

Arnold Schwarzenegger, Governor

STATE CLEARINGHOUSE

NEWSLETTER

September 16-30, 2010

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **September 16-30, 2010**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2009 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

Acting Director

MEMORANDUM

DATE: July 1, 2010
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, State Clearinghouse Director
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the cost savings to local and state agencies, we extended this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse will accept environmental documents on CD-ROM under the following terms:

- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 *printed* copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The State Clearinghouse has created a Summary for Electronic Submittal Form that may be used as a summary for any project submitted on CD-ROM. The Summary for Electronic Submittal Form is available at www.opr.ca.gov. A printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- The document must be on a CD-ROM in a common file format such as Microsoft Word or Acrobat PDF.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- One Notice of Completion Form must be provided with all document submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, State Clearinghouse Director
916-445-0613
scott.morgan@opr.ca.gov .

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2009**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

2010094008	<p>Mission Springs Water District (MSWD) Assessment District (AD) 12 Sewer Improvement Project, City of Desert Hot Springs U.S. Army Corps of Engineers Desert Hot Springs--Riverside</p> <p>Over the past several years the MSWD has been actively involved in the improvement of sanitary sewer infrastructure. The proposed action is situated over a large portion of the City of Desert Hot Springs. The proposed action involves construction of ~ 57 miles of wastewater (sewer) pipelines that would facilitate the removal of ~ 4,000 individual septic tanks to meet the current and future long term water supply and protect groundwater quality. The proposed action construction consists of design and construction of underground (u/g) 8-inch, 10-inch, and 12-inch diameter Vitrified Clay Pipe (VCP) sewer mains including manholes, cleanouts, appurtenances and appurtenant infrastructure, and u/g 4-inch and 6-inch VCP sewer lateral pipelines. The proposed action is expected to take four (4) and one-half (1/2) years to complete.</p>	EA	10/15/2010
2009102035	<p>Bottle Rock Power Steam Project Lake County --Lake</p> <p>The proposed BRP Steam Project would expand the existing geothermal steamfield of the Bottle Rock Power Plant in order to supply additional steam and increase the amount of power generated from approximately 18 MW to 55 MW. The power plant is currently supplied by wells drilled on Francisco, Coleman and West Coleman Pads within the Francisco leasehold. The proposed project would increase the steam supply or the power plant by constructing two new well pads on the adjacent BRP GeoResource Lease. The proposed well pads are referred to throughout this document as the "East Pad" and "West Pad".</p>	EIR	11/01/2010
2010022005	<p>Downtown Dublin Specific Plan Dublin, City of Dublin--Alameda</p> <p>NOTE: Review per lead</p> <p>The Downtown Dublin Specific Plan (DDSP) consists of a comprehensive set of incentives, standards, and requirements that will implement the vision for the future development in downtown Dublin. The DDSP will define the physical envelope for downtown Dublin's future growth using height limits, setbacks, density, and design standards. The DDSP will act as the planning tool to guide and direct new development, economic development, transportation improvements (including pedestrian improvements), transit-oriented development, parking, pedestrian amenities, and public open space (e.g. public plazas). The DDSP will be instrumental in promoting a more walkable, livable downtown Dublin, as well as providing incentives for development and supporting retail in keeping with the City's vision.</p>	EIR	11/04/2010
2010062013	<p>350 Mission Street San Francisco, City and County of San Francisco--San Francisco</p> <p>The project sponsor, GLL US Office, L.P., proposes to demolish the existing four-story building at 350 Mission Street and construct a 24-story, ~375 foot tall (plus mechanical space) tower containing ~356,000 sf of office space, 6,600 sf of</p>	EIR	11/01/2010

	restaurant and retail space, and 6,960 sf of public open space. Retail and restaurant spaces would include a retail store and a coffee bar/café on the ground floor and a restaurant and conference space on the mezzanine. A 40 foot wide driveway on Fremont Street would provide access to two loading and two service parking spaces on the ground floor and 61 parking spaces and 64 bike parking spaces in three subgrade levels. The building would be constructed to standards required for LEED (Leadership in Energy Efficient Design) Gold rating.		
2000061039	Interstate 405 at Arbor Vitae Street New South Half Interchange Project Caltrans #7 Inglewood, Los Angeles, City of--Los Angeles The California Department of Transportation (Caltrans) has prepared a Draft Initial Study / Environmental Assessment (IS / EA) and Section 4(f) evaluation for construction of a proposed interchange on Interstate 405 (I-405) at Arbor Vitae Street in the City of Inglewood, Los Angeles County. The project limits extend roughly from Century Boulevard to Manchester Boulevard in the City of Inglewood. The proposed interchange would include constructing two (2) on and two (2) off ramps on the east side of I-405 at Arbor Vitae Street. This proposed project involves additional right-of-way.	FIN	
1999121073	Molycorp Mountain Pass LLC Project San Bernardino County Mountain Pass--San Bernardino Minor Use Permit (MUP) for relocation of the crusher plant and stockpiles; the addition of a combined heat and power (CHP) plant and salt recovery facilities; the construction of updated mineral recovery facilities, central shop addition, a warehouse, truck shop, and a paved access road; with a major variance to exceed the 35 ft. maximum height allowed (by 40 ft. on 15 structures).	MND	10/15/2010
2005081098	Butcher Ranch-Tentative Tract Map No. 52214 Rolling Hills Estates, City of Rolling Hills Estates--Los Angeles The proposed project consists of a Tentative Tract Map to subdivide the 8.55 acre site into 14 lots (Lots 1-13 and Lot A) and the vacation of the Casaba Road right of way on the project site. Eleven (11) of the lots (Lots 2-12) would be developed with single family residential units, with opportunities for private equestrian facilities (i.e., horse arenas). The residential lots would have a minimum lot size of 20,000 ft and the proposed residential units would range in size from 3,500 - 4,700 ft. Lot 1 would be improved with an 11,187ft mini park for passive use to be dedicated to the City. Lot 13 would comprise 25,526 ft along the north side of Casaba Road at Monticello Drive, would remain vacant, and would remain zoned for Commercial Recreation (C-R) Lot A would include the site's private access drive (Casaba Road) and a landscape buffer (to be maintained by the homeowners association) that would separate Casaba Road from PV Drive North.	MND	10/15/2010
2010091040	Reza Monajjemi (PSP 08-103) Tulare County Porterville--Tulare To allow development of an 11-unit mobile home park on a 1.43 acre site.	MND	10/15/2010

2010091042	Kenyon 4 Lot Subdivision, 3200 20857 (TPM) & 3500 10-014 (STP), ER 04-15-002 San Diego County --San Diego The project proposes a tentative parcel map and site plan in order to subdivide 20.01 acres into 4 lots.	MND	10/15/2010
2010091043	Maple Lane Drainage and Sidewalk Improvements San Bernardino County Big Bear Lake--San Bernardino NOTES: Review Per Lead Drainage and roadway improvements to: 1) remediate erosion-related undermining of the east side of Maple Lane and incisement of the east side drainage channel; 2) alleviate nuisance flooding on the west side of Maple Lane from upstream flows generated off-site; and 3) provide safer pedestrian passage along Maple Lane, from Big Bear Boulevard to Big Bear High School. The Project would include the construction of approximately 2,000 linear feet of drainage improvements, affecting approximately 1,740 linear feet of an ephemeral drainage channel, and 2,680 linear feet of sidewalk, with minor roadway improvements, for a total area of impact of approximately 3.4 acres.	MND	10/20/2010
2010092054	Phillips New Fixed Pier, Gangway, and Two Boat Lifts at 21 West Shore Road Belvedere, City of Belvedere--Marin The applicant proposes to remove the existing gangway and floating dock, construct a new fixed wood pier and walkway at a maximum height of 10 MLLW, rebuild the existing gangway landing, and install two new boat lifts. The total existing amount of fill from the piles, floating dock, gangway, and gangway landing is a calculated area of 249.42 sf. The project proposes fill from one existing pile which could be removed or remain, a new wood pier, new walkway, and rebuilt walkway landing for a calculated area of 265.64 sf. The project also proposes fill and/or indirect shading from the two new boat lifts, three boat lifts supports, and watercraft for an additional shaded area of 75.25 sf.	MND	10/15/2010
2010092057	Northgate Maintenance Station Caltrans #2 Sacramento--Sacramento The California Department of Transportation (Caltrans), in conjunction with Federal Highway Administration (FHWA), proposes a project to demolish and reconstruct the Crew Building at the Northern Maintenance Station off Interstate 80 in Sacramento County (Maps 1 and 2). This Federal and State funded project is located at the Northgate Boulevard and I-80 interchange on Rosin Court in Sacramento County (I-80 PM 5.2). No new right of way will be required for this project. This project proposes to remove the existing prefabricated crew building and build a permanent crew building for three crews. There will be foundation work and relocation of building service connections.	MND	10/15/2010
2010091041	Al Larson Boat Shop Improvement Project Los Angeles, Port of --Los Angeles The proposed Project involves redeveloping the existing Al Larson Boat Shop (ALBS) to modernize the facility and to improve its ability to build and repair ships and vessels. Improvements would include maintenance dredging to ensure adequate vessel access to the site, beneficially reuse dredged material by	NOP	10/15/2010

