

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

September 1 – 15, 2017

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **September 1 – 15, 2017**.

STATE CLEARINGHOUSE CONTACTS

Please contact the State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
E-mail: state.clearinghouse@opr.ca.gov
Website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown via email**.

2013021064	<p>East San Fernando Valley Transit Corridor Los Angeles County Los Angeles, City of--Los Angeles Note: Extended Per Lead</p> <p>Four build alternatives, a transportation system management alternative, and a no-build alternative are being evaluated. The TSM would upgrade existing bus service in the study area w/o the investment in a dedicated ROW. The build alternatives would operate over 9.2 miles, either in a dedicated bus lane or guideway and/or in mixed-flow traffic lanes, from the Sylmar/San Fernando Metrolink Station to the Van Nuys Metro Orange Line Station, with the exception of LRT, which includes a 2.5-mile segment within Metro-owned RR ROW adjacent to San Fernando Rd and Truman St and a 2.5-mi underground segment beneath Panorama City and Van Nuys.</p>	EIR	10/30/2017
2017041039	<p>City of Riverside 2014 - 2021 Housing Element Update Housing Implementation Plan EIR Riverside, City of Riverside--Riverside Notes: Extended Per Lead</p> <p>The 2014-2021 Housing Element Update consists of a comprehensive review/update to the city's HE. The project involves GP Amendments/zone changes/specific plan amendments to as many as 69 candidate sites and as many as 303 parcels. The candidate sites would have a development potential of as many as 11,715 dwelling units and as much as 7.2 million sf of non-residential uses. Overall, the project is anticipated to result in a net increase of as many as 11,649 DU and as much as 5.9 million sf of non-residential uses over existing conditions. In addition, the project involves approval of: GP LU map amendment to change the GP LUD of sites; ZC amendment to rezone sites; ZC Text amendment to include various amendments related to tools H-26, H-47, H-53; and a specific plan amendment to amend the University Avenue specific plan.</p>	EIR	10/23/2017
2017042022	<p>Proposed Amendments to Humboldt County Code Regulating Commercial Cannabis Activities Humboldt County --Humboldt</p> <p>The proposed project is an ordinance addressing regulations concerning the cultivation, manufacturing, testing, distribution, transportation, and storage of commercial cannabis within Humboldt County. The project would involve the repeal of the county's existing commercial medical marijuana land use ordinance and the medical cannabis testing and research laboratories ordinance. These regulations would be replaced with the proposed ordinance, which would establish land use regulations for the commercial cultivation, manufacture, testing, distribution, and storage of cannabis within the county.</p>	EIR	10/16/2017

2017042051	<p>PG&E Palermo Reinforcement Project Public Utilities Commission Yuba City, Marysville--Yuba, Sutter, Butte</p> <p>The existing power transmission system is located in the western Sierras and the communities of Palermo, Honcut, Tierra Buena, Yuba City, East Marysville, Linda, Olivehurst, Plumas Lake, Rio Oso, and East Nicolaus, traversing Butte, Yuba, and Sutter Counties. The proposed project would improve reliability, ensure the system has adequate capacity to meet local needs, and be designed to accommodate future operation. The majority of the existing towers are proposed to be replaced with combination of hybrid poles (bottom concrete/top steel) and tubular steel poles.</p>	FIN	
2017071042	<p>McNally Shoulder Widening Caltrans #9 Bishop--Inyo, Mono</p> <p>Caltrans proposes to widen the paved shoulders and place ground-in skip rumble strips in both directions for 4.1 miles in Inyo County from 0.35 mile north of Silver Canyon Rd to county line and in Mono County for 0.8 mile from county line to 0.14 mile north of Pumice Rd. The shoulders will be widened from the current width of 2-4 ft to the standard width of 8 ft. The project will also construct ground-in skip shoulder rumble strips along the project length and repair/replace terminal ends of culvert pipes. Construction equipment staging areas will be placed along US 6 in Caltrans existing ROW.</p>	FIN	
2017011018	<p>Interstate 15/Railroad Canyon Road Interchange Improvement Project Caltrans #8 Lake Elsinore--Riverside Note: Notice of Availability - FONSI</p> <p>Caltrans, in cooperation with the Riverside county Transportation Commission, and the City of Lake Elsinore, proposes improvements to the I-15/Railroad Canyon Road interchange and the construction of a new interchange 0.22 mile north of the existing I-15 Franklin Street overcrossing. The proposed project would reconstruct the existing Railroad Canyon Road interchange and construct a new four lane overcrossing/interchange approximately 1,160 feet north of the existing Franklin Street overcrossing.</p>	FON	
2017091003	<p>Goleta West Sanitary District New Administration Building Goleta West Sanitary District Santa Barbara--Santa Barbara</p> <p>The Goleta West Sanitary District has conducted administrative activities in a converted garage since the mid-1960s and is now looking to modernize its operations by constructing a new 3,298 sf Admin building. The project site is located on the District's HW complex at the southwestern edge of the Santa Barbara Airport, on an easement over city of SB property.</p> <p>The proposed project under evaluation in this IS/MND consists of demolition of the existing single-story 1,353 sf garage and shop buildings located adjacent to a paved access driveway along the southern edge of the project site, and construction of a new 3,298 sf single story Admin building. The existing garage and shop buildings are located next to each other on the south property line and are separated by a small walk space. For the purpose of the IS/MND analysis they are discussed as one building that will be demolished to make way for the new Admin building. Existing admin uses will be transferred from the existing admin building to the new structure. Existing operations in the garage and shop buildings</p>	MND	10/02/2017

	to be demolished will be moved into other existing facilities on the site. No expansion of operations or additional staff will be added on-site as part of this project.		
2017091006	Kevin & Linda Smith Residence - 1355 Lighthouse Ave, Pacific Grove, CA 93950 Pacific Grove, City of Pacific Grove--Monterey The project is to construct a new single family residence on a vacant lot and application to be on the water waitlist. 5 trees would be removed, to be replaced by 36 tree replants. The project site is located in the Archaeological zone, coastal zone, and environmentally sensitive habitat area.	MND	10/02/2017
2017091007	III Holdings LLC Monterey County --Monterey The project proposal is demolition of an existing dilapidated 2,852 sf single-story structure and rebuild of a 2,985 sf two-story single family dwelling with an attached 583 sf garage, and permeable surface circular driveway; conversion of a previously constructed test well to a production well; development within 750 ft from a known archaeological site; development within 100 ft of ESHA. The proposed project also includes underground water storage, propane gas tank, and power extension; relocation of a power pole; in-ground hot tub; planted roofs, and solar array.	MND	10/02/2017
2017092002	Woodvista Redevelopment (PLN17-00147) Placer County --Placer Subdivision in order to develop seven residential condo units and associated common space. Site redevelopment will include converting one detached single-family manager's unit, constructing a two-story triplex residential structure, and demolishing an existing abandoned motel building at the rear of the lot and replacing it with a triplex two-story residential building for a total of seven planned residential condo units within three building onsite.	MND	10/02/2017
2017092008	West Stanislaus Irrigation District Fish Screen Intake Project West Stanislaus Irrigation District --Stanislaus The proposed project/action would include installation and operation of a new 347 cubic feet per second capacity screened intake with a low-lift pump station located on the bank of the San Joaquin River adjacent to the mouth of the WSID intake canal. The proposed project/action would also include approx 2,100 ft of underground pipeline from the proposed pump station to the intake canal; sediment removal and management along the length of the existing intake canal; upgrading existing roads along the intake canal; two wildlife crossing of the intake canal, one of which would also allow flood conveyance; facilities for providing late fall-water deliveries to the San Joaquin River National Wildlife Refuge; and a flood connectivity structure to support the US Fish and Wildlife Service's management of the Refuge for floodplain reconnection.	MND	10/02/2017
2017091009	West Village Project Calabasas, City of Calabasas--Los Angeles The proposed project involves the development of residential commercial, and public open space/trail uses on an undeveloped site of approx. 77.22 acres. The residential component would include a non-gated community of 15 three-story	NOP	10/02/2017

