water lines in Riverside Drive to provide recycled water to the service area north of Riverside Drive including the Deer Creek Loop, Lytle Creek Loop, and their surrounding common landscaping. The proposed Project will also construct a booster pump station with the Euclid Avenue median at Fourth Street and another at one of three proposed alternative pump station locations on South Bon View Ave.</p>	NOD	
2016099004	<p>Pumpkin Hollow Restoration Project Upper Mokelumne River Watershed Authority --Calaveras</p> <p>The Upper Mokelumne River Watershed Authority (UMRWA) requests \$500,000 from the Sierra Nevada Conservancy to implement the Pumpkin Hollow Restoration Project. The Project involves forest management activities on 971 acres of the Stanislaus National Forest to reduce wildfire risk, to prevent insect and disease outbreaks, to improve forest and watershed resiliency, and to improve water quality. Project activities would include hand and mechanical forest treatments for forest and wildlife restoration, aspen and meadow restoration, plantation thinning, and construction of fuel breaks. The project includes site sensitive treatments to protect wildlife and wildlife habitat, and a comprehensive suite of Best Management Practices to protect water quality and avoid potential erosion impacts. SNC has reviewed the IS/ND prepared by the UMRWA for the Project, and has independently determined that the Project would not result in significant adverse environmental impacts.</p>	NOD

2015021014	<p>LA Landside Access Modernization Program (LAMP) Los Angeles World Airports Los Angeles, City of--Los Angeles</p> <p>The LA LAMP consists of several primary components. At the centerpiece is an automated people mover system with 6 stations, which would provide access to the CTA for passengers, employees and other users of LA, 24 hours a day. The APM system would transport passengers between the CTA and the other main components of the Project located east of the CTA, including a state of the art, consolidated rental car facility, two intermodal transportation facilities providing airport parking and pick up and drop off areas outside the CTA for private vehicles and commercial shuttles. In addition, the APM system would include a station at the multi-modal/transit facility at 96th St/Aviation Blvd planned by Metro as a separate and independent project to provide the opportunity for passengers to access the Metro regional rail system.</p>	EIR	10/31/2016
2015051001	<p>Venoco South Ellwood Field Project California State Lands Commission Goleta--Santa Barbara Note: Review per lead</p> <p>Venoco, Inc., an independent oil and gas company, has filed an application with the CSLC to adjust offshore oil and gas lease (PRC 3242) boundary to encompass more area of the South Ellwood Oil and Gas Field offshore of Santa Barbara County. The proposed project would redrill six wells into the extended lease boundary area to extract the oil and gas reserves more efficiently. All redrilling activities would occur from existing Platform Holly located in State waters.</p>	EIR	11/14/2016
2016022005	<p>Sterling 5th Street Apartments Project Davis, City of Davis--Yolo</p> <p>The proposed project would redevelop the 6-acre families first property located at 2100 5th St with a new 244-unit, 5-story apartment project. The property is the site of the former families first residential treatment facility which has been closed since September 2013. The project would demolish the existing buildings and construct five new 4- to 5-story apartment building consisting of 244 apartment units, a separate 2-story leasing office/clubhouse building, a 5-story (6-level with top deck) parking structure, additional site amenities, and landscaping. The project would include a mix of 1-bedroom to 5-bedroom apartment units ranging in size from approximately 500 sf to 1,600 sf.</p>	EIR	10/31/2016
2016091039	<p>Exchequer Mountain Bike Park Merced Irrigation District --Mariposa</p> <p>The Exchequer Mountain Bike Park project site includes the 700 acres that sits south of the Barrett Cove Recreation Area and north of the McClure Point Recreation Area. These areas and the project site are part of a larger complex of recreation areas surrounding Lake McClure. The main focus of the project is the addition of over 40 miles of trails for enhanced hiking and biking recreation; plus, the construction of paved access roads and parking lots. Minor improvements may occur to the existing biking and hiking trails on the project site.</p>	MND	10/14/2016