	constructing two confirmed disposal facilities (CDF) which would not result in ~1 acre of new land for increased vessel maintenance and repair, demolition of some existing buildings, and construction of new office building, construction of new wharves, and installing a new travel-lift boat hoist. In addition, the proposed Project would improve the site's runoff (hydrology and water quality) and remediate historical sediment and soil contamination.		
2010091044	Sylmar Ground Return System Replacement Project Los Angeles, City of Los Angeles, City of--Los Angeles The Project would replace the existing Sylmar Ground Return System from the Sylmar Converter Station to the Pacific Ocean.	NOP	10/15/2010
	New features would include: Up to 23 miles of overhead electric transmission lines; Up to 8 miles of underground electric transmission lines, including 31 vaults in existing streets; Up to 1.1 miles of submarine cables; and A new electrode array system including full or partial replacement of the 24 submarine vaults and electrode equipment.		
2010092023	Road and Trail Change-in-Use Program Parks and Recreation, Department of -- NOTE: Revised NOP & Review per lead	NOP	11/30/2010
	The California Department of Parks and Recreation (California State Parks) proposes to implement the Road and Trail Change-in-Use Evaluation Process (Program) to facilitate the review of proposals to add or change uses of existing recreational roads and trails in the State Park System. The Program is intended to facilitate consideration of changes in non-motorized uses of existing State Park roads and trails to best accommodate accessibility and recreational activities that are appropriate for each road or trail facility. The Program seeks to provide California State Parks with an objective process and evaluation tool to assess proposals to modify roads and trails to add or remove recreational uses.		
2010092056	Lost Creek Dam Improvements Project South Feather Water and Power Agency --Butte, Yuba The Lost Creek Dam Improvement Project (LCDIP) would modify Lost Creek Dam, a component of the South Feather Power Project, FERC Project No. 2088-CA, to meet Probable Maximum Flood design and safety requirements established by FERC and the California Division of Safety of Dams. Modifications would include lowering the spill crest, raising the dam crest, and reinforcing/adding concrete to the downstream face of the dam to resist loads. The LCDIP would remove the roadway and bridge structure over the dam, construct a concrete batch plant nearby in Yuba County, establish a construction staging area, improve approximately 3-5 miles of roadway (between the proposed batch plant site, construction staging areas, and the dam), and entail approximately 1,000 truck roundtrips over two construction seasons (~ 8 months each). 2010092055	Small Wind Energy Zoning Ordinance, County-Initiated Zoning Code Text Amendment No. P10-00243-ORD Napa County Napa, St. Helena, Calistoga, Yountville, American Canyon--Napa NOTE: Review per lead Board of Supervisors adoption of an ordinance, as provided for under California Assembly Bill 45 (Blakeslee, Distributed generation: Small Wind Energy Systems (2009)), permitting the installation of small wind energy systems in the unincorporated areas of Napa County that are outside urbanized areas, on parcels greater than 2 acres in size in the AP, AW, and I zoning districts. The ordinance establishes a process for the issuance of administrative and conditional use permits for these systems, subject to specified conditions regarding aspects of the system's location and operation so as to be protective of Napa County's unique and diverse environmental resources. By providing for the safe and effective use of small wind energy systems to reduce the consumption of centralized utility-supplied electricity, the ordinance fosters the local production of renewable energy. NOE	
2010098204	Arcade Creek Watershed Management Project - Maintenance/Removal of Invasive Plant Species SAA #1600-2008-0328-R3 Fish & Game #2 Sacramento--Sacramento Removal of nonnative invasive plant species (e.g., red sesbania, giant reed, black locust, tree-of-heaven). Removal methods include manual removal (e.g., chain saws, weed wrenches, light-enhibiting material), mechanical removal (e.g., string trimmer), and chemical removal (e.g., herbicide). Herbicide application may include foliar spray, cut-stump and paint, and/or stem injection with appropriate formualtions (e.g., aquatic) of glyphosate, imazapyr, and/or triclopyr. Maintenance and removal of nonnative invasive plant species will improve wildlife and fish habitat, reduce localized flooding, and reduce vegetation fire fuel loads.	NOE	
2010098205	Montana Ditch Dredging Project Fish & Game #2 Yuba City--Sutter This project consists of dredging and cleaning the bottom of a 300 foot ditch connecting the East Channel of the Sutter Bypass with the Permittee's irrigation pump in order to facilitate summer irrigation and flow of water in the ditch. Approximately 500-1000 cubic yards will be removed from the ditch each time the work occurs. Work will be done by an excavator sitting on the south bank of the ditch and dredged material will be spread evenly and uniformly along the south bank. No trees or vegetation will be removed from the banks. Work will occur	NOE

2007062006	Rio Dell Wastewater Reuse Project Rio Dell, City of Rio Dell--Humboldt NOTE: Addendum - 15 day review per lead	ADM	10/05/2010
------------	---	------------	------------

The September 2010 Addendum No. 2 was prepared to analyze changes to Alternative 1 in the Rio Dell Wastewater Reuse Project Final EIR (2008 Certified EIR), which was certified by the City of Rio Dell (City) in May 2008. At that time the City also adopted Alternative 5. The City would at this time prefer moving forward with Alternative 1, which consists of wastewater treatment facility (WWTF) and reuse system Options WWTF1 and REUSE1A. Option WWTF1 is to build a new WWTF in Rio Dell at the existing WWTF site (Rio Dell Corp Yard). Option REUSE1A consists of irrigation of selected Mozzetti agricultural land just north of Rio Dell in Metropolitan and 12,000 to 15,000 feet of transmission pipeline from the WWTF to the irrigation site. Refer to Appendix A of Addendum No. 2 for Figures including a depiction of the Rio Dell Wastewater Reuse Project Addendum No. 2 (Figure 1), Transmission Pipeline (Figure 2), and Potential Irrigation System Layout (Figure 3). The 2008 Certified EIR evaluated various alternatives to make improvements to the operation of the City's wastewater treatment and biosolids disposal systems through repairs and/or replacement of existing facilities and systems and to modify effluent disposal to meet the requirements of Cease and Desist Order No. R1-2005-0034. Circumstances that might require a subsequent or supplemental EIR have not occurred; therefore, an Addendum provides the appropriate level of CEQA analysis and the appropriate method of amending the 2008 Certified EIR, pursuant to Sections §15162 and §15164 of the Guidelines implementing CEQA. A summary of the proposed changes to Alternative 1 from the 2008 Certified EIR, which are evaluated in the September 2010 Addendum No. 2, are presented below.

" Reuse System Changes

" Change irrigation from Type I to Type II under reuse option REUSE1A

o This is a change from Type I irrigation of 113 acres of Metropolitan agricultural lands at agronomic rates, which was evaluated in the 2008 Certified EIR, to Type II flood irrigation of 10 acres of selected Mozzetti agricultural lands in Metropolitan to the west of Highway 101 (Lower Mozzetti) as evaluated in September 2010 Addendum No. 2;

o The change from Type I to Type II irrigation results in no need for a treated effluent storage pond to equalize flows; and

o A "Less than Significant Impact" determination in regard to potential impacts to beneficial uses of the groundwater resource due to Type II irrigation is supported by the July 2010 Groundwater Anti Degradation Analysis (included as Appendix B of Addendum No. 2) approved by the North Coast Regional Water Quality Control Board (Regional Board) August 10, 2010 (approval letter included as Appendix C of Addendum No. 2).

" Addition of an alternate transmission pipeline: Transmission Pipeline Route 2

o The City is currently considering two potential pipeline routes, both of which are shown on Figure 2 included in Appendix A of Addendum No. 2. Route 1 (evaluated in the 2008 Certified EIR) and Route 2 mostly overlap, and the only two differing portions of Route 2 can be seen in Figure 2 of Addendum No. 2. The differing portions of Route 2 generally occur within the Caltrans right-of-ways.

2007091072	CIP 8164/8168: Gravity Main Ductile Iron Pipe Rehabilitation Vista, City of Vista--San Diego Note: Addendum to EIR The project entails the rehabilitation of existing pipeline using the Cured-in-Place Pipe (CIPP) method, which involves lining the pipe from within rather than wholly replacing the pipe.	ADM	10/04/2010
2010-9	Karuk Tribe - APNs: 033-610-120, 150, 070, 100 & 026-550-150 Bureau of Indian Affairs --Siskiyou The following property is commonly referred to as the "Upper Katamin" The United States currently holds multiple parcels of land, totaling ~ 838.28 acres, in trust for the Karuk Tribe. This land is scattered throughout the Orleans area in Humboldt County, and the Happy Camp and Yreka areas in Siskiyou County. The properties to be transferred into trust pursuant to this application will be used for various purposes. The Karuk Tribe plans to maintain and continue use of these properties in gathering its people for traditional ceremonial and burial purposes, and for use of traditional trails located on the properties. The Upper Katamin and Ishi Pishi properties will continue to serve as the location for the traditional Pic-ya-wish and Brush Dances. The Elliott Creek property will be maintained as a burial ground for those of Karuk ancestry.	BIA	10/19/2010
1997032082	Proposed Changes in Mammoth Creek Bypass Flow Requirements Mammoth County Water District Mammoth Lakes--Mono The District is proposing a project which has three primary components 1. Maintain on a long-term basis the fishery bypass flow requirements and compliance measurement point which have been in effect through a court order since 1997. The Old Mammoth Road (OMR) Gage would continue to be used for compliance measurement. The proposed project also proposes one new additional fishery bypass flow requirement of 4 cfs, measured at LADWP's Highway 395 (Old 395) Gage. The purpose of this component is to ensure the continued protection and maintenance of the fishery resources in Mammoth Creek, in compliance with State law. 2. Update the District's Place of Use (POU) for its surface water supplies. The purpose of this component is to allow continued long-term future water service to these entities. 3. Change certain Mammoth Lakes watershed operation constraints (WOCs) which are included in District water right Permit 17332. The purpose of these changes is to eliminate WOCs that are no longer applicable under current operating conditions, or are not consistent with regulatory and/or technical requirements.	EIR	11/03/2010
2003051002	Michael Brasil Dairy Expansion Project Merced County --Merced This project proposes CUP 07-004 to allow the expansion of the permitted dairy herd to 2,400 animals (2,000 milk cows and 400 support stock). This would represent an increase of 1,390 animals from that originally permitted under CUP	EIR	11/04/2010