	<p>multi-family housing buildings. Each building would provide 12 dwelling units for a total of 180 units, 27 of which would be designated affordable housing units. The commercial component would consist of 5,867 sq. ft. retail center, including restaurant and retail uses. Approx. 86 percent of the site (66.1 acres) would be preserved as open space. Non-remedial site grading would involve approx. 218,770 cubic yards of cut and approx. 240,785 cy of fill, with a remedial site grading would involve approx. 218,770 cubic yards of cut and approx. 240,785 cy of fill, with a net of approx. 22,015 cy. On-site remedial grading involve s2,403,418 cy of cut, and 2,406,971 of fill, all balanced on site.</p>		
2017092007	<p>Student Housing West Project University of California, Santa Cruz Santa Cruz--Santa Cruz Notes: Refer to SCH#2005012113</p> <p>The proposed project to be analyzed in the project-level EIR includes the construction and occupancy of up to 3,000 new beds of student housing for upper division undergraduate students, graduate students and students with families, including support spaces, amenities and associated infrastructure. The project is envisioned to be constructed in phases with at least 900 beds to be available by July 31, 2020 and the remainder of the project to be completed by July 31, 2022. Implementation of the student housing project may require an amendment to the 2005 LRDP land use map (Exhibit 2). The proposed LRDP amendment will revise the land use designation of less than 5 acres of land on the West Campus for Campus Resource Land (CRL) to Colleges and Student Housing (CSH) compared to the 14 acre land use amendment described in the April 2017 NOP). The proposed project supports the UC system-wide Housing Initiative, which was announced by UC President Janet Napolitano in January 2016. The overarching goals of the housing initiative are two-fold: first, to ensure that each of UC's campuses has sufficient housing for its growing student populace; and second, to keep housing as affordable as possible for UC students.</p>	NOP	10/02/2017
2010052022	<p>PA-1000086 (TE) San Joaquin County Stockton--San Joaquin</p> <p>A six year time extension application for a previously approved minor subdivision to subdivide an existing 2.42 acre parcel into 12 parcels ranging in size from 7,271 sf to 10,900 sf.</p>	Neg	10/02/2017
2017091001	<p>ENV-2017-1247-ND Los Angeles, City of --Los Angeles</p> <p>Pursuant to Los Angeles Municipal Code Sections 12.32 and 11.5.6, a city-initiated ordinance to correct the zoning and a GPA to correct the LUD for private properties located at 2093-2121 E. Charlotte St. and 1201-1219 N. Cornwell St. that were incorrectly zoned PF-1 during the 1999 Northeast LA Community Plan Revision. The proposed action includes changing the general plan land use designation from PF to MR, and changing the zone from PF-1 to R3-1, consistent with the current use of the subject area and surrounding residential uses; the existing height district 1 will remain the same. The proposed zone change and GPA does not include the demolition, remodel, construction, or alteration of existing structures. This action is viewed as a correction by the city that will make the zoning and LUD consistent with the current residential use of the subject.</p>	Neg	10/02/2017

2017091002	Zacara Development Plan, 10DVP-00000-00012, 16NGD-00000-00009 Santa Barbara County Goleta--Santa Barbara The applicant is requesting a development plan to legalize all existing and proposed development on the property, including that which has been previously permitted, modifications to structures that were done w/o the benefit of required permits, and proposed improvements yet to be completed. The applicant is also requesting a CUP to recognize the 11 agricultural employee dwelling units on the ranch.	Neg	10/02/2017
2017091005	Monarch Buena Vista Vista, City of Vista--San Diego The proposed project involves the construction of two primary components on a 13.42 acre site situated along Buena Vista Creek: a private 179-unit residential development and associated improvements located on 7.98 acres, and a 2.35-acre city-owned and operated flood control detention basin within the remaining 5.44 acres of the site. The applicant for the residential development component seeks approval of a site development plan, tentative plan, tentative subdivision map, and a condo housing permit for the construction of the project.	Neg	10/02/2017
2017091008	Oso Flaco Lake Culvert Replacement Parks and Recreation, Department of --San Luis Obispo The OHMVR Division evaluated the potential environmental effects of installing two permanent culverts under the Oso Flaco Lake causeway at the Oceano Dunes State Vehicular Recreation Area. The proposed project would remove and replace the two existing culverts transecting the Oso Flaco Lake Road causeway. The work involves excavating the width of a 20-ft long section of the causeway to remove the culverts and install two 30-ft long, 48-in diameter culverts beneath the causeway roadbed. Once installed, the excavated area would be backfilled with new base material, approx 104 cy of crushed red rock. Total disturbance area is 0.002 acres.	Neg	10/02/2017
2017092001	PA-1700172 (ZR) Zoning Reclassifications for GP Update San Joaquin County --San Joaquin A zone reclassification application to process the zone reclassifications for the landowner requests of the 2035 general plan update that were approved and adopted by the Board of Supervisors. The adopted Landowner Requests changed the GPD of the subject parcels. This zone reclassification will make the zoning consistent with the adopted GPD.	Neg	10/02/2017
2017092003	Butte County Airport Land Use Compatibility Plan (ALUCP) Update - Chico Municipal Airport Butte County Chico--Butte Note: Refer to SCH # 2000032071 The proposed ALUCP will replace the existing ALUCP for the airport adopted by the Butte County ALUC on December 20, 2000, and last amended December 2010. The need for updating the ALUCP for Chico Municipal Airport is due to local and state level changes that have occurred since the plan was adopted in 2000. In 2003, the city of Chico - the owner and operator of the airport - adopted an Airport	Neg	10/02/2017

The proposed 7.6 acre project will also include a 4,000 sf vehicle maintenance building, 4,000 sf future buildable zone, 350 vehicle parking lot, heliport, 180 ft communications tower, road improvements, utilities, and off-site improvements. The existing use is located on two parcels totaling 11.8 acres currently composed of a temporary fire station, roadway, and vacant land at 26201 Golden Valley Rd.</p>	NOD	
2017062016	<p>Relief Reach-Kennedy Meadows Riparian Restoration and Streambank Stabilization Project State Water Resources Control Board Sonora--Tuolumne On April 8, 2016 PG&E filed an application for water quality certification under section 401 of the Clean Water Act with the SWRCB. The Relief Reach-Kennedy Meadows Riparian Restoration and Streambank Stabilization Project is a requirement of PG&E's Spring Gap-Stanislaus Hydroelectric Project, Federal Energy Regulatory Commission (FERC) Project No. 2130. The Project is located on the Middle Fork Stanislaus River in Tuolumne County, CA Prior to issuance of the certification, the State Water Board must comply with CEQA. The State Water Board is the lead agency under CEQA. PG&E is required by the Spring Gap-Stanislaus Hydroelectric Project's FERC license, issued on April 24, 2009, to evaluate riparian and streambank conditions in upper Kennedy Meadows (Project Reach) on the Middle Fork Stanislaus River below Relief Dam and to develop and implement vegetation restoration and streambank stabilization measures. These requirements derive from Article 401 of the FERC license, which implements the US Dept. of Agriculture-Forest Service 4(e) conditions and Condition 9 of the State Water Board certification. Project proposes streambank stabilization and enhancement of riparian and aquatic habitats within the Project Reach. The streambank stabilization and riparian restoration measures are proposed along a 3,000 linear foot reach along the Middle Fork Stanislaus River. The proposed measures include a combination of various bioengineering techniques, including streambank grading, wood and rock placement, and native vegetation planting. Toe rock addition and root wad placement are proposed in areas with more recent and severe active streambank erosion, and where flow velocities are higher during high flows compared to the other treatment areas. Split rail fencing will also be installed in two segments at the downstream end of the Project Reach to protect the restored vegetation and banks. A river access area used by recreationists and cattle will remain open to allow focused access to the river. The primary purpose of the certification is to protect water quality standards of the Middle Fork Stanislaus River. The beneficial uses and water quality objectives</p>	NOD

2015122055	2016 Fisheries Restoration Grant Program, the Steelhead Report Fish & Wildlife #2 --Mendocino CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0192-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, San Mateo County Resource Conservation District. Instream coho salmon and steelhead trout habitat enhancement through large wood (LWD) installations will occur throughout 0.42 miles of mainstem San Gregorio Creek. Approx. 21 redwood logs will be sourced onsite from upslope, non-riparian trees. Additionally, up to 3 Douglas fir logs with rootwads and 2-4 boulders will be sourced from an onsite for use in the LWD structures. A total of 12-13 large wood structures are to be installed along the project reach. All project large wood will be anchored with hardware as described in CDFW's CA Salmonid Stream Habitat Restoration Manual, 4th edition. Project will utilize the following techniques from the manual: log pinning with rebar (p. 179), stream bank anchors using rebar (p. 180), and bedrock and boulder anchors using threaded rebar (p. 181). All anchoring and positioning of LWD and boulders will be done with oversight from a qualified and licensed professional engineer.	NOD	
2016042073	Olema Tributary Creek Culvert Replacement Project Caltrans #4 --Marin CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0019-R3, pursuant to section 1602 of the Fish and Game Code to the Caltrans as represented by Jo Ann Cullom. The Project is limited to the replacement of two failing 24 inch culverts with a 30 foot long cast in place, reinforced concrete, single-span bridge along with a midway guardrail and permanent wildlife friendly exclusionary fencing. An 80 foot temporary bridge shall be created as the old bridge is removed and new bridge is constructed.	NOD	
2016092053	Harbin Creek Bridge Replacement at Harbin Springs Road Lake County --Lake CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0222-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, County of Lake. Project is limited to the replacement of the fire-damaged bridge over Harbin Creek. The existing structure will be removed and replaced with an approx. 45-foot long by 29 foot wide single span precast, pre-stressed, concrete slab or cast-in-place reinforced concrete slab bridge. The new bridge will be supported by reinforced concrete abutments consisting of either spread footings, cast-in-drilled hole concrete piles, or micro piles.	NOD