2008101138	<p>03-001 and 1,015 animals from existing numbers. The proposed project would include construction of a new freestall barn. Construction of the proposed dairy barn would occur north of existing facilities and would convert approximately 7 acres of existing cropland to active dairy facilities. With the proposed expansion, the dairy operator would use adjacent fields to receive wastewater; therefore, the acreage of cropland receiving wastewater would increase from 130 acres (existing) to 278 acres (proposed).</p> <p>Morro Bay-Cayucos Wastewater Treatment Plant Upgrade Morro Bay, City of Morro Bay--San Luis Obispo</p> <p>The proposed project would provide full secondary treatment for all effluent discharged through the WWTP ocean outfall and provide tertiary filtration capacity equivalent to the peak season dry weather flow (PSDWF) of 1.5 million gallons per day (mgd). The tertiary filtered effluent would meet Title 22 standards for disinfected secondary-23 recycled water and as such could be used for limited beneficial uses. The proposed project would accommodate future improvements to produce disinfected tertiary recycled water for unrestricted use in accordance with Title 22 standards. The City of Morro Bat and Cayucos Sanitary District (collectively "MBCSD") anticipated reclaimed water end uses would include, but not be limited to, treatment process applications onsite at the WWTP, landscape irrigation around the perimeter of the WWTP, and offsite municipal and industrial (M&I) applications such as dust control, soil compaction, street cleaning, municipal landscape irrigation, and agricultural. Once the new treatment plant is constructed and brought online, the existing treatment plant would be demolished. The existing onsite composting program at the WWTP would be discontinued.</p>	EIR	11/03/2010
2009011031	<p>Plan Santa Barbara General Plan Update (Policy Amendments including General Plan Framework, Land Use Element, Housing Element) and Associated Rezone Santa Barbara, City of Santa Barbara--Santa Barbara NOTES: FINAL</p> <p>The Plan Santa Barbara General Plan Update is a set of Draft Policy amendments to provide the basis and directives for updating the City General Plan in phases. These initial General Plan update documents include the overall General Plan Framework and Policy Updates, Land Use Element and Map Update, Housing Element Update, and an Adaptive Management component. The draft policies pertain to growth management, sustainability and living within our resources, circulation, historic resources, and community design, housing, environmental resource protection, public services and safety, and economy and fiscal health.</p>	EIR	
2009112023	<p>Fulton Avenue SPA Sacramento County --Sacramento</p> <p>According to the draft SPA Plan, the project proposal has been developed both in response to the changing needs of the community and the fact that the auto industry has experienced a slow decline in sales. The Fulton Avenue SPA is intended to accelerate the competitiveness of the Fulton Avenue corridor by providing additional land uses by right and allowing flexibility in the development and design review standards for all properties. The draft Plan proposes additional flexibility for properties currently zoned Auto Commercial (AC) in order to increase retail development options. In addition, the other office and commercially zoned properties in the Plan area (BP, LC and SC) will all have increased flexibility in</p>	EIR	11/03/2010

	uses and development standards. The flexibility in the development standards will allow height, setback and parking standards to differ than those currently permitted.		
2010051020	<p>General Plan Amendment 08-02, Specific Plan Amendment 08-04, Tentative Tract Map 70583 Development Agreement San Dimas, City of San Dimas--Los Angeles</p> <p>Currently, the project site is essentially undeveloped and vacant, and is located in hilly terrain that is cut by numerous canyons and drainages. The proposed project would subdivide approximately 270-acres into 61 single-family residential lots (or "numbered lots); seven common area lots (or "lettered lots"), including private roadways; one remainder parcel that is anticipated to remain open space and/or habitat conservation land that would be offered for dedication to the City of San Dimas or a conservancy, and related infrastructure (including entry gates, utilities, water quality control basins and a water storage facilities); and an easement for an approximately 2.83-acre portion of property to the south for the purpose of access, drainage, grading, utilities, landscaping and maintenance. The project also includes approximately 0.18 acres to the east of the center of the project site for use as a fire protection turn-around; this area is located on Los Angeles County Department of Parks and Recreation land. The project site, including the Tentative Map and the 2.83-acre easement area, consists of a total acreage of approximately 273 acres. Total disturbance on the project site resulting from the project would be approximately 90 acres (including the 0.18 acre fire turn-around), of which 10 acres would be short-term, non-permanent disturbance occurring during construction.</p>	EIR	11/03/2010

2010091047	Judd/Zion Minor Use Permit/DRC2009-00056 San Luis Obispo County Paso Robles--San Luis Obispo A Request by Zion Properties for a Minor Use Permit to allow Temporary Events on an existing developed site. The applicant is requesting to hold the temporary events within an existing 2,560sf horse barn and immediately adjacent outside area in which a 1,600sf portable tent would be erected during events. The proposed Temporary Event Program would include 20 special events as follows: 20 special events with no more than 150 guests The project will not result in any additional disturbance on the 40 acre parcel.	MND	10/19/2010
2010091048	Dictionary Hill/Maria Avenue Rezone San Diego County --San Diego The project is a rezone to change setback requirements on nine existing lots and a site plan to construct an 8' high non-combustible wall along the southern project boundary. The front-yard setback would be reduced from 60' to 50' and the interior side-yard setbacks would be reduced from 15' to 5'.	MND	10/19/2010
2010091049	Emerald Hill Minor Subdivision San Diego County --San Diego Review Per Lead The project is a residential minor subdivision 19.91 acres into 4 acres plus a remainder, ranging in size from 2.47 to 8.13 acres. The project site is located on the 600 block of Emerald Hill Road in the Bonsall Community Planning Area, within the unincorporated San Diego County. The site is subject to the General Plan Regional Category (EDA) Estate Development Area, Land Use Designation (17) Estate Residential. Zoning for the site is RR.5; Rural Residential. The site currently has one single family residence, which is to remain, and one mobile home, which is to be removed. Access would be provided by a private road/driveway connecting to North River Road. A secondary access road connecting to a frontage road off of SR-76 will be constructed as a part of the project. The project would be served by on-site septic systems and imported water from the Rainbow Municipal Water District. Earthwork will consist of cut of 7,850 cubic yards of material and fill of 13,350 cubic yards of material.	MND	11/01/2010

2005062010	<p>Fallon Village Project Dublin, City of Dublin--Alameda NOTE: Reference SCH #s 2001052114 & 1991103064</p> <p>The proposed project is part of the larger project known as Fallon Village. In 2002, a number of owners in Eastern Dublin filed applications for annexation of portions of the current project site to the City and to the Dublin San Ramon Services District (DSRSD). At that time, the City prepared and certified a SEIR (SCH #2001052114, Resolution 40-02) for that project. The SEIR was a supplement to the 1993 Eastern Dublin EIR certified by the City Council on May 10, 1993 (SCH #1991103064, Resolution 51-930).</p> <p>The Fallon Village project proposed in 2005 (for PA 04-040) included a specific proposal for the Braddock and Logan properties (PA 05-038), now referenced as Positano. Based on the results of an Initial Study, the City prepared a Draft SEIR to the 1993 and 2002 EIRs which was circulated for public review from August 23, 2005 through October 6, 2005 (SCH #2005062010). A Final SEIR dated October 2005 containing written responses to all comments received on the Draft SEIR and was reviewed and certified by the City Council on December 6, 2005 by Resolution No. 222-05. Significant unavoidable impacts were identified in these EIRs that required the City Council to adopt Statements of Overriding Considerations with the approval of each EIR.</p>	NOD	
2005101047	<p>Pipeline Maintenance Program EIR Santa Clara Valley Water District San Jose, Santa Clara, Morgan Hill, Hollister, Campbell--Santa Clara The Operator proposes to dechlorinate and dewater a 3 mile section of the East Pipeline, conduct pipeline maintenance, and disinfect the pipeline prior to reoperation.</p>	NOD	
2007122029	<p>CI Trail Project Portola Valley, City of Portola Valley--San Mateo The proposed project consists of reconstructing 5,500 ft of an existing 8 ft wide trail and adding new 2 ft gravel shoulders to the trail located along Alpine Road in Portola Valley. Approximately 2,000 ft of the trail would be relocated further away from Alpine Road. The portions of the existing trail that is relocated would be removed and revegetated. A 6 ft wide by 40 ft long wooden footbridge would be constructed to allow the relocated trail to cross a seasonal tributary. The project includes planting of ~51 new trees, 90 new shrubs, and 22,800 sf of restored ground plane. The project includes engineering protection in a 150 ft segment of the eroding bank along Trancos Creek. This construction will consist of a 3 to 5 ft high green cribwall, a 2:1 fill slope with riparian planting, and a 6 to 8 ft soldier pile</p>	NOD

	<p>wall and wooden guardrail between the path and the top of the bank of the creek. Approximately 18 trees will be removed for the bank slope protection. Construction would consist of demolition of the existing paving, pulverization and incorporation into paving base material for the reconstructed trail.</p>		
2008021086	<p>City of Victorville General Plan Update 2030 Victorville, City of Victorville, Apple Valley, Hesperia--San Bernardino Expansion of the City of Victorville and Victorville Water District's sphere of influence to allow for the planning of the expansion of the full range of services available from both the City and Victorville Water District (a subsidiary district of the City).</p>	NOD	
2008092095	<p>2010 Water System Engineer's Report Modesto, City of Modesto--Stanislaus The Engineer's Report identifies a Capital Improvement Program (CIP), for system-side implementation needed to deliver safe and reliable water, which will effectively meet water demand requirements under both existing and future developed conditions. The Programs, as analyzed through this environmental review process, is the collection of CIP projects and programs proposed in the Engineer's Report. Specifically, the following 3 primary improvement types, based on improvement frequency, are identified in the Engineer's Report as being needed to meet: Major Project Improvements - These projects will occur once and are associated with large joint ventures with other agencies or cities (e.g., City-Side Downstream Improvements related to the Regional Surface Water Supply Project (RSWSP)). Project Improvements: These projects will occur once or very infrequently (e.g., construction of a Corporation Yard). Program Improvements: These program related projects will occur more periodically and over time (e.g., updating the Water Master Plan). Most Major Project, Project, and Program Improvements proposed in the Engineer's Report primarily relate to storage tanks, groundwater wells, and pipelines, but also include recommendations for future planning efforts, such as updates to the City's groundwater, urban water, or water supply management plans.</p>	NOD	
2008111017	<p>Burbank Recycled Water System Expansion Project Burbank, City of Burbank--Los Angeles The Project will enable the City to better utilize its recycled water source and conserve the limited potable water supply, provide additional recycled water to customers within the City's service area, and connect existing users to the recycled water distribution system. The Project consists of modifying the existing PS-1 pump station, installing a new booster pump station, and constructing new recycled water pipelines to connect the Burbank WRP to the Valhalla Memorial and other users.</p>	NOD

2009061051	Crane Valley Dam Seismic Retrofit Project Water Resources, Department of --Madera The project purpose is to increase dam safety to meet current standards for withstanding a Maximum Credible Earthquake (MCE) and passing the Probable Maximum Flood (PMF). The alternatives addressed in this EIR include Dam Strengthening with Rock Buttresses, Dam Strengthening with Cement Deep Soil Mixing, Dam Strengthening with Off-site Quarries, and No Project.	NOD	
2009081100	Potrero Valley Major Subdivision; TM 5484 San Diego County --San Diego The Potrero Valley Road project is a residential subdivision that would subdivide a 73.5 acre parcel into 8 residential lots in the Mountain Empire Subregional Plan area. The project site is located at 34843 Potrero Valley Road ~1,300 ft north of SR 94. The site is subject to the Regional Land Use Element Policy 1.4 Rural Development Area (RDA) with a land use designation of (18) Residential and S-92 (General Rural) zoning specifying a minimum lot size of 8 acres. The clustered project also includes an Administrative Permit for lot area averaging, reducing the minimum lot size to 5 acres in accordance with the Zoning and Groundwater Ordinances. The project design includes dedicated open space and easements, frontage improvements, a detention basin, signage and fencing. The existing single family residence and accessory structures will be retained. Access would be provided by a private road and cul-de-sac, connecting to Potrero Valley Road. The project would be served with septic systems and wells.	NOD	
2010011051	Box Springs Feeder Repair Phase 3 Project Metropolitan Water District of Southern California Riverside--Riverside The Box Springs Feeder Repair Phase 3 Project is limited to the repair of damaged sections of the Box Spring Feeder, a pipeline which conveys raw water produced by the California State Water Project from the California Department of Water Resource's Santa Ana Valley Pipeline to the Applicant's Henry J. Mills Water Treatment Plant in Riverside. The Box Springs Feeder was constructed in 1975 and is 96 inches in diameter and ~2.26 miles in length. The project includes the repair of 12 pipe sections using 5 excavation sites; 3 of the excavation sites (Site Nos. 2, 3, and 4) are located within the Permittee's right-of-way within Sycamore Canyon Wilderness Park in Riverside.	NOD	
2010062041	Preliminary Engineering Studies for Overwater and Land Geotechnical Exploration Water Resources, Department of --Sacramento, San Joaquin, Yolo, Solano, Contra Costa The project is limited to ~80 overwater borings, approximately 220 paired geotechnical borings, cone penetrometer soundings, and ~30 small test pits to test soils to obtain geotechnical data. 50 overwater geotechnical borings will take place in the Sacramento River to obtain information for 5 proposed intake structures. Approximately 20 overwater borings are planned at 12 major water crossings. An additional 5 to 12 geotechnical borings are proposed to obtain information for docking facilities. The depths of the borings will range between 100 and 200 ft deep below the bottom of the river and the diameter of the borings will be 3.5 to 5.5 inches. Drilling will be conducted with a rotary drilling rig mounted on a shallow-draft barge or ship. Multiple barges/ships may be operated	NOD

2010082014	<p>Palermo-East Nicolaus 115-kV Transmission Line Reconstruction Project Public Utilities Commission Oroville, Marysville, Yuba City--Butte, Yuba, Sutter</p> <p>Note: Final</p>	MND
------------	--	------------

The Palermo-East Nicolaus 115-kV Transmission Line is an existing double-circuit tower line that carries two individual 115-kV circuits between the applicant's Palermo and East Nicolaus substations. Both circuits would be reconducted. To accommodate reconducting, replacement of the existing lattice steel towers would be required. The existing Milliken towers, originally constructed in the early 1900s, would not support the new conductor because of higher tension loads. The towers would be replaced with a combination of hybrid tubular steel poles, tubular steel poles, and lattice steel poles.

A capacity increase to the system would result from the replacement of existing copper conductor with 1113 All Aluminum conductors for each circuit from the Palermo Substation south to Rio Oso Junction and with either 1113 all-aluminum or 457 steel-supported aluminum cable conductor from Rio Oso of the lines and eliminate forecasted line overloads. In addition, a limited number of towers on a single-circuit line, the Palermo-Pease 115 kV Transmission Line, which runs parallel to the Palermo-East Nicolaus 115-kV Transmission Line, would be replaced for consistency with the spans on the Palermo East Nicolaus 115-kV

	existing length of approximately 6,750 feet (1.3 miles) will remain unchanged. The project site is a 144 acre parcel in the Agriculture land use category.		
2010042074	West Sacramento Bridge District Levee Access Road and River Walk Trail West Sacramento, City of West Sacramento--Yolo The West Sacramento Bridge District Levee Access Road and River Walk Trail Project would develop a levee maintenance and flood-fighting access road, spanning 3,250 linear ft (0.6 miles) on top of the levee crown, from the south side of the Tower Bridge to the future Mill Street, north of US Highway 50. The proposed access road and off-road amenities would also serve as a recreational trail by allowing controlled use by bicyclists, pedestrians, and other recreationists. The proposed project is part of the Bridge District Specific Plan.	NOD	
2010069022	Hillcrest Park Creek Repair Concord, City of Concord--Contra Costa The proposed Hillcrest Park Bank Stabilization Project would repair damage incurred during a December 2005, greater than 20 yr run-off event at Hillcrest Community Parks in Concord, CA. The proposed project will demolish and repair a severely damaged bridge abutment, stabilize failed channel banks and in doing so protect a bicycle/pedestrian bridge, adjacent park trails, and water and electric utilities lines located at the site. Biotechnical bank stabilization methods such as native willow planted rock slopes and largely woody debris (LWD) deflectors will be installed along channel banks to stabilize erosion areas and provide additional habitat complexity for aquatic species. The proposed actions will ensure continued public access and utilization of an important community park, transportation corridor, and protect channel banks from futher erosion.	NOD

	allow dry down of the upper pond to control bullfrog populations. 60,000 sf of upland habitat currently vegetated with hemlock will be replaced with coastal scrub and oak woodland. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement, Number 1600-2010-0227-R3, pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Resource Conservation District of Santa Cruz County.		
2005112035	Flower Farm Bed and Breakfast (PREA 2004 0723) Placer County Loomis--Placer NOTE: Addendum	NOD	
	The project proposes to add three additional detached "farm stay" cottages for the business.		
2008082034	Kings Beach Water Quality and Stream Environment Zone Improvement Project Placer County --Placer	NOD	
	The project proposes to construct, maintain, and improve stormwater facilities, implement erosion control practices, and restore stream environment zones for the Kings Beach Watershed and SEZ Improvement Project. Proposed improvements include controlling sources of pollutants, infiltrating stormwater runoff throughout the watershed, restoring local creeks and stream environment zones, separating flows from undeveloped and developed areas to avoid overloading treatment facilities, and improving drainage infrastructure.		
2008122067	Lake Forest Erosion Control Project - Area B Placer County --Placer	NOD	
	Proposed improvements include stabilization of cut and fill slopes, treatment of road shoulders, conveyance systems to reduce erosion potential and the installation of settling basins. Pre-treated stormwater will be conveyed through Lake Forest Meadow for additional treatment after improvements to the meadow have been completed.		
2008122108	Christmas Valley 2 Erosion Control Project El Dorado County --El Dorado	NOD	
	The project proposes to construct, maintain, and improve stormwater facilities and implement erosion control practices as identified in the Lake Tahoe Environmental Improvement Program.		
2010022063	Zone 2 Line K Levee Remedial Work, Hayward, Alameda County, California Alameda County Hayward--Alameda	NOD	
	The Alameda County Flood Control and Water Conservation District proposes to construct the necessary improvements along a portion of Zone 2, Line K (Sulfur Creek) to meet the Federal Emergency Management Agency (FEMA) levee certification requirements so that the south levee can be certified as providing 100 yr flood protection to the landside of the levee. Otherwise, the landside properties will be mapped as a special flood hazard zone by FEMA requiring purchase of flood insurance. The Project construction area is ~ 2,100 linear feet long by 20 to 130 feet wide. It includes ~1,000 linear feet of channel work (excavation and trenching for a new 400 linear feet bypass channel and culvert installation underneath UPRR) and on the northerly bank, 1,700 linear feet of the southerly