2017022012	Fremont Weir Adult Fish Passage Modification Project Water Resources, Department of Davis, West Sacramento--Yolo CVRWQCB is issuing a 401 Water Quality Certification for the subject project. The project is an EcoRestore Project and consists of replacing the Fremont Weir fish ladder with a fish passage structure; modifying the Fremont weir stilling basin; modifying the upstream and downstream (Reach 1) channels of the Fremont Weir, replacing Agricultural Road Crossing 2 with a bridge; and removing Agricultural Road Crossing 3.	NOD	
2017032082	Bridge Replacement Yolo County Line Road @ RD 108 Main Drain Colusa County --Colusa CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0197-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Colusa County Public Works. Project is limited to removal of an existing, failing timber vehicle crossing and replacement with a multiple culvert/earthen fill crossing. The new crossing will be approx. 110 feet long by 60 feet wide. The three (3) culverts will be 83 inches tall by 128 inches wide by sixty feet in length and will be covered with approx. 900 cubic yards of fill to a depth of 7 feet. The top of the crossing will be covered with road base graded to form a standard road prism aligned with the road on either side of the drain proper.	NOD	
2017072007	Rocklin Station Rocklin, City of Rocklin--Placer Project is a request for approval of a Design Review, Oak Tree Preservation Plan Permit, Conditional Use Permit and a Tentative Parcel Map to re-divide the existing four parcels into five commercial parcels and to allow the construction of a commercial center including an automotive service use, retail space, and restaurant spaces, some with drive-through window service and/or outdoor dining and associated site improvements, including parking and landscaping, and a freeway pylon sign exceeding 30 feet in height.	NOD	
2017098024	2017 Bay Waters Boardwalk Maintenance Project San Francisco Bay Regional Water Quality Control Board Burlingame, Redwood City, San Mateo, Vallejo--Napa, San Mateo, Santa Clara, Solano, Sonoma The project involves removal of existing, non-functional boardwalks and installation of replacement and temporary boardwalks that are needed to access utility towers for inspection and maintenance.	NOE	
2017098025	Planning Application PA17-009(EP) Aliso Viejo, City of --Orange PA17-025 for an exception permit to allow the interior dimensions of a garage of a single-family residence to be less than the required width of 20'0" at 67 Sprucewood in Aliso Viejo, CA. The property owner is proposing to convert the third vehicle bay of the garage into a bedroom unit. However, to provide a door that accommodates disabled and/or wheelchair access for the property owner's parents, the remaining garage area would need to be reduced to a width of 18'-4". The reduced width will still allow the property to maintain the 2 parking spaces required by the zoning code.	NOE

2017098026	<p>Rochioli Streambank Stabilization and Revegetation Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Healdsburg--Sonoma</p> <p>The primary purpose of the project is stabilize recently eroded banks of an unnamed tributary and the Russian River along the applicant's property using bioengineered treatments. The proposed project would include installation of a live willow wall, rock and willow brush layers, vegetated boulder banks, and live willow brush mattress along with stabilizing the bank angle at five adjacent sites along approx 285 lf of the unnamed tributary. The applicant also proposes a repair to an existing bioengineered structure installed approx ten years ago along approx 82 lf of the Russian River.</p>	NOE	
2017098027	<p>MEN-1 Emergency Culvert Repair Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Mendocino</p> <p>The project will perform a cut and cover to replace the degraded RCP with a 75-ft long, 24-in diameter fusion-welded high-density polyethylene pipe. The roadway and shoulder above the culvert will be trenched to remove the existing pipe and the new pipe will be placed within the trench. A precast concrete headwall will be placed at the inlet and approx 10 ft x 5 ft x 5.5 ft (0.001 acre) of rock slope protection (RSP) will be placed at the outlet to prevent further erosion. The drainage is dry and no clear water diversion is necessary. Construction vehicles and equipment will be staged on the roadway and will operate from the roadway. Minor vegetation clearing will be required to place the pipe, headwall, and RSP; however, no riparian vegetation will be removed. During construction, appropriate BMPs will be implemented as necessary. Upon completion of construction, disturbed soil areas will be stabilized and are expected to naturally regenerate. Willows will be installed in the new RSP. The project is expected to take 5 working days to complete.</p>	NOE	
2017098028	<p>Phillips Emergency Foundation Repair (Lake or Streambed Alteration Agreement No. 1600-2017-0184-R2). Fish & Wildlife #2 --Placer</p> <p>CDFW has executed lake and streambed alteration agreement no. 1600-2017-0184-R2, pursuant to section 1602 of the fish and game code to Paul Phillips.</p> <p>The project is limited to replacement of eroded rock slope protection placed over the soil immediately in front of the foundation of the residence on the property. This protective quarry stone will be placed on the beach and extend outward into the lake. Additional large rock boulders will be placed within the rock slope protection in a line generally perpendicular to normal wave path to act as an energy dissipater and help to stabilize the soil.</p>	NOE

2017098050	<p>Woodside Road-Skywood Acres Shaded Fuel Break Forestry and Fire Protection, Department of --San Mateo</p> <p>The project will utilize hand crews to create a shaded fuel break in forest dominated areas and a residential mosaic in shrub dominated areas on up to 196 acres along portions of Woodside Rd/SR 84 from Skyline Blvd/SR 35 to Portola Rd, on portions of Bear Gulch Rd and on portions of Thornewood Open Space preserve access roads, in addition to a 4-acre patch of eucalyptus removal along Woodside Rd in Wunderlich County Park. Invasive and undesirable sprouting species may be treated with herbicide to prevent re-establishment in the project area. The shaded fuelbreak width will vary depending on terrain and fuel loads, extending up to approx. 50 ft from the edge on both sides of the aforementioned roads. On Woodside Rd/ SR 84, the fuelbreak extent shall reach up to edge of the Cal Trains ROW, which is typically 30 ft from road centerline, out to a max of 50' from road centerline. The project width will vary depending on the established ROW (fences), and landowner permissions. Some roadside areas will not be treated due to cut banks, light fuels, riparian set-backs or landowner requirements. Fire Safe San Mateo County will conduct outreach to educate and mobilize the community. Caltrans will conduct traffic control while the project is occurring along Woodside Rd/SR 84. It is anticipated this project will be conducted periodically over several months, in the summers of 2017 and 2018.</p>	NOE	
2017098051	<p>Humboldt Road at Jones Creek Culvert Replacement Butte County --Butte</p> <p>Replace two existing 24 inch corrugated metal pipes that are no longer functioning properly in order to allow water flows in Jones Creek to traverse the roadway without overtopping Humboldt Road.</p>	NOE	
2017098052	<p>Middle Honcut Road Culvert Replacement Butte County --Butte</p> <p>Replace four 60 in corrugated metal pipes that failed on the Honcut Rd crossing over an unnamed channel that contributes to Wyandotte Creek which resulted in the complete failure of Middle Honcut Rd at the site. The road is currently blocked off to traffic in the region.</p>	NOE	
2017098053	<p>Loma Mar Water Storage Project San Mateo County Resource Conservation District --San Mateo</p> <p>The San Mateo County RCD, working alongside the Loma Mar Mutual Water Company, SMC, and San Mateo County Parks are replacing a failing 40,000 gallon water storage tank to improve water security for the community of Loma Mar. This project would install four 4,995 gallon water tanks to provide the community of Loma Mar with ample drinking water storage and minimize the need to flush their tank systems during the summer months when instream flows are at their lowest. By replacing the existing water storage system project partners would 1) reduce summer diversions needed from flushing the tank systems, limiting impacts on Pescadero Creek for the benefit of native steelhead trout and coho salmon; and 2) improve water security for the community of Lom Mar. Project designs have been provided by Waterways Consulting, and construction is funded by the Integrated Regional Water Management Plan grant from the DWR.</p>	NOE

2017098054	<p>Emergency Permit for Treatment of Hazardous Waste, Environmental Logistics Inc. Whittier, CA Toxic Substances Control, Department of Whittier--Los Angeles DTSC, pursuant to authority granted under, code of regulations, title 22, division 4.5, chapter 20, section 66270.61, has issued an Emergency Permit to environmental logistics inc. to treat hazardous waste under controlled reaction with a chemical solution. The hazardous waste to be treated consists of seven 500 milliliter bottles of expired ethyl ether. The bottles were stored in a lab refrigerator within the science building at Rio Hondo Community College located at 3600 Workman Mill Rd. in the city of Whittier. The refrigerator that was storing the bottles at a controlled temperature malfunctioned. College personnel were concerned that elevated temperatures could cause an unstable reaction and therefore, requested that the treatment and removal of the bottles by ELI personnel be expedited. DTSC determined that as a safety precaution to prevent an accident or severe injury, an emergency permit should be issued to chemically stabilize the hazardous waste so it may be accepted by a transfer storage and disposal facility for treatment or disposal. The treatment will include introduction of chemicals needed to the ethyl ether solution thereby creating a mixture that is safe to transport to an approved TSDF. A trained CIH/Industrial Chemist will conduct the treatment within a designated exclusion zone. LA County Fire personnel were notified of the treatment. Only qualified personnel will be allowed in the exclusion zone. Movement, preparation, and treatment of the materials will be in accordance with established standards and a site safety and health plan will be completed upon the arrival of personnel to the site. A report will be submitted to DTSC by environmental logistics inc. The report will include certification that the treatment area has been cleared of all residual hazardous waste generated from this emergency treatment, and that all waste has been properly managed. The emergency permit is effective beginning September 2, 2017 and shall expire on September 10, 2017.</p>	NOE

	otherwise not allowed by Section 12.21-A,5 in conjunction with the provision of 26 required commercial on-site parking spaces and 20 bicycle spaces for a total of 31 on-site spaces, and 5) A Mello Determination, for the subject project located on a 9,002 sf lot zoned C1-1.		
2017051028	Recycled Water Program - Phase 2B - Pipeline, Pump Station and Tank Castaic Lake Water Agency Santa Clarita--Los Angeles Note: refer to SCH #2011051020	MND	10/05/2017
	The CLWA Phase 2B recycled system will include a recycled water tank (approx 1 MG), a transmission pipeline from the Vista Canyon pump station to the proposed recycled water tank, distribution pipelines to serve major customers, and a backup potable water supply line from the existing Cherry Willow potable water tanks to the new recycled water tank to maintain flow through the recycled water distribution system if recycled water supply is interrupted. In addition to the Vista Canyon development, recycled water supply will be used to serve irrigation customers with landscaped areas in the Fair Oaks Ranch community. CLWA's goal for the phase 2B project is to use all of the available recycled water to offset potable water demands.		
2017091017	First Perry Logistics Project Perris, City of Perris--Riverside The proposed First Perry Logistics Project consists of construction of an approx 241,000 sf warehouse including approx 7,145 sf of office space. The project site is located within the boundaries of the Perris Valley Commerce Center Specific Plan. The project site has a city of Perris General Plan LUD and zoning designation of PVCCSP. The project will provide approx 153 automobile parking stalls, approx 6 American Disabilities Act-compliant handicapped parking stalls, and approx 42 trailer parking stalls for a total of 201 stalls. The warehouse building will feature approx 61,855 sf of onsite landscaping as well as onsite stormwater detention basins and best management practices facilities for stormwater quality treatment. The project will include employee break areas, as required, and a half basketball court amenity for employee use.	MND	10/05/2017
2017091018	Ventura Isle Marina Dock Replacement Project Ventura Port District Ventura--Ventura The proposed project is limited to waterside improvements. Five docks (G, H, I, L, M) will be entirely demolished and new docks will be constructed. The construction is expected to proceed in the following sequence: demolition and replacement of docks G, H, and I followed by demolition and replacement of docks L and M, followed by substantial upgrades to dock F (i.e., half of F will be replaced) and minimal improvements to dock J (two additional slips and an end tie). During demolition and replacement of docks, liveboards will be temporarily relocated throughout the project site, but will not be displaced. In addition, new gate structures and gangways will be constructed to control access and improve security.	MND	10/05/2017

2017091019	<p>ENV-2015-3567-MND Los Angeles, City of --Los Angeles</p> <p>The proposed project consists of the construction of a 75-unit, six story multi family residential building with two levels of subterranean parking on three contiguous vacant lots. The subterranean parking levels will contain 108 vehicle parking spaces and 103 bicycle parking spaces of which 95 will be long-term and 8 will be short-term. The building will be 61.5 ft in height, with 61,992 sf of floor area for a property that is 21,142 sf in size, resulting in a 2.93 FAR. Approx 21,000 cy of earth will be exported from the project site. The subject site is not located in a special grading area, therefore no haul route is required. There are no existing trees on site or in the adjacent public ROW.</p> <p>The requested entitlements are a site plan review and a density bonus compliance review for a development project that results in 75 dwelling units, with two on-menu incentives for a decrease in the required front yard setback and reduction in the required open space.</p>	MND	10/05/2017
2017092018	<p>Meyers Area Plan El Dorado County --El Dorado</p> <p>The Meyers Area Plan serves as the comprehensive land use and zoning plan for the community of Meyers, consistent with the TRPA Regional Plan and the El Dorado County General plan. The plan is intended to realize the Meyers Community Vision, assist in achieving and maintaining TRPA'S Environmental Threshold Carrying Capacities, implement the Tahoe Metro Planning Org's Sustainable communities strategy, and implement the policy direction of both the Regional Plan and General Plan. The Meyers Area Plan builds upon the existing 1993 Meyers Community Plan and maintains much of the vision and many of the same priorities as this original plan. However, the Area Plan includes lands not included in the community plan. It also updates the community plan to reflect current conditions and includes additional implementation measures.</p>	MND	10/06/2017
2017091016	<p>Kaiser Los Angeles Specialty Medical Center Expansion Project Los Angeles, City of Los Angeles, City of--Los Angeles</p> <p>Project proposes to expand the existing Kaiser Los Angeles Specialty Medical Center campus in two phases. The first phase would include the development of a three-story, 100,000 sq. ft. specialty medical center, a 6-level above ground parking garage with 2 levels of subterranean parking and an expansion to the on-grade surface parking lot. The second phase would include the expansion of the existing Building A, the demolition of Buildings B and C, and the construction of a new 3-story, 92,800 sq. ft., 62 inpatient bed mental health facility, and the expansion of the Phase I parking structure. Upon completion a total of 239,867 sq. ft. of medical facilities (incl. 130 inpatient beds) with 760 parking spaces would be included.</p>	NOP	10/05/2017
2017091015	<p>Cleveland Charter High School Comprehensive Modernization Project Los Angeles Unified School District --Los Angeles</p> <p>The proposed project includes the removal of nine permanent and 28 portable buildings, replacing deteriorated utility lines, and relocating existing storage units and hardscape. New facilities include approx 55 classrooms and support spaces, a multi-purpose room, food services, and a new maintenance and operation area. The proposed project also includes some minor reconfigurations and</p>	Neg	10/05/2017

	improvements to two classroom buildings, seismic strengthening of the physical education building, and various site infrastructure and accessibility improvements. Student capacity at Cleveland Charter High School will allow the specialized programs offered at Cleveland HS to better integrate with other complementary programs.		
2017092017	Commercial Cannabis Business Licensing Program Bureau of Cannabis Control -- The overall purpose of the proposed program is to establish a regulatory licensing and enforcement program for commercial cannabis activities. The proposed program will ensure that medicinal and adult use commercial cannabis activities are performed in a manner that avoids significant adverse impacts on the environment, cannabis industry workers, and the general public from the individual and cumulative effects of these commercial cannabis activities, and complies with applicable laws, including the Medicinal and Adult-Use Cannabis Regulation and Safety Act.	Neg	10/05/2017
2017092024	Long-Term Agreement to Redirect Contract PG&E Water from the Miocene Canal to Thermalito Power Canal Butte County Oroville--Butte Note: Review Per Lead Cal Water proposes the continued conveyance of approx 3,000 af of its contracted PG&E water from the Miocene Canal to Lake Oroville, to the Thermalito Power Canal, and to the District's water treatment plant. Cal Water will reduce deliveries to the Lower Miocene Canal through the SWP facility at Lake Oroville. The non-project water is available for pickup at Station 14 on the Thermalito Power Canal, for use by Cal Water at the WTP. Currently the non-project water is diverted from the Middle Miocene Canal at the Lime Saddle Powerhouse into Lake Oroville. Butte County, as a State Water Contractor, will provide "wheeling" services for the water redirected to Lake Oroville and the Thermalito Power Canal.	Neg	10/24/2017
2017101030	Vineland Avenue Widening Project Kerman, City of Kerman--Fresno The proposed project consists of the widening of Vineland Avenue, from Whitesbridge Rd to 660 ft south, to the ultimate width for a city of Kerman standard collector street (84 ft ROW; 64 ft from curb to curb). The widening will consist of the construction of an 8 ft parking lane and 5 ft bike lane in each direction. The proposed project will also include the construction of concrete curb & gutter and concrete sidewalks. Storm drain facilities will be installed to serve the widened roadway. ROW acquisition will be required from two properties along the east side of Vineland Ave.	Neg	10/05/2017

	acres), 1 Corporation Yard lot (16.8 acres), 1 Fire Station lot (2.1 acres), 3 Open Space lots (22.6 acres), 37 landscape lots (5.6 acres), 1 Cemetery lot (17.1 acres), 1 Religious Site lot (20.3 acres), and 2 Water Tank site lots.		
2008081020	State Route 99 Tulare to Goshen Six-Lane Project Caltrans #6 Tulare--Tulare CDFW has executed Streambed Alteration Agreement No. 1600-2016-0013-R4, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Caltrans. Project involves widening the bridges at three locations to accommodate the widening of SR 99 from a four-lane to a six-lane freeway for the Tulare to Goshen southern segment, and the construction of new frontage road (FR-1) east of SR 99.	NOD	
2010062093	Otay Ranch Village 8 West Sectional Planning Area (SPA) Plan and Tentative Map (TM) Chula Vista, City of Chula Vista--San Diego CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to section 1602 of the Fish and Game Code (#1600-2013-0147-R5) to the project applicant, Otay Land Company, LLC. The project proposes permanent loss of 4.54 acres (7,169 linear feet) unvegetated stream, 0.50 acre southern willow scrub, 0.18 acre freshwater marsh, and 0.04 acre mulefat scrub due to grading and filling the unnamed tributaries occurring on the Village 8 West site and installation of a stormdrain outfall. Project impacts will be mitigated through the rehabilitation of 0.81 acre stream channel, the reestablishment of 8.77 acre stream channel and wetland/riparian habitat, and the rehabilitation of 8.11 acres upland buffer within the Otay River. Activities associated with the compensatory mitigation for this project are authorized under Streambed Alteration Agreement No. 1600-2016-0022-R5.	NOD	
2015072055	Del Rio Tank and Wells Project Modesto, City of Modesto--Stanislaus The proposed project involves the construction and operation of water wells, a storage tank, and associated distribution facilities at two sites, Site A and Site B. The Proposed Project would develop a total of approx. 4.4 acres (approx. 190,000 sq. ft.). The City of Modesto provides water service to the community of Del Rio. The Del Rio water system currently requires a new storage tank (and associated pump station), well, replacement well, backup generators, and pipelines to correct existing supply deficiencies. The existing Del Rio water system does not meet certain design pressure and storage volume requirements identified in the 2010 Water System Engineer's Report for water supply and fire-flow demand. The existing Del Rio water system also is not sufficient to supply anticipated future growth in the Del Rio area. The City intends to decommission one of its Del Rio water system wells (Well 271) when the new replacement well is brought online.	NOD