2008061077	Otay Business Park, TM5505, Log No. ER 93-19-006W San Diego County --San Diego The project would create 59 industrial lots, three drainage/detention basin lots, and 25.35 acres of on-site roads. No specific uses have been identified, except for a future sewer pump station on one of the lots. The project would be implemented in four phases, progressing from west to east. The future alignment of State Route 11, to be selected by Caltrans, would include a portion of the property in the northeast corner, affecting phase 4. Earthwork would consist of cut and fill of 1,200,000 cubic yards. On-site road improvements would include Siempre Viva Road, Airway Road, Alta Road, and three new roads. Off-site improvements would include extensions of Airway Road and Siempre Viva Road, expansion of Otay Mesa Road and Enrico Fermi Drive.	EIR	11/10/2010
2009011040	San Diego State University's Plaza Linda Verde Project California State University Trustees San Diego--San Diego The proposed project is a mixed-use student housing project that would be constructed on property located immediately south of the existing SDSU Campus Master Plan boundary, generally between Aztec Walk and Montezuma Road, and College Avenue and Campanile Drive. The project would include approximately 90,000 gross sf of ground-floor university/community-serving commercial/retail uses, and upper-floor student housing, containing approximately 294 apartments to house approximately 1,216 students. The project also would include: student apartment buildings, with approximately 96 apartments to house an additional approximate 416 students; parking facilities for approximately 500 vehicles; a Campus Green featuring a public promenade; and pedestrian malls (in place of existing streets/alleys) to facilitate a pedestrian-friendly atmosphere and link the project site to the main campus. The proposed project also would include the demolition of existing structures and parking lots, and development of portions of the project would be contingent upon the vacation of certain existing vehicular rights-of-way and the acquisition of properties. In conjunction with the proposed project, CSU/SDSU also is proposing to amend the SDSU Campus Master Plan boundary, such that the southern campus boundary between 55th Street and one block east of College Avenue would be extended south generally from the existing boundary at Aztec Walk to Montezuma Road. 2009111085	EIR 09-01 - Dos Colinas Carlsbad, City of --San Diego The proposed project consists of a 309-unit Continuing Care Retirement Community (CCRC), the relocation of a Recreational Vehicle (RV) storage and garden lot for the residents of the Rancho Carlsbad Estates (RCE), and a 29-unit income-restricted multi-family development (i.e. apartments). The proposed project will involve the reconfiguration and change of General Plan Land Use and zoning designations. As the proposed project may be the first of several private projects to be developed in this area and it relies on the extension of College Boulevard Reach "A" for access, the development of the core improvements for Reach A, including a bridge over Agua Hedionda Creek and frontage improvements, are proposed as a feature of the Dos Colinas project. The development of College Boulevard Reach "A" has already been analyzed and approved pursuant to EIR 98-02(SCH No. 99111082).	EIR	11/10/2010
2010091071	Use Permit No. 858-02(A) San Benito County --San Benito The project applicant (Robert Enz) is requesting an amendment to UP 858-02 to increase the permissible amount of material that may be removed from an existing mining operation from 20,000 tons per year to 100,000 tons per year. The mining operation is located on a 14-acre site at the end of Limekiln Road, near the opening of Thompson Creek canyon, consisting of a portion of APN's 26-04-14 and 26-11-02. UP 858-02 was approved by the Planning Commission in November 2003, along with Reclamation Plan 2002-14, which authorizes the applicant to mine rock from a site that is estimated to have in excess of 450,000 tons of material. The mined rock is then sold and used primarily for landscaping. As part of the requested amendment, the applicant has proposed an Operating Plan in connection with the removal of all mined material.	MND	10/26/2010
2010091072	Prezone 2010-1 Hollister, City of Hollister--San Benito NOTES: Review per Lead Prezone 2010-1 is a request for annexation to the City of Hollister 22.62 acres with 16.64 to General Commercial and 5.98 to Low Density Residential Performance Overlay zone. San Benito County Conditional Use Permit 1034-10 is a request for a private school with 62 studnets with 4,779sf of building area on a 24,596sf project area.	MND	10/27/2010
2010091074	EA42133, Conditional Use Permit No. 3627 Riverside County --Riverside Conditional Use Permit No. 3627 proposes to permit a facility to process organic green waste and manure (horse and steer) into fertilizer and soil amendments on two (2) parcels (APN 425-080-064, and 425-080-068) totaling approximately 57.41 gross acres. Development includes onsite grinder and screener equipment, a 1440sf modular office, 1.28 acres for compost windrows (a maximum of 5,600 cubic yards of green waste, 2,615 cubic yards of horse bedding manure, and 2,094 cubic yards of steer manure), 0.34 acres for finished product, 0.15 acres for equipment storage, a 1.33 acre evaporation pond, a private road (Class III Base) for internal circulation, and four (4) parking spots including one (1) accessible	MND	10/26/2010

	space. Approximately 40 acres will remain undeveloped.		
2010091075	Spirit Rock Master Plan Amendment Marin County --Marin The project sponsor proposes minor amendments to the Master Plan granted for the Spirit Rock Meditation Center in 1988. Following preparation of an Initial Study and adoption of a Negative Declaration, the 1988 Master Plan was approved to establish a development area envelope and provided a framework governing the uses, the intensity of uses, and the development of the site. The proposed Master Plan Amendment is described as "Phase 4" of the project (supplementing, and in some cases modifying, the 1988 Master Plan and its implementing Precise Development Plans, Phases 1, 2, and 3).	MND	10/26/2010
2010091076	Tentative Tract PLN10-00024 Victorville, City of Victorville--San Bernardino To allow for the development of an 83-lot single-family residential subdivision on approximately 21.4 gross acres of land.	MND	10/26/2010
2010092075	Smartville Road Bridge Replacement Yuba County --Yuba The Yuba County Public Works Department is seeking environmental approval of the Smartville Road Bridge Replacement project which seeks to replace the existing structurally deficient bridge that spans Vineyard Creek along Smartville Road just south of its intersection with Waldo Road and north of the "Grass Valley" entrance gate for Beale Air Force Base (AFB). The proposed project includes replacing the existing timber trestle bridge with a three span reinforced concrete bridge, the roadway approach shoulders leading up to the bridge will be widened, temporary new drainage culverts will be installed, and utilities relocated. This portion of Smartville Road is located 6 miles south of the intersection of State Highway Route 20 and Smartville Road in the River Highlands Community Plan, and south of the community of Smartville.	MND	10/26/2010
2010091073	Expansion Area Amendment to the Redevelopment Plans for the Merged Project Area Palmdale, City of Palmdale--Los Angeles The project proposes an amendment to the Redevelopment Plans for the Merged Project Area to add 7,787 acres to the Merged Project Area. Currently, each of the Project Areas in the Merged Project Area have separate Redevelopment Plans. The Expansion Area Amendment proposes to consolidate these into a single, Merged, Amended, and Restated Redevelopment Plan. The Merged Plan would allow the Community Redevelopment Agency of the City of Palmdale to acquire non-residential properties using eminent domain, as a last resort, in the Expansion Area. Permitted land uses within the Merged Project Area and proposed Expansion Area would be pursuant to those permitted by the General Plan, Zoning Ordinance, and all other state and local building codes, guidelines, or specific plans as they now exist or are hereafter amended. 1989082109	Specific Plan 256, Comprehensive General Plan 220 Riverside County NOTE: Addendum to EIR No.325 The County of Riverside is proposing modifications to the community sports park identified in Specific Plan No. 255, which is now known as the Temescal Valley Regional Sports Park. The Temescal Valley Regional Sports Park will encompass ~ 25 acres and include picnic shelters, a concession building, a restroom building, two basket ball courts, two baseball fields, one tennis court, seven soccer fields of varying sizes a skate area, two playgrounds, water play area, bicycle rack, and perimeter park concrete wall. Sports fields will be lit with Musco Lighting - Lighting Structure Green System lighting. The park will be open seven days a week from 6am - 10pm, with lights being turned off by 10pm. The project will include ~233 parking stalls and 10 parking stalls sized and designated for the disabled.	NOD	
1991063049	Hidden Valley Lake Water Pollution Control Board Hidden Valley Lake Community Services District MIDDLETOWN--LAKE The project includes installation of 72 solar arrays on a 1.2 acre, previously disturbed parcel of District owned lands adjacent to the Hidden Valley Lake Wastewater Treatment Plant. Each array is ~13' by 15'. It will be supported using an eight-inch diameter pipe supporting structure embedded in a concrete footing and protruding ~eight feet above grade and five feet below grade. The arrays will supply 100% of the power needed to operate the WWTP year round.	NOD	
1999011058	Nuevo / Torch Oil and Gas Operations in Western Kern County Kern County Buttonwillow--Kern The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code for the PXP 19Z Pipeline Project. The project is limited to the installation of two (2) 6-inch pipelines which run from PXP 19Z property to PXP Star Fee property. The pipeline will cross seven (7) ephemeral unnamed drainages. Each crossing will either have pipe supports placed in the streambed, or the pipelines will span the streambed. The California Department of Fish and Game (CDFG) has determined the Project is subject to regulation pursuant to Fish and Game Code Section 1600 et seq.	NOD	
2004112063	Master Permit for Env. Enhancement Projects Santa Cruz County Capitola--Santa Cruz This project is under the Master Permit issued to the Santa Cruz County Resource Conservation District (RCD) to administer the Santa Cruz Countywide Permit Coordination Program, for small, environmentally beneficial projects on private lands in Santa Cruz County. Project activities include constructing a boulder cascade for energy dissipation and removing the existing culvert. Construction of the project will require some re-grading of the existing channel banks upstream and downstream of the project site and the upstream reach of the channel will be realigned to reduce sediment. A new roadway section will be constructed after removal of an existing culvert. The project site will be re-vegetated with native plant species. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2010-0230-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Resource Conservation District of Santa Cruz County. 2010098275	<p>Majors Diversion Sedimentation Management Project #1 Fish & Game #3 Santa Cruz--Santa Cruz The Project activities include ongoing maintenance of the City of Santa Cruz Water Department's diversion intake by removing sediment and woody debris around the intake, installation of a trashrack upstream of the diversion dam, and vegetation clearing along the banks of Majors Creek. Initially, approximately 10 cubic yards of sediment will be removed upstream of the diversion dam. After material has been initially removed from the intake, future management of sediment transport via passive bypass through the upper gate will be guided by a formal protocol to reduce subsequent future inundation of the intake, and to ensure maintenance of sediment transport dynamics. SAA #1600-2009-0404-R3.</p>	NOE	
2010098276	<p>Geyserville Bridge Bank Stabilization Fish & Game #3 --Sonoma The California Department of Transportation (Caltrans) proposes to repair a river bank scour condition (Project) that has developed on the Russian River, adjacent to the Geyserville Bridge on State Route 128 in Sonoma County. The intent of the Project is to provide a repair that will resist scour and redirect flow while incorporating willow, cottonwood plantings, and submerged logs (woody material) to create riparian and fish habitat. The Project is intended as a short term solution. After 2 years of monitoring the completed Project, Caltrans will coordinate with the Department of Fish and Game (DFG) to determine the best approach for the long term solution at this site. The total area a volume of fill will be .46 acres and 2,115 cubic feet respectively. SAA #1600-2010-0320-R3.</p>	NOE	
2010098277	<p>Caltrans, Highway 1 Repair Slipout (Deer Trail) Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Sonoma The purpose of the proposed project is to repair and upgrade the roadway and drainage facilities that were damaged due to culvert failure. Caltrans proposes; repairing one culvert; installing rock slope protection; excavating and reconstructing the roadway embankments; paving the roadway; and applying erosion control to stabilize slopes. The proposed project will result in temporary and permanent impacts to waters of the U.S. and Waters of the State. The proposed project will result in temporary and permanent impacts to water of the U.S. and Waters of the State. Caltrans has determined the temporary impacts to streams identified as Waters of the U.S. and State would total approximately 435 feet x 2 (30 linear feet). The proposed project would result in 480 feet (24 linear feet) of permanent impacts to streams identified as Waters of the U.S. and State.</p>	NOE	
2010098278	<p>EcoSMART Laboratory San Gabriel Valley Mosquito & Vector Control District West Covina--Los Angeles Conversion of approximately 1700 square feet of existing warehouse space to an educational meeting space, insectarium, and laboratory space to serve students and residents of the San Gabriel Valley. The District will host educational programs, outreach activities, and service learning projects targeting elementary to college age students and interested members of the community.</p>	NOE

	State Route 138 project (also known as the E-220 Corridor) from State Route 14 in Los Angeles County to State Route 18 in San Bernardino County. The proposed alignment will connect the City of Palmdale with the Town of Apple Valley. The new freeway/expressway is ~63 miles long. Improvements to this corridor are considered necessary to provide for the existing and projected traffic demand attributed to growth and increasing developments in the northern portion of Los Angeles County and the Victor Valley region of San Bernardino County.		
2010092079	Alameda Countywide Integrated Waste Management Plan 2010 Amendments Alameda County Waste Management Authority --Alameda NOTES: Review Per Lead	Neg	10/29/2010
	This Initial Study/Negative Declaration evaluates the environmental effects of amending the ColWMP to increase composting and recycling goals and change the following policies: waste to energy, facility investment, transportation impacts to facilities, cost cap and funding diversification.		
2009011062	Crazy Horse Sanitary Landfill Closure Project Salinas Valley Solid Waste Authority Salinas--Monterey The proposed project is legally required update to the Final Closure Plan (2009) and Postclosure Maintenance Plan (2009) for the Crazy Horse Sanitary Landfill (CHSL), and the implementation of closure construction and maintenance activities in accordance with applicable regulatory standards and requirements governing closure and postclosure of solid waste landfills. The Final Closure Plan (2010) and a Final Postclosure Maintenance Plan (2010) have been prepared and will be submitted to the appropriate regulatory agencies.	NOD	
2009071079	Santa Clara River South Fork-Private Drain Nos. 725 and 1300 Los Angeles County Santa Clarita--Los Angeles The Applicant intends to alter the streambed by conducting maintenance activities and repairs at two different private drain facilities. Private Drain 725 (PD 725) work consists of the repair of four existing drop structures and construction of four equipment access ramps across the drop structures. Two new access ramps will be constructed from the access road to the channel bottom near drop structures 1 and 5. Private Drain 1300 (PD 1300) work consists of constructing an extension to the existing invert access ramp to allow access to the channel bottom. The extension will be 35 feet in length and 12-14 feet wide and includes the excavation of 260 cubic yards of material. Access and staging will be from the existing access road that runs along the channel. Work will be conducted when the channel is dry and vegetation removal will be minimal.	NOD	
2009111061	Triton Substation Project Public Utilities Commission Temecula--Riverside Construction of a 56 MVA 115/12 Kilovolt substation and the decommissioning of the 33/12kV Canine transformer bank located on a 10 acre parcel of land in the City of Temecula, Riverside County.	NOD

2010091088	New Hanford Courthouse Administrative Office of the Courts Hanford--Kings The Administrative Office of the Courts proposes to acquire property from the County of Kings, construct a new 3 story 12 courtroom courthouse (with a basement) and associated parking; and operate the facility to serve the Superior Court of California, County of Kings. The proposed project includes a surface parking lot with 360 parking spaces, a secure parking area for judicial officers and Superior Court managers, addition of a traffic signal to the 12th Avenue/Liberty Street intersection. After completion of the proposed courthouse, the Superior Court will vacate the existing Hanford Court buildings and Lemoore Courthouse.	MND	10/28/2010
2010092082	Vina Management Service, c/o Armando Ceja (PLP09-0062) Sonoma County Sonoma--Sonoma Request for a Use Permit for a winery with a maximum annual production capacity of 40,000 cases, and 1,100 micro brewery with public tasting, 18 special events a year, and participation in industry-wide events.	MND	10/28/2010
2010091085	Market Street Properties Riverside Community College District Riverside--Riverside The proposed RCCD Market Street Properties project (herein referred to as the project; includes the development of a facility to house District offices and RCC Culinary Arts program and renovation and restoration of the Heiting Building into a gallery and archives center, as further described below). The project involves demolition of the existing Plaza Hotel (~20,250 sf) and the existing RCCD System Office buildings consisting of ~ 17,620 sf of building space to provide for the construction of a three story building of 51,600 sf atop a two story sub-grade parking structure of 46,600 sf. The proposed project also includes restoration of the exterior facades of the Heiting building (former Citrus Belt Savings and Loan Building), and renovation of the facility to provide for a gallery and archives center. The proposed new office/culinary arts building will be located along Market Street from the corner of University Avenue to the Heiting building. The ~0.58 acre project site has been planned for the relocation of the Culinary Arts program along with the consolidation of all the RCCD administrative functions that are currently located at separate sites through the District. The art gallery and archives center, within the renovated Heiting building, will house existing and loaned collections of the district.	NOP	10/28/2010
2010092080	Academy of Art University Project San Francisco, City and County of San Francisco--San Francisco The Academy plans to accommodate growth in enrollment and programs through reuse of existing buildings and has identified 17 Study Areas in San Francisco for future expansion; each area contains one or more building(s) that the Academy has an interest in utilizing. The EIR will therefore analyze potential growth in 17 Study Areas that encompass those buildings. One Study Area is along Lombard Street, two are along the Van Ness corridor, one encompasses the Miod-Market area, seven are in the South of the Market area, one is in the Nob Hill/Tenderloin area, two are near Union Square, one is in the Mission Bay area, one is in Bayview/Hunters Point, and one is along Jerrold Avenue. A map of the Study Areas is available on-line at www.me.sfplanning.org . The Academy also operates a private shuttle service to transport students, faculty and staff among	NOP	10/28/2010