2013111068	Santa Susana Field Laboratory Project Toxic Substances Control, Department of --Ventura Note: Extended Per Lead The proposed project involves the approx 2,850 acre Santa Susana Field Lab site located in the southeastern-most part of Ventura County and adjacent offsite locations. The Boeing Company, NASA, and DOE are the responsible parties for the investigation and cleanup of contaminants released from past activities at the project site. The 2007 Consent Order and the 2010 Administrative Orders on Consent establish the requirements for the cleanup of soil and groundwater at the project site. As a result of the separate orders, the soil cleanup requirements for Boeing areas are different from the soil cleanup requirements for DOE and NASA areas. The cleanup requirements for groundwater are derived from the 2007 Consent Order and are the same for all three RPs. The primary objective of the proposed project is to implement the 2007 Consent Order and the 2010 AOCs, and to implement other activities associated with cleanup SSFL operations. Roughly 541 acres at the project site or in immediately adjacent areas have been targeted for some level of remedial action. A variety of remedial technologies would be considered for soil cleanup, depending on the results of treatability studies.	EIR	12/07/2017
2016081016	Pure Water San Diego Program, North City Project EIR/EIS (PTS No. 499621) San Diego, City of San Diego--San Diego Note: Review Per Lead A site development permit and EIR/EIS for the project. Overall, the pure water program will ultimately produce 83 MGD of locally-controlled water, recycling a valuable and limited resource that is currently discharged to the Pacific Ocean. The program will be implemented in phases over a 20 year period, grouped by geographical area: North City, Central Area, and South Bay. The North City project, which is the subject of this NOC and EIR/EIS NOP, will produce 30 MGD of purified water and is scheduled to be later operational in 2021.	EIR	11/07/2017

2016111004	<p>Sterling Medical Office Building Irvine, City of Irvine--Orange</p> <p>Sterling American Investments, Inc., is requesting a GPA, ZC and MP approvals to demolish an existing single-story 16,015 sf medical office building with 122 parking spaces and construct a two-story 46,800 sf medical offices building with 260 parking spaces on a 2.9-acre site located at Osborn. The GPA and ZC applications would increase development intensities allowed in the multi-use planning designation by amending applicable max square footage tables within Woodbridge. The Master Plan establishes design relative to building size, height, and setbacks; floor plans; architectural elevations; parking; and, landscaping.</p>	EIR	10/23/2017
2016101041	<p>Cowan Heights Residential Development Project Orange County --Orange</p> <p>The project would involve demolition of an existing shed located on the project site and construction of 22 detached single family homes at a density of approx 3.6 units per acre. The proposed project would have a zoning of 10,000 sf average lot size. The project conforms to the current GPD of suburban res; however a zone change would be required from AR to PC or Planned unit development. The 22 single family units would be two stories in height.</p>	FIN	
2015091038	<p>Sweetwater Place San Diego County --San Diego</p> <p>The application consists of four discretionary actions: a General Plan Amendment to change the existing Land Use Designation from RL-80 to VR-7.3 with no change in regional category; a Rezone to reclassify the existing use regulation from S90 (Holding Zone) to RV (Variable Family Residential); a Tentative Map and Site Plan to subdivide the site into 2 lots with 122 residential condominium units and a 2.08 acre public park on a 20 acre project area. Main access to the site will occur from Jamacha Boulevard at the intersection of Folex Way. An eight-foot-wide public trail is proposed along the north side of Jamacha Boulevard. A series of pedestrian pathways are proposed within the project boundaries to enhance connectivity and circulation throughout the site and provide linkage to the public park.</p>	MND	10/06/2017
2017091020	<p>Rendering Plang Relocation Project Fresno, City of --</p> <p>The project includes relocating the Darling Ingredients, Inc. rendering facility from its current location on Belgravia Ave, just southwest of downtown, to the undeveloped, 40-acre, city-owned parcel east of the existing RWRF. The facility would expand its peak daily processing operation from approx 850,000 pounds to approx 2 million pounds, which is consistent with the proposed permitted volume of up to 10 million pounds per week. The project would require a CUP, and a GPA and rezone from the existing public facility LUD and Public and institutional zoning classifications to a heavy industrial land use designation and industrial heavy zoning classification.</p>	MND	10/06/2017

1993032092	Golden City SPM-5 Murrieta, City of MURRIETA--RIVERSIDE CDFW has executed Streambed Alteration Agreement No. 1600-2015-0034-R6 (Revision 1), pursuant to section 1602 of the Fish and Game Code to the project Applicant, North Murrieta Community LLC. Golden City (Tracts 28532-5) Routine Maintenance Project includes ongoing routine maintenance of three existing culvert crossings, and a limited buffer surrounding those crossings, within the Golden City development: Thistlewood Avenue, Clearview Street (easterly), and Clearview Street (westerly). Maintenance activities, including sediment removal, vegetation management, minor culvert repair, graffiti removal, and trash and debris removal, will be limited to the areas beneath these three stream crossings (within the culverts), and within a 20-foot section of stream upstream and downstream of each crossing. Sediment removal activities will occur annually, or biannually, and utilize heavy equipment, such as rubber-tired excavators. Vegetation maintenance will be conducted using hand equipment, such as chainsaws, machetes, and loppers. Maintenance activities will occur only when the streambed is dry.	NOD	
2015121045	Rose Creek Bikeway San Diego Association of Governments --San Diego Improve a 2.1 mile long segment of the Coastal Rail Trail (Rose Creek Bikeway). The 1.3 mile on-street improvements for safety include utilizing existing paved area and improving a two foot wide shoulder on the west side of Santa Fe Street. To obtain the width needed for the bicycle facility and displacement of the southbound vehicle traffic lane. Santa Fe St. would be widened to the east, in sections, by up to three feet wide. The proposed widening would require a retaining wall along an 875 foot section of Rose Creek up to six feet in height.	NOD	
2016032028	Monterey Road - Young Residential Project, Morgan Hill, California Morgan Hill, City of --Santa Clara CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2016-0391-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Van Daele Homes. Project includes expansion of a double box culvert and construction of a soil retaining wall. The existing culvert will be extended 43 ft. Approx. 50 cubic yards of existing rock rip rap will be relocated from the existing culvert inlet immediately upstream to the inlet of the proposed culvert extension. An additional 70 cu yd. of new rip rap will be added to 83 feet. of the creek bank and channel. A retaining wall will be constructed between the widened Watsonville Road and Little Llagas Creek. Approx. 82 feet of the wall will be within 5 feet of the top of bank.	NOD	
2016062030	Dennett Dam Removal Modesto, City of Modesto--Stanislaus The CVRWQCB is issuing a 401 Water Quality Certification for the subject Project. The Project includes removing Dennett Dam in the Tuolumne River just downstream of South 9th St. The project will permanently impact 1.3 acres/375 linear feet of waters of the United States.	NOD

Restoration Project. The project was intended to be phase I of a larger restoration effort within Horseshoe Lake Unit, the neighboring Bjelland Unit to the east, and other Cosumnes River Preserve (Preserve) owned lands along Badger Creek. The Horseshoe Lake portion of the 2015 project involved the construction of a 5 acre perennial wetland by removing highly invasive, non-native Uruguayan water primrose (*Ludwigia hexapetala*) and its associated biomass, and the enhancement of approx. 2.5 acres of upland aestivation habitat. The Bjelland portion of the project involved the restoration of 5 acres of ruderal agricultural land adjacent and a channelized section of Badger Creek to a more natural floodplain and adjacent upland configuration.

The proposed project would continue the collaboration between the County, BLM, and USFWS within the Horseshoe Lake Unit, Assessor Parcel 134-0280-084. The BLM is the land managing partner for County owned lands at the Preserve and therefore would be the lead agency for National Environmental Policy Act (NEPA) compliance. The BLM would also act as the Project Manager throughout both the implementation and pre- and post-monitoring phases of the project. Sacramento County would be the lead agency for CEQA compliance and would act as the Grant Manager. for funding secured for project implementation and monitoring. the USFWS has contributed to the project via grant funding from the Partners for Fish and Wildlife Program.

The proposed project would be, in essence, phase II of the restoration and enhancement of aquatic and upland habitat for the federally and state-listed "threatened" giant garter snake (GGS) (*Thamnophis gigas*), and other native CA species within the Unit. This parcel is located immediately to the east of CA Hwy 99 at Dillard Road, and is hydrologically connected by Badger Creek to a documented population of GGS. The project area is located less than 1,200 meters from this existing population. The proposed project would expand upon the 2015 restoration site, using the same methodologies as those successfully implemented in the previous project. Additionally, herbicidal treatments would be used to control primrose infestation in the rest of the 110-acre lakebed. The proposed improvements to Horseshoe

Lake and the surrounding uplands within the project area (along with the 2015 5-acre perennial wetland) would create approx. 110 acres of protected, wetland habitat suitable for GGS, along with 10 to 15 acres of enhanced upland habitat. Many other species would also benefit from the restoration project including federal trust species of migratory waterfowl and waterbirds, and state listed species like the western pond turtle (*Emys Marmorata*), and greater sandhill crane. Excavators, self-propelled belly scrapers, and/or tractors equipped with tow-behind scrapers would be used to remove approx. 88,000 cubic yards (cy) of primrose biomass from the 20-acre seasonal wetland and the 10-acre perennial wetland in order to restore the open-water habitat required by GGS for their survival and recovery. A temporary access road would be mowed from Dillard Road south to the project site to facilitate access for the heavy equipment, and ensure adherence to seasonal fire restriction policies. the access road would be approx. 12 to 15 feet wide, and would only be mowed, not graded, to minimize ground disturbance. The spoils (i.e., the primrose biomass) that are removed from the open-water foraging areas would be deposited in areas adjacent to the lake to the north and east, in order to create additional upland aestivation and hibernaculum sites for GGS. These spoil piles would be left in place to create micro habitat sites for GGS and other species that may utilize the project site (e.g., western pond turtles) The goal for the proposed herbicidal treatment of primrose throughout the