	these locations. The Academy may extend shuttle service to newly acquired sites.		
2010092081	Glenn County Housing Element 2010 Glenn County --Glenn The Planning & Public Works Agency acting on behalf of the County of Glenn has updated the Housing Element 2010. Revisions were made as requested by the Department of Housing and Community Development. The project consists of a recommendation that the Glenn County Board of Supervisors take the following actions: (A) Consideration and Decision of Adopting the (final) Housing Element 2010 as revised. (B) Consideration and Decision of Amending the General Plan in order to incorporate the Housing Element 2010; thereby replacing the existing Housing Element. (C) Consideration and Decision of Adopting a Negative Declaration for the project.	Neg	10/28/2010
2008052106	Harry Tracy Water Treatment Plant Long-Term Improvements Project San Francisco, City and County of San Bruno, Millbrae--San Mateo NOTE: Response to Comments The SFPUC proposes the Harry Tracy Water Treatment Plan (HTWTP) Long-Term Improvements Project. The proposed improvements include treatment process improvements to meet water quality and delivery reliability goals, seismic reliability improvements, and other improvements to the HTWTP such as pipeline distribution, access and site improvements. The treatment process would generally be the same even with the proposed improvements. The primary differences would be solids handling, whereby solids from the sludge holding tank would be transferred to a solids dewatering facility before being trucked off-site, and to the treated water storage, which would occur in a single new tank north of the main plant site instead of two tanks southeast of the main plant.	Oth	
2004082020	Curtis Park Village (P04-109) Sacramento, City of Sacramento--Sacramento Project Entitlements: General Plan Amendment, rezone, Inclusionary Housing Plan, Planned Unit Development Guidelines and Schematic Plan, Large Lot Tentative Subdivision Map, Tentative Subdivision Map, and subdivision modifications. The proposed project would convert the existing 72 acre project site into a mixed-use, urban infill development. Curtis Park Village, as proposed, would be one of Sacramento City's largest infill projects. The intent of the project is to create a neighborhood consisting of single-family home sites, multi-family and senior multi-family residential complexes, a neighborhood park area, and neighborhood-serving retail and commercial development. areas. The proposed project includes ~260,000 sf of commercial retail, 178 single-family home sites, and 80 unit senior multi-family housing complex, a 212 unit multi-family residential housing complex, and an 8.7 acres (6.8 net acres) park. 	The proposal consists of the widening and improvement of ~2.6 miles of SR 32 beginning at SR 99 and extending east just past Yosemite Drive. The project involves widening the highway to include a landscaped timber barrier median and 4 lanes. The project includes open-graded asphalt concrete and an 8ft. tall sound barrier along select rear yards of residential properties that abut SR 32. Additional landscaping, installation of traffic signals, and signal timing modifications are also proposed.		
2009112013	Yuba City Feather River Fish Screen Yuba City Yuba City--Sutter The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2010-0015-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Yuba City Utilities Department. The proposed project would construct a new intake structure for the City of Yuba City that includes a fish screen and increased diversion capacity. The proposed project would be located on the Feather River in Sutter County just upstream of the City's current intake location. The project area would extend along the west bank of the river near River Mile (RM) 28, east of Yuba City, and extend west along the access road through the orchard. The overall construction area at the intake site would cover ~100 ft. of riverbank and extend about 35 ft into the Feather River channel.	NOD	
2010098299	Marcum-Illinois New Well Public Health, Department of -- The California Department of Public Health is a responsible agency for this project. The Marcum-Illinois Union School District proposes to drill a new well.	NOE	
2010098300	1 Sign Install at Fiesta de Reyes Juan Street Parking Lot Entrance (10-11-SD-05) Parks and Recreation, Department of --San Diego This project consists of the installation of 1 new concession entrance sign in an existing above ground planter. The 4X4" subsurface, below the existing 12-14" planter depth. The sign would mark one of the entrances to Fiesta de Reyes a concession located in Old Town San Diego State Historic Park.	NOE

2009041029	Fontana Sports Park & Roadways Improvement Project Fontana, City of Fontana--San Bernardino The City of Fontana is proposing General Plan Amendment 09-010 from "R-MF", Residential Multi Family to "P-R", Public Recreation Facility, & Zone Change 09-05 from "R-3", MultiFamily Residential to "P-PF", Public Facility, and approved of a Site Plan that allows for the development of a 27 acre fast pitch softball Sports Park, with 5 lighted ballfields, a practice/warm-up area, battin cages, a 8,000 sf concession facility, a tot lot, other passive park areas and parking for 430 vehicles. A parcel map is also being processed that consolidated the Sports Park project site into one parcel. Vacation of Cooper Ave. south of Sierra Lakes Pkwy. to the SR 210 Freeway is also proposed. The project now includes right-of-way improvements to Sierra Lakes Pkwy from Catawba Ave west to Lytle Creek Rd, and to Knox Ave from Sierra Lakes Pkwy south to the SR 210 Freeway.	FIN	
2010031008	Panoche Valley Solar Farm Project San Benito County --San Benito Solargen Energy proposes to construct and operate a 420 MW photovoltaic (PV) solar power plant in the Panoche Valley, an unincorporated portion of southeastern San Benito County. The proposed project would include solar arrays, an electric substation, and operations and maintenance facilities that would cover nearly 2,500 acres. The project boundary would encompass 4,885 acres, and project development would allow for flood-plain areas between solar arrays to remain undeveloped within the project boundary. The project would be developed in 5 phases.	FIN	
2010082034	Station A Network 1 Reconductor Project Sacramento Municipal Utility District Sacramento--Sacramento Note: Final The purpose of the project would consist of installing approximately 1,850 linear feet of conduit in trenches, one 20- foot manhole/vault and three 8-foot by 14-foot manholes through of downtown Sacramento. The project route starts at station A (substation) at 6th and H streets, heads south on 6th Street, turns east on J Street, and then turns south on 7th Street to tie into manhole MH-760 by K Street. A cut-over will be constructed at the intersection of 7th and J streets that will intercept the existing conduits. This project would be constructed in three phases over a period of 165 days.	FIN	
2010091089	The Monrovia Nursery Specific Plan Glendora, City of Glendora--Los Angeles The proposed project is the adoption and implementation of a specific plan over ~95 acres in northwest Glendora which designates a development plan and development requirements for the development of the project areas as a large-lot, single-family subdivision. The development plan entails the establishment of a street circulation system, the alignment of major utilities such as electrical, gas, sewer, water, storm drain, and flood control improvements, project access, conceptual grading (projected to entail 357,000 cy of cut and 335,000 cy of fill), emergency access, an open space plan, public and private area landscaping requirements, and the implementation of certain agreements entered into by the City of Glendora addressing storm water runoff in the watershed area. <u>Documents Received on Thursday, September 30, 2010</u>			
	Development requirements address lot size, building size, building setbacks, maximum building height and area, and design guidelines necessary to construct a single-family residence and ancillary accessory buildings in the specific plan area. Other actions necessary to adopt a specific plan over the project site include the rezoning of the incorporated areas of the project from E-7/ 20,000 to Specific Plan and adoption of a new pre-zone over unincorporated areas of the project site from RA-20,000 to SP.		
2010091090	Western Municipal Water District Arlington Desalter Expansion Phase 2 Project Western Municipal Water District Riverside--Riverside NOTE: Review Per Lead	MND	11/01/2010
	In its ongoing efforts to improve the quality of groundwater in the Arlington Basin, increase the availability of potable water to the WMWD and to better manage groundwater levels in the Arlington Basin, the WMWD is proposing two basic project approaches (construction of extraction wells only or construction of extraction wells and recharge basins).		
	The Arlington Desalter is undergoing expansion of its treatment capacity to accommodate the increased demand for treatment capacity at the plant. The expansion includes an upgrade in the treatment process which will allow the Arlington Desalter to treat additional raw water while reducing the amount of brine wastes generated. Currently, the WMWD has adequate brine capacity in the SARI pipeline and discharges brine wastes to the SARI pipeline for treatment at the OCSD. The WMWD is in the process of improving the treatment efficiency of the Desalter facility. The WMWD forecasts that after the improvements are made to the Desalter facilities and the wells proposed by this project are operational, the Desalter will remain within its allotted discharge capacity in the SARI pipeline and treatment capacity in the OCSD.		
2010091091	San Vicente Road Drainage Improvement Project; FCDD-00231 San Diego County Escondido--San Diego	MND	10/29/2010
	The project consists of drainage improvements on San Vicente Road which will carry stormwater from the east side of San Vicente Road south along San Vicente Road for a distance of 200 ft and outfall 200 ft west of the road. The inlet will consist of a head wall and wing wall and a 18" reinforced concrete pipe supplemental inlet on the east side of San Vicente Road located at an unnamed private road south of Barger Road. The 6' x 2' underground culvert will be built on the east side of San Vicente Road for a distance of 200 ft before crossing San Vicente Road just north of San Vicente Terrace. The culvert will then travel 200 ft to the west across a portion of Ramona High School before draining into an unnamed drainage. The outfall will consist of a headwall, wingwall, and rip rap.		
2010091092	San Juan Creek Water Pipeline Relocation Project South Coast Water District Dana Point--Orange NOTE: Review Per Lead	MND	11/01/2010
	A 10 inch water main beneath San Juan Creek in Dana Point needs to be replaced or relocated to avoid potential failure. The District proposes the San Juan Creek Water Pipeline Relocation Project to abandon the section of pipeline under San Juan Creek and relocate the water pipeline so that it crosses San Juan Creek on

	the Stonehill Drive Bridge. The realigned pipeline, approximately 3,000 linear ft, will traverse a portion of Sycamore Creek Trails Park, cross to the east side of San Juan Creek on the Stonehill Bridge, and reconnect with the water line on the District's property.		
2010091095	Baldwin Major Subdivision (14 Lots), Tentative Map and Administrative Permit San Diego County Fallbrook--San Diego The project proposes to subdivide 31.9 acres into 14 residential lots.	MND	11/01/2010
2010092084	Fieldstone South Amendments Project Elk Grove, City of Elk Grove--Sacramento The project applicant for the triangular shaped 28.1 acre Fieldstone South residential development project is proposing to increase the total number of units from the 100 units approved in 2005 to 129 single family units. The proposed project is located in the EEGSP area and is bordered by Grant Line Road to the east, Wyland Drive to the west, and Elk Grove Creek to the north.	MND	10/29/2010
2005101104	Devers-Palo Verde No. 2 Transmission Line Project - Colorado River Substation Expansion Public Utilities Commission Blythe--Riverside, San Bernardino Expansion of the Colorado River Substation would serve to interconnect solar generation proposed for development in the Blythe area of the Mojave Desert to the DPV2 transmission line. The expansion of the Colorado River Substation would require expanding the permitted Colorado River Substation from 44 acres to 90 acres, looping two 500 kV circuits and terminating the new Devers-Colorado River transmission line into the substation, modifying existing 220 kV structure to allow the Devers-Colorado River to cross the Buck-Julian Hinds 220 kV transmission line, and constructing a distribution line to serve the Colorado River Substation.	NOP	10/29/2010
2010091093	Walmart Expansion Riverside, City of Riverside--Riverside The proposed Project represents an expansion of the existing Walmart store. The Project involves a total expansion of 22,272 sf on the east side of the building, resulting in an ~153,399 sf store, including ~28,036 sf of a grocery sales area and new entry vestibule. The Project involves the demolition of the existing Garden Center and Tire and Lube Express facility that is currently located on the east side of the existing Walmart building, adjacent to Van Buren Boulevard.	NOP	10/29/2010
2010091094	Southern Owens Valley Solar Ranch Los Angeles County --Inyo NOTE: Review Per Lead The Southern Owens Valley Solar Ranch (SOVSR) project is a proposed 200 megawatt (MW) net generating capacity solar energy facility using photovoltaic (PV) panel modules. Two potential sites for SOVSR are under consideration, each consisting of about 3,100 acres and each located on property entirely owned by the City of Los Angeles. Only one of these sites would be developed under the proposed project but both sites will be analyzed in the EIR. It is estimated that the proposed project would generate ~ 440 gigawatt hours the first year of commercial	NOP	11/15/2010