	<p>100-acre lakebed, in the areas surrounding the newly constructed wetlands, would not be complete eradication; rather, the goal would be to gain control of the primrose infestation so that it can be managed and maintained at more biologically and ecologically relevant levels. In order to accomplish this while reducing staff and chemical inputs into the lake and surrounding watershed, no more than 1/3 of the lakebed would be treated per year, and then in subsequent years only maintenance treatments would be required.</p> <p>If full funding is received, herbicide treatments would also be applied on portions of the surrounding uplands to control infestations of yellow star- thistle (<i>Centaurea solstitialis</i>) and other upland weed species. These treatment would be conducted in accordance with the BLM's March 2015 EA for the Integrated Weed management Program at the Cosumnes River Preserve.</p> <p>If grant funding is not received, the project partners would modify the project by reducing the depth, area, and/or cubic yardage of primrose biomass to be removed from the lakebed in portion to the funding already secured.</p>		
2017082002	<p>Magalia Forest Health Project Butte County Paradise--Butte</p> <p>The Magalia Forest Health Project is a grant funded program under the general guidance of the Butte County Fire Safe Council that covers 1066 acres on numerous Assessor's Parcel Numbers of publicly and privately owned property in the Magalia and Paradise Pines area. This project is bounded by Coutolenc Road on the east and Nimshew Road on the west, on property owned by Paradise Irrigation District, Paradise Unified School District, Paradise Pines Property Owner's Association, and others, extending from Andover Drive in the south to just south of Steiffer Road off of the Skyway to the north. The Butte County Fire Safe Council's vision is to create communities that are resistant to the devastating impacts of wildland fires. The Fire Safe Council has been promoting shaded Fuel Breaks as a deterrent to major wildfires in the Magalia/Paradise area. Work is projected as a ten-year program on the subject properties and would occur as funding becomes available.</p>	NOD

2017098194	Construct sheet pile and tie-back-wall - 4K550/0417000321 Caltrans #4 --San Mateo Repair a slip-out by constructing sheet pile and tie-back walls. This repair will restore the structural integrity of the roadway and make the transportation corridor safer.	NOE	
2017098195	Heber Spetic Leach Lines Repair Parks and Recreation, Department of Holtville--Imperial The purpose of this project is to replace the root-bound leach lines for the Heber Dunes residence, camp host sites, the old office building, and the new office/shop building septic systems. The project entails excavating and removing the existing infiltrator lines (setting the spoils to the side for re-use) and then smoothing the exposed ground surface, installing new infiltrators in their place, before covering them with drain rock and an additional layer of biofilter fabric and finally wrapping the sides of the trench fabric over the top. Then the trenches will get filled back up with the spoils that were excavated from that site. The anticipated area of impact would measure approximately 150' (L) by 30' (W) with depths measuring up to 6' deep at each location. The excavation work is expected to be done using a backhoe tractor and the placement of the infiltrators will be done by hand. repairs to each individual system will be completed to 90% before the next system will be taken off-line. this will serve to minimize the exposed trench areas and reduce the septic systems down-time from operation during the course the project. The 10% remaining will be the final handwork to get rid of heavy equipment and the installation of carsonite markers to delineate and protect the leach zones from vehicle traffic.	NOE	
2017098196	Propane Tank Replacement at Malibu Sector Office (16.17.A.14) (ER-11992) Parks and Recreation, Department of Malibu--Los Angeles The project would remove an old propane tank and install a new tank at the Malibu Sector Office. A concrete pad surrounded by a fence would be installed for the new propane tank. A new line at a depth of 30 inches would be installed from the concrete pad to the office. Measure to be implemented to keep impact to a less-than-significant level may be obtained by submitting a request to the project Environmental Coordinator listed below.	NOE	
2017098197	Devil's Gate Interim Measures Project (Lake or Streambed Alteration Agreement No. 1600-2016-0272-R5) Fish & Wildlife #5 --Los Angeles The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement number 1600-2016-0272-R5, pursuant to Section 1602 of the Fish and Game Code to Los Angeles County Flood Control District. To minimize clogging and/or other impacts to dam operations prior to each storm season, sediment will be removed from an area approximately 140 by 170 upstream of the dam, approximately 0.54 acres. Sediment removed from this area shall be temporarily placed within a 2.75 acre temporary sediment placement known as Johnson's field that is owned by City of Pasadena. This site is located on the northeastern side of the reservoir, approximately 1,000 feet from the sediment removal area. The existing access roads will be used to gain access to the sediment removal area, and transport sediment to Johnson's field before soil, organics, and trash	NOE

<u>Documents Received on Wednesday, September 13, 2017</u>			
2003041057	Sycamore Landfill Master Plan Expansion San Diego, City of San Diego--San Diego Allow traffic into the facility and weigh in at the scale house before 6:00 AM, and ancillary hours of 24 hours. Traffic will queue inside of the landfill, but no tipping of loads will occur before 6:00 AM. There will be no changes to the operating days, permitted area, or daily tonnage.	NOD	
2005121052	Barr Ranch; TM 5293RPL^2, Log No. 02-02-024 San Diego County Fallbrook--San Diego Project is a time extension for the completion of the subdivision of 8.39 acres for 23 residential lots and one detention basin lot.	NOD	
2007012075	Gilbert Property Project Oakley, City of Oakley--Contra Costa Approving an Amendment to the Gilbert Property Subdivision Tract Map (Subdivision 9033), Final Development Plan and Final Phasing Plan and Adopt an Addendum to the Gilbert Property Environmental Impact Report.	NOD	
2008062022	Charles M. Schulz - Sonoma County Master Plan Implementation Project Sonoma County Windsor, Santa Rosa--Sonoma CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0333-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Charles M. Schulz - Sonoma County Airport, as represented by Jon Stout. Project is limited to the enhancement and restoration of 2,623 linear feet of Hessel Creek through riparian planting and stream enhancements.	NOD	
2013081079	Revisions to the Kern County Zoning Ordinance - 2015 C. Focused on Oil and Gas Local Permitting Kern County --Kern Project includes activities to redevelop two oil well development blocks with the construction, operations and maintenance and eventual plugging/abandonment of a total of 34 new wells including 28 oil production, 6 steam injection wells, and associated infrastructure within the development envelope over 30 years. Project will result in permanent impacts to 20.51 acres and temporary impacts to 5.47 acres of San Joaquin kit fox (<i>Vulpes macrotis mutica</i>) and San Joaquin antelope squirrel (<i>Ammospermophilus nelsoni</i>). The Project is expected to result in incidental take of San Joaquin kit fox and San Joaquin antelope squirrel, which are designated as a threatened species under the CA Endangered Species Act (CESA). The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation. The Amendment increases the original development envelope from 50 acres to 123 acres to allow final placement of well pads and infrastructure to be determined prior to construction based on preconstruction survey results from Covered Species, but will not increase the permanent or temporary impacts listed above.	NOD

	and production of oil, gas, and other hydrocarbon substances within the City of Culver City.		
2016121063	Fig+Pico Conference Center Hotels Los Angeles, City of Los Angeles, City of--Los Angeles The project proposes approx 506,682 sf of floor area in two hotel towers, providing up to 1,162 guestrooms and 13,145 sf of retail/restaurant space on an approx 1.22 acre development site. The project site currently contains a 27,800 sf two story commercial building and surface parking lots, which are to be demolished. A city-initiated sign, district would also be implemented on the project site and on certain surrounding parcels along S. Figueroa St, W. Pico Blvd, and S. Flower St.	EIR	10/30/2017
2017091043	CR&R Green Waste Composting Facility Riverside County --Riverside The project consists of CUP No. 3741 and GPA No. 1171. The CUP proposes permit the existing compost facility and increase from the existing registration tier I permit level (12,500 cy) to a regional tier II composting facility that will handle up to 130,000 cy of green and organic material at any one time. All green and food waste material collected by CR&R will first be processed through their in-vessel Anaerobic Digestion facility located in Perris, CA. The GPA proposes to amend the project site's 202 gross acres GP foundation component from OS to AG and amend its LUD from conservation to AG, on two parcels.	MND	10/13/2017
2017091044	Conditional Use Permit No. PL14-0142 Ventura County Ojai--Ventura The applicant requests that a modified CUP be granted to authorize the replacement, upgrade and redesign of an existing wireless communication facility. The antenna structure for the existing permitted facility is designed as a cross. This cross and the associated equipment area are located on the southeastern slope of a hill near the center of the subject parcels. The proposed redesigned facility would include a 34-ft high antenna structure designed as a faux pine tree. The proposed mono-pine will be located about 9-ft west of the existing cross structure within a 225 sf lease area adjacent to an existing covered seating area. The existing approx 314 sf accessory equipment enclosure, will continue to be used and will not be enlarged. This enclosure is located adjacent to the antenna structure and is comprised of a concrete masonry retaining wall that supports a perimeter chain link fence.	MND	10/13/2017
2017092035	Pleasant Valley High School Athletic Fields Project Chico Unified School District Chico--Butte The proposed project includes various components identified in the Pleasant Valley HS PE/Athletics Master plan - Phase I: replacement and relocation of existing stadium lighting; electronic scoreboard; bleachers; press box; and welcoming entry building - tickets, concessions and restrooms. Future phase: softball field relocation; replacement/relocation of softball field lighting; new lighting for baseball field; natural grass; covered dugouts; storage facilities; fencing, including removable outfield fencing; equivalent spectator seating; and future phase; class space/team rooms; all weather field, mat room, two additional tennis courts.	MND	10/13/2017