	operation. In addition to solar panel modules, the project would include access roads, O&M Building, collection system, and substation.		
2010092083	50 First Street (First and Mission) Project San Francisco, City and County of San Francisco--San Francisco The project sponsor, Marcus Heights, proposes to demolish 4 existing structures on 7 lots located at or near the northwest corner of First and Mission Streets. The project site, comprising 7 parcels, and portions of Elim Alley and Jessie St, is ~56,860 sf in size. The project sponsor proposes to develop 3 towers, ranging in height from 184 to 915 ft (to the top of the parapet and solar/wind energy collection features) containing a mix of office (~1.25 million sf), residential (about 182 dwelling units), retail (~43,000 sf), and hotel (about 266 rooms) use, along with a 15,000 sf entertainment venue (performance theater), 5 levels of below grade parking (about 310 spaces and 79 bicycle parking space), off-street loading spaces, and publicly accessible open space. The proposed project would remove all 4 existing structures on the site. The project sponsor is considering 2 variants (Option A and Option B) for access to, and circulation through, the project site.	NOP	10/29/2010
2010092085	Colusa Redevelopment Plan Adoption Colusa, City of Colusa--Colusa The purposes and objectives of the Redevelopment Plan are to eliminate the conditions of blight existing in the Project Area, as defined by CRL, and to prevent the recurrence of these blighting conditions. The Agency proposes to eliminate such conditions and prevent their recurrence by providing, pursuant to the Redevelopment Plan, for the planning, development, replanning, redesign, redevelopment, reconstruction, and rehabilitation of the Project Area and by providing for such facilities as may be appropriate or necessary in the interest of the general welfare, in accordance with the General Plan and other planning documents promulgated pursuant thereto as may be adopted or amended from time to time. 	resource to repair, renovate, and revitalize deteriorating facilities at 181 existing neighborhood schools within the San Diego Unified School District (SDUSD). Farb Middle School was built in 1979 and many of its facilities were identified through a comprehensive planning process as needing renovations, repairs, and/or upgrades as part of Prop S.		
2010071022	Serra High School - Data Center Project San Diego Unified School District San Diego--San Diego The project includes the construction of an approximately 10,992 sf data center building within the existing Serra High School Campus. The data center building would include a data center facility and IT classrooms for the high school students. The data center portion of the building will serve in conjunction with the existing data center located at 4100 Normal Street, San Diego, CA, by providing an active capacity for storage and retrieval of the SDUSD's network and computer-based applications including mission critical information. The proposed IT classrooms will serve the existing student population and will not increase the number of students attending Serra High School.	NOD	
2010099019	Policy for Maintaining Instream Flows in Northern California Coastal Streams State Water Resources Control Board --Marin, Sonoma, Napa, Mendocino, Humboldt The project consists of principles and guidelines for maintaining instream flows for the protection of fishery resources, while minimizing water supply impacts on other beneficial uses of water, such as irrigation, municipal use, and domestic use. The policy applies to applications to appropriate water, small domestic use and livestock stockpond registrations, and water right petitions.	NOD	
2010098310	Installation of Photovoltaic Panels System Mounted to a Combination of Roofs and Carports at Sierra College's Rocklin Campus Sierra Joint Community College District Rocklin--Placer Sierra College seeks to have a solar power provider install, finance, own and operate photovoltaic panels and accompanying equipment and systems on roofs and carports at the Project Location. Sierra College will be purchasing all of the energy output generated by this solar power system from the solar power provider.	NOE

2010098315	Perris Valley Regional Water Reclamation Facility Biodiesel Production from Grease waste Processing Facility Eastern Municipal Water District Perris--Riverside Grease waste within Eastern Municipal Water District's (District) Perris Valley Regional Wastewater Reclamation Facility (PVRWRF) service area totals more than 5 million gallons per year (GPY) and is currently primarily disposed of in landfills at considerable expense and cost to the environment. This waste material has the potential to produce biodiesel suitable for use in the District's fleet of diesel-powered vehicles and stationary engines.	NOE	
2010098316	Renovation of District Office Landscape Scotts Valley Water District Scotts Valley--Santa Cruz Work will be removal of existing plants, irrigation system components, and walkway structure and install new landscaping, irrigation system, and minor site improvements.	NOE	
2010098317	Lake Transit Authority Bus Stop Improvements Lake County --Lake Installation of bus shelters, benches, signs and ADA improvements.	NOE	
2010098318	Culvert Repair Project Caltrans #3 Colfax--Placer The scope of work includes: Install culvert liners, replace corrugated steel pipe and drainage inlets as needed, add rock slope protection to the culvert at PM 2.41, and install water pollution control BMP's.	NOE	
2010098319	Gorges Property Culvert Placement (1600-2010-0111-R2) Fish & Game #2 --Nevada The project is limited to placement of a CMP arch to act as a culvert under a driveway on the property. The bottomless arch will be 12 feet long by 7 feet wide by 5 feet 1 inch in height. The culvert will be backfilled and rip rapped to minimize back cutting on either end of the culvert by eddying water from the creek. The creek will be temporarily dewatered through placement of a temporary check dam in the creek. The water will be pumped through the project site during construction. Approximately 320 cubic yards of fill will be placed within the stream zone and around the culvert to create the driveway.	NOE	
2010098320	Scilacci Farms Pump Replacement (1600-2010-0096-R2) Fish & Game #2 Lincoln--Placer The project is limited to removal of an existing unscreened agricultural pump in Bunkham Slough and replacement with a screened agricultural pump in Coon Creek near the confluence of Coon Creek and Bunkham Slough.	NOE	
2010098321	Bear Creek Snowmobile Crossing SAA No. 1600-0133-R2 Fish & Game #2 --Alpine Alpine County proposes to place three 30" culverts, approximately 15' to 20' in length, placed side by side in the channel of Bear Creek between November 1 and December 31 depending upon the beginning of seasonal snowmelt and prior to peak run off. No other materials (soil, fill or other) will be placed within the creek	NOE

	channel. Using a cable or chain attached to a backhoe or loader, the culvert will be lowered into the channel. The equipment will access the site from the small parking lot located west of the site, and travel overland to the edge of the channel. Once lowered, the culverts will be moved into place by hand labor. No excavation or modification of the creek channel is necessary.		
2010098322	Pier Avenue Gate Parks and Recreation, Department of --San Luis Obispo This project involves installation of a gate and post barrier at the park's Pier Avenue entrance. The gate and posts will replace 11 portable barriers that are currently used to close the entrance way. The gate will be used as needed for closures when daily use capacity is met, ocean tide prohibits entrance and for entrance ramp maintenance. Current hours of operation and beach access will not be changed by this project. Pedestrian access to the beach will remain through existing pedestrian access points. This project is intended to reduce staffing costs involved in transporting temporary gates and provide a substantial deterrent to unauthorized vehicle entry during closure.	NOE	
2010098323	Mountain Yellow-Legged Frog CESA Candidacy Take Authorization; CALifornia Fish and Game Commission Adoption of California Code of Regulations Fish & Game Commission --Sacramento On September 15, 2010, the California Fish and Game Commission (Commission) adopted section 749.6 of Title 14 of the California Code of Regulations as an emergency regulation under the Administrative Procedure Act (APA). The regulation as adopted by the Commission pursuant to Fish and Game Code section 2084 authorizes incidental take of Mountain yellow-legged frog subject to certain terms and conditions prescribed in the regulation during the species' status as a candidate for listing under the California Endangered Species Act (CESA) (Fish & G. Code, Sec. 2050 et seq.). The Commission adopted the emergency regulation based on a finding that the regulation is necessary for the immediate preservation of the general welfare, among other reasons.	NOE	
2010098324	Fort Funston Telecommunication Facility Modification, AT&T Military Department - Office of the Adjutant General San Francisco--San Francisco The project consists of modification of an existing telecommunications facility under state lease on California National Guard property. The work includes the installation of one indoor equipment cabinet, installation of three new panel antennas to replace the existing three antennas on the existing monopole, twelve new coax cables run from equipment to the antennas, three new DTMA's per antenna configuration, and three new Remote Electronic Tuners (RET) controllers per antenna configuration. The new antennas and coax cable will be attached to the existing 78 foot 7 inch high monopole. An existing 1 1/2 acre parking lot will be cut along the existing conduit route, excavated as needed to allow for the installation of five new six inch diameter conduits for the coax cable. The parking lot will then be slurry coated.	NOE