2017091041	<p>City of Laguna Woods General Plan Comprehensive Update Laguna Woods, City of Laguna Woods--Orange Note: Reference SCH #2002031008</p> <p>The Laguna Woods General Plan is a guidance document that describes the city's vision as a livable community with excellent services, a strong identity, healthy business opportunities, and a strong and efficient government. Future land use and conservation decisions in the city are regulated by goals and policy objectives set forth in the general plan. The city intends to update the existing GP to address issues and community priorities, ensure compliance with state law, and revise implementing policy frameworks to focus on goals and policy objectives. The updated GP will also incorporate new and updated assumptions, data, and analysis, as well as establish a new, long-term, 25-year vision.</p>	NOP	10/13/2017
2017092034	<p>North Coast Rail Trail Project Santa Cruz County Regional Transportation Commission --</p> <p>The North Coast Rail Trail Project includes a 7.5 mile Class I multi-use bicycle and pedestrian trail along the RTC-owned railroad corridor from Wilder Ranch State Park on the south to Davenport on the north. The trail would generally be 20 ft wide and comprised of a 12-ft wide paved surface and unpaved shoulders. The project also includes parking improvements at the Davenport Beach lot and Yellowbank/Panther Beach lot where 30-50 formal parking spaces would be provided in addition to restrooms, bike racks, benches, and an ADA-accessible route to the trail. Additionally, the project would include access from the current Bonny Doon Beach lot to the future trail and improvements for crossing SR 1 at Davenport. The parking lots and the highway crossing would encroach within the Caltrans ROW. Project construction activities would include land clearing, grading, paving and striping for the trail and parking lots.</p>	NOP	10/13/2017
2017091042	<p>Lennox Academy Property Acquisition and Building Replacement Lennox Academy --Los Angeles</p> <p>Lennox Academy Board of Directors proposes to acquire the property adjacent to the north side of LMSTA campus. The interior of the building would be partially renovated so the Academy could offer a new Career and Technical Education Program related to auto mechanics. On the LMSTA campus the Lennox School District would remove 3 portable classroom buildings and construct an approx 2,000 sf one story two classroom building.</p>	Neg	10/13/2017

2010062082	<p>sewer pipes; and construction of paved roads and hammerhead turnarounds along the north and south sides of the creek to access each manhole. Following installation of the pipe, the creek's bed, banks, and channel will be returned to their original state and revegetated. A coffer dam will be installed upstream of the work area to prevent flows from entering the work site, and the water will be pumped through a pipe around the work site and back into the creek downstream. Construction of a drainage swale to convey runoff into Pleasant Grove Creek. The F-8B outfall swale will be excavated between the creek and the future residential development. Riprap check dams will be installed in the created swale to reduce the flow velocity. Following construction, the swale will be stabilized using native seed mix and mulch.</p> <p>Dry Creek Habitat Enhancement Demonstration Project Sonoma County Water Agency Healdsburg--Sonoma CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2017-0343-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Sonoma County Water Agency. During winter 2016-2017, frequent heavy rains with sustained high flows led to a large amount of deposited gravel into the back end of one of the backwater channels. This project authorized under this Agreement is limited to: excavating the deposited gravel from the backwater channel; backfilling floodplain wood structures with gravel; installing willow baffles upstream of the backwater channel along the bank of Dry Creek to help prevent future gravel deposition; reorienting some large wood structures to be parallel to the main channel of Dry Creek; and excavating out a buried pipe. All work is to restore the site back to the original design and prevent future sedimentation. No mature vegetation will be impacted and a turbidity curtain will be installed to isolate the work area in the backwater pond from the rest of the pond.</p>	NOD	
2015111075	<p>State Route 55 (SR-55) Improvement Project Between Interstate 405 (I-405) and Interstate 5 (I-5) Caltrans #12 Santa Ana, Irvine, Tustin--Orange Caltrans District 12, in cooperation with the Orange County Transportation Authority (OCTA), proposes to widen SR 55 in both directions from just north of the I-405/SR-55 interchange to just south of the Interstate 5 (I-5)/Sr-55 Interchange between PM 6.4 and 10.3 traversing the cities of Santa Ana, Tustin, and Irvine in Orange County, CA.</p>	NOD	
2016032012	<p>Demonstration Recharge Extraction & Aquifer Management Project + NSJWCD South System Improvements San Joaquin County Lodi--San Joaquin Project involves issuance of permits and construction of facilities needed for East Bay MUD (EBMUD) to supply the County's DREAM project with up to 1,000 acre feet of surface water to be applied to approx. 350 acres of farmland in lieu of groundwater extraction. In exchange, EBMUD would receive up to 500 AF of groundwater extracted from an existing well for export to EBMUD customers. The project would involve the improvement of certain existing North San Joaquin Water Conservation District irrigation water distribution facilities.</p>	NOD

	<p>Spillway inspection will include sounding of spillway invert and walls with hammers/chain drag/decimation roller to check for concrete delamination. Preparatory work includes lowering approximately 50 sandbags with a crane in the spillway invert to reduce gate leakage, utilizing hand tools (squeegees/plastic shovels/scrapers) or pressure washer to remove algae in the spillway invert, and setting anchors and ropes for rope access inspection of controlled spillway invert. The spillway work will also include sealing concrete joints and cracks, and repairing areas of concrete spalling.</p>		
2017098223	<p>Taylor Yard Bikeway/Pedestrian Bridge (Lake or Streambed Alteration Agreement No. 1600-2017-0077-R5) Fish & Wildlife #5 --Los Angeles</p> <p>The project is limited to the construction of a multi-model bridge over the Los Angeles River. The proposed bridge is designed for bicycle and pedestrian use, and would also support emergency vehicles. On the south, the proposed bridge would connect with the existing bikeway along the river, and two ramps will be constructed, which will be compliant with the American with Disabilities Act. On the north, a bikeway ramp would be constructed. The proposed steel-framed bridge would be approximately 400-feet-long and supported on abutments and one foundational support pier in the central portion of the channel.</p>	NOE	
2017098224	<p>Wastewater Treatment Plant Annual Road Improvement Project Galt, City of Galt--Sacramento</p> <p>The Wastewater Treatment Plant (WWTP) Annual Road Improvement Project is an approved project in the current Capital Improvement Program. The project will upgrade and pave approximately 1 mile of graveled access roads along the south and west perimeter of the WWTP. The project will use a Full Depth Reclamation (FDR) process to grind and mix existing roadway materials with material to provide a new structural roadway base section. Three inches of asphaltic concrete will then be installed on the base providing a paved roadway.</p>	NOE	
2017098225	<p>CIR Princeton (03-0G420) Caltrans #3 Colusa--Colusa</p> <p>The California Department of Transportation (Caltrans) is proposing a project to cold plan and recycle 0.25' of existing AC pavement and overlay it with 0.15' of Rubberized Hot Mix Asphalt (Type-G) to perpetuate the fair to good condition of the existing roadway and to prolong its service life.</p>	NOE	
2017098226	<p>Schafer Stream Crossing and Pond Removal Remediation Project (Lake or Streambed Alteration Agreement No. 1600-2016-0471-R) Fish & Wildlife #1E --Humboldt</p> <p>The project includes seven encroachments. The seven encroachments will remediate impacts from unpermitted land development for cannabis cultivation. This unpermitted land development has caused extensive erosion by modifying site hydrology and concentrating flow to an inside ditch and hillside. The redirected hydrology has resulted in gullyng and instability of slopes just above Little Larabee Creek. The work is designed to deconcentrate slopes, compaction of fill, installation of rocked fords, removal of existing culverts, stream remediation, revegetation, and rock armoring as necessary to minimize erosion.</p>	NOE

	Work for the water diversion projects includes use and maintenance of the water diversion infrastructure. Two additional encroachments are proposed to upgrade road/stream crossings on Class III watercourses. Work for these projects will include excavation, removal of the old culverts, installation of new culverts, placement of rock armoring, and erosion control as necessary to minimize erosion.		
2017098244	Special Repair/ Deferred Maintenance (Allocation #01, FY 17/18) Corrections and Rehabilitation, Department of -- Repair and maintenance projects will be conducted at various California Department of Corrections and Rehabilitation (CDCR) prison facilities statewide as shown in the attached list. Repair projects include a wide array of repairs; some examples are roof repair/replacement, inmate housing shower repair, replacement/repair of flooring, replacement of chillers, and effluent pond lining replacement. These projects are necessary to maintain the buildings and infrastructure and to meet code requirements at CDCR prisons statewide and to ensure unimpeded operation of the facilities and their public safety mission. All work will be performed within the prison property in developed/disturbed areas. These projects are not in environmentally sensitive areas, and none of these exceptions to this exemption are applicable.	NOE	
2017098245	Office Space Lease in Multi-tenant building Consumer Affairs, Department of Sacramento--Sacramento The Department of Consumer Affairs, Board of Pharmacy, proposes to lease approximately 20,850 sqft. of existing office space. The space will be used for the licensing and enforcement of Pharmacists and Pharmacies.	NOE	
2017098246	University of California Hopland Research Center Culvert Replacement (Lake or Streambed Alteration Agreement No. 1600-2017-0315-R1) Fish & Wildlife #1E --Mendocino The project is limited to one encroachment. The project will replace a failing, 48-inch diameter culvert, sized for a 100-year flow event. The channel will be dry during project work. Rock armoring will be limited to the protection of the base of a cottonwood on the inlet side of the culvert. Some cutting and movement of recent large wood deposited adjacent to the outflow will be necessary to place the culvert, but large wood will be left instream to the extent possible.	NOE

	10 ft wide within the site for a total length of 192 ft before terminating at an existing asphalt/concrete parking area front along Leisure Town Rd.		
2017092037	Orchard & Vine Winery and Farm Market, 550 Walnut Boulevard, Brentwood; County File #LP16-2047 Contra Costa County Brentwood--Contra Costa The proposed Orchard & Vine project consists of a winery and a farm market on a nine acre project site located at 550 Walnut Blvd in the unincorporated Byron area of Contra Costa County, between Walnut Blvd to the west and Kellogg Creek to the east. The project site is essentially flat and regularly tilled for agricultural plantings, including a cherry orchard, olive orchard, pumpkin patch, and a pomegranate hedge along the Walnut Blvd frontage.	MND	10/16/2017
2017092038	Baylands Boardwalk Improvement Project Palo Alto, City of Palo Alto--Santa Clara The project proposes the replacement of the existing Palo Alto Baylands boardwalk with a new, improved boardwalk along the same alignment of the existing boardwalk. The existing timber boardwalk extends approx 850 ft northeast across the Harriet Mundy Marsh towards the SF Bay from the Interpretive Center and the San Francisquito Creek Trail. The new boardwalk would be five ft in width intermittent viewing platforms and its elevation would be 3.6 to 4.3 ft higher than the existing structure to accommodate projected sea-level rise.	MND	10/16/2017
2017092040	Chang Property Development San Ramon, City of San Ramon--Contra Costa The applicant is proposing to develop a 43-lot single family subdivision and 18 secondary dwelling units, along with the provision of street improvements, landscaping, utilities, a tot lot to serve project residents, and other ancillary improvements on a 16-acre portion of the project site; dedicate and construct a neighborhood parking 2-acre of land; and preserve the remainder of the 195-acre site as natural open space. The proposed project is pursuant to the Northwest Specific Plan, adopted by the city in 2006. The NWSP guides development and conservation in a 354-acre area in and adjacent to the city limit and envisions a residential neighborhood, neighborhood park and open space on the proposed project site.	MND	10/16/2017
2017092039	San Mateo County Government Center Development Project San Mateo County Redwood City--San Mateo Project is development of a new County office building (5 to 7 levels; 121,000 to 156,000 sq. ft.) and parking structure (850 to 1,200 stalls) on the 8-block County Government Center Campus in downtown Redwood City. Purpose of the project is to consolidate dispersed, related County functions into a single location to improve operational efficiency and service delivery, and provide financial benefits. Project involves relocation of the historic Lathrop House 200 feet south on Hamilton Street, demolition of two vacant buildings (First American Title Company and Lebsack), and demolition of the existing traffic court building and relocation of that function to the Hall of Justice. 2017092041	Oakland Alameda Access Project Caltrans #4 Oakland, Alameda--Alameda Note: Extended Review The Alameda County Transportation Commission (Alameda CTC) and Caltrans are working in partnership with the cities of Oakland and Alameda to identify freeway access and arterial roadway improvements between I-880, I-980 and local Oakland streets; including access to and from the Posey/Webster Tubes which connect the cities of Oakland and Alameda. The improvements are intended to increase mobility and reduce traffic congestion, reduce freeway-bound regional traffic on local roadways, and improve connectivity for bicycle and pedestrian traffic.	NOP	10/31/2017
2015071047	Eastern Coachella Valley Stormwater Master Plan Coachella Valley Water District --Riverside Note: Response to comment The proposed Project is the administration, right-of-way acquisition (to the extent necessary) and construction of storm drains, channels, levees (collectively referred to as Facilities), and the operation and maintenance of Facilities identified in the ECV SMP. The Plan is a comprehensive conceptual stormwater master plan that identifies conceptual locations, alignments, and sizes for primary drainage Facilities to address the current and future drainage needs of the approximately 207 square mile Plan Area. The ECV SMP is intended to be used as a planning guide for locating and sizing regional stormwater facilities (SMP Facilities) that will be constructed by Coachella Valley Water District (CVWD), City of Coachella, and/or developers over time as development takes place within the area. When implemented, the Plan will provide flood protection to the area during a 100-year flood event.	Oth	
2003031069	Del Mar Fairgrounds 2008 Master Plan Revised Draft Environmental Impact Report (REVISED DEIR) 22nd District Agricultural Association Del Mar, San Diego--San Diego On April 18, 2011, the 22nd District Agricultural Association (DAA) determined that the No Hotel Alternative was the environmental superior alternative, certified the FEIR, and approved the 2008 Master Plan, No Hotel Alternative (Alternative 3) ("The Project"). However, the Final EIR was challenged in court and, on Jan. 4, 2013, the Court issued a writ of mandate directing the 22nd DAA to set aside and vacate certification of the Final EIR and its approval of the project. The Court directed the 22nd DAA to undertake new environmental review regarding: 1. Traffic generation and mitigation. 2. Lack of water supply physical baseline. 3. Lack of greenhouse gas emissions baseline. The court's order provides that the new material will supersede the sections of the EIR found to be inadequate and the 22nd DAA will circulate the new material and the original Final EIR and indicate what sections have been superseded (see the Prologue for these sections). The Court's writ of mandate requires the 22nd DAA to undertake new environmental review consistent with the Court's statement of decision. The 22nd DAA to undertake new environmental review consistent with	NOD

	the Court's statement of decision. The 22nd DAA complied with this requirement by preparing the REVISED DRAFT EIR.		
2008012065	Martinez Marina Waterside Improvements Martinez, City of Martinez--Contra Costa This proposed project involves hydraulic dredging a small portion of the Martinez Marina to depths ranging from approximately -6 feet to -8 mean lower low water (MLLW), with an additional 2 feet over dredge allowance. The estimated maximum volume of dredge material is 24,100 cubic yards over a surface area of approximately 2.84 acres. Sediment would be removed with a cutterhead hydraulic suction dredge and conveyed via an 8- to 12-inch diameter pipe to the City of Martinez upland disposal ponds located southeast of the marina. The Project would result in permanent impacts to 0.08 acres of delta smelt (<i>Hypomesus transpacificus</i>) habitat. The project is expected to result in incidental take of delta smelt and longfin smelt (<i>Spirinchus thaleichthys</i>), which are designated as an endangered and threatened species, respectively, under the California Endangered Species Act. The ITP referenced above as issued by DFG authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.	NOD	
2012041012	Redlands Passenger Rail Project San Bernardino Associated Governments San Bernardino, Redlands--San Bernardino The Redlands Passenger Rail Project is an approx. nine mile corridor extending east from the City of San Bernardino to the City of Redlands and includes local and express train service. SBCTA certified a Final EIR for the project in March of 2015. The Final EIR considered constructing a double track ready alignment throughout the railroad corridor, turning Metrolink train at the University of the Redlands, and plausible constructing staging areas SBCTA is proposing to optimize the track alignment for a single track configuration, turning Metrolink trains in downtown Redlands, and additional construction staging areas to facilitate constructability.	NOD	
2012041012	Redlands Passenger Rail Project San Bernardino Associated Governments San Bernardino, Redlands--San Bernardino The Redlands Passenger Rail Project is an approx. nine mile corridor extending east from the City of San Bernardino to the City of Redlands and includes local and express train service. SBCTA certified a Final EIR for the project in March of 2015. The Final EIR considered drainage improvements throughout the corridor; including off-site connections. SBCTA is proposing a new side-drain connection at Twin Creek that would accept drainage from an existing culvert at mile post 2.63 that would be replaced as part of the approved project.	NOD	
2013081076	ENV 13-0007 (Recycled Water Easterly Main Extension Project) Escondido, City of Escondido--San Diego Project consists of approx. 2.3 miles of 15 inch brine return pipeline from Broadway (near Grape Day Park) to the HARRF for discharge of brine recovered from a reverse osmosis water treating facility. 2016032012	<p>Demonstration Recharge Extraction & Aquifer Management Project + NSJWCD South System Improvements San Joaquin County Lodi--San Joaquin</p> <p>The SREAM Project is a collaboration between San Joaquin county (County), the North San Joaquin Water Conservation District (NSJWCD), and East Bay Municipal District (EBMUD). The DREAM Project consists of a one-time, short-term pilot conjunctive use groundwater replenishment project of limited scale involving 1,000 acre-feet of surface water supply provided by EBMUD. The NSJWCD South System surface water distribution facility will be rehabilitated and used to convey the surface water to farmlands currently pumping groundwater. In exchange for providing the surface water supply, EBMUD would receive up to 500 AF of groundwater extracted from an existing well for export to EBMUD customers. A new 2.8-mile pipeline would also be constructed from the extraction well south to EBMUD's existing Mokelumne Aqueducts where the water will be pressurized and injected into the aqueduct system. Improvements to the NSJWCD intake and distribution system are planned for 2018 through 2019 and the design and construction of the new pipeline and aqueduct tie-in to convey the extracted groundwater to the Mokelumne Aqueducts are planned for 2018 through 2020. Construction will occur east of the City of Lodi, west of the unincorporated community of Lockeford and south of the Mokelumne River in San Joaquin county.</p>	NOD
